Mr. SHAFROTH. Why, there has been since the 1st day of January, as compared with the amount in the same five months of 1915. They have advanced from 73 per cent to 91 per cent. I should like to know what kind of a percentage the Senator would be satisfied with if he would not be willing to take 18 per cent in one year. That is the increase in value, besides the dividends that were paid; and the dividends that are paid now are larger than those that were paid before.

Mr. GALLINGER. The increase was largely in speculative stocks. Again, a good many of our railroads are not paying dividends now, but are in the hands of receivers. Is not that true?

Mr. SHAFROTH. Well, I have something on that point, too. I have shown that the net earnings of the railroads for May, 1916, was $23,874,052 more than for the same month of 1915.

The total sales of bonds on the New York Stock Exchange.

Sales from Jan. 1 to July 1—	
1916	$542,885,950
1915	401,935,700
1914	378,772,000

Tell me that you can have those increases without their influence extending to every part of the United States and every business of the United States! It is one of the best indexes of general prosperity that can be found.

BANK CLEARINGS REACH NEW HIGH RECORD.

The clearings of the national banks of the United States indicate the quantity of business transactions being conducted. The total for the six months ending July 1, 1916, was $118,832,198,407, while for the six months ended July 1, 1915, it was $82,465,296,421.

The clearings for 131 leading cities of the Union, according to Dun's Review, amounted for the month of June, 1916, to $20,515,438,480, the largest ever reported for that month, being an increase of 46 per cent over the same month of last year.

The total resources of the 19,460 trust companies, State, savings, and private banks on June 23, 1915, were $16,010,061,699.58, a gain of $520,854,439 over the statement for 1914.

Mr. President, on July 1, 1916, Hon. William G. McAdoo, Secretary of the Treasury, reported that there was a balance of $174,965,231.97 in the Treasury, and that there was a surplus for the fiscal year 1916 of $78,737,810.11, and that the cost of collecting the internal-revenue taxes was only 1.40 per cent, the lowest cost in the history of the Internal-Revenue Service.

The balances in the general fund for the fiscal years 1909 to 1916, exclusive of amounts credited to disbursing officers and outstanding Treasury warrants, are indicated in the following table, which I ask to have inserted in my remarks without reading.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The table referred to is as follows:

1909	$126,375,428.10
1910	106,894,675.67
1911	140,176,926.13
1912	167,152,478.99
1913	165,960,984.79
1914	161,612,615.53
1915	104,170,105.78
1916	174,965,231.97

Mr. SHAFROTH. The table shows a greater amount now than at any time within the period of eight years past.

STOCK OF GOLD $2,439,921,932.

The Treasury statement for the last day of the fiscal year 1916 shows that the stock of gold in the United States, including the gold reserve, the trust fund, and the available gold in the general fund amount to $2,439,921,932, the greatest in the history of the Government, and compared to which the gold stocks of other countries are small.

In a report of the Comptroller of the Currency, May 1, 1916, there is shown the unprecedented record of resources in the national banks in the central reserve and reserve cities of the country to the amount of $7,976,000,000, an increase of $259,000,000 over the report in answer to the call of March 7, 1916. The deposits during that period of two months increased $249,000,000.

These abundant stores of money, generously distributed through the length and breadth of our country, are the promise of the future for ever-increasing development of our resources, for continued and steady demands upon our industrial capacity, and for ever-expanding growth of our commerce. Capital in plenty now waits on enterprise and quickening activity in all lines assures fair returns.

The wealth of the United States in 1912 was estimated to be $187,739,071,090. Considering the great increase of values in the last two years, it must now amount to the enormous total of $225,000,000,000. Before the outbreak of the European war it was estimated that the wealth of Great Britain and Ireland was $85,000,000,000; of Germany, $80,000,000,000; of France, $50,000,000,000; and of Austria, $25,000,000,000. Thus the wealth of the United States is now, considering the great destruction of property in and war expenditures of those countries, far in excess of the wealth of Great Britain, Germany, France, and Austria combined. Nothing in the history of the world can compare with the enormous development of wealth and power of the great Republic of the Western Hemisphere.

Mr. President, some apprehension has been expressed that after the close of the great conflict the products of European factories will be dumped on the markets of this country. This assumption, in my judgment, is based upon fallacious reasoning. The outstanding fact is that the manufacturers of Europe have not any surplus to dump. On account of enlistments in the armies, the factories, to a large extent, have been depleted of their employees, whilst many of those remaining have been drafted into industries for the manufacture of all those things made necessary by war, including arms, explosives, munitions, clothing, blankets, and other material necessary for the soldiers; hence no accumulation of manufactured goods can be on hand.

WAR'S TOLL, 10,000,000 WORKERS.

No fears need be entertained that for many years to come manufactured articles, to any considerable extent, will be imported into the United States. The European manufacturers can not for decades compete with our industries. The death and disabling of 10,000,000 workers will cause a shortage of labor in Europe. Shortage of labor means increased wages for labor. That increased cost must be reflected in the increased price of the articles manufactured. The debts of the nations of Europe, after peace comes, will be almost unbearable. To pay even the interest on Europe's $100,000,000,000 of debt, which is a conservative estimate of the staggering total, will require enormous taxation to be imposed upon the factories, which increased expense is sure to be reflected in the higher cost of the product of the factory.

Mr. GALLINGER. Mr. President——

Mr. SHAFROTH. I will yield in just a moment. Where the raw material is produced in the country the enormous tax upon the lands from which the raw material is taken is certain to manifest itself in the increased price of the product, which increase will be reflected in the price of the article to be sold. The average tariff under the Payne-Aldrich bill was 49 per cent. Under the Underwood-Simmons bill it is 27 per cent. Our industries will have less competition from the manufacturers of Europe, with their high taxation and increased cost of labor and of raw material under the Underwood-Simmons Tariff Act than there was under the Payne-Aldrich tariff law. For that reason our factories need not fear the competition of Europe for many, many years.

I yield to the Senator from New Hampshire.

Mr. GALLINGER. The Senator directed his remarks to me personally regarding what would be likely to occur after the horrible war ceases in Europe. He contends that there will not be any surplus of foreign goods to be exported to this country. I will state that I have little knowledge except what I received from a man who has been living in Germany for several years and who recently came to this country. He told me that there was a great accumulation of goods in Germany, and it was being largely added to; that as soon as the soldiers wounded at the front were able to work they were put into factories; that the women were working in the factories; and that they were piling up goods with the expectation that as soon as the war closed they would invade our markets. That struck me as being very probable. This country is going to be about the only country

that will have any money after the war closes, and I apprehend that if Germany or England or France or Russia have any surplus goods, they are going to invade our markets for the purpose of getting the money which they will sorely need. That is all I know about it. It is my impression that we shall have a very serious invasion of our markets at the close of this European war. In common with the Senator, I hope it will not happen.

Mr. SHAFROTH. I do not think it will.

Mr. GALLINGER. I hope our industries will continue to prosper and that our manufacturers will not be harmed, but I can not bring myself to that view of the case, and I know a great many wiser men than I take my view of it.

Mr. SHAFROTH. But does not the Senator recognize that when Germany withdraws from industrial pursuits probably six or eight or nine millions of its workers it is bound to reduce the amount which they produce, and not only that, but they have pretty nearly stopped their factories except those things which are absolutely necessary for the carrying on of the war.

Mr. GALLINGER. If Germany were going to withdraw six or eight or nine million men—the Senator stated the other day ten million—there is going to be no such slaughter of Germans as that as a consequence of the war——

Mr. SHAFROTH. Oh, no; I was referring the other day to 10,000,000 as the number of killed and wounded on both sides in the war; but Germany has had in her army from eight to nine million men altogether from the start of the war to the present time.

Mr. GALLINGER. A very large number. If the Senator's figures were correct it would be a serious matter, but a large proportion of the wounded will be at work later on.

Mr. SHAFROTH. You can not withdraw from the manufacturing industries of that country and from the other industries of that country such an enormous force without pretty nearly stopping the wheels of industry. Those men not in the army have gone into the factories where they manufacture war material and clothing which their own soldiers use.

Mr. GALLINGER. But a large proportion of them were in the army at the start.

Mr. SHAFROTH. No; Germany had an army of about 600,000 men.

Mr. GALLINGER. More than that, I think, and these men were not in the factories when the war started.

Mr. THOMAS. If the Senator will permit me, I was reading the other day the testimony taken at the hearing on the bill which is known as the dyestuffs bill in the House. A number of gentlemen appeared before that committee in behalf of the establishment of the dyestuff industry and made the statement, perhaps by way of opinion rather than with absolute knowledge, that the close of the war would find Germany with a limited quantity of dyestuffs, which probably she would need for her own recuperative industries, and we could only get dyestuffs, therefore, by paying after the war enormous prices for a limited quantity.

I think it is self-evident that there can be no such thing as the manufacture of cotton fabrics in Germany and Austria during the continuance of the blockade. All cotton which can by any manner reach the ports of those countries will be needed for explosives. We know that they have been compelled to exercise their ingenuity, which is very great, in the preparation and discovery of substitutes for cotton in the manufacture of celluloid.

Mr. SHAFROTH. I thank the Senator for his statement, and I fully agree with him.

Mr. FLETCHER. I ask the Senator also in connection with the observation of the Senator from New Hampshire, suppose there will be an accumulation of manufactured products in Germany which will seek our markets, it does not necessarily indicate that we shall be flooded with those importations, nor does it indicate that we will suffer by reason of them, because there will be many products of our manufacturers which Germany would like to have. One country can not expect to extend its own trade unless it buys something from the people with whom it does business. Consequently, if Germany should send products here which we desire she will want products which we are able to manufacture and which she will require, and it would undoubtedly develop in a trade situation which would not only be not harmful, but would be beneficial to those countries.

Mr. SHAFROTH. Mr. President, in the discussion the other day by the Senator from Kansas [Mr. CURTIS], he made the assertion that—

> There has been no threatened panic, no chance to test the efficiency of the new system, but we do know that it has cost the Government a large sum to establish, operate, and maintain the 12 reserve banks to date. The organization expenses amounted to $493,960; the cost of the note issue was $804,705; the furniture and equipment cost $284,600; salaries of officers and employees of the Federal Reserve Board to December 31, 1915, amounted to $108,650; the salaries paid to the bank examiners amounted to $396,000; and the current expenses of the 12 Federal reserve banks amounted to $1,677,639. So you have a total expenditure from the date the banks opened for business to December 31, 1915, of $3,765,554, and the earnings of the banks were $2,130,610, or a cost to the Government to that date of $1,634,944.

Mr. President, no doubt the Senator believed that statement when he made it, but he forgot to look into the Federal reserve act, which has a clause in it in section 10 which I wish to read:

> The Federal Reserve Board shall have power to levy semiannually upon the Federal reserve banks, in proportion to their capital stock and surplus, an assessment sufficient to pay its estimated expenses and the salaries of its members and employees for the half year succeeding the levying of such assessment, together with any deficit carried forward from the preceding half year.

Not one dollar of the expense of the Federal Reserve System is paid by the Government. Not one officer is paid by the United States Government.

Mr. SMOOT. The bankers have to pay it.

Mr. SHAFROTH. The bankers pay it, and it is proper that they should pay it.

PROSPERITY BENEFITS EXTEND TO ALL.

Mr. President, the chief end of government is the happiness of its people. That state of being is most closely approached under a condition of general prosperity the benignant influences of which extend to all opportunity for fuller and more abundant life. On the other hand, blighting want sends a withering breath upon the spiritual aspirations of the Nation.

Thus it is that all the policies of good government have for their consummation the establishment of prosperity in the land. Its blessings extend to all classes. The productive capitalist and the industrious worker, the director of huge enterprise and his myriad helpers, see their dreams take form and in greater measure realize the fruits of their endeavors; the merchant in his counting room and the farmer toiling in his fields alike rejoice in the sun of prosperity; the men who sail the seas and those who delve beneath the earth's surface for nature's treasures participate in the bounty. The Nation is enriched, not alone materially but in a higher sense as the currents of life are putrified and a lofty idealism takes form in the national character.

PROSPERITY DEPENDENT UPON PEACE.

But this all-embracing prosperity is absolutely dependent upon a condition of peace. The strain upon our amicable relations with the other powers during the past two years has been so intense that the bonds of friendship might have been severed by a single unwarranted demand of the President. War, with its horrid train of evils, its annihilation of men and destruction of property, and its resultant deleterious effects upon our morals, would have superseded this marvelous prosperity and destroyed the peace and quiet of the happy homes of our land. Debt and depression, poverty and crime would have followed, for it has been demonstrated again and again that war is disastrous whether in defeat or victory.

When, therefore, during an administration of our Government amazing and general prosperity is enjoyed, produced, or at least accelerated, by the laws enacted by that administration and by the policies of its leader, I can not believe the American people are going to turn from those who have served them so well, to invite the risks and hazards of a change in leadership and in policy. I can not believe they will forsake the man who has guided the ship of state through these turbulent seas with such splendid success. But I believe it will be remembered by the American people with gratitude and thanksgiving for his great achievement in administration that "Peace hath her victories no less renowned than war."

Mr. CURTIS obtained the floor.

Mr. MARTINE of New Jersey. Mr. President——

The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from New Jersey?

Mr. CURTIS. I must decline to yield. I know the chairman of the Committee on Naval Affairs is anxious to get up the naval appropriation bill; I know we are all anxious to vote on it; and I promise to take only a few minutes of the time of the Senate.

Mr. MARTINE of New Jersey. Mr. President——

The PRESIDING OFFICER. Will the Senator from Kansas yield to the Senator from New Jersey?

Mr. CURTIS. I must decline to yield.

The PRESIDING OFFICER. The Senator from Kansas declines to yield.

Mr. CURTIS. Mr. President, I understood the Senator from Colorado to state in his opening remarks that no currency associations had been organized under the emergency act of June 30, 1908, until after the law was amended, August 4, 1914.

Mr. SHAFROTH. No; I said no currency was issued until after the amendment, which was made five days after the declaration of war.

Mr. CURTIS. While it is true there was no currency issued, yet the Secretary of the Treasury did announce that he had $500,000,000 ready to issue, and he stated further that a panic was prevented by that offer.

Now, I wish to read this extract from the report of the Comptroller of the Currency for 1913, because it was stated in the Senate a day or two ago that no association had been formed prior to the passage of the act of August 4, 1914. I read from the report of the Secretary of the Treasury for 1913:

Notwithstanding the fact that the act of May 30, 1908, relating in part to the establishment of national currency associations, will expire by limitation on June 30, 1914, two associations were formed in the past year, viz, the National Currency Association of Louisville, with 15 bank members, the capital and surplus being $6,795,000 and $3,178,000, respectively, and the National Currency Association of San Francisco, with 10 members, capital of $28,500,000 and surplus of $16,670,000. Up to the close of the report year there had been formed 20 associations, representing 339 banks, $365,084,710 capital, and $311,300,510 surplus.

Before I pass along I want to suggest a title to the Senator's speech. I want him to entitle his remarks "A tribute to the European war," because that is what it has been, and nothing else.

I wish now just for a moment to let the Senate know what the increase has been in our exports since the war. The Senators point to the prosperity of the farmer, and we are all glad the farmers are prosperous, and especially those of us from agricultural States, but the truth is that our sale of wheat to Europe during the first year of the war compared with the first year of the present tariff law in time of peace increased from $103,595,000 worth to $316,262,000 worth, a gain of 205 per cent. Our wheat is used to feed the armies of Europe. But what was wheat worth in this country at the beginning of the war? To show the effect that the war has had upon our prosperity let us take for comparison the year from September, 1913, to September, 1914, the year of peace and the first year of the Underwood law, and compare it with September, 1914, to September, 1915, the year of war and the second year of the Underwood law.

During the year of peace we sold in breadstuffs to Europe $181,484,000 worth. In the year of war we sold $567,607,000, a gain of 213 per cent.

In the year of peace we sold to Europe horses to the value of $3,177,000. In the year of war we sold them horses to the value of $82,276,000, a gain of 2,490 per cent.

In the year of peace we sold to Europe mules to the value of $622,000. In the year of war we sold them mules to the value of $18,041,000, a gain of 2,795 per cent.

During the year of peace we sold to Europe hay to the value of $790,000. During the year of war we sold to Europe hay to the value of $2,263,000, a gain of 233 per cent.

During the year of peace we sold to Europe meats and dairy products to the value of $138,736,000. During the year of war we sold them meats and dairy products to the value of $243,098,000, a gain of 75 per cent.

During the year of peace we sold to Europe sugar to the value of $4,341,000. During the year of war we sold to Europe sugar to the value of $36,816,000, a gain of 748 per cent.

Why should not the farmer of this country be prosperous when he is feeding the greatest armies that this world has ever seen?

Mr. JONES. Mr. President——

The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from Washington?

Mr. CURTIS. I yield.

Mr. JONES. I simply wish to call the attention of the Senator to the fact that during the month of peace under the Underwood tariff law the exportations actually decreased, as compared with the preceding months during the Payne-Aldrich law, and the importations increased.

Mr. CURTIS. I had intended to call attention to that fact, and as the Senator has kindly done so I will pass that part over.

Does the Democratic Party think that there is a farmer in all America that can be deceived as to the reason of their present prosperity or that has forgotten the conditions that prevailed in this country the year before the war and the first year of the Underwood law upon our statute books?

MINES.

But we are told that the mines of this country are enjoying great prosperity also. It is true that we are selling vast quantities of the products of our mines to Europe. They are needed for war purposes.

Taking the same dates heretofore used—that is, from September, 1913, to September, 1914, the year of peace, and September, 1914, to September, 1915, the year of war—official statistics tell a convincing story.

During the year of peace we sold to Europe $12,870,000 worth of goods manufactured from aluminum, brass, lead, and zinc. In the year of war we sold of the same products to Europe the value of $66,730,000, a gain of 419 per cent. Zinc is necessary in the manufacture of shells. In this one item alone our sales increased from $785,000 in the year of peace to $26,323,000 in the year of war, a gain of 3,253 per cent. Is it necessary to stop to explain the reason for the prosperity of our mines?

MANUFACTURES.

They tell us, too, that our woolen mills are running, while many of them were closed down the first year of this Democratic tariff law. Is there an explanation?

In the year of peace we sold to Europe woolen goods to the value of $4,753,000. In the year of war we sold to Europe woolen goods to the value of $32,057,000, a gain of 574 per cent. Is any further demonstration needed as to the cause of the present condition of the woolen mills?

The leather industry, they inform us, is no longer depressed as it was before the war. Let statistics give the answer.

In the year of peace we sold to Europe men's shoes to the value of $9,603,000. In the year of war we sold to Europe men's shoes to the value of $22,669,000, a gain of 267 per cent.

In the year of peace we sold to Europe goods manufactured from leather to the value of $43,390,000. In the year of war we sold to Europe goods manufactured from leather to the value of $90,804,000, a gain of 109 per cent.

In the year of peace we sold to Europe harness and saddlery to the value of $793,000. In the year of war we sold to Europe harness and saddlery to the value of $18,434,000, a gain of 2,223 per cent.

Is there anything mysterious about the increased activity in the leather industry?

In the steel industry there has been great activity also. Steel is the one thing that enters more directly into the manufacture of munitions of war than perhaps any other. Look at the figures in regard to this industry.

In the year of peace we sold to Europe steel bars and billets to the value of $7,590,000. In the year of war we sold to Europe of the same products to the value of $21,743,000, a gain of 186 per cent.

In the year of peace we sold to Europe barbed and other wire to the value of $7,472,000. In the year of war we sold to Europe barbed and other wire to the value of $18,882,000, a gain of 153 per cent.

In the year of peace we sold to Europe firearms to the value of $3,171,000. In the year of war we sold to Europe firearms to the value of $11,591,000, a gain of 265 per cent.

In the year of peace we sold to Europe explosives to the value of $6,244,000. In the year of war we sold to Europe explosives to the value of $71,806,000, a gain of 1,050 per cent.

In the year of peace we sold to Europe medical appliances to the value of $1,571,000. In the year of war we sold to Europe medical appliances to the value of $5,218,000, a gain of 231 per cent.

In the year of peace we sold to Europe machine tools to the value of $12,536,000. In the year of war we sold to Europe machine tools to the value of $34,550,000, a gain of 175 per cent.

During the year of peace we sold to Europe automobiles and automobile tires to the value of $34,000,000. During the year of war we sold to Europe automobiles and automobile tires to the value of $92,000,000, a gain of 170 per cent.

Mr. SHAFROTH. Mr. President——

The PRESIDING OFFICER (Mr. VARDAMAN in the chair). Does the Senator from Kansas yield to the Senator from Colorado?

Mr. CURTIS. I do.

Mr. SHAFROTH. Is it the position of the Senator that we ought not to have sold the automobiles and that we ought not to have sold the barbed wire?

Mr. CURTIS. It is not, but what I contend is that the Senator from Colorado and others boast of a prosperity brought about by the war in Europe. For one I am sorry that there has been and is now a war in Europe. I hope it may soon end. We stand for peace and we are not proud of a prosperity brought about by war.

Mr. SHAFROTH. Does not the Senator——

The PRESIDING OFFICER. Does the Senator from Kansas yield further?

Mr. CURTIS. I do.

Mr. SHAFROTH. Does not the Senator recognize that this prosperity has extended to every other branch of industry in the entire United States?

Mr. CURTIS. I answered that question a few minutes ago and I deny that it has extended to every other branch of industry. I told the Senator, and the Senator has not answered it, that there were more business failures in 1913 than in 1912, that there were more business failures in 1914 than in 1913, that there were more business failures in 1915 than in 1914, that there were more business failures in the first five months of the year 1916 than there were in the first five months of any other year in the history of the Government; and that to me is evidence that there is not general prosperity all over the country, and that the prosperity enjoyed to-day is due to the war in Europe.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from Utah?

Mr. CURTIS. I intended to take only a few moments if the Senator will just wait. I will yield, however, for a question.

Mr. SMOOT. I will take just a moment. I simply wanted to call the Senator's attention to the fact that the exportations for the fiscal year ending June 30, 1916, were the greatest in the history of the country. They were over $4,000,000,000.

Mr. President, more than one-half of those exportations were for munitions of war and to meet demands made by the war. As soon as the war closes that market will close. The actual truth is that there have been less exportations of products of the country that are generally sent to foreign countries in the past year than there had been for years and years before. Just as soon as the war ceases all the trade or all the industries manufacturing that $2,000,000,000 worth and more will have to find a market somewhere else or else the employees making them will be turned out of employment.

Mr. CURTIS. Mr. President, our trade with Europe during the year from September, 1914, to September, 1915—the year of war—as compared with the year immediately preceding—the year of peace—increased in "war orders" alone over $1,010,000,000.

Now, Mr. President, I want to call the attention of the Senate to another fact. In April, 1913, there was a gain of imports as compared with April, 1912, of $14,000,000. There was a loss of revenue of $7,000,000. In June there was a gain of $26,000,000 and a loss of revenue of $5,000,000. In December there was a gain of $17,000,000 in imports and a loss of $7,000,000 in revenue. So taking the total of those nine months there was a gain of $29,000,000 in imports and a loss of $86,000,000 in revenues.

It is true I made a statement the other day as to the expense of the Federal reserve act, and I took those figures from the report of the Federal Reserve Board. No Senator will deny the correctness of those figures. Eventually it all may come from the banks, but if it does it comes from the people who use this money. I asked the Senator if he did not recall that there were a large number of idle cars in the country prior to the European war. I want to read from the report of the Secretary of the Treasury, June 30, 1915, in which he says:

> The railroad situation shows extraordinary improvement and strength. Increases in gross and net earnings have been marked, in some cases being above the highest point ever before recorded. As recently as June 1, 1915, there were 300,000 idle cars, with a corresponding surplus of idle locomotives.

So the Senator may talk as much as he pleases, yet he must come back to the conclusion and must admit that the prosperity which he spends so much time talking about this morning is the result of the European war. While it is true that in many sections the prosperity has been very great indeed, yet it is also true, as I stated a few minutes ago, that it has not been general, and the great demand for our goods by the nations at war has caused an increase in the price of products to the American consumer and is largely responsible for the high cost of living in this country to-day. That the prosperity is not general is evidenced by the fact that there were more business failures in the years mentioned than there were before.

The business failures in the United States for 1914 were 16,794, the largest of any year prior to that time in the history of the country. In the year 1915 the business failures were 19,032. So the business failures have increased year by year since this administration came into power. More than that, this administration has been forced to resort to a war tax in a time of peace in order to raise the money to pay the ordinary expenses of the Government.

I suggest, in conclusion, again to the Senator that he should entitle his speech "A tribute to the European war."

SIR ROGER CASEMENT.

Mr. MARTINE of New Jersey. Mr. President, day before yesterday I gave notice to the Senate that I would ask for the relief of the Committee on Foreign Relations from the further consideration of Senate resolution No. 223. I realize at this time, after a conversation with the Senator from Virginia, that there is a parliamentary situation which makes it desirable to act upon the naval appropriation bill, but, Mr. President, I feel that this is a sad crisis. It is a situation, it seems to me, that should appeal to the humanitarian sentiments of the Senate. I ask that the Committee on Foreign Relations be relieved from the further consideration of Senate resolution 223.

Mr. SWANSON. Mr. President, the naval bill would have passed several days ago but for the extraneous matters and discussions that have been precipitated on the bill. I have been powerless to protect the bill, though I have interposed every objection I could, and shall do so for the future, in order that we may get the bill to an early passage. I can not consent to lay the bill aside for the motion of the Senator from New Jersey.

Mr. MARTINE of New Jersey. Mr. President, let me merely say that the appeal of Sir Roger Casement—and I shall occupy the time of the Senate for but a moment——

Mr. PENROSE. Let us have the regular order, Mr. President.

Mr. MARTINE of New Jersey. The appeal of Sir Roger Casement—this is the regular order, and the Senator from Pennsylvania——

The PRESIDING OFFICER. The Senator from New Jersey is in order to make a motion to take up this matter for consideration.

Mr. MARTINE of New Jersey. Mr. President, I realize and I am conscious of my rights. At the same time I desire to pay due deference to the distinguished Senator from Virginia [Mr. SWANSON]. I am as much interested in the passage of the naval bill as is the Senator from Virginia or the Senator from Pennsylvania [Mr. PENROSE], but, bigger and better than that, I am interested in the case of Sir Roger Casement.

I simply want to say that the appeal of Sir Roger Casement was denied before the English court of appeals on yesterday. This movement may accomplish nothing, but it can do no harm; at least it may accomplish some good. I fear that the patriotic Irishman may be hanged before the United States Senate shall have acted. Hence I plead in his behalf. I do not mean that his blood shall be on my hands. Let it not be said that the Senate of the United States, by a process of parliamentary and factious delay, has denied him the opportunity of having the few kindly words spoken in his behalf which I express in my resolution, wherein I ask that the President be requested to advise our ambassador at the Court of St. James to use his kindly efforts in an unofficial way to stay, or at least to secure a commutation, of the sentence of death against Sir Roger Casement.

I appreciate the situation in which I am placed, and I hope the Senate may appreciate the sad plight in which this patriotic Irishman is placed. I bow, as I must, to the parliamentary methods and the situation in which we find ourselves; but this question is not dead; I shall bring it up again; and I trust that the Senate may be willing to lend a listening ear to this, the cause of right, justice, and humanity.

The PRESIDING OFFICER. The Senator from New Jersey does not make the motion to take up this matter now?

Mr. MARTINE of New Jersey. I hesitate to make the motion, for the reason that I realize that a great measure is now here, and that, through parliamentary methods by the distinguished Senator from Virginia, it may be pressed forward to my detriment. Hence, reluctantly and hesitatingly, I acquiesce at this time.

NAVAL APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes.

Mr. SWANSON. Mr. President, the Senator from Pennsylvania [Mr. OLIVER] has an amendment which he desires to offer.

Mr. OLIVER. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Pennsylvania suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	du Pont	Kern	Oliver
Bankhead	Fletcher	Lane	Overman
Borah	Gallinger	Lewis	Page
Bryan	Gronna	Lippitt	Penrose
Chamberlain	Harding	Lodge	Poindexter
Clapp	Hitchcock	McCumber	Pomerene
Clark, Wyo.	Hughes	Martin, Va.	Reed
Clarke, Ark.	James	Martine, N. J.	Robinson
Culberson	Johnson, Me.	Myers	Shafroth
Cummins	Johnson, S. Dak.	Nelson	Sheppard
Curtis	Jones	Norris	Shields

Simmons	Sutherland	Underwood	Weeks
Smith, Ariz.	Swanson	Vardaman	Williams
Smith, Ga.	Taggart	Wadsworth	
Smoot	Thomas	Walsh	
Stone	Tillman	Warren	

The PRESIDING OFFICER. Sixty-one Senators having answered to their names, there is a quorum present.

Mr. OLIVER. Mr. President, I offer the amendment to the pending bill which I send to the desk.

The PRESIDING OFFICER. The amendment proposed by the Senator from Pennsylvania will be stated.

The SECRETARY. On page 24 it is proposed to strike out, from line 10 to and including line 4 on page 25, the following:

Armor plant: The Secretary of the Navy is hereby authorized and directed to provide, either by the erection of a factory or by the purchase of a factory, or both, for the manufacture of armor for the vessels of the Navy; said factory or factories to have an annual capacity of not less than 20,000 tons of armor; to be located at a place or places approved by the General Board of the Navy, with especial reference to considerations of safety in time of war; and the sum of $11,000,000 is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to be immediately available, for the purposes of this paragraph. And if the United States owns no suitable site or sites, authority is hereby given to acquire by purchase, condemnation, or gift such site or sites as may be necessary. The expenditures for drafting, technical, expert, and clerical assistance necessary shall be paid from the appropriation herein made.

The Secretary of the Navy shall keep accurate and itemized account of the cost per ton of the product of such factory or factories and report the same to Congress in his annual report.

Mr. OLIVER. Mr. President, the amendment which I offer is designed to stay the erection of the proposed Government plant for the manufacture of armor plate. The provision which I move to strike out is identical with the bill which passed the Senate some months ago and is now pending in the other House. When that bill was before the Senate I expressed myself in opposition to it at some length, and I will now speak but briefly upon the motion to strike it out of this bill. Since that bill passed the Senate offers have come from at least one of the manufacturers of armor plate which, I think, deserve the careful consideration of the Congress; and I firmly believe that if these offers are carefully considered no Senator ought to feel at liberty to vote in favor of the provision contained in the House bill.

I have here an offer, printed in a Washington newspaper on the 14th of this month and signed by the Bethlehem Steel Co., which I will read at length. It is headed, "Why Armor Manufacturers Have Not Shown Their Books," and reads as follows:

SERIES 2.

WHY ARMOR MANUFACTURERS HAVE NOT SHOWN THEIR BOOKS.

To the Members of Congress:

Congressman GOOD, addressing the House of Representatives May 31, said he would have supported the Butler amendment giving the Federal Trade Commission power to establish a price for armor plate (rather than build a Government plant)—

"Had these concerns permitted an answer to be made as to what it was costing them to make armor."

Congressman GOOD is under a misapprehension, and as the votes of other Members may have been influenced by the same misapprehension, we give the facts:

"(a) Secretary Daniels testified that one of the manufacturers some time ago sent him their actual cost records, with the proviso that he should keep this information confidential, and that he returned the record unread, because he felt he had no right to receive confidential information that he could not divulge to the American people.

"(b) One of the manufacturers handed to the Senate investigating committee a record of their costs, certified by public accountants, but they were not willing that this should be spread on the public record, and it was therefore returned to them.

"(c) We have offered to permit an examination of our plant and records by certified public accountants or the Federal Trade Commission.

"Is it conceivable that we would make such an offer if we had any fear that the actual figures would show extortion?"

OUR POSITION.

We have no objection to giving these details of costs to properly constituted authorities for their information and guidance. We do object to having them spread in public documents, where they shall be available to other manufacturers here, and particularly to the foreign manufacturers. We have never been able to get any data as to the cost at the German, English, French, and other plants.

All we know is that the United States Senate Naval Yearbook shows that all the great foreign Governments pay more for their armor than does the United States.

We would be very much interested in any detailed records of the foreign manufacturers' costs and methods of production, and they would, no doubt, be equally interested in ours, but we have no desire to voluntarily give them this information.

Nor do we believe it would be good policy for the United States Government to force out such information for the use of the foreigners. There isn't the slightest difficulty in obtaining such data for the use of the United States Government itself.

We repeat our offer:

We will open all our books to the Federal Trade Commission and accept any price for armor which the commission shall fix.

We believe our prices in the past have been fair. We make our offer in perfect confidence that complete examination by the Government's own agency will make that clear.

If we are right, isn't it worth while finding out? Has the Government anything to lose; has it not much to gain by putting our offer to the test?

BETHLEHEM STEEL CO.,
CHAS. M. SCHWAB, *Chairman.*
EUGENE G. GRACE, *President.*

Mr. President, this company offers to open all of its books to the Federal Trade Commission, a regularly established governmental agency, and to furnish armor plate to the Government at any price which that commission shall fix as being fair and right. Is it right to ignore a proposition like this, and enter upon a career of manufacture little understood by Government officials, involving an expenditure confessedly of $11,000,000, and in reality of at least double that sum? Is it right, I ask, to embark upon this project in the face of an offer from a responsible concern to allow the Government's own commission to fix what is a fair price? I understand that they will furnish armor for the next five years or longer at that figure. I tell you, Senators, that in persisting in this project to build an armor-plate plant in the face of such a proposition, you are voting to use from $11,000,000 to $20,000,000 of the people's money when you would not take a dollar out of your own pockets under the same circumstances.

This legislation places on Congress the responsibility for spending the people's money in a manner in which no sane man would spend his own. You have got to face this responsibility in adopting this legislation; and my reason for putting this offer in the RECORD is to make it plain that you are doing so.

I have a copy of a like offer which I send to the desk, and ask the Secretary to read as part of my remarks.

The PRESIDING OFFICER. The Secretary will read as requested.

The Secretary read as follows:

"JULY 17, 1916.

"*To the Senate:*

"May we ask that Senators, before acting finally on the naval bill, consider certain aspects of the Government armor-plant proposition?

"In considering these aspects, we respectfully request that Senators keep in mind at all times our offer to make armor for the United States Government at its own price.

"Senator OLIVER has introduced an amendment providing that the money for the Government plant shall not be available until the Federal Trade Commission has investigated the facts, determined what ought to be a fair price for armor plate, and the manufacturers have been afforded an opportunity to make armor at or below that price.

"We maintain no lobby at Washington to urge our views on any subject; we have advocated no plan of preparedness; our desire is to serve the United States Government to the extent and in the manner which the Government itself wishes to be served.

"We have been seeking earnestly for several months past to bring to the attention of Congress and the public the reasons why we believe it would be wasteful to construct a Government armor plant. We have sought to answer candidly and frankly every criticism which has been made, and every reason urged for a Government plant.

"1. It has been said that we have charged extortionate prices for armor plate.

"Our reply is that, according to official records of the Navy, this Government has for 20 years paid less for armor than any other great naval power.

"2. It has been said that it costs only $269 a ton to manufacture armor, whereas we have been paid $425—an 'exorbitant price.'

"Our reply is that $269 is the estimated shop cost in a 20,000-ton plant running full. The Naval Bureau of Ordnance reported June 28, 1913, that in a 10,000-ton plant running at one-half capacity the cost would be $394 per ton—with no allowance for interest. If interest were charged, the cost would be $49 per ton more.

"Our plant in over 29 years has been operated at an average of about one-third capacity. We could at any time have manufactured armor much more cheaply if orders had been more nearly equal to our capacity. If we had put into a commercial steel plant the same amount of money we have invested in an armor factory our profits from the steel-plant investment would be as great as have been our annual gross receipts from the armor plant. Armor manufacture, in fact, is the most difficult and the least profitable feature of the steel business.

"3. It has been said that our offer is a 'death-bed repentance;' that if the Government plant is not built, we will soon be trying to 'hold up' the Nation again.

"Our reply is that our offer is made in complete confidence that a thorough examination will show that our past prices have been reasonable, and that the lowest price at which the Government can possibly manufacture armor, accounting for all proper charges, but entirely without profit, would be higher than the prices at which we could manufacture and earn a small profit.

"We say this not in a spirit of boasting, but because our plant was built under economical conditions, and because our operation in connection with other steel undertakings, together with our long experience, make it possible for us to effect economies which the Government itself could not realize.

"We also agree to make our offer good just as long as the Government so desires.

"4. It has been said that we have threatened in case the Government armor plant was authorized, to raise the price of armor while the Government plant was being built.

"Our reply is that we have made no such threat and we have authorized no one to make on our behalf any threat of any kind. We do not do business that way.

"5. It has been said that we have sold armor plate abroad cheaper than in this country.

"Our reply is that most of the total amount sold abroad cheaper than in this country was for sample purposes—later followed by orders at higher prices than those paid in the United States—and that aside from three small testing plates sold to Japan, not in 21 years has the Bethlehem Steel Co. sold a pound of armor to a foreign country at as low a price as that prevailing in the United States at the same time.

"6. It has been said that we refused to open our books to the Government to enable a determination to be made of the profits of armor manufacture.

"Our reply is that we have been perfectly willing to submit our records to our own Government for its own information and guidance, but unwilling to have our records published for the information of other Governments or private manufacturers, especially in Europe.

"7. It has been said that we have been in collusion with other manufacturers with whom we were supposed to compete, and that the Government has been at the mercy of a combination.

"Our reply is that the Government has pursued a policy making any real competition in armor plate ineffective. The Government has asked for bids from the three manufacturers, but, no matter what the prices quoted, each year's business was divided among them. If the Government had desired real competition, it would each year have given the entire order to the lowest bidder. It has been the Government itself and not the manufacturers who have prevented competition.

"We must say in all candor that we feel the Government policy has been correct. The Government is practically the only customer in the armor business. The question is somewhat similar to that of railroad transportation—the solution of the problem is Government investigation and regulation.

"*When the people felt that the railroad rates should be controlled they gave necessary power to the Interstate Commerce Commission; they did not build Government railroads to supplant those already existing.*

"8. It has been said the existence of private armor plants creates an insidious temptation on the part of the manufacturers to encourage preparations for war; indeed, to promote war itself.

"Our reply is our offer to manufacture armor at any price the Government may fix, leaving it in the power of the Government, if it so wishes, to fix a rate of profit on armor so low as to counteract any unwholesome or undesirable ambitions to make 'profits out of war.'

"We undertook armor making at the behest of the United States Government. We have invested $7,000,000 in our armor plant, which is useful only for that purpose. If a Government factory supplants our own, our plant is rendered valueless, and the Government is deprived of a valuable reserve factor of safety in national defense.

"We can not believe that when the congressional program to authorize a Government armor plant was decided upon all of the foregoing considerations were in the minds of Congress; we are very sure that many Members of Congress did not realize how earnestly desirous we were of doing the fair and square thing by the Government, a purpose which we have sought to express in our offer to make armor at the Government's own price.

"Our company is not in politics. We can not see that there is any Democratic or Republican aspect to the quality of armor plate or the price paid for it. It is a business question, which, we respectfully submit, ought to be determined solely upon engineering and business grounds.

"Is it too much, therefore, to appeal to Congress to give heed to the foregoing suggestions and to stipulate that before $11,000,000 of the public money shall be expended in a Government armor plant the Government's own agent, the Federal Trade Commission, shall make a thorough inquiry, and name a price at which it will be advantageous to the public to have armor plate manufactured in the private plants already existing and adequate for all purposes?

"BETHLEHEM STEEL CO.,
"CHAS. M. SCHWAB, *Chairman.*
"EUGENE G. GRACE, *President.*"

Mr. OLIVER. Mr. President, I ask unanimous consent that these articles be published in the RECORD in the regular RECORD type, and not in the small type in which such matter usually appears.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. OLIVER. Mr. President, I have said about all I want to say on this subject. I do not want to tire the Senate with repeating the arguments that were presented to it months ago. I think by adopting my motion the Senate would be relieved from committing an act of folly. The Government needs all the money that it can raise at this time.

At a time when there is such urgent need of all the money that can be gathered up, when the administration is going out into the highways and byways and inflicting unheard-of methods of taxation upon the people, it is little less than criminal to spend this great amount of money needlessly and uselessly.

Mr. PENROSE. Mr. President, I do not know that I have anything to add to what my colleague has said upon this subject. I take it for granted that the Senate has made up its mind upon this question, and that nothing I might say at this time would alter the decision.

I have been arguing the question of the armor-plate industry in this body for nearly 20 years. I have had peculiar opportunities to be familiar with it. It happens that the three concerns which manufacture this product are located in the State which I in part represent—one in Philadelphia, one in Bethlehem, and one in Pittsburgh. Many years before I came to the Senate I knew the great men, the pioneers in metallurgy and in the steel business in Pennsylvania and elsewhere in the United States, and had opportunities for greater familiarity with the industry than occur to most people, and certainly to no one to an equal extent outside of Pennsylvania; and I know what they have done to develop in the United States the great iron and steel industry. I was entirely familiar with the early efforts made to establish the armor-plate industry here in the United States. It was done on the direct request of the American Government. It was done as an act of enterprise and of patriotism, in a spirit as old as the time of Alexander Hamilton, that we ought to make at home all the munitions of war, and not be dependent upon foreign nations for their manufacture.

I remember the early beginnings of the industry, the thousands of dollars that were spent without any immediate hope of reward or return in sending men to Europe to look into the processes of manufacture at Krupp's and in England and in other centers of the art, so that our mechanics and artisans and metallurgists here might be equipped with a knowledge of the processes entering into the manufacture of armor plate. At first only made by one concern, the Government continued to advertise every year for bids on armor plate, and gradually one and then another concern entered into the business at the special and definite request of the Government, through personal solicitation and through advertisements in the public prints. Never was it looked on as a competitive business. Even when the bids were different, the Government always divided the award of the armor among the three concerns. For what reason? From the recognized military policy that it was to the interest of the Government to have them all operating, fully equipped and at the service of the Government in time of war; and the only standard which the Secretary of the Navy had in his mind was a standard of reasonable price. The bids were put in. There were frequent negotiations between the Secretary of the Navy and the manufacturers, and the contracts

were awarded. The best evidence of that reasonable price is the fact that for many years—a score of years, if I am correct—the American Government has been getting armor plate very much cheaper than any other nation in the world; and no other nation in the world, except Japan, has attempted to manufacture armor plate, but has been entirely willing to pay liberal prices in order to keep the industry alive, and has encouraged private concerns in every way. Had England or Germany, during the war now going on in Europe, depended upon Government plants for armor plate and Government works for munitions, the nation which had depended upon such agencies would have been defeated many months ago.

In considering the proposition that these three concerns should be all kept alive, the same policy has been adopted which has always been found in this naval bill, which is found to-day in the provision that a certain number of these battleships herein authorized shall be built upon the Pacific coast. If the views of the Senator from Virginia and the chairman of the Naval Affairs Committee were to be followed out, that all these articles should be matters of strict competition, why should we go to greater expense to enable battleships to be built upon the Pacific coast when they all might be built upon the Atlantic coast at a reduction of several million dollars in cost? For the same reason that the armor-plate plants were kept alive, in order to maintain the industry there as a military asset in case of war.

I say without fear of contradiction that there is not an officer of the American Navy who approves of this project. I say without fear of contradiction that there is not a military authority in any civilized nation in the world who would not stand agast at this proposition of the American Senate, made here this afternoon, to establish this Government armor plant, which must inevitably result in putting out of business every one of these three concerns.

I say I have been arguing this question for 20 years in this body. I have fully recognized that it is surrounded with prejudice, with a dense ignorance, and with an abounding misrepresentation which I feel it is hopeless to try to clear away at the present time; and yet I never stood in my place in this Chamber and endeavored to explain a question to my colleagues with a more fearless conviction of the logical character of my argument and the rectitude of my stand, and the fact that I am defending the best interests of the American Government, than in the present instance.

It is supposed that the concerns which are manufacturing this product are in some way making extraordinary profits, and that this is their only occupation. As a matter of fact, Mr. President, the investment for armor plate averages some six or seven million dollars only in each of the concerns represented. In the case of the Pittsburgh concern it is such a negligible part of their business that they were not even represented here in the hearings before the Naval Committee, and I have no doubt that they would be glad to abandon the whole business altogether. In the case of the two concerns in the eastern part of Pennsylvania, in Philadelphia, and in Bethlehem, it is a slightly larger percentage of the total investment; and yet it is every day and every year becoming less and less a matter of moment to the owners of these vast concerns which are making commercial products, and I have no doubt that they would be glad to abandon the whole business were it not for the natural desire of any one with an investment to see it not altogether obliterated.

Could there be a fairer offer? Has there ever been an offer made to the American Government in its history of 140 years similar to the proposition now made by the armor plate manufacturers? First, after furnishing the armor for many years at a lower rate than that of any other country in the world, they agreed to reduce the price $30 a ton; and that not having been favorably considered either by the Secretary of the Navy or by the Naval Affairs Committee, they now appear and offer to submit their books to any inspection of accountants and to accept a price for a term of years, for the amount of this whole preparedness proposition, that may be fixed by the Federal Trade Commission. I know of no other concern in the long history of the Government, furnishing munitions or anything else, which has made an offer so candid and open and fair as this is.

I have one consolation, Mr. President. I hope to be able to show, when the revenue bill comes up, that the Treasury of the United States is practically bankrupt; that an enormous deficit will exist notwithstanding the passage of the pending revenue bill, with all its provisions, subject to possible litigation and oppressive on the people; so that I entertain an abiding conviction that this plant never will be built, and that perhaps in another Congress, when conditions have been corrected by the American people, this legislation can likewise be taken from the statute books, or modified so as to meet the practical requirements of the situation. But in the meanwhile, if there is a monstrous provision tending toward Government ownership of the most impracticable character, it is clear that this proposition of Government manufacture of armor plate is the worst. The highest form of the art of metallurgy is concerned, an art with many secret processes, the result of long experience on the part of a few men, requiring the highest priced operatives, perhaps, of any employees in any form of manufacture; at a time when materials are so high that even a private concern would hesitate to go into the construction of an armor-plate plant; when it is admitted that it will take three years, and probably will require five or eight to finish, and even then with no assurance of the expert talent, either of superintendents or of employees, that will be required to furnish the article—an article which has to be subjected to the severest tests of any commodity furnished to the American Government, and now the subject of rigid inspection by what you might say is an independent and even hostile board, the Government inspection. In the future under this bill the product will be inspected by the men, or the associates of the men, who manufacture it.

I can not find an argument, from a careful examination of the hearings and an attendance upon every meeting of the Naval Affairs Committee when this matter came up, that I can conceive would appeal to a military man, a naval man, a business man, or any sincere, patriotic citizen interested in getting through this program of preparedness, when we consider the offer made by the manufacturers of armor plate.

But, as I say, I will not detain the Senate longer. The hearings before the Senate committee were full. I doubt whether a very large percentage of the Senators have even taken the trouble to read them; but I ask to have inserted as part of my remarks, in the usual type of the CONGRESSIONAL RECORD, as my colleague suggested for his, a letter from Mr. Grace, the president of the Bethlehem Steel Co., to the chairman of the Senate Committee on Naval Affairs; and with that I will close my remarks.

The PRESIDING OFFICER. If there is no objection, it will be so ordered. The Chair hears none.

The matter referred to is as follows:

"THE BETHLEHEM STEEL CO.'S OFFER TO THE UNITED STATES GOVERNMENT.

"BETHLEHEM STEEL CO.,
"South Bethlehem, Pa., June 19, 1916.

"Hon. BENJAMIN R. TILLMAN,
"Chairman Senate Committee on Naval Affairs,
"United States Senate, Washington, D. C.

"MY DEAR SIR: As part of the naval appropriation bill as it comes to the Senate from the House of Representatives is a provision to construct a Government armor plant at a cost of $11,000,000. This provision is in substance identical with the separate bill passed by the Senate for the same purpose, the Senate bill itself not having been acted upon by the House. The proposition thus comes before the Senate as part of a new bill.

"I desire to present to your committee a proposition from my company which had not been made when the Senate previously acted on this matter, and which, I venture to hope, may warrant further consideration by the Senate.

"The Bethlehem Steel Co. will agree, for such period as the Government may designate as fully protecting the public interest, to manufacture armor plate for the Government of the United States at actual cost of operation plus such charges for overhead expenses, interest, and depreciation as the Federal Trade Commission may determine to be fair.

"OUR PREVIOUS PROPOSITION.

"When I appeared before your committee some months ago I proposed that certified public accountants satisfactory to the Navy Department should inventory our plants and determine the actual cost of making armor, and that with these figures in hand we should confer with the Secretary of the Navy and agree upon a price mutually satisfactory.

"That proposition was objected to by the Secretary of the Navy on the ground that he did not believe the determination of so important a matter should be left to the personal judgment of any individual happening at the moment to be the Secretary of the Navy.

"After the Senate had failed to act upon the foregoing suggestion, I appeared before the House Committee on Naval Affairs, and, in order to make our position still clearer, offered to place the absolute determination of the question of price in the hands of the Government itself as represented by the Federal Trade Commission.

"It has been suggested that our act was a 'death-bed repentance,' as it was not taken until it became apparent that the Government would authorize the building of an armor plant, which through Government manufacture would destroy the need and therefore the value of our own plant in which we had invested $7,000,000.

"The fact is that we do not for one moment concede that the prices charged for armor in the past have been unreasonable.

"Is it conceivable that we would make the proposition we have done if we were conscious of having been party to any extortion of the Government in the past?

"LOWER PRICE OFFERED REPEATEDLY.

"We have repeatedly offered to manufacture armor at a lower cost if a larger tonnage should be contracted for. The Government has asked for bids from the three manufacturers, but its practice has not been to give the contract to the lowest bidder; each year's order has been divided among the three plants, thus making abortive any efforts at competition.

"The Bureau of Ordnance, reporting to the Navy Department June 28, 1913, stated that without allowing anything for interest on investment the probable manufacturing cost of armor produced in a Government plant would be as follows:

[From hearing before the House Committee on Naval Affairs, 64th Cong., 1st sess., vol. 3, p. 3707, report of the Bureau of Ordnance on cost of Government armor factory.]

Output per annum.	Capacity of plant and cost per ton.		
	20,000 tons.	10,000 tons.	5,000 tons.
20,000 tons	$279	$349	$400
10,000 tons	.....	314	394
5,000 tons	.....	.....	354

"The bureau estimated that if interest on investment were to be added the sum of $49 per ton should be added to the foregoing charges on a plant of 10,000 tons capacity.

"Our plant has 12,000 tons capacity, and the average annual amount since 1887 which we have been asked to supply to the Government has been only 3,280 tons, or a little over 25 per cent of capacity. The average cost to the Government for the armor so supplied has been $432.62 per ton.

"It is obvious that the cost to be borne by each ton for overhead, interest, etc., increases as the annual output is reduced. Therefore, accepting the Government's own figures, with a capacity such as we have, operating at less than one-third its capacity, the production cost in a Government plant, without allowance for interest, would have been much greater than the $432.62 which we were paid.

"Our new proposition is not a 'death-bed repentance,' it is a renewed effort to make clear to the Government and to the public that we seek only what is absolutely fair. Our proposition is made in complete confidence that thorough consideration by a competent and impartial tribunal will establish two facts:

"1. That our policy and prices in the past have been reasonable; and

"2. Such are the economies that we can effect in the manufacture of armor in connection with our other products that under present conditions we can manufacture for the Government cheaper than the Government can possibly do so for itself.

"TAKING THE PROFIT OUT OF WAR.

"It is said that a Government plant should be built 'to take the profit out of war.'

"Our company has no inclination to make capital out of the military necessities of the United States. In the event of war or threatened war all the facilities we have for any purpose are at the disposal of the United States Government upon its own terms. That means not only our armor plant; it includes our commercial plant and our ordnance-making facilities. We have urged no program of preparedness; we desire only to be able to serve the Government as we may be called upon.

"Our armor plant was built at the request of the Government of the United States. That request has, by the implicit action of successive Secretaries of the Navy, been frequently renewed.

"The Government has acted upon the theory that it was desirable to maintain a reserve armor-making capacity, not alone for the ordinary but also for the unexpected requirements of the Government.

"WHY WE HAVE NOT PUBLISHED ANY DETAILED COST FIGURES.

"It has been stated that we have declined to place our cost figures at the disposal of the Government, and that construction of an armor plant would enable the Government to determine costs from actual experience.

"The fact is that we have repeatedly agreed to place all the figures relating to our costs and details thereof privately at the disposal of committees of Congress or the Navy Department of the United States. We have frankly demurred at having these figures published for the information of the naval departments and armor manufacturers in foreign countries. Armor manufacturers in foreign countries, while declining to give us information, have made efforts to obtain our detail costs. We do not feel that it would be fair to publish our figures for their information, when they are so scrupulously careful to prevent our benefiting through examination of their figures.

"The situation in brief, as we see it, is as follows:

"1. Figures compiled for your committee have shown you that the United States has for the past 20 years obtained armor plate at a price materially less than that paid by any of the great naval powers, while our labor costs were and are higher than those prevailing in any other country.

"2. The Navy Department has repeatedly testified that the quality of armor supplied for these reduced prices was better than the armor made for the navy of any other nation in the world.

"3. The existing prices of material and labor are very much higher than was the case when the estimate was made that the proposed Government plant of 20,000 tons capacity could be built for $11,000,000.

"Our experience indicates that the cost now will be fully $15,000,000, and probably more.

"4. The naval lessons of the present war remain to be learned.

"What they shall teach with reference to armor and the relative value of projectiles and armor is still to be seen. Under no conditions can an armor plant be built in less than three years. Thus the problem to be faced in the manufacture of armor may be absolutely different by the time the plant could possibly be ready for use.

"5. The private armor-making capacity in this country was brought into existence at the behest of the Government.

"In these three plants some $20,000,000 has been invested. The capacity of these plants is and for many years will continue to be in excess of the requirements of the American Government.

"These facilities are of value for no other purposes than the making of armor, and the construction and development of a Government plant would mean the practical confiscation of these plants and the elimination of reserve capacity, which might become vitally important in any emergency in national defense.

"THE INEVITABLE EFFECT OF A GOVERNMENT PLANT.

"It has been urged that it is no part of the purpose of the Government to destroy existing armor plants; that the plan is wholly to provide Government competition, and the purpose of a Government plant will have been fulfilled if the plant is built and the key thrown away.

"We respectfully submit that there is no occasion for such a waste of Government funds. We do, however, call attention to the fact that in contracting for articles which the Government itself makes orders are not placed with private concerns until the capacity of the Government plant is exhausted.

"WHAT WE URGE.

"Under the foregoing circumstances we respectfully ask your committee to reconsider its former recommendation on this subject and to bring to the attention of the Senate these considerations:

"1. That all purposes of the United States Government will be served if the Federal Trade Commission is empowered to determine the price and the Navy Department the quality of the armor which shall be manufactured for the use of the United States Government.

"2. That until under the foregoing conditions the existing capacity of armor plants built for and at the request of the Government is utilized it will be unfair to private manufacturers for the Government to take action which will in effect confiscate their property.

"3. That until the naval lessons of the present war in Europe have been disclosed, and until a practical effort has been made to obtain armor from private manufacturers under the conditions named, the Government should not proceed with the expenditure of the public money necessary to construct an armor-making plant.

"This question should not be determined with reference to the interests of the Bethlehem Steel Co., but with supreme regard for adequate national defense and sound public policy.

"Our company asks no favors; we only ask that the Government thoroughly ascertain what the facts are and then look those facts frankly in the face. If the facts are found to be as we have stated them, and are seen to be as advantageous to the Government as we believe them to be, we respectfully ask the Government to do what it finds to be fair to us.

"As you are aware, we maintain no 'lobby' in Washington to urge our views on this or any other matter. We have sought and are seeking to present our views of this measure in the frankest and most public way we can devise. In keeping with our policy we shall, therefore, take the liberty of giving this letter to the press, as well as make such other distribution of it as will bring it adequately to public attention.

"If your committee desires further information, I shall be very glad to appear before you and give you all details in my power. We only ask that you give us a fair chance before you take steps to cripple our industry.

"Very respectfully,

"E. G. GRACE, *President*."

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Pennsylvania [Mr. OLIVER].

Mr. GRONNA. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from North Dakota suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Harding	Nelson	Smith, S. C.
Bankhead	Hitchcock	Newlands	Smoot
Brandegee	Hughes	Norris	Sutherland
Bryan	James	Oliver	Swanson
Catron	Johnson, S. Dak.	Overman	Taggart
Chamberlain	Jones	Page	Thomas
Clapp	Kern	Penrose	Thompson
Clark, Wyo.	Lane	Poindexter	Townsend
Clarke, Ark.	Lee, Md.	Pomerene	Vardaman
Culberson	Lewis	Ransdell	Wadsworth
Cummins	Lippitt	Reed	Warren
Fletcher	Lodge	Robinson	Weeks
Gallinger	Martin, Va.	Sheppard	Williams
Gronna	Martine, N. J.	Smith, Ariz.	Works

Mr. MARTINE of New Jersey. I have been requested to announce that the senior Senator from Illinois [Mr. SHERMAN] is absent on official business.

Mr. TOWNSEND. The senior Senator from Michigan [Mr. SMITH] is absent and is paired with the junior Senator from Missouri [Mr. REED]. This announcement may stand for the day.

The PRESIDING OFFICER. Fifty-seven Senators have answered to their names. There is a quorum present. The question is on agreeing to the amendment offered by the Senator from Pennsylvania [Mr. OLIVER].

Mr. CLAPP. On that I call for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. GALLINGER (when his name was called). I have a general pair with the senior Senator from New York [Mr. O'GORMAN]. I transfer that pair to the junior Senator from Idaho [Mr. BRADY] and will vote. I vote "yea."

Mr. MARTINE of New Jersey (when his name was called). I have a general pair with the senior Senator from Illinois [Mr. SHERMAN]. I transfer that pair to the junior Senator from New Hampshire [Mr. HOLLIS] and will vote. I vote "nay."

Mr. THOMAS (when his name was called). In the absence of the senior Senator from North Dakota [Mr. MCCUMBER], with whom I have a pair, I withhold my vote.

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Tennessee [Mr. LEA] and vote "nay."

The roll call was concluded.

Mr. DILLINGHAM. I have a general pair with the senior Senator from Maryland [Mr. SMITH] and for that reason I withhold my vote. If he were present and I were permitted to vote, I would vote "yea."

Mr. CLARK of Wyoming. In the absence of the senior Senator from Missouri [Mr. STONE], with whom I have a pair, I withhold my vote. If at liberty to vote, I should vote "yea."

Mr. CURTIS. I ask if the junior Senator from Georgia [Mr. HARDWICK] has voted.

The VICE PRESIDENT. He has not.

Mr. CURTIS. I am paired with that Senator and withhold my vote. If I were at liberty to vote, I should vote "yea."

Mr. THOMAS. I transfer my pair with the senior Senator from North Dakota [Mr. MCCUMBER] to the junior Senator from California [Mr. PHELAN] and vote "nay."

Mr. MYERS. I have a pair with the Senator from Connecticut [Mr. MCLEAN], who is absent. In his absence, I transfer that pair to the Senator from Wisconsin [Mr. HUSTING] and vote "nay."

Mr. REED (after having voted in the negative). I voted without having announced the transfer of my pair with the Senator from Michigan [Mr. SMITH] to the Senator from Oklahoma [Mr. GORE]. I make that announcement, and allow my vote to stand.

Mr. CATRON. I am paired with the Senator from Oklahoma [Mr. OWEN]. In his absence I withhold my vote.

Mr. GRONNA (after having voted in the negative). I voted, but I have a general pair with the senior Senator from Maine [Mr. JOHNSON]. He is not in the Chamber, and as I can not transfer my pair, I will withdraw my vote.

Mr. CURTIS. I was requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY]; and

The Senator from New Mexico [Mr. FALL] with the Senator from West Virginia [Mr. CHILTON].

The result was announced—yeas 17, nays 51, as follows:

YEAS—17.

Brandegee	Lodge	Smoot	Warren
du Pont	Nelson	Sutherland	Weeks
Gallinger	Oliver	Taggart	
Harding	Page	Townsend	
Lippitt	Penrose	Wadsworth	

NAYS—51.

Ashurst	James	Norris	Smith, Ga.
Bankhead	Johnson, S. Dak.	Overman	Smith, S. C.
Beckham	Jones	Pittman	Sterling
Borah	Kenyon	Poindexter	Swanson
Bryan	Kern	Pomerene	Thomas
Chamberlain	La Follette	Ransdell	Thompson
Clapp	Lane	Reed	Tillman
Clarke, Ark.	Lee, Md.	Robinson	Underwood
Culberson	Lewis	Shafroth	Vardaman
Cummins	Martin, Va.	Sheppard	Walsh
Fletcher	Martine, N. J.	Shields	Williams
Hitchcock	Myers	Simmons	Works
Hughes	Newlands	Smith, Ariz.	

NOT VOTING—27.

Brady	Dillingham	Husting	Phelan
Broussard	Fall	Johnson, Me.	Saulsbury
Catron	Goff	Lea, Tenn.	Sherman
Chilton	Gore	McCumber	Smith, Md.
Clark, Wyo.	Gronna	McLean	Smith, Mich.
Colt	Hardwick	O'Gorman	Stone
Curtis	Hollis	Owen	

So Mr. OLIVER'S amendment was rejected.

Mr. OLIVER. I offer the following amendment.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 25, after line 4, insert:

The Federal Trade Commission is hereby directed, immediately after the passage of this act, and annually thereafter, upon the request of the Secretary of the Navy, to investigate and inventory the armor-plate plants of the United States, and to estimate and determine the average full cost of producing armor plate at said plants under the four following conditions, to wit:

(a) Plants running at full capacity.
(b) Plants running at two-thirds capacity.
(c) Plants running at half capacity.
(d) Plants running at one-third capacity.

After so determining the full cost of producing armor plate at said plants the said Federal Trade Commission shall at once report to the Secretary of the Navy a fair and reasonable price the Government should pay for its armor plate. Upon receipt of such report the Secretary of the Navy is hereby authorized to enter into a contract or contracts for armor plate to meet the needs of the Government, now or hereafter, at or below the price per ton so reported as the fair price for the proportion which the tonnage awarded bears to the aggregate capacity of the plants, and the appropriation hereby made for the erection or purchase of an armor-plate plant shall not be used for that purpose until the said report has been made to the Secretary of the Navy and the manufacturers of armor plate have failed, within 30 days after notice of such report, to accept the same and to enter into a contract for the manufacture of said armor plate at or below the price per ton so reported by said commission.

Mr. OLIVER. Mr. President, I will not take the time of the Senate to enlarge upon this amendment. In one of the communications included within my remarks the Bethlehem Steel Co. offered to allow the Federal Trade Commission to examine its books and to ascertain what would be a fair price for armor plate and to manufacture armor plate at that price. It is only one of the three companies which are now fitted to make armor plate. This amendment is intended to give the other two companies a chance to abide by the same conditions and to manufacture armor plate under that offer and at the fair price which may be ascertained by the Federal Trade Commission. If it is found that they will do it and will enter into contracts to that effect, then the money appropriated in this bill shall not be used for the construction of a plant.

I simply want to give Senators a chance to vote upon this proposition, and I call for the yeas and nays upon it.

Mr. SWANSON. Before the vote is taken I wish to state that the subject of this amendment has had full discussion here for almost three weeks. The Bethlehem Co. makes no obligation to do this except what may be in an advertisement. The Bethlehem Co. makes 11,000 tons, and we need 28,000 tons for this program. Hence for the residue we would have no assurance for reasonable prices. It will be three or four years before we can build an armor-plate plant; hence the greater the necessity of starting one or purchasing one at an early date.

We have discussed this matter here fully, and I ask for a vote on the amendment. I discussed the matter fully when it was before the Senate about six months ago.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania [Mr. OLIVER], on which the yeas and nays are demanded.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CLARK of Wyoming (when his name was called). By reason of my pair with the senior Senator from Missouri [Mr. STONE], heretofore announced, I withhold my vote.

Mr. GALLINGER (when his name was called). Again announcing my pair with the Senator from New York [Mr. O'GORMAN], and not knowing how he would vote on this question, I withhold my vote.

Mr. MYERS (when his name was called). I announce the same transfer of my pair that I made on the last vote and vote "nay."

Mr. THOMAS (when his name was called). I again announce my pair and withhold my vote.

Mr. TILLMAN (when his name was called). Repeating the announcement about the transfer of my pair, I vote "nay."

The roll call was concluded.

Mr. CURTIS. I am paired with the junior Senator from Georgia [Mr. HARDWICK] and withhold my vote.

Mr. DILLINGHAM (after having voted in the affirmative). I am compelled to withdraw my vote, as I have a pair with the senior Senator from Maryland [Mr. SMITH], who is absent.

Mr. MARTINE of New Jersey. I have a general pair with the Senator from Illinois [Mr. SHERMAN]. I transfer that pair to the Senator from New Hampshire [Mr. HOLLIS] and vote "nay."

Mr. LODGE (after having voted in the affirmative). I have a general pair with the Senator from Georgia [Mr. SMITH]. I do not see him in the Chamber, and therefore I withdraw my vote.

Mr. MARTINE of New Jersey. I was requested to announce that the Senator from West Virginia [Mr. CHILTON] is absent on public business. As has been stated, he is paired with the Senator from New Mexico [Mr. FALL].

Mr. REED. I transfer my pair with the Senator from Michigan [Mr. SMITH] to the Senator from Oklahoma [Mr. GORE] and vote "nay."

Mr. PITTMAN. I wish to announce the absence of the Senator from Delaware [Mr. SAULSBURY] on account of illness. He is paired with the Senator from Rhode Island [Mr. COLT].

The result was announced—yeas 16, nays 49, as follows:

YEAS—16.

Brandegee	Lippitt	Page	Townsend
Catron	Nelson	Penrose	Wadsworth
du Pont	Newlands	Smoot	Warren
Harding	Oliver	Sutherland	Weeks

NAYS—49.

Bankhead	Johnson, Me.	Overman	Sterling
Beckham	Johnson, S. Dak.	Owen	Swanson
Borah	Jones	Pittman	Taggart
Bryan	Kenyon	Poindexter	Thompson
Chamberlain	Kern	Pomerene	Tillman
Clapp	La Follette	Ransdell	Underwood
Culberson	Lane	Reed	Vardaman
Cummins	Lee, Md.	Robinson	Walsh
Fletcher	Lewis	Shafroth	Williams
Gronna	Martin, Va.	Sheppard	Works
Hitchcock	Martine, N. J.	Shields	
Hughes	Myers	Simmons	
James	Norris	Smith, S. C.	

NOT VOTING—30.

Ashurst	Dillingham	Lea, Tenn.	Smith, Ariz.
Brady	Fall	Lodge	Smith, Ga.
Broussard	Gallinger	McCumber	Smith, Md.
Chilton	Goff	McLean	Smith, Mich.
Clark, Wyo.	Gore	O'Gorman	Stone
Clarke, Ark.	Hardwick	Phelan	Thomas
Colt	Hollis	Saulsbury	
Curtis	Husting	Sherman	

So Mr. OLIVER's amendment was rejected.

Mr. OLIVER. I move to amend the bill by striking out the proviso beginning on line 2, page 183. I will state that I will simply ask for a vote on this amendment; I will not ask for the yeas and nays.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 183, beginning in line 2, it is proposed to strike out the proviso in the following words:

Provided, That no part of the appropriations made in this act shall be available for the salary or pay of any officer, manager, superintendent, foreman, or other person having charge of the work of any employee of the United States Government while making or causing to be made with a stop watch or other time-measuring device a time study of any job of any such employee between the starting and completion thereof, or of the movements of any such employee while engaged upon such work; nor shall any part of the appropriations made in this act be available to pay any premium or bonus or cash reward to any employee in addition to his regular wages, except for suggestions resulting in improvements or economy in the operation of any Government plant.

Mr. GALLINGER. Mr. President, assuming from the statement made by the Senator from Pennsylvania that he is not going to call for the yeas and nays on this amendment, I want to go on record as saying that I shall vote for striking it out, no matter how the vote is taken.

The VICE PRESIDENT. The question is on the amendment of the Senator from Pennsylvania.

The amendment was rejected.

Mr. CUMMINS. Mr. President, before I yield the floor I shall offer an amendment to the bill under consideration, but first I desire to submit some observations upon the measure generally. I will be as brief as it is possible to be under the circumstances.

It not infrequently happens to me, and I assume my experience is that of other Senators, that I find it utterly impossible to express accurately and fully my view upon a subject through a vote for or against a comprehensive bill. It is for this reason, Mr. President, I beg the indulgence of the Senate for a few minutes while I consider the general aspects of the subject of preparedness.

The defense of our homes and of our country and our institutions is, I assume, the most sacred and imperative obligation that falls upon a member of organized society. Without entering into the probabilities of the future, it is sufficient to say that every sane man must be conscious that there may come a time which will require the defense of these homes, institutions, and Government. It has always seemed to me, therefore, a conclusion from which no man could reasonably dissent, that we ought to be adequately prepared to defend these institutions of ours; to defend them successfully, efficiently, and with the least possible expenditure of blood and treasure. Notwithstanding this conclusion, however, I have a word to say with regard to the campaign for preparedness, which has stimulated this country in the last few months.

There have been two classes of men who have been most vociferous in the campaign for preparedness with whom I have no sympathy whatever. The first class is composed of the men who make money out of war; the men who are engaged for profit in the manufacture of munitions of war and the various forms of armament. I do not assert that these men are consciously inciting this country to war; that they consciously desire war; that they intentionally would bring upon this country the horrors of war; but I do say that they are incompetent judges of any national situation. It is utterly impossible for them to reach a righteous conclusion upon a subject in which they are so directly and so vitally interested.

The other class is composed of men who apparently believe that we ought to bluff and bluster our way through the world and with all the other nations of the earth; that we ought to assume in every international controversy that we are right beyond argument, and that, if our demands are not entirely met by those with whom we are engaged, we must interpose our military power in order to enforce those demands. I have no sympathy whatever with this class of men. I think we ought to maintain our rights with vigor and earnestness; but I for one am not willing to concede that in the great majority of instances in which we may differ from other nations of the earth we ought to enforce what we believe to be justice through the force of arms.

Most of these men are, happily for themselves, beyond the military age; they are not deterred by the consequences which war imposes upon the large body of our citizenship. I think their campaign for preparedness has been simply intolerable to the justice-loving and peace-loving people of the country. They have violated every principle of decency and fair-mindedness in the manner in which they have urged upon the United States the preparedness which we are now about to establish. The fact, however, that these men, who, for reasons I have stated, are incompetent to determine the true policy of a nation like ours are for preparedness does not in the least deter me from doing whatsoever I can to prepare this country for any contingency which, according to human foresight, it is likely to confront.

I think, however, all of us have been misled by attempting to rest upon the lessons of history. I for one do not believe that preparedness has made for peace; I do not believe that weakness has made for peace. I believe that both preparedness and weakness have made for war in the unhappy experience of mankind. There can be no war because of weakness, unless some power prepared to take advantage of the weakness precipitates the conflict. War results from neither preparedness nor from weakness. It has come in the past simply because man is a fighting animal; it has come because the human race has been filled with a lust for power, inflamed by ambition, moved by avarice and by all the other temptations which beset the human family.

The Bible is mainly a history of war. If you would eliminate from that holy volume the story of war, you would strike out the major part of the holy record. History, sacred or profane, is nothing but a history of war. The first eighteen hundred years of the Christian era present a perpetual scene of war. Rome was prepared—no nation was ever better prepared—and yet she spent 500 years and more in war creating the Republic and the Empire. She then spent 500 years in war, attempting to defend what she had acquired through the force of arms; and all Europe is a repetition of the story of Rome.

My distinguished friend from Idaho [Mr. BORAH] mentioned very eloquently a day or two ago the instance of Greece in her unpreparedness against Philip. Greece would have fallen, no matter how well she had been prepared; but Philip was prepared and the war ensued. The Republic of Venice, no matter how thoroughly it might have prepared itself, could not have withstood in the end the inroads of the barbarians. So it is found in every page of history. Preparedness leads one nation to war; weakness commits another nation to war. The difference between preparedness and weakness or unpreparedness is in the consequence of war and not in the probability of the war.

Mr. CLAPP. Mr. President, will the Senator pardon an interruption?

Mr. CUMMINS. Yes.

Mr. CLAPP. Is not the consequence always and ultimately the same? While Greece was not prepared to meet Philip, Philip was prepared, but the empire which was founded through his activities in turn perished. So it has been the history of all nations that were prepared in their warfare against the unprepared that eventually the prepared nation fell.

Mr. CUMMINS. It is inevitable. If one nation takes advantage of the weakness of another, war ensues just the same, but the consequences of the war may be vastly different.

Mr. BORAH. Mr. President——

Mr. CUMMINS. I yield to the Senator from Idaho.

Mr. BORAH. I merely wish to say that it seems to me that we might find an illustration to cover the entire situation from both standpoints in the history of China. It has had an experience which may be instructive either way.

Mr. CUMMINS. It simply verifies what I have already said. War is inevitable with China, if you please, because she is weak and Japan is strong; but if Japan is prepared, you may as well impute her conflict with China to the preparedness of Japan as to the unpreparedness of China. The truth is that the whole world has been fighting during its entire recorded history, and if we can not present some better solution than preparedness we may better protect ourselves, but we will not prevent war; and that is the object I have in mind in presenting that phase of the subject.

Preparedness is no solution for the world's trouble; preparedness is just as sure to be followed by conflict, bloody, dire, and devastating, as unpreparedness. To show that preparedness is not the solution for the great evil of mankind it is only necessary to instance the difference between the strong and the weak nation. What could prepare Mexico to withstand an attack of the United States, assuming that both nations are prepared to their full capacity? What opportunity would the 15,000,000 people of Mexico, bowed down with poverty, have to meet successfully the hundred millions or more of the United States, with all her wealth, greater than is found within the domain of any other nation in the world? Assuming that they both have taken on all the preparedness of which modern science is capable of bestowing upon a nation, what opportunity would Nicaragua have to defend her institutions and her homes against an assault by the United States, no matter how thoroughly she might be prepared, or Honduras, or San Salvador, or Panama, or Colombia, or any other nation, if you please, in the Western Hemisphere?

It is idle, Mr. President, for us to declare that preparedness is the path to peace and is the solution of the mighty problem with which humanity has been grappling now these many years. Suppose we take the beginning of the present war. What chance would Servia have had against Austria if both nations had been completely prepared? What chance would Spain have in the highest state of preparedness against the inroads of Great Britain or of France or of Germany?

If the weaker nations of the world are to be preserved, if we are not to yield to the passion for conquest until the earth is divided among a few great nations, preparedness is not the answer to the question which is thundering in our ears.

In all this remember that I am not suggesting, even remotely, that the United States ought not to be prepared; but I am not deluded by the argument that if we are prepared we will avoid the horrors of war.

It has been said over and over again by all those who have discussed the matter that human nature is the same now that it was a thousand years ago. I do not quite agree to that broad declaration; but assume that human nature is the same, assume that there is in the American heart the same desire for conquest and for subjugation that filled the minds of the kings and the princes of the olden times, we will use our preparedness in the same way that they used theirs, and if no nation seeks to attack us we will employ our preparedness in overcoming other countries.

Why not? If we are no better than they were in Philip's time, if we are no better than they were in the days of the Republic of Venice, if we are no better than they were during all the wars that afflicted Europe and Asia for eighteen hundred years, who dares to assure the world that we will not use these instruments of warfare just as they have been employed during all the past?

I, however, am not willing to concede that human nature is as it was. I am not willing to concede that the hearts of the twentieth century are as brutal and ferocious as the hearts of the tenth century. I know that I am at once confronted with the instance of the most disastrous and destructive war that ever ravaged humanity, now in progress across the sea; but, notwithstanding that war, I am still of the opinion that men and women are better now than they were in the ancient days. I am still of the opinion that there is a tendency, marked, emphatic, which I hope will have its fruition soon, to settle international controversies in some other way than upon the battle field. I am still of the opinion that the vast ambitions of men to occupy the earth have been curbed, and that we are not as willing to wreak our vengeance or to use our power against weaker nations, looking to their extinction, as a thousand years ago.

Again, of course, it will be said to me that Belgium is a bleeding, butchered witness against my suggestion. The evidence, however, is but superficial. We have a right to examine the whole history of the last hundred years and of the movement for international peace, of the place it has in the hearts of the men and women of this country, before we yield to the assertion that civilization has not advanced, that it is not intrenched better than it was in the barbarous ages, and that we must assume that in the future war is to be the normal condition of mankind, and that each nation, according to its strength, is to take what it can and keep what it takes.

I have not lost my confidence, at least, in the advance of civilization. I have not lost my hope that in the future the great majority of international disputes, those which formerly would have led to war, will be adjusted through international tribunals established in the cause of peace. I have not lost my faith, at least, in the justice and the honor of nations—a justice and honor that preclude these invasions of the rights of weaker countries in order to advantage and benefit the strong.

This brings me to the suggestion I have to make concerning this bill, and it will at once be seen why my vote can not accurately express my view of the entire subject embraced by the measure. I believe we ought to go steadily forward in the prosecution of a policy which has been adopted by the people of this country, a policy accepted now for years by the people of this country, in the way of providing an Army and a Navy. I believe that we ought to build first-class battleships, some of them; we ought to build first-class battle cruisers, some of them. We entered upon the policy years ago. We had a definite object in view. We had a definite standing to reach—a relative standing among the nations. My objection to this bill is the announcement to the world that we have abandoned the policy of the olden time, that we have abandoned any hope of peace among nations, that we have lost our faith in the movement for peace, and that we intend in the future to assume that our international controversies are to be settled by the arbitrament of war instead of through the peaceful tribunal of justice.

Every Senator knows that the paragraph in the bill which authorizes the President to undertake the construction of 10

first-class battleships and 6 battle cruisers is a plain announcement to the world of our purpose. It will be construed in the way I have suggested. It will destroy, in a large measure, our influence for peace when the opportunity comes to exert that influence. It will not advance the construction of a battleship or a cruiser by a single day. We already have four battleships, and possibly more, authorized, two of which are under construction, and two of which have not yet been submitted either to our navy yards or to contractors for construction. We all know that within the next two years we can not build the battleships and the cruisers that are provided for in the bill. We all know that we can not even undertake, and will not undertake, the construction of the four battleships and four cruisers that are given especial prominence in one paragraph of the bill. I appeal to the candor of every Senator here and to the country that in providing for 10 battleships and 6 battle cruisers and the remaining 141 fighting and nonfighting craft we are simply saying to the world that we intend to accomplish our purposes through military strength, and that for the time being at least we have abandoned a great propaganda for the peaceful settlement and adjustment of international disputes.

I had hoped that when this war came to an end we would be in a position to say to the other nations of the world that if we must get ready for instant warfare with the greatest of the powers, we are able to do so, but that we do not desire to do so. I had hoped that we would have the influence, unimpaired in position, to say to all the nations of the earth: "We favor an enlargement of the settlement of international conflicts in a peaceful way."

I had hoped that we would be able to say, by our example, that "we favor a general disarmament among nations," and thus end the ruinous competition for naval strength which we have witnessed in Great Britain and Germany, and possibly in other countries, which, if pursued, must inevitably lead every country indulging in it to bankruptcy, hopelessness, poverty, and disgrace.

I am hoping still that we may exercise this righteous influence upon the minds of those who will determine the terms of peace. I am conscious that this measure will destroy a part of that influence. I am unwilling to cast a vote against the reasonable preparedness of the Nation. I am unwilling, through my vote, to arrest the fair, natural growth of the Navy. I shall therefore vote for the bill; but I could not do it without laying before the Senate in this fashion my views concerning preparedness, concerning the duty of the United States in the circumstances in which the Nation is placed. It is because I hope that the effect of the announcement which I believe to be contained in the bill may be somewhat mitigated, and in the hope that what I am about to propose will to some degree prepare the powers now at war, and other nations which hitherto have not been drawn into the conflict, for the part which the United States ought to play in the mighty drama that will succeed the war, that I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to amend by striking out lines 13 and 14 and the first five words of line 15, on page 181, and inserting——

Mr. CUMMINS. I ask the Secretary, before reading the amendment, to read the first part of the section as it now is and then to read the amendment.

The SECRETARY. On page 181 it is proposed to amend by striking out lines 13 and 14 and the first five words of line 15. The paragraph now reads as follows——

Mr. KENYON. Mr. President, is the Secretary now reading the part that is to be stricken out?

Mr. CUMMINS. He is reading the part proposed to be stricken out. It is part of the House bill.

The SECRETARY. The paragraph in the House bill reads as follows, beginning on page 181, line 13:

Upon the conclusion of the war in Europe, or as soon thereafter as it may be done, the President of the United States is authorized to invite all the great Governments of the world to send representatives to a conference which shall be charged with the duty of formulating a plan for a court of arbitration or other tribunal to which disputed questions between nations shall be referred for adjudication and peaceful settlement, and to consider the question of disarmament, and submit their recommendation to their respective Governments for approval.

It is proposed to strike out from that paragraph the following words:

Upon the conclusion of the war in Europe, or as soon thereafter as it may be done, the President of the United States is authorized to invite—

And to insert—

It is hereby declared to be the policy of the United States to adjust and settle its international disputes through mediation or arbitration, to the end that war may be honorably avoided. It looks with apprehension and disfavor upon a general increase of armament throughout the world, but it realizes that no single nation can disarm, and that without a common agreement upon the subject every considerable power must maintain a relative standing in military strength.

In view of the premises, the President is authorized and requested to invite, at an appropriate time, not later than the close of the war in Europe—

And so forth.

Mr. SWANSON. Mr. President, I think that is an improvement upon the text of the bill, and I gladly accept it.

The VICE PRESIDENT. The question is on the amendment of the Senator from Iowa.

The amendment was agreed to.

Mr. CUMMINS. I offer the following amendment. On page 182, line 6, I move to strike out the word "appropriations" and insert the word "construction." As the bill now reads it provides:

If at any time before the appropriations authorized by this act shall have been contracted for there shall have been established, with the cooperation of the United States of America, an international tribunal—

And so on.

The appropriation that is made in this act is for a single year. The authorization for construction runs over a much longer period. It seems to me that the authority to the President to invite this conference should relate to the construction authorized by the act.

Mr. SWANSON. I fully concur with the Senator that the word "construction" should be used rather than "appropriations." I gladly accept the amendment.

The VICE PRESIDENT. The amendment will be agreed to, without objection. The bill is in the Senate as in Committee of the Whole and open to further amendment.

Mr. SWANSON. The Senator from Wisconsin [Mr. LA FOLLETTE] has an amendment to offer, and he ought to be sent for.

Mr. CLAPP. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gronna	Nelson	Sutherland
Bankhead	Harding	Norris	Swanson
Beckham	Hitchcock	Overman	Taggart
Borah	James	Owen	Thomas
Brandegee	Johnson, Me.	Page	Thompson
Broussard	Johnson, S. Dak.	Poindexter	Townsend
Chamberlain	Jones	Ransdell	Underwood
Clapp	Kenyon	Reed	Vardaman
Clark, Wyo.	La Follette	Robinson	Wadsworth
Culberson	Lane	Shafroth	Weeks
Cummins	Lewis	Sheppard	Williams
Curtis	Lodge	Shields	Works
Fletcher	Martin, Va.	Smith, Ariz.	
Gallinger	Martine, N. J.	Smoot	

The VICE PRESIDENT. Fifty-five Senators have answered to the roll call. There is a quorum present.

Mr. LA FOLLETTE. Mr. President, I offer the amendment which I send to the desk to come in on page 172, line 13, after the word "paid."

The VICE PRESIDENT. The amendment will be read.

The SECRETARY. On page 172, line 13, after the word "paid," insert a colon and the following proviso:

Provided, That no battleship, battle cruiser, scout cruiser, torpedo-boat destroyer, or submarine herein appropriated for shall be employed in any manner to coerce or compel the collection of any pecuniary claim of any kind, class, or nature, or to enforce any claim of right to any grant or concession for or on behalf of any private citizen, copartnership, or corporation of the United States against the Government of Mexico or of any Central or South American Government.

Mr. LA FOLLETTE. Mr. President, I offer that amendment at this time.

Mr. BRANDEGEE. I make a point of order against the amendment that it is in violation of the rule which prohibits legislation upon an appropriation bill.

The VICE PRESIDENT. The Chair is inclined to believe that if there can be a limitation upon an appropriation for the purposes for which the appropriation may be made there may be also a limitation upon the use of the article provided for in the appropriation. The Chair believes it is simply a limitation upon the bill and is not general legislation.

Mr. BRANDEGEE. Will the Chair listen to argument upon that question a moment?

The VICE PRESIDENT. The Chair will hear the Senator from Connecticut.

Mr. BRANDEGEE. I do not care to take more than 30 seconds in a discussion of the question.

Mr. President, a limitation as to the way in which the money appropriated shall be spent is one thing, but it seems to me that to say in a bill where you are appropriating money for the construction of ships that the Navy of the United States for all time shall never be used for the purposes stated in the legislation that we put on the bill in this amendment is in no

sense a limitation upon the expenditure of the money but it is a limitation upon the use of the armed forces of the United States by the Commander in Chief. I hope the Chair will take that view of the point.

The VICE PRESIDENT. The Chair has listened to a good deal of discussion that has gone on during the progress of the bill with reference to the President of the United States being the Commander in Chief of the Army and Navy of the United States as though the Congress of the United States had no power or authority whatever over the creation of an Army or the creation of a Navy or any power with regard to determining anything that the Army or Navy should or should not do. There have been views expressed here that the President of the United States can do anything he pleases with the Army and the Navy of the United States. The Chair does not know whether he has that power or not, but the Chair is clearly of the opinion that the Congress of the United States could provide if it chose for a Navy the sole purpose of which should be to guard the Panama Canal or to create a Navy to guard the harbor of New York; it could create a Navy for the Atlantic or for the Pacific.

Clearly in the mind of the Chair it is not general legislation at all. It is simply a declaration, if the Senate wants to make it, that these battleships and battle cruisers shall not be employed for certain purposes. If the President of the United States has no power or authority to use any of the vessels of the United States to coerce or compel the collection of any pecuniary claim of any kind, class, or nature, or to enforce any claim of right to any grant or concession for or on behalf of any private citizen, copartnership, or corporation of the United States against the Government of Mexico or against any Central or South American Government, this does not change it. If he has the power he can use whatever of the Navy there is now for that purpose. But the Chair is clearly of opinion that if the Congress of the United States wants to prevent the use of these vessels for this purpose it has the right to do so, and it is not general legislation but a limitation upon the bill.

Mr. REED. Mr. President, I desire to call the Chair's attention to this fact. I want to say by way of preliminary I am not at all enamored of the process that it has been charged has been going on of employing armed forces of the United States to collect private debts. The question that is now before the Senate I think is one of very considerable importance. I think this amendment does change the substantive law of the country.

Clearly under the Constitution the President is the Commander in Chief of the Army and Navy of the United States. If these vessels are created they become a part of the Navy of the United States. If now we pass a law which declares that these vessels shall be built as a part of the Navy but shall not be used by the Commander in Chief of the Navy of the United States in the same manner that the other forces of the country are employed, we place a limitation as to these vessels upon that power and authority which is now conferred upon the President by the substantive law of the country.

The VICE PRESIDENT. Just a moment, that the Chair may apprehend the Senator from Missouri. Does the Senator from Missouri say that under the Constitution or any law of the United States of America the President has any such right as is forbidden to these vessels?

Mr. REED. I say that under the laws and Constitution of the United States the President is the Commander in Chief of both the Army and Navy of the United States; that the question as to how and when he shall employ these vessels is one which is settled by the substantive law of this country. Under the Constitution the President has no authority to declare war. Congress might empower the President, if it saw fit so to do, to employ the armed forces of the United States to seize the customhouses of a certain country. There is a very grave question whether the President can not proceed to that length and still greater length without the authority of Congress.

Now, that being the case, it follows that when we undertake to pass an appropriation bill to construct certain vessels which are to become a part of the Navy of the United States, the minute they are created they come under the command of the President.

Now, we propose to say this part of the Navy of the United States shall not be employed by the President in the same manner and to the same effect as he might employ the other vessels of the Navy. To that extent we create a navy and limit the right of the President to use it, and just to that extent we change the substantive law of this country. That is the proposition I want to state to the Chair. I do not know that it will alter his views.

The VICE PRESIDENT. The Senator from Missouri has not answered the Chair.

Mr. BRANDEGEE. Mr. President, I rise to a question of order, if the Chair please. The Chair has ruled, and I had intended to take an appeal from the ruling of the Chair, so that the judgment of the Senate might be had upon the question. Of course, debate, I assume, is not in order until the appeal is taken, and I do appeal most respectfully from the decision of the Chair.

The VICE PRESIDENT. The question is, Shall the decision of the Chair stand as the ruling of the Senate?

Mr. BRANDEGEE. Upon that appeal I want to be heard for a minute, but I will not take the floor if the Senator from Missouri desires to continue his remarks.

Mr. REED. I have finished. I simply wanted to state my position.

Mr. BRANDEGEE. Mr. President, with all due respect, and I have a great deal of respect for the Chair and his opinions, I can not see the relevancy of some of the remarks which the Chair made as a reason for his ruling. I do not care to be drawn into a discussion of all the circumstances upon which the right of the President to exercise his authority as Commander in Chief of the Army may be based and may be exercised. There may be some difference of opinion as to how absolute he is.

I certainly agree with the Chair that, of course, it is within the power of Congress to create navies on all the coasts of the country and to provide that they shall stay in certain places, if it wants to do so, but I do not wish to be drawn into that. Whatever may be the powers of Congress in relation to the Navy, it is not competent under the rules of the Senate for the Senate to exercise whatever power it may have of legislation upon this appropriation bill.

In view of the rule of the Senate, I think the Chair fails to distinguish between the legislative power of Congress to say for what purposes the Navy shall be used and the power of Congress to put that legislation upon an appropriation bill. The Senate rule means, if it means anything, in my opinion, as to a limitation, that the Senate can put a limitation upon the expenditure of money appropriated in an appropriation bill. There is no attempt made in this proposed amendment to limit or to control or in any way to direct the expenditure of the money which we appropriate. That portion of this amendment attempts to govern the purposes for which the United States Navy may be used, and to that extent it is legislation upon an appropriation bill, in my opinion.

The Senator from Wisconsin [Mr. LA FOLLETTE], in the notice that he gave yesterday, stated that he would move to suspend a clause of a rule which otherwise would have prohibited this amendment, in his opinion, so that he might introduce another amendment, which is here printed in the RECORD. I do not attach any significance, so far as it relates to the parliamentary situation on the question of order, to the change that he has made in the amendment.

Mr. NORRIS. Mr. President, will the Senator from Connecticut yield to me on that point?

Mr. BRANDEGEE. I will.

Mr. NORRIS. The amendment which the Senator from Wisconsin proposed yesterday, and which is printed in the RECORD, applies generally to the existing Navy and also to the existing Army. As I understand, it is general. There would not be any doubt about that changing existing law. This amendment only applies to those vessels provided for in this bill.

Mr. LODGE. Mr. President——

Mr. BRANDEGEE. I yield to the Senator from Massachusetts.

Mr. LODGE. I think the Senator from Nebraska is mistaken on one point, if the Senator from Connecticut will pardon me a moment. On page 13012 of the RECORD the Senator from Wisconsin said:

> I give notice of the following proposed amendment to the rules of the Senate, which I ask may be read.

And the Senator gave notice of his intention to move to suspend paragraph 3 of Rule XVI, and submitted a broader amendment; but prior to that I thought he had submitted another amendment with a similar proposition to suspend the rules. I may be mistaken about that, but I thought he had submitted another amendment.

Mr. LA FOLLETTE. Mr. President——

The VICE PRESIDENT. Does the Senator from Connecticut yield to the Senator from Wisconsin?

Mr. BRANDEGEE. I yield to the Senator from Wisconsin.

Mr. LA FOLLETTE. I am in a way called into this colloquy by the question of the Senator from Massachusetts and his reading of the notice which I gave on yesterday.

On the preceding day I gave a similar notice, in which I incorporated the amendment offered to-day, which is now pending. I did it, Mr. President, out of abundance of caution, in order that I might have a vote of the Senate upon this amendment if it should be held, as I did not believe it could be held, that the amendment was obnoxious to the rule. I simply took that precaution. I was simply forehanded to that extent.

Mr. BRANDEGEE. I compliment the Senator from Wisconsin on his foresightedness and his good judgment, because I thought at the time he gave the notice that he was of the same opinion that I now am.

Mr. LA FOLLETTE. I was not at all of that opinion, I will say to the Senator.

Mr. BRANDEGEE. If the Senator did it out of ample precaution, in view of the ruling of the Chair, he had certainly a superabundance of caution, because he did not need to change the rules or to suspend them in view of the ruling of the Chair; but that is neither here nor there, Mr. President. The situation is that the Chair has sustained the admissibility of the amendment on the ground that it is a limitation upon the appropriation of money. It seems to me that the attempt to limit the operation of the vessels appropriated for, to define and restrict the purposes for which they may be used, is not in any way a limitation upon the expenditure of the money appropriated. That is all I care to say upon the subject.

Mr. WORKS. Mr. President, I have no doubt of the correctness of the ruling of the Chair. Congress has a right to determine what sort of a Navy we shall have and the number and the kind of ships that are to be provided. The amount of the appropriations to be made may depend very largely upon the use to which the ships are to be applied. Here is a proposition in this amendment to limit the use that can be made of the ships that are to be provided under this appropriation. If the use of the ships is to be limited in that way, then the appropriation may be less, or it might be more under certain conditions. Congress has a perfect right, if for no other reason than in determining the amount of the appropraition, to take into account the uses to which these ships shall be applied.

I have no doubt, Mr. President, that it is within the power of the Congress of the United States to limit and to determine the use to be made of the ships. I have no doubt that it is within our power to determine where these ships shall be located; in other words, I believe that the power of the Congress of the United States is superior to that of the President of the United States as the Commander in Chief of the Army and the Navy of the country. The President is simply the servant of the people of this country. The appropriations that are to be made are determined by Congress. Whether or not there shall be an army or a navy at all may be determined by Congress. Certainly, if Congress can determine whether or not there shall be a navy or an army, and the size of it, if there is to be one, then clearly Congress has the power to determine what uses shall be made of the ships that are provided by Congress. I think this is simply a provision within the power and jurisdiction of Congress; I think it is also entirely within the rules of the Senate. I do not very well see how that can be questioned.

Mr. SUTHERLAND. Mr. President, in my own mind I feel very clear as to the merits of this proposed amendment. If we come to a vote upon the amendment itself, I intend to vote against it. I think it is unwise to make any such limitation upon the use of any of the armament of the United States. We can not foresee the future or what contingencies may arise to make it necessary to use these or any other ships. Therefore, as I say, if the matter comes before the Senate for a vote upon the proposed amendment, I intend to vote against it; but I am interested in a proper enforcement of the rules of the Senate. Therefore I am bound to say that, in my judgment, the ruling of the Chair is correct that the proposed amendment is in order.

The objection which is made to the amendment is that it is general legislation. I think one test of whether or not it be general legislation must be whether or not it can stand alone; whether or not it is independent of the proposed legislation to which it is attached. It is born out of this piece of legislation; it is a qualification of it; it is a limitation upon it; and it does not attempt to go beyond the legislation which is proposed. Suppose that we had a bill here proposing to erect a post-office building in some town, could it be said that a proposed amendment to that piece of legislation which provided that the building to be erected should be used for certain purposes or should not be used for a particular purpose was general legislation?

I am aware of the fact that to a bill of that kind the objection that it was general legislation would not lie; but I am using the illustration as a test of what may be considered general legislation. Obviously, it seems to me, that would not be general legislation. It would be a specific limitation upon that specific piece of legislation and would not extend beyond it.

If, for example, we were in the future, before this law shall be put into operation, to repeal its substantive provisions, leaving this proviso to stand, there would be nothing to which it could apply; and it would fall because the legislation to which it was attached had fallen. It is a mere limitation upon that piece of legislation, and it seems to me it can not in any sense be said to be general legislation.

I think also that it is entirely within the competence of Congress to impose limitations of this character if it desires to do so. The Senator from Missouri [Mr. REED] has said that it infringed the power of the President of the United States. The President of the United States, by the Constitution, is made the Commander in Chief of the Army and the Navy—that is all—but the specific provision of the Constitution is that Congress shall have power to make rules and regulations for the Army and the Navy.

Mr. REED. Exactly. Now, does the Senator—if he will permit me to ask him a question——

Mr. SUTHERLAND. Just a moment. To quote the provision of the Constitution exactly, it is:

> To make rules for the government and regulation of the land and naval forces.

Mr. REED. Now, does the Senator say this amendment is the making of a rule for the land or naval forces?

Mr. SUTHERLAND. It constitutes a regulation of a particular part of the naval forces of the United States.

Mr. REED. Then it does regulate the use of a part of the naval forces?

Mr. SUTHERLAND. Undoubtedly.

Mr. REED. Therefore, it does change the substantive law of the country, the law which would apply to these vessels if we did not attach the condition?

Mr. SUTHERLAND. Oh, I imagine that any piece of legislation which limits the operation of an appropriation alters the rule from what it would be if the limitation were not imposed. Of course, that is true.

Mr. REED. Not necessarily. There are thousands of cases where there is no substantive law, as, for instance, when we propose to erect a public building. There is no law for that public building except the law we make when we enact the measure. Therefore, whatever pertains to the regulation of the form, manner, and method of building is only a part of the appropriation act itself. Let me put this to the Senator.

Mr. SUTHERLAND. Let me answer the Senator with reference to what he has already said.

Mr. REED. Very well.

Mr. SUTHERLAND. Of course, what the Senator says is true; but, after all, it does not meet the question here as to whether or not this is general legislation or special legislation. Special legislation, the same as general legislation, may alter the rule which otherwise would be in effect. Now, this piece of special legislation, this limitation upon the operation of a part of this proposed law, of course, alters the conditions which would exist if we did not incorporate it in the bill; but, after all, it is a mere limitation upon that; it is not a general rule.

Mr. REED. Let me ask the Senator, then—and the point was raised by the Senator from Connecticut [Mr. BRANDEGEE]—is this a limitation upon the expenditure of money, or is it a limitation upon the use of the ships?

Mr. SUTHERLAND. It is a limitation upon the use of the ships which are provided for by this piece of legislation, and upon those ships only.

Mr. REED. Yes. Now, when those ships are built, they become a part of the Navy of the United States, do they not?

Mr. SUTHERLAND. Undoubtedly.

Mr. REED. Therefore, you have placed a limitation upon the use of a part of the Navy of the United States. Does any such limitation exist now upon the President as would exist if this amendment were adopted?

Mr. SUTHERLAND. I have already answered the Senator; no.

Mr. REED. Plainly not.

Mr. SUTHERLAND. It would not.

Mr. REED. Now, is it not the general law that the President of the United States can move the ships of the Navy wherever he sees fit to order them to go, and that he can put them to any use that he sees fit to put them to, always provided he shall not have violated the Constitution of the United States or the laws of Congress?

Mr. SUTHERLAND. In the absence of legislation of Congress, the President, being Commander in Chief, would have at

least some power in that direction. I would not like to say that he would have unlimited power.

Mr. REED. Well——

Mr. SUTHERLAND. If the Senator will permit me further—but the Constitution expressly provides that Congress shall have power "to make rules for the government and regulation of the land and naval forces."

Mr. REED. And the Senator holds——

Mr. SUTHERLAND. Now, may Congress in——

Mr. REED. And the Senator holds that is just what we are doing now. If that is not an admission that it is substantive legislation, I do not know how we could get it.

Mr. SUTHERLAND. Mr. President, the Senator, I think, is confusing two things. I have not said that this is not substantive legislation in a sense. It substantially affects these particular ships, but my argument is that it is not general legislation; it is special legislation.

Mr. REED. Well, it depends upon what the Senator calls "general legislation." Let us see. If the Senator will permit a question—and as a sort of prelude I will make a brief statement—suppose we passed this bill without this amendment, that the ships provided for are built, and an occasion arises for the employment of them to do the very thing prohibited in the amendment, the President would proceed to employ the vessels to do that thing; but if the amendment carries and the President undertakes to do that identical thing, which he could have legally done but for the amendment, he is confronted by what? He is confronted by something that stays his hand. That something must be an act of Congress; that act of Congress is legislation; that legislation affects the use for all time of all the vessels we are proposing to build. Now, can the Senator say that is not substantive legislation? Can the Senator say that a thing so far-reaching does not place a limitation upon the powers which the President would otherwise have and which he has under general law?

Mr. SUTHERLAND. I have already answered the Senator that my opinion is that it is not general legislation.

Mr. REED. Let me call the Senator's attention to how far-reaching this amendment is. There are two parts of it. I call the Senator's attention to it, because I have the highest respect for his opinion:

Provided, That no battleship, battle cruiser, scout cruiser, torpedo-boat destroyer, or submarine herein appropriated for shall be employed in any manner to coerce or compel the collection of any pecuniary claim of any kind, class, or nature, or to enforce any claim of right to any grant or concession for or on behalf of any private citizen, copartnership, or corporation of the United States against the Government of Mexico or of any Central or South American Government.

There are three different provisions. The first one is that these vessels shall not be used to "compel the collection of any pecuniary claim of any kind, class, or nature; the second is that they shall not be used "to enforce any claim of right to any grant or concession"; and then follows the third, "or on behalf of any private citizen, copartnership, or corporation of the United States against the Government of Mexico or of any Central or South American Government."

Now, under the second provision to which I have called attention—and I am numbering them myself—these vessels can not be employed to enforce "any pecuniary claim of any kind, class, or nature, or to enforce any claim of right to any grant or concession." Under that, if the Government of the United States were solemnly to enter into a treaty with the Government of Mexico by which the Government of Mexico would cede and grant to the United States Magdalena Bay, and the United States should pay for it, and Mexico were to say to us: "You can not take this property," the President of the United States could not send a vessel into the waters of that bay even though the officers of the United States were there and were menaced. The right exists in the President to do that thing to-day, as Commander in Chief of the Army and Navy of the United States. He can do that identical thing without authority of Congress, and it has been done many times. Now, we propose to say to him: "You shall not do that thing which you have the right as Commander in Chief of the Army and Navy of the United States to do."

Mr. VARDAMAN. Mr. President, will the Senator permit me to make a suggestion there? He is arguing as to the unwisdom of this amendment rather than addressing himself to the point of order.

Mr. REED. I have not made myself plain to the Senator. I am arguing that it changes the substantive law of this country, and therefore is legislation; and, being legislation, it can not be added to the appropriation bill.

Mr. SUTHERLAND. Mr. President, in so far as the Senator from Missouri criticizes this amendment as being unwise, I quite agree with him, and I think the illustration the Senator has given shows its unwisdom. I intend to vote with the Senator from Missouri against this piece of legislation. But the Senator has not succeeded in convincing me—although he is now, as he always is, exceedingly persuasive—that that is a piece of general legislation.

Let me give just one other illustration, and then I will take my seat, because I have said all I care to say. Suppose we were appropriating $25,000 to create a park here in the city of Washington, and somebody offered an amendment on the floor providing that this park should not be used for automobiles. Would that be general legislation, or would it be special legislation, limited to that particular park, limited to that particular bill?

Certainly that would, it seems to me, be in order—to say that the specific park we were creating and appropriating money for should not be utilized for a special purpose; and I think the rule is not altered because we happen to be dealing with the exceedingly important subject of the armament of the United States instead of with a park or with a public building.

That is the way the matter occurs to me. I think the amendment is in order; but, as I have already said, I intend to vote against it when it is presented upon its merits.

Mr. BRANDEGEE. Mr. President, there is so much discussion about this that I am satisfied we will arrive at a conclusion quicker if we vote on the merits of the amendment, as the Senator from Wisconsin requested. I therefore withdraw the appeal, and will let the amendment be voted on.

The VICE PRESIDENT. The question is on the amendment of the Senator from Wisconsin.

Mr. ASHURST. On that I ask for the yeas and nays.

Mr. NORRIS. Mr. President, I desire to offer an amendment to the amendment. It seems to me that instead of having this amendment apply only to Mexico, Central America, and South America, it ought to be general and apply to the whole world. I therefore move—I have not the amendment before me, but I have copied the words that I want to strike out—to strike out the following words:

Against the Government of Mexico or of any Central or South American Government.

If that is agreed to—and it seems to me the Senator from Wisconsin ought to be willing to accept that amendment—it will not change the effect of the amendment so far as Mexico, Central or South America is concerned, but it will give application to the amendment, if it becomes law, to the entire world. It seems to me that if we are going to prevent the use of these ships for the collection of a private debt in one place there is no reason why we ought not to prevent it at every place.

Personally, I can not see any possible objection to this amendment. Even though a Senator is opposed to the amendment of the Senator from Wisconsin itself, it seems to me he would not be opposed to the modification I have suggested.

Mr. REED. Mr. President, I do not know whether the Senator from Wisconsin desires to accept the amendment or not. If he does, I do not want to deprive him of that opportunity.

No man in the Senate can view with greater abhorrence than myself certain events that it is asserted have transpired in the history of our country. It is at least generally believed that certain capitalists have been in the habit of going into certain small and weak countries, purchasing the bonds of those countries at a ridiculously low figure, getting them at that figure because the Government of the country was understood to be unstable and the quality of the bonds therefore very doubtful, and then working out an arrangement by which this Government in effect guaranteed the payment of those bonds, thus practically having the Government of the United States guarantee the bonds the individuals or corporations had purchased. That is an abominable situation—one which I believe the present administration has done all it can not only not to indulge in, but to escape the effect of other administrations' acts.

But, Mr. President, the amendment offered by the distinguished Senator from Wisconsin does not apply to the cases I have referred to alone; and I want Senators to understand that this amendment does not apply to those cases alone, but that it is so broad and sweeping in its terms that if it is adopted it will or it may deprive our Government of the use of these vessels in matters which affect the rights of the Government itself, matters that may be vital to the Government. I do not want this amendment voted for—I hope it will not be voted for—in its entirety merely because it contains a clause relating to the collection of private debts. I read it a moment ago, but there are some more Senators here now, and I want to read it again. Now, notice its language—for it is worth noticing:

Provided, That no battleship, battle cruiser, scout cruiser, torpedo-boat destroyer, or submarine herein appropriated for shall be employed in any manner to coerce or compel the collection of any pecuniary claim of any kind, class, or nature.

That means—I shall in a moment read it all—that if this Government had a pecuniary claim against another Government it could not use these vessels to enforce that pecuniary claim.

Mr. LA FOLLETTE. Mr. President, if the Senator will yield to me for just a moment, I will say to him that he is mistaken about the import of the amendment. It is the claim of a private citizen, copartnership, or corporation.

Mr. REED. That is probably the intention of the Senator, but I am insisting that it is not the language. (Reading:)

Of any pecuniary claim of any kind, class, or nature—

Now, listen. That is one thing—

or to enforce any claim of right to any grant or concession for or on behalf of any private citizen, copartnership, or corporation of the United States.

There are two provisions. One relates to the enforcement of any pecuniary claim of any kind, class, or nature; the other relates to a claim of right to any grant or concession on behalf of private parties. I can not read this language in any other way. Its punctuation, the context of the different phrases, all lead me to the conclusion that, fairly construed, it bars the Government of the United States from enforcing its own claims as well as it bars the Government from using these ships to enforce the claim of a private citizen.

Mr. LODGE. Mr. President, if I may ask the Senator a question, is it not true that under that language, no matter whether justice is denied in the courts of the country, or arbitration is refused, we would still be helpless?

Mr. REED. Undoubtedly.

Mr. SMITH of Georgia. Under that amendment, if a citizen of the United States should go to Mexico City with a satchel full of money or bonds to make an investment, and the Government of Mexico should take it away from him and say it intended to keep it, would he have any redress whatever?

Mr. REED. Undoubtedly not.

Mr. LODGE. None whatever.

Mr. REED. Clearly if an American citizen was passing through Mexico, as is suggested by the Senator from Georgia, with his grip full of bonds and stocks and money, merely en route, and the Government of Mexico itself—not a private bandit, not an individual robber, not an individual thief, but the Government itself—should seize and confiscate that American citizen's property and refuse any redress, the Government of the United States could not employ a single one of these vessels to redress the wrongs of that American citizen.

I go further than that. If a paymaster of the Government, having in his possession Government money, found occasion to go through Mexico or any other country that is covered by the terms of this amendment, and the Government of that country were with its armed soldiers, serving under its flag and by authority of the heads of the Government, to seize that money of the United States, we could not use one of these vessels to redress that wrong.

Moreover, we could not enforce any pecuniary claim of any kind. Suppose that a vessel belonging to the United States should go into the harbor of one of these countries—a vessel belonging to our own Government—and they were to take that vessel, or were to destroy it, and we were to hold a solemn convention with the offending Government, and it were to agree to pay us for the vessel. Having agreed to pay us, suppose they then refused to turn over a penny. We could not send one of these vessels into the harbor of the country and take a customhouse and hold it until we had collected our money.

Mr. GALLINGER. If the Senator will permit me, or if they refused even to promise to pay, but held the vessel, we would have no redress.

Mr. REED. Yes. As has been suggested by the Senator from Tennessee [Mr. SHIELDS], if the United States were to require an indemnity for a wrong to one of its citizens, and that indemnity had been agreed upon as just, and yet it should not be paid, the result would be the same as in the other instances. Let me give an illustration: Assume American citizens traveling through Mexico in the last few years—as many of them have—were despoiled of their property, robbed sometimes by men in one uniform and sometimes by men in other uniforms. Assume that through the beneficent influence of this Government the Mexican people are enabled to set up a stable Government. Of course, it goes without the saying that our Government will insist that properties that have been stolen shall be paid for. Suppose that in the Mexican courts, or in such tribunals as may be created to try that class of claims, judgment is awarded, and an agreement is made to pay the money, and then Mexico repudiates it. We could not in such case use a single one of these ships.

Mr. President, I am not going to take the further time of the Senate, but I remark this amendment reminds me in some respects of the ancient joke regarding an army bill that was being discussed in the House of Parliament in England, when somebody proposed to provide in the bill that the soldiers who were to compose this army would never be compelled to go outside of England, and some Irishman suggested an amendment, "unless the enemy come in." In other words, the proposed amendment contemplates the emasculation if not destruction of the bill.

If the Senator from Wisconsin will introduce a general bill here in Congress to provide that no agent of our Government shall ever be a party to or commit this Government to the kind of thing that he has in mind—to wit, the backing by this Government of private speculators—I will be glad to stand by his side and vote and work for such a measure.

Mr. WEEKS. Mr. President——

Mr. REED. I yield to the Senator from Massachusetts.

Mr. WEEKS. There is a general propaganda going on in this country having in view the development of trade especially with the Central and South American countries. I ask the Senator what his opinion would be of the effect of an amendment of this kind on the naval bill upon the peoples of those countries if we advertise to them that we will do nothing to collect indebtedness incurred to our citizens.

Mr. REED. Clearly we ought not at this time to undertake to tie the hands of the Government with reference to the future use of these vessels. Clearly it would tend to discourage our people from going abroad, and clearly it would tend to encourage the peoples abroad who might happen to be dishonest to repudiate their obligations.

We are asked to do something of a very radical and far-reaching nature in order to remedy an evil practice when it is not necessary to take any such radical action; the evil can be remedied without crippling the Navy.

Mr. President, I appreciate the fact that when a man goes into a foreign country to do business he takes the chances of that Government being a turbulent Government; he takes the chances of living amongst a people who do not have our laws and our customs. But I hope the day has not yet come when the Congress of the United States is ready to say to every American citizen, "Whenever you go into another country you can be robbed, you can be despoiled, you can be plundered, and not a vessel of the United States shall ever fire a gun in the vindication of your rights." I hope we have not come to that point yet.

The VICE PRESIDENT. The question is on the amendment of the Senator from Nebraska [Mr. NORRIS] to the amendment. The Chair hears no objection and it is agreed to. The question is on the amendment as amended.

Mr. LA FOLLETTE. Do I understand that the amendment offered by the Senator from Nebraska was adopted?

The VICE PRESIDENT. The Chair announced that it was carried.

Mr. LA FOLLETTE. I have no complaint.

The VICE PRESIDENT. Now, the question is on the amendment as amended.

Mr. GALLINGER. I ask for the yeas and nays on that.

Mr. LA FOLLETTE. I wish to make an observation.

Mr. GALLINGER. That will not cut off the Senator.

Mr. LA FOLLETTE. I do not object to the yeas and nays being ordered.

The VICE PRESIDENT. The present occupant of the Chair never orders the yeas and nays until he is satisfied that all debate is ended.

Mr. GALLINGER. The present occupant of the Chair is wrong.

Mr. LA FOLLETTE. I think that is a very good practice, because I recall that snap judgments have been taken here and debate closed sometimes when the debate had not been entirely finished.

Mr. GALLINGER. If the Senator from Wisconsin will allow me——

Mr. LA FOLLETTE. I yield.

Mr. GALLINGER. I have no disposition to prolong the debate, but surely the occupant of the Chair does not say that after the yeas and nays were ordered debate may not continue.

The VICE PRESIDENT. The Senator from New Hampshire will remember that the Chair was overruled by the Senate when the Chair ruled that after the yeas and nays were ordered upon a given proposition it was not subject to amendment and not subject to debate. The Chair was overruled, but like a woman the Chair is not convinced. The Chair carries out the rule of the Senate but reserves the right not to formally announce that the yeas and nays have been ordered until debate has been

concluded. There is no doubt about the yeas and nays having been ordered, and it will be so announced.

Mr. GALLINGER. It is sometimes a difficult matter to know when debate does close in this body.

Mr. LA FOLLETTE. I recall very distinctly just to give a word on that point——

Mr. GALLINGER. That is ancient history.

Mr. LA FOLLETTE. It was quite a little while ago. I started out to say that sometime, I think in 1908, the ordering of the yeas and nays was resorted to as a means of foreclosing debate, and once or twice since that time that method has been resorted to. I do not mean to suggest that it was in the mind of any Senator at this time, but upon the Aldrich-Vreeland currency bill and upon the Lorimer contest in the Senate I do mean to say that that method was resorted to as a means of preventing a continuation of debate. I think the ruling and attitude of the Vice President upon this question are most excellent and conform entirely to the letter and the spirit of the rules of this body.

[Mr. LA FOLLETTE addressed the Senate in support of his amendment. His entire speech is printed in the Senate proceedings of Thursday, July 20, 1916.]

RECESS.

Mr. SWANSON. I move that the Senate take a recess until 10 o'clock to-morrow morning.

The motion was agreed to; and (at 6 o'clock and 28 minutes p. m.) the Senate took a recess until to-morrow, Thursday, July 20, 1916, at 10 o'clock a. m.

SENATE.

THURSDAY, *July 20, 1916.*

(Legislative day of Wednesday, July 19, 1916.)

The Senate reassembled at 10 o'clock a. m., on the expiration of the recess.

Mr. CLAPP. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hardwick	Overman	Sutherland
Beckham	Hollis	Page	Swanson
Bryan	Husting	Pittman	Taggart
Chamberlain	Johnson, Me.	Reed	Thompson
Clapp	Johnson, S. Dak.	Robinson	Tillman
Clark, Wyo.	Jones	Shafroth	Underwood
Culberson	Lane	Sheppard	Warren
Dillingham	Martin, Va.	Sherman	Williams
Fletcher	Martine, N. J.	Simmons	Works
Gallinger	Myers	Smith, Ga.	
Gronna	Nelson	Smith, S. C.	

The VICE PRESIDENT. Forty-two Senators have answered to the roll call. There is no quorum present. The Secretary will call the roll of absentees.

The Secretary called the names of absent Senators, and Mr. MCCUMBER, Mr. NORRIS, Mr. RANSDELL, and Mr. VARDAMAN answered to their names when called.

Mr. PITTMAN. I wish to state that the Senator from Colorado [Mr. THOMAS] is absent on public business connected with the Senate.

Mr. LODGE, Mr. POMERENE, Mr. JAMES, and Mr. TOWNSEND entered the Chamber and answered to their names.

The VICE PRESIDENT. Fifty Senators have answered to the roll call. There is a quorum present.

WOMAN SUFFRAGE—CONSTITUTIONAL AMENDMENT.

Mr. SUTHERLAND. Mr. President, before the discussion of the naval appropriation bill is resumed I ask the indulgence of the Senate to say a word about Senate joint resolution No. 1, which proposes an amendment to the Constitution of the United States prohibiting any State from denying or abridging the right of citizens of the United States to vote on account of sex. I shall not enter upon a discussion of the general subject of woman suffrage—it is not an appropriate time for that. The premises by which we establish the justice and wisdom of a democracy, and consequently the justice and wisdom of universal manhood suffrage, likewise establish the justice and wisdom of universal womanhood suffrage. Any argument which I may use to justify my own right to vote justifies, as it seems to me, the right of my wife, sister, mother, and daughter to exercise the same right. If there had been drawn an east and west line through the center of the State of Pennsylvania, and the law had always been that those living south of the line should vote and those living north of the line should not, it would never be a sufficient answer to the unenfranchised men of the North demanding equal suffrage, that by granting the demand we should simply double the vote. Very likely by such a division we should obtain a fair average of the ability, civic righteousness, and intelligence of the State, but the division, nevertheless, would be so arbitrary and unjust that it could never persist against enlightened public opinion. But, after all, such a division along a geographical line is not greatly more arbitrary than the existing separation of voters from nonvoters by the line of sex. Such a division is purely artificial, and is certain to disappear, just as the other superstitions which in the past have denied women equal opportunities for education, equality of legal status—including the right of contract and to hold property—and all the other unjust and intolerant denials of equality have disappeared, or are disappearing, from our laws and customs. The sentiment in favor of the enfranchisement of women is growing rapidly and definitely. Its ultimate triumph, I think, is sure. The sooner it becomes an accomplished fact, the sooner the splendid, patriotic, intelligent women of the country will be enabled to devote their energies to helping us solve the perplexing social and governmental problems with which we are confronted, instead of expending these energies in the passionate struggle to secure the right to give us this help. It is said, however, that the question is purely a matter for the several States to determine, and that is quite true under the present provisions of the Federal Constitution. The Chicago platform definitely commits the Republican Party to the extension of the right of suffrage to women. This constitutes a tremendous step forward, and must result in giving to the movement an impetus which will carry it, if not to immediate success, at least very far toward immediate success. The platform recognizes the right of each State to settle the question for itself, which is, of course, merely to recognize the obvious. The national party, however, has not committed itself upon the subject of a constitutional amendment which, if adopted, would take from the States the power, which the platform declaration recognizes now exists, to impose a sex qualification upon voters. Upon this matter the platform is silent, and therefore leaves every member of the party free to determine the question for himself.

The real question which, therefore, remains is whether the proposed amendment would constitute such a fundamental invasion of the rights of the State as to take from it all reasonable justification. The Constitution provides very definitely for its own amendment. The power of Congress to propose and of three-fourths of the States to adopt includes amendments of every conceivable character. The power is plenary and without qualification except in one particular, which is "that no State without its consent shall be deprived of its equal suffrage in the Senate." This single exception serves to emphasize the fact, if emphasis were necessary, that the framers deliberately intended that the Constitution should be open to amendment in every other conceivable respect.

It is perfectly idle to complain that three-fourths of the States, containing less than half of the population, may impose unwelcome provisions upon the remaining one-fourth of the States, containing more than half the population of the country. That is the compact under which the Union exists and by which each State bound itself when it entered the Union. It must be said, however, that although the power of amendment is unlimited except in the single respect mentioned Congress is, nevertheless, bound to exercise a wise discretion as to the amendments which it proposes. If it be true that the amendment proposed by the present resolution is manifestly without wisdom, or if it undertakes to deal with a matter clearly and fundamentally the subject of exclusive State control, then it ought not to be adopted by Congress. It may be said, however, in the first place, that the demand for the submission of the proposed amendment is not only insistent but widespread. It is safe to say that many millions of voters in the United States as well as an additional many millions of unenfranchised citizens desire its submission. In the face of a demand of such proportions the objections to the amendment should be of the most cogent and compelling force to justify Congress in refusing affirmative action. I submit with the utmost earnestness not only that no such objections exist but, to the contrary, that the reasons are persuasive in favor of affirmative action. In the first place, there is precedent in the fifteenth amendment, which prohibits the States from denying the right of suffrage on account of race. If the fifteenth amendment was justified, the proposed amendment is certainly justified with far greater force. Both of the great political parties having indorsed the principle of woman suffrage, the sole remaining question is, How shall the principle be realized in practice? It is true that the present Constitution leaves to the States the power to fix the qualifications of voters, but it will not do to say that

the Federal Government is not concerned in the character of the qualifications to be prescribed. The concern of that Government is great; conceivably it might become vital. The President of the United States indirectly and the Members of both Houses of Congress directly are selected by the voters whom the States qualify. Surely a government the character of whose activities may be profoundly affected by those officials who are selected from time to time to discharge them is interested in the kind of people who are to have the sole power of selecting the officials. It is not true that the qualification of the electorate is entirely a matter of State concern. It is a matter which concerns both the State and the General Government. The Federal Government has already the power to regulate the time, place, and manner of holding elections. That power has been wisely exercised to bring about uniformity as to time and in many respects as to the manner of holding the elections. The result has been to curtail State action in some degree, to be sure, but it has been also to bring about uniform methods of much usefulness. I see no reason why the proposed amendment, if adopted, would not be likewise beneficial in bringing about a uniformity of suffrage qualification in the one important respect where uniformity is now so strikingly and, I think, unfortunately lacking.

Mr. SHAFROTH. I wish to suggest to the Senator from Utah, in whose remarks I fully concur, that it is as much an exercise of the rights of the States, after they adopt the constitutional amendment, to enforce it as it is the right of a State to reject the franchise before the adoption of the amendment. There has been strong objection urged to the adoption of a constitutional amendment granting the franchise to women, on the ground that the elective franchise is a subject inherently in the province of the State, and might force onto a State a policy which might be detrimental to its interest. If that objection were valid, we could never adopt any constitutional amendment without the consent of every State. Therefore there is no such thing as an inherent right in a State to prescribe the qualification of electors as against such a constitutional amendment. It may be inherent until the constitutional amendment is adopted, but the adoption of the amendment is the very delegation of the authority, and to contend otherwise is to deny to three-fourths of the States their rights. The question, then, for the Nation is purely as to the justice of the cause of equal suffrage, and as to that the arguments are overwhelmingly favorable.

NAVAL APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes.

Mr. LANE. Mr. President, I have received a great many protests against the expenditures which will be made under this bill. Many of them, I presume, have been instigated by people and associations who have ultra peace theories for the purpose of bringing to bear their influences upon Senators. As to that I do not know, but I do know that hundreds of such protests have come from good people who believe that the enormous expenditures proposed to be made at this time for purposes of preparedness are not justified. I do not entirely agree with that view; and in reply to them, and by way of ascertaining what their real feelings might be, I have put the suggestion to them that this country ought to be able to defend itself against all comers; that it is the duty of the Government and of the people to place itself in such a position that no foreign nation would dare attack us for any cause or for any reason whatever.

On the other hand, I have urged that I myself did not believe in building up a navy for purposes of aggression; that if I had my way about it I should have carefully examined the condition of the country, and then should make an appropriation to make every harbor on both coasts invulnerable, and build a type of battleship which would be prepared to protect this country from invasion; that it would not make any difference to me how much it might cost to do so; that that was our duty, but for defensive purposes only; that I would build those vessels at Government plants; and that it was my opinion that the Government should manufacture its own armor plate, its own guns, its own ammunition; build its own battleships and colliers and equip and put them to sea, without the intrusion of any question as to profits being made or a propaganda being urged upon the people for such preparation for private gain.

I have found that all of my correspondents have agreed with me to that general proposition. I do not think there is a man in the United States, a taxpayer, however poor he may be, who would question the expenditure of any amount of money which this Government would expend for defensive purposes, if he believed that the money would be honestly expended, that the people would receive a dollar's worth of material for every dollar expended and a dollar's worth of value for every dollar expended. If that were the problem, there would be no question at all in the mind of anyone. The people of the country do not find fault with expenditures if the money is properly expended. There is, however, a doubt, and there has been a doubt—just how created I do not know, and yet I do, too, in a way, for I have had the doubt myself in some respects—in regard to these enormous expenditures not only in the Navy Department but in other departments as well.

For instance, yesterday the Senator from Wisconsin [Mr. LA FOLLETTE]—and I say it with all due respect to him—quoted the statement made by some general, and seemed to rely upon it, that our coast defenses were invulnerable; that no foreign vessel of war would dare approach our shores in an attempt to invade this country. I wish to premise my remarks by saying that I think the Senator from Wisconsin and the Army or Navy official, whoever he was, who made that distinct statement was mistaken, for the reason that last year I took it upon myself to visit a couple of the fortifications on the Pacific coast. I visted the fort at San Diego, for instance, and I should now like to call the attention of the Senate to this, if I may.

These appropriation bills come in here, and the majority of us are ignorant of the reasons which have called for the appropriations which they contain. The hearings on the appropriation bills are held before committees of the House, and we have so many committee meetings of our own and so many other things to attend to that it is impossible for us to inform ourselves as to the reasons which underlie each specific appropriation. I think that is true as to the average Member of this body, and it is necessarily so.

At any rate, I noticed that at San Diego there was a portion of a circle against which the fort had no defense whatever. There were behind it a range of hills, and on the other side of the hills was the old harbor of San Diego, if you please—the port of the old, original settlement of San Diego, where the priests had founded their mission over a hundred years ago. From behind the hills, out of sight of the guns of the present fort at San Diego, the ships of a foe could shell the city of San Diego out of existence, without much, if any, molestation at all from the fort which we now have located there. The guns of the fort at San Diego carry 7 miles, just a trifle farther than you can shoot a bullet from a modern Mauser rifle, while the guns of foreign war vessels carry from 12 to 14 or 16 miles. So a fleet of foreign vessels could lie off the port of San Diego to-day—for the condition, I suppose, has not been changed since last year—and shell it out of existence; and the gunners assigned to man that fort would be helpless; they could defend neither the fort nor themselves. Therefore, practically the fortification is of no value whatever. As a matter of fact, it is a useless expenditure to maintain it in its present condition. There is no sense in paying out thousands of dollars a year for the upkeep of a fortification which has no value.

It is worse than useless for the reason that uninformed citizens rely upon it for protection. They had ammunition enough on hand at the time I was there last year for three-quarters of an hour's constant fighting.

It was the knowledge of that condition—and that was the actual condition existing at that fort at that time—which makes me dubious about this large appropriation for even the defenses of this country. It throws a doubt and casts a shadow over them which has also gone out into the minds of the people. There are thousands and hundreds of thousands of people in this country who do not believe in this naval bill at all. The fact is the majority of the people of this country, if it were put to a vote, would not vote for a dollar, unless they were assured that the money was to be expended for self-defense only, for the construction of vessels and munitions in Government plants, and then only upon the assurance that they would get full value for the money expended.

At the mouth of the Columbia River there are a few guns which have a range of 10 miles, while the guns of an enemy battleship will carry 14 or 16 or 18 miles, and perhaps 20 miles. The expenditures for the fortifications at the mouth of the Columbia River are not utterly useless, for the reason that there are headlands on each side there from which artillery could secure a better play upon a ship coming into the harbor than is the case at San Diego. The conditions, however, at the mouth of the Columbia are not at all what they should be; so that any man who says that this country is properly defended does not get my indorsement for the statement, for I do not believe it to be a fact. Just how far the same condition extends to the fortifications on the Atlantic coast and elsewhere, where I have not visited, I do not know; but I do know the conditions

which exist at those two important points of defense of the Pacific coast.

I notice an item in this appropriation bill which also gives rise to further doubt in my mind. I question the wisdom of the expenditure, although I do not question the motives of the gentlemen who have recommended the appropriation, for I do not think they understood it, and I want to call your attention to its importance, for, if the Members of the legislative body do not understand the conditions as they exist, how can they wisely make expenditures looking to preparedness for the defense of this country? Take Puget Sound, one of the finest bodies of water in the world, and one of its largest harbors, capable of floating all the navies in the world. There is untold depth of water there. The largest vessel that exists or ever will exist can safely go through the Straits of Fuca, which is the entrance to Puget Sound.

Puget Sound extends inland, say, 165 miles, and well up in the sound, over a hundred miles from the entrance, lies the navy yard at Bremerton. There is an appropriation here of a million dollars or $2,000,000 to outfit that navy yard so that there can be constructed the largest sized battleships. I do not doubt their ability to do the work, and probably it can be done at a cost that is reasonable; but I will ask Senators to look at the situation. The Straits of Fuca are not more than 20 to 21 miles wide. On Vancouver Island, at the mouth of the straits, fronting upon and controlling the straits, is a great British fortress, known as Esquimault, with shops and docks up to the very best standard. Every vessel, every dreadnaught, built by this country inside of the sound at the Bremerton yard must go out through the straits to reach the sea or else confine its operations to the inland waters of Puget Sound, and to get to sea it must go under the guns of a foreign nation, by their consent and with their good will, and with that only. A canoe can not be propelled out of that sound, much less a man-of-war, unless it has the consent of the British Government. It seems to me that an expenditure of a large sum of money for the construction of dreadnaughts and for their repairs, at a point which to reach you must pass under the guns of a foreign nation, and those the best guns made in the world, is not a wise expenditure of money.

Just how far that condition prevails throughout the bill I do not know. I am not familiar with the conditions on the Atlantic coast, but I do know that the condition which I have described exists on Puget Sound, and nobody will successfully dispute the fact. That, of course, has given me reason to wonder about other items in this bill with which I am less familiar.

It has seemed to me, too, that we could prepare this country for defense up to a point which, as I have said already, would have rendered it impregnable, at less cost if we should invest our money in mines, in torpedo boats, in coast-defense vessels, and not in the construction of so many battle cruisers and dreadnaughts. Just what this nation wants with a large fleet of battle cruisers at this time I do not entirely understand; and that for the reason that, while the battle cruiser is a swift-going man-of-war, adapted to protect shipping and to run down and destroy the ships, if necessary, of a foreign nation, this country has no ships to protect; therefore they are not for defensive purposes, surely. The great bulk of the freight which comes to this country and which leaves it is carried in foreign vessels. Such battle cruisers would be valuable, no doubt, to run down the merchant vessels of foreign nations, but we have no shipping as yet which calls for any protection of that sort; and it has seemed to me—and this is my own notion, my own idea; you can take it for what it is worth, and it may strike some of you as not being worth very much—that the better type of vessel—and the best investment this country could make would be the construction of some high-powered, heavily armored vessel, with a heavily armored sloping gun deck, which lies low in the water for coast defense purposes, and not swift, light-armored cruisers.

The Germans have given a hint—it now lies anchored at Baltimore—which is valuable to the people of this world as to what the future type of war vessel will be, and will have to be, in fact. That type will not be encumbered with top hamper; it will not lie high in the water, but lie low, with decks almost awash, with a "low visibility" and a protected deck built at such an angle that the shell of an enemy will hit it a glancing blow. That type of vessel will come, and will come out of this war between England and Germany before another year has elapsed, if the war continues that long, and the very wise hint is taken by the German Nation. A vessel which is invisible at a distance of 2 miles, which presents no target to its enemy, which carries guns equally as powerful as the greatest battleships, and, in addition, carries torpedoes, would be almost an invincible one and one which would be worth half a dozen of the type of vessels which present a large surface as a target.

Any person who has ever practiced with a rifle or had occasion to use one in hunting in the mountains, or used it upon different kinds of targets, knows that with a .30-30 you can bore a hole through a piece of sheet iron just as easily as you can through a piece of pasteboard, if it is so set as to present a fair surface. He also knows that the heavy edge of a tin can, if it is presented at an angle to that .30-30 rifle, will cause the rifle ball to glance off and ricochet and do no damage at all. It will leave a container that you could again fill with water and carry it in safety without spilling a drop of it.

Some day that little old fact, which has been known since Archimedes made his lever, will get in under the skulls of some of the gentlemen who design battleships, and they will build a ship which will be a battleship in truth and in deed—a vessel with great speed, with guns as powerful as those of any other vessel of war—disappearing guns, if you please—and one that makes a poor target for an enemy to shoot at.

I had hoped that in this large expenditure of over $300,000,000 a few millions—or at least, a few dollars—might be laid by for an investigation for an experiment with a type of ship which would be an improvement over any which we now have, or any other nation has, afloat. You will have noticed during the war between Germany and England, you can not help but have noticed, that the great superdreadnaughts of both of those nations lie close inshore, with a fleet—a swarm, if you please—of torpedo boats, fast and slow, light and heavy draft cruisers, and all kinds of other vessels on guard around them to keep somebody from coming in there and blowing them out of the water.

They are not just what this Government ought to be purchasing at this time to the tune of any two or three hundred millions of dollars. There should be money in this appropriation for building something better and a different type, in my opinion.

Of course I wish to quote my opinion to you rather modestly. I do not claim to be an expert, but I have used the rifle a great deal—more than most of you. I have handled it for over 40 years, and I know what a rifle bullet does when it hits the target, and what kind of target it is easy to hit, and what kind of a target it is hard to hit and penetrate. I know that no man hemmed in with a wounded bear coming head-on to him, with its sloping skull, need rely upon his .30-30 or his Mauser or any other gun unless he shoots low and gets the bear in the eye, and if he is in close quarters, he wants to be sure he lands his bullet there when it charges front-on to him if he loves his life. One inch either up or down or aside may mean death.

I know enough about shooting to know that a vessel which lies low in the water and has sloping decks is a hard one to hit or to penetrate; and I had hoped for something of that sort. I do not know just what I am going to say to the people who have wanted an appropriation for defensive purposes only, who have wanted fortifications that were well-nigh invulnerable for defense only, if I vote for the appropriation of hundreds of millions of dollars seemingly for offensive purposes principally, when half the amount would have protected this country to an extent which would have rendered it invulnerable. Expenditures go on; they are made without the full knowledge and careful weighing in the balance of their merits by the men in the Senate and the men in the House who vote those appropriations which their importance requires. It looks to me as if some time in the near future we must establish a board of efficiency and test out and boil down our method of making these appropriations and expending the people's money, and getting the business of the country into a condition where the people will get value received for the taxes which we impose upon them.

I have called attention to this matter, not with any desire to criticize any of the members of the committee. I believe them to be good men. I believe that they are doing what they think is their full duty by the country. I think they believe that the country is in danger of invasion; and with them I believe that if the attempt were made to invade the country by a first-class power, at least on the Pacific coast, the invasion would be successful. I do not believe that we are in a condition on that coast to protect ourselves. For over a thousand miles the coast of Alaska is open to any man that wants to take it. He could enter it with a scow, if you please, with an old-fashioned 6-pound cannon, and take any port on that coast, barring, perhaps, the head of Prince William Sound.

Every other port is open. Our great coal mines are there, our Government-owned railway, a coal supply ready to drop into the laps and hands of any nation which cares to take it, and in a position, after they once made a landing, where it would be almost impossible for us to expel them. All up and down the Pacific coast from the Straits of Fuca clear through to San Diego there is not a fort upon it but that a landing force could land at another point in behind it and take it from the rear, and

do it without any successful resistance on the part of the people of that country. And then what? Then, with the natives backed up against the Cascade Range, hunting an outlet inland, if you please, trying to cross the desert to the Rocky Mountains, every tunnel through the mountains blown up and railroad communication cut off at the hands of any skillful enemy—and it would be done promptly—what would happen and how long would it take for relief to reach them from this country?

No; I am not of the opinion that the country should not appropriate money for its defense. I am of the opinion that it should expend millions, and you can appropriate as many millions as are necessary and I will vote cheerfully for that, if it is to be expended for that purpose. But to build battle cruisers and battleships, which are usually obsolete in 10 years and become useless and worthless junk in that time, when we are on the eve of devising a new type of vessel, one of which is already in our ports, within an hour's journey of the place upon which I stand, the living evidence of what will and must come in the near future, it seems to me is not a wise expenditure.

I have not an abiding faith in the assertion that we have made preparation in the past which will safeguard the interests of this country in the future. We have, it seems, expended more money—or, at least, the statement is made, and I have not seen it successfully disputed—upon our Navy in the last 10 years than Germany did upon hers or than Japan has upon hers, and, I have even heard it stated, more money than England had expended upon hers, or about as much, and have but little left to show for the expenditure. If the money of the future is to be expended in the manner in which the money of the past has been expended, we will continue to remain unprepared.

Conditions among the people are such, the cost of living is so high, the workingman has to figure so carefully as to his expenditures, that it would be criminal to place so great a tax upon him as this bill will call for, unless there is absolute and pressing need for the expenditure. We do not need the largest navy in the world. We do need a sufficient navy for our own defense. Also we must defend Hawaii and the Philippine Islands, and the last will take as large a fleet as it will to defend the whole Pacific coast. If we would free the Philippine Islands, what a blessing it would be to both countries.

I have put in an amendment asking for the establishment of a torpedo-boat and submarine base at the mouth of the Columbia River, for the reason that the Columbia River has two great headlands almost within gunshot of one another, which control the entire entrance to that harbor. If a reasonable and just expenditure were made for the protection of such harbors as that, for the protection of Grays Harbor, which controls Puget Sound, for the protection of suitable harbors in Alaska which would protect our interests there, such expenditures would be wise ones, and I would be glad to vote for them, and could do so with a clear conscience. But when it comes to expending money for the building of large plants which will be at the mercy of foreign nations I question such expenditures, and it gives me doubts as to many of the other items in the bill with which I am not so familiar.

TORRENS SYSTEM OF TITLE REGISTRATION.

Mr. SHEPPARD. Mr. President, out of order I ask permission to introduce a bill. I want to say, briefly, that it is a bill establishing the Torrens system of title registration in the District of Columbia. It is a system that puts the validity of registered titles beyond the possibility of question. All questions relating to the soundness of the title are settled at the time of admission to registration. The owners of land, whether in the city or in the country, may obtain credit at far less expense and with far more expedition under this system than under the system now generally prevailing. I trust that this measure will be adopted for the District and that it will serve as a model for States that do not now have the Torrens or some similar system. No land-credit system can realize its highest possibilities unless registered titles are made certain and indefeasible.

The bill (S. 6687) to provide for the settlement, registration, transfer, and assurance of titles to land, and to designate a court of land registration, with jurisdiction for said purposes, in the District of Columbia was read twice by its title and referred to the Committee on the District of Columbia.

CHILD LABOR.

Mr. GALLINGER. Mr. President, I am quite solicitous that the bill that is now under consideration shall be considered as speedily as possible, as there are so many other matters of important legislation that of necessity will come before this body. One of those matters is the child-labor law, which most of the Senators, if not all, of the Senators on this side of the Chamber warmly favor. We desire very much, indeed, that before adjournment shall be taken that important measure shall receive the careful consideration of this body.

In that connection I have in my hand a considerable number of telegrams that have come to me this morning, urging consideration for that bill; and in view of its importance I ask that the briefest telegram of the number may be read by the Secretary.

The VICE PRESIDENT. Without objection, the Secretary will read as requested.

The Secretary read the telegram, as follows:

[Telegram.]

NEW YORK, N. Y., *July 19, 1916.*

Hon. JACOB H. GALLINGER,
Senate Chamber, Washington, D. C.:

I earnestly urge upon you the passage of present child-labor bill by the Senate. This is a measure of justice for the children, who are unable to help themselves and who look to the Federal Government for relief.

JOSEPH M. PRICE, *309 Broadway.*

Mr. GALLINGER. I will only add that these good people who are telegraphing me can well save the expense of sending telegrams, because I think they ought to know my attitude on this question, which I have several times expressed.

Mr. KENYON and Mr. NORRIS addressed the chair.

Mr. GALLINGER. I yield to the Senator from Iowa.

Mr. KENYON. I should like to ask the Senator—as he is the leader of the Republicans in this body and I suppose has some communication with the steering committee on the other side—if the program of the steering committee contemplates the passage of the child-labor bill at this session? Can the Senator enlighten us on that point?

Mr. GALLINGER. Mr. President, I can not give a definite reply to that question. Certain Senators representing the minority have had one very pleasant conference with the Democratic steering committee; and at that time it was not definitely decided by the majority that this bill should become a part of the legislative program which they had in part outlined and which they were further to consider.

Mr. CHAMBERLAIN. Mr. President, I want to say, as a member of the steering committee, that they have had this legislative program under consideration a number of times; and it is hoped that that bill, as well as the immigration bill, may be disposed of and a number of other pressing matters of legislation. The only question with the committee was as to what bills could be disposed of, in view of the lateness of the session and the probability of an adjournment some time about the 1st of September; but that bill is on the list that they hope they may be able to dispose of.

Mr. KENYON. Mr. President, I should like to ask the Senator from Oregon when it will be determined by the steering committee whether or not the child-labor bill will receive consideration at this session of Congress? I understand from the Senator that it has not been determined as yet.

Mr. CHAMBERLAIN. They have not determined upon the taking up of any bill absolutely. They have only expressed preference for certain measures that are pending before the Senate and the hope that they may be acted upon. Of course, the appropriation bills have the right of way. They come up first.

Mr. KENYON. The child-labor bill is not one of those for which preference has been expressed, but merely one of those which it was hoped could be passed?

Mr. CHAMBERLAIN. It is one of those for which preference has been expressed.

Mr. KENYON. By the steering committee?

Mr. CHAMBERLAIN. But no promise was made to take it up absolutely, and no promise was made to take up any of them, because the appropriation bills have the right of way and it is impossible to tell.

Mr. NORRIS. May I ask the Senator from Oregon a question? I read in the papers that there is to be a caucus of the majority Members, which is to be assembled next Tuesday night. I should like to ask the Senator from Oregon if that is correct?

Mr. CHAMBERLAIN. I have not been advised of it, Mr. President, as yet.

Mr. JONES. I should like to ask the Senator from Oregon a question. Of course I am not a member of the Democratic caucus and I do not know what took place, but I judge from the newspaper reports that the Democratic caucus decided that the so-called corrupt-practices act is of more importance than the child-labor bill, and therefore put it ahead of it. Is that correct?

Mr. CHAMBERLAIN. I do not know what the newspapers say about these things. I have seen some reports in the newspapers which were pretty accurate reports of what took place in executive sessions of the Senate as well as what took place in a conference of the Democratic Party. I do not know what the Senator may have seen. I do not think that preference has been declared in favor of that bill or any bill as against the child-labor bill.

Mr. JONES. The newspaper report stated that the caucus decided to take up the appropriation bills, the revenue bill, and the shipping bill, and the corrupt-practices act, and so on, in the order named as their preference. The child-labor bill was not given as one of the bills in the preferred list. That was the newspaper report. Of course, I know how correctly they get the proceedings of executive sessions, and I was wondering whether they got the proceedings of the Democratic caucus as correctly as they do the proceedings of the executive sessions. I assume that they got it correctly and that the caucus did decide, for instance, that the corrupt practices is of far more importance to the people of this country than the child-labor bill.

Mr. CHAMBERLAIN. No such action was taken by the Democratic conference. I may say that so far as I am concerned, I am willing to stay here until December to get rid of all this proposed legislation. I am in no hurry to go home now, and if I could carry out my own wishes in the premises, I would insist on staying here. But Senators know as well as I that the appropriation bills are taking up more time than anybody thought it would be possible for them to take. Take the naval appropriation bill; it ought to have been disposed of last Saturday, and here we have passed the middle of the week and it is not finished yet. The Army appropriation bill is to follow, and if it will take the same length of time it will be about the 1st of August before it is disposed of. So in the very nature of things, the legislative program must be curtailed if we are to adjourn by the middle of August.

Mr. FLETCHER. Mr. President, I call for the regular order.

NAVAL APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes.

Mr. NORRIS. Mr. President, in the pending amendment offered by the Senator from Wisconsin [Mr. LA FOLLETTE] I think there ought to be a few words added, and I was going to offer an amendment. I do this because I was impressed with what the junior Senator from Missouri [Mr. REED] said yesterday in objecting to this amendment. He made one objection that it seemed to me was well founded, and also that could be remedied by a slight addition in the amendment.

The Senate will remember that the Senator from Missouri called attention to the fact that there were two parts to this amendment. One would be as follows:

That no battleship, battle cruiser, scout cruiser, torpedo-boat destroyer, or submarine herein appropriated for shall be employed in any manner to coerce or compel the collection of any pecuniary claim of any kind, class, or nature.

The Senator from Missouri called attention to the fact that with this law enacted it would prohibit the Government of the United States from using these ships for the collection of a claim or indemnity due to the United States Government, and I think very well pointed out that such a condition would not be desirable. The other part of the amendment reading from there on is as follows:

Or to enforce any claim of right to any grant or concession for or on behalf of any private citizen, copartnership, or corporation of the United States.

The balance having been stricken out by an amendment I offered yesterday. That part, when it comes to coercion for asserting the claim of right to a grant or concession is one that must exist in order to have the inhibition to apply in favor of a private citizen, copartnership, or corporation, but that limitation would not apply if the construction placed upon the entire amendment by the Senator from Missouri is right, and it would not apply to the first part of the amendment that I read.

I believe that is a good objection, and that part of the amendment ought to be limited the same as the latter part of the amendment is limited to any claim in behalf of a corporation or individual.

Therefore, Mr. President, I move to insert after the word "nature," in line 4, the words "of any individual, firm, or corporation."

I believe if that amendment is agreed to, and I can see no possible objection to it, it would make the same limitation to the first part of the amendment that exists as to the latter part of the amendment, and would meet one of the objections pointed out by the Senator from Missouri, and that, I believe, is well founded.

The VICE PRESIDENT. The question is on the amendment of the Senator from Nebraska [Mr. NORRIS] to the amendment of the Senator from Wisconsin [Mr. LA FOLLETTE].

Mr. BRANDEGEE. I should like to have the amendment read complete, as it would be if the amendment of the Senator from Nebraska were adopted.

The SECRETARY. After the words "class or nature," at the end of line 4, insert "of any individual, firm, or corporation," so that as amended the amendment would read:

Provided, That no battleship, battle cruiser, scout cruiser, torpedo-boat destroyer, or submarine herein appropriated for shall be employed in any manner to coerce or compel the collection of any pecuniary claim of any kind, class, or nature of any individual, firm, or corporation, or to enforce any claim of right to any grant or concession for or on behalf of any private citizen, copartnership, or corporation of the United States.

Mr. REED. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Missouri?

Mr. NORRIS. I yield the floor if the Senator wishes to take it.

Mr. REED. No; I just wish to ask the Senator a question.

Mr. NORRIS. All right.

Mr. REED. I ask the Senator why it would not be well in carrying out this idea to enlarge the amendment a little and make it read:

And no part of the military forces of the United States shall ever be employed to protect the right of any American citizen.

I think that would cover the case in broad language.

Mr. NORRIS. That may be the Senator's idea, but it is not mine. He may be right and I may be wrong.

Mr. SWANSON. Mr. President, I wish to suggest that this is an amendment offered by the Senator from Wisconsin [Mr. LA FOLLETTE] and it would be well before it is amended that he should be sent for.

Mr. NORRIS. I have no objection, if he does not happen to be here, but he will no doubt be here before we vote on it. There is no hurry about it.

Mr. President, I wish to say just a word in regard to the question of the Senator from Missouri. Personally I believe in the amendment the Senator from Wisconsin said he was going to offer the day before. Of course, he realizes, as I think we all do, that the amendment suggested the day before and gave notice of would require a suspension of the rules, but it would apply both to the Army and to the Navy and to the ships that we already have in the Navy and to any that we might build in the future. The amendment he then said he would offer and the one which to my mind would bring the relief and the one which we ought to adopt reads as follows:

Provided, That the Army and Navy of the United States shall not be used to coerce or compel the collection of any pecuniary claim of any kind, class, or nature, or to enforce any claim of right to any grant or concession for or on behalf of any private citizen, copartnership, or corporation of the United States against any foreign Government with which this Government is at peace until said citizen, copartnership, or corporation shall have exhausted his legal remedies in the courts of the foreign Government or if a denial of justice after the exhaustion of such legal remedies being alleged the foreign Government shall decline an offer on the part of the Government of the United States to submit the case to arbitration.

Mr. President, that would be an amendment to my mind that would be effective and one that ought to be incorporated in the law of the United States. I do not believe, Mr. President, that any man who goes into a foreign country and invests his money ought to be entitled to come to the Government of the United States and demand that our Army and our Navy be sent out to protect his financial interest or his claim or his concession, at least until he has exhausted his right in the courts of that country and then that country has declined to arbitrate the matter. It does seem to me that if we are going to build up a navy and an army for the purpose of enforcing the payment of private claims and the collection of private debts, we ought to announce in the beginning that instead of building it up for peace and protection at home we are building it up for aggression and to be used for the sake of making money on the part of men who risk their money in investments in foreign countries.

I am not saying anything against the man who invests his money in a foreign country—I want to protect him in it—but he must first rely upon the courts of that country. If they are in such a condition that they can not operate or do justice, then there ought to be an arbitration; and if the Government in which the claim exists is willing to arbitrate, then that arbitration ought to settle it, and in no case ought we to take the Army or the Navy to enforce the claim or collect the debt until that process has been gone through with and they have declined to arbitrate.

The Senator from Missouri the other day made an objection to the amendment of the Senator from Wisconsin, and one of the points, as I said, that he made was that it would prohibit the use of these particular ships in the collection of debts due to the United States Government. I have offered an amendment that will eliminate that objection. It seems to me that ought to make it less objectionable to those who are opposed to the amendment.

I will say I am sorry the Senator from Wisconsin has not offered the amendment I have read and that he gave notice day before yesterday he would offer. If it could be done, I would be glad to offer it as a substitute for the amendment that is pending, although I presume that would be subject to a point of order, because it is much broader than the amendment that is pending. I do not like, in the absence of the Senator from Wisconsin, to press it.

Mr. KENYON. I was going to suggest the absence of a quorum.

Mr. BRANDEGEE. Will the Senator allow me? I was going to take the floor.

Mr. KENYON. I will not suggest the absence of a quorum then, although I suppose Senators would like to hear the Senator.

Mr. BRANDEGEE. I do not care to yield for that purpose.

Mr. KENYON. I withdraw the suggestion.

Mr. TILLMAN. I wish to ask the Senator from Connecticut to yield to me to have some printing done.

Mr. BRANDEGEE. I will yield to the Senator.

Mr. TILLMAN. I am very much obliged.

Mr. BRANDEGEE. I yield to the Senator.

Mr. TILLMAN. I ask unanimous consent for publication in the RECORD in large type, without reading, of an article in the issue of July 20 of the Manufacturers' Record, of Baltimore, entitled "Mr. Schwab on armor-plate matters and a reply." It will be very instructive. I want a history of this armor fight and the struggle we have had to get Government armor at a reasonable price to be found in as small a compass in the RECORD as is possible. I have marked the pages which I ask to have republished in the CONGRESSIONAL RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. TILLMAN. I am very much obliged to the Senator from Connecticut.

Mr. BRANDEGEE. Mr. President, I make no objection to the Senator's request, although a request on the part of the senior Senator from Pennsylvania [Mr. PENROSE], that the statement issued by the Bethlehem Steel Co. stating their position should be printed as a public document was denied the other day.

Mr. TILLMAN. I did not object to it. If I had been here I would have insisted that it should go in. But the Senator from Pennsylvania yesterday put in the RECORD a full page of the Washington Post, an advertisement, by the way——

Mr. BRANDEGEE. I am not saying that the Senator objected.

Mr. TILLMAN. I am glad to have all the light we can possibly have on this armor matter, because it influences the sentiment of the country more and more.

Mr. NORRIS. If the Senator from Connecticut will yield, I will state that the statement of the Bethlehem Steel Co. was printed in the RECORD of yesterday's proceedings.

Mr. BRANDEGEE. It is a work of supererogation to ask me to yield, because Senators get up anyway and say just what they have a mind to whether I yield or not. They say "if I yield," and then they take the floor and suppress me without waiting to find out whether I yield or not.

As to the Senator from South Carolina, what I said was not that he objected to the statement of the Bethlehem Steel Co. being printed as a public document or a Senate document, but that some Senator did object yesterday to such a request, but not the Senator from South Carolina. I make no objection, however, to the request of the Senator from South Carolina.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

"MR. SCHWAB ON ARMOR-PLATE MATTERS AND A REPLY.

"'The average armor-plate requirements of the United States for the past 20 years have been about 10,000 tons.' This statement, made in an advertisement of the Bethlehem Steel Co., is correct. With an average demand on the part of the Government for 10,000 tons a year, it has not been necessary to dismantle any one of the three existing armor-plate plants. The Iron and Steel Directory, issued by the American Iron and Steel Institute, gives the annual capacity of the Carnegie armor plant as 15,000 tons and of the Bethlehem Co. as 10,000 tons; and the Midvale Steel Co. wires the Manufacturers' Record that its capacity is about 10,000 tons of armor plate per year. This makes a total, if these plants were run to their full capacity, of 35,000 tons a year. They are operating, with no suggestion of being dismantled, on an average consumption by the Government for 20 years of 10,000 tons annually. The Midvale plant was established much later than the others.

"If they were now run to their fullest capacity—and theoretical capacity in a case of this kind is rarely ever reached by any industry—these concerns could turn out 35,000 tons of armor plate per year. The naval program, however, in the bill which, without material change, will be passed by Congress will require 50,000 tons, according to the estimate of the Bureau of Ordnance of the Navy Department. Under this bill an average annual consumption by the Government of 10,000 tons a year for the last 20 years, as so strongly emphasized by the Bethlehem Co., could be more than trebled for the armor-plate people and still leave an excess demand fully equal to the proposed armor-plate plant of the Government. Moreover, as this Government plant could not be built and put in operation within two years, probably—and some anticipate a longer time—existing armor-plate plants would be taxed beyond their capacity to meet the needs of the Government under the bill for an enlarged Navy. Bearing on this whole question, we present the following correspondence, made necessary by the tremendous campaign of advertising which the Bethlehem Co. is carrying to keep the Government from building an armor-plate plant."

[From Mr. Schwab to Manufacturers' Record.]

"BETHLEHEM STEEL CORPORATION,
"111 BROADWAY, TRINITY BUILDING,
"New York, N. Y., July 10, 1916.

"Mr. RICHARD H. EDMONDS,
"Editor Manufacturers' Record, Baltimore, Md.

"DEAR MR. EDMONDS: Absence from the city has prevented an earlier reply to your letter of June 21.

"I regret that you have found it so necessary to urge the abandonment of private manufacture of armor plate and the substitution therefor of a Government plant. In view of the fact that the present private industry was established at the behest of the United States Government, we are unable to see the fairness or the justice of supplanting that enterprise with a Government plant, especially when no needs can thereby be served in the direction of national defense or of economy.

"Your suggestion that the present armor plants are dependent entirely on Lake Superior ores is wholly without foundation. In the first place, it takes very little ore to make all the armor plate which is necessary for the United States Navy in a year. There are ample deposits of ore for such purpose in central Pennsylvania. Besides that, there is always a large amount of pig iron at the various iron and steel plants throughout the country, and the available supply of pig would at any time be sufficient to manufacture all the armor which might be required. Further than that, we are not dependent upon the Soo Canal to obtain ores even from the Lake Superior region. Such ores can very easily be brought by railroad to Duluth and from there direct, via Chicago, to either Pittsburgh, Philadelphia, or Bethlehem. Such ores can be brought quite as easily to any of these three points as to Alabama, where you suggest that a Government plant be located.

"There is the further fact to consider that if, as you suggest, access of the United States to Lake Superior regions, via the Soo Canal, should be cut off and the armor-plate plants near the seacoast, such as at South Bethlehem and at Philadelphia, should be in possession of an enemy, it would be safe to assume that our entire seacoast would then have been captured and our Navy rendered powerless. It would then be impossible to construct a naval ship on the seacoast, and armor, whether manufactured at Pittsburgh or Alabama, would be useless.

"I hope you will appreciate from the foregoing that the argument on the ground of ore supply for a Government plant at some point 'away from the coast and not depending on Lake Superior or foreign ores' falls to the ground.

"Though every man ought to express his views exactly as he has them, I can not but feel that the opposition of the Manufacturers' Record to private armor manufacture is based upon misinformation and faulty analysis of the facts as they are. If we can set you right, it would give us pleasure to do so. With that end in view, we shall be very glad to supply you with any information in our power.

"Very truly, yours,

"C. M. SCHWAB."

[From Manufacturers' Record to Mr. Schwab.]

"JULY 14, 1916.

"Mr. CHARLES M. SCHWAB,
"Chairman Bethlehem Steel Co.,
"111 Broadway, New York, N. Y.

"DEAR MR. SCHWAB: Acknowledging the receipt of yours of July 10. You quite misinterpret the position of the Manufacturers' Record. We have not urged the abandonment of the private manufacture of armor plate. On the contrary, we would regret to see any armor-plate plant dismantled, and we believe that there is no reason for the dismantling of any plant now in existence; nor would there be, in my opinion, any reason for doing this even if the Government built a plant, for the requirements of the Navy for armor plate will in the future for some years to come be so much greater than in the past that the output of the Government plant, even when it has been built, will probably not more than take up the excess in the increased demand over the average of the last 8 or 10 years. As your plant and others have not been dismantled during the last 8 or 10 years, I can not see that there would be any possible ground for dismantling them solely because the Government built a plant.

"The country has very wisely come to a realization of the necessity of a large increase in our Navy, an increase so great as to require a very large increase in the production of armor plate over even the largest output of any one year in the history of armor-plate making. With the assurance, therefore, that existing plants would have at least as much armor-plate business as you have ever had in any one year, and with the assurance of its being continuous for years to come by reason of the growth of the Navy, can you find justification for claiming that the building of a Government plant would necessitate the dismantling of yours? It seems to me there would be room enough for all.

"I wish to emphasize, therefore, that I have not in any way whatsoever urged the abandonment of the private manufacturing of armor plate. I have not made a single suggestion looking to any step which would necessitate the dismantling of existing plants nor to the lessening of the amount made by existing plants for the United States Government.

"We have strongly urged the building of an armor-plate plant somewhere in the Central South or West, free from dependence upon the sources of ore upon which all existing armor-plate plants depend, and beyond the danger line of invasion. We have repeatedly asked through the Manufacturers' Record if you individually, or all armor-plate makers collectively, would be willing to build a plant in the Central South or West, provided the Government agreed not to build an armor plant.

"We have asked if you would do this as a means of insuring the Nation against the possibility of the danger which it confronts by reason of the location of existing plants. Neither you nor any of the other armor-plate people have replied in any way whatsoever to that question.

"I have persistently taken the ground that if the iron and steel leaders, the armor-plate and munition manufacturers of the country, refuse to recognize the danger of existing conditions in iron and steel, it is absolutely incumbent upon the Government, unless it desires to be guilty of criminal folly to the Nation, to build such plants far away from the coast and from the Lakes.

"I have persistently urged that the best point should be selected regardless of any sectional interests, whether that point be in the South or in the West.

"Conditions have greatly changed in the last two years. Things that seemed correct then are now seen to be wholly incorrect. The duty of the Government to the Nation demands that it shall not permit existing conditions to continue. Broadly speaking, the entire munition-making business of the United States and the armor-plate industry are located in a limited area, which, as any naval or Army officer will tell you, could easily be captured under existing conditions. If that were done, there would be no opportunity for years to come to develop munition making or armor-plate production in other sections, and we can not for years to come so enlarge our Navy as to overcome this danger.

"You suggest that if the conditions which have been outlined in regard to the possibility of the capture of the East or the shutting off of Lake Superior ores had been brought about our Navy would have been rendered powerless, and armor, whether manufactured at Pittsburgh or in Alabama, would be useless.

"Suppose for a moment that the Navy had been defeated and the North Atlantic coast had been captured by the enemy. That would not necessarily mean the capture of the Pacific coast, and there are some shipbuilding facilities, including your own large Union Iron Works, of San Francisco, where armor plate would be very necessary in an effort to strengthen the Navy on the Pacific coast, so that that region, at least, might be saved from the destruction which had come upon the Atlantic coast.

"The time is necessarily coming, too, when the South, with more than one-half of the coast line of the United States, will have to be recognized as the greatest undeveloped asset of the Nation, and its defense by the development of naval shipbuilding on the South Atlantic and Gulf coast will have become recognized as a necessity to national safety.

"The building of an armor-plate plant in the Central South or West would enable the Nation to supply armor plate to the shipbuilding interests of the Pacific coast and to those on the South Atlantic or Gulf coast that might not have been captured by the capture of the northeastern coast of the United States.

"You can readily understand, of course, that the first blow at this country would be to capture our iron-ore supplies or shut off the shipment of iron ore via the Soo Canal and the capture of the munition-making sections. Upon sections so open to invasion as are these the full force of an enemy would be concentrated, and we have nothing in the way of a navy or army which could by any possibility for years to come defend us against a strong, well-equipped nation. In the meantime we are continuing to carry all of our preparedness eggs in one basket, and that easily reached by the stone of an enemy.

"You are, of course, familiar with the fact that it was the capture of the large iron and steel producing interests of Belgium and France which so seriously handicapped those countries. The iron and steel interests of France, as you know, were located in the northern and eastern part of that country. Within a few weeks after war had been declared they were in possession of the Germans. You have doubtless read a report of the United States Department of Commerce recently issued, in which, referring to this situation, it is said:

"'As shortly after the outbreak of hostilities the great metallurgical centers of the northern and eastern districts of France were occupied by the enemy and possession taken of the rich ore mines and the important furnaces and rolling mills that are located in that region, a large proportion of the steel and iron supply of France was eliminated.'

"I suppose you have also read the statement by Mr. William L. Saunders, one of the vice presidents of the Naval Consulting Board of the United States, and, as you know, one of the foremost engineers of the country, in which he said:

"'It has been said that the German Army went through Belgium because it was the shortest way to Paris. This may be true, but a reason of more importance presents itself in that Belgium is rich in coal, iron, and factories. They are not used for the benefit of Germany and might have been used to supply munitions to her enemies. Most of the mineral wealth of France is laid in her northern boundaries, and these are now held by Germany. The same is true of French industries. Galicia is rich in oil, Poland in coal, and the largest iron deposits of Russia are in the Donets Basin, which borders on Poland. German conquests have therefore been directed to places where mines and factories are located, the plain intent of this being to utilize these resources during the war and to be in a position on the declaration of peace to retain some hold upon them.'

"Familiar as you are with all of the conditions of our own unpreparedness, you, of course, know full well that if we were at war with Great Britain the entire Lake Superior district could be captured overnight, and not a ton of ore could we get through the Soo Canal or from the mines of that district.

"Our importation if iron ore would, in the event of war, unless we had attained a position to be able to command the seas, and that is not possible for many years to come, if ever, necessarily instantaneously cease upon the declaration of war against us by any strong power. The iron ore that you and others bring from abroad would not then be available.

"If it be said that there is no possible danger of this condition coming about, then we would immediately have to say that there is no necessity for building a navy nor creating an army, since if war can never come upon us there is no reason to prepare against it.

"You and other iron and steel men are staking every dollar that is invested in the iron and steel and munition interests dependent upon Lake Superior or foreign ores upon our never getting into a war with Great Britain. I trust that in this you may be justified and that the awful curse of war between the two great Anglo-Saxon nations of the world may never come about; but is the Nation justified in taking a risk which you and your associates in iron and steel making feel disposed to take as to your individual investments? Indeed, are you justified yourselves in doing it in view of the uncertainties of the future?

"You are, of course, also thoroughly familiar with the fact that if Germany should win in the present war and should desire to recoup its losses by levying tribute on this country we would be defenseless. You are also, I take it for granted, familiar with the report, fairly well established as authoritative, I think, that if we were engaged in foreign war and our Navy had been defeated no effort would be made by the Army under existing conditions to prevent the landing of a foreign foe on our shores. It is understood, so I am reliably informed, that our Army officers recognize that to undertake to prevent the capture of New York, Philadelphia, Baltimore, and Boston would under such conditions be merely committing murder of the existing Army and making it impossible to build up an Army in the interior with which eventually to repel invasions.

"If these suggestions are chimerical, will you not bear in mind that they are not near so chimerical as would have been suggestions about all of Europe being engulfed in war if they had been made just two years ago?

"I am, of course, aware of the fact that it takes a very small amount of iron ore or pig iron to make the comparatively few thousand tons of armor plate annually produced in this country. I know that Pennsylvania produces a few hundred thousand tons of iron ore a year out of the 25,000,000 to 30,000,000 tons that it consumes. But can you conceive that if such chaos had been produced as would prevail in the iron and steel and railroad industries of the country if the Lake Superior supply had been cut off that there would be any possibility of armor-plate making or munition production under such conditions in the sections dependent upon these ores? Chaos would reign in all the region which now depends upon the Lake Superior district for about 90 per cent of its iron ore. How trifilingly small would be the few hundred thousand tons mined in Pennsylvania or the limited production of New York under such conditions! The orderly running of business could not then be continued, and the making of munitions of war and of armor plate in existing centers would be impossible.

"The suggestion of railroad transportation of Lake Superior ores seems to overlook the fact that there would be no ores coming out of Lake Superior if that region were in possession of an enemy. If we still retained the Lake Superior district, but the Soo Canal had been blocked, it would not be possible for the railroads, confronted with war conditions, added to such congestion as they have had recently, to shift from water to rail transportation a sufficient supply of ores to be of material value in the maintenance of the iron and steel interests. This point, I think, you will find fully covered in the Manufacturers' Record of last week by Mr. James Bowron, president of the Gulf States Steel Co., as well as editorially.

"My suggestion has not been, as you seem to indicate, that an armor plant should be located in Alabama.

"It is possible that Alabama would be a good point, but I have not specifically mentioned that State, nor, indeed, any other State. I have broadly contended for the building of an armor-plate plant and munition-making plants beyond the Alleghenies, somewhere in the South, Southwest, or Central West, wherever experts may decide the best point or points to be found. As the South and Southwest have nearly one-third of the Nation's population and more than one-half of the Nation's coast line, as they have great stores of iron ore and coal available for iron and steel development and the manufacture of munitions of all kinds, I have appealed to the broad patriotism and to the purely selfish interests of the iron and steel men and financiers of the country to turn their attention to the development of these industries away from the limited area in which their interests are now concentrated.

"Personally I would prefer to see such work done by private capital; but if private capital absolutely refuses to change existing conditions, which are dangerous to the welfare of the country, then in my opinion it behooves the National Government to build such plants in order to safeguard the life of the Nation, and in doing so the Government would safeguard the investments of the very iron and steel men and financiers who up to the present time refuse 'to throw out this anchor to windward' and help to save themselves in the storm that may some day come upon them.

"I rejoice in the magnificent work that you and your associates have done at Bethlehem, and which you are now preparing to do at Sparrows Point (Baltimore). I am especially interested in your plan for the extension of the shipyard at Sparrows Point commensurate with the increasing shipbuilding needs of this country for merchant ships as well as for ships of war. In all of this I bid you Godspeed, for the work that you are doing is of national importance.

"Nevertheless, I would ask you to bear in mind that back of the coast lies the great heart of the Nation. If you and other leaders in iron and steel fail to recognize this fact and continue to keep all of the iron-and-steel and armor-plate and munition-building business along the coast (Atlantic and Lake), there may some day come a storm which will be to such interests and to this Nation what the storm of German invasion has been to France and Belgium. I am trying to save the country—and that means the saving of you and your associates in iron and steel and kindred interests—from that situation.

"You have been a great leader, Mr. Schwab, in the creation of the vast iron and steel interests of this country, but has not the time come when, looking at this situation from the broad viewpoint of a patriot as well as that of an iron and steel maker, you can afford to take the lead in bringing about a great iron-and-steel and munition-making industry somewhere in the heart of the country as an insurance against the dangers which confront the Nation so long as these interests are centered on the coast? Your leadership in such a movement would be heralded throughout the country as that of a far-seeing business man doing a splendid patriotic service of national importance. I shall be glad to see you hold this position before the Nation.

"Very truly, yours,

"RICHARD H. EDMONDS, *Editor.*"

"VOLUME OF TRAFFIC THROUGH SOO CANALS.

"The total traffic passing through the Soo canals, American and Canadian, for the three months, April, May, and June, amounted to 21,775,262 tons through the United States canal and 5,694,045 tons through the parallel Canadian canal, or a total of 27,469,307.

"Of this amount there were 14,430,739 tons of iron ore eastbound through the United States canal and 4,043,789 tons eastbound through the Canadian canal, a total of 18,474,528 tons in three months.

"The eastbound grain traffic amounted to 113,837,643 bushels, of which 70,354,250 bushels passed through the United States canal and 43,483,393 bushels through the Canadian canal.

"There were also 1,953,556 barrels of flour, the bulk of which went through the United States canal.

"The heaviest item in westbound traffic was coal, which amounted to 4,372,197 tons, the bulk of which went through the Canadian canal.

"The total tonnage passing eastbound and westbound through the canals for these three months was 27,469,307 tons.

"The total wheat crop of the United States of last year, amounting to about 1,000,000,000 bushels, by far the largest crop ever produced, would make an aggregate of 30,000,000 tons, or only a little more than the amount of traffic that passed through the Soo Canal in three months. And yet some of our iron and steel people have taken the ground that if the Soo canals were blocked this traffic could suddenly be thrown upon the railroads, and that they could bring down from the Lake Superior region the iron ore which now comes out of that district via the Soo Canal.

"The total tonnage of ore alone through the Soo Canal will this year amount to about 55,000,000 tons, the amount depending upon the productive capacity of the mines and the shipping facilities, for the demand is in excess of even these figures if ore should prove available. In other words, the iron ore which passes through the Soo Canal is equal in tonnage to twice the wheat crop of last year, with its billion-bushel yield.

"It looks as though our iron and steel people have scarcely given serious thought to the subject. The railroad people certainly know better.

"Moreover, much more than half of the tonnage of the three months passed through the Canadian Soo Canal, a fact not to be overlooked."

[To Baltimore Sun from Manufacturers' Record.]

"JULY 17, 1916.

"EDITOR THE SUN, *Baltimore, Md.*

"DEAR SIR: Chairman Schwab and President Grace, of the Bethlehem Steel Co., in the Sun of to-day undertook to deny the correctness of statements made by the Manufacturers' Record in regard to the dependence of armor-plate making upon Lake Superior ores. They stated that there are ample ore deposits in Pennsylvania from which to secure all the ore needed for armor-plate making if the Lake Superior ore supply had been cut off by an enemy.

"Chairman Schwab and President Grace are men of such broad business caliber and so accustomed to deal with business questions from a broad standpoint that I marvel that they have permitted an advertisement such as that appearing in the Sun to be published over their names. The statements in it would indicate that either they have very little basis on which to found their arguments against the Government's armor-

plate plant, or else the writer of their advertisements did not understand his business.

"It is true that there are some large deposits of iron ore in Pennsylvania; no one denies that fact. Pennsylvania annually produces from about 350,000 tons to 500,000 tons of iron ore, there having been a steady decline in the output of Pennsylvania iron ore from 739,000 tons in 1910 to 400,000 tons in 1914 and to 363,000 tons in 1915. Pennsylvania is consuming about 20,000,000 to 25,000,000 tons of iron ore a year, and rapidly increasing the amount, while its own iron-ore production is steadily decreasing.

"The total ore production of Pennsylvania is considerably less than 2 per cent of the amount of ore consumed in the furnaces of that State, the other 98 per cent coming from the Lake Superior district, with the exception of the limited amount of foreign ore, the total imports of which for the entire country in 1914 were 1,350,000 tons, and for 1913, 2,590,000 tons. In 1914 the imports of foreign ore through Philadelphia were 762,000 tons, or 400,000 tons more than the total production of iron ore in Pennsylvania in that year.

"The amount of iron ore and pig iron annually used in the making of armor plate is, of course, small, since armor-plate tonnage is not in itself a big item, and no one for a moment questions that there is more iron ore in Pennsylvania than would be needed to take care of armor-plate production, provided nothing should be considered except armor-plate production in time of war. It would, however, be the height of absurdity to suppose that if 90 to 95 per cent of the entire iron-ore consumption of the United States, and certainly 98 per cent of the amount consumed in Pennsylvania, were cut off by the capture of the Lake Superior district by an enemy, or the destruction of the Soo Canal, that the other 2 per cent produced in Pennsylvania could be spread out to take care of the iron and steel interests of the State, of which armor-plate making is only one small item.

"Under such conditions there would be chaos in the iron and steel and munition trade of the United States, and the vast structure of iron and steel plants in Pennsylvania and on the Lakes dependent upon Lake Superior ores would crumble like a house of cards. Armor-plate making, like the other iron and steel interests of Pennsylvania, would go by the board in this chaos.

"Of the total production of iron ore in the United States, between 85 and 90 per cent comes out of the Lake Superior district, and practically all of it passes through the Soo Canal. About 1,300,000 to 2,500,000 tons of foreign ore come into this country from Cuba and other foreign countries, the amount varying according to the activity in the steel trade. The total amount of steel produced from the Lake Superior and foreign ores is about 95 per cent of the total steel output of the United States, the other 5 per cent being produced by the South, the Southwest, and the Pacific coast section. Thus in the event of a capture by an enemy of the Lake Superior district between 85 and 90 per cent of the ore production of the United States would instantaneously cease, so far as this country is concerned. The entire output of its ores would then go into the enemy's country, to be used to produce weapons of destruction against us.

"Of course, under such war conditions the importation of foreign ore would be cut off, because it would not be possible for us for years to come to be strong enough to command the seas.

"The more this subject is studied the more important will it seem to be. Every argument advanced by the Bethlehem Steel Co. and others in the effort to prevent the building of an armor-plate plant by the Government, or the development of munition making away from the coast, only illuminates the whole situation and shows the overwhelming danger of existing conditions.

"I trust that this country and Great Britain will never be at war, but no one can say that such a dire disaster to the world will never come about. If it should happen, Great Britain with its Canadian soldiers could overnight take possession of the entire Lake Superior district and prevent a single ton of ore from coming out of that region to feed the furnaces of this country. It would not then be possible to develop iron mines with an output sufficient to enable us to make any contest whatever against our enemy, as we would practically have been captured body and soul and would be compelled to yield to any terms the conqueror dictated.

"Are we willing to continue in that position?

"In other sections of the country, the South and Southwest and the Far West, there are vast stores of iron ore which could be profitably developed in order to bring about a well-rounded industrial growth to insure us in time of war against the danger which I have outlined.

"If the iron and steel leaders of the country persistently refuse to recognize this situation, it becomes the duty of the Government to safeguard the Nation's life and build not only armor plate but munition plants in sections far away from the Atlantic coast, from the Lakes, and from all sections dependent upon Lake ores. As a Nation we would be guilty of criminal folly to sit still and make no move to meet this condition.

"In their advertisement Messrs. Schwab and Grace state that as the capacity of the proposed Government armor-plate plant would be greater than the average consumption of armor plate during the last 20 years, it would supplant private plants and leave no business for them. I confess to great surprise at a statement so weak as this being used as an argument.

"It seems to indicate a lamentable lack of arguments. The average consumption of armor plate during the last 20 years has been small as compared with the amount that will now be needed under the plans for vastly increasing our Navy. To undertake to base an argument against a Government armor-plate plant on the average annual output of armor plate for the last 20 years is so absurd as to suggest that neither Mr. Schwab nor Mr. Grace ever saw the statement before it was inserted over their names in the advertisement of the Bethlehem Steel Co. I give them credit for never having been individually responsible for so silly an effort at argument. They are men of noted ability, and have too broad a knowledge of conditions to undertake to measure the consumption of armor plate in the future by the average consumption of the last 20 years. The world has changed in the last two years, and this Nation is changing with it. The Navy of the future will make the little Navy of the last 20 years seem triflingly small, and, of course, Mr. Schwab and Mr. Grace are fully aware of this.

"In another advertisement the Bethlehem Steel Co. takes the ground that if the section in which the three armor-plate plants are located should be captured, our Navy would have been by that time destroyed and armor plate would not be needed. In this the company overlooks the fact that we might still have a navy existing on the Pacific coast, and that there are large shipbuilding plants on that coast to which armor plate could be sent from an interior plant which had not been captured.

"It is not to be supposed that if our Atlantic coast navy had been destroyed and Pennsylvania and New York captured by an invader that the rest of the country would sit down supinely and do nothing unless we had failed to build munition plants and an armor-plate plant back of the mountain ranges, which would form a line of defense.

"If we permitted existing conditions in armor-plate and munition making and the iron and steel business generally to continue, we would have no basis on which to make a fight if Pennsylvania and New York had been captured; and the rest of the country, with 90,000,000 people or more, would be utterly helpless, because the Government of to-day had been recreant to its responsibility in its failure to develop munition making and armor-plate making in the central part of the country, in order to lessen our dependence upon conditions as they now exist.

"For the magnificent development work of Mr. Schwab and Mr. Grace, for whom I have the highest personal regard and whose genius I greatly admire, I would give to the Bethlehem people the highest praise; but when a matter so vital to the Nation's life is at stake, those who fail to study the situation and try to drive it home upon public attention would be recreant to their responsibility to their country's welfare.

"Very truly, yours,

"RICHARD H. EDMONDS, *Editor*."

"THE ARMOR-PLATE QUESTION AND THE INABILITY OF EXISTING PLANTS TO SUPPLY THE GOVERNMENT'S NEEDS.

"[Special Correspondence Manufacturers' Record.]

"WASHINGTON, D. C., *July 17*.

"Officials of the Bureau of Ordnance of the Navy Department estimated to-day that if the naval program, as finally adopted, includes three dreadnaughts and four battle cruisers, there will be need for approximately 55,000 tons of armor plate, or 35,000 tons over and above the capacity of the proposed Government armor-plate plant.

"The Bethlehem Steel Co. says that the average requirements of the United States Government for the past 10 years have been about 10,000 tons annually. If the private plants have been able to exist upon contracts amounting to 10,000 tons annually, they will be able to get along much better handling the sulplus over the 20,000-tons capacity of the proposed Government plant. The surplus under the new program is bound to be much greater than the amount of business given to the private

plants during the period when they had a monopoly of the business.

"Even though there should be but four battle cruisers in the program as finally adopted, it is estimated that each would require about 8,000 tons of armor plate, or a total of 32,000 tons. With the proposed Government plant handling about 20,000 tons, there still would be a surplus of 12,000 tons for the private plants, which is more than they formerly had.

"Members of Congress are beginning to charge that the reason the armor-plate companies are making such a desperate fight is because they have in sight now a business several times as large as they formerly had.

"Owing to the changes in the qualities of armor which have occurred in the years that the art has been developing, it is not possible to make an exact comparison in the cost of armor year by year, and, as changes have occurred year by year, the designations used to distinguish different types of armor have remained practically the same. Armor which this year might be designated as class B armor could be totally different in its composition from so-called class B armor of five years ago. While there are four different grades of armor—class A, class A–1, class B, and class C—now in use, by far a larger proportion of armor purchased is known as class A armor. This armor represents probably 80 or 85 per cent of the total purchased of any one order. Armor now designated as class A armor is that which is used for the side armor of a ship, and armor for this purpose has, of course, constituted the bulk of every purchase in preceding years. While it may have been known as simple steel, harveyized armor, or krupped armor, and did vary from year to year in its composition, it was designed for side armor. Only on this basis can the closest approximate comparison of the bids submitted on armor be obtained. The following table gives this information:

Bidder.	Date of bid.	Price bid per ton.
Bethlehem	June 1, 1887	$556.79
Carnegie	Nov. 20, 1890	538.35
Do	Feb. 28, 1893	560.43
Bethlehem	Mar. 1, 1893	564.46
Do	June 1, 1896	558.93
Carnegie	....do	554.35
Do	June 3, 1896	400.00
Bethlehem	June 9, 1898	400.00
Carnegie	Aug. 30, 1899	400.00
Bethlehem	Oct. 4, 1899	400.00
Carnegie	Nov. 26, 1900	420.00
Bethlehem	Nov. 28, 1900	420.00
Do	Feb. 28, 1903	420.00
Carnegie	....do	420.00
Midvale	Dec. 15, 1903	398.00
Bethlehem	Dec. 31, 1903	420.00
Carnegie	Jan. 9, 1904	420.00

"It will be observed that from 1898 to 1899 four contracts were awarded, two to Bethlehem and two to Carnegie, each at the same figure, $400 a ton.

"Between November 26, 1900, and April 3, 1905, four contracts were awarded to Bethlehem and four to Carnegie, each at the same figure, $420 a ton; but it will be noted that in 1903 the Midvale Co. submitted its first bid of $398 a ton, $22 lower than the prevailing rates paid to the two concerns which then divided the business.

"The next four orders, placed in 1905 and 1906, were at a lower figure, due to the entry of Midvale into the field of genuine competition, but in 1907 and thereafter until March 1, 1913, we find each of the three companies submitting identical bids. Midvale has stated that when they underbid their competitors in 1906 the department declined to award them the entire contract, and divided it among the three concerns, and that thereafter there was no incentive to underbid their competitors. How equally the department shared its orders among these three concerns and how equally they profited from them is shown by the awards made from 1907 until February, 1913:

	Total tons.	Value of orders.
Bethlehem	23,588	$10,110,464
Carnegie	23,541	8,640,783
Midvale	21,571	9,261,117

"The first bids submitted to Secretary Daniels were for the battleship *Arizona*. The bids of each bidder were identical to a penny with one another, and with the bids just previously submitted to the outgoing administration. The magic spell which had for 15 years directed with unerring foresight the harmonious agreement which distinguished this competition had not yet been dissipated.

"Secretary Daniels promptly rejected all bids, and has secured as a result of his vigorous protest better prices on armor for the *Arizona* and subsequent vessels than those prevailing when he entered office. Had he continued to pay the prices last charged his predecessors, the armor he has ordered would have cost the Government $1,110,084 more, but his vigorous protest has saved this sum to the Nation.

"The Government as a manufacturer is not hindered by the necessity for profits." Its sole concern is to make an article as perfect as it can be made with the money available; not to produce an article which, while less perfect, would meet specifications and insure a larger profit. Experience has shown to be justified the expectation that Government products are the equal, frequently the superior, of private products as regards quality; and that the Government can manufacture economically has been demonstrated by the Navy Powder Factory, the Navy Torpedo Works, and its plant for the production of mines. Smokeless powder of the general character at present in use was first purchased in 1897 at $1 a pound. The price of 53 cents a pound which appears in 1912 was fixed as the limit to be paid for powder by Congress, after the cost of powder manufacture had been carefully investigated by a congressional committee, of which Hon. SWAGER SHERLEY was chairman.

"The annual capacity of the private armor-plate plants, for their combined output would not, under normal circumstances, probably exceed 30,000 tons. Should four battle cruisers and three dreadnaughts be constructed, therefore, the supply of armor plate would not keep pace with the demand by half. Whether the Government finally decides to erect its own plant or not, it is obvious that unless the other private armor plants are established to supply the Navy there will be a serious crimp put in the plans for a larger Navy. Such a sudden large increase in naval power as is planned by the present bill would overtax the output of all existing plants.

"THE BETHLEHEM CO.'S SPECIOUS MISLEADING PLEA.

"In advertisements spread broadcast throughout the country the Bethlehem Steel Co. makes the following statements:

"'The Manufacturers' Record of Baltimore has urged the adoption of a Government armor plant on the ground that existing plants would be dependent in case of war upon Lake Superior iron ore which is shipped through the Soo Canal.

"'These are the reasons why there is no validity in this contention:

"'1. It takes relatively very little ore to make all the armor plate required by the United States.

"'2. There are ample deposits of ore in central Pennsylvania to take care of all necessities should the Lake Superior supplies be cut off.

"'3. If the Soo Canal is closed, Lake Superior ores can easily be brought by rail from Duluth to Pittsburgh, Philadelphia, or Bethlehem, where armor factories are located.

"'4. If these three cities were in the hands of an enemy in war time, it is safe to say that we could not build battleships on our seacoast, so that armor factories would then be of no avail.'

"Recently Senator TILLMAN wrote the Manufacturers' Record that he was glad that the Bethlehem Co. was spending some of the profits of the past in this liberal advertising campaign. It has, indeed, been the most remarkable advertising campaign that has ever been carried on in this country, so far as we know, but it has been, we believe, the most unwise campaign and at the same time the most badly directed and badly worded advertising campaign which we have ever seen.

"In the statements made it was said:

"'It takes relatively very little ore to make all the armor plate required in the United States.'

"That, of course, no one denies. But since Pennsylvania produced last year only 360,000 tons of ore out of the 25,000,000 tons or thereabouts it consumed, the local production would be wholly unequal to the needs of the iron and steel industry of that State. Less than 2 per cent of Pennsylvania's iron-ore consumption is produced in Pennsylvania.

"This statement also says:

"'There are ample deposits of ore in central Pennsylvania to take care of all necessities should the Lake Superior supplies be cut off.'

"Does this mean that these supplies would be sufficient for 'all necessities' of armor-plate making, or for the iron and steel interests of Pennsylvania generally? The wording is unfortunate, and calculated to be misleading.

"The third statement says:

"'If the Soo Canal is closed, Lake Superior ores can be easily brought by rail from Duluth to Pittsburgh, Philadelphia, or Bethlehem, where the armor factories are located.'

"If the Bethlehem Co. can find a means of suddenly shifting to the railroads of the country the 50,000,000 tons of iron ore that now are handled by water transportation through the Soo Canal, it will have wrought a miracle which all the railroad people of the country have never been able to accomplish. To suggest the thought is in itself all the proof that is needed of the impossibility of doing it. It is too absurd for a moment's consideration. Moreover, how about the possible capture of the whole district by an enemy?

"In the fourth statement it is said:

"'If these three cities were in the hands of an enemy in war time it is safe to say that we could not build battleships on our seacoast, so that armor factories would then be of no avail.'

"In this statement the Bethlehem Co. overlooks the fact that there is a seacoast on the Pacific coast of the United States, and that there are several great shipyards capable of building battleships on that coast, and the fact that if Pittsburgh, Philadelphia, and Bethlehem had been captured this might not necessarily mean the capture of the Pacific coast cities, nor of the Gulf coast cities. Pittsburgh, Philadelphia, and Bethlehem do not comprise the United States, nor does even the State of Pennsylvania."

Mr. BRANDEGEE. Mr. President, the Senator from Nebraska states that he wants the prohibition against the use of any of these vessels in enforcing a right to a claim limited to claims and property interests of individuals and firms and corporations; he does not want the prohibition to exist against any claim or concession that the United States Government may have.

Mr. President, I do not think that that is a valid line of distinction. The claims of the United States Government are simply the claims of the people of the United States in the aggregate, and if the United States Government has a concession for oil fields in Mexico for the purpose of supplying its vessels with oil fuel and the claim is put in jeopardy or the franchise is about to be confiscated in violation of law I do not see why the vessels of the United States should be allowed to protect that claim of our Government, but should not be allowed to protect exactly similar claims of some smaller number of our citizens who have invested their money. In other words, I do not see why the property of all the people of the United States should be protected by the Government of the United States but the properties of all the parts of the people should be neglected and prohibited by law from being protected by the United States vessels which the people are taxed to maintain.

Mr. President, I may be old-fashioned and out of date but I have flattered myself, and I confess I have taken some pride in the supposition, that the Government to-day as a whole stands, and even in its weakness and infancy stood, ready to protect the rights of American citizens in their persons and property wherever they might be in the world. If there is now some new philosophy which has grown up by which that belief of mine is no longer tenable, if the Government is to legislate that the nations of the world may freely, and in safety, repudiate their obligations to our citizens, and may then hold up to the United States of America, which is trying to enforce and protect the property rights of its citizens, a statute of the United States prohibiting the use of the vessels of the United States from enforcing our legal rights, I am very sorry.

Mr. NORRIS. Mr. President——

Mr. BRANDEGEE. Just a moment—until after the individual citizen has been compelled to go into a foreign court and conduct a lawsuit; and then to come to his Government and say, "I have been denied justice in that land," and then that Government, which has denied him the justice, must also refuse to submit the question to arbitration. That amounts to a practical repudiation of the doctrine that the rights of an American citizen must be respected everywhere in the world. Now, I yield to the Senator from Nebraska.

Mr. NORRIS. Would the Senator from Connecticut say that an American citizen, let us say, in England, who claimed some right there and who was denied that right by somebody in England, ought not, in the first instance, be compelled to go into the courts of England for the protection of his right?

Mr. BRANDEGEE. Mr. President, the Senator from Nebraska is talking about something that does not exist in this amendment. The amendment of the Senator from Wisconsin provides that none of these vessels shall be allowed to protect the right of any American citizen in Mexico or in any South American country, and it carefully avoids any reference to any European power or Asiatic or other power.

Mr. NORRIS. Mr. President——

Mr. BRANDEGEE. I yield to the Senator.

Mr. NORRIS. The question I asked the Senator from Connecticut was based upon his argument. The Senator was talking about the very thing as to which I asked him the question. As I understood the Senator, he said that to compel an American in a foreign country to go to a court to get his rights and then ask for arbitration was not right, but that we ought in the first instance to enforce his rights with the Army or with the Navy.

Mr. BRANDEGEE. Mr. President, my opposition to this amendment is based upon this existing situation: This amendment selects certain countries in the world, and says that the United States Navy, or such portion of it as is provided in this bill, shall not be used—whatever it may mean, and I think its language is very unfortunately arranged—to compel the collection of any pecuniary claim or to enforce the right to any concession or grant. I really do not know exactly what is meant by enforcing the collection of a pecuniary claim; but, perhaps, the idea is plain enough. However, the fact is that there is now an existing situation in Mexico which we all regret. Mr. Carranza may at any time issue an arbitrary edict confiscating every mining, agricultural, and every other kind of concession owned by an American citizen or by an American corporation in Mexico; and if this amendment is adopted the people who own such concessions, who have invested hundreds of millions of dollars in them, who have never done anything but improve the country where their investment is made, and who are trying to operate their properties peacefully—under this amendment those American citizens will be compelled to go down and to submit their rights to Mexican courts, which are absolutely controlled by the dictator Carranza. Then the United States Government—which, under the amendment offered by the Senator from Nebraska [Mr. NORRIS] could send down a squadron of its vessels, if it was its claim, to reenforce the diplomatic arm of the Government when our State Department had demanded that that confiscation should cease and that the rights of the American Government should be respected—could not send one of its ships to Vera Cruz or to any other port merely to make a demonstration to convince that dictator that the American Government meant what it said through its State Department and that he must stop his confiscation, but that American citizens must be relegated to the Mexican courts.

We all know how much judicial authority there is now in Mexico; I do not mean that the situation in the other South American Republics is similar to that in Mexico, but I do mean that this amendment, if adopted, would put us as to them upon the same basis on which it puts us as to Mexico.

Mr. President, we all know the difficulty that American business men have in collecting the debts due to them from many of the South American Republics. I myself have had some experience in attempting to get the just dues of my constituents, which were finally paid after arbitration; but for 20 years you could not get a response out of the South American Republic to which I allude. There was nothing but shifting and evasion and mañana until an imperative demand was made upon them by the President, through the Secretary of State, and an ultimatum was issued, and finally very reluctantly, after 20 years, they were compelled to submit that matter to arbitration when an award was given.

Mr. President, this amendment will accomplish no good purpose. We have already incorporated in this bill a provision which was offered by the Senator from Iowa [Mr. CUMMINS] yesterday afternoon stating that it was not the policy of this Government to enter upon an imperialistic career, and that we wanted to settle disputes honorably by arbitration, so far as possible. No intelligent person believes that the United States is going to run amuck among the nations of the world or that we are going to attempt to enforce any unjust policy. The fact is that the views of this Nation upon such questions are so far in advance of the views of other nations that it is almost unsafe for us, unless we are prepared to sacrifice our own interests, to put our humanitarian views into exercise.

I think very likely to-day it is the policy of the State Department not to go to war to collect a private claim; but this amendment would prevent us sending a squadron of battleships to accompany a representation of our State Department to any South American Republic. Worse than that, it would also be considered by debtors in South American Republics as a notice by the United States Government that they may freely repudiate their obligations to American citizens, and that no demonstration, no evolution of a naval vessel, can be allowed under this statute. That is the effect which this amendment will have. What other nation of the world has seen fit to attach to its military bills proclamations of this kind? Why should we encourage the men who are our debtors in South American Republics to repu-

diate their obligations? This amendment will have no salutary effect whatever.

Now, I desire to read the amendment—I do not know whether it is the right amendment, but I read it from the RECORD—offered by the Senator from Wisconsin [Mr. LA FOLLETTE] yesterday afternoon:

Provided, That no battleship, battle cruiser, scout cruiser, torpedo-boat destroyer, or submarine herein appropriated for, shall be employed in any manner to coerce or compel the collection of any pecuniary claim of any kind, class, or nature, or to enforce any claim of right to any grant or concession for or on behalf of any private citizen, copartnership, or corporation of the United States against the Government of Mexico or of any Central or South American Government.

I do not know exactly what "to coerce or compel the collection of any pecuniary claim" means, or what is meant by the expression "to enforce any claim of right to any grant." I do not know how a vessel could be used to enforce a claim of right.

Mr. CLAPP. Mr. President, if the Senator will permit me, my recollection is that the reference to specific countries was stricken out by an amendment to the amendment, and that in the amendment as now pending the reference to specific countries has been eliminated.

Mr. BRANDEGEE. I assume, of course, that the Senator is correct, but I did not know that those words had been stricken out yesterday afternoon.

The VICE PRESIDENT. Those words were stricken out.

Mr. BRANDEGEE. So that now it is a prohibition against the use of the vessels of the Navy authorized by the pending bill in such matters as to any country; it applies to all nations.

The VICE PRESIDENT. The Chair will state, for the information of the Senator from Connecticut, that——

Mr. CLAPP. I simply made the suggestion because it occurred to me that the Senator from Connecticut had not been advised of the amendment to the amendment.

Mr. BRANDEGEE. I had not been advised of that, and I was reading from page 11313 of the RECORD, where the Senator from Wisconsin offered the amendment.

The VICE PRESIDENT. The Chair will state, for the information of the Senator from Connecticut, that by an amendment on yesterday, beginning with the word "against," these words were stricken out: "against the Government of Mexico or of any Central or South American Government."

Mr. BRANDEGEE. But it still applies, of course, to South America and Mexico?

The VICE PRESIDENT. It applies everywhere.

Mr. BRANDEGEE. And what I have said applies equally well—only it applies to all the world besides.

Mr. President, under that amendment it will be impossible for the United States to protect any of its citizens or corporations in their rights in Turkey, for instance, in time of peace. The Sultan of Turkey could do as he pleased about American property, and so forth, unless an American citizen should go to Turkey and begin a lawsuit, and then Turkey could refuse to arbitrate the matter.

Mr. LEWIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Connecticut yield to the Senator from Illinois?

Mr. BRANDEGEE. I yield to the Senator from Illinois.

Mr. LEWIS. Might I be pardoned if I interrupt the Senator with respect to the parliamentary status of this amendment? I had understood—and I am sure the Chair must be right, and has the RECORD before him—that the Senator from Nebraska [Mr. NORRIS] tendered an amendment to the amendment of the Senator from Wisconsin [Mr. LA FOLLETTE], merely comprehending all of South America and Central America, in addition to the country named in the amendment of the Senator from Wisconsin. Might I ask in what amendment was Europe and every other part of the world included, Mr. President?

Mr. BRANDEGEE. I will answer the Senator, Mr. President, by saying that he has entirely reversed the proposition. The amendment of the Senator from Wisconsin, as offered, was limited in its operation to Mexico, Central America, and South America. The amendment of the Senator from Nebraska has stricken out the words limiting it to those countries, so that it now applies to all the world.

Mr. LEWIS. Such is the status of the amendment now that it has no limitation, but applies to the world generally?

Mr. BRANDEGEE. It does. Without mentioning any country, it simply provides that these vessels shall not be used to collect any claim or enforce any property right.

Mr. LEWIS. Which is equivalent to prohibiting America from using its vessels anywhere under the circumstances set forth in the amendment?

Mr. BRANDEGEE. Yes; for the collection of any claim or enforcement of any right concerning any franchise or concession held by any American citizen or corporation abroad anywhere. I see no call for such an amendment, Mr. President. I can see no reason why, if it is to be adopted at all, it should not apply to the whole world, for I think we ought not to withhold any demonstration against certain nations by our naval vessels by law, leaving it open to make such demonstrations against other nations. I can use no reason why we should to this bill add this kind of an amendment, which is sure to be thrown in our faces in the first diplomatic controversy that may arise concerning any property right; and I hope that the amendment will not prevail.

Mr. WORKS. Mr. President, as a matter of principle the amendment of the Senator from Wisconsin appeals to me very strongly. My mind revolts at the idea of attempting to collect a debt, either public or private, by force or by putting in fear.

On the other hand, it is the duty of the Government to protect its citizens in their rights, and one of those rights may be the collection of a debt from another Government or the citizen of another Government, where the citizen has no remedy whatever unless his rights are enforced by his own Government. While I should be sorry to see the Government of the United States using the ships of its Navy to collect the debts of its citizens, I think circumstances may arise—in fact, I think they have arisen on occasions—when it will be absolutely necessary for this Government to take that course, in order to protect the rights of its own citizens.

I should not like to see that right on the part of the Government, or the duty that is imposed upon it, taken away; and for that reason, Mr. President, I shall feel myself compelled to vote against this amendment, however much I may agree with the sentiment that is contained in its provisions. I think it would be an unfortunate thing for the Government to allow it to go out to the world that the debts of its citizens in foreign countries may be absolutely repudiated and that the Government will take no such step as will be efficient in order to enforce the collection of such debts.

Mr. KENYON. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Gallinger	Lewis	Sherman
Beckham	Harding	Lippitt	Shields
Brandegee	Hardwick	McCumber	Simmons
Broussard	Hughes	Martin	Smith, Ariz.
Bryan	Husting	Norris	Stone
Catron	James	Oliver	Sutherland
Chamberlain	Johnson, Me.	Overman	Swanson
Chilton	Johnson, S. Dak.	Page	Taggart
Clapp	Jones	Penrose	Thomas
Clarke, Ark.	Kenyon	Pittman	Tillman
Culberson	Kern	Poindexter	Townsend
Cummins	La Follette	Pomerene	Underwood
Dillingham	Lane	Ransdell	Vardaman
Fletcher	Lee, Md.	Sheppard	Walsh

Mr. SHEPPARD. I desire to state that the Senator from Georgia [Mr. SMITH], the Senator from South Carolina [Mr. SMITH], the Senator from Wyoming [Mr. WARREN], and the Senator from North Dakota [Mr. GRONNA] are absent on official business, being conferees on the Agricultural appropriation bill.

The VICE PRESIDENT. Fifty-six Senators have answered to the roll call. There is a quorum present. The question is on the amendment of the Senator from Nebraska [Mr. NORRIS] to the amendment of the Senator from Wisconsin [Mr. LA FOLLETTE].

Mr. LA FOLLETTE. Mr. President, the Chair advises me that the pending question is upon the amendment of the Senator from Nebraska. I understood that the amendment of the Senator from Nebraska to the amendment which I offered on yesterday had been accepted by the Senate.

Mr. NORRIS. The amendment that I offered yesterday was accepted.

Mr. LA FOLLETTE. If I am in error about it, I should like to be advised.

Mr. NORRIS. But I have made another motion, to add, after the word "nature," in the Senator's amendment, where it says, "any kind, class, or nature," the words "of any individual, firm, or corporation," so as to limit the claim in that way. If the Senator has the amendment before him, it makes the same limitation in regard to the first part of the amendment which the Senator already has as to the latter part.

Mr. LA FOLLETTE. I have it in my mind; and, if I may be permitted to do so, I will accept the amendment of the Senator from Nebraska as perfecting my amendment.

The VICE PRESIDENT. The Senator has permission to accept it. The question now is on the amendment of the Senator from Wisconsin as modified.

Mr. LA FOLLETTE. Mr. President——

Mr. LEWIS. Before the Senator proceeds, we could not hear the modification over here, and would like to know what it is. What modification is it?

The VICE PRESIDENT. The Secretary will please read the amendment as modified.

The SECRETARY. On page 172, after the word "paid," in line 13, it is proposed to insert:

Provided, That no battleship, battle cruiser, scout cruiser, torpedo-boat destroyer, or submarine herein appropriated for shall be employed in any manner to coerce or compel the collection of any pecuniary claim of any kind, class, or nature of any individual, firm, or corporation, or to enforce any claim of right to any grant or concession for or on behalf of any private citizen, copartnership, or corporation of the United States.

Mr. LA FOLLETTE resumed the speech begun by him on yesterday. The entire speech is as follows:

Wednesday, July 19, 1916.

Mr. LA FOLLETTE. Mr. President, we are about to pass in the Congress of the United States a military program that will impose upon the people of this Nation the greatest tax burden for an alleged preparedness against an alleged danger that has ever been known in any country at peace with all the world.

Sir, one year ago Congress appropriated for all military purposes—that is to say, for the Army, the Navy, the coast defenses (fortifications), the Military Academy, the Naval Academy, and pensions—the total sum of $429,234,515.

And now, within the short space of 12 months, for precisely the same military purposes, it is proposed that we shall appropriate $844,319,152.

Mr. President, there is not a man in the United States Senate who would have had the hardihood one year ago to propose such an increase or to suggest an appropriation of such magnitude for military purposes. And there is not a Senator on this floor who would have dared to vote for such an appropriation—not one.

And yet one year ago the European war was at high tide. Then, as now, we contemplated with horror the spectacle of one-half the people of the world at the throats of their fellow men; and everything that could strike terror to the hearts of human beings was taking place on the battle fields across the Atlantic. Everything that could appeal to the Congress of the United States to make an extravagant and unprecedented expenditure of the people's money for military purposes existed 12 months ago just as much as it exists now. But at that time $429,000,000 was appropriated. It is proposed practically to double that appropriation now. What has occurred to change the perspective?

I will tell you, Mr. President, what has occurred since. The stage has been set, the scenery has been put in place, the music has been attuned, the curtain has been run up, everything that could possibly play upon the emotions of the American people has been set to work and paid for in order that this result might be produced: Picture shows; works of fiction, running serially in the magazines; advertisements; editorials, alleging that our country is in danger from a foreign foe; the columns of the newspapers given over to a spurious propaganda, and all with the definite object of terrorizing the public and forcing the enactment of legislation for the great military and naval program now before the Congress.

I see about me many Senators who represent the States where there are great munition plants. The larger the appropriations for military purposes the better satisfied are these Senators. But how about the taxpayers who make no profits out of the manufacture of munitions of war? Eight hundred and forty-four million dollars is the measure of the load which goes upon the bended backs of the American people this year, and why? If it is necessary now, why was it not necessary one year ago? You had all the military power of Germany, all the military power of England, of France, of Russia, of Italy, of Austria-Hungary full in your eye at that time. You knew their battleships; you knew their naval strength. Why did you not then propose this great increase in appropriations for the Army and Navy?

Why, because the national imagination had not then been fired; had not then been worked up to the pitch of patriotic fervor that would countenance committing the country to this extraordinary and unjustifiable expenditure. The efforts of the vendors of the instruments of death to enhance their profits, to make new and continuing markets for their products, had not then borne fruit. Their campaign for the past year has been prosecuted with all the power organized wealth can command. What is the result? Congress is in a panic. Their program is accepted. One year ago it would have been pitched out of the window as a piece of impudent graft.

REASON FOR PREPAREDNESS PROGRAM.

Mr. President, the interests that are behind this preparedness program in the United States do not fear Germany, do not fear England, do not fear any nation on this earth; but they do want a large Army, they do want a large Navy. It fits into the commercial, industrial, and imperialistic schemes of the great financial masters of this country.

Senators may think it expedient to vote for this increased appropriation at this time. The people may be under a certain vague fear and in doubt now, but when they see that their fears have been played upon, when the tax burden comes, when the weight begins to press down, when you double on every member of the family the cost of sustaining this military program, then you will be called to account, then you will have to answer their stern, deliberate, second judgment.

The danger of an attack upon our country has been made to appear very real and very imminent. It has been painted in lurid colors—moving pictures showing New York's splendid edifices toppling to destruction, under the shots of enemy guns, the enemy garbed to convey the idea that they are Germans; volumes written to show New York and New Orleans and San Francisco already captured; that the foreign hordes are sweeping across the country—have these volumes been sent to you, Senators? I have received them. Who do you suppose pays for all this? Why, the Du Pont Powder Co. had a hand in it; the Bethlehem Steel Co. doubtless made its contribution of millions of money. It was paid for out of the bloody profits made from shipping arms and ammunition abroad within the last year.

True, the American people may be influenced by the advertisements of the Bethlehem Steel Co., may be swayed by the headlines and editorials of the great metropolitan press. They may be deeply moved, the blood may tingle and the pulse quicken to the strains of hundreds of bands playing as hundreds of thousands of men and women march in parade; but when it is known that many American citizens felt impelled to march in fear of a penalty—the loss of wages or of being discharged—it alters folks' attitude as to the impressiveness of such demonstrations.

I came to the Senate one morning, prompted to introduce a resolution of investigation regarding the preparedness parade here in Washington, because I was in receipt of complaints from many of the Government employees, who were made to feel that they were being coerced to march. The Senator from Oregon [Mr. LANE] told me only a few days afterwards that when riding up on the street car in the morning he heard two plainly dressed men discussing the fact that against their will they had been compelled to march in the parade. Many other instances have doubtless come to the attention of other Senators. The same situation prevailed elsewhere. I have been informed that in Chicago and other cities workmen were coerced to march in the parades by their employers. While the masses of marchers and the spectators were doubtless sincere in expressions of enthusiasm, nevertheless these parades are a part of the deliberate scheme to move the American people to sustain these enormous appropriations for an increased Army and an increased Navy.

What do we want of an increased Navy and an increased Army such as this great military program provides? What changed conditions warrant doubling the appropriations of a year ago?

Mr. President, there is absolutely nothing in the situation, nothing in the conditions that can be made to justify placing this extortionate tax burden upon the people of the United States. There is not one substantial reason why this Congress should double the appropriation for military purposes at this time.

OUR COAST DEFENSES.

It is claimed that we are preparing for defense, not for aggression. Logically, we should inquire first of all as to our coast defenses, should we not? What about our coast defenses?

The highest authority on this subject is Gen. Erasmus Weaver. He is a member of the General Staff, a member of the Board of Ordnance and Fortifications, and a member of the Joint Army and Navy Board. In his testimony given a few months ago before the House Committee on Military Affairs he said:

We have the best coast defenses in the world. The guns now mounted and those contemplated will give us an entirely satisfactory defense.

Again Gen. Weaver, testifying before the same committee, recommended that 11,000 men, including officers, should be added to the Coast Artillery. Representative MCKELLAR, a member of the House Committee on Military Affairs, questioned him further:

Mr. MCKELLAR. If we conclude to carry out your recommendations and give you the 11,000 men, then, as I understand you, you would have a perfect system of coast defense that you think would be adequate for any purpose?

Gen. WEAVER. Yes.

Mr. MCKELLAR. Your idea is that your guns are sufficient now?

Gen. WEAVER. The guns now mounted and those contemplated will give us an entirely satisfactory defense.

Mr. MCKELLAR. You do not take any stock in this idea that the ships of foreign nations carrying guns of longer range can silence your guns?

Gen. WEAVER. No.

Gen. Weaver's statement has been given little, if any, publicity in the press of the country; and yet he is the highest authority, and his integrity and ability entitle him to supreme confidence. If some subordinate officer of the Army or Navy urges an unlimited increase, his testimony is blazoned on the front pages of the great dailies of the country, which, responding to the advertising power back of immense preparedness, also surrender their editorial good will to their advertising space. A business man who may know nothing of military equipment, if he boosts for big preparedness appropriations, gets the front page. But Gen. Weaver's testimony, of such profound interest to the people of the country, would have been buried in oblivion of the Government report, except as it has been cited by two or three Congressmen in the debates and printed by the few surviving public-spirited newspapers and magazines.

I call another high authority as to our coast defenses. Gen. Nelson A. Miles, late head of the Army, testified before the Committee on Military Affairs of the House of Representatives that—

During the last 30 years the Government has spent approximately $200,000,000 for our coast defense.

Think of it! We have already expended $200,000,000 upon our coast defenses. We are this year adding $40,000,000 more to that amount.

I do not speak in disparagement of expenditures of this class. I give them my cordial support. Coast fortifications, coast artillery, and a sufficient mobile force of soldiers for coast and border defense I will as strongly support as any other Senator here. They are for defense. They can not be used for overseas conquest; they can not be used to coerce weaker nations in the interest of speculative investors in foreign countries. They offer little or no inducement for powerful war traders to lobby Congress for extravagant appropriations. They constitute one class of expenditures for preparedness which makes for peace instead of war.

OUR GUNS SUPERIOR TO THOSE AT THE DARDANELLES.

You Democrats can save your party a bad score in your record if you will go back to the position that the President took one year ago, when, with the assembled Congress before him, he said that he would not consent that our country should be made a military camp.

Gen. Miles retired—but retired with an experience that strengthens and seasons the judgment testified on this subject. He had seen war, the real thing, covering a period of nearly 50 years of the history of the United States. Listen to what he says:

I am prepared to say that our coasts are as well defended as the coasts of any country and with the same class of high-power guns and heavy projectiles. They are better in some respects than the guns that are mounted at the Dardanelles, which have resisted the most powerful ships of war of the British and French Navies.

The results at Alexandria, Port Arthur, and at the Dardanelles furnish sufficient evidence that guns on board ships are no match for coast fortifications and submarine guns.

I cite the testimony of another authority of the highest rank as to our coast defenses being able to withstand the attack of any navy in the world. Admiral Frank F. Fletcher, chief of the Atlantic Fleet, the ranking officer of our Navy, says:

It has been recently forcibly demonstrated that ship attacks on forts are futile. This war has conclusively demonstrated what every military strategist knew before, that it is impossible for sea craft to successfully attack land fortifications.

Against the opinions of the doughty warriors of the Senate, great though their military wisdom may be, I put the judgment of Gen. Weaver, who says that "we have the best coast defenses of the world"; the judgment of Gen. Miles, who says that "our coasts are as well defended as the coasts of any country, with the same high-power guns and heavy projectiles, better in some respects than the guns mounted at the Dardanelles, which have resisted the most powerful ships of war of the British and French Navies"; and the judgment of Admiral Fletcher, who says that "this war has conclusively demonstrated that it is impossible for sea craft to successfully attack land fortifications."

Ah! But the military geniuses of the Senate suggest that the enemy may land an army at some point on our open and unfortified coasts.

THE TWO OCEANS—NATURE'S DEFENSES.

But hold fast to your fears, Senators, and be of good cheer. There is still hope for our country. Gen. Miles offers some relief from utter despair. I quote from his testimony as to the ability of a foreign enemy to "land an army upon our open and unfortified coasts." He says:

I will suppose an unsupposable case. Suppose they could put an army on a fleet of 500 ships and move it across the Atlantic without being disturbed by any naval power, and they could land. They certainly could not go into any port. They could not go into our ports any more than they could go through the Dardanelles. That has been demonstrated. Our forts are equipped and fortified as well as the Dardanelles. Suppose they got that far—as to landing at some remote point—if we could not gather enough men in the Army and militia and by other means to destroy that army before they could send their ships back and get another load, I would want to move to some other country.

Mr. President, I am curious to know how many Senators have studied the testimony of experts on the question of attacking an enemy country three or four thousand miles distant. We have been warned and badgered and frightened that invasion from some unknown source might happen to us in this country, and I think perhaps it has temporarily produced in the public mind a state of apprehension and dread.

Telfer-Smolett, of the English Army, is recognized as an authority on over-seas military expeditions. He made a special study of this subject, and was accorded a gold medal on his thesis. I wonder if Senators have any conception of what a job it is. It would take, according to this English military authority, 270 troop-transport vessels to move an army of from 72,000 to 96,000 men—that is, two corps—including two divisions of cavalry, across the sea to make an attack. Now, just think of it a moment! These 270 transports and other necessary ships would constitute the greatest collection of vessels in one body that has been seen together in the history of the naval operations of the world. If Germany wanted to send an army of a hundred thousand men—and Germany is the scare country for the munition makers and preparedness propagandists—if she wanted to send over to this country a hundred thousand men from her shores, a distance of 4,000 miles, she would necessarily have to have 270 transports, and then she would have to add to that fleet the necessary vessels for heavy artillery and all of the military equipment that would go with an army of a hundred thousand men. She would have a fleet moving across the Atlantic, when distributed so that they could sail without peril to each other, of some 5 or 6 miles in extent for the front line and from 10 to 12 miles in depth. These unarmed vessels, carrying an army of only 100,000 across from the other side to assail us, would have to be literally surrounded by a navy, and then there would be every possible peril of their destruction by mines and submarines—leaving the master ships and other sea craft of our Navy wholly out of consideration.

Never in the history of the world, according to my reading, has an army been moved over-seas and landed in any enemy country under hostile guns. The only time when it was ever undertaken was when the English attempted to land their army at the Dardanelles—as a military undertaking the most melancholy failure of the whole war.

Rear Admiral Knight, member of the General Board and president of the Naval War College, gave some testimony before the House Committee on Naval Affairs, which is very important on this point. True, he was not testifying as to the difficulties of a European power or of Japan attempting an over-seas expedition to land an army upon our coast. He was testifying as to sending an army, convoyed by our Navy, over to defend the Philippines. But while the distance would be greater for such an expedition to the Philippines than for an over-seas expedition from Europe or Japan against our country, nevertheless the admiral's reasoning as to the difficulties attending an over-seas expedition applied to an attack on us by a foreign power is distinctly in point.

IMPOSSIBLE TO MOVE GREAT ARMY OVER-SEAS.

He said that it was practically an impossibility to convey an army across 7,000 miles of water to prosecute a campaign. I do not want to misquote him. Let me get his exact language.

Admiral Knight, being questioned on this subject by Representative CALLAWAY, a member of the Committee on Naval Affairs of the House, answered:

It would take me a very long time to go into that subject at all satisfactorily, Mr. CALLAWAY, and show you the difficulties under which a fleet 7,000 miles from its home ports would labor. Ships break down. Out of a large number of ships a certain number are bound to be crippled in one way or another. The supplies needed to maintain the fleet would be very extensive. Five or six hundred thousand tons of coal would be needed as a minimum for a very short campaign there. That coal must be delivered and transferred from colliers to ships. It can not be done at sea, except under the most favorable possible conditions. It must be done in sheltered waters. The bottoms of the ships would gradually get foul. They ought to have docks where the bottoms can be cleaned. They are subject in their progress over that 7,000 miles, throughout a large part of the time, to the possibilities of attack from the enemy's torpedo craft and other craft of that kind. Their lines of communication, after they get to the point 7,000 miles away, are constantly liable to interruption and would inevitably be interrupted; and yet they depend on those long lines, stretching away back

to the home ports, for the very vital things necessary to their life—for coal and supplies and reinforcements, if reinforcements become necessary, and all sorts of things. A fleet going out there would be accompanied, necessarily, by a tremendous attendant fleet, a train, as we call it, of auxiliary ammunition ships, hospital ships, and so forth.

The problem of conducting such a train as that in going thousands of miles through hostile waters is probably the most serious problem that could possibly be put up to a commander in chief.

The personnel, the officers and men, of a fleet moving under those conditions would be subject to conditions which are so trying that it is very difficult to picture them without some little experience. Constantly on the watch, constantly threatened, constantly on the alert to guard against some danger which may come out of the darkness or out of the fog at any moment upon them, after moving that distance they would be broken down, they would be tired, they would need rest. They would have no secure place to rest. Your fleet would get out there with its material in very bad condition, its personnel in perhaps worse condition, and when it got there it would have no place to go for refitting or for any purpose whatever. It would be not unlike the proposition which confronted Admiral Rojestvensky when he went out to the east and met the Japanese fleet, and you know what happened to him. He had a larger fleet than the enemy had, distinctly.

I would not like to be considered as attempting anything like a complete answer to your question, nor could I give such an answer without talking here all day.

He has presented only a few of the many reasons why an enemy can not transport a large army thousands of miles over-sea to attack another country; and when it is proposed to put upon the American people the expense of maintaining a great navy, under the pretense that it is to protect our coast from invasion, the evidence is against the proposition. There is no rational reason for it. No evidence, from history or from military authority can be called to support it.

AN INSUPERABLE UNDERTAKING.

Now listen to a further questioning of the admiral by the Representative:

Mr. CALLAWAY. I want to get a concise statement. You consider the enormous dangers of transporting a fleet across a great expanse of hostile water——

Admiral KNIGHT. And maintaining it.

Mr. CALLAWAY. And maintaining it.

Admiral KNIGHT. Yes; I think those dangers are almost insuperable.

Mr. CALLAWAY. Almost insuperable?

Admiral KNIGHT. Yes.

Mr. CALLAWAY. And the maintaining of it is necessary to the conduct of war?

Admiral KNIGHT. Yes.

Mr. CALLAWAY. And you say those difficulties are almost insuperable?

Admiral KNIGHT. The difficulties are almost insuperable.

There you have it.

Our coast defenses are the best in the world; our guns many of them superior to those at the Dardanelles, and those at the Dardanelles defied the combined power of Great Britain and France, and made that first attempt in the history of the world to land an over-sea military force under hostile guns a disastrous and humiliating failure to Great Britain, costing a tremendous, needless loss of life, and the expenditure of vast sums of money and shaking confidence of the world in all naval calculations.

But, Mr. President, more than this, the transportation of an army of only 100,000 men, with horses, field guns mammoth siege guns, equipment, and ammunition, including a base of supply thousands of miles over-seas to be landed in this country, is a monster undertaking without a precedent or a parallel. According to all military authorities which I have been able to consult, it is agreed that such an expedition must be kept together; that it must be subject to the delays incident to the development of latent difficulties in the motive power of each vessel, to storms at sea, to attacks in transit, and that the convoy of one such expedition alone, to say nothing of the return trips necessary to reinforce such an army, is involved in such an infinite number of hazards as to render the undertaking practically insuperable.

COUNTRY IS VICTIM OF A CONSPIRACY.

Gen. Miles says "it is an unsupposable thing." Admiral Knight says "the dangers of transporting a fleet across a great expanse of water and maintaining it are almost insuperable." I say, then, that plain common sense and military authority confirm the stubborn fact, which history teaches and our experience fortifies, namely, that the two oceans are a great natural barrier against an over-seas expedition to land an army of invasion upon our coasts.

And when it is remembered that our coast defenses, protecting all our great harbors, inlets, and cities, are impregnable, that submarines can patrol all our coasts, that mines can be laid wherever needed, that transportable field guns of the greatest range and power can be expeditiously transported to any part of our open coasts—leaving out of consideration our Navy as a weapon of defense, on which we have expended $1,655,928,647 in the last 15 years, which is more than any other nation in the world except England has appropriated for like purposes—remembering all this, it seems to me that a just consideration for the taxpayers of the country ought to halt us in this mad race to become the greatest military Government in the world.

Mr. President, I think I would fight—I never have been accused up to the present time in any kind of a contest of letting the other fellow see my back—and I am as ready as any man to go into the ranks to fight, when there is something to fight for; but I object, Mr. President, to a game, a plan, a conspiracy, to force upon this country a big army and a big navy, to use the treasure of the country, and if need be the lives of its people, to make good the foreign speculation of a few unscrupulous masters of finance.

OUR NAVY.

The proof is overwhelming that our coast defenses are sufficient to withstand any over-seas attack. The proof is overwhelming that a three or four thousand mile over-seas military expedition against us is practically an insuperable undertaking. The proof is likewise overwhelming that with modern submarines and modern anchored marine mines and portable long-range guns, we have in fact no such thing as an open and undefended coast line. Let us see about the strength of our Navy.

The supreme thing in the Navy, we are told, is the battleship. That is the reason why we have 10 of them loaded onto us here in this bill that were not in the bill as it passed the House. The battleship is the standard of the strength and power of the Navy. We are told—a little bit vaguely, I venture to say (maybe another naval engagement will revise that telling)—but we are told now, by the exponents of a big navy and a big army and an unlimited expenditure of the people's money to pay for it, that the recent naval battle at Jutland demonstrated that the battleship is to be taken as the test of naval strength. Now, accepting that, let us see where our Navy stands, and what it is our duty to do.

Mr. President, at the present time we have in our Navy 42 battleships, and Admiral Blue says:

We have more auxiliary craft than any other nation maintains in time of peace.

Eighteen months ago—now, that is not very long in navy building—Admiral Frank F. Fletcher, commander in chief of the Atlantic Fleet, was examined before the House Committee on Naval Affairs of this Congress. Mr. President, that committee made a very thorough investigation. Three massive volumes of testimony were taken to ascertain the conditions upon which to predicate legislation.

ADMIRAL FLETCHER MAKES IMPORTANT ADMISSIONS.

Mr. BUTLER is a member of the Naval Affairs Committee of the House of Representatives. Remember that he had the head of the Atlantic Fleet of the United States on the witness stand:

Mr. BUTLER. We have been put down as second, third, or fourth in the number of ships. Is not that true?

Admiral FLETCHER. That is about our relative position—second or third.

He did not put us down to fourth place. He got as close to it as he could. He strained a bit to put us down to third place, as will appear afterwards.

Mr. BUTLER. Where do we stand, Admiral?

Admiral FLETCHER. I have not personally gone into that, but I have estimates that place us about third at the present time.

That is better than fourth. Now, I want you to watch the testimony of the admiral for a little while.

Mr. BUTLER. Are we strong enough to offer a decided resistance at this time against any nation?

Admiral FLETCHER. Not against all nations.

What do these men of the Navy want? It is their business. They are prejudiced witnesses and their testimony in this important event is to be considered in that light. They want a big Navy. Aside from the selfish considerations of promotion and all that, it is their training; it is their life. We would be the same in their position, I have no doubt, but I beg of you to take that into account in considering their evidence.

Mr. BUTLER had asked:

Are we strong enough to offer a decided resistance at this time against any nation?

The admiral replied:

Not against all nations.

Is not that a curious answer? Mr. BUTLER followed it up:

Mr. BUTLER. I do not mean in a combination.

Admiral FLETCHER. Not against the most powerful nation.

Mark his answer: "NOT AGAINST THE MOST POWERFUL NATION."

Did any of you see this statement of the admiral that we need fear but one nation, played up in the newspapers? For over two years Germany has been held up as a threat to this country. Admiral Fletcher admits here plainly, and he says

more plainly further on, that there is but one navy in the world superior to ours—the navy of England.

You have been terrorized about Germany's navy. Have you forgotten that the German Navy is but little more than one-half the size of the British Navy; that it was held in limbo under the guns of Helgoland during 18 months or more of this war? It took the greater part of the British Navy to tie it up. Is there not a lesson in that for us? Germany, with a navy only a little more than half as big as that of Great Britain, by adding to it the modern accessories of defense, prevented Great Britain from landing on German soil.

Thursday, July 20, 1916.

Mr. LA FOLLETTE. Mr. President, yesterday I had just begun to present the facts with respect to our Navy by quoting from the testimony taken by the committees of Congress. Now, Mr. President, I want to offer a little more evidence, expert in its character, as bearing upon the strength of our Navy as compared with the leading navies of the world.

Congressman Witherspoon, lately deceased, a former member of the committee of the House, possessed, I believe, more accurate and technical information with regard to our Navy and the navies of the world than any man in public life. I find his questioning of expert witnesses of special value and importance in getting at the truth. I read from his examination of Admiral Fletcher. This was a little more than 18 months ago. At that time we had 40 battleships in our Navy. We now have 42.

Mr. Witherspoon took up, one after another, the navies of the world and subjected Admiral Fletcher to a cross-examination as to our comparative strength when tested as against the navy of each one of these nations; and I want to go over that. First he takes England, and he says:

ENGLAND.

Mr. WITHERSPOON. Admiral, I understand you to state, in answer to Mr. BUTLER'S questions, that we are not able to defend ourselves against the most powerful nation. Did I understand you correctly?

Admiral FLETCHER. Yes.

Mr. WITHERSPOON. How many battleships has England got?

Admiral FLETCHER. According to this table here [indicating] England has 20 dreadnaughts built.

Mr. WITHERSPOON. The total number? How many has she in all?

Admiral FLETCHER. This table puts it at 60.

Mr. WITHERSPOON. I did not ask about that statement. I have seen that old statement before. I do not care anything about that statement. The Navy Yearbook puts the number of English battleships—completed, building, and authorized—at 72. Now, your idea is that if those 72 ships were pitted against ours, we could not be able to resist them; is that it?

Admiral FLETCHER. We could resist them; but we would probably be defeated.

Mr. WITHERSPOON. That is what I mean; we could not resist them successfully.

Admiral FLETCHER. No; all else being equal.

Mr. WITHERSPOON. It has been told this committee by high authorities in the Navy Department—among others, Admiral Vreeland—that if we had a war with England, on account of its relations with other nations in Europe, it could not afford to send more than 50 per cent of its ships against us. Do you believe that is so?

Admiral FLETCHER. That is a question of policy and of political conditions in Europe, upon which I would not pretend to pass judgment.

Mr. WITHERSPOON. Then your statement that we could not resist England would be on the assumption that she could send her entire fleet, or more than one-half of it, against us?

Admiral FLETCHER. Yes, sir; she would control the sea if she could keep there a more powerful fleet than ours.

Mr. WITHERSPOON. Or not afraid with war with the rest of the world; not afraid to take all the ships away from her own coast and to send all of them, or a large majority of them, against us? Your statement is based on that?

Admiral FLETCHER. Yes, sir. It is based on actual superiority.

Mr. WITHERSPOON. Well, on the assumption which certain naval experts have told us is correct—that she could not send more than 50 per cent of her 72 against us—you would not say then that we would not be able to resist them successfully, would you?

Mark you, Mr. President, at the time this testimony was given we had 40 battleships and England had 72. The question submitted to the admiral by Judge Witherspoon is:

On the assumption * * * that she could not send more than 50 per cent of her 72 against us, you would not say then that we would not be able to resist them successfully, would you?

Admiral FLETCHER. I would not like to pass judgment upon a suppositious case of that kind.

Mr. WITHERSPOON. What I am asking you about—without going into it more carefully—is this: You do not mean to say that we could not successfully resist them?

Admiral FLETCHER. Could not successfully resist a power like England if she utilized only half of her force against us?

Mr. WITHERSPOON. Yes, sir.

Admiral FLETCHER. That question I would not like to pass judgment upon.

Senators, that may impress you as being a frank answer. It does not quite seem that way to me.

Let us go a little further with this witness:

Mr. WITHERSPOON. It would be a pretty close question, and you would not want your statement which you made to Mr. BUTLER to apply to that condition?

Admiral FLETCHER. I am unable to say.

GERMANY.

Well, Judge Witherspoon gave him up on England and took up Germany next. I want you just to follow his answers on Germany:

Mr. WITHERSPOON. Now, according to the Navy Yearbook, Germany has battleships, built, building, and authorized, 39. That is, according to the last Navy Yearbook. Would you say that if she could send all those ships against us we would not be able to resist them?

Admiral FLETCHER. I would say that we ought to, if we have the greater force.

Mr. WITHERSPOON. Yes; we ought—certainly we ought, and we could.

Admiral FLETCHER. Yes, sir. The greater force should win.

Mr. WITHERSPOON. Yes; we could.

Admiral FLETCHER. I think so.

Mr. WITHERSPOON. Now, it has been stated to us that if Germany was at war with us she could not afford, either, to send more than one-half of her ships against us.

Admiral FLETCHER. That I do not know.

Mr. WITHERSPOON. I am not asking whether you do or do not. Assuming that she could only send half her 39, would you not say that we could successfully resist that number?

He came up to the scratch that time:

Admiral FLETCHER. Yes, sir; I would say that, if all our force is available to meet her.

Think of it! The Admiral wanted "all our force" of 40 battleships in order to successfully resist one-half of the German battleship force—or 19 German battleships.

FRANCE.

Let us go along with Admiral Fletcher. Now he takes up France.

Mr. WITHERSPOON. Now, take France. This Navy Yearbook says that France has a grand total of battleships, built, building, and authorized, of 29—11 less than we have.

Admiral FLETCHER. Yes.

Mr. WITHERSPOON. Would you not say, if she sent all of hers against us, we would be able to successfully resist them?

Admiral FLETCHER. Yes; our forces available being the greater.

Mr. WITHERSPOON. And if she only sent one-half of them, we would not have much of a fight, would we?

Admiral FLETCHER. No; we ought not to.

Mr. WITHERSPOON. That is the way I look at it.

JAPAN.

Mr. WITHERSPOON. Here is Japan, which according to the Navy Yearbook, has only 19 battleships, or 21 less than we have got. If Japan should send all of her 19 against us, do you not think we would be able successfully to resist them?

Admiral FLETCHER. Yes. I should say so, if our forces were free to meet them at the time.

Mr. TILLMAN. The Panama Canal was closed at that time. That is why he put in that "if."

Mr. LA FOLLETTE. Yes.

Mr. WITHERSPOON. And if she did not send but half of them, there would not be much of a scrap, would there?

Admiral FLETCHER. Probably not.

RUSSIA.

Mr. WITHERSPOON. Now, here is Russia, that the Navy Yearbook says has a grand total of 15 battleships, completed and building. If she should send all of them against us, would you not say that we could successfully resist them?

Admiral FLETCHER. Yes, sir.

And he did not qualify it at all. He just stiffened up, you know, to meet that, and said, without any equivocation or qualification whatever, that we could meet those Russian battleships; and I am gratified that he admitted that much, anyhow.

Mr. WITHERSPOON. And if she sent half of them, there would not be any fight at all, would there?

Admiral FLETCHER. Not much.

ITALY.

Mr. WITHERSPOON. Here is Italy that has a grand total, according to the Navy Yearbook, of 17 battleships. We could successfully resist them whether she sent all of them or a part of them, could we not?

Admiral FLETCHER. Yes; I think so.

Mr. WITHERSPOON. Yes; I do, too.

AUSTRIA-HUNGARY.

Mr. WITHERSPOON. Now, Austria-Hungary, according to the Navy Yearbook, has a grand total of battleships, built and building, of 10. We could successfully resist them, could we not?

Admiral FLETCHER. I think so.

ENGLAND ALONE TO FEAR.

Mr. WITHERSPOON. Then what nation is there that we are not prepared to successfully resist? There is not one on earth, is there, Admiral—not a single one?

Admiral FLETCHER. Well, Judge, I think there is.

Mr. WITHERSPOON. Well, which one? I have gone through the big ones. Tell me which one.

Admiral FLETCHER. I should say England has a navy so much more powerful than that of any other nation in the world that she could easily keep control of the seas.

Mr. WITHERSPOON. England. Well, what other one, then?

Now, note his answer, and let it stand out plainly in this record.

Admiral FLETCHER. I do not think that we need greatly fear any other single nation.

So this German bugaboo goes down before the testimony of the commander in chief of the Atlantic Fleet.

Mr. WITHERSPOON. There is no other nation, except England, that in your judgment we could not successfully defend ourselves against; I mean, except England.

Admiral FLETCHER. I think that is correct. Yes.

We have the truth at last. Let the whole country know it. Without any additions to our Navy whatever, it is to-day superior to that of any nation on earth excepting England.

Mr. THOMAS. Does the Senator believe there are half a dozen newspapers in the United States that would have published that testimony?

Mr. LA FOLLETTE. No; I believe not. I think it has never been published to the people of the country.

Mr. THOMAS. I will state that I saw it in but one periodical, and that was Pearson's Magazine.

Mr. LA FOLLETTE. That is a fearless magazine. Its policy is to keep free from advertising influence. It has done good work on this preparedness issue.

SHIP FOR SHIP WE EQUAL ENGLAND.

Now, Mr. Witherspoon starts in to show that, ship for ship, gun for gun, our Navy is superior to that of England's—not in numbers, but ship for ship.

Mr. WITHERSPOON. Has England got any such powerful ships in her navy as we have, or have you ever studied that?

Admiral FLETCHER. Yes.

Mr. WITHERSPOON. Have you ever taken up the English ships and compared them with American ships, so as to form your own judgment as to whether she had any such ships as we have? Do you think she has?

Admiral FLETCHER. She has many ships which are very nearly of the same power as our own ships of the same time of building.

Mr. WITHERSPOON. Let us see about that, now. I do not believe she has, although you know more about it than I do.

He was pretty liberal with the admiral.

In this Navy Yearbook, which gives us a list of the English battleships, I find that the last five dreadnaughts that England has built or is building are named the *Royal Sovereign, Royal Oak, Ramillies, Revolution,* and *Revenge,* each of which has a tonnage of 26,000.

Admiral FLETCHER. Yes, sir.

Mr. WITHERSPOON. And we have two ships, the *Pennsylvania* and *No. 39*, which have a tonnage of 31,400, and then we have authorized three more which are to have a tonnage, as I understand, of 31,800.

The CHAIRMAN. Thirty-two thousand.

Mr. WITHERSPOON. Thirty-two thousand tons. In other words, the tonnage of the *Pennsylvania* and *No. 39* is 5,400 more than that of the last five English dreadnaughts that are building, and the last three dreadnaughts that we are building have a tonnage of 6,000 tons greater than the last five English ships. Do you mean that those ships are equal to ours?

Admiral FLETCHER. No; I do not say that.

Mr. WITHERSPOON. Do you regard them as inferior to ours?

Admiral FLETCHER. Yes; as near as we can estimate it.

Mr. WITHERSPOON. I do, too; and the armament of those five ships is eight 15-inch guns, while the armaments of the five American ships is twelve 14-inch guns. Which is more powerful armament, eight 15-inch guns or twelve 14-inch guns?

Admiral FLETCHER. I think the twelve 14-inch guns more powerful, but I am not sure that opinion is concurred in by all authorities.

AMERICAN SHIPS SUPERIOR.

Mr. WITHERSPOON. Then, according to your judgment, the last five ships in both navies show a superiority of the American ships to the English ships?

Admiral FLETCHER. Yes.

Mr. WITHERSPOON. Have you compared the English ships, ship by ship, with ours, to form the same kind of judgment as to which is superior as you have just formed in reference to the last five?

Admiral FLETCHER. Not in detail; no.

I think Judge Witherspoon would have been quite warranted in saying to him—he ought to have that information—that as the head of the active Navy of this country he ought to know what the Yearbook could tell him regarding the navies of the world.

Mr. WITHERSPOON. Have you compared the English ships, ship by ship, with ours, to form the same kind of judgment as to which is superior as you have just formed in reference to the last five?

Admiral FLETCHER. Not in detail; no.

I will undertake to say that Judge Witherspoon knew exactly.

Mr. WITHERSPOON. Then you can not give a judgment as to which has got the more powerful, ship for ship, England or America?

Admiral FLETCHER. No; not in detail. In a general way it has been our policy, and the committee has appropriated money to build ships heavier than the ships of foreign countries.

Mr. WITHERSPOON. Then, understanding your testimony, after reviewing it, do you want us to understand that England is the only nation on earth that has a navy that we could not successfully resist?

Admiral FLETCHER. I think that is the fair conclusion. Yes, sir; at the present time.

So at last our first admiral admits that England has the ONLY NAVY ON THIS EARTH WE CAN NOT SUCCESSFULLY RESIST.

I am sure Senators who have been following me thus far will be very glad to know the views of Admiral Badger upon this question of the enlargement of our Navy, and what its rank and standing is.

ADMIRAL BADGER'S TESTIMONY.

On the same day that Admiral Fletcher gave the foregoing testimony Rear Admiral Charles J. Badger, a member of the General Board and lately commander in chief of the Atlantic Fleet, testifying before the House Committee on Naval Affairs, was interrogated by Representative Witherspoon, as follows:

Mr. WITHERSPOON. Now, Admiral, in your first statement I understood you to say that our Navy, ship for ship, was as good as the navies of other countries.

Admiral BADGER. Yes.

Mr. WITHERSPOON. I want to ask you if it is not a fact that, ship for ship, they are better?

Admiral BADGER. I can not answer that absolutely. I believe they are as good or better. They are not inferior.

Mr. Witherspoon then examined the witness and elicited from him the information that, comparing the last five German and American ships under construction, ours, ship for ship, were larger and heavier vessels.

After which the following question was asked:

Mr. WITHERSPOON. Then the fact of ours being so much larger than Germany's shows that they are better or we are wasting money in building them larger, are we not?

Admiral BADGER. Yes. We are building them to be better than the German's. That is the idea in building them larger, that they shall be better than corresponding ships of other nations, if possible.

Representative Witherspoon further conducted the examination of Admiral Badger, comparing the American Navy with the German Navy ship by ship as to tonnage, thickness of armor, and destructive force of armament, eliciting from the witness in an examination extending over many pages the statement that ship by ship and gun by gun our Navy was superior to that of Germany. He concluded this interesting examination with the following:

Mr. WITHERSPOON. Then there would not be any question about the superiority of our Navy; is not that so?

Admiral BADGER. There are a few other points, but I do not think it is necessary to go into them.

Mr. WITHERSPOON. Well, I wanted to get your view about that, because I do not like to hear Americans running around and talking about the German Navy being superior to ours. I know it is not so.

Admiral BADGER. You have not heard me say that.

Mr. WITHERSPOON. No; and I am glad that it is so. I hope you never will say it, because there is not any truth in it.

I do not believe any Senator would find himself justified by his constituents if he went back to them in the coming November and proclaimed that he had voted for a policy that contemplated the building of the largest navy in the world. I do not believe he would be sustained in his course of action. That, however, is the plan upon which we have set out. That is the scheme of the gentlemen who are back of this legislation. The president of the War College, a member of the General Board, Rear Admiral Knight, made it perfectly clear in testimony given only a few months ago before the Committee on Naval Affairs of the House of Representatives that the plan upon which we have started is the building of a navy equal or superior to that of England.

Now, I propose to put that testimony into the RECORD. I shall not make any impression upon the Senate with it, but it shall be of record that the plan upon which we have started, the scheme of appropriations for which the Senate proposes to stand in this bill, is the building of a navy equal to or greater than that of England.

PLAN A NAVY EQUAL TO ENGLAND'S.

In February, 1916, Rear Admiral Knight was questioned by Representative OLIVER, of the Committee on Naval Affairs of the House of Representatives, and he answered as follows.

Mr. OLIVER. Just as briefly as you can, will you tell me just how many capital ships you calculate we should build by 1925?

Dreadnaughts and the armored cruisers constitute the so-called capital ships of any navy, as I understand it.

Admiral KNIGHT. In my mind, it has been impossible to arrive at a definite figure, because the results of this war may very seriously modify the standard toward which we are working.

Mr. OLIVER. I understand that general statement.

Admiral KNIGHT. I mean, for instance, now, the largest navy in the world is that of Great Britain.

Mr. OLIVER. Yes.

Admiral KNIGHT. It is quite possible that a good many of her ships may be destroyed before the war is over. If she should be victorious in the war, in spite of losing a good many of her ships she would still remain with the largest navy in the world—the largest, although it would be much smaller than it is now.

Mr. OLIVER. What I would like to have you do is to state what is the standard you have in mind that we have to build to. Perhaps that might be modified later, lessened by what you have stated; but what have you in mind, conceding perhaps there will not be any great amount of vessels destroyed whose places will not be taken by others; what had you in mind as the standard to which you would be aiming?

Admiral KNIGHT. A navy equal to that which Great Britain had at the beginning of the war.

Mr. President, that is the plan back of this legislation. We are to build a Navy equal to that of England at the beginning of the war, and that with the prospect that England's Navy will be reduced in strength as a result of the war.

Continuing this testimony:

Mr. OLIVER. How many capital ships do you calculate you will have to build in order to have a Navy of that strength? I will ask you how many additional capital ships you will have to build?

Admiral KNIGHT. Approximately 20 dreadnaughts.

Mr. OLIVER. Twenty more dreadnaughts?

Admiral KNIGHT. Twenty more dreadnaughts.

Mr. OLIVER. How many battle cruisers?

Admiral KNIGHT. In addition to the 9 I am recommending for this year's program, I would say 6, making 15 in all.

Mr. OLIVER. Thirty-five capital ships.

Admiral KNIGHT. When I said what Great Britain had at the beginning of the war, I meant built and building.

Mr. OLIVER. How many scouts would you say?

Admiral KNIGHT. We have none now. I would say 24.

Mr. OLIVER. How many submarines additional to the 75 that we now have?

Admiral KNIGHT. Seventy-five more.

Mr. OLIVER. Seventy-five more. How many torpedo boats?

Admiral KNIGHT. We have now 75 boats. I would say 75 more.

In answer to Representative CALLAWAY Admiral Knight testified:

Mr. CALLAWAY. Admiral, you stated a while ago that we would have to have 20 battleships, 15 battle cruisers, and accompanying craft in the way of scouts, torpedo boats, and submarines to make our fleet equal to what England's is now; that we would have to have those in addition to what we now have. Did you take into consideration in that what England might add in the meantime, or would we have to carry on a separate building program equal to England's building program?

Admiral KNIGHT. I expressed the opinion that in order to be on a par with England in 1925 it would be necessary for us to build between now and that time the number of ships which you have named, and I do not believe that it will be necessary for us to build more than that by 1925, in order to find ourselves on a level with England at the expiration of that time.

WOULD MEET ENGLAND'S PROGRAM.

It is perfectly evident, Mr. President, from the testimony of Admirals Fletcher, Badger, and Knight and from the recommendations of the Senate committee that we are inaugurating a naval program which is to impose upon the people of this country tax burdens equal to those the people of Great Britain have to carry in order to maintain their navy.

Mr. CALLAWAY, questioning further, says:

Mr. CALLAWAY. I am talking now about actual facts. I understood you to say that we would have to add that many to what we now have to make our fleet equal England's fleet as it now is.

Admiral KNIGHT. In other words, I believe that the fleet of England in 1925 will probably not be stronger than it is to-day.

Mr. CALLAWAY. The number of ships that you suggested we would have to add to ours to make our fleet as great as England's is based on what England now has?

Admiral KNIGHT. Yes, sir.

Mr. CALLAWAY. If she went on building in addition to that, we would have to meet her building program, would we not?

Admiral KNIGHT. We would.

Mr. CALLAWAY. Now, Admiral, do I understand you to say that you believe we would not have to keep up the rate of building, after we had caught up with England, that has been the rate during late years going on, because the other countries will not be able to continue their building?

Admiral KNIGHT. I think that after this war two things will happen to England. I think England will find herself with a much smaller number of ships than she has now, and I think she will be so poor that unless some threat is directed against her she will hesitate to spend large sums of money in enlarging her navy in what will seem to her an unnecessary way.

HALF OF BIG PROGRAM IN THE BILL.

Mr. President, that seems to me to be rather an important consideration that might have prevailed with the Senate committee. They are putting into this bill one-half of this program. They are committing the country to an expenditure of a sum of money that will provide 10 battleships within the next five years. This is 1916. Admiral Knight says that in order to make a navy equal to England's by 1925 we should build 20 of these great battleships or dreadnaughts. One-half that number is provided for in this bill as amended by the Senate committee.

COMMITTEE ADOPTS ADMIRAL KNIGHT'S PROGRAM.

I think that proves conclusively that the Senate committee is following the plan of these admirals—the plan of the General Board, committing us to a policy that means a navy equal to England's.

Mr. TILLMAN. I will say to the Senator that the Committee on Naval Affairs had no such idea as that.

Mr. LA FOLLETTE. Mr. President, the chairman of the Naval Committee may not have any such idea, but the Committee on Naval Affairs has put into the bill one-half of the dreadnaughts that the president of the War College said would be necessary to make our Navy by 1925 equal to England's in dreadnaughts in 10 years from the time he gave his testimony, and, as proposed by the Senate committee, we have here a proposition to vote for one-half of these dreadnaughts at this time, these to be built within five years.

The committee bill requires that we build in the next 5 years one-half of the dreadnaughts that Admiral Knight says we should build in 10 years, if we are to equal the navy of Great Britain.

I tell you, Mr. President, here is indubitable evidence, whether the Committee on Naval Affairs of the Senate may understand it or not, that they are committed to the policy which Admiral Knight lays down of imposing upon the American people the enormous burden of a navy equal to that of England.

I propose to show to the Senate that there is not a reason on earth why we should have such a navy. Admiral Knight himself says here that by the end of this war conditions will be so changed that England will be reduced in power. Listen to his testimony a little further:

Mr. CALLAWAY. I am talking now about actual facts. I understood you to say that we would have to add that many—

That is, 20 dreadnaughts and 15 battle cruisers, or 35 master ships.

I understood you to say that we would have to add that many to what we now have to make our fleet equal to England's fleet as it now is

Admiral KNIGHT. In other words, I believe that the fleet of England in 1925 will probably not be stronger than it is to-day.

And I want to say that Mr. CALLAWAY, a member of the Committee on Naval Affairs of the House of Representatives, has impressed me as a man of superior ability and great industry. No one can read the testimony taken by the committee of the House of Representatives and come to any other conclusion.

Mr. CALLAWAY. The number of ships that you suggested we would have to add to ours to make our fleet as great as England's is based on what England now has?

Admiral KNIGHT. Yes, sir.

Mr. TILLMAN. England has lost a good many ships since then.

Mr. LA FOLLETTE. Yes; England has lost many ships since then, and Admiral Knight says in his testimony that he anticipates such losses.

Mr. TILLMAN. And she has built a good many.

Mr. LA FOLLETTE. About that, I will say to the Senator from South Carolina, we do not know very much.

Mr. TILLMAN. We get it from the newspapers.

Mr. LA FOLLETTE. The newspapers do not know very much as to what is going on over there. It is behind the screen of censorship. England would not permit any more than Germany will permit the world to know its losses and its construction during this war period.

Bu, Mr. President, you may be sure that the warring nations are taxed severely to keep their navies up to the condition that existed when the war started. Admiral Knight says that they will not be able to do it. He says that England's Navy will be weaker at the end of this war than in the beginning, and that if England is victorious it will be victory obtained by a very much reduced navy.

Mr. VARDAMAN. Mr. President——

The PRESIDING OFFICER (Mr. JONES in the chair). Does the Senator from Wisconsin yield to the Senator from Mississippi?

Mr. LA FOLLETTE. Certainly.

Mr. VARDAMAN. If the Senator will permit a suggestion, I would remind him that England realizes that she does not need a larger navy now. She is so pressed for money and men to meet her enemy on the ground that it is not reasonable to suppose that she is now investing money in building ships.

Mr. LA FOLLETTE. Mr. President, that is a most rational suggestion and I think it is borne out by the expert testimony.

ENGLAND'S NAVY TO BE SMALLER.

Admiral Knight says that to make our Navy equal to the navy of England by 1925 it is only necessary to have 20 battleships in 10 years from the time of giving that testimony. We here are committing ourselves to half of that program. Yet he follows it in two minutes with the statement that England will come out of this war, in his opinion, with a greatly reduced naval strength. He says:

I think England will find herself with a much smaller number of ships than she has now.

When this war is over will she go on building, will she go on increasing? No; he says not. He says that she will be so poor that "unless some threat is directed against her she will hesitate to spend large sums of money in enlarging her navy in what will seem to be to her an unnecessary way." Then later on he says he does not think that the other nations of Europe will be in a position to impose that threat upon her.

Mr. CALLAWAY. What would you think England would consider such a threat against her as would justify her in increasing her navy though it be burdensome?

Admiral KNIGHT. That threat which has been directed against her by the other powers of Europe during the last 10 years, in which at least one of the great powers has been avowedly trying to overtake her, the feeling being in England that this was a direct threat against her.

Now, listen to what follows:

I do not think that this is likely to be duplicated after this war, because the war is going to wipe out in one way or another the conditions which led to that rivalry.

OURS TO BE LARGEST NAVY.

Now, what does this mean, Senators? If this testimony has any significance at all, and it comes from high authority, it means that the Committee on Naval Affairs has committed us to a program of building a navy as large as England's navy was before the war. Yet the testimony of the very man who recommended that policy is that England, at the end of this war, will not have as big a navy as she has now or any reason for maintaining as big a navy as she had at the beginning of the war. So the logic of the whole business is that we shall come out of this affair at the end of 10 years with the biggest navy in the world, bigger than that of England. Is not that it? Is not that fair reasoning?

I know how measures pass the Senate. I suppose it is preordained that this burden is to be imposed upon the American people. Twelve months ago the Secretary of the Navy denounced it. Twelve months ago the President of the United States was against it. He was plainly against any program of this sort. With the financial power of the great nations of the earth weakened, if not broken, there is every reason why we should not have this program forced through Congress. It is unjust, it is a great wrong. It is the beginning of a greater wrong. When we once start upon a plan of this sort, I do not know how we are ever to get back to a basis that is rational.

I perhaps might speak in this connection of the lessons which we have obtained from this war—the new uses which have been found for the submarine, the power as a weapon of defense of the marine mine.

I remind Senators that with a navy less than half the size of the British Navy, through mines, submarines, and coast fortifications, Germany has defied the power of England, with all its naval strength, to land a soldier on German soil.

Mr. President, until this body has some other testimony before it the overwhelming proof on the record is that our Navy is superior to any other navy on the face of the earth, excepting that of England. That was so even when this war had not depleted the financial strength and the naval power of any one of the belligerents in this great world war. It has gone on with such destructive forces at play unrestrained as was never before witnessed in the history of the human race. After two years is it not fair to assume that, even as to England, there may be some question as to whether or not we may not be superior to her in strength if we wait until this contest is over?

What do we want a Navy equal or superior to England's for, anyway? Are we to make war on England? Is England to make war on us? If so, we ought to begin at once to fortify along the 3,000 miles of border between this country and Canada. No preparedness advocate has had the gall to suggest such a thing. The mere suggestion is enough to show the hollowness of the pretext that lies back of the scheme to saddle upon the people of this country a Navy equal to England's.

Forts can not serve the purposes of the financial interests that want a Navy to back up foreign loans. If they could, we would have had a proposition before us to build forts and dig trenches and mount guns along the Canadian border.

EUROPEAN NAVIES REDUCED BY WAR.

Mr. President, nobody, so far as I know, has suggested that England is preparing to make war upon us or has intimated a suspicion that any nation other than Germany or Japan is preparing to do so. I do not know why Germany was singled out as the one belligerent in this great struggle going on over there that might come upon us to destroy us, but, anyhow, we have a Navy greater in strength than that of any other Government on the face of the earth except England, and England has a debt burden upon her at this very moment amounting to one-third of the total value of her property. England has her navy where it is in jeopardy of destruction so long as this terrific conflict goes on. Almost every day the dispatches bring word that some naval vessel has gone down.

I have a list before me of a number of the battleships, dreadnaughts, battle cruisers, and other vessels of the English and German Navies which have been sacrificed in this struggle. It is a newspaper list and I can not answer for its accuracy.

It is a list of large first and second line ships lost since the war began, and is as follows:

British.

DREADNAUGHTS.

Audacious, 24,800 tons, sunk by mine, coast of Ireland.

BATTLE CRUISERS.

Invincible, 17,250 tons, sunk by Germans.
Queen Mary, 27,000 tons, sunk by Germans.
Indefatigable, 18,750 tons, sunk by Germans.

BATTLESHIPS.

Bulwark, 15,000 tons, sunk by German submarine.
Formidable, 15,000 tons, sunk by German submarine.
Irresistible, 15,000 tons, sunk by Turkish mine.
Ocean, 12,950 tons, sunk by Turkish mine.
Goliath, 12,950 tons, sunk by Turkish mine.
Triumph, 11,800 tons, sunk by German submarine.
Majestic, 14,900 tons, sunk by German submarine.
Lord Nelson, 16,500 tons, sunk by Turkish forts.

ARMORED CRUISERS.

Good Hope, 14,100 tons, sunk by Germans.
Warrior, 13,550 tons, sunk by Germans.
Aboukir, 12,000 tons, sunk by German submarine.
Hogue, 12,000 tons, sunk by German submarine.
Cressy, 12,000 tons, sunk by German submarine.
Monmouth, 9,800 tons, sunk by Germans.

German.

DREADNAUGHTS.

Westfallen, 18,600 tons, sunk by British.

BATTLESHIPS.

Pommern, 13,200 tons, sunk by British.

ARMORED CRUISERS.

Blücher, 15,000 tons, sunk by British.
Scharnhorst, 11,600 tons, sunk by British.
Gneisenau, 11,600 tons, sunk by British.
Friedrich Karl, 9,050 tons, mined in Baltic.
York, 9,050 tons, mined.

This list was published two days after the battle of Jutland, but it is not complete and omits a number of vessels afterward officially reported as lost.

None of us can know how much England has added to her naval strength. Admiral Knight says that England will have a much smaller navy at the end of the war. The strain that came upon her was not to build up that side of her military power in this contest. She needed soldiers for the land service; she needed men to put into the trenches. She already had command of the seas. With her resources taxed and with her men drained by voluntary enlistment, so that she finally had to impose conscription upon her country, I undertake to say that it is fair to assume that she has not put any of her resources at this time into increasing her naval armament. She has more navy than she has been able to use.

Mr. TILLMAN. Mr. President, will the Senator from Wisconsin allow an interruption?

The PRESIDING OFFICER (Mr. HUSTING in the chair). Does the Senator from Wisconsin yield to the Senator from South Carolina?

Mr. LA FOLLETTE. Yes.

Mr. TILLMAN. While the information which we can get from Europe is very imperfect, as everybody knows, because of the censorship, the best information that our Navy Department has is that England has been building battleships right along, and so has Germany. We have attachés over there whose business it was to find out.

Mr. LA FOLLETTE. Well, I know that there have been some loose statements of that kind made. I know that some member of the House committee, ambitious for a large Navy, sought to elicit from one of the witnesses whose testimony I have been reviewing the statement that England was building a battleship every month; but the witness answered that it was preposterous; that she had never built a battleship every month of the year when she was free from all other military obligations. We have been retaining our relative position with England, I think, when we have been building only one or two battleships a year. We have not been falling behind. We have been appropriating more money for our Navy than has any other Government on earth, except England, year by year ever since 1900. A comparison of the amounts expended by the United States and Great Britain for naval purposes year by year for the last 15 years show that we have not only held our own but that we have gained slightly in relative strength.

CHANGES POLICY OF THE UNITED STATES.

Mr. President, we are at the forks of the road. We have to decide now what we are going to do. If we are going on record for a Navy as big as or bigger than that of England, vote for the Senate amendment to the House bill. It is the first of two steps to complete that program. It is a little more than one-half of the amount necessary to be expended in 10 years, as testified to by Admiral Knight.

But let us consider this—when we have done that, what then? Supposing we build until we equal England, supposing that, with our geographic isolation, which has always been a better protection to us than a navy, we enter upon this policy which has been the policy of England, what then? Where will we stop? When you have built to match England, England will build more; Germany will build more; you will drive them into that position. Do you want a little expert testimony on that? The committee in the other House took some. Before the Committee on Naval Affairs of the House of Representatives

Admiral Vreeland, testifying, in response to questions asked by Representative GRAY, a member of the committee, made it quite clear that naval building in rivalry with foreign Governments, once entered upon, is an unending contest, limited only by the amount of taxpaying which the people of each of the rival nations can sustain without collapse. I quote from the testimony:

Mr. GRAY. I wish to inquire of the Admiral if it is not the policy of other Governments to increase their navies with all the other leading powers?
Admiral VREELAND. It is, sir.
Mr. GRAY. What would be the advantage to us or any other powers if the navies were increased equally by all the nations of the world? Would there be any advantage to us or to any other power?
Admiral VREELAND. Not if you mean in the same ratio.
Mr. GRAY. Would not the same grounds exist after an increase for a further increase?
Admiral VREELAND. It would seem so.
Mr. GRAY. There would be no advantage gained by any nation, then.

INCREASES MEAN MORE INCREASES.

Jump this appropriation from two hundred and forty-odd million dollars as it came from the House to $315,000,000, and what have you? You are merely forcing all rival nations to larger expenditures, which in turn will compel us to still further increase our appropriations and thus again goad them on in the mad contest. Oh, what stupidity, what folly! What defense is there for it? I repeat:

Mr. GRAY. Would not the same grounds exist after an increase for a further increase?
Admiral VREELAND. It would seem so.
Mr. GRAY. There would be no advantage gained by any nation, then. How long could that be maintained, that even increase, and what advantage would it be to any nation?
Admiral VREELAND. If it continues to increase, the poorer nation will eventually exhaust itself, and the other nations, the United States included, will have a free hand—I mean be free to build in accordance with the changed condition.
Mr. GRAY. Then it is only a question of the limit of taxation.
Admiral VREELAND. Yes, sir.

You are starting in upon a plan to build a Navy that violates all the precedents, all the principles, that this Government has followed heretofore.

The Senate can shut its eyes and vote to put through this program if it is willing to do so, but it will do it in the face of evidence that it is the beginning of a plan to build the biggest navy in the world.

NAVAL EXPENDITURES OF PRINCIPAL COUNTRIES SINCE 1900.

Why, Mr. President, a statement of our expenditures for the upbuilding of a navy placed side by side with that of the great powers of Europe tells the whole story.

From and including 1900 to and including 1915 the following enormous sums have been expended upon their navies, respectively, by the countries named:

Great Britain	$2,740,368,467
United States	1,655,928,647
Germany	1,136,697,923
France	1,077,918,864
Russia	960,304,469
Italy	488,932,840
Japan	461,105,953
Total	8,137,448,146

We have invested in our Navy $519,130,724 more in the last 15 years than Germany has invested in her navy during that time.

And, sir, in the last 15 years we have invested $1,194,822,694 more than Japan has invested in her navy for the same years.

Shame on those who for their own selfish purposes disloyally cry down the American Navy!

FINANCIAL CONDITION OF COUNTRIES AT WAR.

There is not an economic reason; there is not a military reason; there is not, viewed in the broadest way, a question of world politics that constitutes a reason that anybody can possibly assign for practically doubling these appropriations in 12 months. The reasons are all the other way. The logic of the whole world situation is against the necessity for this increase.

Senators, the preparedness expenditures which are being forced through Congress are not for the purpose of defending against any of the powers of Europe. The facts and logic are all against it. The belligerents are weakening themselves financially. They are exhausting themselves in men, in military strength. Many of their battleships are at the bottom of the sea. There is not one of them that is keeping up with the destructive forces.

Just in proportion as they destroy the soldiery of Europe, just in proportion as they feed the men between 18 and 45 years of age to the cannon, wiping out ten to twelve millions of the virile manhood of the world, just by so much the reasons diminish why we should begin an extravagant extortionate program of taxation upon the people of this country for what we call preparedness.

GREAT INCREASE IN EUROPEAN DEBTS.

What is the condition of the people upon the other side against whom we are supposed to be building the great Navy provided for in this bill? Listen! I read from an article which appears in the Review of Reviews for May. The writer is comparing the financial conditions of these warring nations with what their financial condition was before the war began. I will ask to print a table showing the war loans on the 15th of March, 1916.

The PRESIDING OFFICER (Mr. KENYON in the chair). It will be so ordered, without objection.

The table referred to is as follows:

War loans of nations at war March 15, 1916.

Country.	Amount.	Unit.	Dollars.
Germany	34,681,000,000	Mark	$8,254,078,000
Great Britain	1,662,600,000	Pound	8,077,320,000
France	40,576,827,566	Franc	7,425,559,444
Austria-Hungary	524,200,000	Pound	2,547,500,000
Russia	8,073,000,000	Ruble	4,117,533,110
Italy	8,212,000,000	Lira	1,478,160,000
Total			31,900,150,554

Thus in the short space of less than two years the powers now at war have contracted obligations one-third greater than the total of their indebtedness before the war began. Yet the latter group of obligations had been accumulating for more than a century. Considering the earlier debts and recent war debts merely as parts of the total liability, the aggregate national debts of the nations at war at the present time appear as follows:

Country.	Debt.	Per capita.
Germany	$13,114,078,000	192
France	12,358,459,444	310
Great Britain	11,269,768,463	242
Russia	8,710,233,110	[1]61
Austria-Hungary	6,338,300,000	124
Italy	4,015,080,000	113
Belgium	825,518,000	105
Total	56,631,437,017	[2]145

[1] Based on population of Russia in Europe. [2] Average.

The per capita obligation of Great Britain already exceeds that of 1816. Should expenditures continue at the present rate, a third year of the war would add approximately $40,000,000,000 to the eighty billion already accumulated, making one hundred and twenty billion in all. This is equivalent to one-third of all computed national wealth in those nations, and in Mr. Rossiter's opinion probably represents fully half of all wealth capable of "mobilization."

The conclusion of Mr. Rossiter's article is suggestive:

"Finally, as the indebtedness of the warring powers becomes greater, the more helpless may become the possibility of payment. The mere burden of interest, indeed, under easily developed conditions, might prove a source of actual revolution. There are, in fact, grave possibilities, for it is clear that an indebtedness of over $50,000,000,000 can not be materially increased without becoming a menace."

Mr. GALLINGER. Mr. President, will the Senator permit me?

Mr. LA FOLLETTE. Certainly.

Mr. GALLINGER. I will ask the Senator if the per capita burden which rested upon the English people at that time included the colonies or only the mother country?

Mr. LA FOLLETTE. I take it, Mr. President, it included the colonies, from the article which is before me.

Mr. GALLINGER. Great Britain, of course, has added very largely to that. I notice she is now calling for $1,250,000,000, I think.

Mr. LA FOLLETTE. Oh, yes, Mr. President. This article was published four months ago.

Mr. WALSH. I should like to ask the Senator from Wisconsin if he has the per capita national debt of Great Britain at the commencement of the war?

Mr. LA FOLLETTE. I think this article does not show it.

Mr. WALSH. I was desirous of knowing how much of that enormous debt was contracted for the purpose of actually carrying on the war, because, as I understand it, it is the argument of those supporting the policy represented by the legislation before us that these expenditures are made so that we shall not be obliged to incur the indebtedness that the Senator now tells us about.

Mr. LA FOLLETTE. Mr. President, I find that this article answers the question of the Senator. Mr. Rossiter, who is cited by the Review of Reviews as an authority, says:

Should expenditures continue at the present rate, a third year of the war would add approximately $40,000,000,000 to the $80,000,000,000 already accumulated, making $120,000,000,000 in all. This is equivalent to one-third of all the computed national wealth of those nations.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Colorado?

Mr. LA FOLLETTE. I do.

Mr. THOMAS. The Senator, of course, is aware that the indebtedness of the neutral nations has also been very considerably augmented because of their mobilization in order to protect themselves from the possible outrages of the warring nations.

Mr. LA FOLLETTE. That is very true and very pertinent, Mr. President, to a statement of the general financial burdens that are placed upon the people of the whole world as a result of this war which is now in progress.

I have just read you the views of one financial writer on the enormous debt that Great Britain is incurring. I want to emphasize that by calling your attention to something which has been written by Mr. Ellis Barker, a recognized authority and writer upon economic subjects, in an article in the Nineteenth Century and After, for December, 1915—that is eight months ago. This writer is the author of The Rise and Decline of the Netherlands, Modern Germany, Great and Greater Britain, and of many other works that have given him a rank and standing as a writer of authority on financial economic subjects.

VISUALIZES SOME WAR EXPENDITURES.

Mr. President, I am dwelling somewhat upon Great Britain because the testimony which I read I think conclusively established on the highest naval authority which we have in this country that the Navy of the United States is next to that of Great Britain; that so far as the Navy of the United States is concerned it is superior to that of any other country. So I am offering for the consideration of the Senate this morning some facts upon the financial situation growing out of this war in Europe as it affects Great Britain—England. Says this author:

The vastness of Great Britain's war expenditures staggers the imagination, not only of people in general but even that of financiers and statisticians. It can be visualized only by comparison. The Franco-German war of 1870 to 1871, which lasted nine months, cost Germany £60,000,000; the Panama Canal, the greatest and most expensive engineering undertaking the world has seen, cost the United States £80,000,000; the Boer War, which lasted three years, cost this country £250,000,000.

It follows that Great Britain spends on the war every two weeks as much as the total cost of the Panama Canal, and that she spends every two months considerably more than she did during the whole of the protracted campaign against the Boers. The war has so far cost about £1,300,000,000. The national capital of Great Britain is usually estimated to amount to about £12,000,000,000. As the struggle seems likely to continue for many months, it may eventually swallow a sum equal to one-third of the British national capital, if not more. Interest will have to be paid on the gigantic war debt. Its principal must gradually be reduced to manageable proportions by purchase; and, in addition, untold millions will be required every year for the support of the crippled and incapacitated veterans, and for the widows and orphans. Before the war, budgets of £200,000,000 per year seemed monstrous. After the war budgets of £400,000,000 may seem modest.

If we now remember that years of hard times followed the relatively cheap Boer War, we can well understand that statesmen and business men look with gravity and anxiety and alarm into the future, and at the mountainous debt which Great Britain is rapidly piling up, and that they are asking themselves: "Can this overtaxed country stand the additional financial burdens? Will the war destroy the British industries and trade, and drive the country into bankruptcy and ruin, or permanently impoverish Great Britain?"

In an article in the Outlook of the 28th of April, 1915, Mr. Theodore H. Price, another author, says:

Bluntly stated, the question is, Will the people of Europe repudiate the debts now being incurred either from choice or necessity?

For answer we must refer to the pages of history; but in them we can find no exact precedent for the present situation, as never before have any group of nations, or all the nations together for that matter, been in debt to the amazingly unthinkable total that the present belligerents will shortly owe. * * *

In Europe the per capita indebtedness, if the war last only a year, will be nearly double that of the United States in 1869, and the average intelligence and wealth of the people is much lower.

Can they support the burden of the debt now being created?

If they can not, what will be the effect upon the world and upon America in particular?

It is to be borne in mind that if repudiation or default should take place there would be no destruction of accumulated wealth. The stock of productive or unproductive things that a nation owns is not diminished if it fails to meet its obligations. No one can sue a sovereign State without its voluntary acquiescence. Nonpayment of a national debt simply means that a certain portion of the world's population is freed from the compulsion of being made to turn over part of its earnings to another portion who are thereby enabled to live with less effort. In this view of the matter default would not be an unmixed evil. The result would probably be higher wages for the working classes and increased cost of production in Europe, so that America would have less to fear from the competition of trans-Atlantic industry.

SHOULD BE MOVING FOR WORLD CONFERENCE.

So I say, Mr. President, that all of the conditions existing at this time argue against instead of in favor of excessive appropriations for military purposes. And, sir, it would not have been possible to have secured the votes of any considerable number of the Members of the Senate or House of Representatives for increased appropriations for this year over the appropriations of last year except for the fact that there has been conducted in this country an artificial, cold-blooded, selfish propaganda, made by interested organizations, to increase these appropriations at this time.

And, Mr. President, while Congress and the administration have yielded all too readily, I believe, to the influences set in motion by these hidden forces, there has been by far too great a lack of disposition to consider constructive measures which look to the removal of the causes of future wars.

Last session I introduced a bill and spoke for a conference of neutral nations. There has been a general consensus of opinion, a tremendously urgent demand for such a conference on the part of great masses of men and women who believe every effort should be made to awaken humanity, Christianity, and civilization to the evil of war and to the necessity of establishing other means of settling international difficulties.

Other neutral nations have intimated their desire for us to initiate such a conference, but the Foreign Relations Committee and the State Department have not given any public encouragement to what seems a most rational and natural first step to have taken in this world crisis.

PEOPLE SHOULD HAVE VOICE UPON QUESTION OF WAR.

Experience and reason alike demonstrate that since the people must pay the cost, must sacrifice their lives and their possessions in war, they should have a deciding voice in the declaration of war. I recently introduced a bill which offers opportunity for an advisory vote as to war against any nation with whom the President has severed diplomatic relations. I hoped to get a vote on it in the Senate, but have not been able to do so up to the present time.

OTHER PLANS TO AVERT MISUNDERSTANDING.

Hardly a day passes that there is not some scare headlines as to the Japanese menace. The fear of Japan has been one of the most effective means of working up sentiment for a great army and navy. Believing as I do that war should be the last resort in the settlement of international difficulties and that all other means of adjustment should be exhausted, I introduced a bill for an oriental commission. It may not be in the best form. I have a letter from a Japanese friend, formerly a student in the University of Wisconsin. I have great respect for his views on oriental relations. He was one of the originators of an international club at the university. He approves of the spirit of the bill, but objects to the provision for a joint commission including Japan and China. He thinks we should deal with each nation separately. The resolution could be modified to meet that objection. I have no pride of opinion about it. But the point is that no measure for solution of these obvious problems can secure consideration.

I would not have you think I am unmindful of the great responsibilities of the administration. I have taken occasion to express my appreciation and what I believe to be the widespread approval of the people of the country for the fact that the President has kept us out of war.

But I believe that because of our supreme position we might have exercised a more affirmative and effective influence in shaping the world policy and if we had not had such enormous selfish financial interests at stake I believe that much of this great energy and power now being expended in preparing for war would have been directed toward its prevention in the future. Who can tell with what result?

FIXING STANDARD FOR MILITARY EXPENDITURES.

Mr. President, I have voted and shall vote for appropriations for adequate defense. But the rank and standing of our Navy, the strength of our coast defenses, the impossibility of any effective over-seas expedition, the purposes back of this program, challenges every Senator to study this bill as he never heretofore studied any naval appropriation bill.

Remember, when once you fix a standard of excessive naval appropriations, it is almost impossible to lower it.

I should like to urge upon the attention of Members of this body and of the people of this country that we are now fixing a certain measure of taxation for military purposes, below which we are almost absolutely certain not to go but on top of which from now on we are almost absolutely certain to pile millions and hundreds of millions in excess of the amount now named in this appropriation bill. If you watch the trend of the appropriations, if you make out a table of naval and military

appropriations, you will find that you can not very well get away from an increase after it is once adopted—no matter how large and unnecessary the increase—you add to it the next year and the next year and the next.

HOW OUR APPROPRIATIONS GROW.

In this connection, Senators, I invite your attention to our naval appropriations for the past 15 years. A reading of the tabular statement of these appropriations will demonstrate the tendency to steadily increase these expenditures. There is no turning back. They mount higher, higher, constantly higher. Year by year we have increased the tax burden for naval expansion. Here are the amounts we have expended on the Navy:

Fiscal year.	Amount.	Fiscal year.	Amount.
1900–1901	$61,721,695	1909–10	$122,247,365
1901–2	68,438,301	1910–11	111,791,980
1902–3	82,977,641	1911–12	133,559,071
1903–4	104,126,192	1912–13	129,787,233
1904–5	115,655,825	1913–14	136,853,301
1905–6	109,725,059	1914–15	141,872,786
1906–7	98,392,144		
1907–8	117,353,474	Total	1,655,928,047
1908–9	120,421,579		

The naval appropriation of last year was practically two and one-third times as great as the same appropriation for the fiscal year 1900–1901. The appropriation carried in this bill multiplies the appropriation of 1900–1901 by 4.1. It is $315,000,000. It is an increase over the amount of 15 years ago of 410 per cent. It is $55,000,000 greater than the largest appropriation made by England in any one year during that entire period.

This bill ought to be sent back to the committee that reported it. When the Senate votes, it should certainly go no further than to vote to substitute the House bill for it.

The great majority of the people of the United States are people in moderate circumstances. The great burdens imposed by this bill make a difference to these people. You add $25 or $30 a year to the amount of their taxes, and I want to tell you that all the little home economies that are now strained to the very limit under the enormously high cost of living will break down.

CONGRESS MUST CONSIDER THE PEOPLE WHO MUST PAY THE TAXES.

We must think of these men who have to shoulder the greater part of this enormous cost of building battleships and all the necessary supporting auxiliary craft provided for in the bill as amended by the Senate committee. The taxpayers will want to know of the men who put these burdens on them, sooner or later, what justification they had for doing so. And they will know. This is a representative government. You have no business to have any pride in supporting a committee. You have no business to have any pride in supporting a "slate" program. We should vote here for that measure of increase in the defense of this country which the conditions impose upon us.

Let me say, Mr. President, that it is these men, who are grunting and sweating under the burden of the doubled cost of living and who are sustaining a family on just a few hundred dollars a year, who are going to know what this is all about—the banners of preparedness parades; the gushing editorials, paid for by advertising in a controlled press; the billboards covered with lurid preparedness posters; the moving pictures created from the disordered imaginations of men hired to instill fear in the mind of the public—all of the costly propaganda work will not be accepted as a justification of your action. It must stand the acid test of world conditions and of the actual facts with respect to the status of our Army, our coast defenses, our Navy. Facts, not emotion, in the last analysis determine the action of the American people.

Mr. President, a hundred million people have nobody to look out for their interests here but the Senators and Representatives in Congress. The munitions makers, the great interests, and the world-wide power which they exert, are here and in every capital of the world. Their representatives play upon the fears of Members of Congress. They labor in every conceivable way to discredit the military strength of the Nation and appeal to the patriotism of the representatives of the people to increase these expenditures.

Mr. President, I have sometimes thought that they were not only in the lobby and before committees, in their true character as lobbyists, but I have sometimes been constrained to think, Mr. President, that they were on the floor of the Senate and of the House of Representatives drawing salaries as Members of the two branches of Congress. Of course I understand—I can conceive—that they may square their support of these extraordinary expenditures with a proper regard for the people whom they represent.

If the great body of the people whom they represent are engaged in this line of business and of furnishing the means of equipping the armies and the navies of this country, I suppose they have a right to be represented here just as well as anybody else, as well as the great body of taxpayers who pay the bills. The only trouble is that they do not stand here quite in the capacity of lobbyists for that particular interest. They stand here as representatives of all the people, not only of their particular States but of all the States.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from New Hampshire?

Mr. LA FOLLETTE. Surely.

Mr. GALLINGER. I have no disposition to get into a controversy with the Senator from Wisconsin, but I am listening to him with interest. If I understood the Senator from Wisconsin correctly, I think the Senator from Wisconsin would wish to change some words that he uttered. If I understood him correctly, he went to the point of saying that he sometimes suspected that not only did Members of this body represent the great business interests of their States but he sometimes thought they received compensation.

Mr. LA FOLLETTE. Oh, no, no. Mr. President, I would not make a statement of that kind.

Mr. GALLINGER. I hope the Senator will revise his remarks, because I am very certain——

Mr. LA FOLLETTE. I do not think it will be necessary to revise the remarks, I will say to the Senator from New Hampshire. I am quite sure I did not say anything like that.

You see, the Senator from New Hampshire, Mr. President, has been a sort of disciplinarian of mine for a good many years. I have been in the Senate now about 10 years, and for a considerable time after I entered the body the Senator from New Hampshire, when I arose, used to take his book of rules out of his desk. He would open his book of rules and put his finger in the book at Rule XIX and have it ready to pull on me during the debate. That rule provides that you can not say what you think about Members of the Senate. That rule of the Senate provides that no Member shall question the motives of any other Member of the Senate. I presume that is a necessary rule of debate, because otherwise we might get to telling what we think about our associates here, and that would disturb the amities and the courtesies of the ordinary procedure of the Senate if we really told what we thought. So you know we have this wholesome restraint upon us; and no Senator is permitted to question the motives of any other Senator. Having been pulled up because I had, though not intentionally, violated the rule, but from want of discrimination in the exact form of my speech—having been pulled up a good many times by the Senator from New Hampshire, I have had a curb over myself. I do not believe I have in this instance violated any rule of the Senate, but if I have, I shall be sure to correct it when I come to look over what I have said.

Mr. GALLINGER. Mr. President, if the Senator from Wisconsin will permit me, he exaggerates the attitude the Senator from New Hampshire has taken toward him. At one time I was very solicitous to have the rules of the Senate observed. That was all.

Mr. LA FOLLETTE. That may be.

Mr. GALLINGER. I think the Senator does exaggerate the matter. I have never meant to be discourteous to the Senator from Wisconsin, and have tried not to be so; but, however that may be, I think honors are easy in that regard, and we will let it go at that. I may have misunderstood the Senator from Wisconsin.

Mr. LA FOLLETTE. I think the Senator did.

Mr. GALLINGER. But I think that inadvertently the Senator did say something that he may want to correct before it appears in the RECORD—something that reflects upon Members of both Houses of Congress. The Senator's words are going out to the country——

Mr. LA FOLLETTE. I shall be careful about it.

Mr. GALLINGER. And the country will be more or less influenced by what the Senator is saying on the question. Whatever my relations with the Senator may be now or may have been in the past, I would not want the Senator, any more than I would want any other Senator, to intimate that Members of this body do not act conscientiously and honorably.

The Senator from Wisconsin speaks of New England very frequently in connection with munition factories. There are no munition factories in my State. Possibly I should regret

that, because I like my people to be busy and prosperous, and surely their interests ought to be protected so long as they are engaged in legitimate business operations.

Mr. LA FOLLETTE. Oh, no, Mr. President, I want to be very careful. I do not want to say anything that the rules of the Senate do not permit me to say, because this is not the only forum, you know; there are places where I can go out and free my mind, and I do it not infrequently. I read the roll call from time to time over the country. So I do not intentionally transgress the rules here. I will look over what I have said with very great care, and with the rules in my mind, and I will try to keep within the limit.

WHY "THEY" WANT "PREPAREDNESS."

I think I have cleared up and destroyed, if it required to be destroyed, any possibility of belief that this Government of ours has a Navy inferior to that of any other Government than Great Britain. If we are to build in competition with Great Britain, then we are to change our policy, which has not been a policy of aggression, which has not been a policy of acquisition of territory, which has not been a policy of imperialism. Great Britain *may* justify having a navy such as she maintains, but she can only justify it to protect her foreign possessions. So that, if in this change of plan under this administration we are to have a Navy commensurate with England, we are to have a Navy commensurate with England because we are going to adopt the policy that England has—of possessions abroad, of aggression upon other Governments. Mr. President, that fits exactly into the whole scheme of the interests back of the propaganda to create a public sentiment for a big Army and a big Navy.

The great financial interests in Europe have planned for big navies and big armies—navies to enforce the rights of the financial organizations in foreign countries. Combined with the banks and others seeking foreign investments were and are the great manufacturers of munitions who make profits out of war.

Mr. President, I propose to show that beginning 66 years ago a new policy was inaugurated in England with regard to enlisting the powers of government back of the financial operations of individual citizens who had made speculative investments for profit in foreign countries. Lord Palmerston, then the British secretary of foreign affairs, invented the new doctrine which has been adopted by practically all of the Governments of Europe, and is manifestly taking root in this country. The case in which the new departure was made is a very interesting one. Never before that time had any Government employed the power of its state department to prosecute a private claim against a foreign Government.

I have here a number of high authorities which call attention to the fact that it was at this time that the Government was first summoned to the support of private claims against foreign Governments. I shall read from only one or two.

ARMED PEACE FOR PRIVATE PROFITS.

I read from a work recently published by the MacMillans in this country. It is a republication of an English book published about a year ago. The author is Henry Noel Brailsford. The title of the book is "The War of Steel and Gold: A Study of the Armed Peace."

The modern extension of the principle—

That is, the principle that the Government will protect the private investments of citizens in foreign countries—

The modern extension of the principle was first enunciated by Palmerston in an historic speech in 1850. * * *

The case which Palmerston had chosen for the establishment of this principle was painfully, even absurdly, remote from any national British interest. Don Pacifico, a Portuguese Jew resident in Athens, who in some obscure way had acquired British citizenship, had a fantastic claim for financial compensation against the Greek Government. He refused to sue in the Greek courts, called in British diplomatic aid, and so far succeeded that a British fleet was sent to the Piraeus with a peremptory demand for a settlement. Palmerston's doctrine, looked at askance in his own day, has become the unchallenged dogma not only of our own but of every other great power. In the heroic age Helen's was the face that launched a thousand ships. In our golden age the face wears more often the shrewd features of some Hebrew financier. To defend the interests of Lord Rothschild and his fellow bondholders, Egypt was first occupied, and then practically annexed by Great Britain. To avenge the murder of a missionary by a Chinese mob, the Germans annexed the town of Kiaochau and a district stretching 100 miles inland; the town, it may be remarked, was noted not merely for its dislike of German missionaries, but also for the fact that it is a very valuable port. To protect investors who had speculated in its debt, a foreign financial control was imposed upon Greece. The claims of various financial adventurers who had grievances against President Castro's government induced Britain and Germany to conduct a naval expedition against Venezuela. When in Persia a civil war broke out between the Shah and his revolted subjects, Russia, with Sir Edward Grey's assent, claimed and exercised the right to send her troops into Persian territory to protect her subjects from the possible accidents that might befall them in these internal commotions. The comparatively recent history of Turkey tells of a naval expedition undertaken by France to the island of Mytilene to collect a usurious debt due by the Sultan to a pair of Levantine financiers with Italian names—MM. Lorando and Tubini.

The extremest case of all is, perhaps, our own South African war. The quarrel between our subjects and Mr. Kruger's government was extensive, but it turned mainly on two points, the objection of the mining industry to the dynamite monopoly and the claim of the Outlander community that it should be allowed, on easier terms, to divest itself of its British citizenship in order to acquire a vote in the Burgher republic. An odder application of Palmerston's doctrine could hardly be imagined. The Civis Romanus conceived it to be his interest to become a barbarian, to weaken the empire by leaving it, and the empire actually backed his claim. The law forbids a man to weaken the State by committing suicide, for it is supposed that the subtraction of one broken life from the sum of its forces is somehow a loss. Here the State actually insisted that British subjects should be encouraged to withdraw their support from the empire, and it backed its insistence by arms. What the mine owners really at bottom desired was cheaper labor, and their effort to acquire political power through the franchise had no other object. "Good government," as one of them reckoned, would mean two and a half millions a year in dividends.

In one way or another capital which expatriates itself will desire to control the territory where it is employed. It is often content with the informal offices of diplomacy. In graver cases it demands some form of foreign control to foreign employees or a foreign commission. In the Transvaal it thought for a moment of securing its interests by means of the votes of a foreign population composed mainly of its own employees. The same proposal has been put forward (see p. 123) by Lord Cromer as a method of reconciling the claims of foreign finance with Egyptian self-government.

Palmerston's doctrine has, in short, become a pretext which may excuse any and every act of aggression and interference. The extent to which it is carried in any given instance depends not so much on the character of the interest involved and the nature of the injury which it has suffered as on the mood of the imperial power, the weakness of the State assailed, the tolerance of the other great powers, and the amount of influence which the interest affected can exert upon the diplomacy of the power which protects it. The application of this doctrine is apt to attract attention only when it happens to lead to some catastrophe involving the visible use of force. But for one overt and public application of force, most modern empires use their strength a hundred times in less violent but equally effectual ways. If a power coerces once, it may dictate for some years afterwards without requiring to repeat the lesson. It is the first duty of diplomacy abroad to protect the interests of its subjects, and these interests are now usually concentrated in the hands of great banks. The banks in their turn work in concert with the groups of capitalists who are seeking concessions to construct railways and ports, to install electric plants, to open factories to work mines, to supply armaments, or to subscribe to loans. Palmerston's claim that a State should protect its subject from "injustice and wrong" sounds plausible. But better than cure is prevention, and the real business of diplomacy is now rather to support these interests, so that no "wrong" shall be done then than to rescue them by an angry intervention after the wrong has been done. The method by which support is given varies indefinitely, and each power has its own characteristic technique.

Sometimes the financiers merely introduce and recommend it to the notice of the foreign Government, and this process is clearly simplified when the venture has at its head some noted social or political figure. A British bank operating in Egypt chooses Lord Milner as its chairman. A bank which aims at serving Turkey has at its head Sir Ernest Cassel, who was often King Edward's host. Lord Cowdry, battling in Latin America against the Standard Oil Trust for concessions, sends out as his ambassador the late Capt. Whit, of the Liberal Party. "Protection" in such cases means often much more than support against the government of the weak and possibly unscrupulous States in which our financiers are operating. It means also support against European rivals, who, in their turn, have diplomatic backing. In Turkey rival embassies compete like business houses for concessions, loans, and orders, and mix inextricably their politics with their finance. The French and German ambassadors in Constantinople engage in an incessant conflict over the rights to supply Turkey with armament on the forges of Creussot or Essen. The banks take their share in the competition, and the usual procedure now is that Turkey is offered a loan by a French or German bank on condition that the proceeds are expended in buying cannon as the case may be from Schneider or Krupp. Austria has been known to make a condition of concluding a tariff treaty with Serbia that she should buy her cannon from the Austria works in Skoda.

WARS MADE TO ENFORCE PRIVATE CLAIMS.

Mr. President, there is abundant proof for the statement that practically all the wars of modern times have grown out of Governments using their military and naval power to enforce the claims of private interests—powerful interests, powerful with the home Government, powerful enough to control cabinet ministers, powerful enough to command the support of court circles. What caused the war between Russia and Japan? The Russian people did not want the war, the Russian bureaucracy did not want the war, the Russian ministry was opposed to the war. Gen. Kuropatkin, minister of war, published his memoirs, the first edition of which ran in McClure's Magazine. The first edition published in the magazine contains most interesting and noteworthy material that is not found in the expurgated edition afterwards permitted to be published:

The inner history of the Russo-Japanese War is an even more instructive revelation of the working of the personal factor in foreign affairs. The facts are fully stated in the translation from the first unexpurgated draft of Gen. Kuropatkin's memoirs which Mr. George Kennan contributed to McClure's Magazine for September, 1908.

The causes of the war between Russia and Japan were the refusal of Russia to observe her pledge to evacuate southern Manchuria, and her stealthy encroachment on the Japanese sphere of influences in northern Korea. These memoirs show that all the ministers of the Tsar, Count Lamsdern, foreign secretary; M. Witte, minister of finance; and Gen. Kuropatkin, minister of war, was sincerely disposed to evacuate Manchuria, and no less opposed to any advance toward the Yalu River and Korea. They failed because the timber enterprise, which was the attraction of the Yalu district, was a court adventure.

The authority for this statement is a cabinet minister of the Russian Government, the Russian minister of war, Gen. Kuropatkin. Listen further:

They failed, because the timber enterprise, which was the attraction of the Yalu district, was a court adventure. These wealthy forests, made over to a Russian promoter in 1896, when the Emperor of Korea was a fugitive in the Russian legation at Seoul, had passed into the hands of a courtier named Bezobrozoff, an intimate of the Grand Duke, the Dowager Empress, and the Tzar. The company which be formed to work this concession had several of these people among its shareholders, and there is little doubt that the Tsar himself was interested to the extent of £200,000. Admiral Alexieff, a creature of Bezobrozoff's, went to the Far East a viceroy, overruled the ministers at home, and conducted the timber enterprise as an imperial undertaking. It was neither the Russian people nor the Russian bureaucracy which had determined to keep the Yalu district and to fight Japan for its possession. The resolution to possess it came from a little group of interested courtiers, who were using the national resources to further a private financial end.

Mr. President, the Russo-Japanese War is one instance. If I chose to take the time I might cite many other examples that prove what is really back of these great military preparations which have been under way for many years in foreign countries and are now under way in this country.

For the sake of brevity, Mr. President, I shall read, first—and perhaps it will be all that I shall find it necessary to read—a summary of the cases of the exploitation of weak governments by the strong.

I read from a work by Frederick C. Howe entitled "Why War?" published very recently by Scribner & Sons. I purpose to put into the RECORD his excellent summary of the operations of the financial interests in the weaker Governments of Europe particularly. I hope all who have not read this valuable and convincing work will take occasion to study it. You will find all the facts given and the record verified beyond dispute. In the summary to which I referred the author says:

Certain forces have been set in motion by the European war whose coincident appearance seems hardly a matter of accident. These forces are:

1. The billion-dollar war orders that have filled every available shop and factory with the most profitable orders that have been received in years.

He might have said the $3,000,000,000 war orders. These orders now total this enormous amount.

2. The agitation of preparedness, involving the expenditure of millions of dollars for an increased army and a navy equal to that of the strongest European power.

3. The promotion of powerful financial organizations for foreign exploitation and over-seas financing. These, as we have seen, are the forces of imperialism.

COLOSSAL PROFITS IN MUNITIONS.

The agitation for a greater navy and the organization of over-seas trading corporations were so simultaneous in their appearance as to suggest cause and effect, especially as the classes most active in promoting preparedness include the leading stockholders in the new promotion corporations of munition factories and banking institutions which are reaping such colossal profits from the present European war.

Here is the same merger of interests; here is the same invisible government which for the past 20 years has been waging war on democracy. It is the merger responsible for insurance scandals, the railway bankruptcies, the Alaskan land frauds, and the monopolization of industry that menaces our life and our institutions. It is an old enemy in new clothes; it is the same merger that for 30 years has involved the great powers of Europe in war and in preparation for war.

I am tempted, Mr. President, every moment to turn aside from each one of these pungent paragraphs to review what has been taking place in this country, resulting in unlimited fortunes for the few, through a control of all of the prices of the products that the people have to sell—the products of their land and of their labor and the control of all the prices of the things they have to buy. These colossal fortunes in the hands of combinations and trusts have caused a surplus of wealth in this country like the surplus wealth created in Great Britain and in other European countries.

BIG FINANCIAL INTERESTS BACK MUNITIONS TRADE.

The tying together of the manufacturing, transportation, traction, banking, and other interests of the country has been demonstrated over and over again. Yet it was made the subject of scorn and ridicule when eight years ago upon this floor I undertook to prove the menace of the interlocking directorates of the financial, the transportation, the traction, the industrial, and the commercial organizations of this country. I named directors and the different corporations upon which they were members of the board of directors, and pointed out that there were 23 members of the board of directors of the National City Bank, of New York; that that bank was the head of a group of banks in New York and a group of financial trust companies, about two dozen in number, that was known in every broker's and banker's office as the Standard Oil group; that the National Bank of Commerce, with, as I now remember, 40 directors, was the head of what was known and is known to-day as the Morgan group; that associated with that group, and owned and controlled by it, were a dozen of the leading banks and a dozen of the leading trust companies. The roll of the men on the boards of directors of these various groups and the various manufacturing, industrial, and commercial enterprises resolved itself into a little handful of men who appeared on all these different directorates, as I now remember, to the number of 98, who, operating together, controlled the business of the country. I prosecuted my investigation into the various cities of the country to get the financial measure of these 98 gentlemen who controlled the board of directors of all the big business of this country, and it turned out that 14 men were the big power after all—only 14. And then, Mr. President, a little further investigation disclosed that those 14 men lived in terror of two big forces in this country that had grown powerful and gigantic within a few years—Standard Oil and Morgan. Those two great groups had been built up, Mr. President, when there was some rivalry between Standard Oil and Morgan.

There is none now. These interests, consolidated, rule to-day in this country. Their power is at work behind the scenes for a great big Army and a great big Navy. They, sir, make the profits out of the building up of the Navy and the Army. They are back of great investments in Mexico.

I will continue my reading from this author.

Mr. TILLMAN. Mr. President, will the Senator tell us from what he is reading?

Mr. LA FOLLETTE. Yes, sir; I am reading, as I said before, from Dr. Frederick C. Howe's book, entitled "Why War?" recently published by Scribner's. And let me say, Dr. Howe is one of the Nation's ablest writers, thinkers, and publicists. He is a practical statesman. He was a member of the Ohio State Senate, a devoted friend of Tom Johnson's, a coworker in and supporter of his reforms—

Since the outbreak of the war European war orders have been placed with American firms in excess of $1,000,000,000. The profits on these orders are colossal. War securities have advanced in price on the stock exchange by nearly $1,000,000,000. That much has been added to the wealth of a small number of persons who hold the controlling interest in the greater companies which have the important war contracts. The banking firms of Wall Street have been the financial agents of the allied powers in the handling of these contracts. They have floated the $500,000,000 allied loan and carried through all of the transactions for the allied Governments since the outbreak of the war. The largest war orders have been placed with the Bethlehem Steel, Midvale Steel, General Electric, Du Pont Powder, Westinghouse Electric, and American Locomotive Cos., all closely identified with Wall Street interests. Hundreds of millions of orders have gone to lesser companies.

Before the war Bethlehem Steel fluctuated around $40 a share. It has since sold as high as $600 a share. Under the stimulus of war orders, Savage Arms rose to $340 a share, Du Pont Powder to $422, Colts Arms to $840, and Winchester Repeating Arms to $2,400 a share.

Mr. STONE. What was the value before the war of these other shares?

BIG BUSINESS BACKS CAMPAIGN FOR BIG NAVY, BIG ARMY, AND UNIVERSAL MILITARY SERVICE.

Mr. LA FOLLETTE. The writer does not say what the market prices of any of them were before the war, except Bethlehem Steel, but the statement shows them to be enormously above par. I suppose it will be an easy matter to look up in the files of papers the quotations made two years ago on these securities. The author continues:

One of the results of the war has been to identify the financial powers with the munition makers, as in the warring nations of Europe.

Coincident with the advance in the value of war stocks, the cry of unpreparedness was raised against an unnamed power that threatened us. The cry sprang as if from the earth. It was born with the formation of various leagues for its promotion whose officers and promoters are closely identified with the great banking houses and munition makers of the East. The press echoed the hue and cry. The Navy, which prior to the war was said to be second only to that of Great Britain, is now said to be that of a third or fourth rate power. The Army is a paper Army. Our coast defenses will not withstand an attack. Any one of the great powers could land an army on our shores and bring us to our knees in a few weeks' time, and 100,000,000 people separated from these powers by 3,000 miles of sea would be powerless to prevent it.

We must have a Navy equal to that of the greatest power on earth, is the demand. Even that seems far from adequate to some. Hundreds of millions must be immediately spent. There must be a large standing Army, some say, of 400,000, others say of 1,000,000 men. Universal conscription is insisted on by some.

I noticed in this morning's papers, Mr. President, in the dispatches, that the Military Committee—I do not know whether it is of the Senate or of the House—is considering now some plan of conscription.

Enlistments are not very rapid these days. Recruiting does not go forward on the run. Contrast the people who are willing to enlist in a preparedness parade—or who do march, whether willing or not—with those who are appealed to to come to the colors and enlist for service in the Army. It is rather discouraging, is it not? The reason is, Mr. President, that everybody knows that there is not any real occasion for enlistment.

PEOPLE NOT DECEIVED.

If all these evidences of apprehension of danger put up in the artificial parades that have been staged over this country had any foundation in fact, you would not have any trouble to enlist men. Should some real trouble come upon this country men would stand out in line at every recruiting station in every State, from ocean to ocean, for the privilege to enroll themselves to go to their country's defense. Do not be misled, fellow Senators, by this noise about danger to our country.

The mass of the people of this country have not been convinced by the false alarm. Congress has been moved by it. The administration has been moved by it. The real sentiment of the people as a whole has not been rightly estimated. In the agricultural districts where the day is spent by the farmer following his plow or his harvester, mixing his thinking with his work, in the quiet and hush of country life, where the blast of the bugle and the roll of the drum has not disturbed the serenity there is a wiser judgment, a truer test. In the shops and factories and mines men who understand the part they play in war, ever ready to respond to the call of genuine patriotism, are much too wise and intelligent to be deceived by a counterfeit call to serve selfish interests.

I confess that I do not think any man can quite be indifferent to the sight and sound of a vast concourse of people following the Stars and Stripes, keeping step to the rhythm of music. He is thrilled by it; he should be, but he should not forget to think.

It was not so long ago, Mr. President, that the great political parties of this country uniformed their voters and they marched by the hundreds of thousands in torchlight parades. Why? They sought to get the emotional effect of a moving display upon the voter.

Mr. President, that came out of the war; but when the new economic issues—grappling with the trusts, dealing with transportation, those problems that followed the settlement of the differences that had arisen in that unhappy strife known as the Civil War—began to take the stage there was no longer any place, sir, for the torchlight parade. Men were thinking.

A false military situation has been seized upon to produce the same effect upon the voters of the country that the old torchlight campaign procession produced upon the voters of that time.

HOW MICHIGAN ANSWERED.

The Senator from Michigan [Mr. TOWNSEND], coming in a moment ago to his seat, reminded me of the fact that when that State, bordering on the Great Lakes, midway between the two oceans—a pretty fair barometer of the northern section of this country, I should say—had a chance to express itself upon this condition of things, what did it do? Overwhelmingly and almost on the instant it rose up and repudiated this war business by giving its vote to Henry Ford, who in these times has the courage to stand against the jeers of the unthinking and the denunciation of his own class, who want war at any cost.

Mr. VARDAMAN. And never in politics.

Mr. LA FOLLETTE. And never in politics—a man who said he was not a candidate. It was an expression of the pent-up feelings of the people of a State, a measure of its average sentiment. Michigan is largely agricultural, but it has some manufacturing; it has some munition plants not engaged in making arms and ammunition. It is getting some profits out of this war, and yet a wave of protest against this thing you are about to do in this bill swept that State and carried it against a favorite son—a respected Member of this body.

It is very significant, Mr. President, and it was noticeable in the presidential primary; wherever there was opportunity for clean-cut expression on this issue it broke loose and asserted itself in condemnation of all this great war preparation.

KANSAS WAS UNMOVED.

When the President of the United States was swinging around the circle, as they called it, his itinerary took him to the city of Topeka, Kans. I think it was one of the last dates that he filled on that trip, perhaps the last. His meeting was, we will say, at 4 o'clock in the afternoon, in what is known as the Auditorium. There was a farmers' convention assembled there that day. Two thousand five hundred prominent farmers from every section of that State sat in that convention transacting the business of the hour. Four o'clock came. The presiding officer rose in his place and said:

Members of this organization, I have been notified that at this hour the President of the United States is to speak from this platform. We must conclude our session.

An adjournment was taken. They had pretty good seats, and they held them. The doors were opened and the Auditorium filled up. The President and his party came in and he spoke from that platform, and I suppose he made much the same kind of a speech that he had been making at other places. He was out for that purpose, and it was an appeal for support for this kind of a program. The man who presided at that meeting before the presidential party arrived sat on the platform. He is a supporter of the President. Shortly after that meeting he told me in the Marble Room that he watched that farmer audience in the body of that Auditorium, and that there were just three hands given in applause to the President, and that was when he uttered some general patriotic sentiment. He told me that otherwise those men gave no approval to anything that the President said in support of a great military program.

Now, that is a fact, Senators. It is reported to me in a way I know to be true. The very next day that organization went on record unanimously with a resolution condemning the program the President had put forth.

NORTHWESTERN FARMERS EXPRESS REAL ATTITUDE OF THE PEOPLE.

I think I mentioned it once before here, but it will bear repetition at this time. On the 9th day of last December I spoke to seven or eight thousand farmers in an auditorium in the great city of St. Paul. Those farmers came from North Dakota, South Dakota, Montana, northern Iowa, northern Wisconsin, and Minnesota. They were there for the purpose of breaking, in so far as they could break, the power—a part of this same power I have been talking about—that controls the prices of their grain, that controls the grading of their grain, that robs them upon weight, that robs them upon inspection, and cheats them upon the selling price of the day. Those farmers were there to lay the corner stone of an elevator to be built by themselves, costing some $500,000. They had been organized largely through the efforts of one of the most remarkable men I have ever met.

I know the Senate will pardon me if I pause for just a moment to say that that man who day before yesterday passed out of this life in the very middle of a career of wonderful usefulness was George S. Loftus. He had traversed those States back and forth, up and down, appealing to those men to rear that structure and through cooperative organization to market directly the products of their farms. He had felt the power of combination in his business. He was buying the grain of the farmers in competition. He had orders to pay dictated prices. He fought. The banks took his credit away from him. Then that man went out and gave his life to the building up of an organization to break that power. He was one of the bravest spirits I have ever known.

I spoke to that audience on the 9th of December. The President had just delivered his message here to Congress in joint session, and he had changed from the position he had taken in the other message, when he said he would not see this country made an armed camp. A resolution was passed through that farmers' body unanimously disapproving of the message so far as it related to a great military program.

CHANGING THE DESTINY OF OUR COUNTRY.

Mr. President, this debate, the action of this body, is a turning point in the life of this Republic. Enlist, enroll yourselves under the banners of the munition makers and financial organizations that want great armies, commit yourselves to putting into the waters of our seaboards a Navy to match England, and forever and forever, unless there be revolt, you have changed the destiny of this country.

Mr. President, may I remind you that when I was diverted I was reading from Dr. Howe's book of the transactions and the financial operations of the organized money power? I have given you his statement of the enhanced value of the stocks and his views on this question of our Nation devoting itself to preparation for an invasion of which there is no possibility. Continuing, he says:

The fact that Europe is prostrate, with an indebtedness fast approaching $75,000,000,000, that from 8,000,000 to 10,000,000 people have been killed or incapacitated, that the end of the war seems as far off as ever, and that all Europe is so sick of war that a revolution would probably be the result of further aggression, is only another reason for still further preparedness.

No device of the munition makers of Europe for awakening fear, in the promotion of war scares, in the agitation to "scrap" existing armaments, in the lobbies and press control is wanting in the campaign that has been systematically carried on for the last few months. Every attack on the alleged weakness of the Army and Navy can be duplicated in the disclosures of the tactics of the war traders of England and Germany. Line by line and paragraph by paragraph, the stories of the Krupps and Maxims, the shipbuilders and the munition makers of Germany, England, and France, have been copied by our scare makers. The bankers and the munition makers augment the hue and cry. Only a handful of Congressmen have exposed the activities of the munition makers and their practices in this and other countries; they have shown the international monopoly which exists, the colossal profits enjoyed, and the gains to be expected from the thousands of millions to be spent on the Army and Navy program of the next few years.

Is the preparedness urged by the merger of high finance and the munition makers only another device of the privileged interests to secure an indorsement by the Government on the back of one billion of paper securities by providing war orders for the munition plants after the war?

THE BIRTH OF FINANCIAL IMPERIALISM.

I can remember, Senators, when I was in public life before I came to the Senate, that whenever there was a proposed subsidy for promoting our shipping interests we were told it would develop our commerce. The slogan then was that trade follows the flag. That has been reversed. Now the flag follows investments; the flag of the country takes with it the man-of-war.

To proceed:

The second element in the program is the organization of forces for the promotion of over-seas finance under the guise of promotion of trade. The first expression of the movement is the organization of a gigantic $50,000,000 international corporation—

You have noticed it, have you not?—

organized and financed by interests closely identified with the munition firms and the financing of the present war. This organization, as its promoters announced, is for the purpose of enabling the United States to take a larger part than heretofore in the industrial development of other countries where capital is needed.

Do you know why you have this scheme for a big Army and a big Navy here?

Such countries are certainly not Great Britain, France, and Germany.

We do not need a big Army to take care of our investments in those countries or in any of the great investing nations of Europe.

The countries where "capital is needed" are the weak and helpless peoples of Mexico, Central and South America, of Morocco, Tunis, Persia, Africa, China, and the insular possessions of the United States, and elsewhere.

Now, quoting from this announcement that foretells the organization of this big $50,000,000 scheme to push investments and trade and business in all the countries where capital is needed, occurs this:

Wealth is accumulating so rapidly that a portion of it can be spared for investment abroad. The experience which our people have had in large-scale production and in expensive construction work has especially fitted us to carry on development work in other countries.

Now, the author sums up the operations of some of these wealthy organizations of Europe. He says:

Surplus wealth lured Great Britain into Egypt. The English financiers—

Now, this is just a short condensed statement of it, but the facts are given in a chapter of this book—

The English financiers made a loan to the Khedive in 1873 of $410,000,000.

Now, put those figures down somewhere.

They gave the Khedive $105,000,000 "and kept $305,000,000 as security."

Surplus wealth bankrupted that country; it destroyed the Egyptian independence; it was followed by intervention and the bombardment of Alexandria to protect the loan.

That is history. There is no questioning it.

This was the beginning of financial imperialism 34 years ago.

STORY OF MOROCCO.

I wonder if Senators would like the details of that affair. I can give it to them from any one of these authorities.

Surplus wealth led France into Morocco. In six years' time the indebtedness of the Sultan to the European financiers was increased from $4,000,000 to $32,500,000. The Sultan received but a small part of the loan. He went bankrupt. He could only pay the interest by wringing it from the wretched natives, who finally revolted. France intervened at the demand of the bankers. Thousands of Moors were slain. Germany sent a gunboat to protest. Europe was on the verge of war in 1911 as the result of this conflict. The Morocco incident is one of the hidden causes of the present European war.

In 1904, it will be remembered by Senators who followed that affair, France and England consummated a treaty, certain sections of which were kept secret. Those sections deprived the Moroccan Government of its sovereignty. That was not known until 1911. It concerned Germany. German citizens had invested heavily in iron properties in Morocco. Germany needed the raw material. She was not concerned about any treaty made by France and Great Britain with Morocco so long as it did not contain provisions which might subject her to exacting conditions that would impair the value of her investments. When these secret provisions, with which all the literature upon this subject teems, became known it was the occasion of that famous declaration that a policy had been entered into of "hemming Germany in," of shutting her out from the possible development of her industries by preventing her from getting the ore with which to keep them running. The Atlantic Monthly, the World's Work, and the leading serious journals of the country have carried articles written by able publicists of England, loyal to their country, but denouncing that secret treaty and pointing to it as the great underlying thing that has brought on the present war. Little things sometimes are productive of tremendous consequences; but that was not such a little thing.

I understand Germany, if confined to her own territory, so far as the known deposits of iron ore in Germany are concerned, can only account for the operation of her iron industries for a very limited period of time. Therefore, unless she secures raw material she must shrivel up industrially, her people must be driven to the wall, all of the great industrial establishments which she has built up must crumble to nothingness. So some years ago she began casting about for some place to supply herself with iron ore, and among others a number of her leading iron masters made extensive investments in the Moroccan iron fields. All they needed was just an equal chance with other investors, untrammeled by her industrial and commercial rivals.

I have no doubt, Mr. President, that a profound study of this subject will make the issues growing out of the affair loom large as an underlying cause of the break when it came.

GERMANY LURED TO TURKEY.

The author continues:

Surplus capital lured Germany into Turkey. There were railroads, mines, docks, harbors, and trading concessions awaiting to be exploited. Banks earned $25,000,000 in commissions in building the Bagdad Railway, and, besides, saved $45,000,000 more in the cost of construction—

An entire chapter is devoted here to a detailed history of Germany and the Bagdad Railway, and one or two volumes have been written upon that subject alone—

all of which was charged to the Turkish Government. The banker was followed by the Kaiser and his armies. Turkey has lost her independence; the Balkan States have been embroiled, and Europe is now warring over the conflicting interests of England, Germany, and Russia in Turkey.

SIX-POWER LOAN TO CHINA.

Surplus capital negotiated the six-power loan to China. The loan was accompanied by demands by the bankers for control of the internal administration and revenue system of China. It struck at her very life, and China declined the terms. President Wilson lifted American diplomacy into its proper place when he refused to give his sanction to the participation of American bankers in the loan. He ended dollar diplomacy so far as we are concerned; but the same bankers are now loudly clamoring for a return to the dollar diplomacy of a former administration.

And I regret to say, Mr. President, that I saw only a week or 10 days ago the statement that the President's attitude had changed with regard to this Chinese matter and that there was to be a change of policy in the State Department. There was a paragraph or so of ridicule of Bryan's policy against the exploiting of the weak Governments of the world through the agency of the diplomatic arm of the Government. I do not know that there is any warrant for that article, and I trust there is not; but for a day or two it was quite prominent in the papers.

Says Dr. Howe—

"Surplus wealth" aided in strangling Persia. It ended the independence of Tunis. The Italian war against Tripoli had its motive, in part at least, in the speculations of the Bank of Rome.

"Surplus wealth" for foreign investment drained France of capital needed for internal development. It weakened her in her war with Germany.

It was "surplus wealth" invested in South Africa that brought on the Boer War. "Surplus wealth" led to the spoliation of Mexico, the taking of her lands, mines, oil wells, and the richest portions of the country.

Dollar diplomacy, navalism, and the exploitation of weaker peoples, ending finally in the European cataclysm, have gone hand in hand during the last 20 years. The darkest pages of this story will never be written, for the records lie buried in the graves of weak and defenseless people in every part of Africa, in Asia, in Turkey, Persia, Asia Minor, and the Balkans; it is a story that would have been written in the subjugation of Mexico, in Central and South America, had not the Monroe doctrine intervened.

We should be slow to accept the statement that this is a movement for the promotion of foreign trade, as the organizers of these corporations declare, and as patriotic business men have been led to believe. As has been seen, none of the countries of Europe have materially advanced their trade and commerce by the organization of banking institutions for that alleged purpose.

Rather the foreign banking agencies of the great powers are engaged, almost to the exclusion of everything else, in obtaining concessions, building railroads, securing mining land and oil grants, in the making of loans to weaker powers, and in cooperating in the sale of munitions. And an examination of the interests of the banking institutions that are promoting the new corporations shows that their relations are not in the field of manufacturing, trade, and commerce at all. They are in the fields of monopoly, finance, and speculation.

WE FOLLOW EUROPEAN METHODS.

I shall read another page or two, including this paragraph, on this subject:

As happened in Europe, it is necessary to give a patriotic sanction to financial imperialism to identify the Nation with its program. Wall Street can easily finance a dozen $50,000,000 corporations. But that would leave them Wall Street corporations. The flag would not willingly follow the investments: the Nation would not be a complacent collection agency for such questionable claimants, so the new international corporation is to include as many other interests as possible. Such strength is needed, the announcement says, as can only be found by arousing the interest and securing the cooperation of the entire country. It is necessary to make it a national undertaking and appeal to the confidence, enterprise, and patriotism of the American people.

No element is lacking in this new imperialism of finance, which, under the glamour of patriotism, aims to exalt America to the dignity of Great Britain, Germany, Russia, and France as a "world power." Line by line the history of the exploitation of defenseless people is foreshadowed in the program that privilege would have us enter upon. High finance, the making of munitions and colossal profits, over-seas exploitation, dollar diplomacy, and the great Navy ready and willing to demand the open or the closed door as the immediate advantage may dictate, these are the elements of financial imperialism that have brought Europe to its present end. The logic is inexorable, the results are inevitable. Every nation of Europe that armed for defense has used its preparation for offense. The record of "Preparedness for defense" is written all over the map of Africa, it is written in Turkey, Asia Minor, Persia, Manchuria, and China. It is written in the blood of millions of men in the present European war.

Only the chance election of a President might determine the uses as to which this preparedness would be put, with the power of high finance, the control of the press, and the invisible powers of privilege ready at a moment's notice to urge the unleashing of guns in the name of "dignity" and "national honor." This is the program of preparedness offered by those who have monoplized the railroads and public-service corporations, who have seized the iron ore, coal and copper deposits of the Nation, who have inclosed the public domain and laid their hands upon the banks and credit resources of the Nation, and who, having exploited prostrate America, are now turning wistful eyes to the virgin opportunities of weak and defenseless peoples in other parts of the world.

It is these that are most active in urging a colossal naval program and a large standing Army. They assail the President and Congress for the inadequacy of their defense program, and attack any one as unpatriotic who questions their demands. Yet these same classes are unwilling to bear their share of the cost of preparedness; they cry confiscation when taxes are suggested on the things they own no heavier than England and Germany were carrying in times of peace. They suggest that the cost should be borne by a higher tariff and by indirect taxes on the things the people consume. They even meet proposals for the manufacture of armor plate by the Government by the threat that they will increase the cost of that commodity by $200 a ton. This is the answer of privilege to the demand that preparations for war should involve equal sacrifice

Democracy has a right to insist that preparedness is not merely a demand for private profit; that an increased Navy is not designed as an agency for the promotion of over-seas finance, and that militarism shall not be the grave of the things we hold most dear.

Mr. LEWIS. Mr. President, may I ask the Senator whose book that is? I did not hear the author's name.

Mr. LA FOLLETTE. Dr. Frederick C. Howe, the author of "Socialized Germany," "European Cities at Work," "The Modern City and Its Problems," "Privilege and Democracy in America," and so forth.

OUR NAVY SHOULD NOT BE USED TO INTIMIDATE WEAKER COUNTRIES.

Mr. President, my amendment proposes to restrict the Navy of the United States, in so far as the new ships to be constructed under this bill are concerned, from being used to collect the debts of speculative investors in Mexico and in Central and South American countries. The great influence in this country which has sought for four years to bring on war between this country and Mexico has been the financial interests in the United States which have made investments in Mexico. All of the nagging on this floor, all of the nagging of the administration in the press of the country, all of the derision and ridicule of a "sickly, attenuated, anemic Mexican policy" has been instigated by the interests that have their investments in Mexico but who live in this country. That is the fact about it. They want war with Mexico for financial reasons—for profit—and the amendment which I have pending before the Senate is to put a stop to that thing. It is to write on the records of this Congress that the battleships for which we make appropriations, taxing the American people, shall not be used for financial adventurers who go into the weaker countries of this hemisphere to exploit them.

Back of all modern war is practically the one policy, financial imperialism—the scheme of using the surplus wealth wrung unlawfully from the people of the country by the financial interests that dominate that country, the use of that surplus wealth through investments in the weaker undeveloped Governments of the world—lies back of this great military program, not only in this country but in the other countries of the world. It is behind the present war in Europe; it is the underlying cause of that which has converted almost all of Europe into a human slaughter pen. And I stop just a moment to remind Senators on this floor who are eager for intervention and war with Mexico that England entered upon the conquering of the Transvaal with the assurance of the military party of Great Britain that it would not take six months, that it would cost but $50,000,000, that the armies of Great Britain would eat their Christmas turkey in Pretoria if they were only given orders to march.

WHAT WAR WITH MEXICO WOULD MEAN.

Let the people of the United States who want war with Mexico consider the striking parallel as made by Norman Angel: The people of Mexico inhabit a mountainous country; the Boers live in much such a country as that. The people of Mexico are the best horsemen on this hemisphere. They may not be the best shots, but they are the best horsemen. There are 15,000,000 of them; I think there were about 400,000 of the Boers. England undertook to subjugate the Boers and to conquer the Transvaal. The military party in England stated that it would cost $50,000,000 and take a few months; it cost $1,250,000,000; it took four years; it took 400,000 soldiers; and then, Mr. President, they discovered that they had "conquered"—that they had conquered the Transvaal, but had not conquered the Boers. They found that the only way to keep the Transvaal "conquered" was to maintain a standing army of 500,000 English soldiers there all the while; and Great Britain gave it up.

What did they do? They established a sort of colonial government that enabled the Boers to govern themselves, nominally under the foreign office of the British Empire, but the man who had led the forces of the Boers in the field against Great Britain was put at the head of that government. There were some English officials retained there, but they did not last very long. The Boer head of the government arrested every Englishman connected with the government, loaded them onto a train one midnight, and shipped them to England, with orders that they should be deposited on the sidewalk in London. That was done. Parliament ordered an investigation, and the foreign secretary was called before Parliament and questioned. He was asked as to what had become of all the expenditure of money, all the sacrifice of life to conquer the Transvaal. The foreign secretary replied it was found that they could not keep the Transvaal conquered without maintaining perpetually a standing army there, and that therefore it had been considered wise to give them a form of self-government and to put the general who had been commander of all the Boer forces against Great Britain at the head of that government. He advised that they had better accept the situation just as it was, unless they wanted to start another affair with the Transvaal. And Great Britain accepted it.

COST AND RETURNS OF THE BOER WAR.

The Boer War, which lasted three years, cost Great Britain £250,000,000.

And it did not accomplish anything. I should like the Senate to keep that in mind when some of the gentlemen who are speaking for American investments in Mexico want to prevail upon you to vote for war with Mexico. There is a momentous lesson in the events of the past few days—the efforts of the representatives of two nations to arrive at an understanding and avert the consequences of war. But if there should come some flaming up of passions, if there should come some opportunity for the representatives of those who have bought Mexico with American money and want to rule it—want intervention, then I should like to have in the minds of the Senate this little hasty sketch of what happened to England in an effort to subjugate the Boers.

If you ever enter upon the conquest of Mexico—and the office of prophecy is a somewhat hazardous one—but let me say that in a hundred years you will not conquer Mexico; that you will maintain for a hundred years a standing army of a million men in Mexico; that you will place the burden of that on the American people. If the time ever comes when you shall attempt to invade Mexico, it will be because American capital has gone down there and invested. No other fair reason can be given.

MEXICANS HAVE RIGHT TO THE KIND OF GOVERNMENT THEY WANT.

So far as preserving order is concerned, you can patrol the border, you can keep an army there, with soldiers to cover every foot of it better and at a cost far less than you can carry on a war with Mexico. Such a war would last beyond the life of everybody now living. The Mexican people will fight to the last man for their rights, as they see them. They may not be their rights just as we see them; they may not have the kind of government which we think they ought to have; but it is their country and it is their government, and the intrusion of American capitalists in it for the purpose of making money does not give us any right to go in there and change the form of their government. It may be the kind of government best suited to people of that type.

Mr. LEWIS. I only have one question, and it is very brief. I understand from the Senator's observations that he approves of the policy of President Wilson in not entering upon a course of military intervention in Mexico under the circumstances?

Mr. LA FOLLETTE. I do, Mr. President; I do, most emphatically. I sincerely hope that the standard bearer of the Republican Party in this campaign will not feel himself constrained and will not under any circumstances take the position that it is the duty of this Government to put the flag of the United States behind the investment of speculators in Mexico or elsewhere.

Mr. Wilson declared in his speech at Detroit that he would not stand for that policy, that he would not become the collecting agent of investors in Mexico. The American people, if that issue is made between the Republican candidate for the Presidency and President Wilson will, in my opinion, overwhelmingly stand with President Wilson on that issue.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Nebraska?

Mr. LA FOLLETTE. Yes.

Mr. NORRIS. I should like to ask the Senator, in connection with his idea that the Army should not be used in Mexico for the benefit of speculators, whether he believes that the Army or the Navy of the United States should be used in Mexico for the purpose of having some discredited bandit salute the American flag?

Mr. LA FOLLETTE. No; most emphatically not; and, Mr. President, I was one of a very limited number of Senators who voted against indorsing President Wilson when he ordered the troops to Vera Cruz. I could not bring myself to do it. I did not believe it was warranted. I am satisfied in my own mind that the matter of the salute to the American flag had nothing to do with the ordering of the troops to Vera Cruz. Why, Mr. President, Mexico at that time offered to fire a salute to the American flag. I recall the speech of former Senator Root upon that subject on the night we were considering that resolution, when he said that the difference between firing a salute of 5 guns, which Huerta offered, and 17 guns, which we demanded, would not warrant the shedding of a drop of blood or the invasion of the territory of another country.

Mr. President, I do not believe that was the issue at all. I believe that the real issue at that time was a desire to keep out a German vessel loaded with munitions of war for the Huerta government. I believe that was behind the putting of the troops of this country into Vera Cruz; and I believe that there was a misconception of what could be accomplished by it, and of the responsibilities that went with the action. I believe that there was a sort of feeling that this Government could take charge of the customhouse, and stop the landing of those munitions of war, and not violate the sovereignty of Mexico.

THE FLAG MUST NOT FOLLOW THE DOLLAR.

Mr. GALLINGER. Mr. President, will the Senator permit a question?

Mr. LA FOLLETTE. Oh, yes.

Mr. GALLINGER. I note the attitude that the Senator takes in reference to the obligations that Mexico may be called upon to meet at some time on the part of Americans who have invested their money in Mexico. I shall not controvert that; but I will ask the Senator if he does not think that at some time, in some way, Mexico may well be called upon to make reparation for the 300 or more American citizens that have been murdered in that country?

Mr. LA FOLLETTE. Mr. President, I expect to come to that a little bit later, but I might as well say right now that I think the people who have gone into Mexico have gone there to make money, to make big money. They have gone there to speculate.

Mr. GALLINGER. Some of them have gone there to work.

Mr. LA FOLLETTE. I think they have gone there to speculate. Of course some laboring men may have been lured there by the capitalists, who have gone there to speculate. I do not know about that phase of it; but the primary incentive behind every dollar of American money invested in Mexico is big profits.

Now, Mr. President, it may be a new doctrine to the Senate of the United States, but I think it is pretty nearly time to have the issue made. It may not win in the first struggle here. It will win ultimately, because it is everlastingly right. That is the reason for the amendment I have offered.

I BELIEVE EVERY DOLLAR THAT GOES INTO A FOREIGN COUNTRY AND EVERY MAN WHO GOES INTO A FOREIGN COUNTRY WITH HIS MONEY LOOKING FOR PROFITS SHOULD ACCEPT THE LAWS OF THE COUNTRY AS THE ARBITER TO WHICH HE WILL APPEAL FOR JUSTICE IF HE FEELS AT ANY TIME THAT HE IS REQUIRED TO PROTECT HIS RIGHTS IN THAT COUNTRY.

The thing that attracts capital to Mexico is its rich natural resources. They have an unstable government there. That unstable government lowers the value of property. American money there can buy for $100,000, because of the government conditions, property that is worth a million dollars. Now, if this new doctrine that the flag shall follow the investment of the citizen is to prevail, then our Government is to be called upon to guarantee the speculative investments of its citizens in the countries where the governments are weak, and so to make those speculative investments worth face value.

INTERESTS FOMENT FRICTION BETWEEN MEXICO AND THE UNITED STATES.

The people of the United States do not want war with Mexico. The Mexican people do not want war with us. And both President Wilson and Carranza have manifestly done everything in their power to avert war.

What is it, then, that menaces the peace of these neighboring countries?

It dates far back of the Columbus raid. That outrage upon the residents of one of our border towns was the logical outcome of conditions for which the Mexican people were in nowise responsible. Worse than that! Both Governments were the victims of traitors in our midst. For it is charged upon the highest authority that the raid was inspired and arranged for in our own country.

Do you get the full meaning of that statement? Benedict Arnold was not more guilty of treason.

The secret service of this Government has a long arm and a strong arm. The net may yet be drawn on the "higher ups." It is fair to assume that President Wilson did not disclose all of the facts in his possession when he declared officially a few days after the raid that—

There were persons along the border actively engaged in creating friction between the Government of the United States and the de facto government of Mexico for the purpose of bringing about intervention in the interest of certain owners of Mexican properties.

There you have it! The gentlemen who want war with Mexico are the gentlemen who "have Mexican properties." They are a very powerful lot. They own most of the United States and a good big slice of Mexico. They are our captains of industry; our masters of finance. They own or control our great newspapers. They are for a "strong Mexican policy," a "strong foreign policy," a big army, a big navy.

They prate about "patriotism." They clamor for "preparedness." They have tried to plunge the country into a hysteria of fear that we are going to be thrown into war with Germany or England or Japan. They have Congress "on the run."

These privileged interests are not taxing the people of the United States for their great Army and Navy scheme to fight Germany, England, or Japan. They have other plans for the present. They have the irons on the American people. They control the prices of labor and the products of labor. They control the cost of every necessary of life. They own the coal, the oil, the timber, the water powers. Their profits are so enormous that they must lower interest rates or else invest in foreign countries. The timber, oil, coal, and mineral wealth of Mexico and of the Central and South American countries are most inviting in every way. The Governments are poor; the labor is cheap as slave labor.

There is just one risk, and that is a large risk. The Governments are most of them weak. Revolutions in many of them are frequent; property rights are insecure.

But a scheme has been worked out by the masters of finance to make foreign investments as good as a Government bond. Just put the Stars and Stripes back of them!

We will protect our citizens abroad. Assuredly! That is our bounden duty if we are to uphold the standing and dignity of our Government among the other nations of the world, strong or weak. But if the protection of "citizens" were our only concern there would be no "border raids," no "mobilization," no "war talk." There would be no occasion for the clouds that darken so many American homes to-day. "Investments," in these plutocratic times, are vastly more important than "citizens." And it is not to protect "citizens" but to protect "investments" that our boys in khaki have been forced into action. That is the truth of it.

AMERICAN INVESTORS WORK FOR INTERVENTION.

These American "investors" in Mexico—millionaires—are using every instrument they can control—their money, their newspapers, their magazines, their political influence, all their "dark and devious ways"—to bring about "intervention." Intervention means war. War means blood and killing and bereaved families and unmentionable horrors. And all for what? Profits! Privilege profits!

Privilege exploits us folks here in our own United States. And privilege makes so much money out of us that it creates a huge surplus. Privilege, never satiated, wants this surplus to be at work bringing in still more profits. Weak and undeveloped (and unexploited!) countries offer the biggest returns. So privilege buys a foreign "concession." Cheap! The system looks to that bargain! But to maintain the great profits it is ordinarily necessary to resort to "strong-arm" methods. Sometimes people (like the workers in the mining districts of Colorado, Michigan, and West Virginia) resist oppression and ex-

ploitation. Machine guns become the order of the day. And, after all, our present "Mexican situation" is only a "Ludlow" on a bigger scale. Privilege is to-day trying to shape public sentiment so that "our boys" shall be made to march down into Mexico and offer up their lives for the purpose of placing the guaranty of the United States Government behind the smelters, gold mines, rubber plantations, railways, and other concessions and to make the profits of privilege certain.

CARRANZA'S FAR-SIGHTED PROPOSAL.

Mr. President, we hear a lot of talk about Carranza. Here is what Carranza did within a short time: He sent to South America his former secretary of foreign affairs, Señor Isador Favola, to propose an agreement among the Latin American countries to the effect, generally speaking, that when a citizen or a company or a block of capital of one of these countries shall go to another of them, the citizen, corporation, or property shall not be followed by a man-of-war or an army, but shall pass under the laws and under the conditions of the country he visits, risking his own life, perhaps, and his own property, but not the lives and the property and the peace of his fellow citizens at home. And I understand that when this Latin American agreement is consummated Mr. Carranza, the obstinate, proposes that the United States of North America shall be invited also to join in it.

Sir, as a Senator, I pledge the authenticity of that statement. I received it last night from one who knows, a citizen of this country, who received it from Carranza. There is broad statesmanship for you; there is statesmanship which looks to the preservation of those governments for their own people. Shall the power which has acquired the natural resources of this country—our timber, our oil, our coal, and which is now reaching out for the water powers; shall this power which is connected by a system of cross investments with the power that controls transportation of every nature and kind—traction, shipping, and steam transportation; which is connected and tied up in investment with the power that owns and controls and makes the prices of all the products of the factories and the mines and the smelters; the power that dictates, through its control of the grain markets, the prices which the farmer shall receive for the products of the soil; the power that by its combination can say to labor, "Work at such a price or eat grass," as did the aristocracy just before the French Revolution—shall this power, now that it has exacted its tribute from our people, that can create its wealth without limit, take that which it has wrung from the American people, depleting the capital of this country by that amount, advance interest charges, tighten up credits—shall it take that money, that excess of capital ground out of the helpless, struggling citizenship of this country, down into Mexico and Central and South America, and buy with it the national wealth and resources of those countries?

"Buy," did I say, sir? Volumes of testimony could be spread upon the records of the Senate showing the spurious concessions made to these great interests in Mexico. Under the Diaz government concessions were secured by bribery, concessions were secured by fraud, people with good titles were dispossessed. Ah, sir, unlimited wealth in a weak government is UNLIMITED POWER.

We know what the power of concentrated wealth is in this country, where we boast of our democracy and of the power of the citizen with his ballot to make his Government represent him and his interest. How is it with Mexico and with the Central and South American countries? Oh, sir, it gratified me beyond expression that President Wilson, speaking at Detroit, used these words as reported by the press:

> What makes Mexico suspicious is that she thinks we do not want to serve, but possess her—

President Wilson understands this new doctrine manifestly—

> and she has justification for these suspicions in the way some gentlemen have sought to exploit her possessions. I will not serve these gentlemen, but I will serve all Americans by trying to serve Mexico herself. The way to establish our sovereignty is to respect hers.

Judged from those sentences which fell from the lips of the Chief Magistrate of this country at Detroit only a few days ago, the restraining influence of the amendment which I have offered here will not be necessary; but, Mr. President, times change; conditions change. There is a chance now for this great, free democracy of ours to write into the law a denunciation of the practice that has enabled the rich nations of the Old World to pillage the weak, and which has been back of most of the plans and schemes for big armies, big navies, and big military equipment.

WHO OWNS MEXICO?

Mr. President, I have always been very much interested to know who owns Mexico—really owns it. I have hunted about a good deal to get data on the subject, and have found it exceedingly difficult. Almost always, as it happens, one finds that right at hand he has overlooked something. On the 18th of July, 1912, a consular report was issued upon this subject by Consul Marion Letcher at Chihuahua. He transmitted to the Department of Commerce a table showing the wealth of Mexico according to the nationality of the ownership. This table was prepared, he states, by William H. Seamon, late of Chihuahua, who, according to the statement of the consular report, "has had long experience in Mexico as a mining engineer."

Mr. Letcher is now foreign trade adviser in the Department of State here in Washington. I have not been able to see him myself; but through a friend I had him interrogated about this report, as to whether he had other information that might qualify the data which he had transmitted to the department in this document. He said that while some three or four years had gone by, his increased knowledge upon the subject simply confirmed him as to the accuracy of the report.

Mr. VARDAMAN. Mr. President, will the Senator yield to me for just a moment?

Mr. LA FOLLETTE. Certainly.

Mr. VARDAMAN. In reference to the character of Mr. Letcher, I will state that I have the pleasure of knowing him and have for the last 12 years. He served during the Spanish-American War as the first lieutenant in my company. He is, and was then, a young man of extraordinary accomplishments, and gave promise of great usefulness; and since his connection with the Government in the Consular Service in Mexico he has fulfilled the promises that he made then. I want to bear testimony here to his very splendid work.

Mr. LA FOLLETTE. I am very glad to have that statement from the Senator. The party who saw him at my request returned with an exceedingly favorable impression of him, both as to his intelligence and as to his accuracy of statement.

He says in this report that the several investments which are set forth in detail are given in the following amounts as owned by the people of each of the following countries:

MEXICAN INVESTMENTS IN 1912.

United States	$1,057,770,000
England	321,302,800
France	143,446,000
Other nations	118,535,380
Mexico	793,187,242

In other words, foreign countries have invested in various lines of business—railroads, banks, mines, smelters, national bonds, timberlands, ranches, farms, live stock, houses and personal property, cotton mills, soap factories, tobacco factories, breweries, miscellaneous factories, tramways, power and electric-light plants, stores, wholesale and retail, the oil business, the rubber industry, professional outfits, insurance, theaters, hotels, and institutions—public and semipublic—these various sums.

American financiers have more money invested in Mexico than the Mexicans themselves have—$264,582,758 more.

American investments are biggest of all in that unhappy, system-ridden country.

This American money is found in railroad stocks and bonds, mines, national bonds, ranches, smelters, timberlands, factories, oil, rubber, insurance, and other enterprises.

Let us glance at a few more figures from the same authority:

Railway stocks: Mexican money invested, $125,440,000; American money invested, $235,464,000.

Railway bonds: Mexican money invested, $12,275,000; American money invested, $408,926,000.

Mines: Mexican money invested, $7,500,000; American money invested, $223,000,000.

National bonds: Mexican money invested, $21,000,000; American money invested, $52,000,000.

Smelters: Mexican money invested, $7,200,000; American money invested, $26,500,000.

Timberlands: Mexican money invested, $5,600,000; American money invested, $8,100,000.

Factories (miscellaneous): Mexican money invested, $3,270,200; American money invested, $9,600,000.

Oil: Mexican money invested, $650,000; American money invested, $15,000,000.

Rubber: Mexican money invested, $4,500,000; American money invested, $15,000,000.

Insurance: Mexican money invested, $2,000,000; American money invested, $4,000,000.

In the ownership of Mexico we find the real menace to the peace between Mexico and the United States. American capitalists are desperately attempting to have the flag follow their investments.

They who own Mexico are the ones who want war.

Mr. OVERMAN. Mr. President, it might be interesting to know who are the parties that made these great investments in Mexico, if the Senator has that information.

Mr. LA FOLLETTE. They are not given in this document. But, as therein stated, foreigners, outsiders, aliens, have owned, so far as property and business interests are concerned, about three-fourths of Mexico.

Mr. President, there is something of that sort going on in this country. I understand that foreign concerns are investing in oil lands in this country. I understand that very wealthy foreign organizations are buying up extensively unimproved and improved farm lands throughout the West.

Mr. TILLMAN. The Senator said outsiders "have owned" these interests in Mexico. That is in the past tense. Do they own them now?

ALIEN INVESTMENTS SHOULD BE MADE UNDER THE LAWS OF THE COUNTRY.

Mr. LA FOLLETTE. Yes; they profess to "own" them now. But I believe that every country should enforce this rule against any alien who comes into that country to invest in business, that such investment must be under the laws of the country, subject to the same conditions that apply to the natives of the country in the protection of their property and the enforcement of their rights.

The interests of this country are confronted with the alternative of loaning their surplus wealth to the farmer, to the merchant, to the small enterprise at a constantly lowering interest rate or of withdrawing the surplus capital from this country, keeping interest rates high here and going down into the weak Governments of Mexico, Central and South America, which are rich in natural resources, minerals, oil, timber, coal, and iron, surpassing all imagination, we are told, and acquiring control there.

As a protest against the use of our Navy to enforce the claims of these interests, I have offered the following amendment:

Provided, That no battleship, cruiser, scout cruiser, torpedo-boat destroyer, or submarine herein appropriated for shall be employed in any manner to coerce or compel the collection of any pecuniary claim of any kind, class, or nature, or to enforce any claim or right to any grant or concession for or on behalf of any private citizen, copartnership, or corporation of the United States against the Government of Mexico or of any Central or South American Government.

I concede the right of the owner to invest his capital where he pleases. But I say now that either at this time or in the near future this Government will be called upon to declare a policy against using the State Department and the military arm of the Government to collect private claims for gentlemen seeking large profits in foreign countries. I say that the present policy is an everlasting wrong. When the people once understand its significance, they will thunder at the doors of the Capitol of this country to reverse the policy of Congress upon that subject.

When our capitalists withdraw their money from this country to stake it on the turn of fortune's wheel in some foreign land, let them take the gambler's chance.

If money is to be spent to make their foreign risks secure, let it be their own money.

If lives are to be risked to protect their Mexican mines—their Central and South American concessions—let it be their own lives that take the hazard.

Believing in democracy, in the right of self-government—ready to defend the precious heritage of our own sovereignty—let us here and now resolve and declare that we will never permit the armed forces of the United States to be used to despoil our sister republics of their property, interfere with their right to govern themselves according to their own standards, or violate their sovereignty—as sacred to them as American sovereignty is to us.

During the delivery of Mr. LA FOLLETTE'S speech,

Mr. CLAPP. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Minnesota?

Mr. LA FOLLETTE. Yes.

Mr. CLAPP. Before the Senator takes up that phase of the question, I desire to suggest the want of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Dillingham	La Follette	Oliver
Bankhead	du Pont	Lane	Overman
Beckham	Gallinger	Lee, Md.	Page
Brandegee	Gronna	Lewis	Penrose
Chamberlain	Hardwick	Lippitt	Phelan
Chilton	Husting	Lodge	Pittman
Clapp	James	Martin, Va.	Poindexter
Clark, Wyo.	Johnson, S. Dak.	Martine, N. J.	Pomerene
Culberson	Jones	Newlands	Ransdell
Cummins	Kenyon	Norris	Robinson
Shafroth	Smith, Ga.	Taggart	Warren
Sheppard	Smith, Md.	Thomas	Williams
Sherman	Smith, S. C.	Tillman	
Shields	Stone	Townsend	
Smith, Ariz.	Swanson	Vardaman	

The PRESIDING OFFICER. Fifty-seven Senators having answered to their names, there is a quorum present.

Mr. NORRIS. Mr. President, I think the Senator from Wisconsin has not yet concluded his remarks. I expect to offer a substitute for this amendment before it is voted on, and I would just as lief state it now, to take up the time in the absence of the Senator from Wisconsin.

I feel in entire sympathy with the object which the Senator from Wisconsin has in mind in offering this amendment; and I think, as it has been modified by the two amendments that have been agreed to, that it has been improved. At the same time, it seems to me that if we adopt any procedure by which the Navy and the Army are limited in the collection of debts or claims, there ought to be some provision similar to the one that was included in the amendment that the Senator from Wisconsin gave notice that he would offer.

I can see that there might be conditions and circumstances under which the present amendment, if applied to all the Navy and the Army—and it ought to be applied to all the Navy and the Army, really, if it is a good thing—might work a hardship; and I wish to state to the Senate that before the vote is taken I am going to offer, as a substitute for the pending amendment, the amendment that the Senator from Wisconsin gave notice he would offer.

As the Senator from Wisconsin is here now, I will not take it up at the present time.

After the conclusion of Mr. LA FOLLETTE'S speech,

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from Wisconsin.

Mr. SWANSON. I ask for the yeas and nays.

Mr. LEWIS rose.

Mr. NORRIS. Does the Senator from Illinois desire to address the Senate?

Mr. LEWIS. Had the Senator from Nebraska intended to offer an amendment?

Mr. NORRIS. I intend to offer a substitute and I would just as lief offer it now unless the Senator prefers that I should withhold it.

Mr. LEWIS. If the Senator will offer his substitute, I will then see if it meets the views I expect to express.

Mr. NORRIS. I offer as a substitute the proviso which I send to the desk.

The VICE PRESIDENT. It will be read.

The SECRETARY. As a substitute for the amendment offered by the Senator from Wisconsin insert the following:

Provided, That the Army and Navy of the United States shall not be used to coerce or compel the collection of any pecuniary claim of any kind, class, or nature, or to enforce any claim of right to any grant or concession for or on behalf of any private citizen, copartnership, or corporation of the United States against any foreign Government with which this Government is at peace until said citizen, copartnership, or corporation shall have exhausted his legal remedies in the courts of the foreign Government or if a denial of justice after the exhaustion of such legal remedies being alleged the foreign Government shall decline an offer on the part of the Government of the United States to submit the case to arbitration.

Mr. SWANSON. I raise a point of order against that amendment, that it is general legislation.

The VICE PRESIDENT. The Chair sustains the point of order.

Mr. NORRIS. Mr. President, since the Senator from Virginia has made a point of order I will be compelled to modify the amendment somewhat. I will offer it in a form in which it is not subject to a point of order, but, of course, it can not apply, as I think it ought to apply, to all the Navy. One of the objections to the amendment offered by the Senator from Wisconsin is that he has been compelled to have it apply only to the vessels appropriated for in this bill. That, of course, puts a part of the Navy under a different rule from that which applies to the balance of it, and it is to that extent inconsistent. But I concede that the point of order under the rule ought to be sustained, and that the Chair was correct in his ruling. I now offer the following amendment, which is not subject to the point of order.

The VICE PRESIDENT. It will be read.

The SECRETARY. As a substitute for the amendment offered by the Senator from Wisconsin insert the following:

Provided, That none of the naval vessels herein appropriated for shall be used to coerce or compel the collection of any pecuniary claim of any kind, class, or nature, or to enforce any claim of right to any grant or concession for or on behalf of any private citizen, copartnership, or corporation of the United States against any foreign Government with which this Government is at peace until said citizen, copartnership, or corporation shall have exhausted his legal remedies

in the courts of the foreign Government or if a denial of justice after the exhaustion of such legal remedies being alleged the foreign Government shall decline an offer on the part of the Government of the United States to submit the case to arbitration.

Mr. LEWIS. Mr. President, I have a few words to submit, and they are to be submitted in the short space of time before the hour of 6.30 arrives. Unless some other Senator entertains the Senate, there will be sufficient time at the end of what I shall say for the opportunity of a roll call.

Mr. President, I should like to call the attention of the Democrats on this side of the Chamber, first, that if this amendment of the able Senator from Wisconsin prevails you will write yourself down as having impeached the conduct of your own administration in the affairs of Nicaragua, Santo Domingo, and Haiti, and you, Senators on the Republican side, will have written a judgment against that of the preceding administration.

There was no craftier scheme of politics I ever saw devised than this artful amendment of my distinguished friend the Senator from Wisconsin. There is no impeachment of any acts of administration that has been so cleverly concealed as that which lies in this amendment.

On its face it indicts the administration for the use of any ships which have heretofore been used where marines have been landed for the purpose of preserving peace in any of the Central American countries, and wherever the power has been used to enforce the honest collection of indebtedness in the full fulfillment of the faith we owed other Governments who themselves or their subjects were the creditors.

I listened to the very able speech of one for whom I have had admiration for years, and, so far as the speech of the able Senator from Wisconsin relates to the Navy, there is much to be said in justification of his views if the premises laid down by him are conceded; that is, that there is no justification or reason in any existing facts for the increase of the Navy. On that subject I do not intend to enter.

The very long speech and very able speech of my able friend brought to my mind the observation that when Lord Bailey in Geneva had observed the third volume of Gibbon's Rome he sent a message back to England which said, "Gibbon has written another damned fat book." My very eminent friend from Wisconsin has made another very fat speech. It is not dammed; it flows with ease, bearing with it much volume.

But if it was addressed, if I am not in error, to that which I now charge and say to the able Senator that if this amendment should prevail the Monroe doctrine must die; if this amendment prevails, war is inevitable to the United States; if this amendment prevails, the United States must either surrender all pretenses to executing the Monroe doctrine on the one hand or observing the concentrated and combined creditors of the world seeking to collect their own debts where we would not aid in enforcing honest obligations. They will be present in Central and South America in their combined forces in order to enforce their claims. We would have to declare war then to vindicate the Monroe doctrine and prevent foreign Governments from having a foothold by seizure of land for the collection of debts in America.

Mr. LA FOLLETTE. Mr. President——

The VICE PRESIDENT. Does the Senator from Illinois yield?

Mr. LEWIS. I yield to the Senator from Wisconsin.

Mr. LA FOLLETTE. The Senator, I am certain, has not read the amendment. I neglected to read it to the Senate myself, and it has not been printed and laid on the desks, I believe, although it appears in the CONGRESSIONAL RECORD. But when I bring to the Senator's attention the fact that this amendment relates to no investment made by any foreign citizen, syndicate, corporation, or copartnership he will see that the criticism that he is making can not have application. It is limited only to a prohibition against using the vessels provided for by the appropriation in this bill to collect the claims of our own citizens, so that the question of the Monroe doctrine can under no circumstances be raised by my amendment. I think the Senator will agree with me in that when he sees the language of the amendment.

Mr. LEWIS. Mr. President, I should like to see the amendment as changed to ascertain if it is different from the provisions we have discussed. Does the Senator from Wisconsin assume that the amendment is intended to be limited to only the claims of those who are citizens of the United States?

Mr. LA FOLLETTE. I do.

Mr. LEWIS. Then, Mr. President, if the able Senator's contention be that it is limited to that, the provision, as I at first understood it, applying to all parts of the world, has evidently been superseded.

Now, Mr. President, I invite the attention of the able Senator to the fact that if this amendment is the successor of the one tendered, he is now limiting to American citizens. We could not protect our own citizens in their interest in the Panama Railroad or bondholders in the Panama Canal.

Mr. LA FOLLETTE. I do not wish the Senator to misapprehend the matter. This is the amendment which I had printed in the CONGRESSIONAL RECORD and which I gave notice that I would offer, and it is the only amendment which I have offered. I gave notice that I might offer another amendment, broader in its terms than this as to the restrictions made upon the use of the Army and Navy, because this limits the use of only the vessels provided for in this appropriation bill, while the other was broader and applied to the use of the Army and Navy as a whole. It was limited, however, as this is, so that it would only have application to the claims of American citizens and American corporations. I carefully excluded from both amendments the investments of foreign citizens or subjects, because I did not want this issue clouded by any consideration of its interfering with the Monroe doctrine.

Mr. LEWIS. Mr. President, may I ask the Senator from Connecticut if he can recall that this morning, while he was discussing some of the parliamentary phases of the matter, I asked that the amendment be read, and upon being read, I understood that it imposed a prohibition against using the Navy for the enforcement of any claim from any part of the world. Am I wrong as to that?

Mr. BRANDEGEE. Mr. President, I do not think the Senator from Illinois is wrong in understanding that the amendment of the Senator from Wisconsin has been modified by striking out all reference to Mexico and Central and South America. That, I was informed by the Chair, was the fact.

Mr. LA FOLLETTE. But that is not the point.

Mr. BRANDEGEE. No; that is not the point. Of course, I am simply answering the question asked by the Senator from Illinois [Mr. LEWIS], that my present understanding is—and the Chair so stated this morning—that the amendment of the Senator from Wisconsin has been modified by striking out any reference to specific countries. I understood the Senator from Nebraska [Mr. NORRIS] agreed this morning that that was the case. What the fact is, of course, I do not know. The Senator from Wisconsin is the best authority as to his own amendment.

Mr. LA FOLLETTE. I beg pardon. Will the Senator from Connecticut permit me to make a suggestion?

Mr. BRANDEGEE. I yield.

Mr. LA FOLLETTE. If my amendment was modified in that respect, it was by an amendment to the amendment offered by some other Senator. About that I do not know.

Mr. BRANDEGEE. I certainly did not mean that the Senator from Wisconsin modified his own amendment. I was informed by the Chair that it had been modified, and I supposed it had been done by a motion to strike out the reference to Mexico and to Central and South America. I do not know the facts. I am telling the Senator from Illinois what the Chair told me this morning.

Mr. LA FOLLETTE. But even if modified in that respect, in either form, it does not raise the question of the Monroe doctrine, and can not do so.

Mr. BRANDEGEE. I do not see how it relates to what the Senator from Illinois started to say; but I will say, in passing, if I may, that if the effect of this amendment is, as I understand the Senator from Wisconsin now admits it to be, that American naval vessels will be prevented from collecting the claims of American citizens, but will be subject to be called upon to aid in collecting the claims of foreign citizens if it should become America's duty to use them for that purpose——

Mr. LA FOLLETTE. Not in the form in which I offered it, and I do not believe in the form in which it has been modified, if it had been modified at all, because all that has been done with regard to it has been to make it applicable to other countries than those on this hemisphere.

Mr. BRANDEGEE. Mr. President, not having cogitated very deeply upon the amendment, I withdraw from any office that may have been thrust upon me to act as its interpreter. I will let the Secretary read the amendment at the proper time, when we can see how it stands at present, and each Senator can draw his own inference.

Mr. NORRIS. Mr. President, if the Senator from Illinois will allow me——

The VICE PRESIDENT. Does the Senator from Illinois yield to the Senator from Nebraska?

Mr. LEWIS. I yield to the Senator, but I should like to know the parliamentary status of the amendment.

Mr. NORRIS. I offered the amendment to the amendment, which was agreed to. If the Senator will look at the Con-

GRESSIONAL RECORD of July 19, page 11316, near the center of the left-hand column, he will find the amendment printed as the Senator from Wisconsin offered it. I moved to strike out the words "against the Government of Mexico or of any Central or South American Government." That amendment was agreed to.

Another amendment was agreed to this morning, which does not in any sense change the amendment in the respect in which the Senator from Illinois is discussing it; so that as it stands now the amendment reads as follows:

Provided, That no battleship, battle cruiser, scout cruiser, torpedo-boat destroyer, or submarine herein appropriated for shall be employed in any manner to coerce or compel the collection of any pecuniary claim of any kind, class, or nature, of any individual, firm, or corporation, or to enforce any claim of right to any grant or concession for or on behalf of any private citizen, copartnership, or corporation of the United States.

Mr. SWANSON. Mr. President, if the Senator from Illinois will yield, it seems to me that it is evident——

Mr. LEWIS. Of course I yield to the Senator.

Mr. SWANSON. That the amendment is subject to different interpretations and concerning it varying views are held. It materially affects our Navy and is a matter that ought to be disposed of in a different manner than is now proposed. If there is going to be much more debate on it, in view of the fact that it has already been discussed for a considerable length of time, I shall be compelled to move to lay it on the table.

Mr. LA FOLLETTE. I will say to the Senator, Mr. President, that of course he can make that motion, and he can dispose of this amendment in that way, but I have not taken any time upon this bill except upon this amendment; I have discussed it in good faith; I want a vote upon it, and I hope the Senator will give it to me.

Mr. SWANSON. I prefer a vote on it, and I ask for the yeas and nays on the amendment when the question is put.

Mr. NORRIS. Mr. President, I assume the question first comes under the substitute offered by me.

Mr. SWANSON. I presume the Senator from Wisconsin accepts the substitute of the Senator from Nebraska.

Mr. LA FOLLETTE. No; I can not accept the substitute.

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. The Senator from Illinois has the floor. Does he yield to the Senator from Nebraska?

Mr. NORRIS. If the Senator from Illinois has the floor, I do not care to take him off the floor, but I merely desire to take a few moments on the subject.

Mr. LEWIS. I do not wish to interfere with a vote, and, since there seems to be a general misapprehension of the amendment, in view of the changes which have been made, I do not wish to urge observations that may be inapplicable. I do not wish to postpone a vote on the matter, and there seems to be such difference as to the meaning of the amendment that I do not wish to characterize the amendment of the Senator from Wisconsin without further absolute knowledge of its contents—as twice amended. So I yield the floor to the Senator from Nebraska.

Mr. NORRIS. Mr. President, the only modification made by the substitute that I have offered is this: It follows the language of the amendment, and then adds a provision that the person, firm, or corporation must first exhaust his legal rights in the foreign country, and then, if he claims he has not had a fair chance in the courts of that country, he can appeal to the State Department, and the State Department can, if they desire, ask this foreign Government to arbitrate; and if they refuse to arbitrate, then it would be proper for the naval vessels to be used in the enforcement of the debt.

In other words, the amendment offered by the Senator from Wisconsin will limit the use of these vessels in any case. The substitute does not go quite so far. Therefore it seems to me that even though you are opposed to the original amendment offered by the Senator from Wisconsin, believing it to be too stringent, you ought to favor the substitute, because it provides for other methods before the vessels can be used to enforce a debt.

Mr. CLAPP. Mr. President, I can not support the substitute of the Senator from Nebraska, because it recognizes that in the last analysis the Navy may be used to collect private debts. To my mind, I would not exchange the life of one American boy for all the debts, real or fictitious, that can be created through the connivance of officials in other countries. For one, I am opposed to the Government continuing in the collecting business.

The VICE PRESIDENT. The question is on the substitute of the Senator from Nebraska for the amendment of the Senator from Wisconsin.

Mr. NORRIS. On that I ask for the yeas and nays.

The yeas and nays were not ordered.

The substitute was rejected.

The VICE PRESIDENT. The question now recurs on the amendment of the Senator from Wisconsin.

Mr. GRONNA. I suggest the absence of a quorum.

Mr. LA FOLLETTE. I should like the yeas and nays upon the amendment, if I may have them. We have a quorum here. I hope the Senator from North Dakota will withdraw his suggestion. We can tell on the roll call whether we have a quorum or not.

Mr. GRONNA. I withdraw it.

The VICE PRESIDENT. Is the demand for the yeas and nays seconded?

The yeas and nays were ordered.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. JAMES (when his name was called). I have a general pair with the junior Senator from Massachusetts [Mr. WEEKS]. I have been informed that if present he would vote as I shall vote on this question. I therefore feel at liberty to vote. I vote "nay."

Mr. STONE (when his name was called). I transfer the pair I have with the senior Senator from Wyoming [Mr. CLARK] to the senior Senator from Nebraska [Mr. HITCHCOCK] and will vote. I vote "nay."

Mr. THOMAS (when his name was called). In the absence of my pair, the senior Senator from North Dakota [Mr. MCCUMBER], I withhold my vote. I ask to be counted for the purpose of making a quorum.

Mr. TILLMAN (when his name was called). I transfer my pair with the junior Senator from West Virginia [Mr. GOFF] to the senior Senator from Tennessee [Mr. LEA] and will vote. I vote "nay."

Mr. WALSH (when his name was called). I have a general pair with the senior Senator from Rhode Island [Mr. LIPPITT]. Being advised as to how he would vote were he present, I vote notwithstanding his absence. I vote "nay."

The roll call was concluded.

Mr. MYERS. I transfer my pair with the junior Senator from Connecticut [Mr. MCLEAN] to the senior Senator from Texas [Mr. CULBERSON] and will vote. I vote "nay."

Mr. GALLINGER. I have a general pair with the senior Senator from New York [Mr. O'GORMAN]. I transfer that pair to the senior Senator from Utah [Mr. SMOOT] and will vote. I vote "nay."

Mr. DU PONT. I inquire if the junior Senator from Kentucky [Mr. BECKHAM] has voted?

The VICE PRESIDENT. He has not.

Mr. DU PONT. I have a general pair with that Senator, but I am at liberty to vote on this question. I vote "nay."

Mr. PENROSE (after having voted in the negative). I note that the senior Senator from Mississippi [Mr. WILLIAMS] has not voted. I am paired with that Senator. I transfer the pair to the junior Senator from Massachusetts [Mr. WEEKS], who is absent, and will allow my vote to stand.

Mr. REED. I have a pair with the senior Senator from Michigan [Mr. SMITH]; but under the circumstances and after consultation with his colleague I feel that I am relieved from the pair. I therefore vote "nay."

Mr. CHILTON. I transfer my pair with the senior Senator from New Mexico [Mr. FALL] to the junior Senator from New Jersey [Mr. HUGHES] and will vote. I vote "nay."

Mr. WALSH. I announce that the junior Senator from Delaware [Mr. SAULSBURY] is unavoidably absent from the Senate.

Mr. CLAPP (after having voted in the affirmative). Observing the absence of the senior Senator from North Carolina [Mr. SIMMONS], with whom I have a general pair, I feel constrained to withdraw my vote.

Mr. LODGE. My colleague [Mr. WEEKS] is unavoidably absent from the city. If present, he would vote "nay."

Mr. GALLINGER. I have been requested to announce the following pairs:

The Senator from Ohio [Mr. HARDING] with the Senator from Alabama [Mr. UNDERWOOD];

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from New Mexico [Mr. CATRON] with the Senator from Oklahoma [Mr. OWEN];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Maryland [Mr. SMITH];

The Senator from New York [Mr. WADSWORTH] with the Senator from Oklahoma [Mr. GORE];

The Senator from Kansas [Mr. CURTIS] with the Senator from Georgia [Mr. HARDWICK]; and

The Senator from Utah [Mr. SUTHERLAND] with the Senator from Arkansas [Mr. CLARKE].

The result was announced—yeas 8, nays 44, as follows:

YEAS—8.

Chamberlain	Kenyon	Lane	Norris
Gronna	La Follette	Martine, N. J.	Vardaman

NAYS—44.

Ashurst	James	Overman	Shields
Bankhead	Johnson, Me.	Penrose	Smith, Ariz.
Brandegee	Kern	Phelan	Smith, Ga.
Broussard	Lee, Md.	Poindexter	Smith, S. C.
Chilton	Lewis	Pomerene	Stone
Cummins	Lippitt	Ransdell	Swanson
du Pont	Lodge	Reed	Taggart
Fletcher	Martin, Va.	Robinson	Tillman
Gallinger	Myers	Shafroth	Townsend
Hollis	Nelson	Sheppard	Walsh
Husting	Oliver	Sherman	Warren

NOT VOTING—43.

Beckham	Dillingham	McCumber	Smoot
Borah	Fall	McLean	Sterling
Brady	Goff	Newlands	Sutherland
Bryan	Gore	O'Gorman	Thomas
Catron	Harding	Owen	Thompson
Clapp	Hardwick	Page	Underwood
Clark, Wyo.	Hitchcock	Pittman	Wadsworth
Clarke, Ark.	Hughes	Saulsbury	Weeks
Colt	Johnson, S. Dak.	Simmons	Williams
Culberson	Jones	Smith, Md.	Works
Curtis	Lea, Tenn.	Smith, Mich.	

So Mr. LA FOLLETTE'S amendment was rejected.

RECESS.

Mr. SWANSON. I move that the Senate take a recess until 10 o'clock to-morrow morning.

The motion was agreed to; and (at 6 o'clock and 29 minutes p. m., Thursday, July 20, 1916) the Senate took a recess until to-morrow, Friday, July 21, 1916, at 10 o'clock a. m.

SENATE.

FRIDAY, *July 21, 1916.*

(Legislative day of Wednesday, July 19, 1916.)

The Senate reassembled at 10 o'clock a. m., on the expiration of the recess.

NAVAL APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes.

Mr. LIPPITT. Mr. President, I offer the following amendment——

Mr. UNDERWOOD. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hollis	Page	Swanson
Brady	Husting	Penrose	Taggart
Brandegee	James	Ransdell	Thomas
Chamberlain	Johnson, Me.	Reed	Thompson
Clapp	Jones	Robinson	Tillman
Colt	Kenyon	Shafroth	Townsend
Culberson	La Follette	Sheppard	Underwood
Cummins	Lane	Sherman	Vardaman
Dillingham	Lippitt	Simmons	Wadsworth
Fletcher	Lodge	Smith, Ga.	Warren
Gallinger	Martin, Va.	Smith, S. C.	Williams
Gronna	Martine, N. J.	Smoot	Works
Harding	Norris	Sterling	
Hardwick	Overman	Stone	

Mr. MARTINE of New Jersey. I wish to announce the absence of the Senator from South Dakota [Mr. JOHNSON] on official business.

The VICE PRESIDENT. Fifty-four Senators have answered to the roll call. There is a quorum present. The Senator from Rhode Island [Mr. LIPPITT] offers an amendment, which will be read.

The SECRETARY. On page 125, at the end of line 16, insert the following:

That the Secretary of the Navy is hereby authorized to sell at cost and issue lubricating oils and gasoline to vessels of the volunteer patrol squadrons duly enrolled in several naval districts; and that during maneuvers or practice drills, when any of the vessels of said patrol-boat squadrons shall be acting singly or as squadrons under the direct command or control of an officer or officers of the United States Navy, gasoline fuel shall be supplied to them free of charge.

Mr. SWANSON. I will accept that amendment for consideration in conference.

Mr. LIPPITT. I should like to have several communications I have received in regard to the amendment printed in the RECORD as a part of my remarks on the subject.

The matter referred to is as follows:

THE PATROL SQUADRON.

OFFICE OF THE SECRETARY,
New York City, July 19, 1916.

Hon. H. F. LIPPITT,
United States Senate, Washington, D. C.

DEAR SIR: At the request of the governors of the Patrol Squadron, I beg to advise you that at a meeting of the organization held July 19, 1916, Mr. Guy Norman, of Newport, R. I., one of our members, suggested that a communication be directed to you for the purpose of enlisting your aid in rendering more effective the relationship now existing between the Patrol Squadron and the Navy Department. For your information I would say that the Patrol Squadron is a complete and operative organization formerly enrolled as a part of the United States naval forces for the second naval district. I am inclosing a copy of the report of Lieut. Puleston to the Navy Department, which will indicate to you the nature of the work of the squadron and its effectiveness; in addition, I am inclosing a letter from Rear Admiral A. M. Knight, formally accepting the Patrol Squadron for enrollment, as well as a copy of the by-laws of the association. I would ask you to return these documents for our files when they have had your consideration.

The purpose of this communication is respectfully to request that, if possible, a rider be added to the pending Navy bill, enabling the Patrol Squadron to receive certain material assistance from the Government in the form of fuel supplies when the squadron is in service or maneuvers. You will doubtless appreciate that this request is not unreasonable in view of the fact that the owners of these boats have gone to considerable personal expense in building the same and equipping them.

Knowing that you are naturally interested in all matters pertaining to the second naval district, which extends from Chatham, Mass., to New London, Conn., we believe that this appeal on our part for cooperation will receive your serious consideration, and to place the same in concrete form I beg to submit the following proposed amendment to the Navy bill, subject, of course, to your revision:

"That the Secretary of the Navy is hereby authorized to sell at cost and issue lubricating oil and gasoline to vessels of the Volunteer Patrol Squadrons duly enrolled in the several naval districts; and that during maneuvers or practice drills when any of the vessels of said patrol-boat squadrons shall be acting singly or as squadrons under the direct command or control of an officer or officers of the United States Navy, gasoline fuel shall be supplied to them free of charge."

I would also suggest, provided, of course, that it meets with your approval, that you interest Senators TILLMAN and SWANSON in this matter; doubtless these gentlemen will approve of our organization and its purpose, and will lend whatever assistance they can to further its objects. Should you desire additional information we would suggest that you get in communication with Assistant Secretary of the Navy Franklin D. Roosevelt, who has cooperated with us in effecting our organization.

Assuring you that any courtesy or assistance which you may give us will be deeply appreciated, I am,

Yours, faithfully,

ORSON D. MUNN,
Secretary of Patrol Squadron.

—

HEADQUARTERS SECOND NAVAL DISTRICT,
COMMANDANT'S OFFICE.
Newport, R. I., July 6, 1916.

From: Commandant second naval district.
To: The Secretary Patrol Squadron, 233 Broadway, New York City.
Subject: Enrollment of the Patrol Squadron in the second naval district.
Reference: (a) Your letter of June 29, 1916.

1. In accordance with your request of June 29, 1916, I have enrolled the Patrol Squadron in the second naval district.
2. To give effect to this enrollment please report in full the number of boats, officers, and men in the squadron.
3. Suitable exercises will be arranged by my aid, who has been directed to communicate with you concerning this matter.
4. I inclose herewith a copy of Lieut. Puleston's report of the exercises, which was forwarded by me to the Navy Department.
5. I believe the Patrol Squadron will be of great assistance to this district, and I assure you that I will cooperate in every way to increase its efficiency.

AUSTIN M. KNIGHT.

—

UNITED STATES NAVAL STATION, NARRAGANSETT BAY,
COMMANDANT'S OFFICE,
Newport, R. I., June 24, 1916.

From: Lieut. W. D. Puleston, United States Navy, aid to commandant.
To: Commandant Naval Station, Narragansett, Bay, R. I.
Subject: Cruise of Volunteer Squadron No. 1.

In May Lieut. Commander V. A. Kimberly requested the War College to suggest a series of exercises for Volunteer Patrol Squadron No. 1.

On May 29 a tentative list of exercises based upon the probable war-time activities of such a squadron was furnished to Lieut. Commander Kimberly.

On June 6 Lieut. R. A. Koch, the commander of the second division of the Submarine Flotilla, in reply to a request for the services of one submarine for these exercises, volunteered to cooperate with the second division the *D–1*, *D–2*, and *D–3*, the *Tonopah*, the *Worden*, and *Macdonough*, as this force was planning to operate in Block Island Sound during the same period of time and as he wished the submarines to operate against patrol boats and in conjunction with such boats as scouts.

A second set of problems was then drawn up, which were designed (a) to use the Patrol Squadron in a drive against submarines; (b) to use the Patrol Squadron as scouts to lead the submarines to their prey; (c) to use the Patrol Squadron to patrol the line Block Island–Gay Head for surface craft. In arranging these problems Lieut. (junior grade) R. T. Merril, commanding U. S. S. *Tonopah*, cooperated, and his practical knowledge of the capabilities of the submarines plus a knowledge of problem solving gained through the correspondence course of the War College made his assistance of great value.

On June 10 Lieut. Commander Kimberly reported that the Patrol Squadron would arrive June 13, ready for work on June 14.

THE MOBILIZATION.

During the afternoon of June 13 the *Tonopah*, second division of Submarine Flotilla, the *Worden*, patrol boats *Nos. 1, 2, 3, 4, and 5*, *Caddy II*, and house boat *Daraga* arrived at Newport.

THE FIRST DAY (WEDNESDAY, JUNE 14).

At 8.30 a. m. a conference of all commanding officers was held on board the *Tonopah*, during which the whole work was briefly described, and the day's work described in detail.

In pursuance of the plan, the submarines got under way at 9 and took stations for problem.

At 10 patrol squadron No. 1, under way for problem "A," a submarine drive in the waters between Block Island and Gay Head. In this problem the patrol boats were ordered to prevent a submarine coming from the southward entering Block Island Sound or Narragansett Bay. The boats deployed on line, distance about 4 miles, and steamed about 18 knots.

Patrol boat *No. 2* sighted submarine and gave signal to assemble. Three other boats quickly joined, forcing the submarine to submerge and then deployed on submarine's emergence circle. In about 15 minutes submarine emerged a second time, so near to patrol boat that she could easily have been put out of commission.

PROBLEM "A"—REPEATED.

This problem was repeated, being staged the second time in Block Island Sound. The patrol squadron was ordered to search for a submarine coming from the westward toward Newport.

Geographical conditions in this problem permitted a smaller distance between patrol boats, and they were spaced about 1½ miles apart. The submarine was discovered by *No. 4*, and the boats assembled very promptly, on account of the shorter distance, prepared to take up the pursuit. Problem ended.

TACTICAL EXERCISES.

The patrol squadron was then exercised in tactical maneuvers, using an improvised signal code to simplify and expedite the maneuvers.

The speed, and the perfect similarity of these boats, combined with the eagerness to learn and intelligence of the captains of the boats, made these maneuvers successful beyond any expectations.

From the start it was impressed upon the squadron that speed, speed, and more speed should be their watchword.

About 4 the squadron entered Great Salt Pond and tied up alongside *Tonopah*.

CONFERENCE.

All commanding officers assembled on the *Tonopah*, the day's work was gone over and the night work explained. Unfortunately a fog came on, preventing night work, so the evening was devoted to discussing the program for the next day.

THE SECOND DAY—THURSDAY.

At 8.30 a modification of problem "A" was begun, as follows: All patrol boats and one submarine took part. The submarine submerged and was given 10 minutes' start, at the end of which time the patrol boats took up the search.

The plan of the search was based upon the following assumptions:

(1) A submarine periscope will be sighted 1½ to 2 miles.

(2) A submarine can make 8 knots submerged.

Upon these assumptions the following plan for the search of one submarine was made. Equal search sectors were assigned to each of the five boats. The boats were to take care of their own sectors, searching in between the second and sixth mile zone, changing course to cover as much ground as their high speed would enable them, moving clockwise and at all time keeping on or near the emergence circle of the submarine.

The squadron quickly got the idea of the search and covered the ground in systematic style with the following results:

At the end of 45 minutes the submarine exposed his periscope and sighted a patrol boat near by, but heading away from submarine. Although not sighted by patrol, it was so close that submarine decided to submerge at once to avoid discovery. Exposed periscope about 15 minutes later, was again sighted by a patrol boat. Other boats assembled on submarine. Problem ended.

TACTICAL EXERCISES.

At conclusion of this exercise, held tactical exercises, and then returned to Great Salt Pond to explain problem "B."

PROBLEM "B."

Problem B explained, and at 1.30 p. m. *MacDonough* stood out to take position. At 2.30 patrol squadron under way for problem.

At 2.45 became foggy. At 3.30 fog partly cleared and again attempted to carry out problem. At 4, while east of Old Harbor Block Island, fog again settled and was forced to return to harbor.

This was a great disappointment, as elaborate arrangements had been made for obtaining and relaying information, using the Weather Bureau station, Coast Guard stations, and Government telephone lines, and much valuable experience was expected from the proposed cooperation of these governmental agencies.

The attempt to carry out the problem gave the boats a good test of their seaworthiness, as the sea was moderate to rough, and the boats had to run dead to windward. They behaved admirably, only taking a little spray aboard.

The fog continued during the night, preventing a night patrol. All officers assembled on the *Tonopah* and talked over the next day's work.

THE THIRD DAY—FRIDAY.

CONVOY DUTY.

Problem A, modification II. The patrol squadron to protect *Tonopah* from submarines.

At 8.30 *D–1* and *D–3* under way for station.

At 9 *Tonopah* and patrol squadron under way. Patrol squadron ahead of *Tonopah* about 2 miles. Shortly after *Tonopah* sighted submarines and gave signal to patrol boat *No. 5;* forced submarine to submerge; about 15 minutes later a submarine again exposed a periscope near *No. 4*, and was theoretically run down.

It was impossible to tell whether one or both submarines had been accounted for, but it was apparent that neither had been able to attack *Tonopah* undisturbed.

About 11 a. m. patrol boats headed toward Block Island, the *Tonopah*, *D–2*, and *D–3* continuing toward New London.

PROBLEM A, MODIFICATION III.

All patrol boats and *D–2* assembled west of Great Salt Pond after submarine search. The submarine was given 10 minutes' start, and the first hour's search was conducted as follows:

(1) All boats deployed equally on submarines 15 minutes' circle (2 miles), then commenced retiring search at 12 knots' speed, forming a gradually widening spiral as indicated. It was planned at the end of the hour to steam around circumference of circle if submarine had not been sighted.

At the end of 45 minutes, submarine exposed periscope and was promptly sighted by patrol boat *No. 2;* submarine was forced to dive. Came up again in 15 minutes and was again sighted by a boat close to.

This concluded the work with submarines, and the patrol squadron headed for Newport.

THE WEATHER.

The wind and sea had been gradually increasing, and about 1 p. m. the sea was moderate to rough and wind about 4, from east to southeast. This brought the wind and sea on beam and quarter and made the boats very uncomfortable but perfectly seaworthy. No seas were shipped, only a little spray.

The carburetor on one of the boats needed adjusting, so en route to Newport a stop was made at harbor of refuge, Point Judith.

Arrived at Newport about 4 p. m. Friday.

It was the plan to hold tactical exercises in Narragansett Bay, culminating in a review by the commandant of the second naval district on Saturday morning. On account of stormy weather this was given up.

W. D. PULESTON.

The VICE PRESIDENT. Without objection, the amendment submitted by the Senator from Rhode Island is agreed to.

Mr. WADSWORTH. I offer the following amendment.

The VICE PRESIDENT. It will be stated.

The SECRETARY. On page 175, line 10, after the word "Norfolk," insert the words "New York."

Mr. SWANSON. I will accept that amendment for consideration in conference.

The VICE PRESIDENT. To make the amendment in order the vote by which the amendment of the committee at that point was agreed to will have to be reconsidered. Without objection, it is reconsidered; and without objection, the amendment of the Senator from New York to the amendment of the committee is agreed to.

The amendment as amended was agreed to.

Mr. THOMAS. I wish to reserve the right when the bill is reported to the Senate from the Committee of the Whole to move to substitute the House for the Senate naval program.

Mr. SWANSON. That will come up on the vote upon concurring in the substitute reported from the Senate committee.

Mr. THOMAS. I wish to vote in the affirmative on the House program.

Mr. TOWNSEND. Mr. President, before voting upon the pending bill I wish to say a few words in explanation of my vote. I have not become as excited over the propositions for naval and military preparedness as have many people in our country. I have recognized the fact that the great European war and our two military expeditions into Mexico have placed the subject of war uppermost in the public mind. Not since the War of 1812 have the people of the United States considered so intently the worth of our Republic and the necessity for its preservation. World history has never been more carefully read. The awful cost and destruction of war were never before so shockingly realized. Monarchy has been compared with democracy, and every thoughtful, patriotic person has come to believe more firmly than ever that the latter is the hope of humanity. Believing this, I have felt that in the midst of a world of armies and armament it would be criminal for a Congressman, charged with the responsibility of preserving and advancing democracy and its institutions, to refuse or neglect those ordinary precautions against possible destruction which the citizen exercises for the security of his private property.

I am neither a naval nor a military expert. I would be unable to determine wisely the exact necessary size of an army and navy to meet the requirements of national protection and defense which I believe should be demanded. But I think I know what ought to be accomplished, and I am clear in my own mind what should be our first, what our second, and what our third lines of defense, and their importance is in the order I have mentioned. The Navy should be strong enough to prevent the landing of a transoceanic army upon our shores; it should contain every submarine and aerial device necessary to hold a foreign fleet a sufficient distance at sea to prevent any reasonably possible explosive from blowing up our seacoast cities. For this purpose I am willing to vote every dollar needed; I wish I could know that I was voting no more. The Navy is composed of expensive machines, requiring comparatively few men, and if our country is to fight for its defense, which I hope it will never be obliged to do, I want that fighting done with machines rather than by men. I prefer to sacrifice dollars rather than human life in war.

It is my judgment that this Senate bill is top-heavy. I should have provided for fewer dreadnaughts and more colliers and reserved more for diving and flying machines. But if we are to err on the side of extravagance, I am willing that error shall be committed in the naval program, for with a reasonably strong, well-balanced Navy we would have little use for any other defense.

Our second line should be our seacoast defense. This should fortify our large and vulnerable cities and should contain guns of the longest range and the most destructive power known to modern genius. Fighting in forts and from behind fortifications is most effective against an approaching enemy, and at the same time the risk to soldiers' lives from behind these fortifications is less than it is in the open field.

Our third line of defense is the Army, and I would be content with a reasonably small, well-equipped, well-trained, and well-paid standing army, and especially would I be satisfied with such an army if all of our men, rich and poor, of military age were trained in the art and science of personal and national defense. We need an Army, not so much to protect against invasion from across the sea, but to protect our border against Mexican invasion while we continue our blundering bluffing with that country, to whose destruction we have contributed not a little. With a sufficient Navy and proper coast defenses we will never have need for a great Army.

And so, Mr. President, while I believe that the Executive and Congress are unduly excited and are seeing things which do not exist, yet do I believe that this country, whose glorious destiny means so much to humanity, should be at all times prepared against any reasonably possible attack from a foreign foe, and I would rather at this time err on the side of financial extravagance than on the side of dangerous parsimony.

I have not been impressed with the argument—or statement, rather—that our preparedness program has been largely induced by munition and war ordnance makers. I can not believe that these men want war any more than I can believe that publishers, farmers, laborers, and manufacturers generally, all of whom have profited on account of the present European conflict, want war because of individual or corporate profit to them. I have more faith in the patriotism of our people.

I voted to strike from the bill the provision for an $11,000,000 Government armor plant. I have no doubt that the Government in the past has paid more for armor plate than it ought to have paid, but that was the fault of the Government and not that of the manufacturers. They obtained what they could get, which, however, was less than any other nation in the world was paying. I am wondering, however, if any of the gentlemen who are complaining at the large prices received by the plate makers would have sold to the Government anything which they might have had, which the Government in time of peace wanted, at less than the same product was sold elsewhere? Why, the Government asked for bids from the three armor-plate factories, and for several years the bids were different, but in awarding the contracts the company bidding the least got no greater part of the award than did the company making the highest bid. Is there any wonder that soon all bids were the same? Of course I understand that the Government wanted all three plants to continue in business, hence the division of the award between them. But whatever happened in the past that was wrong has been corrected, and at a time when the Government is spending millions on preparedness I feel that we should not impose an additional tax upon the people with no idea of getting armor plate cheaper, indeed with the admitted fact that the Government will pay more. But, sir, I have faith in the arbitration clause in this bill. After the present war is over I hope that an international peace tribunal will be established and that an armor plant and extensive armament will not thereafter be needed; and it is admitted that the proposed Government plant can not be constructed in three years. We had an opportunity to save at least $11,000,000 and to obtain armor plate at less than it can possibly be made by the Government. I would cut from this bill six of the battleships and the armor-plate provision and thus save $120,000,000 to the people—a tidy sum, which should not be ignored. I believe our naval strength would be sufficient, and in a few years—perhaps in a year—we will know more what is best to do. To drop the six battleships this year would not necessarily weaken or retard efficient naval preparation.

Neither the Army nor Navy bill is just what I would like, but so sure am I that our great country is not properly prepared to defend the priceless institutions of democracy that I shall vote for the pending bill as the best and perhaps the least that can be obtained at this time.

Mr. President, when the battleship proposition was adopted I was at a conference committee meeting, and not having an opportunity then I propose, when the bill reaches the Senate, to move to strike out the provision for 10 battleships and substitute 4 for 10. Four are more than can be completed or even begun within a year, and in 12 months we may be wiser from experience and may know better what the Navy needs. I will not, however, delay the committee longer at this time.

Mr. GRONNA. Mr. President, I fully realize how unpopular it is to oppose the pending measure. I also realize how unavailing it is to oppose the bill.

I can not agree with the Senator from Michigan [Mr. TOWNSEND], who has just taken his seat, that this great appropriation of the people's money, the large amount which we are now about to appropriate for preparedness on such a huge scale, is a guarantee of peace. It may not bring war, but certainly no student of history will claim that any government, no matter how well it may be prepared, can give a guarantee of peace. I am not against reasonable appropriations for preparedness. This Government has ever since it was established appropriated large sums of money for the Navy and has appropriated reasonable sums for the Army.

Mr. President, I have believed that we were a democracy, but we are about to enter upon a policy which, in my judgment, will be a policy for a military establishment; and a military government means an aristocracy, an autocracy, and not a democracy. I believe that no patriotic American citizen will favor any policy that ultimately will lead to a military form of government.

Apparently this bill appropriates $315,000,000 or $316,000,000, but it authorizes more than twice that amount, and before the scheme is completed it will mean the expenditure of more than a billion dollars. I receive every day from some of my constituents protests against the so-called revenue bill. I introduced day before yesterday a number of telegrams from some of the bankers in my State protesting against the tax on banks. Mr. President, who is to pay this enormous tax, which must necessarily be raised in order to pay for this preparedness scheme? We are all in favor of preparedness, but not to the extent that it shall be burdensome to our people. We have heard about the patriotic men who marched in the streets at Chicago and other places in the great preparedness parades, but I have also heard it suggested that some of those very men shied at a recruiting station. Those who march in a preparedness parade are not always the first who are willing to sacrifice their lives in defense of the Nation.

When you say to me that it is the men of means who shall pay for this preparedness scheme, I say to you you are mistaken. It is the rank and file of the American people who will pay this tax. Wages must be diminished and the cost of living will be increased. Those who are engaged in business are entitled to a reasonable return on their investment; they will get that return, but it will be saddled upon the bended backs of the toiling millions of the Nation.

Mr. President, let us dismiss the thought that there are any sinister influences or any unworthy motives back of this great preparedness scheme; and yet it is evident to me that it is a mistaken idea at this time, when the people of the European nations will in a short time lie prostrate, when they will have exhausted their money and their men, for us to enter on this scheme, involving such enormous appropriations. Why should we at such a time go into this extravagance and saddle upon the American people an expense which is wholly unnecessary and which is dangerous to a republican form of government?

Mr. President, I shall not take the time of the Senate to go further into this subject. The Senator from Wisconsin [Mr. LA FOLLETTE] has shown to the Senate that it is unnecessary, that it is unwise, that it is dangerous for this Nation to embark upon a policy of this kind. I agree with what the Senator from Wisconsin has said, that it is wholly unnecessary to go into this extravagance.

There are items in this bill which, standing alone, I could support. The item for a Government armor plant I voted for, and I voted against striking it from the bill. I do not say that I believe in Government ownership as a rule, but I do believe in a business like this, whose only object is the manufacture of armor plate and the building of battleships for the purpose of destroying the human race, that it is a function of government not only to build ships and manufacture armor plate, but also to manufacture munitions of war.

You say to me that it would be cheaper to let private capital continue in this business. So far as that is concerned, Mr. President, I care not for the expense in supplying armor plate for the ships actually needed. It is the motive back of this whole scheme that I am opposed to. It is a mistaken policy, and the result will be that at the beginning of every Congress

we shall have in the lobbies here and elsewhere men demanding special legislation for fear that there is going to be a war. If the United States were to manufacture its own armor plate and its own munitions of war, there would be no incentive for these men to demand legislation that would give them the increased business.

Mr. CLAPP. Will the Senator from North Dakota pardon an inquiry?

Mr. GRONNA. Certainly.

Mr. CLAPP. I think the Senator will agree that if the Government had its own armor-plate plant and private greed had been eliminated from the propaganda behind this bill we should have provided for fewer battleships.

Mr. GRONNA. I think that is true, Mr. President.

Mr. CLAPP. Then, regardless of what a ton of armor plate might cost, if economy were the key word, we could save the price of this proposed plant by simply eliminating even one of the proposed battleships, the presence of which is undoubtedly due—and that without any reflection upon anyone—to the propaganda inspired in this case.

Mr. GRONNA. Mr. President, I intended to say that; and I thank the distinguished Senator from Minnesota for the suggestion.

Mr. President, I do not wish to be understood as opposing every item contained in this bill, for that is not the case; but I believe that it is wholly unnecessary at this time to enter upon this elaborate program, involving the appropriation of the large sums of money carried by this bill and involving also the expenditure of thousands of millions before we are through. As I have already said, not only is the bill objectionable because of the large amount of money appropriated, but it is objectionable because it embarks the Government upon a policy which, in my judgment, is dangerous to the institutions of our country. The people who have settled on American soil have come here for the purpose of living under a Government which shall be a pure democracy. We can not maintain a pure democracy and at the same time enter upon a policy of militarism—and that is what this scheme means.

I attribute no dishonorable motive to any man who has been back of the preparedness campaign; but, sir, it has made my blood boil when I have seen some of the exhibitions which have been made, for instance, the picture shows in which have been depicted some of the great cities upon our coast toppling under the attacks of foreign enemies. Some of these exhibitions have been an insult to every American citizen of foreign descent.

I challenge contradiction now of the statement that the foreign-born citizen has been as loyal to the flag as any of those who were born on American soil. Sir, you need only to go to Lafayette Square in this city and look at the statue of Von Steuben in the northwest corner of that park; the statue in the northeast corner of Kosciuszko, born in Poland; and the other two statues decorating that park—the statues of Lafayette and Rochambeau, both born in France—to realize what foreigners have done for America. Can you show me generals and soldiers of more valor or more worth to the American Union than were those men in whose memory statues have been erected by a grateful people? Go over to Franklin Square, and there you will find the statue of Commodore Barry, an Irishman. Mr. President, this preparedness propaganda, carried on by certain people for certain purposes, is in many of its aspects discrediting to citizens of this country whose ancestors came from foreign shores.

Mr. President, if I may be pardoned for speaking of myself, my parents were not born in this land; but, sir, I have to-day two sons, young though they be, who stand ready at any moment to sacrifice their lives for the perpetuation of this Government and the defense of the flag. One of them has answered to the call of the Government, and is now a private in the ranks of the Army. Sir, I am not so old myself but that I can go to the front, and I am willing at any moment to join the ranks as a private in defense of the flag of the United States. So we will find hundreds of thousands of young men of foreign birth who have enlisted in the Army at their country's call. When I was home in North Dakota in the month of May there was dedicated a statue, erected over the grave of a soldier, a poor boy who came here from Norway, who had only taken out his first papers, but during the Spanish-American War he said, "I want to go to the front and defend the American flag, because America is going to be my home." He sacrificed his life in defense of this country. Would it be possible for an American-born citizen to do more?

Go to the cemetery at Gettysburg and see the hundreds of graves with little monuments or headstones over them bearing Norwegian or Scandinavian names. The soldiers who lie there fought in the Civil War, as some of their brothers fought, even, in the Revolutionary War. I do not believe there is a single citizen of the United States of foreign extraction who would not fight to-day in any war against any nation on earth in order to defend the American flag.

Mr. President, I can not vote for this bill. I should like to vote for a bill providing for the authorization of, say, four battleships and an equal number of battle cruisers, and providing for a certain number of submarines, and the construction or appropriation for two battleships now; but I believe I can foresee that in a decade or two the war vessels constructed under the immense sum of money we are appropriating to-day, and under the authorizations we are making to-day, will simply be thrown upon the scrap heap.

I do not believe that anyone fears that any nation on earth will invade this country; but some one will make huge profits from this enterprise. That we all know. I have no objection to anyone in legitimate business making profits. I believe that legitimate business should be profitable; but I do object to a policy to which the American people, I believe, are opposed; and I believe, sir, that in the near future—in the course of a few years—this bill and this scheme will not be as popular as it is to-day.

I do not claim to be any more patriotic than anyone else, but I want to be allowed the same opportunity of voting against this bill as those who favor it have in voting for it. If I oppose it, it is not because I lack in patriotism or in loyalty to my country, but it is because my vision is not that of other men and my judgment differs from theirs. I believe, sir, that it is little less than criminal unnecessarily to saddle a burden like this upon the bended backs of the American people. The people have not asked for it. They will not indorse it when they understand what it means.

Mr. President, I perhaps should have remained silent and not have said a single word had it not been that it is manifestly apparent that this measure is so popular that it will be passed without even a record vote, and I wanted to take the opportunity of recording my opposition to the bill.

Mr. CLAPP. Mr. President, before finally voting upon this matter I want to submit just a word or two. I shall be very brief.

I would very gladly support the House bill, and, realizing that in legislation we can not always secure that which we desire, I would even vote to add a reasonable number of battleships to the House bill. But when it comes to adding 10 great, heavily armored battleships, in the light of the experience of this war, which has shown very conclusively that there is at least a grave doubt as to the final efficiency of such ships, and when it comes to adding this burden of over three hundred million to the already overtaxed American people's burden in a time of profound peace with our Republic—unless we can call the attempt to bring to justice some bandits in Mexico war—I can not bring myself to support the Senate bill.

I want to point out one strange inconsistency in this bill. It has always been a theory of mine that whatever we do we ought to do it openly and aboveboard and with candor. In this bill, in a time of profound peace, when the great nations of the earth are daily weakening and crippling themselves in the awful war that is prevailing, we suddenly propose practically to double the appropriations of last year, and to embark upon the most extraordinary program ever seriously considered by an American Congress; and coincidently with that we insert in the closing part of the bill a provision that when the war is over the President shall use his good offices in the effort at an arbitration that shall be designed, not to result in disarming—because no nation will ever disarm—but in lessening this mad increase, in staying this made race of militarism that is destined to stop only when bankruptcy on the part of some nations prevents their keeping pace with our pace; and incorporated in that proposition is the solemn declaration of the Senate that we view with apprehension and disfavor the general increase of armament among the nations of the earth.

I have heard Senators stand upon the floor of this Chamber and proclaim that this Republic was losing the respect of other nations. Sir, I know of nothing more calculated to bring distrust than for this Republic suddenly, and without any excuse being given for it, to embark upon this extraordinary program, and at the same time to say to the world that we view with apprehension and disfavor the general enlargement of armament.

Mr. NORRIS. Mr. President——

Mr. CLAPP. I yield to the Senator with pleasure.

Mr. NORRIS. Is not the Senator aware that the statement that we are building this great Navy as a matter of securing

peace is something that has always been common? Does not the Senator know that every battleship that England owns, and every battleship that Germany owns and that France owns and that Italy owns and that Russia owns, has been built to preserve peace; and that every cannon that has been made for the purpose of engaging in this war, and all the ammunition that has been made, and all the preparation that has ever been made by any of those nations, was made for the purpose of retaining the peace of the world? And why should not we continue to retain the peace of the world?

Mr. CLAPP. No, Mr. President; the Senator is not aware of that. The Senator is aware, however, that every battleship that has been added by every nation on earth has been proclaimed a method of securing peace, but I had not supposed such declarations were taken seriously.

Mr. NORRIS. Does not the Senator see how successful they have been?

Mr. CLAPP. But the Senator knows, and every Senator in this Chamber knows, and every man, woman, and child knows, that no man ever shot another unless he had a weapon with which to shoot.

Of course it has been a travesty for nations to prepare to go to war and at the same time to proclaim that they were doing it to maintain peace. If that required any proof, the present war furnishes sufficient proof. And now we reach the final climax of that travesty by taking a position that will force every nation on earth, if they can sell enough bonds to accomplish the purpose, to build more ships to meet our ships, and at the same time proclaim that we view with apprehension and disfavor the general increase of the armaments of the earth.

Mr. President, this finds a parallel only, as I recall now, in an incident that once occurred in the Legislature of Wisconsin. In justice to the senior Senator from Wisconsin [Mr. LA FOLLETTE], I want to say that the burlesque was enacted before he became a factor in the forces of that great State. The Legislature of Wisconsin at one session practically repealed the law against houses of ill fame and practically repealed the law against selling liquor to minors. It practically opened the door to houses of prostitution, and at the same time opened the door to the sale of liquor to minors. But, Senators, that legislature was not without a moral conscience; it was not without a capacity to recognize the duty it owed to humanity; and it concluded that travesty of practically taking away the penalty for keeping houses of ill fame and for selling liquor to minors by making an appeal to Congress to abolish polygamy in far-off Utah.

I think that absurdity finds a parallel when we take a step that we know will force every nation on earth to build more battleships, because surely when the nations of the earth see us reaching out, as we have in the past, for oversea territory, the thought, the suggestion, the claim that we are building these ships for peace and defense will not receive even a respectful hearing. When we take a step that we absolutely know will force every nation on earth that can sell enough bonds to accomplish it to build more battleships, for us solemnly to make this declaration that we view with apprehension and disfavor the general increase of armaments on the heels of this enactment providing for 10 new battleships in addition to the 2 that have already been authorized, and the construction of which has not been begun, is something that will be received with a sneer and a smile of derision throughout the world and will force the other nations to retaliate in additional preparation.

Now, let us be honest. If we are going to force the nations of the earth to build additional fleets, why should we put in this bill a declaration at absolute variance with the recognized purpose and logical effect of the act itself?

Mr. PENROSE. Mr. President, in view of the data submitted by the chairman of the Naval Affairs Committee [Mr. TILLMAN] in yesterday's CONGRESSIONAL RECORD—and to which, of course, I have no objection—I feel it my duty to make the request to have this statement of the Bethlehem Steel Co., largely bearing on what the chairman has inserted in the RECORD, printed as a public document. I hope the chairman will have no objection to that request.

Mr. TILLMAN. I have no objection whatever, sir.

Mr. PENROSE. I make the request.

The VICE PRESIDENT. In the absence of objection, it is so ordered.

Mr. CUMMINS. Mr. President, I desire to make a parliamentary inquiry. Is this the proper time to make a reservation or give notice of a desire to have a separate vote upon a committee amendment?

The VICE PRESIDENT. Any time is the proper time to make that reservation.

Mr. CUMMINS. This is the proper time, then?

The VICE PRESIDENT. Yes.

Mr. CUMMINS. I am not sure whether the notice given by the Senator from Michigan [Mr. TOWNSEND] is definite enough; and in order to make that certain I desire to reserve for a separate vote in the Senate the committee amendment beginning at line 1, on page 170, and ending with line 5, on page 174, and, further, the committee amendment beginning at line 9, on page 175, and closing with line 12, on page 176.

The VICE PRESIDENT. The Chair desires to say to the Senator from Iowa that the Chair thinks what the Senator from Iowa desires to move to reserve a separate vote on is the motion to strike out and insert. It takes in page 167 as well.

Mr. CUMMINS. It is the Senate committee amendment relating to the construction of the Navy.

Mr. NORRIS. Mr. President, I want to reserve—I think the Senator from Iowa has done it, if I understand his reservation—I want to give notice that I will ask for a separate vote upon the Senate amendment that provides for the increase of the Navy.

Mr. CUMMINS. A further parliamentary inquiry, because I do not know much about such things. When the motion to substitute or to strike out and insert is before the Senate, will a motion to amend either the part that is sought to be stricken out or the part that is sought to be inserted be in order?

The VICE PRESIDENT. There have been so many private inquiries and so many statements made on the floor of the Senate with reference to what would be proposed to be done that the Chair thinks it is the proper time now to express an opinion as to what can be done.

For instance, the Senator from Colorado [Mr. THOMAS] served notice that he would move to substitute the House bill. The Chair does not believe that any such motion as that would be in order. The House bill is preserved by disagreeing to the Senate amendments, which leaves the House bill in force, and there is not any necessity for any such motion. If the Senate refuses to concur in the amendments made as in Committee of the Whole, the House bill is then before the Senate.

Second, the Chair believes that the Senator from Iowa [Mr. CUMMINS] has done what he has a right to do. He has reserved the question which consists of a motion to strike out and to insert.

Third, that amendment having been reserved for a separate vote, the Chair has no doubt that in the Senate the part to be stricken out and the part to be inserted are each subject to amendment.

Mr. BRANDEGEE. Mr. President, may I inquire, if the Senate should concur in certain of the Senate amendments to the House bill and refuse to concur in others, whether under those circumstances it would not be in order to move to substitute the House bill for such bill as the Senate might have agreed to?

The VICE PRESIDENT. The Chair is of the present opinion that if certain amendments are concurred in and other amendments are not concurred in by the Senate, then the House bill might be offered as a substitute for the amended bill.

Mr. BRANDEGEE. Mr. President, one further inquiry. I do not know that the Chair will care to express an opinion upon this question, but it so frequently occurs that I should like, if possible, to settle it in my own mind, at least.

With relation to the inquiry of the Senator from Iowa and the suggestion of the Senator from Nebraska as to the necessity for giving notice, when a bill is in Committee of the Whole, that they will demand a separate vote in the Senate when the question comes up as to concurring in the Senate amendments I had not thought it was necessary to give any notice whatever; that when the bill got to the Senate the question was on concurring in the amendments made as in Committee of the Whole, and if there was no objection they were usually concurred in en bloc, but any Senator could demand a separate vote before the question was put, without having given any previous notice. I know of no rule that requires a Senator to give notice in Committee of the Whole about what he is going to do when the bill gets to the Senate.

The VICE PRESIDENT. There is no such rule, and there is but one precedent. That precedent, however, is against the Senator from Connecticut.

Mr. SWANSON. Mr. President, I understand that the Senator from Colorado [Mr. THOMAS] simply desires a vote on the building program of the House and Senate. That is what he reserves, and that has been reserved by four or five Senators. As I understand, there is no other question of contention now except as to the building or construction program in the two bills.

Mr. THOMAS. Mr. President, the Senator from Virginia has stated my position precisely. I want to vote for the House program. I am unable to vote for the Senate program. But I

accept the ruling of the Chair as just announced, and I expect to abide by it. Some of the rules of the Senate, according to my experience, Mr. President, are like the human anatomy, fearfully and wonderfully made. I have long since given up all hope of being able to acquire an adequate comprehension of them either in detail or in their entirety. I can not keep abreast of their construction. The vote I cast will be due to the fact that the House program is the result of very careful and mature preparation based on long and exhaustive hearings, representing, therefore, the thought of the committee which devoted itself to that subject for a long period of time.

I do not believe, as was most eloquently asserted yesterday by the Senator from Wisconsin [Mr. LA FOLLETTE], that there is now or is liable to be at any time the need for such a huge addition to our Navy. There is a need for some addition; a need which is emphasized by the recent blacklisting of many of the merchants and mercantile corporations of this country by the British Government; a course of action which in view of the widespread sympathy in this country for the allies, coming at this time, is most unwise and wholly inexplicable.

I can not conceive of a more unjust and outrageous action than that involved in the recent official announcement that certain citizens of the United States shall not be permitted to traffic with the subjects of Great Britain and per consequence with the people of any other nation. Great Britain controls the sea. Our citizens have the same right to trade with the enemies of Great Britain that they have to trade with the subjects of Great Britain or between themselves. While I do not believe that there is at present any prospect of hostilities or conflict between this country and any other, I feel that this administration will resent this preposterous embargo upon our merchants and resort to every expedient within its power, even to reprisals if necessary. It should do it, and meet this assault upon the rights and prerogatives of our own citizens with firmness, with courage, and with success.

I think, therefore, a well-balanced fleet, thoroughly equipped and capable of enforcing such rights as these, is one of the essentials of modern commerce and of modern civilization, and the House program furnishes an adequate expansion in addition to the present force of the Navy for that and all other emergencies which may confront this and succeeding administrations.

Mr. BORAH. Mr. President——

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Idaho?

Mr. THOMAS. I am through. I did not intend to occupy the time of the Senate as long as I have done.

Mr. BORAH. I wish to ask the Senator a question. Suppose we should not be able to adjust the matter to which the Senator has referred amicably, does he think that the bill as passed by the House would be sufficient to meet the situation that may present itself?

Mr. THOMAS. We can meet it with our present Navy. I think with the addition provided by the bill as passed by the House we are in a position to meet any situation. If the Senator heard the speech of the Senator from Wisconsin yesterday, he could not escape the conclusion that we have to-day the second navy in the world and have had for years, but the fact, instead of being made public, has been suppressed by the journals of the country.

Mr. BORAH. I have formed my own opinion upon that from other sources.

Mr. THOMAS. This is from official sources.

Mr. BORAH. I disagree with the Senator.

Mr. THOMAS. Of course, the Senator has a right to do that.

Mr. BORAH. Does the Senator think now that we have a sufficient Navy to meet the kind of situation which would be presented if we could not arrange it through diplomatic channels?

Mr. THOMAS. Yes, sir; I do most emphatically.

Mr. BORAH. Then, there is no need of going further.

Mr. THOMAS. Not for present emergencies or any that can arise during the European war.

Mr. MARTINE of New Jersey. Mr. President, inasmuch as the Senator from Pennsylvania [Mr. PENROSE] has secured the privilege of placing in the RECORD what I think we all agree as the baldest advertisement in the way of a public document, the pamphlet of the Bethlehem Steel Co., it seems to me that it is but fitting and proper that the antidote should go with the poison. This Bethlehem Steel Co. is making money beyond the dreams of man. I want to read this, to show how this corporation is fattening and how unnecessary it is to advertise. I cut this from the Baltimore Sun:

IN FIELD OF FINANCE—BETHLEHEM STEEL EARNINGS FOR THIS YEAR MAY EXCEED $60,000,000, IT IS ESTIMATED.

The directors of the Bethlehem Steel Corporation met yesterday in New York. Based upon the showing of the Bethlehem Steel Corporation in first half of the current year, the estimate of $60,000,000 earnings for the full year 1916 will no doubt be realized. While no official periodical statements of earnings are issued by the Bethlehem Steel Corporation, it is believed they were around $30,000,000 in the first half. The Bethlehem Co. has sufficient war business on its books to keep its ordnance plants in operation to the end of the year, and as earnings in June are understood to have established a new high record, profits of $60,000,000 or over for 1916 seem to be assured. Bethlehem is now shipping 1,000,000 shells a month, or at the rate of more than 30,000 a day.

It is necessary that they should be advertised in a public document at the expense of the people.

The Pennsylvania Steel Co. had been absorbed by the Bethlehem, and there will be no financing in connection with the transaction. The railroads which owned practically all the stock of the Pennsylvania Steel Co. have taken bonds in payment for their shares. The transaction will necessitate no capital readjustment.

The question of increasing the capital stock of the Bethlehem Steel Co. is not a leading one with the Bethlehem Co. at present. No change is now being considered. Neither is any change in the rate of dividend on Bethlehem Steel contemplated in the near future. The Bethlehem Steel Corporation will spend between $12,000,000 and $15,000,000 this year for new construction.

They must expect the war to go on:

As the surplus available for the common stock or new construction is expected to run far above $300 a share this year, there will be plenty of cash left for extra distributions to shareholders if the directors deem such action advisable.

Mr. President, it seems to me with the knowledge before the country of the profits of this corporation to foist into the RECORD a document published as a public document at public expense, but which is nothing but a bald advertisement, is a wrong almost to a crime.

I wish what I have read to be published as an antidote to the poison, and I hope it will follow right along.

Mr. PENROSE. Mr. President, I do not intend to detain the Senate. I only want to suggest an antidote to the poison of the Senator from New Jersey.

The Bethlehem Steel Co. in my recollection has never paid a dividend. I do not know what it may have done in the early days. It is indeed very fortunate that these war profits have come to it. It has for many years been one of the two or three strictly ordnance manufacturing concerns in the United States and it was following its legitimate business and its special aptitudes in taking these contracts.

Had it not been for the war in my opinion the Bethlehem Steel Co. would be absolutely closed to-day under the operation of the present Democratic tariff laws. When I visited the Bethlehem Steel Co. in 1914 when I was a candidate for reelection the plant was pretty nearly shut up. Instead of having twenty or thirty thousand men employed at good wages there were two or three thousand employed in the works and they did not know how long they would remain there. Meanwhile the fixed charges were going on and the general expenses, with no profits in sight. Probably bankruptcy would have been the fate of the Bethlehem Steel Co. had it not been for the war in Europe. In this instance as in a number of other instances the chief asset of the Democratic Party is in the war in Europe.

Mr. MARTINE of New Jersey. Mr. President, I want to say that during the time the Senator said they were not paying interest they were paying interest on the bonds. Of course they had such an eternal quantity of water that it was almost an impossibility to pay interest on the water. But the Senator says that when he ran for office up there they were idle. That was the ill effect of the Republican administration. But now under the Democratic administration he admits with his own lips that they are all busy and making money. But they are making money out of the process of killing humanity, and I would to God that no profit would come to the country through this uncanny and iniquitous system.

But you can not get away from the fact that the Bethlehem Steel Co. has robbed and wronged the American people in the manufacture of its armor plate, charging the Government prices far beyond those at which they sold it in foreign countries, and of a poorer character as well. History is full of the wrongs of the Bethlehem Steel Co., and to resuscitate, revive, and try to hold it up here by foisting a bald advertisement in the public record, paid for at public expense, is, I should think, too small a thing for the splendid Senator from Pennsylvania.

Mr. REED. Mr. President, I was obliged to be out of the Chamber a portion of the morning. I rise to inquire if during my absence the Senator from Pennsylvania obtained unanimous

consent to print as a public document the Bethlehem Steel Co. book?

The VICE PRESIDENT. He has.

Mr. REED. That I objected to yesterday morning?

Mr. PENROSE. If the Senator will permit me, I made a request for unanimous consent and obtained it with the particular assent of the chairman of the Naval Committee. In view of the fact that the chairman of the Naval Committee had had inserted in the RECORD a large correspondence and a great deal of data bearing on this question of a hostile nature to the proposition which I have argued here in the Senate, I only thought it would contribute further to the enlightenment of the Senate to present the other side of the case. The chairman of the committee very generously and properly agreed to my suggestion. I had not intended to press the matter again had it not been that my attention was called this morning to the very large amount of data which had been inserted in the RECORD by the chairman of the Naval Committee, to which, of course, I had no objection.

Mr. REED. Mr. President, the document in question is not asked to be printed as a public document for the purpose of informing the Senate. The Senator from Pennsylvania well knows that to be the fact.

Mr. PENROSE. Will the Senator permit me? As I understand it, a public document is not confined to the purpose of informing the Senate; it is meant for the purpose of informing the public.

Mr. REED. I was about to say, and did succeed in saying, that this document is not printed as a public document for the purpose of informing the Senate, because it has already been circulated among the Members of the Senate and is now in their possession. I now add what I was about to say when interrupted, that it is not being printed as a public document for the purpose of informing the public in the sense that ordinary documents are printed, because it is already privately printed in a large edition, so that it can be circulated amongst all those persons who are at present specially studying the question of a Government armor plant versus a private armor plant. It is in fact being printed as a public document in order that it may be sent out with the implied sanction of the Senate of the United States, that the bill for the printing of this propaganda issued by a private corporation shall be paid out of the Public Treasury, and to the further end that it may have the franking privilege and be scattered broadcast over the land as a Senate document printed at the public expense and sent out by the Senate for the public information. It is a shameless proposition.

Mr. KENYON. I should like to ask the Senator a question. I understood him to say that he objected to its publication yesterday.

Mr. REED. I did.

Mr. KENYON. Then was unanimous consent obtained today in the absence of the Senator?

Mr. REED. It was. I was in the cloakroom engaged in some conferences with Senators about the business of the Senate when I learned the fact that a unanimous-consent agreement to print the document had been made.

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Nebraska?

Mr. REED. I do.

Mr. NORRIS. When was the order issued? Has that been done to-day?

Mr. REED. Apparently it has been done in the last few minutes.

Mr. NORRIS. I inquired of a Senator sitting next to me if he knew about it, and he did not; and I do not remember hearing it.

Mr. GALLINGER. Surely the Senator will not question the fact that the matter was ordered printed?

Mr. NORRIS. No; I do not question it. I inquired for information.

Mr. GALLINGER. The matter was presented in the usual form, and it was heard.

Mr. PENROSE. The stenographer heard it, and it will appear in the RECORD.

The VICE PRESIDENT. There is no doubt about that being the fact. The present occupant of the chair was not aware of what occurred yesterday, for he was not here in the afternoon. The Senator from Pennsylvania rose and asked to make it a public document, and the Senator from South Carolina, as chairman of the Naval Committee, said it was all right. Everybody heard it or should have heard it, and it was agreed to.

Mr. GALLINGER. Certainly.

Mr. REED. Mr. President, any document which is printed at public expense and sent out as a public document ought to be one furnishing reliable and sound information. It ought not to be an ex-parte statement made by a party in interest. It ought not to partake of the nature of an advertisement of a private concern at the public expense. It is about time the Senate begins to exercise a little discretion in regard to the use of the public money in this manner.

Mr. STONE. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to his colleague?

Mr. REED. I do.

Mr. STONE. I should like to ask my colleague who made the request yesterday to have this book printed as a public document.

Mr. REED. The Senator from Pennsylvania [Mr. PENROSE]; and I objected.

A few days ago, or a little while back, a document was offered here and ordered printed; nobody examined it, and it has been used extensively by the mail-order houses of this country as an advertisement of the mail-order business, the mail-order houses thus getting the benefit of the franking privilege. These highly patriotic institutions that now undertake to avoid the payment of their just share of the public revenue by shipping their pamphlets and their catalogues by freight until they get within the bounds of a particular zone, so that by mailing them within that zone they can save a few cents which otherwise they would have to pay to the Government, have now improved upon that method and are able to employ the franking privilege on at least this one document. There was much matter in that document which did pertain to the public business, and so there was some excuse for printing it, though I think a very poor excuse; but this thing that we are asked to mulct the Government to the extent of I know not how many thousands of dollars to print and to circulate is a mere false and misleading ex parte statement made by a concern that has been coldly and deliberately robbing the Government of the United States for years. The evidence that it has been robbing the Government of the United States is found within the four corners of the document, although the casual reader might not discover the fact. On yesterday, however, one of the Senators read some excerpts from this book. I shall find them and, with the consent of the Senate, insert them at this point in my remarks.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

The Senator from Indiana [Mr. TAGGART] read the following excerpts from the document now under discussion:

"We will manufacture one-third, or such additional quantity as may be awarded to us of the armor plate required for the contemplated five-year naval program, estimated at approximately 120,000 tons, at a price of $395 for side armor, as compared with the price of $425 now obtained.

"The proposed price is lower than has been paid by the Government for more than 10 years.

* * * * * * *

"Steel prices are continually going up, and they are to-day much higher than has been the case for many years. In spite of that, we offer to build armor at a lower price than the United States Government has paid for 29 years, and we agree to accept this lower price for the next five years."

Mr. REED. The Senator from Pennsylvania [Mr. PENROSE] asked unanimous consent that the document read from, being the same document now under consideration, be printed as a public document. Whereupon the following proceedings were held:

Mr. REED. Mr. President, I object.

Mr. PENROSE. I do not know whether the Senator's objection is well taken or not. I conferred with the chairman of the Committee on Naval Affairs regarding this matter, and he said he would be very glad to have it printed. Certainly there can be no objection to the dissemination of information, particularly when the request is made by the defeated party.

Mr. REED. I have not any doubt that it would be very desirable on the part of this concern to have its brief and argument printed at the expense of the Government and distributed under the franking privilege. I am not sure that I understand the Senator's request. Do I understand that he asks unanimous consent that it may be printed as a public document, provided the Committee on Printing should give its O. K.?

Mr. PENROSE. Yes, sir.

Mr. REED. I object. If the Bethlehem Steel Co. wants to print its defense or its argument, let it do it out of some of the profits it has made charging the Government prices for 29 years which it now says it is ready to cut to a very large degree, although it also says that the cost of manufacture to-day is greater than it ever has been in the history of the country—a plain, bald confession that it has been despoiling and robbing this Government for the past 29 years.

Mr. PENROSE. Mr. President, of course I can reserve the right to read this as part of my remarks.

Mr. REED. Unquestionably, Mr. President, the Senator can read it. So can a man read the advertising literature of any company; but I hardly think the Senator from Pennsylvania would impose that upon the Senate; and if so, we may have to have a night session to accommodate the Senator.

Mr. PENROSE. Mr. President, I am the best judge of the propriety of the matters that I choose to bring before this body. This is not an advertisement in any way. It is a discussion of a public question; and

I intend to bring up this request at a little later hour, when the armor-plate matter comes properly before the Senate. I will withdraw it for the present.

Of course, in view of my objection the request could not be granted, and the document could not be printed as a public document unless the Senate should thereafter take a different course which, it appears, has been done.

I specifically call the attention of the Senate to the quotations from the book which were read by the Senator from Indiana [Mr. TAGGART].

One of those declarations was that the Bethlehem Steel Co. was now prepared to make a binding contract with the Government for the next five years to sell and deliver to it, if I remember the figures aright, the armor plate which it might want for some $30 a ton less than it had been charging. In connection with that statement is another that the price named is less than has ever been charged to the Government in 29 years. In connection with the two statements is a third statement, that the price of labor and the price of all material entering into armor plate are higher now than they have been for 29 years. The effect, therefore, of the statement is that although armor-plate material is higher than it has been in 29 years, that labor is higher than it has been in 29 years, and that the cost of production is greater than it has been in 29 years, this concern can afford to deliver, and will deliver, to the Government armor plate for $30 a ton less than it has at any time during the past 29 years exacted from us. That is an absolute admission that for 29 years it has robbed the Government, whose flag floats over it and whose armies and navies protect it. Now that concern comes here, and the Senate grants unanimous consent to print its propaganda and advertisement and to send it through the mails without charge.

Nor is that all of the loathsome and sickening story. It is an evidence that this company has been selling its armor plate to foreign governments to put upon the sides of their ships and to protect their guns for less than it has been charging this Government, that gives it protection. It has been willing for less of dollars to furnish to a government or to governments that may at any time become our enemies armor for ships of war for less money than it charges us, thus enabling those governments to build their navies at less cost, and consequently, for the same amount of dollars, to build greater navies than ours, navies that may in the mutations of national life at any moment thunder with their guns against the coast cities of the United States. And it is proposed that such a concern can have the franking privilege, so that it can flood this country—probably through the Republican national committee—with a document that looks like a Senate document; that looks like it had come with the sanction of the Senate; so that it can flood this country with its ex parte, its false, its misleading statements without the payment of a penny of postage!

Mr. OLIVER. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Pennsylvania?

Mr. REED. I do.

Mr. OLIVER. I challenge the Senator from Missouri to find a single false statement in that document. He can not do it.

Mr. REED. Well, I say to the gentleman who is a stockholder, and who has admitted he is a stockholder, in institutions that are engaged in making armor plate, who stands here on the floor of the Senate advocating the cause of those things in which he is financially interested, and who, if, he were the judge of a court would be barred from sitting in a case involving the question of dollars and cents to the concern in which he is interested, but who, nevertheless, has the cold effrontery to stand here advocating and voting for that which will put money in his pocket—I say that the entire document is false and misleading—that is, it is undertaken in this document to demonstrate that the Bethlehem Steel Co. has dealt fairly with the United States—the facts are otherwise——

Mr. OLIVER. Mr. President——

Mr. REED. That it is a patriotic institution——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Pennsylvania?

Mr. REED. The facts are otherwise.

Mr. OLIVER. Mr. President——

Mr. REED. That it has been inclined to treat the Government decently, the facts are otherwise; that it has been willing all the time to treat the Government decently and give a decent price, the facts are otherwise. Now I have completed my sentence, I gladly yield to the distinguished Senator.

Mr. OLIVER. Mr. President, I decline to notice——

Mr. REED. You rose to ask me a question. I do not care whether you decline to notice anything or not.

Mr. OLIVER. The Senator has yielded to me the floor.

Mr. REED. I did not yield the floor. I decline to yield.

Mr. OLIVER. The Senator has yielded to me, and I demand the right to finish the sentence which I began.

Mr. REED. I yielded for a question, and I will debate any question with the distinguished Senator he wants to debate at any time, but I do not intend to lose the floor until I have occupied it for a few moments longer.

Mr. OLIVER. I do not want to deprive the Senator of the floor, but I want to say this, that the Senator is saying what is utterly without foundation. He accuses me of voting money into my own pocket. I will say no more about his personal attack upon me, the second time he has made it in a manner unworthy of any member of this body, but I do want to say that he evades from the question I put to him in order to divert and becloud the issues by making a personal attack on me. I challenge him to produce a single false statement. He says it is full of falsehoods. He does not name one. Give us some particulars, if you please.

Mr. REED. Now, the Senator says that my statement is untrue in regard to him voting money into his own pocket.

The VICE PRESIDENT. The Chair thinks that we are getting pretty close to infringing a rule of the Senate.

Mr. REED. I thought possibly so; but the Chair permitted the Senator to make that statement, and I am going to insist, with all respect to the Chair, on my right to reply to it. The Senator made that statement.

The VICE PRESIDENT. Let us at least keep as near within the parliamentary rule as we possibly can. Not to do so leads to bad feeling.

Mr. REED. I shall keep within the rule. I say that the Senator on the floor of this body admitted that he owned a large amount of steel stock, and that it was in a concern that was the parent company of a concern engaged in the manufacture of armor plate; and I shall put the Senator's admission as it appears in the RECORD in my remarks at this point.

Mr. OLIVER. I insist, Mr. President, on everything that the Senator puts in the RECORD being read or stated at length.

Mr. REED. Well, I imagine the Senator naturally objects to having his own admission put into the RECORD——

Mr. OLIVER. It is already there.

Mr. REED. But I think I can find the Senator's admission even while on my feet, and if I do I will read it again into the RECORD. The Senator knows that whatever will defeat the building of a Government armor plant will enable the private plant to increase its price and its profits; that if it makes profits those profits will be distributed to the stockholders; and that, finally, in the end some of those profits will be found emitting a musical jingle from the pockets of the distinguished Senator.

Mr. GALLINGER. Now, Mr. President——

Mr. LODGE. I rise to a question of order.

Mr. GALLINGER. I call attention to clause 2 of Rule XIX, and insist that it shall be observed.

The VICE PRESIDENT. The Chair thinks that the Senator from Missouri and the Senator from Pennsylvania have each transgressed the rule, in that the rule of the Senate clearly provides that the motives of a Senator shall not be impugned on the floor of the Senate.

Mr. GALLINGER. I ask that the rule shall be observed. I care not to what Senator it applies.

The VICE PRESIDENT. The Chair thinks this has gone far enough, and gone too far.

Mr. REED. Very well. I simply want to remark, in passing, that I have not been talking about motives; I have been talking about facts and results.

Mr. MARTINE of New Jersey. Mr. President, will the Senator from Missouri yield to me for a second?

Mr. REED. I will.

Mr. MARTINE of New Jersey. I feel, in justice to the people of America, that this document should be expunged from the RECORD, and I move you, sir, if it is possible, that the document be expunged from the RECORD.

The VICE PRESIDENT. It is not in the RECORD.

Mr. MARTINE of New Jersey. Well, it is ordered printed in the RECORD, as I understand.

The VICE PRESIDENT. Oh, no.

Mr. MARTINE of New Jersey. Well, it is ordered printed as a public document; and I move, then, to rescind the action by which this document was ordered to be printed as a public document.

Mr. PENROSE. The motion is not in order, Mr. President.

Mr. GALLINGER. It was done by unanimous consent.

The VICE PRESIDENT. That action was taken by unanimous consent.

Mr. MARTINE of New Jersey. Well, I ask unanimous consent, most respectfully, Mr. President——

The VICE PRESIDENT. Is there any objection?

Mr. GALLINGER. Yes.

The VICE PRESIDENT. There seems to be an objection.

Mr. MARTINE of New Jersey. Very well. Mr. President, I have, as I recall, received one of these books on which the postage——

The VICE PRESIDENT. Is the Senator from Missouri yielding?

Mr. REED. I am not yielding the floor.

Mr. MARTINE of New Jersey. I am not asking the floor.

The VICE PRESIDENT. The Chair is afraid the Senator is.

Mr. MARTINE of New Jersey. No; I only want to say, with the consent of the Senator from Missouri, that the book I received, as I recall, had some 50 or 56 cents in postage stamps on it. That, of course, will be saved to the unfortunate, poverty-stricken company, which has not made a dividend for many years, according to those gentlemen, for they can send it now as a public document.

Mr. REED. Now, Mr. President, I call attention to this remarkable occurrence of this morning. It is stated that a Senator is out of order who quotes a Senator's own words upon the floor of the Senate. If I can secure the information which I want, I shall read those words. If I do not get it now I will put it in later in the day.

I call attention of the Senate to this fact, that my colleague [Senator STONE] has suggested to me that when once a document has been made a public document any part of it is frankable; so that the authors of this document can, if they see fit, select garbled excerpts or such partisan excerpts as they may desire and send them over the United States without paying any postage.

Mr. SWANSON. Mr. President, a parliamentary inquiry. What amendment is pending before the Senate now?

The VICE PRESIDENT. There is no amendment pending before the Senate now.

Mr. REED. The bill is pending, however, is it not?

The VICE PRESIDENT. The bill is pending and open to amendment.

Mr. REED. Mr. President, I have found the admission of the Senator from Pennsylvania, and will at this point digress to read it into my remarks. On March 21, 1916, I was endeavoring to address the Senate when I was interrupted by the Senator from Pennsylvania [Mr. OLIVER]. I quote:

Mr. OLIVER. Mr. President, the Senator well knows that the argument ad hominem is about as weak an argument as can be presented on behalf of any case, and the fact that he has presented it shows how weak his case is now.

Mr. REED. Oh, Mr. President, there is an old line which may be paraphrased so that it will run—

"How sweet the watch dog's honest bark,
Loud baying when we draw near home."

[Laughter in the galleries.]

The VICE PRESIDENT. The galleries are again admonished that they must not show approval or disapproval of the action on the floor of the Senate.

Mr. REED. I say, since the Senator wants to make it pointed, that if I owned $500,000 worth of the stock of any company engaged in Government contracts I would not plead for a continuance of those contracts.

Mr. OLIVER. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Pennsylvania?

Mr. REED. Not until I finish reading.

Mr. OLIVER. I want to call the attention of the Senator to the fact that he himself withdrew that statement.

Mr. REED. Oh, I am going to read all of it, including the Senator's correction in which he admitted the child, but insisted that "it was a very small one."

Mr. OLIVER. My correction of the Senator's misstatement.

Mr. REED. As to the amount?

Mr. OLIVER. Yes.

Mr. REED. But not as to the principle. [Reading:]

Mr. OLIVER. Mr. President, I think, as a matter of personal privilege, I have a right to say something here.

Mr. REED. Not in my time.

Mr. OLIVER. If the Senator wants to crowd me out on a question of personal privilege——

Mr. REED. I do not object, if I can have the time deducted from the three minutes that elapse between now and 4 o'clock, when, as all know, the gavel will fall, and we must proceed to vote.

The VICE PRESIDENT. The Chair is not deducting time. It is not the Chair's business.

Mr. REED. There will be plenty of time for the Senator to make reply before the debate closes.

That will be found on page 4539 of the CONGRESSIONAL RECORD under date of March 21, 1916.

On March 22, 1916, the Senator from Pennsylvania rose to make his correction. I quote from page 4590.

Mr. OLIVER. Mr. President, I rise to ask for a correction in the RECORD of yesterday's proceedings.

In the discussion upon the armor-plate bill yesterday evening the Senator from Missouri [Mr. REED] was kind enough to refer to the fact that during the investigation conducted by a Senate committee a few years ago I had stated that I was the owner of a thousand shares of preferred stock of the United States Steel Corporation. In that connection the Senator used this language:

"Mr. REED. I say, since the Senator wants to make it pointed, that if I owned $500,000 worth of the stock of any company engaged in Government contracts I would not plead for a continuance of those contracts."

Mr. President, the par value of the preferred stock of the United States Steel Corporation is $100 per share. The par value of 1,000 shares, therefore, as can easily be seen, is $100,000. The market price yesterday, as I see from this morning's paper, was $117 a share, which would make the ultimate value of that stock $117,000. So the Senator from Missouri in placing its value at $500,000 evidently made an enormous mistake in calculation.

The attention of the Senator from Missouri was called to this statement this morning, and he informed my secretary that he would be here this morning and ask that the correction be made. He has not so appeared, and I now ask that "$500,000" in this place in the RECORD, on page 4539 be changed to read "$117,000."

In this connection I wish to say, as I stated to the committee when I stated that I was the owner of that stock, that I have never considered this security to be in any way affected by any measure that came before Congress since I have been a Senator. It is a preferred stock. It pays 7 per cent. It can not under any circumstances pay more, and in the improbable circumstances of the profits of the corporation being insufficient to pay 7 per cent in one year the dividend will be paid out of the profits of succeeding years.

Even if it were subject to this legislation, the amount is so small compared with the enormous capital of the corporation that of any money that might be made out of the armor-plate business my share would be so small as to be infinitesimal.

Those who know me, Mr. President, know well that any vote of mine in the Senate will never be controlled by my personal interests. I have on more than one occasion voted in direct opposition to my personal and financial interests on measures coming before the Senate. I shall never vote in accordance with my personal interest unless the interest of the public and of my constituents demands it.

If my interest in this corporation had been far larger or if I had been interested in the securities of any of the other companies engaged in this business, as I am not, I would have acted and voted just as I acted and voted yesterday, for the reason that I believe the measure to be inimical to the public interests and injurious to the constituency which I aim to represent.

And, of course, that is the trouble. A man always believes that the public interests can be best served by taking care of himself.

The Senator from Pennsylvania continued:

I ask that this correction be made, Mr. President.

The VICE PRESIDENT. The Chair hardly sees how the Senator from Pennsylvania can change the language used by the Senator from Missouri. The Senator has made his statement, and when the Senator from Missouri comes in, in accordance with his promise to the Senator from Pennsylvania, the Chair assumes that the Senator from Missouri will make the change; but the Chair can not change the language of a Senator.

Mr. OLIVER. I think the ruling of the Chair is correct, and I made the request to call attention not only to the misstatement made by the Senator from Missouri but to his failure to respond to an invitation to correct that mistake.

While the Senator was speaking, or immediately afterwards, I came into the Senate to make the correction. Now, the fact was, the Senator from Pennsylvania got the floor the moment the Senate had convened. I have read you all he said, which took probably about five minutes. Before he had concluded his remarks I was in the Senate, and shortly thereafter went over to the Senator's seat and asked him if he wanted me to make the correction. I then said:

Mr. President, I desire to make a statement to the Senate that has nothing to do with this debate, but which relates to a correction of a statement which I made on yesterday.

On yesterday I read the evidence to the effect that the Senator from Pennsylvania [Mr. OLIVER] owned 1,000 shares of stock in the United States Steel Corporation. A moment afterwards, in a colloquy with the Senator from Pennsylvania, I made this statement:

"I say, since the Senator wants to make it pointed, that if I owned $500,000 worth of the stock of any company engaged in Government contracts I would not plead for a continuance of those contracts."

This statement was made as to the value of the stock during the course of debate and without any time to look up values. When I used the figures "$500,000" I had in mind the figures quoted in the press as to the value of certain stocks. My attention was called this morning by the secretary of the Senator from Pennsylvania to the fact that this particular stock was not worth $500 a share, which it would have to be in order to make the aggregate $500,000, but that it was worth only $117 a share, which would make the aggregate amount $117,000. I stated to the Senator's secretary very readily that I would make the correction, but I left my office to come to the Senate just before 12 o'clock, and I was detained by a gentleman who called on me. Therefore, during my absence, the Senator from Pennsylvania asked to have the RECORD corrected on his own motion, so that the figures "$117,000" will be substituted for "$500,000." Had I been here, I would have asked that that be done myself. I arrived just a few moments after the Senator from Pennsylvania had made his statement.

I am entirely willing, and I ask that the statement be corrected, so that the figures "$117,000" shall be substituted for "$500,000." I am very glad to make this correction in the interest of accuracy.

All I have to say by way of condonation of my own mistake is to remark that it was quite a natural mistake for me to make, because I am not at all familiar with stock quotations and do not follow them. I am glad to make the correction.

Mr. President, there is the statement in all its beautiful accuracy; but we get down to the point that the fact is here, and the Senate and the country will draw their own conclusions from the fact.

At the proper time—I can not do it now unless I can get unanimous consent—but I shall ask unanimous consent for consideration of a motion, which I understand is the only one that can be made under the rules of the Senate, that there shall not be printed at the Government expense more than 100 copies of this document, and that the franking privilege shall be denied any of these documents in addition to the 100 copies.

Mr. PENROSE. Mr. President, I shall feel prompted to object to the motion, because I consider it unnecessary. The standing orders of the Senate restrict the number of these documents to 1,600, and I do not think any great amount of damage can be done by having 1,600 copies printed.

Mr. REED. One thousand six hundred will be printed at the public expense. But additional copies can be ordered from the Government Printing Office and obtained at substantially the cost to the Government. There is no limit to the amount; it may be 16,000 or 160,000 or 16,000,000 copies, and the entire 16,000,000, if that many are ordered, can be sent out under the franking privilege.

Mr. PENROSE. Only by a Senator or a Representative.

Mr. REED. Why, certainly; and it is not hard to tell who the two Senators will be whose franks will be abundantly offered.

Mr. SMITH of Georgia. Mr. President, if the Senator will allow me, I desire to make the point that a Senator has not the right to send them unless he prints them and pays for them with his own funds. He has not a right to do it when they are printed and paid for by a corporation, for example.

Mr. OVERMAN. I want to say that that is being done by individuals now. Certain documents printed by this Congress are being paid for by outside corporations and sent under Senators' franks.

Mr. SMOOT. A million of them.

Mr. REED. There is no question about the fact that that is the habitual practice; and suppose it were not. Let me call the Senator's attention——

Mr. SMITH of Georgia. I was not seeking to raise a question as to what was the practice. I wanted to call attention to the fact that such a practice violated the law and, in my judgment, subjected the man who did it to serious trouble.

Mr. REED. I call the Senator's attention to the fact that if a private corporation were to contribute money to a Senator to pay for these documents there probably would be no way to reach it, except that the Senate might treat it as a breach of the privileges of the Senate.

Mr. SMITH of Georgia. Mr. President, it was not my purpose to interfere with the line of argument of the Senator from Missouri; it was to challenge the propriety of such a distribution.

Mr. VARDAMAN. Mr. President, will the Senator yield to me?

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Mississippi?

Mr. REED. I do.

Mr. VARDAMAN. It occurs to me, Mr. President, that consent having been given in the way that it was, a motion to reconsider the vote by which consent was given is in order. If a bill should pass by unanimous consent, I do not think anybody would contend that a motion to reconsider the vote by which the bill was passed would not be in order. This consent was given without anybody seeming to take notice of it except the senior Senator from South Carolina [Mr. TILLMAN], who consented to the request made by the senior Senator from Pennsylvania [Mr. PENROSE]. I was present in the Chamber, but, being engaged in another matter, did not realize what was being done; and it seems to me that where consent was given in this way, a motion to reconsider ought to be in order.

The VICE PRESIDENT. The Chair has ruled on that question. Bills are not passed by unanimous consent. They are passed by a yea-and-nay vote. That is, the yeas are called for, and the nays are called for. The reason why anybody who voted against a matter can move for a reconsideration of the vote where the yeas and nays are not taken is because they are not recorded, and nobody knows.

Mr. VARDAMAN. Could not a bill be passed by unanimous consent?

The VICE PRESIDENT. Never that the Chair knows of.

Mr. VARDAMAN. Does not the Chair agree that if there is no objection a resolution can be passed by unanimous consent?

The VICE PRESIDENT. Certainly; but there is not any question of doubt in the Chair's mind, this proposition having been taken up this morning, and unanimous consent having been given for the publication of this matter as a public document, that the only way to get rid of it is by unanimous consent.

Mr. KENYON. May I ask the Senator from Missouri a question?

Mr. REED. Certainly.

Mr. KENYON. Has the Senator estimated this matter in any way as to what it would cost to have this document printed?

Mr. REED. I do not know.

Mr. PENROSE. I suppose it will cost a couple of hundred dollars.

Mr. KENYON. I think we on this side have perhaps gotten into the habit of relying upon the Senator from Utah [Mr. SMOOT] to object to these requests for unanimous consent. I think he has announced a number of times that he was going to object to such requests, and I am surprised that he sat quiet.

Mr. SMOOT. Mr. President, I was present when the request was made by the Senator from Pennsylvania [Mr. PENROSE], but it was made in this way: The Senator from Pennsylvania stated that on account of certain statements that were ordered to be printed in the RECORD yesterday, requested by the Senator from South Carolina [Mr. TILLMAN], it was thought that the matter presented by him ought to be printed as a public document, and the Senator from South Carolina said that he thought so, too, and had no objection.

Mr. TILLMAN. I said I had no objection. I did not say that I thought it ought to be printed as a public document.

Mr. SMOOT. I so understood the Senator, but I must be mistaken. At least, the Senator said he had no objection, and I also thought he said that, on account of the information which was printed on his request yesterday, this also ought to be printed.

Mr. TILLMAN. I said I had no objection.

Mr. SMOOT. Therefore I did not make an objection to it, Mr. President. I hope to see the day when the Senate will take up the printing bill now on the calendar and pass it, and then all questions of this character will never again occur in the Senate. All such requests will take their regular course, as they should do. Every request for the printing of a public document ought to go to the Committee on Printing and be passed on by that committee.

In the past I have tried hard to stop this growing and costly practice, but I became discouraged. Senators would give me to understand that my objection appeared to them as an unfriendly act.

I had some figures in my desk that I wanted to call the attention of Senators to to show the Senate how wild we are going in printing the hundreds of thousands of dollars' worth of next to useless matter at Government expense. It is getting so now, Mr. President, that any crank in the United States can prepare an article upon most any subject, send it to some Senator, and ask him to request to have it printed as a public document, and in most cases it is done. It is of no earthly good for the use of the Senate or for anyone else, but we print them.

Mr. GALLINGER. Rarely ever.

Mr. OVERMAN. Mr. President, I think it is evident that the franking privilege is very much abused. I want to give an instance in my own experience. We all know that immense documents have been sent out by corporations under frank at the expense of the Government, costing hundreds of thousands of dollars. I myself had a public document printed. I sent out the usual number that was allowed to me. A gentleman who had them printed sent some money to me and asked me to have additional copies printed so that he could send them out. I told him I did not think I had the power to do it. I have been criticizing this method of using the mails, of printing documents for distribution by other than Senators, and I declined to do it. He sent the request to another Senator. I will not mention that Senator, and I will not criticize him for doing it. When I refused, he sent it to another Senator and had it done, and then to another Senator and had it done. So you see the evil effects of this practice. In one case it cost the Government, I know, $50,000; and I know now of a document—I am informed by the document room—of which a million copies were sent out at Government expense, and how much it cost the Government God only knows.

Mr. ROBINSON. Will the Senator from Missouri yield to me just a moment?

Mr. REED. I yield.

Mr. ROBINSON. I will ask the Senator from North Carolina if he does not know of another case in which a certain pamphlet designated the "Truth About Sugar" was printed and published and circulated under a Senator's frank? In that case I am informed that a suit is now pending, brought by the Post Office Department, for approximately $71,000 to recover postage that should have been paid for the circulation of that document.

Mr. SMOOT. I will state that the reason for the suit referred to by the Senator was because the matter was changed, the department claimed, from the original document submitted

by the Senator who asked that it be printed as a public document.

I will also say to the Senator that there was another document printed in answer to the document "Facts About Sugar" at the request of the Senator from Kentucky [Mr. JAMES]. I do not think, however, that is the proper title.

Mr. ROBINSON. I am not certain about the title of the pamphlet. It was the "Truth About Sugar," or "Sugar at a Glance."

Mr. SMOOT. "Sugar at a Glance" is correct.

Mr. ROBINSON. But it was a document in the interest of the Sugar Trust, and it was circulated at the expense of the Government.

Mr. SMOOT. The other one was in favor of the Refiners' Trust.

Mr. OVERMAN. They had a right to do it, but not when it was changed, as the Post Office Department claims. The fact is, the printing bill ought to be passed.

Mr. SWANSON. Will the Senator from Missouri yield to me for a moment?

Mr. REED. I will be through in a moment. I was about to conclude.

Mr. SWANSON. I wish to suggest that Rule XIII provides that—

When a question has been decided by the Senate any Senator voting with the prevailing side may, on the same day or on either of the next two days of actual session thereafter, move a reconsideration.

Mr. PENROSE. That is a vote.

Mr. SWANSON. The second clause of the rule provides that—

When a bill, resolution, report, amendment, order or message upon which a vote has been taken shall have gone out of the possession of the Senate and been communicated to the House of Representatives the motion to reconsider shall be accompanied by a motion to request the House to return the same.

I do not see why this should not be reconsidered like anything else. The order was made by unanimous consent; it does not follow that it is finally disposed of, and the only remedy is by a motion to reconsider. It seems to me the Senator from Missouri can bring this matter up later by entering a motion to reconsider.

Mr. REED. There was no vote. There having been no vote, of course no one voted.

Mr. SWANSON. That is the only way it can possibly be remedied. The motion may be entered to reconsider, and to-morrow we can consider it.

Mr. GALLINGER. Does the Senator think that a unanimous consent can be rescinded by a vote of the Senate?

Mr. SWANSON. A unanimous consent can pass a bill.

Mr. GALLINGER. This is not a bill.

Mr. SWANSON. It is an order of the Senate, and a vote to reconsider can be passed by unanimous consent.

Mr. GALLINGER. The Senate can set aside a unanimous-consent agreement only by another unanimous-consent agreement, according to our rule.

Mr. SWANSON. Does the Senator hold that if a bill is passed by unanimous consent it can not be reconsidered by unanimous consent?

Mr. GALLINGER. I do not see how any Senator would have the right under our rules to move a reconsideration.

Mr. SWANSON. I suggest to the Senator from Missouri to enter a motion to reconsider and let it come up to-morrow.

Mr. SMOOT. I wish to call the attention of the Senate to Rule XXIX, in relation to the printing of documents. It specifically provides that—

Every motion to print documents, reports, and other matter transmitted by either of the executive departments, or to print memorials, petitions, accompanying documents—

And so forth. I will not read the whole rule—

shall, unless the Senate otherwise order, be referred to the Committee on Printing.

Now, unless unanimous consent had been given, it would of necessity have gone to the Committee on Printing.

Mr. REED. Let me ask the Senator this question.

Mr. SMOOT. But unanimous consent was given.

Mr. REED. Was there any order made that this document should not go to the Committee on Printing?

Mr. SMOOT. No; unanimous consent was asked that it be printed as a public document when it was presented to the Senate, and that unanimous consent was given. If there had been objection, necessarily it would have gone to the Committee on Printing.

Mr. FLETCHER. Mr. President, may I interrupt the Senator from Missouri on this subject? Perhaps, as the chairman of the Committee on Printing, I am expected to say something, inasmuch as it involves the law and the rule governing the printing of documents.

The law is that when a document is presented and a motion is made to print it, unless it is accompanied by an estimate as to the cost it must go to the Committee on Printing. By unanimous consent, of course, that can all be waived and the document can be ordered printed. When this document was presented I was absent from the Chamber attending a meeting of the Committee on Military Affairs, and I know nothing about what has taken place except what I have heard in the discussion since just coming into the Chamber.

The number of copies printed of a public document would be about 1,245 under the present rule of distribution. Additional copies can be ordered by any Senator who pays for those additional copies at an advance of about 10 per cent above the cost. So the Government does not lose anything by the printing of additional copies, but, rather, makes when additional copies are ordered. Any Senator can order those copies printed and pay for them. He must take the responsibility of ordering them. It is utterly immaterial whether he permits some person interested in the subject to furnish the funds with which to print them or not. He has a perfect right to do that. If it is a matter which is of great public importance to the whole country, it may be worth while for those who feel it a public duty and a public obligation to raise the funds necessary to print it as a public document. There is no violation of law in doing so; there is no impropriety in doing so. The responsibility is with the Senator to determine whether the document is one worthy of distribution and is of public interest or otherwise.

Mr. NORRIS. Mr. President——

Mr. FLETCHER. I yield to the Senator——

Mr. NORRIS. I want to call the Senator's attention to the fact——

Mr. REED. Mr. President, I call attention to the fact that I have the floor. I do this simply that I may hold it, not to interfere with the Senator.

Mr. JONES. I wish to advise the Senator from Missouri that if he yields further with reference to this matter I shall make the point of order under the rule. I do not want to do it, but——

Mr. FLETCHER. Then I will not, of course, ask the Senator to yield further.

Mr. NORRIS. I ask the Senator from Missouri to yield to me.

Mr. FLETCHER. Except to say that, as has been indicated by others, the printing bill is on the calendar. The calendar has been called over and over again, and objection to its consideration has been raised because it could not be disposed of under the five-minute rule. I have urged the passage of the printing bill. It would correct many of the objectionable features in the present printing law and abuses which occur under that law, and it would save the Government from $700,000 to $800,000 a year in expenditures. I want to get the printing bill before the Senate, but under the conditions here it has been impossible to do so.

Mr. NORRIS. Mr. President——

Mr. SWANSON. I dislike——

Mr. REED. Since notice has been served on me by the Senator from Washington that I must not yield without yielding the floor, and as I have only a few words to say, while I desire to allow the Senator from Nebraska——

Mr. NORRIS. I think I could ask the Senator a question without any danger of taking the floor from him.

Mr. REED. Very well.

Mr. NORRIS. I will put my suggestion in the form of a question. I will ask the Senator from Missouri if it is not true that while, as the Senator from Florida says, the number is limited, and after that somebody will have to pay for the printing if a larger number is called for, after they are printed they are sent through the mail without limit? There is no law limiting the number that can be sent through the mail under a frank without the payment of postage?

Mr. REED. That brings me to the single observation that I desire to make in order to conclude what I have to say, and but for the colloquies that have gone on I would have been through long ago.

The Senator from Pennsylvania [Mr. PENROSE] estimates that it will cost but $200 to print this public document. He gave that answer in response to an interrogatory by the Senator from Iowa [Mr. KENYON].

Mr. President, that is not the point at all. When this document has been made a public document it can be printed to the number, I believe, of 3,500 copies at Government expense. If that were all that is involved in this question, I would not take the time of the Senate to discuss it.

Mr. PENROSE. One thousand five hundred.

Mr. REED. Well, 1,500. I care nothing about that. But when it is made a public document, two things result.

First, it goes out to the general public as a document of such dignity and importance and truth that the Senate of the United States has solemnly concluded that it ought to be furnished to the public under the sanction and authority of the Government itself. Hence, instead of going to the people as a mere pronunciamento by an interested party it goes out with the brand of approval by the Government upon it.

The second proposition is that there is no limit upon the number of copies that can be printed in the Government Printing Office, provided somebody pays for it, and there is no limit upon the number any Senator may send out or permit to be sent out under his frank. So "the bug under the chip" is the franking privilege which this private corporation has this morning gained the right to use by the unanimous consent of the Senate. And we are told that a unanimous consent is like the laws of the Medes and the Persians, it can not be altered.

Mr. President, "Sugar at a Glance" went out as a public document. I doubt whether the Senator who introduced that document had the slightest idea it would be used in the manner it was, but the country was literally flooded with it. Other documents that I need not refer to have been sent out; I think in one instance over a million copies of a document were franked. This has already been said by other Senators this morning.

The document now in question is made a public document, first that it may have the franking privilege, so that this enormously rich private corporation shall enjoy the right to send its literature and its message and its appeal to the country without paying a penny of postage, while every farmer and every mechanic and every merchant and every private citizen must pay the full postage for everything he sends.

Second, that it may appear that the Government's sanction has been put upon this ex parte statement, and that some people will be led to believe it to be an official statement issued by the Government itself. I say so for the reason that the document has already been printed, printed as you will observe in all sorts of fancy type upon elegant paper and in sufficient numbers, so that Members of Congress to whom it professes to be an appeal have already been furnished with it.

There was, therefore, no necessity for making it a public document in order to bring it to the attention of Congress. There was no necessity for making it a public document in order to bring it to the attention of the country, because it is already printed. All that this beneficent and kindly institution, that by its own confession has plundered it for 29 years, can gain by the franking privilege is to escape the postage, for if it wanted to pay the postage, the document already being printed, all it has to do is to put a Government stamp upon it and put it in the mail.

I understand—I do not know that I am accurate—that the postage upon this particular document costs 56 cents, although that may be a mistake. The Senator from New Jersey [Mr. MARTINE], however, gives me that information.

Mr. MARTINE of New Jersey. That is my knowledge of it. I think the stamps on the envelope I received indicated 50 or 56 cents.

Mr. LANE. I footed it up. It amounted to 56 cents on the copy I received.

Mr. MARTINE of New Jersey. Then I am verified.

Mr. PENROSE. Mr. President, I ask for the regular order. I intend to address the Senate when the Senator from Missouri is through, and I raise the point of order that this informal colloquy is not in order.

Mr. REED. I am not responsible for it.

Mr. PENROSE. I know the Senator is not. I ask for order in the Chamber, and that the Senator from Missouri may be allowed to conclude his remarks.

Mr. REED. Now, Mr. President, it was said in the old days corporations had too much influence in the halls of legislation. It was charged that this was true in the general assemblies of States. It was charged that this was true in the Congress of the United States. It was believed by many people that great institutions came to Congress to obtain special privileges. It was believed that too often their attorneys, their representatives, their hirelings, their stockholders sat in the Halls of Congress and voted the money of the people into the coffers of their respective corporations.

The people of the country had some reason to believe that these influences were at work, that they were too potential, that their arms were too long and their fingers too active, that the Public Treasury and the public right suffered by reason of the services of such men.

Against that a protest nation wide was heard. It took many forms. It produced many varieties of organization and of party. The insurgent element of the Republican Party came into being in protest against such conditions. It rose to such power as to temporarily overwhelm within the Republican Party the emissaries of the old régime.

There met down at Chicago only four short years ago a seething and almost turbulent crowd of representatives of the revolt against the authority of the big interests. They were excited, earnest, determined that they would overthrow the sinister and evil influences within the old party of which they had once been a part. Ah, what a gallant sight it was as these knights of reform assembled upon the field of Armageddon. They came in glittering armor, with burnished swords, their gallant banners waving in the breeze, and the song Onward Christian Soldiers rolling in a volume of noisy harmony from their enthusiastic lips. They denounced by name certain men as betrayers of the Republican Party and likewise as betrayers of the public interest. They denounced specifically the measure their distinguished men had fastened upon the country. They condemned in voices of thunder the iniquities that have grown up. And so for four years the country turned to that element as at least a force so great, so potential, and so earnest that it would prevent a recurrence for many years to come of the old methods of the old régime.

But, sir, they had another convention in Chicago. The insurgents met in one hall and the old régime assembled in another hall. The insurgent with his eyes turned ever toward the conspicuous if not beautiful figure that had led them in the fight four years before waited now upon him, staked the very salvation of their party and their cause upon his word.

The old régime, "wiser in its day and generation than the children of light," proceeded to go on and transact business "in the good old way." It was the wise old crowd. It knew what was going to happen to the soldiers of Armageddon. It understood what was to be the fate of the crusaders. The old bosses had already arranged the program, set the trap, fixed the bait, and were simply waiting for an opportune time when its jaws would close down upon the unsuspecting hands and feet of the insurgents. The Bull Moose had been blinded. His sense of smell even was gone. He was staggering around in the political wilderness without knowledge as to the points of the compass, without hope, and without habitat, but always his plaintive mooings were a sort of inarticulate appeal for a word from his leader and master. The leader waited, waited until both conventions had adjourned, waited until the hour had past when the Bull Moose might recover from the blow of the big stick he intended to wield sufficiently to name some other candidate, waited until the members of the tribe had all returned to their respective homes, and then the big Bull Moose procedded to use his club with brutal and savage force upon those who had followed and almost worshiped him.

I heard it well expressed by a remark. In introduction I remark that I wonder how many Members of the Senate ever lived out in the country. For their information I will state that every boy who has lived in the country knows that the favorite trick of the country boy upon the city lad who comes to visit him is to "take him out sniping." That game, I say for the benefit of the uninitiated from cities, consists in telling the city boy that there are many snipes in a certain ravine, that all you have to do is to hold a sack after dark down at the end of the ravine, with a lighted candle inside the sack, and that the rest of the boys will walk along the ravine and drive toward the sack, that as soon as the snipe see the light they will walk into it. And all the city boy will have to do will be to close its mouth, shoulder his bag of game, and march home in triumph.

That city boy is always impressed with the idea that because he is a guest he is especially favored by being permitted to hold the sack. So they take the poor fellow out some place where it is very lonesome, where he has no company but the silent stars and there are no voices but the whispering winds, and they plant him there and go away and leave him. He has been cautioned that he must not say a word; that he must not utter a sound. So in absolute silence for hours and hours he waits, while the other lads have gone home and gone to bed. That is called "sniping."

I heard of the remark of an old farmer in my State the other day. He had been an insurgent; he had carried the Roosevelt banner; he had sung hallelujahs to the great cause; his voice had been as loud as that of the bull of Bashan and his heart had been as stout as that of any gallant crusader who marched to the Holy Land in the tenth or eleventh century. He was a real soldier of Armageddon. Somebody said to him, "What are your politics?" "Well," he said, "dinged if I know.

I am one of them suckers that Roosevelt took out snipe huntin', but I'll be cussed if I will ever be idiot enough to carry the sack home to him." [Laughter.]

I heard it expressed in another way, and for the delectation of my insurgent friends I will relate that. An old fellow in my State who has reached the point where he is a mere onlooker at events, and with a sort of quizzical and philosophical smile surveys the field, remarked the morning after Roosevelt had declined the nomination, "Well, Roosevelt got all the cats in one bag and just toted them out onto the desert and dropped them, didn't he?" [Laughter.]

I think those two anecdotes absolutely cover the case; but this is the thing I call attention to: The old régime has been mighty modest in the Senate for the last four years. They have feared two forces; they feared the Democracy, which stood here militant, as it to-day stands here, militant yet; but they also feared that element in their own party which has been so well typified and led by the gallant Senator from Wisconsin [Mr. LA FOLLETTE], with whom I often disagree, but whose motives I never challenge. They feared that element. But the field of Armageddon, that four years ago was trampled into dust by the hosts there marshalled, is now covered over with the grass and flowers of forgetfulness. The insurgent has been routed or tricked and betrayed. If you hunt for an insurgent to-day, you are likely to find him with both boots sticking from under a standpatter's bed. [Laughter.] The insurgent party is no longer a potential force. The old crowd is in the saddle.

The first fruit of the supremacy of the old régime is now on display. The Bethlehem Steel Co. has the impudence to come into the Congress of the United States and ask the franking privilege for its advertising matter, and it gets it at the request of a gentleman whom every insurgent in this country from the Atlantic to the Pacific denounced, and the other sponsor is financially interested in the result.

Mr. President, this document may have been so put before the Senate that there is no way to prevent its being printed, but I shall try to find a means to limit the number that shall be printed at the public expense. I presume that it will now be in order for every munition factory whose coffers are bulging with the profits of blood to come here and have its propaganda published. If we grant the privilege to the Bethlehem Steel Co., why not to the Midvale Steel Co.? Why not to the parent of all of them—the Steel Trust? Why not grant it to all of these great concerns? If to them, why not to all corporations having a sufficiently large capital so that they are entitled to direct representation in the United States Senate?

Let me say this word in conclusion: I would not have thus thrust myself upon the time of the Senate while this great bill is before it but that out of the exposure of what is being done for this armor-plate company we may gain this one lesson: The sooner the United States Government takes the last penny of profits out of war the better it will be for our people and for our country; the sooner we make it so that there will be no man in this country financially interested in producing a condition that will make a market for powder, or shot, or shell, or cannon, or saber, the better it will be for our country.

I can not forget that, running along a parallel line with patriotism, also is to be found the hideous form and figure and face of selfishness. I can not forget that running upon the other side of patriotism is the still more hideous and diabolic form of cupidity. I can not forget my history, which tells me that in the great War of the Rebellion, when sons were leaving the arms of their mothers to go forth upon the stricken field, when husbands were saying good-by to wives and children, when *gallant* men were marching forth to bare their bosoms to the storms of war, and when they knew that in the providence of God and the chance of battle, in all human probability, their final bed would be beneath the stars and their winding sheet the snows of winter—that while those men were doing that thing there were plenty of capitalists in this country of the Bethlehem Steel Co. type who were quite willing to sell rotten meat and maggoty bacon and vile flour to be used by the men who were in camp and upon the battle lines. I do not forget that selfishness and cupidity still live in our country. When I see a concern that has been making armor plate and selling it to our Government for more than it had charged foreign Governments I know that it is not as patriotic as it is avaricious. When I see that concern come into this Senate with a document which boldly states that, now it is threatened with Government competition, it will sell steel for less than it has sold it for 29 years past, although, according to its own statement, the price of all labor and material is higher than it has been in 29 years; when I find it coming here with that sort of confession, boldly printed out, I know that it has been robbing my Government. Then, when I see it stoop to the form of petty larceny, through which it seeks to gain the privilege to send out its literature without the payment of a penny of postage to the Government, my gorge rises as will rise the gorge of the country.

Mr. UNDERWOOD and Mr. PENROSE addressed the Chair.

The VICE PRESIDENT. The Senator from Alabama.

Mr. UNDERWOOD. Mr. President, I understand a question has been raised in this debate that it was not in order to move to reconsider a resolution that had been passed by unanimous consent.

Mr. PENROSE. This was not a resolution, Mr. President,

Mr. UNDERWOOD. It was an order, which is the same thing.

Mr. PENROSE. I asked unanimous consent to have the document printed.

Mr. UNDERWOOD. Certainly, but it takes an order of the Senate to print the document; and when it appears in the RECORD to-morrow morning, the RECORD will show that the Senator from Pennsylvania asked unanimous consent to have a certain document printed, and that it was agreed to.

Mr. THOMPSON. Mr. President——

Mr. UNDERWOOD. Let me finish my sentence, please. But when it appears in the Journal it will appear as an order of the Senate adopted by the Senate, authorizing the printing of this document. Now, I yield to the Senator from Kansas.

Mr. THOMPSON. Mr. President, I desire to call the attention of the Senator from Alabama to the fact that the question was never submitted to the Senate as to whether or not it would give unanimous consent. Had it been so submitted, I certainly should have objected. I sat here, and it never occurred to me that the question was put to the Senate. The Senator from Pennsylvania [Mr. PENROSE] simply addressed the senior Senator from South Carolina [Mr. TILLMAN], and being unable to hear what he said I assumed it pertained to some amendment to the naval bill.

I have here a complete record of what was said by various Senators, and if it will not interfere with the remarks which the Senator from Alabama is about to make, I shall be glad to read it.

Mr. UNDERWOOD. I will say to the Senator from Kansas that I, of course, accept the statement of the Chair with reference to the matter as to what occurred, and it is not that point to which I desire to address my remarks.

Mr. THOMPSON. I repeat, that unanimous consent of the Senate was not asked; and no request for unanimous consent was submitted by the Chair to be acted upon by the Senate.

Mr. UNDERWOOD. If the Senator from Kansas desires to read the record of what occurred, he may do so in my time, if there is no objection.

Mr. THOMPSON. I shall be very glad to do so. I read from the reporter's transcript, which has been furnished me, of what occurred, as follows:

> Mr. PENROSE. Mr. President, in view of the data submitted by the chairman of the Naval Affairs Committee [Mr. TILLMAN] in yesterday's CONGRESSIONAL RECORD—and to which, of course, I have no objection—I feel it my duty to make the request to have this statement of the Bethlehem Steel Co., largely bearing on what the chairman has inserted in the RECORD, printed as a public document. I hope the chairman will have no objection to that request.
>
> Mr. TILLMAN. I have no objection whatever, sir.
>
> Mr. PENROSE. I make the request.
>
> The VICE PRESIDENT. In the absence of objection, it is so ordered.

There was, as I have stated, no request for unanimous consent submitted to the Senate. The most that can be said is that a motion of the Senator from Pennsylvania in the form of a request was unanimously agreed to, in which situation any Senator may move for a reconsideration under Rule XIII of the Senate. But in any event it is absurd to say that it is impossible to set aside any order or action of the Senate, whether made by unanimous consent or otherwise.

Mr. UNDERWOOD. Well, I take it—and if I am wrong, I presume the Chair will notify the Senate at once, and close this debate without further discussion—that when that discussion took place in an informal way and the Chair stated there was unanimous consent granted, the clerks at the desk wrote an order for the printing of that document in the parliamentary Journal of the Senate, and that the order stands. Of course, if it does not, the Chair will immediately correct me, and I will sit down. The point that I make, Mr. President, is that if that order is granted by the Senate it is of no more weight, no more influence, no more binding power than if the Senator from Pennsylvania had risen in his seat and asked unanimous consent that he might be allowed to make a motion, and then had made the motion asking that the document be printed. Of course, if he had made the motion in that way, nobody would contest the question that a motion to reconsider would be in order.

Mr. PENROSE. Mr. President, will the Senator permit me to interrupt him?

Mr. UNDERWOOD. Certainly.

Mr. PENROSE. If it had not been done by unanimous consent, the request would have gone to the Committee on Printing under the rules.

Mr. UNDERWOOD. Certainly; but the Senator from Pennsylvania failed to hear the premise of my statement. I said "if the Senator from Pennsylvania had risen in his seat and asked unanimous consent to make a motion," which, of course, would have avoided the necessity of its going to the committee.

Mr. President, we do not amend or reconsider what the RECORD shows; we amend and reconsider what the Journal shows, and in the Journal of the Senate there is written an order in the same binding form if it is made by unanimous consent as if it is made by a vote of the Senate; and certainly that should be the case, for it is on the same basis. When it is done by unanimous consent the order is issued as the order of every man in the body who is in the Chamber, but that is all.

Now, I take it that the Chair can not have in mind any place or any set of rules where a motion to reconsider a motion made by unanimous consent can not be made except in the Senate of the United States. It is certainly not true in the House of Representatives or in any rules that I have read. As to certain orders it is not true in the Senate of the United States, because, in reference to certain orders the rules of the Senate prohibit a motion to reconsider, and specify how the original order shall be reconsidered. Paragraph 3 of Rule No. XII of the Senate Rules reads as follows:

No request by a Senator for unanimous consent for the taking of a final vote on a specified date upon the passage of a bill or joint resolution shall be submitted to the Senate for agreement thereto until, upon a roll call ordered for the purpose by the presiding officer, it shall be disclosed that a quorum of the Senate is present; and when a unanimous consent is thus given the same shall operate as the order of the Senate, but any unanimous consent may be revoked by another unanimous consent granted in the manner prescribed above upon one day's notice.

Now, Mr. President, this rule relates to what? To the passage of bills and joint resolutions? No; this rule relates to a motion—

For the taking of a final vote on a specified date upon the passage of a bill or joint resolution.

In other words, it is in a way a modified cloture rule. It is a cloture rule that we can agree to by unanimous consent, and in the adoption of this cloture rule the rules of the Senate say how it shall be carried out. It does not relate to the passage of a bill or a resolution or an order, but it relates entirely to the question of the fixing of a specific date to vote. Then it says:

And when a unanimous consent is thus given—

"Thus given"; not given generally, but "thus given"; given for the purpose of fixing a specific date for a vote—

the same shall operate—

How?

as the order of the Senate—

Just as if it had been passed by a vote of the Senate—

but any unanimous consent may be revoked by another unanimous consent granted.

What does that relate to? There is not a period between the word "Senate" and the words "but any unanimous consent"; there is a comma separating them. Unquestionably, then, the latter sentence relates to the sentence preceding, and that sentence relates to the first paragraph, where it says "thus given." So that the whole language of the rule is based on the first lines of the rule, which provide that this unanimous consent shall relate to "the taking of a final vote."

I am addressing my remarks to the Chair, and I desire to have the attention of the Chair, because I intend to make a motion to reconsider this order, and the Chair will have a chance specifically to rule upon it.

Mr. President, if that is so, I know of no other rule of the Senate—there may be older Members here who know of some such rule, and if they do I should be glad if they would call my attention to the fact—which prescribes how a unanimous-consent order shall be set aside; and this paragraph in Rule XII unquestionably relates to an order for the closure of debate, and there is a reason for it. The Senate has but one method of closing debate, unless it exhausts itself, and that is a rule providing that it may be closed by unanimous consent; and after the Senate has given unanimous consent for the closure of debate, the most difficult thing to accomplish in any legislative body in the world under the rules of the United States Senate, it was natural and proper that the Senate should impose the restriction that debate could be opened again only in the same way in which it was closed; but that does not mean that it would be impossible for the Senate to reconsider any other vote; in other words, if we debate a bill for days here, carefully consider it, call the roll, and Senators go on record before their constituents as to how they stand upon it, is it to be held that a unanimous-consent agreement to vote on such a measure has not got as much strength and binding power in the United States Senate as a conversation between a Senator on this floor and the Presiding Officer, a conversation that possibly perhaps nine-tenths of the Senate did not hear, but on account of which a unanimous-consent order might be entered, which some day might relate to vital things, and that one Senator alone can put his body between the revocation of that order and justice to the American people? Why, Mr. President, if that is the law of the Senate, then it is a travesty on legislation; it is a disgrace to the representatives of the American people to maintain a rule that in an idle moment, when half of the Senators are absent, would allow the Senate to agree to an order or a bill by unanimous consent, and with reference to which one Senator could prevent any further action in the Senate, no matter if the other 95 Senators were unanimous in favor of revoking the order.

Mr. President, I am not wedded to the rules of the United States Senate. I believe it is the spirit of the American people that the majority is entitled to rule, and, after the minority have had a reasonable opportunity for debate to present their cause to the country, and a reasonable opportunity for amendment to present their program to the country, the majority, under our Constitution and under the sentiment and the ideals of our people, have a right to govern. When you destroy the right of a majority to govern you destroy the genius of the American Constitution and the liberties of the American people.

Mr. ROBINSON. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from Arkansas?

Mr. ROBINSON. Will the Senator from Alabama yield to me to call his attention to the latest precedent on this subject, one made on March 1, 1915, and a case exactly in point? While there may be earlier precedents which seem contradictory as to the right of the Senate to entertain a motion to reconsider when unanimous consent has been given, the most recent decision which I have been able to find, under date of March 1, 1915, is to the effect that a motion to reconsider is permissible, and should be entertained; and in that case it was submitted to the Senate, and the Senate voted upon the motion to reconsider.

Mr. UNDERWOOD. I thank the Senator.

Mr. SMOOT. From what page is the Senator reading?

Mr. ROBINSON. That is on page 4946 of the CONGRESSIONAL RECORD of the Sixty-third Congress, third session. That case, upon a casual reading, appears to be exactly in point, and there are no cases which I have been able to find that conclusively contradict the position taken by the Senator from Alabama. There are two other cases—if the Senator will permit me to conclude——

Mr. UNDERWOOD. I am glad to yield.

Mr. ROBINSON. There are only two other cases I find, upon examination, one in the Sixty-second Congress, third session, when a question as to whether or not a unanimous consent had actually been given was presented to the Senate. In that case the question was raised as to whether or not the reconsideration of an agreement entered into by unanimous consent could be made. The then Presiding Officer, the Senator from Minnesota [Mr. CLAPP], indicated that in his opinion it could not. But that case would not govern, for the reason that it subsequently appeared that unanimous consent had not been given, or at least there was a question as to whether unanimous consent had been given; and the Chair resubmitted the question, and objection was made.

Mr. UNDERWOOD. If the Senator will allow me to ask him, was not the precedent that he is referring to right now a question raised in regard to the reversal of an order for a vote?

Mr. ROBINSON. Yes.

Mr. UNDERWOOD. That is a very different matter. The question of an order for a vote is prescribed by the rules.

Mr. ROBINSON. Yes; but the case that I cite as a precedent for the motion is the latest case, the ruling by the Senator from Florida [Mr. BRYAN], who was then in the Chair, which was not even questioned by the Senate, and was acquiesced in. That was a case where a document had been ordered printed by unanimous consent. The Senator from Oklahoma made a motion, or offered to make a motion, to reconsider the order by which this document had been directed to be printed. Objection was made that the motion was not in order, on the ground that the order had been made by unanimous consent, and could not be rescinded by a motion to reconsider. The

then occupant of the chair made a ruling which appears on page 4946 of the CONGRESSIONAL RECORD of the Sixty-third Congress, and if I am permitted to do so I will read a little of the language.

Mr. UNDERWOOD. I shall be glad to have the Senator do so.

Mr. ROBINSON. The Senator from Oklahoma [Mr. OWEN] used this language:

I had assumed that these documents which were desired to be printed would be printed without objection; but if an objection is made to Order of Business 333, I do not intend that any of these shall be printed on the other side.

Mr. GALLINGER. Mr. President, I desire to submit an observation in the nature of a point of order.

The PRESIDING OFFICER. The Senator will state it.

Mr. GALLINGER. By unanimous consent it was ordered that we should consider the calendar under Rule VIII. Under that rule we are entitled to speak once and for five minutes only. A motion to reconsider is a debatable question, and we may talk an hour on that motion, or 10 hours; but, I think, under the unanimous-consent agreement it ought not to be entertained.

The PRESIDING OFFICER. The Chair is of opinion that the Senate can not be precluded from a motion to reconsider.

Mr. OWEN. I serve notice on the Senators on the other side that if the document provided for in Senate resolution 320, Order of Business 333, is not printed there will not be many of these bills agreed to.

Mr. PENROSE. We can stand it.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oklahoma.

The motion to reconsider was rejected.

If I may be permitted—I shall not insist upon doing so—I want to call attention to the fact that there is a very grave question as to whether or not this unanimous consent was ever given in good faith and in the proper manner. The Senator from Missouri has stated that he made objection to the printing of this document upon yesterday. The request was repeated this morning in his absence, and the record which has been read by the Senator from Kansas [Mr. THOMPSON] was made.

Mr. PENROSE. Mr. President——

Mr. ROBINSON. The printing of a document does not depend entirely upon unanimous consent. The Senate can always determine its attitude upon the subject by a motion to print. It has now come to the knowledge of the Senate and of the Senator from Pennsylvania that many Senators, if they had known he was submitting the request for unanimous consent to print that document at public expense, would have made an objection.

Mr. PENROSE. Mr. President——

Mr. ROBINSON. It does seem to me, now, that the Senator from Pennsylvania, under the circumstances, knowing that the Senator from Missouri had objected to it, and knowing that the Senator from Missouri would have objected to it to-day, if he had not been engaged upon other business of the Senate, would consent to a resubmission of this question, and end this debate, and let us go on with the business of the Senate; in other words, let the Senate say now whether or not it wants to print this document, in view of the record that has been made upon the matter. But if he refuses to do that, if he refuses to make the request or consent that the question shall be resubmitted by unanimous consent—which unquestionably the Chair could do—then, in my opinion, under the precedent, which is the latest one, the Chair can submit the question on a motion to reconsider.

Mr. PENROSE. Mr. President——

Mr. UNDERWOOD. I think I have the floor.

Mr. PENROSE. I have been trying to get the floor for an hour, and perhaps could offer a solution of this problem had I the floor. I indicated my desire to take the floor quite a long while ago, and the Chair failed to recognize me.

Mr. UNDERWOOD. I will say to the Senator that I do not want to lose the floor, as I desire, before taking my seat, to make a motion to reconsider the order; but if the Senator desires, if I can do so without losing the floor, I shall gladly yield to the Senator for an interruption.

Mr. PENROSE. The Senator will get it again.

Mr. FLETCHER. I think I can solve the problem in one minute by reading the rule.

The VICE PRESIDENT. The Chair understands that the Senator from Alabama yields to the Senator from Pennsylvania.

Mr. PENROSE. The Senator from Alabama can get the floor again easily enough. I am not going to make any 24-hour speech.

The VICE PRESIDENT. The Senator from Alabama will not be taken off the floor. He may hold the floor, subject to the interruption for which he has yielded.

Mr. PENROSE. Have I the floor?

The VICE PRESIDENT. Yes; now the Senator has.

Mr. PENROSE. Mr. President, much more commotion has been made over this request of mine than was justified or necessary. I made the request in good faith, desiring to preserve permanent form among the printed documents of the Senate what I considered an important contribution to the armor-plate controversy. I made it entirely of my own volition, without any request from anyone, desiring to preserve important data on a subject which it will be generally admitted has been involved in prejudice, misrepresentation, misunderstanding, and ignorance. Particularly, in view of the fact that I had been defeated in my contention, any liberal-minded participant in the controversy certainly would have desired to deal with me generously, and to have permitted me at least to have shed the light of such information as I had through the preservation of this matter among other data of the discussion.

I have here, Mr. President, an alleged speech, printed by leave in the House of Representatives, by a Member of that body, entitled "The world-wide War Trust," never delivered by him, and therefore equivalent in its character to a public document, the difference being only technical. Three million copies of this document have been distributed broadcast over the United States.

Here is another document, an alleged speech delivered by a Member of the House of Representatives, printed by leave, entitled "The Navy League unmasked," of which several million copies, I am informed, have been franked at the expense of the Government in the matter of postage, and at the expense of somebody else in the matter of printing and publishing, all over the United States.

I have sat here patiently, Mr. President, year after year, and have had my feelings shocked repeatedly by the character of the material presented to the Senate with the request that it be printed as a public document. It has seemed to me that there was no one so lowly in the scale of life or intelligence but that he could have his ideas permanently embodied in a Senate document. Nor has the absence of a Senator ever been an impediment in the way of another Senator who earnestly desired to have some effusion printed as a public document or as a Senate document.

Thus, the printing as a Senate document of "Dr. Friedmann's new treatment for tuberculosis" was proposed here on the floor of the Senate by the junior Senator from New Jersey [Mr. HUGHES]. I objected to it. Later on the senior Senator from New Hampshire [Mr. GALLINGER] made a speech against it; and yet this was subsequently printed as a Senate document during his absence and during my absence—absolutely an advertising proposition, meant to advertise an alleged cure, which was subsequently condemned by every physician in the United States. When I made objection to Dr. Friedmann's "cure" being printed as a Senate document, with the presumption of the Senate indorsement, I received thousands of letters from all over the United States, from reputable physicians, commending me for my course. Yet Dr. Friedmann's alleged cure was subsequently, in my absence, printed as a Senate document and doubtless spread broadcast over the country by persons interested for their own pecuniary profit in foisting an alleged tuberculosis cure upon the American people. The Senate document was used for purposes of private gain of the meanest character, because the "cure" was subsequently pronounced a fraud; and doubtless the act of printing that Senate document has resulted in the death of hundreds, perhaps thousands, of people. It was printed against my protest and in my absence.

Let us hastily glance over the character of some of the Senate documents, Mr. President. We have had such a classic in literature as "Possibilities of a Democratic administration" printed as a Senate document, and doubtless franked to the many million persons who were misguided as to the possibilities of a Democratic administration for their instruction and betterment, at the expense, doubtless, of the Democratic national committee.

Then, looking a little further down, we see "Silk industry in the United States"—a specialty, a private concern, which has had its affairs printed as a Senate document.

Even, Mr. President, when that distinguished citizen, Mr. David Lubin, visited the tomb of Frederick William Raiffeisen the poetical effusions which he uttered on that memorable occasion were printed as a Senate document. I never heard of Raiffeisen. I have no doubt, however, that I will shed tears when I read the poetical efforts of David Lubin on the memorable occasion of his visit to the tomb of that great man.

Then we have another specialty, "International Federation of Master Cotton Spinners and Manufacturers' Associations." There is a private interest, engaged, incidentally, in making the munitions of war, because cotton is one of the important staples of munitions. Yet that is printed and circulated at the expense of the Government for the benefit of the cotton growers of the South without any criticism from any Senator on this floor.

Then, Mr. President, we have a work worthy, I suppose, to rank with the classics of Greece and Rome, with the philosophical and political essays of Aristotle. It is entitled "Democracy and efficiency." That document was doubtless circu-

lated at the expense of the Democratic national committee. I can not imagine anybody else wanting to circulate it.

I need not refer, except in passing, to the frequent publication of the speeches of the Secretary of the Treasury. I do not intend to read the titles. They are too numerous. It would seem that he can hardly deliver himself upon any public question but that some Democratic Senator comes forward and has his remarks printed as a Senate document.

And so I might go on, Mr. President, with a list of Senate documents; but I do not intend to detain the Senate longer upon that subject. Thirteen addresses of President Wilson have been printed as Senate documents, not in connection with his official duties but before public Democratic gatherings—purely campaign matters.

Mr. President, I could have had these data read by myself and inserted in the RECORD, or perhaps I could have had them submitted and made part of the hearings before the Naval Affairs Committee of the Senate; but I did not desire to take the time of this body. My purpose, as I have said, was in good faith to preserve important data for future information. Had the Senator from Missouri conducted himself as befits the dignity of this body, and in a parliamentary manner, and had less of the deportment and the phraseology of the cheap attendant in the court of quarter sessions, I might long ago have ended this discussion.

Mr. REED. Mr. President——

Mr. PENROSE. I do not yield, Mr. President.

Mr. REED. Mr. President——

Mr. PENROSE. I want to finish my remarks.

Mr. REED. Mr. President——

The VICE PRESIDENT. Does the Senator yield?

Mr. PENROSE. I decline to yield.

Mr. REED. I am not asking the Senator to yield. I am rising to call the Chair's attention to the Senator's remarks, to which I am not objecting; but when I do reply in kind—as I certainly shall—I hope the Chair will not call me to order.

The VICE PRESIDENT. The Chair was consulting with the Senator from Arkansas and did not hear the remarks of the Senator from Pennsylvania.

Mr. REED. I know the Chair was.

Mr. PENROSE. Mr. President, I did not say anything reflecting upon the Senator's personal character or his motives. I simply referred to the impression which I got concerning his deportment, which impression I know has been shared by a number of Senators, at least on this side of the Chamber.

Now, Mr. President, I am willing to proceed in this matter according to the rules and in the regular course of procedure; and while it may be irregular for me to make the request, I am willing, if no Senator has any objection, to withdraw the request to have the document printed, and ask to have it referred to the Committee on Printing, following the usual rules of the Senate.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and it is so ordered.

Mr. FLETCHER. Mr. President, in that connection I want to take advantage of this occasion to call attention to the law. It is not a question for the Senate by unanimous consent or by motion to waive. It is a statute of Congress that no document can be ordered printed by either House unless it is accompanied by an estimate of cost from the Public Printer, and I think that law ought hereafter to be lived up to. If the document is not accompanied by such an estimate, it can not be ordered printed, even upon motion.

Mr. GALLINGER. Mr. President, addressing myself to the question before the Senate, whatever it may be, I want to say, in reply to the Senator from Florida, that he is quite as guilty as any other Member of this body, and, I think, more so, of asking that documents shall be printed without estimates being submitted in connection with them. I want to take occasion now, Mr. President, to say that hereafter, in view of what occurred to-day, there will be less unanimous-consent agreements for the printing of documents than have been granted in the past. I have not been an offender in that regard. I do not think I have asked to have five documents printed during my membership in this body. I may have asked, possibly, for that number; but I have allowed all kinds of documents to be printed out of courtesy to the Senator making the request.

Mr. FLETCHER. I have not undertaken to deny that the practice has been to disregard the statute. I am calling attention to the statute. We have not given attention to it heretofore in the Senate as we should have done. Generally when I have asked permission to print a public document I have accompanied it with an estimate of cost.

Mr. GALLINGER. I think the Senator is mistaken about that. Certainly no estimates of cost have ever been given in the case of the documents that have come here from the Secretary of the Treasury and the President of the United States.

Mr. FLETCHER. No; I think not.

Mr. GALLINGER. I said the other day, Mr. President, that I thought the Secretary of the Treasury had about concluded his privilege in that regard; and I now give notice that when the Secretary of the Treasury makes a political speech again and some Senator asks, either without an estimate or with it, that it shall be printed as a document, it will have to be printed by a vote of the Senate.

If we are to draw the line as it has been drawn to-day, and Senators are to be attacked because they have made a respectful request under the rules of the Senate in good faith, and it has been granted—if that is to be the rule—of course we will have to protect ourselves as best we can against incursions into the Treasury by Senators who have been so conspicuously particular about the revenues of the Government on the occasion that has just been concluded.

I am glad the Senator withdrew the request. I apprehend that he was not consulted about this matter at all by any parties in interest. I apprehend that he simply felt that he was doing his duty as a Senator; and I feel that he ought not to have been attacked or his colleague attacked as they have been because of the fact that under the rules of the Senate he made a respectful request.

Mr. SMOOT. Mr. President, I want to say just one word on this matter.

I have before me and over in my office clippings from most of the leading newspapers of the United States commending the objection that I raised to the printing of the temporary chairman's speech in each of the political conventions. I thought it was right to object then. I think so now. The only safe way to do in the future, in my opinion, is to object to every unanimous request to print in the RECORD and insist that every request for the printing of a public document be referred to the Committee on Printing. We fill the RECORD with newspaper clippings nearly every day. I tried for months to stop it, but it created such a feeling that I gave it up. I should like some time to have an expression of the Senate on the subject. I think I shall make a poll of the Senate at some time in the near future, and if a majority of this Senate will agree with me that nothing shall be printed in the RECORD unless it is read into it it will not go in by unanimous consent, and I will guarantee to the Senate that there will not be many newspaper articles read into the RECORD.

I do not know how to get the matter before the Senate, or I would make the motion now that it is the sense of the Senate that the present practice shall cease. But I know that Senators think it is a personal matter when objection is made to such a request. I say the only safe way to do is to object to them all, to see that no more articles shall go into the RECORD unless they are read in there, and that no more public documents shall be printed by unanimous consent, but all requests be referred to the Committee on Printing.

Mr. SMITH of Arizona. Mr. President, I thoroughly and heartily agree with the statement of the Senator from Utah. I want to ask him if he does not think the members of the Committee on Printing should share with each other the responsibility of these objections, and that whoever happens to be present from the committee should object to filling the RECORD with newspaper articles and speeches and matters of that kind?

Mr. PENROSE. Mr. President, just one word more, and I am through. I entirely agree with the statement made by the Senator from Utah, and I concur in the suggestion of the Senator from Arizona that it should be the duty of the Senator from Utah, as the former chairman of the committee and as senior minority member, to object to this improper material being printed as Senate documents or being put in the RECORD, and I pledge myself to help him after to-day.

Mr. SMOOT. I promise the Senate that I shall begin to-day.

Mr. PENROSE. I have sat in this body for nearly 20 years, and I think this request to-day is the second one that I have made during that long period to have a Senate document printed. It was made in good faith and with a desire to preserve important information, and the answer to it was offensive language and epithets.

There are two or three Senators here who are persistent and frequent offenders in connection with having frivolous and often ridiculous matter printed as Senate documents. I have sat here patiently for this long period and have perhaps been wrong in permitting this abuse of Senate privilege; but I will stand by the side of the Senator from Utah from this day on and prevent such ridiculous performances as the account of a visit to the tomb of some one over in Scandinavia, and documents

merely full of epithets and abuse, and other improper material being inserted in the RECORD or in Senate documents.

Mr. SWANSON. Mr. President, if there are no further amendments to be proposed, I ask that the bill be reported to the Senate.

The PRESIDING OFFICER (Mr. ROBINSON in the chair). The bill is in Committee of the Whole and open to amendment. If there be no further amendments to be proposed, the bill will be reported to the Senate.

The bill was reported to the Senate as amended.

The PRESIDING OFFICER. The question is on concurring in gross in all the amendments excepting those reserved by the Senator from Iowa [Mr. CUMMINS] and other Senators.

Mr. NORRIS. I do not think the Chair has included in the statement the reservation that I have made.

The PRESIDING OFFICER. The Chair included all reservations by saying "other Senators." The question is on concurring in the amendments to the bill made in Committee of the Whole with the exceptions stated.

The amendments not reserved were concurred in.

The PRESIDING OFFICER. The question now is upon the amendment offered by the Senator from Iowa.

Mr. SWANSON. I understand all the amendments have been concurred in except those reserved.

The PRESIDING OFFICER. That is correct.

Mr. CUMMINS. I offer the following amendment.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. Strike out, from line 6, page 170, the word "ten," the first word in the line, and insert the word "two"; strike out, from line 9, the words "four of these"; strike out, from line 12, the word "six," the first word in the line, and instrt "four," so that that part of the amendment will read:

> Two first-class battleships, carrying as heavy armor and as powerful armament as any vessels of their class, to have the highest practicable speed and greatest desirable radius of action; at a cost, exclusive of armor and armament, not to exceed $11,500,000 each, to be begun as soon as practicable.
>
> Four battle cruisers, carrying suitable armor and as powerful armament as any vessels of their class, to have the highest practicable speed and greatest desirable radius of action; four of these to cost, exclusive of armor and armament, not to exceed $16,500,000 each, to be begun as soon as practicable.

Mr. CUMMINS. Mr. President, I do not intende to take more than a moment of time in speaking of the amendment which I have offered.

Mr. CLAPP. Mr. President——

The PRESIDING OFFICER. Will the Senator from Iowa yield to the Senator from Minnesota?

Mr. CUMMINS. I yield to the Senator from Minnesota.

Mr. CLAPP. I wish to call the Senator's attention to his amendment. Would it not be a mistake to reduce the number of battle cruisers to four, in line 9, and then leave the limit $16.500,000 as applying to them all? It strikes me under the information the committee has it would be a mistake to provide for any number of battleships and leave the limitation as to all of them at $11,500,000.

Mr. CUMMINS. I am not able to hear the Senator from Minnesota.

Mr. CLAPP. I say, as the amendment of the Senator from Iowa now reads, it would reduce the number of battleships to two, and then the Senator strikes out, in line 9, the word "four." So the section would provide for the building of two first-class battleships, leaving the limitation of $11,500,000 as applicable to all that were authorized under this section.

Mr. CUMMINS. No; Mr. President, the Senator from Minnesota, I think, is wrong. My first amendment changes the paragraph in which it occurs so that it provides for two first-class battleships, at a cost not to exceed $11,500,000 each. My second amendment, which is offered at the same time, is to reduce the number of battle cruisers to four, the cost not to exceed $16,500,000.

Mr. CLAPP. I understand that, but my view was that when the Senate committee authorized it they felt it safe to place a limitation of cost on four at $11,500,000 apiece. It strikes me it might be unwise, if we authorize only two, to leave that limit of cost upon them.

Mr. LODGE. The two remain in the program. I understand the Senator from Iowa allows no battleship for this year; he cuts the program in two, and the two battleships are to be built in three years.

Mr. CUMMINS. Mr. President, my purpose is to reduce the program from 10 battleships to 2.

Mr. LODGE. That is obvious.

Mr. CUMMINS. I assume that the sum fixed by the committee, namely, $11,500,000, is a fair appropriation, or a fair limit, for battleships of this character, so that no change should be made in that regard. It is my purpose to reduce the program with regard to the battle cruisers to four rather than to six, but I have no information that would lead me to believe that a greater amount should be allowed for the construction of each of these cruisers than is contained in the proposed amendment by the committee.

I realize perfectly well that if this amendment is adopted there must be subsequent amendments considered and adopted in order to produce entire harmony, but the chief feature of the new arrangement relates to battleships and battle cruisers. If it is the view of the Senate that we ought not to authorize more than two in addition to those already authorized of the dreadnaughts, nor to authorize more than four of the battle cruisers, the subsequent parts of the amendment can be modified accordingly.

In my view, Mr. President, so far as battleships are concerned, my amendment proposes merely the continuation of a policy that has been recognized in the Congress and in the country for years past. It is intended to continue that policy, for, as I said the other day, I think it is an offense against good government for the United States at this time, before the close of the war in Europe, before we know in what condition the world will be at that time, before we know whether the end of the war will promise peace or will indicate war, to change our policy or materially increase our armament so far as battleships are concerned.

It may be—although I hope, Mr. President, it will not be—that when peace again dawns upon a distracted world it will come in such form as to make war the normal condition of mankind, and will advise us that we must stand ready at a moment's notice to engage the powerful nations of the earth. If the conditions at that time bear no other construction than immediate or approaching war for the United States, then I, for one, believe in such preparation as will enable us to meet that contingency successfully. But if the outcome of the war is such that we can reasonably believe that another long period of peace will intervene between the great nations of the world, then I am unwilling to enter upon a competitive program of armament suggested by this bill.

Mr. President, it seems to me that our highest duty at this moment is to preserve our place in the affairs of the earth unimpaired. It seems to me that we ought to be able to approach the powers of the earth untouched, uncontaminated by the infection that apparently has spread all over the world. We ought to approach this climax in civilization ready to lead the world toward peace instead of inviting it toward war.

This is but a repetition of the sentiments I expressed a day or two ago. We will do civilization a mighty injury if we, the most powerful neutral Nation of the world, shall before the event I have described assume the attitude of a warlike and belligerent power.

My amendment reduces the battle cruisers to four. I have always favored a well-balanced Navy. I have long believed, with the little study I have been able to give the subject, that the two points of weakness in our Navy were, first, the lack of swift battle cruisers, and, second, the want of auxiliary or supply ships, and I have always been willing to strengthen our Navy in these regards. But my object in the amendment I have offered is to tell the world that we have not in this juncture—we have not been in this great sweep of disaster that has covered the world—changed our policy, and that we are proceeding as we proceeded before, moved by the same hope and disturbed by no other fear than assailed us then.

I did not feel just this way with regard to the Army. I was willing to see a marked increase in the Army, because I felt that the conditions in Mexico were so unsatisfactory and unsafe that we needed, purely for the defense of the Nation and the maintenance of peace about our southern border, an Army of the magnitude that we authorized in the late bill, although there were some parts of the measure which did not command my approval.

Mr. President, I will keep my promise and no longer consume the time of the Senate, but simply as a notice, I say, in concluding, that I will ask for the yeas and nays upon my amendment.

Mr. SWANSON. Mr. President, I have been very considerate of all the views of the various Senators in connection with the naval program in Committee of the Whole. I have sought to limit debate as much as possible, but I have not availed myself of an opportunity to lay any amendment on the table except one motion to reconsider, which had been discussed previously. I feel, now that the bill has come into the Senate after debate has been had in Committee of the Whole, that I should avail myself of such parliamentary proceedings as the rules of the Senate entitle me to move to lay amendments on the table.

Mr. CUMMINS. Will the Senator from Virginia withhold that motion just a moment? I recognize his right to make the

motion and I do not intend to resent it. While I think it would be very much better for him to allow a vote upon the merits of the amendment itself, yet the Senator must know that in the Committee of the Whole the Senate committee amendment, toward which my proposal is directed, was adopted with scarcely a dozen Senators in the Chamber. It was adopted contrary not to an understanding but in consequence of a misunderstanding. When I left the Senate Chamber to take my midday lunch I intended to offer the amendment, which I afterwards did offer, to the text of the bill before the Senate committee amendment was adopted. I asked a Senator to suggest the absence of a quorum if the question of adopting the Senate committee amendment should arise.

Mr. SWANSON. I will say to the Senator that I have no objection to having a vote on his amendment, unless the debate is prolonged; but, being in charge of the bill, a number of Senators have told me that I have been too forbearing heretofore. They have said I allowed the bill to drift too much. Under those circumstances, I think I ought to urge a vote as quickly as I can. This question has been discussed in Committee of the Whole. I have no objection to a yea-and-nay vote on the amendment. All I have to say is that, if it is adopted, it destroys the entire program as arranged. Upon this question, Mr. President, I demand the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. ASHURST (when Mr. BECKHAM's name was called). I was requested to announce that the junior Senator from Kentucky [Mr. BECKHAM] has been called from the Chamber on important business, and is paired with the Senator from Delaware [Mr. DU PONT].

Mr. MYERS (when his name was called). I transfer my pair with the Senator from Connecticut [Mr. MCLEAN] to the Senator from Nebraska [Mr. HITCHCOCK] and vote "nay."

Mr. TOWNSEND (when the name of Mr. SMITH of Michigan was called). I announce the absence of the senior Senator from Michigan [Mr. SMITH] and his pair with the junior Senator from Missouri [Mr. REED]. This announcement may stand for the day.

Mr. STONE (when his name was called). I have a general pair with the senior Senator from Wyoming [Mr. CLARK], but I know from his statement to me that he would vote as I desire to vote. So I vote "nay."

Mr. THOMAS (when his name was called). I transfer my pair with the senior Senator from North Dakota [Mr. MCCUMBER] to the Senator from Oklahoma [Mr. GORE] and vote "yea."

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Tennessee [Mr. LEA] and vote "yea."

Mr. WARREN (when his name was called). I am paired with the Senator from North Carolina [Mr. OVERMAN]. I do not see him in the Chamber and therefore I withhold my vote.

The roll call was concluded.

Mr. CHILTON. I transfer my pair with the Senator from New Mexico [Mr. FALL] to the Senator from New Jersey [Mr. HUGHES] and vote "nay."

Mr. REED. I transfer my pair with the Senator from Michigan [Mr. SMITH] to the Senator from Delaware [Mr. SAULSBURY] and vote "nay."

Mr. SMOOT. I desire to announce the unavoidable absence of my colleague [Mr. SUTHERLAND]. He is paired with the Senator from Arkansas [Mr. CLARKE].

Mr. GALLINGER. I have a general pair with the senior Senator from New York [Mr. O'GORMAN], but on questions of this kind I am privileged to vote, and I vote "nay."

I desire to announce that the Senator from Connecticut [Mr. MCLEAN] is unavoidably absent and that he is paired with the Senator from Montana [Mr. MYERS].

Mr. DU PONT. I transfer my pair with the junior Senator from Kentucky [Mr. BECKHAM] to the senior Senator from New Mexico [Mr. CATRON] and vote "nay."

Mr. COLT. I have a general pair with the junior Senator from Delaware [Mr. SAULSBURY]. He would vote as I shall vote on this question, and I vote "nay."

Mr. CURTIS (after having voted in the affirmative). I transfer my pair with the junior Senator from Georgia [Mr. HARDWICK] to the senior Senator from Wyoming [Mr. CLARK] and let my vote stand.

The result was announced—yeas 14, nays 60, as follows:

YEAS—14.

Clapp	Jones	Norris	Vardaman
Cummins	Kenyon	Robinson	Works
Curtis	La Follette	Thomas	
Gronna	Lane	Townsend	

NAYS—60.

Ashurst	Harding	Oliver	Smith, Ariz.
Bankhead	Hollis	Owen	Smith, Md.
Borah	Husting	Page	Smith, S. C.
Brady	James	Penrose	Smoot
Brandegee	Johnson, Me.	Phelan	Sterling
Broussard	Johnson, S. Dak.	Pittman	Stone
Bryan	Kern	Poindexter	Swanson
Chamberlain	Lee, Md.	Pomerene	Taggart
Chilton	Lewis	Ransdell	Thompson
Colt	Lippitt	Reed	Tillman
Culberson	Lodge	Shafroth	Underwood
Dillingham	Martin, Va.	Sheppard	Wadsworth
du Pont	Martine, N. J.	Sherman	Walsh
Fletcher	Myers	Shields	Weeks
Gallinger	Nelson	Simmons	Williams

NOT VOTING—21.

Beckham	Gore	McLean	Smith, Mich.
Catron	Hardwick	Newlands	Sutherland
Clark, Wyo.	Hitchcock	O'Gorman	Warren
Clarke, Ark.	Hughes	Overman	
Fall	Lea, Tenn.	Saulsbury	
Goff	McCumber	Smith, Ga.	

So Mr. CUMMINS's amendment was rejected.

Mr. THOMAS. I move to substitute the House provision, beginning on line 10, page 167, and ending with line 25, on page 169, for the proposed amendment of the Senate committee.

Mr. TOWNSEND. If the Senator will permit me, I wish to submit a proposition to amend the Senate committee amendment. Will the Senator withdraw his amendment for that purpose?

Mr. THOMAS. I am perfectly willing to do so.

Mr. LODGE. A point of order, Mr. President.

Mr. SWANSON. The amendment is a substitute of the Senate committee's provision for the House provision. The Vice President has well ruled that the question must come on the affirmative proposition as agreed to in Committee of the Whole, which is to substitute the Senate committee provision for the House provision.

Mr. LODGE. Precisely. The Senate committee provision is the pending amendment.

The PRESIDING OFFICER. The Chair so declares.

Mr. LODGE. It is an amendment to the House text.

The PRESIDING OFFICER. The Senator from Colorado withdraws his amendment. He has not offered it.

Mr. THOMAS. I have withdrawn it. I have no wish other than that in some way to record an affirmative vote for the House program. If I can do that in any way, I shall be satisfied.

Mr. TOWNSEND. I offer an amendment.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 170, line 6, strike out the word "ten" and insert "four," so as to read "four first-class battleships," and, in line 9, page 170, strike out the words "four of these."

The VICE PRESIDENT. The question is on the amendment of the Senator from Michigan.

Mr. TOWNSEND. Mr. President, this is an amendment similar to the amendment offered by the senior Senator from Iowa [Mr. CUMMINS] as applied to battleships or dreadnaughts, only it reduces the number from 10 to 4 instead of from 10 to 2.

I have offered this amendment, as I gave notice that I would do while the bill was in the Committee of the Whole, believing, as I then said, that four battleships were all that could possibly be constructed within the year or the construction of which could be undertaken within that time. It is not proposed that the construction of any more shall be undertaken within the year. Believing, as I thoroughly do, that a revolution in naval architecture may be suggested within a year, or perhaps sooner, that might disarrange all our plans, believing also that the number of battleships I have named will be quite sufficient for any program which we ought to adopt at this time, I have been moved to offer this amendment.

I do not care to delay the Senate with a discussion of the matter, because should I do so I would but repeat what the Senator from Iowa has so well said on this particular subject. I therefore ask, without further discussion, for a vote, unless some Senator wishes to discuss the amendment.

Mr. SWANSON. This amendment proposes to construct no battleships whatever this year, but only to construct four during three years; it reduces the House program; and I hope the amendment will not be agreed to.

Mr. TOWNSEND. The Senator will understand that under the Senate committee amendment the construction of four battleships is to be begun as soon as practicable; and this amendment will not interfere with the beginning of the construction of all the battleships that could possibly be begun if it is not adopted.

Mr. VARDAMAN. I ask for the yeas and nays on the amendment.

Mr. JONES. Mr. President, I shall take just a moment with reference to this amendment and also as to the question relative to my vote on the amendment offered by the Senator from Iowa [Mr. CUMMINS].

I am in favor of a strong navy, but I do not think that battleships are essential at this time to a strong navy. I believe when the *Deutchland* sailed into Baltimore Harbor the other day it sounded the death knell of battleship construction, as we will recognize by and by when we come to look at these matters more calmly. This we will do in the near future.

I would rather trust to a fleet of 10 submarines having a radius of three or four thousand miles than to a fleet of 10 battleships. If the one fleet were sent against the other, in my judgment far more submarines would come home than would battleships.

Many of the increases made in the Senate amendment I am in favor of. I want to call attention to exactly what the increases are over the House program. The House program is the largest naval program which has ever been presented. The Senate proposes to give 10 battleships, the House none. The amendment proposed by the Senator from Iowa was as large a battleship provision as in any of our naval bills of the past. The House provided for five battle cruisers; the Senate makes it six. I voted to reduce that number because, even with the amendment of the Senator from Iowa, we should still increase the naval ship program over the House program by one capital ship. The Senator no doubt made that statement; but I did not have the advantage of hearing him.

Mr. SWANSON. That is, for three years.

Mr. JONES. Oh, well, that may be, but I say that is provided for in the bill. These ships can all be contracted for by the President as soon as possible after the passage of this bill.

Mr. SWANSON. That is, for three years' construction.

Mr. JONES. Taking the amendment of the Senator from Michigan [Mr. TOWNSEND], as he stated it, it would require the commencement or the construction of these four battleships within the year just the same as does the Senate provision.

Then the House provision carried four scout cruisers, while the Senate provision carries 10 scout cruisers. I am heartily in favor of that increase. We need more scout cruisers; and this increased number of scout cruisers would round out the Navy which we have and make it far more efficient. So I am in favor of that part of the Senate amendment.

Then, the House provided for 10 torpedo-boat destroyers, while the Senate amendment provides for 50. I think that is a very desirable increase in connection with our Navy, and so I am in favor of that. The House provided for 50 submarines, while the Senate amendment increases the number to 67 or 68, including the Neff submarine, provided for in another paragraph.

Mr. SWANSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Virginia?

Mr. JONES. Yes.

Mr. SWANSON. In order that the Senate may understand the statement which the Senator from Washington is making, I desire to state that the program of construction is for three years, and not for one year.

Mr. JONES. Oh, well, we shall have another naval bill at the next session of Congress, and, if it is necessary to go on for three years, we can take care of that in the next bill, that will be here along in February. I would not interfere, I do not interfere, and I do not ask to interfere with the items in this paragraph for the beginning of the construction of these submarines at an early date; in fact, I should prefer to have a provision inserted that every one of them should be commenced as soon as possible. That is what I should like to see done. I am not an expert, but we can use a little commen sense with reference to what is an efficient instrument of war. For reasons that are perfectly plain most naval experts will not concede the superiority of the submarine until they have to do so. A layman is just about as able to determine the efficiency of the submarine as an instrument of war as the expert, and their judgment is more apt to be correct in the first instance than that of the naval expert.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Colorado?

Mr. JONES. I do.

Mr. THOMAS. I am in accord with the Senator's views, but I should like to inquire whether, in his judgment, it would not also be well to substitute for one of these $20,000,000 battleships, a number of airships, in addition to those which are provided for?

Mr. JONES. I should be delighted to vote for a proposition of that kind. It seems to me that there is where we are falling down, if we are falling down at all—in not making more than ample, in fact, abundant provision for these new instruments of warfare which have demonstrated their efficiency, namely, the submarine and the flying machine.

Then the House provided for one fuel ship; the Senate provides for three fuel ships. I am in favor of that increase. We need them, and we ought to have them as soon as possible.

I am not in favor of a three or a five years' program. If we need increases in our Navy, let us get them as soon as we can, and not pass them over to a program of one or two or three or five years, which can be changed at any session of Congress, as the Democratic House did in 1912. Congress meets every year and can take care of any situation that may present itself. If we need these things, we need them; if we need them, we ought to have them, and as promptly as possible. Certainly, as the Senator from Minnesota [Mr. CLAPP] says, if we do not need them now there will be abundant time hereafter to authorize them. Congress will meet again in a couple of months, when we shall have another naval appropriation bill which can make whatever provision may then be deemed wise and necessary. So it seems to me that in this bill we ought to provide for whatever we need, and require it to be commenced and to be finished as soon as possible.

Mr. President, what is the situation? The construction of two of our largest battleships was authorized, I think, about 18 months ago. They have not yet been commenced, and we do not know when they will be begun. This Congress has passed a separate bill providing for the fitting up of two navy yards to complete those battleships. How long it will take to have those yards fitted up I do not know. Those battleships will not be begun until those yards are fitted up.

Mr. President, if that is the way we are going to proceed as to the beginning of the construction of these battleships, we had better quit trying to build up our Navy.

Then we provide for one transport, while none is provided by the House. I think we would have been wise if we had provided for more than one transport.

One hospital ship was provided for by the other House; two destroyer tenders were provided by the Senate and none was provided by the House. I think it is wise to make that provision.

One fleet submarine tender is provided by the Senate, while none is provided by the House. I think it is wise to insert that provision.

One ammunition ship is provided for by the House, and I think the Senate committee has acted wisely in providing for two in the bill.

Two gunboats have been provided for by the Senate, but none has been provided for by the House. If we need gunboats, I think the action of the Senate committee is wise in that respect. I have no opinion as to the need of gunboats, and must take the advice of experts with reference to gunboats and their efficiency, and so forth.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Nebraska?

Mr. JONES. Certainly.

Mr. NORRIS. I wish to make a suggestion to the Senator in reference to the gunboats. We used to have a good many of them, but they are out of date now. I remember, however, a few years ago we used the older ships for targets, and I presume these gunboats are provided for in the bill so as to get active practice for the Navy and to be used as targets for the battleships.

Mr. SWANSON. Mr. President, the Senator from Nebraska is entirely mistaken. They are used in China and elsewhere, where it is necessary, and they are used on our own rivers. They are absolutely necessary. They are light-draft vessels and can go where larger vessels can not.

Mr. JONES. Here is another provision in the Senate amendment which I heartily favor. It ought to have gone further:

Provided, That the 66 vessels directed herein to be begun as soon as practicable shall be contracted for or shall be begun in navy yards within six months from the date of the approval of this act.

If we need these ships, I believe in putting something into the bill which will hurry up the work upon them, and not have us come here in a year or a year and a half to find that the ships that we have authorized not only have not been constructed, but that their keels have not even been laid. I think that what I have read is a wise provision.

These are, in brief, my views with reference to the Senate amendment and with reference to the House provision. I want a strong Navy, and I want whatever needs we have now

taken care of. I believe in a much larger number of submarines, fast cruisers, and torpedo-boat destroyers. I think the Senate committee has been very liberal in that respect. As suggested a moment ago by the Senator from Colorado [Mr. THOMAS], I should be glad to take the money provided for the building of one or two of these battleships and to put it into flying machines, submarines, and torpedo boats. I think we not only ought to provide for submarines, but that we ought, if we can do it, to offer some inducement that will lead to the highest possible development of the submarine—not that we should merely copy the submarines that have already been built, but that we should offer some encouragement under which their efficiency will be developed and increased. Certainly we have not yet reached the acme of submarine perfection. Our people ought to be stimulated to develop the highest efficiency along those lines.

Mr. President, briefly, these are my reasons for supporting the amendment of the Senator from Iowa and that of the Senator from Michigan. If those amendments are voted down, I shall vote for the Senate amendment. I know it will go to conference, and I know that there are a good many Senators who are in favor of the Senate committee amendment with the idea that the bill will go to conference and be brought out much different from what is passed by the Senate. I am confident that when the bill does come back the result will be more in line with my ideas and my views now than it will be with the views of some of those who are advocating the larger program.

Mr. BRANDEGEE and Mr. OWEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. BRANDEGEE. Mr. President, I shall take but a moment, I will say to the Senator from Oklahoma, so that he can follow directly after me.

I do not desire to debate this question. I simply want to call the attention of the Senator from Washington [Mr. JONES] to the article inserted in the CONGRESSIONAL RECORD of March 20, 1916, at page 5074, written by a leading British naval expert, Mr. Arthur H. Pollen. The Senator from Washington pins great faith on the achievements of submarines and thinks the day of the battleship is over because of the success of the German submersible *Deutschland* in arriving at Baltimore Harbor. I ask to print in the RECORD at this point the part of Mr. Pollen's article which deals with the submarine and which I have marked.

The PRESIDING OFFICER. If there is no objection, that order will be made. The Chair hears none.

The matter referred to is as follows:

"The most questionable element in the American program is the very large provision of submarines. Fifty fleet submarines and 85 coast submarines, which are to cost in all nearly $80,000,000, make a vast hole in the half billion that it is proposed to spend. As it is in many respects the most striking, so in another it is the most difficult item to criticize. The special circumstances of this war and the very extraordinary circumstances which preceded it, have given the submarine an entirely false importance in the public eye. Essentially, the submarine is a variant of the destroyer. Once within attacking range of an enemy it has what the destroyer has not, the power of delivering a daylight attack, remaining itself almost unseen. But invisibility is not a new attribute. The torpedo boat and the destroyer possessed it at night. Their speed enabled them to deliver the equivalent of unseen attack in the dusk. Except that the submarine's invisibility is more complete, it is the destroyer's inferior. It has less speed; it is less strongly armed.

"But its invisibility does give it a function new to naval war. It has the capacity to pass through waters which are absolutely commanded by surface ships, because it can pass them submerged and unseen. Fleets otherwise powerless to enter commanded waters can now enter them with this form of craft. Thus the German submarines have been at large to a limited extent in the English Channel, and with extraordinary freedom in the North Sea, in the western Atlantic, and in the Mediterranean. They have gone, in point of fact, where no German surface ship could have gone at all. British submarines similarly have penetrated the Sea of Marmora and the Baltic. The first and most striking fact about the submarine, then, is its capacity to enter into and operate in waters that are adversely commanded.

"But once in those waters the power of the submarine is extraordinarily limited. Indeed, its capacity to enter those waters can also be limited. The use of nets, of mines, and of patrols—especially when assisted by aircraft—these at any focal point which submarines coming or going must pass, can do much to obstruct their free passage. The narrower the waters, the easier their control by these means. And even in comparatively open waters great destruction can be and has been done by surface craft upon them.

"But, apart altogether from the dangers to which the submarine is exposed, what is its value when it is at work in hostile waters? It has two weapons, the torpedo and the gun. It can carry but few torpedoes—few, that is, compared with the number of rounds of gun ammunition that it can stow away. The torpedo, too, is an uncertain weapon at the best of times, particularly uncertain when aimed while the submarine is sub-merged. Wherever it is possible, then, the captain of the submarine has done his work with his guns. But as a gunned ship the submarine is the weakest thing afloat. Hence its guns can be used only against unarmed craft. It dare not approach any armed ship on the surface at all. If it has to approach an armed ship submerged, its speed of approach is greatly limited. The highest submerged speed does not exceed the half-power speed of the slowest warship. Hence high speed and a high standard of vigilance in ships which are armed makes them altogether immune from submarine attack except in the rare cases when, by pure chance, their course takes them within the submarine's striking radius. It was thus, it is supposed, that the *Formidable* was destroyed on New Year's Day, 1915. It was thus that the *Lusitania* fell—if the fact that she was within a yard or two of the course she had taken every time she had ever crossed the Atlantic can be described as chance and not as folly. The point, however, is that if the ship is armed the submarine must keep submerged, and if it keeps submerged its maneuvering speed is low, its capacity to get within striking distance very limited, and its weapon very uncertain. If the ship it intends to strike is both at speed and accompanied by destroyers or fast craft, the area of danger to the submarine and the intensity of the vigilance are increased, and the danger from submarines becomes altogether negligible.

"The success of the submarine against the merchantman is to be explained by the fact that merchantmen being unarmed, the submarine has been able to deal with them as any other armed surface ships would do. The speed of the modern big submarine is higher than that of any but a score or so of the fastest liners, and a single 12-pounder is quite sufficient armament to subdue a merchantman if the merchantman is unarmed itself. If submarine attacks on trading ships become recognized as legitimate by civilized nations, then all merchantmen will be armed, and their case will approximate that of the warship.

"But the most remarkable failure of the submarine in this war is its incapacity to do the one thing which even those who thought least of its capacity took for granted. It has entirely failed in its function of coast defense. The German submarines have been unable to defend either the ports of France, the coast of Gallipoli, Salonika, Valona, or the coast of Egypt from the allied battleships and transports. The explanation is simple. It has not been able to interfere with the transport and disembarkation of troops, because these operations have been carried out in waters superficially controlled by the fleet to which the transports belonged. What the submarine could do in defending a coast in waters superficially controlled by its own side will probably never be proved. These are not the conditions in which intending invaders send their armies across the sea. Had the Germans been mad enough to try to land a force in England, I have no doubt that British submarines, acting without any fear whatever of destroyers or other fast craft, could have accounted easily for every transport that got past our battleships, our cruisers, and our destroyers. But I have, if it is permissible to say so, still less doubt that any transports would ever have got past!

"The root of the matter seems to be this: If you command the seas with surface craft, the rôle of the enemy submarine is limited to being a somewhat inefficient guerilla. It can waylay peaceful merchantmen, just as the highwaymen of old in England held up travelers and "bad" men in America have occasionally held up trains. But it has not taken any such toll of British shipping as the privateers took in olden days, and, like the privateers, it has been absolutely incapable of interfering with military communications where the surface is efficiently commanded. In this matter the British submarines have entirely eclipsed the German. Both in the Sea of Marmora and in the Baltic our successes against transports have often been greater in a single week than the German submarines' against our transports in the whole campaign.

"A foolish and most unfortunate statement of the British Admiralty in January, 1915, had attributed to submarines an importance that they never possessed. It was said that the British fleet desisted from the attack on the Germans at the

Dogger Bank because of the presence of underwater craft. I am persuaded that no British admiral could ever have made this excuse—and survived. If enemy submarines are observed at sea, it will no doubt be necessary to avoid passing within range of them. But a suddenly discovered mine field or a well-planned torpedo attack from destroyers each would have exactly the same effect. It would impose upon the commander of a battleship squadron a sudden and, perhaps, a large and violent change of course, but it would be no excuse for flight. If such an excuse were admitted, it would be tantamount to saying that submarines could sweep the sea.

"What is the application of these considerations to the American program? I suggest that the principles to bear in mind are these: The more certain you are of commanding the sea against your adversaries, the more useless submarines will be to you. If you command the seas, you will not want them for coast defense. If you do not command the seas, they will not defend your coasts. They will not help to win command of the sea. You will hardly want them for attacking the enemy's trade, for you are too far from the focal points of any enemy's trade to be able to maintain submarines upon them.

"Take it for all in all, I suggest—while Mr. Daniels's program shows no sign of the idiotic absurdities about submarines that have been put forward on this side—nevertheless, it has been influenced by the great effect the submarine has had on the public and professional imagination. And this leads me to my concluding point.

"It is impossible to get any large change of policy carried in this country unless public opinion is instructed and educated in the issues and principles involved. The same conditions no doubt prevail in America, and may prevail to a still greater extent. But it must be remembered that the details of naval programs are not fit matter to be settled by public acclamation. The scale of the program is certainly so. The objects for which the navy is to be built are so, but the details manifestly are not. If the American statesmen and the American public can agree together as to the standard of strength that their Navy ought to attain, there is only one sound way of insuring that that strength is attained and at the smallest sacrifice. It is to leave the details to be decided by the best expert opinion that your Navy can produce. Remember that you want experts on a great many subjects. Remember also that to put yourselves into the hands of an individual expert is not the only way, and seldom the best way, to secure the best results. The general knowledge of a great service like the American Navy is more extensive, and its judgment is saner, than that of any single man, however gifted he may be. Remember, too, that the criticisms of those who use the things that are provided is far more valuable than the suggestions of those that make them. The program is quite silent as to expenditure on methods, and yet the methods of using weapons are of far vaster moment than the size or power or cost of the weapons themselves. The provisions of a navy is certain to be bungled if it is not guided by the best strategical and tactical brains you have. And the strategical brains will be misled unless they have mastered tactics, and the study of tactics can not begin until the art of using weapons has been brought to perfection.

"If the occasion of a great naval program were made the occasion for organizing a well-proportioned naval staff—not a staff for executive administration, but one for dealing with all naval problems from the point of view of right theory and scientific practice—then a result would be produced far greater and more valuable than can be got by any mere provision of inert and costly things. It is, after all, on the men, and not on the ships, that you rely. See that they have the ships, guns, methods, plans, preparations, training that they ask for.

"ARTHUR H. POLLEN."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Michigan [Mr. TOWNSEND].

Mr. HARDWICK. Mr. President, on February 24, of this year, the distinguished Senator from New Hampshire [Mr. GALLINGER] made these observations on the subject of child labor, which I read from the CONGRESSIONAL RECORD of that day, page 3054:

Mr. GALLINGER. Mr. President, there is simply one question I am going to ask. I am interested in the Senator's discussion of the matter.

Which was a discussion of the child-labor bill by the Senator from Iowa [Mr. KENYON]:

Yesterday I received a letter from a very prominent citizen of my State, a man who has the esteem of our entire citizenship, in which he very calmly discussed this matter. He asked me, it is true, to vote against the bill.

Mr. KENYON. Is he a manufacturer?

Mr. GALLINGER. He is a manufacturer without guile.

Mr. KENYON. There are those, I know.

Mr. GALLINGER. Yes; he has a large establishment that never has had a strike, and where he has the most contented class of men that could be conceived in his employ. He made this point, that if this legislation is constitutional on the ground that it is detrimental to children to work under certain conditions, may the next step not be that it is detrimental to the health of men to work 10 hours in some establishment where they are only working 8 hours in another establishment, and whether we may not go to the point to say that we have a right, based upon the theory of this legislation, to exclude from interstate commerce goods produced by men who are working 10 hours, or probably 12 hours a day, and in that way doing detriment to their health and very likely to their offspring?

That was the point raised, and I should like to ask the Senator, in all seriousness, if that is not a possibility?

Mr. KENYON. I am very glad to answer the Senator as best I may, though I doubt very much whether the man who suggests a question like that to the Senator could be absolutely without guile.

Mr. GALLINGER. If the Senator knew the man he would agree with me that he is a man who holds to the highest ideals of proper life in every regard.

Mr. KENYON. I want to answer the Senator's question fairly. Of course he could have gone further and asked if Congress could go to the extent of saying no article shall be shipped as interstate commerce unless it is produced by a colored man in the light of the moon, and so forth.

Mr. GALLINGER. I do not think that is a fair comparison. He puts it on the point that it was a detriment to health. They very seriously argue in certain quarters that men ought not to work more than eight hours. Indeed, I observed that a gentleman haranguing an audience in Boston Commons said a little while ago that no human being ought to work more than six hours a day. It was upon that basis my correspondent submitted the matter to me.

Mr. KENYON. Now, let me answer the Senator, since he propounded the question. First, the power to regulate commerce is limited by the fifth amendment. If a bill could be passed here providing, as the Senator's friend suggests, that no goods shall be transported in interstate commerce from a factory where men work over eight hours, when they get to the Supreme Court they must take up the general situation of the country as bearing upon reasonableness what the States have done about it, what the sentiment is in the country, and what effect that has upon the country as bearing on the question, whether it is reasonable or unreasonable, whether it is arbitrary or not, and if unreasonable and arbitrary, it is unconstitutional.

That is the best answer I can give. So the Senator can group all that he might ask under that rule.

Mr. GALLINGER. I will say to the Senator that I propounded the interrogatory more particularly for the reason that I propose to send my friend the very able speech which the Senator has made, and I will go further and say that, as a layman, I had very seriously wondered whether this proposed law is constitutional or not. I remember that when Senator Beveridge was so eloquently discussing it, the leading lawyers of this body at that time said to me it was unconstitutional clearly. But I go further and say that, as at present advised, I propose to vote for the bill, leaving the question of its constitutionality to be determined by the courts. I asked my question in entire good faith.

Now, Mr. President, I find according to the CONGRESSIONAL RECORD of yesterday——

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from New Hampshire?

Mr. HARDWICK. I yield to the Senator from New Hampshire.

Mr. GALLINGER. May I ask the Senator the date of that colloquy?

Mr. HARDWICK. February 24 of this year. I find, according to the CONGRESSIONAL RECORD of yesterday, that during the morning hour yesterday the distinguished Senator from New Hampshire made these observations:

Mr. President, I am quite solicitous that the bill that is now under consideration—

That is, the naval bill—

shall be considered as speedily as possible, as there are so many other matters of important legislation that of necessity will come before this body. One of those matters is the child-labor law, which most of the Senators, if not all of the Senators, on this side of the Chamber warmly favor. We desire very much, indeed, that before adjournment shall be taken that important measure shall receive the careful consideration of this body.

Mr. President, personally, of course, I make no criticism of the distinguished Senator from New Hampshire for his change of position. It seems that on February 24 the best opinion he had was that this measure was probably unconstitutional, although he was inclined, being a layman, to be willing to vote for it and to submit the question of its constitutionality to the courts.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Idaho?

Mr. HARDWICK. I yield to the Senator from Idaho.

Mr. BORAH. I do not think the Senator puts that exactly as the RECORD shows it. My remembrance is that the Senator from New Hampshire stated that he was, as a layman, going to vote for the bill.

Mr. HARDWICK. I said that, precisely.

Mr. BORAH. I understood the Senator to say that the Senator from New Hampshire was inclined to vote for it.

Mr. HARDWICK. Well, I read it exactly from the RECORD. I do not want to characterize the Senator's remarks, because I have read them in connection with mine, and they will speak for themselves. The Senator did say then that as at present ad-

vised, indicating that he had no certain position on that question, being a layman, he intended to vote for the bill, although the best information he could get from lawyers was that it was clearly unconstitutional. He recalled that when Senator Beveridge so eloquently presented that measure in this Chamber some years ago all the lawyers of any standing or importance in this body thought it was unconstitutional.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Idaho?

Mr. HARDWICK. I do.

Mr. BORAH. If the Senator will examine the RECORD, he will notice that the observation of the Senator from New Hampshire was made long before the Senator from Iowa had concluded his argument. I think we may well suppose some effects from his able argument.

Mr. HARDWICK. No. I should like to make that concession for the benefit of both Senators or of all Senators; but the argument of the Senator from Iowa, which, by the way, was a very eloquent, persuasive, and able one, had gone far enough to let the Senator pretty clearly catch its drift.

Now, of course, the mere fact that lawyers like the Senator from Idaho and the Senator from Iowa are inclined to believe this measure is constitutional gives it some little standing in court indeed; but for that it would have absolutely none, as both Senators know.

Mr. GALLINGER. Mr. President——

Mr. HARDWICK. I yield to the Senator.

Mr. GALLINGER. When I was told a few minutes ago that the Senator from Georgia was discussing a question which interested me I assumed that it was this very question, and my reply to the messenger was that the Senator from Georgia is so good a friend of mine and so fair-minded a man that I knew he would say nothing that the RECORD did not bear out. Now, if the Senator from Georgia will permit me, I will make a very brief statement; it will take but a few moments.

Mr. HARDWICK. I yield to the Senator, of course.

Mr. GALLINGER. When this matter was before the Senate, and advocated and urged with great ability by ex-Senator Beveridge, of Indiana, the lawyers in this body at that time, on whose opinion I depended to a very great extent, as a rule, stated to me that they believed it to be an unconstitutional measure. That had great weight with me. Most of those lawyers have left the Senate.

Mr. HARDWICK. If the Senator will let me interject a remark there, I believe they were absolutely right, and the Senator had better stick to what they said.

Mr. GALLINGER. I wish merely to add a few additional words. Since that time I have found a change of opinion on the part of some men who at that time held that this was an unconstitutional measure, and one notable instance is a Member of this body, who a little time ago said to me that he would vote for the bill, notwithstanding that he had held heretofore that it was unconstitutional. That has had considerable weight with me; but I think, Mr. President, the Senator from Georgia will agree with me that as a layman, knowing absolutely nothing about law except what I have absorbed as a Member of this body—and sometimes I think I know nearly as much as some other Senators who claim to be lawyers—I think that as a layman I took precisely the right ground when I said that whatever doubt there might be in my mind I should vote for the bill and leave its constitutionality to be tested by the courts—and I take it for granted that it will reach the courts in due time if we pass the bill—and upon that statement I stand to-day. I do really entertain the opinion that it is a very grave quesion whether this act will be constitutional or not, but my opinion would be worth so little that I, of course, would not urge it here or elsewhere. That is all.

Mr. HARDWICK. Mr. President, the Senator is quite right in assuming that the Senator from Georgia would not do the slightest injustice to the Senator from New Hampshire, his position, or his motives about this or any other matter. There is no doubt about that. I do not want to make any mistake in the Senator's position, especially to his disadvantage.

Mr. BORAH. Mr. President——

Mr. HARDWICK. I yield to the Senator from Idaho.

Mr. BORAH. Mr. President, there have been a great many changes of opinion with reference to the constitutionality of the child-labor bill.

Mr. HARDWICK. Is the Senator one of the changes?

Mr. BORAH. No; I can not say I have changed for I am not entirely free from doubt now, but the distinguished leader of the Senator's party has undoubtedly changed his mind.

Mr. HARDWICK. Who?

Mr. BORAH. The President of the United States.

Mr. HARDWICK. Oh, the President of the United States. Has he changed his mind about this?

Mr. BORAH. The President in one of his lectures on constitutional law in 1911 stated his opinion as follows:

> Its power (the Federal Government) is "to regulate commerce between the States," and the attempts now made during every session of Congress to carry the implications of that power beyond the utmost boundaries of reasonable and honest inference show that the only limits likely to be observed by politicians are those set by the good sense and conservative temper of the country.
>
> The proposed Federal legislation with regard to the regulation of child labor affords a striking example. If the power to regulate commerce between the States can be stretched to include the regulation of labor in mills and factories, it can be made to embrace every particular of the industrial organization and action of the country. The only limitations Congress would observe should the Supreme Court assent to such obviously absurd extravagancies of interpretation would be the limitations of opinion and of circumstance.

Mr. HARDWICK. Well, the book he wrote on that subject is right.

Mr. BORAH. I do not call attention to this by way of criticism, for it is a subject which has been very near the border line with a great many constitutional lawyers, and some lawyers, instancing the President and others, who have entertained the view that it was unconstitutional have come to the conclusion now that it is constitutional. I do not think that much can be gained by assailing the Senator from New Hampshire, a layman, even if he has changed his mind in view of the distinguished precedent which he has for his action. It is very probable that these changes by lawyers have been by reason of certain opinions which the Supreme Court of the United States has lately rendered.

Mr. HARDWICK. Well, I have given careful consideration to all of those opinions, and personally I have not been able to come to any such conclusion as that; but did the Senator from Idaho start with the idea that this legislation was constitutional or unconstitutional? At the time the then Senator from Indiana, Mr. Beveridge, for instance, discussed it, did the Senator from Idaho then believe it was constitutional?

Mr. BORAH. I did not have the good fortune to hear the Senator from Indiana, and I do not now recall that I have ever examined his argument, but I will say that prior to the rendition of the opinion by the Supreme Court in some late cases I would have been of the opinion that this bill now on the calendar was unconstitutional. I am not wholly without doubt now, but in view of those opinions I am frank to say I have modified my views. I would not vote for any bill, however meritorious I believed it to be, if I believed it to be unconstitutional, but if there is a reasonable doubt as to its being unconstitutional, or if the court seems to have laid down principles upon which it can be sustained, and I believe it meritorious, I feel free to vote for it. That is the way I view this bill at the present time.

Mr. HARDWICK. I will not take time now, Mr. President, because I do not want to delay the pending bill, to go into the discussion raised by the last suggestion of the Senator from Idaho, although later I expect to discuss that very question with the Senator and before the Senate.

Personally, of course, I make no assault upon the distinguished Senator from New Hampshire for his evident change of heart about this measure, so far as he has changed his heart about it. Assuming, however, that he spoke on yesterday for his party and as its leader upon this floor, it is evident, plainly and indisputably evident, that the purpose of the Senator and his party is to play party politics or to attempt to do so on this great question.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from New Hampshire?

Mr. HARDWICK. I yield to the Senator.

Mr. GALLINGER. Mr. President, the Senator is not quite fair in making that statement. I have no such purpose, and have had no such purpose, I will say to the Senator.

Mr. HARDWICK. Then why did the Senator put that in the RECORD yesterday?

Mr. GALLINGER. Simply because I had a bundle of telegrams coming to me from all over the country in favor of this bill, and a dozen or more letters——

Mr. HARDWICK. On the 26th day of February the Senator was very doubtful about this bill.

Mr. GALLINGER. Yes.

Mr. HARDWICK. And the best he could say about it then was that it was of doubtful constitutionality. Now, how does the Senator explain that? What has happened since then to make the Senator so anxious to have the bill passed at this session?

Mr. GALLINGER. Because I think the people of the country want action on it. That is the only reason.

Mr. HARDWICK. All right.

Mr. GALLINGER. The people I try to represent certainly are anxious about it; and I want to say to my good friend, the Senator from Georgia, that I am quite willing to take a vote on this bill without a word of debate, and I hope we will have an opportunity to do so.

Mr. HARDWICK. All right. I am just expressing my opinion as to what this action means on the Senator's part, with the apparent approval of all his colleagues on the other side.

Mr. KENYON. Mr. President, I simply wish to suggest to the Senator that both great political parties have indorsed a child-labor bill in their platforms.

Mr. HARDWICK. I will come to that presently. I would rather not yield further right now.

I deeply regret and deplore the adoption of such a course by the Senator and his party, yielding to influences that need not be specified here, although they were plainly named in the current press dispatches, the conventions of both political parties have in their recent platforms declared in favor of the principles embodied in this bill, though not in favor of the pending bill specifically. That such a course should have been adopted by either convention in reference to a policy the constitutionality of which is seriously questioned and strongly challenged is, I think, most regrettable.

Of course such action can have no influence upon the vote or conduct of a Senator who entertains the views that I do and who has no doubt whatever that the proposed bill is in express violation of the Constitution of our country. As a Member of this body, I have sworn to support the Constitution of the United States, and not the party platform.

That the Congress has the power, under the flimsy pretext of regulating interstate commerce in an article of trade that is admitted of a perfectly legitimate character and inherently sound, to actually and really control such purely local and domestic questions as the hours and conditions under which labor may be employed in the several States, is so monstrous a proposition that I can not for a moment entertain it. If such a doctrine be established here and upheld by our courts, then our dual system of government is destroyed, and our people will have lost the inestimable blessings of local self-government, so dear to the Anglo-Saxon heart and so essential to the preservation of individual liberty.

That the proposed bill is flagrantly and patently unconstitutional I hope to be able, at a later date, to show, both to the Senate and the country. While I favor just as strong and just as humane legislation on this subject as any Member of this body on either side can possibly favor, yet I do insist that such legislation can only and should only be enacted by the several States of the Republic.

This legislation is not only of grave importance in its economic aspects, but it is also of momentous import to the country and to the people in the preservation of their constitutional system of government, for it is the boldest attempt in the entire history of the Republic to destroy and break down the rights of the States, to demolish the symmetry of the American system, and to utterly disjoint the balance between State and Federal power.

It has been my opinion, therefore, that the measure could not possibly be given that consideration that its great importance not only justifies but demands during the present session, if the Senate is to conclude its labors and Congress is to adjourn within a reasonable time. I still entertain that opinion, and believe it would be far wiser to give this measure careful consideration when we reassemble here in December next. Whether it is to be considered during the present session or later, I can not abate in any particular or to any degree my own fixed and unalterable opposition to it; but, Mr. President, I am unwilling to see my party assailed in any such way or for any such purpose as is indicated by the latest remarks of the Senator from New Hampshire; and it is therefore perfectly satisfactory to me, so far as I have a voice in the matter, for the Senate to take this bill up before the end of the present session, provided only reasonable opportunity is afforded under the rules of the Senate for a discussion of this matter consonant with its great importance.

Let me say, Mr. President, in this connection, that I earnestly believe and urge that we ought also to have an early opportunity to consider, before this session shall end, the bill to restrict immigration, a measure that is not only favored by more than two-thirds of the Members of both Houses of Congress but also by a vast majority of the people of this country.

Mr. BORAH subsequently said: Mr. President, I referred to some extracts in my remarks to-day. I ask leave to insert them in the RECORD in connection with what I said.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. BORAH. Mr. President, in view of the remarks of the Senator from Georgia I desire to ask if I would be in order in preferring a unanimous-consent request at this time?

The PRESIDING OFFICER. The Chair can not pass upon that question until the request is made. The Chair thinks it is in order.

Mr. HARDWICK. The Senator would have to have the roll called first.

The PRESIDING OFFICER. The Chair will ask the Senator to state his request.

Mr. BORAH. Mr. President, I want to submit this request for a unanimous-consent argreement——

Mr. TILLMAN. Mr. President, I will ask the Senator from Idaho not to do anything of that sort. We want to get rid of the naval appropriation bill. If we take up something else, we will be here all day.

Mr. BORAH. It will not take five minutes.

The PRESIDING OFFICER. The Senator from Idaho will please state his request.

Mr. BORAH. I want to request unanimous consent that upon the final disposition of the naval appropriation bill we take up what is known as the child-labor bill and proceed to dispose finally of the original bill and any amendments that may be offered, and that the debate shall be limited to 12 hours on each side.

Mr. SWANSON. Mr. President, I can not consent to any extraneous matter being injected into the consideration of this bill.

The PRESIDING OFFICER. Objection is made. The question is on agreeing to the amendment of the Senator from Michigan [Mr. TOWNSEND].

Mr. JONES. On that I ask for the yeas and nays, on behalf of the Senator from Michigan.

The yeas and nays were ordered.

Mr. GALLINGER. Let the amendment be stated.

The PRESIDING OFFICER. The Secretary will state the amendment.

The SECRETARY. On page 170, line 6, it is proposed to strike out "10" and insert "4," and on the same page, line 9, it is proposed to strike out the words "four of these," so that it will read "four first-class battleships."

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. COLT (when his name was called). Making the same announcement that I made before, I vote "nay."

Mr. REED (when his name was called). I transfer my pair with the senior Senator from Michigan [Mr. SMITH] to the junior Senator from Delaware [Mr. SAULSBURY] and will vote. I vote "nay."

Mr. THOMAS (when his name was called). Announcing the same pair and its transfer as heretofore, I vote "yea."

Mr. TILLMAN (when his name was called). I transfer my pair with the junior Senator from West Virginia [Mr. GOFF] to the senior Senator from New York [Mr. O'GORMAN], and will vote. I vote "nay."

Mr. UNDERWOOD. I desire to inquire whether the junior Senator from Ohio [Mr. HARDING] has voted?

The PRESIDING OFFICER. He has not.

Mr. UNDERWOOD. I have a general pair with that Senator. I understand, however, that if present he would vote as I will. Therefore I cast my vote. I vote "nay."

Mr. WALSH (when his name was called). I have a general pair with the senior Senator from Rhode Island [Mr. LIPPITT], who is absent; but I feel released from that pair on the present vote. I accordingly vote "nay."

Mr. WILLIAMS (when his name was called). I transfer my pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the senior Senator from Tennessee [Mr. LEA] and will vote. I vote "nay."

The roll call was concluded.

Mr. CHILTON. I make the same announcement of my pair and its transfer as before, and vote "nay."

Mr. GRONNA (after having voted in the affirmative). I have a general pair with the senior Senator from Maine [Mr. JOHNSON], whom I do not see in the Chamber. I transfer that pair to the junior Senator from New Mexico [Mr. CATRON] and will allow my vote to stand.

The result was announced—yeas 15, nays 58, as follows:

YEAS—15.

Clapp	Jones	Norris	Townsend
Cummins	Kenyon	Overman	Vardaman
Curtis	La Follette	Robinson	Works
Gronna	Lane	Thomas	

NAYS—58.

Ashurst	Fletcher	Oliver	Smith, Md.
Bankhead	Gallinger	Owen	Smith, S. C.
Beckham	Hardwick	Page	Smoot
Borah	Hollis	Phelan	Stone
Brady	Husting	Pittman	Swanson
Brandegee	James	Poindexter	Taggart
Broussard	Johnson, Me.	Pomerene	Thompson
Bryan	Johnson, S. Dak.	Ransdell	Tillman
Chamberlain	Kern	Reed	Underwood
Chilton	Lee, Md.	Sheppard	Wadsworth
Clark, Wyo.	Lewis	Sherman	Walsh
Colt	Lodge	Shields	Warren
Culberson	Martin, Va.	Simmons	Williams
Dillingham	Martine, N. J.	Smith, Ariz.	
du Pont	Nelson	Smith, Ga.	

NOT VOTING—22.

Catron	Hitchcock	Myers	Smith, Mich.
Clarke, Ark.	Hughes	Newlands	Sterling
Fall	Lea, Tenn.	O'Gorman	Sutherland
Goff	Lippitt	Penrose	Weeks
Gore	McCumber	Saulsbury	
Harding	McLean	Shafroth	

So Mr. TOWNSEND's amendment was rejected.

Mr. KENYON. Mr. President, I move on line 6, page 170, to strike out the word "ten" and insert the word "six"; and on line 9 of the same page I move to strike out the word "four" and insert the word "two."

I am not going to discuss the amendment, any more than to say that it would reduce the number of first-class battleships to six, and provide for the commencement of two of them as soon as practicable, instead of four.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa.

Mr. KENYON. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I make the same announcement of my pair and its transfer as before, and vote "nay."

Mr. COLT (when his name was called). Making the same announcement as before, I vote "nay."

Mr. REED (when his name was called). Making the same announcement as on the last vote, I vote "nay."

Mr. THOMAS (when his name was called). Making the same announcement of my pair and its transfer as before, I vote "yea."

Mr. TILLMAN (when his name was called). Repeating the transfer I made a little while ago, I vote "nay."

Mr. WALSH (when his name was called). Repeating the announcement made on the preceding vote, I vote "nay."

Mr. WILLIAMS (when his name was called). Repeating the announcement made on the last roll call with regard to my pair and its transfer, I vote "nay."

The roll call was concluded.

Mr. POMERENE. I desire to announce the unavoidable absence of the junior Senator from Delaware [Mr. SAULSBURY], and to announce his pair with the junior Senator from Rhode Island [Mr. COLT].

Mr. CURTIS. I have been requested to announce that the junior Senator from Utah [Mr. SUTHERLAND] is paired with the senior Senator from Arkansas [Mr. CLARKE].

The result was announced—yeas 17, nays 58, as follows:

YEAS—17.

Clapp	Kenyon	Robinson	Vardaman
Cummins	La Follette	Shafroth	Works
Curtis	Lane	Thomas	
Gronna	Norris	Townsend	
Jones	Overman	Underwood	

NAYS—58.

Ashurst	Fletcher	Nelson	Smith, Md.
Bankhead	Gallinger	Oliver	Smith, S. C.
Beckham	Harding	Owen	Smoot
Borah	Hardwick	Page	Sterling
Brady	Hollis	Pittman	Stone
Brandegee	Husting	Poindexter	Swanson
Broussard	James	Pomerene	Taggart
Bryan	Johnson, Me.	Ransdell	Thompson
Chamberlain	Johnson, S. Dak.	Reed	Tillman
Chilton	Kern	Sheppard	Wadsworth
Clark, Wyo.	Lee, Md.	Sherman	Walsh
Colt	Lewis	Shields	Warren
Culberson	Lodge	Simmons	Williams
Dillingham	Martin, Va.	Smith, Ariz.	
du Pont	Martine, N. J.	Smith, Ga.	

NOT VOTING—20.

Catron	Hitchcock	McLean	Phelan
Clarke, Ark.	Hughes	Myers	Saulsbury
Fall	Lea, Tenn.	Newlands	Smith, Mich.
Goff	Lippitt	O'Gorman	Sutherland
Gore	McCumber	Penrose	Weeks

So Mr. KENYON's amendment was rejected.

The PRESIDING OFFICER. The question is on concurring in the amendment made as in Committee of the Whole.

Mr. NORRIS. On that I ask for the yeas and nays.

Mr. THOMAS. Mr. President, on page 170, I move to strike out lines 6 to 11, inclusive, and to insert instead of the word "six," on line 12, the word "five," that being the House program with regard to capital ships.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 170 it is proposed to strike out the provision as to battleships, lines 6 to 11 and in line 12, before the words "battle cruisers," to strike out "six" and insert "five."

Mr. THOMAS. Upon that I ask for the yeas and nays.

Mr. NORRIS. May I ask the Senator from Colorado if he will not reach the same result if he asks for the yeas and nays on the pending amendment of the committee?

Mr. THOMAS. No. I will have to vote "nay" then, and I want to vote "yea" for the program of the House.

Mr. NORRIS. But that does not include all of the program of the House.

Mr. THOMAS. It does as to capital ships.

Mr. NORRIS. Yes; that is all, though.

Mr. THOMAS. That is what I want.

Mr. NORRIS. The balance of the program——

Mr. THOMAS. I call for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. COLT (after his name was called). Making the same announcement as before, I vote "nay."

Mr. THOMAS (when his name was called). Announcing the same pair and its transfer as heretofore, I vote "yea."

Mr. TILLMAN (when his name was called). Making the same announcement of my pair and transfer as before, I vote "nay."

Mr. WALSH (when his name was called). Repeating the announcement made by me on the last roll call, I vote "nay."

Mr. WILLIAMS (when his name was called). Making the same announcement regarding my pair and transfer, I vote "nay."

The roll call was concluded.

Mr. REED. Making the same announcement as on the last vote as to my pair and its transfer, I vote "nay."

Mr. BRYAN (after having voted in the negative). I transfer my pair with the junior Senator from Michigan [Mr. TOWNSEND] to the senior Senator from Nebraska [Mr. HITCHCOCK] and will allow my vote to stand.

Mr. MYERS. I transfer my pair with the junior Senator from Connecticut [Mr. McLEAN] to the senior Senator from Nevada [Mr. NEWLANDS] and will vote. I vote "nay."

Mr. CHILTON. Making the same announcement of my pair and its transfer as before, I vote "nay."

The result was announced—yeas 12, nays 65, as follows:

YEAS—12.

Bankhead	Curtis	La Follette	Underwood
Clapp	Gronna	Norris	Vardaman
Cummins	Kenyon	Thomas	Works

NAYS—65.

Ashurst	Hardwick	Overman	Smith, Md.
Beckham	Hollis	Owen	Smith, S. C.
Borah	Husting	Page	Smoot
Brady	James	Phelan	Sterling
Brandegee	Johnson, Me.	Pittman	Stone
Broussard	Johnson, S. Dak.	Poindexter	Swanson
Bryan	Jones	Pomerene	Taggart
Chamberlain	Kern	Ransdell	Thompson
Chilton	Lane	Reed	Tillman
Clark, Wyo.	Lee, Md.	Robinson	Wadsworth
Colt	Lewis	Shafroth	Walsh
Culberson	Lodge	Sheppard	Warren
Dillingham	Martin, Va.	Sherman	Weeks
du Pont	Martine, N. J.	Shields	Williams
Fletcher	Myers	Simmons	
Gallinger	Nelson	Smith, Ariz.	
Harding	Oliver	Smith, Ga.	

NOT VOTING—18.

Catron	Hitchcock	McLean	Smith, Mich.
Clarke, Ark.	Hughes	Newlands	Sutherland
Fall	Lea, Tenn.	O'Gorman	Townsend
Goff	Lippitt	Penrose	
Gore	McCumber	Saulsbury	

So Mr. THOMAS's amendment was rejected.

Mr. CUMMINS. I offer the following amendment.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 167, line 12, after the word "constructed," insert "two first-class battleships, carrying as heavy armor and as powerful armament as any vessels of their class, to have the highest practicable speed and greatest desirable radius of action, at a cost, exclusive of armor and armament, not to exceed $11,500,000 each, to be begun as soon as practicable."

And, before the words "battle cruisers," in line 12, strike out "five" and insert "four," so as to read:

For the purpose of further increasing the Naval Establishment of the United States, the President of the United States is hereby authorized to have constructed two first-class battleships, carrying as heavy armor and as powerful armament as any vessels of their class, to have the highest practicable speed and greatest desirable radius of action, at a cost, exclusive of armor and armament, not to exceed $11,500,000 each, to be begun as soon as practicable, and four battle cruisers, carrying suitable armor and as powerful armament as any other vessel of their class, to have the highest practicable speed and the greatest desirable radius of action, to cost, exclusive of armor and armament, not to exceed $15,000,000 each.

Mr. CUMMINS. Mr. President, this is a proposed amendment to the House text. I shall be but a moment in presenting my views in regard to it. It is my present purpose to vote against the amendment proposed by the committee, but I am not fully satisfied with the House provision. I should like, if possible, to be permitted to choose between the House provision authorizing 2 battleships and 4 cruisers, than to choose between the House provision of 5 cruisers and the Senate provision of 10 battleships and 6 cruisers. I have therefore sought to change the House bill in the part which is sought to be stricken out by the committee amendment so that it would authorize two battleships and four battle cruisers.

I have nothing further to say about it, because I am fully persuaded that the temper of the Senate is in favor of unlimited armament and unrestricted expenditure of the public money for this purpose. I ask for the yeas and nays upon my amendment.

The yeas and nays were ordered.

Mr. UNDERWOOD obtained the floor.

Mr. STONE. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from Missouri?

Mr. UNDERWOOD. I will; and then I want to say something.

Mr. STONE. I desire to direct the parliamentary inquiry for information. We adopted a little while ago, did we not, an amendment reducing the number of battleships from 10 to 8?

Mr. LODGE. If the Senator from Missouri will allow me, this is an amendment to the House provision and not to the Senate amendment. That will come on the substitution of the Senate amendment for the House text. By doing this we simply hamper the conferees and prevent making any arrangement between our program and that of the House.

Mr. STONE. But if this should be agreed to by the Senate, would it increase the number of battleships to 12 or reduce the number proposed by the Senate committee?

Mr. CUMMINS. No; if this amendment is adopted the House provision will then authorize two battleships and four cruisers, and if then the Senate votes against the Senate committee amendment that will be the action of the Senate. If, of course, the Senate afterwards adopts the Senate committee amendment we will then have 10 battleships authorized and 6 battle cruisers.

Mr. SWANSON. It is in an indirect way to accomplish what we have already voted upon.

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from Virginia?

Mr. UNDERWOOD. I do.

Mr. SWANSON. We have already voted as to whether we would adopt the Senate committee program for this year providing 10 battleships and 4 battle cruisers. The House provision is for five battle cruisers and no battleships. We have already voted to reduce the battle-cruiser program of the House and to build 10 battleships. This is simply a repetition of what we voted upon half an hour ago.

Mr. CUMMINS. Is a point of order raised against it?

Mr. SWANSON. No; I do not raise the point of order.

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from Iowa?

Mr. UNDERWOOD. I do.

Mr. CUMMINS. Just a moment. I want to repeat to the Senator from Virginia we have not voted upon this proposition. We voted against reducing the program of the Senate committee from 10 to 2 and from 6 battle cruisers to 4.

Mr. SWANSON. If the Senator will permit me, the difference was as to the authorization that is recommended by the President and indorsed by both parties. There is now provision made for three years' construction.

Mr. CUMMINS. We have not voted, as I look upon it, on any such question. There is no difference beween the four authorized for this year and the six which are not authorized, because the six may be contracted for to-morrow if this bill should pass.

Mr. SWANSON. I want the Senate to understand that the Senator made a motion to eliminate entirely the authorization for two years. Then he made a motion to reduce the construction to two years. All this does is to reduce the House authorization from five battle cruisers to four.

Mr. CUMMINS. It seems to me the Senator from Virginia ought to favor the amendment I have now proposed. It increases the program of the House by two battleships and only diminishes the program of the House by one battle cruiser. If it should happen that the Senate sees fit to approve the House program, rejecting the committee amendment proposed by the Senator from Virginia, we would have, from his standpoint at any rate, a better program than we will have if the Senate rejects the committee amendment and leaves the House provision to stand as it is. Logically he ought to vote, and I suppose he will vote, for my amendment.

Mr. UNDERWOOD. Mr. President, as I understand the proposition before the Senate, the amendment of the Senator from Iowa seeks to amend the language of the House provision and not the Senate provision; that the House provision now carrying five battle cruisers the amendment of the Senator from Iowa will make the House provision carry four battle cruisers and two battleships.

Mr. President, I have not taken any part in this debate because I am not on the Naval Committee, and I do not consider myself an authority on the question. I am in favor of reasonable preparedness. I am not one of those who believe that we can trust the country to love and faith; but I do not think we ought to put on the American people an undue burden, a burden that it is unnecessary for them to carry.

I feel that in the construction of the first line of battleships we are taking many chances. These battleships may be in commission a decade before they go to the scrap heap. Within ten or a dozen years they undoubtedly will be out of commission if the precedents of the past govern the future.

But, aside from that, in the changing conditions of naval warfare these first-class battleships and cruisers may all go to the scrap heap by new naval construction putting them out of business within the next year or two. But I do not say that that is an argument why we should cease building ships entirely. We must build some ships. We must keep a Navy up to a standard that will reasonably protect us in case we are involved in a foreign war, and I am willing to vote for an amendment of that kind.

Now, as between the Senate program of 10 battleships and 6 battle cruisers, 16 ships of the first order, and the House provision of 5 battle cruisers, 5 ships of the first order, I intend, if I have an opportunity to do so, to support the House provision. But I intend now to be more liberal than the House provision. I am willing from my own standpoint to decide the question in a liberal way and accept the amendment of the Senator from Iowa by voting for it, which will cut off one battle cruiser and in place of it put in two battleships.

If we come to that proposition, we will be constructing that this year and authorize the construction, and as the Senator from Iowa has just stated, it does not make any difference whether we make the appropriation this year or not, if the contract is made. The Senate committee bill authorizes the contract to be made for 16 first-class ships. When the contract is made Congress can not revoke the order; we will have to build them and pay for them whether they are out of date or not. I think in the temper of the times we can safely rely on the fact that if we authorize the contract to be made it will be made before the ides of next March. I think it would be impossible to fill the contract at this time. The boats will not be built, the money will not be appropriated for them at this time, but if the contract is made and in the course of the next two or three years we find out we are not building these ships in the right way, that they are not available in modern warfare, and that contingency may happen any day, the contract is made, the indebtedness is created, and the American people must pay for it.

Now, is not the House provision more businesslike? The House provides for building five first-class battle cruisers this year—a very large increase over the program we have had in the past. Last year or the year before we limited our first-class ships to one ship a year. For a few years preceding that we built two. But most of the time they were ships that only cost one-half of the amount that a first-class ship costs to-day.

The House provision is not drifting out into the indefinite and unknown future. It is not authorizing a contract for the building of ships the utility of which may be in great doubt before the contract is delivered. But the House is providing for five first-class ships to be begun now, and letting the Congress of next year and the Congress of the year following determine

what kind of ships it will build in those years, instead of binding the Government to a contract to-day that we may be sorry for to-morrow. I think that is the wise provision. It may not limit this program. it does not necessarily limit the program. The Senator in charge of the bill has just stated that it is not the intention to build all these 16 first-class ships this year; but under the stress and the whip of an existing sentiment we are asked to tie the Government's hands for the future so that this contract can not be changed.

I take it if we build five or six battleships now we will take that step toward preparedness that will be equal in every respect to the Senate provision so far as this year is concerned, and then we leave to the next Congress to determine, when they have the facts behind them and not before them, as to whether the next step is advisable.

Therefore, I intend, if I have the opportunity to do so, to support the House provision for the building of these first-class battle cruisers rather than the Senate provision, but I desire to be liberal about it. The Senator from Iowa seeks to amend the House provision. He seeks to take away from the House provision one battle cruiser and to add two battleships, and although I do not believe in reckless and extravagant appropriations for war expenditures, I am going to try to be reasonable about it. I am going to err on the side of safety in what my judgment tells me. Therefore, I am going to vote for the amendment of the Senator from Iowa because I think it is a better-balanced amendment than the House provision. If the Senator does not succeed in passing it and the issue comes with the House bill as against the Senate committee bill, I shall then support the House provision, which has been carefully considered by a great committee, with experts before it, with the administration aiding it, who reached the conclusion that these five ships are enough for this year, and that next year and the year after it will be left to be decided by the men who are in Congress at that time.

I think that is the wise point from which to look at this question, and I think in a spirit of liberality we can well afford to adopt the amendment offered by the Senator from Iowa.

Mr. SWANSON. Mr. President, I shall not detain the Senate very long. The program as presented in the bill as reported to the Senate was prepared after consultation with the President of the United States, the Secretary of the Navy, the General Board of Experts of the Navy, and the heads of the various departments. The President had recommended a building program in accordance with what most nations had adopted. Japan has a building program extending to 1922, I think.

This program has the approval of those who have considered the matter. The General Board of the Navy have examined it, and they have recommended 4 battleships and 4 cruisers. Japan, as I understand, and as her minister has stated, has a building program for this year of 4 battleships and 4 cruisers of the latest type, and if her finances would permit, she would build this year 4 additional, which would make 12. Those who have had the responsibility of the control of affairs are satisfied that we could not have a shipbuilding program smaller than this. If this building program is accomplished, we still should not have the second navy in the world, but would only have the third navy.

I have the name of every battleship from Naval Intelligence, its size, shape, and so forth, and we are satisfied that this program, recommended and indorsed by the administration, by the General Board, and sustained by the Navy Department, will furnish us a navy which will give us safety and security. It would be useless to build a bridge which does not extend across a river. You had better build no bridge.

We believe that when this program is completed it will mean peace; it will mean no war. We believe, considering the losses that Germany and other nations have already sustained and will sustain, that we shall soon have the second navy in the world, and we believe that it will afford an absolute guaranty for peace. With that view this program has been recommended for the indorsement and support of those who favor an efficient and adequate Navy.

Mr. CUMMINS. Mr. President, I desire to ask the Senator from Virginia a question if he will permit me.

Mr. SWANSON. I have no objection to the Senator doing so.

Mr. CUMMINS. If my amendment were adopted, the House provision would be better than this one, would it not?

Mr. SWANSON. It would.

Mr. CUMMINS. Will the Senator vote for my amendment?

Mr. SWANSON. I do not favor the House provision. It does not provide for enough destroyers. I am not in favor of a provision in preference to that of the committee, and I will not aid it.

Mr. CUMMINS. Then the reason why the Senator from Virginia will not vote for my amendment, I take it, is that he is afraid that if the committee amendment were so amended it would be accepted in preference to the Senate committee amendment.

Mr. SWANSON. I ask for the yeas and nays.

The VICE PRESIDENT. The yeas and nays have been ordered. The Secretary will call the roll.

Mr. COLT (when his name was called). Making the same announcement as before as to my pair and its transfer, I vote "nay."

Mr. REED (when his name was called). Making the same transfer as on the previous vote, I vote "nay."

Mr. THOMAS (when his name was called). Making the same announcement as heretofore as to my pair and its transfer, I vote "yea."

Mr. TILLMAN (when his name was called). Making the same announcement I made a little while ago in reference to the transfer of my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from New York [Mr. O'GORMAN], I vote "nay."

Mr. WALSH (when his name was called). Making the same announcement as on the former roll call, I vote "nay."

The roll call was concluded.

Mr. CHILTON. I make the same announcement as to my pair and its transfer as on the former vote and vote "nay."

Mr. MYERS. I transfer my pair with the Senator from Connecticut [Mr. MCLEAN] to the Senator from Nebraska [Mr. HITCHCOCK] and vote "nay."

The result was announced—yeas 19, nays 60, as follows:

YEAS—19.

Bankhead	Curtis	Lane	Thomas
Brady	Gronna	Newlands	Townsend
Bryan	Hardwick	Norris	Underwood
Clapp	Kenyon	Oliver	Works
Cummins	La Follette	Overman	

NAYS—61.

Ashurst	Husting	Phelan	Smoot
Beckham	James	Pittman	Sterling
Borah	Johnson, Me.	Poindexter	Stone
Brandegee	Johnson, S. Dak.	Pomerene	Swanson
Broussard	Jones	Ransdell	Taggart
Chamberlain	Kern	Reed	Thompson
Chilton	Lee, Md.	Robinson	Tillman
Clark, Wyo.	Lewis	Shafroth	Vardaman
Colt	Lodge	Sheppard	Wadsworth
Culberson	Martin, Va.	Sherman	Walsh
Dillingham	Martine, N. J.	Shields	Warren
du Pont	Myers	Simmons	Weeks
Fletcher	Nelson	Smith, Ariz.	Williams
Gallinger	Owen	Smith, Ga.	
Harding	Page	Smith, Md.	
Hollis	Penrose	Smith, S. C.	

NOT VOTING—15.

Catron	Gore	Lippitt	Saulsbury
Clarke, Ark.	Hitchcock	McCumber	Smith, Mich.
Fall	Hughes	McLean	Sutherland
Goff	Lea, Tenn.	O'Gorman	

So the amendment of Mr. CUMMINS to the amendment of the committee was rejected.

The VICE PRESIDENT. The question is on concurring in the committee amendment.

Mr. SHAFROTH. Mr. President, I desire to move an amendment. On page 170, line 4, I move to strike out the date "1919" and insert in lieu thereof "1921," so as to read:

For the purpose of further increasing the Naval Establishment of the United States the President of the United States is hereby authorized to undertake prior to July 1, 1921, the construction of the vessels enumerated below:

Mr. President, we have heard a great deal of talk about a naval program and the fact that Japan has a naval program extending to 1922. I believe in a reasonable naval program, and, therefore, I do not believe in concentrating all this construction in three years.

In the first place if all these ships are constructed in three years they will not have the modern improvements that come from experience acquired when one ship is built after another. It takes three years to construct a battleship, and hence all of the 16 capital ships will have to be commenced immediately. While too long an extension of the time might be detrimental to the best interests of the Navy, the extension of the program to five years, it seems to me, would be advantageous. To construct all these battleships and battle cruisers within three years would mean practically that they would be of the same type of each class, and on that account we ought to have a five-year program instead of a three-year program.

Furthermore, Mr. President, if this program is to cost $500,000,000, the tax upon the people, if spread over five years, will be $100,000,000 annually instead of $166,000,000 a year if all the construction is completed within three years. That, it seems to me, is something which we ought to take into considera-

tion in determining whether we shall spread out this program or concentrate it within the period of three years.

It is said that the Congress of the United States in the past has been sporadic in its naval appropriations, providing for a large number of ships one year and the next year omitting to provide for any additions to the Naval Establishment. That, of course, is not wise. But, Mr. President, I am afraid that is what will happen under this large bill. If we adhere to this program of three years, there may be another similar large program for the ensuing three years, while if we extend it to five years another extension for the following five years would not be so burdensome on the people, and that would be much better than an extension and duplication every three years.

Mr. THOMAS. Mr. President——

Mr. SHAFROTH. I yield to my colleague.

Mr. THOMAS. I think it would be safe to say, in view of past experiences, that within the next two years it will be claimed that the Navy constructed by these enormous appropriations is not a navy at all; that it is inefficient; that it is weak; that we will still be in a position to deserve and receive the contempt of all the great armed nations of the world, and a still larger program will be insisted upon in the interest of preparedness.

Mr. SWANSON. Mr. President, if the Senator will permit me, he is entirely mistaken. No one claims that these battleships will be useless. I do not see how the Senator got any such misconception as that. The battleship of 11,000 tons and carrying 11-inch guns is still effective against a battleship of the same class, carrying guns of the same size.

Mr. THOMAS. I think that is true, Mr. President.

Mr. SWANSON. But when other nations increase the size of the guns carried by their battleships to 14 inches we have to meet them. Our battleships, carrying 12-inch guns, are not useless, however. They are effective against battleships of the same class in the other navies of the world. The Senator is mistaken in saying that they would be useless. Of course against guns that shoot twice as far and carry twice as much weight of metal that would be true, and that is what makes necessary to a large extent the increase in our Navy.

Mr. THOMAS. Mr. President, I believe the Senator misapprehends the object of my remarks. All I am calling attention to is the propaganda that is constantly being carried on for the purpose of securing these large appropriations. If the Senator has kept up with preparedness literature in any degree, as I have tried to do, he has long since discovered the fact that it is the claim that our present Navy is useless; that it is nothing but a collection of vessels that should go to the scrap heap. I know that is not true, just as the Senator does, but I am satisfied that before this program shall have reached its consummation the same charge will be made against the mighty battleships and battle cruisers provided for in this bill; and the Congress will be told that preparedness is still like the mirage of the desert, something that we can see but never reach.

Mr. SHAFROTH. Mr. President, whether they go to the scrap heap or not, battleships are considered, after a period of 10 or 12 years, to be obsolete, or, at least, to be largely obsolete. I do not want 16 great naval vessels to become obsolete practically at the same time. That is the objection which I have to the plan proposed. If this program is made to extend over five years, there will be more care and deliberation in the planning of the ships. If they are all to be built within three years, it will require quick, hasty action in order to get them ready, and they will practically be all of the same type.

Mr. President, I do not want to detain the Senate. I believe it is wiser to spread this program over five years. I believe it will be better for the Navy, better for each ship, and better for the people who have to pay for these great battleships; and I ask for a vote on the amendment.

Mr. SWANSON. Mr. President, I hope the amendment will not prevail. This program has been fixed at three years upon the advice of the most scientific and best-informed men in the Navy. It seems to me, if we need the ships, we need them as soon as they can be constructed, and those who are most familiar with naval matters concur in that opinion. I hope that the amendment will not prevail, as it will disarrange completely the program.

Mr. LODGE. Mr. President, just a word. The program, of course, could not bind another Congress, but it is well to define the policy. If Senators will examine it, they will see that it is by no means an excessive one. Spread over three years, it means three battleships a year. Generally we have built about two a year. It provides for two battle cruisers a year, and we all recognize the great defect of our Navy is that it has no battle cruisers. If this program is changed to five years, it will then be wholly inadequate and will not meet our situation or our necessities.

Mr. BRANDEGEE. Mr. President, the effect of the motion of the Senator from Colorado [Mr. SHAFROTH] is practically to reduce the proposal for increasing the effective strength of the Navy. It proposes to string out over five years what otherwise would be done in three years and for which other appropriations would be made in the future if it were not for the amendment of the Senator from Colorado.

Mr. President, I am extremely gratified that the Committee on Naval Affairs has decided upon a program. There have been indiscriminate and contradictory appropriations in the past. I introduced a resolution on August 15, 1913, known as Senate concurrent resolution No. 7, asking that the Committees on Naval Affairs of the Senate and of the House of Representatives, or any subcommittees thereof, acting jointly or separately, should inquire:

First. What increase is desirable in the Naval Establishment.

Second. Whether it is desirable and feasible to provide a definite naval program, to extend over a series of years, with respect to the construction of new ships.

Third. In what order the United States Navy ranks among the first eight naval powers in naval efficiency, in view of the number, type, age, armor, and armament of its ships and the quality, skill, and discipline of its personnel.

Fourth. What proportion of our naval fighting efficiency is constantly available for instant active sea service in case of emergency.

The Committee on Naval Affairs made no report upon the resolution, and on the 9th of October of that year I called it up in the Senate and asked for some information from the committee. The committee had not considered it and did not consider it. If the committee had considered that resolution at that time and had conducted that investigation, we would have been just about three years ahead in the preparedness of the Navy.

Mr. President, I have always favored a strong Navy, and I think the stronger we maintain our Navy the smaller Army we will be compelled to support.

Mr. OVERMAN. Mr. President, does not the Army appropriation bill call for as much money as the naval bill—$330,000,000?

Mr. BRANDEGEE. I have not yet seen the Army appropriation bill. Whatever it does require would not be inconsistent with my statement. I say that by as much as the Navy is stronger, by so much can we reduce the Army.

Mr. OVERMAN. I agree with the Senator thoroughly. I have always supported a strong Navy ever since I have been in the Senate; but I agree with him that we do not need as large an Army program as a naval program.

Mr. BRANDEGEE. Mr. President, the situation was that we had determined upon a regular building program of two battleships each year, and in 1912 the House of Representatives, having become Democratic, departed from that policy and passed a bill providing for one battleship and sent it over here. The Senate committee proposed an amendment increasing the number to two, and the department sent a letter over here, which I am going to read to the Senate in just a minute, as it will take only a few minutes. I moved to raise the number to three battleships; and upon that motion, on a yea-and-nay vote, on February 28, 1913—as will appear on page 4312 of the RECORD of that year—21 Senators voted in favor of three battleships. Of this number only two were Democrats. If we had authorized those three battleships then, three years ago, the Navy would have been that number ahead at the present time.

What did the department do? Here I find a very short statement from the Navy Department, which was put into the RECORD by Senator Perkins, who was chairman of the Naval Committee at that time. I will read it:

FEBRUARY 27, 1913.

The President has declared that "Until peaceful means for settling all international controversies are assured to the world, prudence and patriotism demand that the United States maintain a Navy commensurate with its wealth and dignity."

This additional battleship is essential to our peace and prosperity. It is required if we would maintain our national prestige and is a part of the assurance of our national integrity. Its building, rather than being an expense to our people, should be regarded as a source of income in that its fabrication will furnish employment for thousands of workmen in practically all the allied trades throughout the entire country.

The command of the sea can only be attained through are adequate navy.

A battleship requires approximately three years for its construction. In time of actual or impending war the entire wealth of the United States would not permit of the purchase of such a vessel in the markets of the world.

The United States, with its wealth, its extensive coast line, the Panama Canal, the Monroe doctrine, can not be the first of the great world powers to deliberately reduce its naval strength; to do so is but to invite disaster.

The 13-inch guns of the *Oregon*, *Massachusetts*, and *Indiana*, and the 12-inch guns of the *Iowa*, *Kearsarge*, and *Kentucky* are of low velocity and short range when compared with batteries of the modern dreadnaught. In a fleet action these vessels of ours would be annihilated by the modern high-powered vessel fighting from a range that would render them practically immune to any of our 12-inch or 13-inch shells.

By January 1, 1917, Germany will have 26 dreadnaughts in commission and the United States only 15, even if two are now appropriated for.

In spite of the recommendation of the department, only one dreadnaught was authorized by Congress that year.

Mr. President, a navy becomes efficient in two ways: First, if it is strong enough, it scares people from attacking you; second, if you have to fight, by having your Navy strong enough you can whip your enemy. On that point, which seems to me to contain some common sense, I desire to read to the Senate a brief paragraph which appears on page 4428 of the RECORD of this session, under date of March 20, 1916, which is by Arthur H. Pollen, the British expert. He says:

The strength, then, of the Navy that America requires must be dictated by the combined strength of the nations whose hostility to American policy and American ideals there is reason to fear. It is a question not for naval experts but for statesmen to settle. When it is settled, the equivalent of the Navy required may, to a great extent, be determined by arithmetic. Relative battleship strength is the first point, though it is not the only one. When a list has been made of the powers that may become enemy, add their battle fleets together, estimate what their strength is likely to be at any future date, and provide the battleship strength necessary for meeting it. With two final observations I shall leave this part of the subject. The General Board and Mr. GARDNER want a navy equal to the strongest maintained by any single power. If this is an intelligible, it is also a large and costly policy. But remember that it is not so costly as failure to have adequate naval strength when the time of trial comes. Secondly, if you want a successful naval war, provide a force at least 40 per cent greater than that you are likely to meet. If you want an exciting naval war, provide one which is approximately equal. But a navy which is smaller in numbers and less in power than that of the probable opponent is demonstrably worse than useless. It is useless because there seems no rôle at all for an inferior fleet. It neither protects nor enables you to attack. And it is worse than useless, because to possess a great fleet which is not great enough to fight successfully is a waste of treasure and effort and men in time of peace and a source of bitter humiliation in time of war.

Mr. LA FOLLETTE. Will the Senator give the page from which he is reading?

Mr. BRANDEGEE. It is page 5075 of the RECORD of this session—March 20, 1916.

Mr. President, there has been a great deal of philosophy talked upon this subject. The Senator from Iowa yesterday afternoon indulged in a disquisition which embraced the contests which have taken place among civilized nations since the days of Greece and Rome. I do not mean that he did it tediously at all. He did it very entertainingly. But, Mr. President, to draw inferences from previous contests and attempt to apply them to the future, and to regulate your conduct according to them, and stake your all and your future on the theory, the mere guess, that your judgment may be right, is not a safe thing for this Nation to do.

Of course, nobody wants war if he can keep out of it. I do not believe, and I do not believe that anybody else in this country, at least, believes, that we are building a large fleet or increasing our military strength in order to take advantage of any other nation. In my view, we are building it to protect our own rights, to protect our own citizens and their property, and to guarantee that this great democracy—the only great and free one in the world, apparently, so ideally situated to perpetuate itself if it be left alone—shall be perpetuated, and no chance shall be taken about it.

Why, Mr. President, if people believe that there is no possibility of our having to have a war with another nation, I can not understand how they vote for any navy at all. It is a pure waste of money to have any.

When I vote money for building these fighting ships, I am voting that money to build those ships with the idea that some day they may—although I hope they will not—have to fight. That is what they are—fighting machines! I am under no illusion that I am building them to promote good will and peace on earth, except as peace can be promoted by the fear of attacking us. I am building them to protect this country in its rights and to perpetuate this Nation, and if it is necessary to fight to do it, I am willing to do it with the last ounce of vigor and the last gun and the last man in this Nation—and I glory in that attitude.

Some people seem to feel ashamed, if some bandit comes along and threatens their life or their property, to protect themselves. Well, I am not; and I do not think he is a true American who wants to stake the future of his country upon the proposition that he will not fight. I do not believe that the pacifists when they were attacked would stand on their theories. I think they would fight for their homes and their firesides and their native land as courageously as anybody else. They may think they would not, but they would, because they are human.

Therefore, whether you will have an effective Navy, whether you vote "yes" or "no" on this bill, depends upon your guess as to whether you are ever going to need one or not. I hope the people who say we are in no danger and never will be are right. If so, we will have lost the interest on some money; but if they are not right, and we make this provision, we will have saved our country. If they are right, we would have paid so much for insurance. If they are wrong, and we do not have the insurance, the democracy of the world has lost its highest exemplification, and the future would perhaps never be able to restore liberty as we have known it and enjoyed it.

Now, take your choice. Either have no Navy at all or let us have an effective one. I want it strong enough so that there will be a large margin of safety. What is a hundred million dollars for a few more battleships if it decides the fate of the world at the critical minute?

Mr. President, we have been very lucky as a Nation. We have had no serious contests with the more powerful nations of the world. Whenever we have had a war with Great Britain their attention has been diverted and distracted. They have been attacked on the flank and had to confine their attention to European affairs, so that we have won more by the fact of practically having Europe as our ally than through our own unaided efforts.

The Senator from Wisconsin [Mr. LA FOLLETTE] yesterday afternoon, in his very able speech, from his own point of view and those authorities from which he read, seemed to think, if I gathered his idea correctly, that because our coast defenses at certain fixed points were up to date, therefore there was no possibility of an invasion of this country. Why, Mr. President, those coast defenses may be perfectly effective where they are located, but they do not prevent an army from landing in this country. There are many points where they could land which are not protected at all. Only the large cities and strategic points are protected. Canada is entirely unfortified on both coasts, and so is Mexico; and any foreign power could land an army on either coast of either of those countries and march right across an unprotected border. Then of what avail would our coast defenses be, stationary as they are, at New York and San Francisco and other fortified points, with their guns on fixed emplacements?

Of course, the more effective the coast defenses are at any particular point, the more that point is avoided by the invader, if there be one. Now, will there be one? I do not know. I hope not. I think very likely it would take great courage and a great inducement for a foreign power to attempt to invade this country. But, my friends, we have seen remarkable things in Europe in the last two years, which we never would have believed before. Some people think that when this war is over it will mark the end of all danger from Europe and Asia for all time. They say the present belligerents will be exhausted and their treasuries depleted. Why, Mr. President, after we had fought in this country for four years, the greatest war up to that time, we were not so depleted but that when Maximilian was on the throne in Mexico in 1865, and he was warned out, the proudest empire in Europe had to withdraw their army. Nations can be pretty well depleted in their treasuries, but if they have an organized and trained army of veterans, and a naval escort for them, as somebody is going to have when this war is over, they have all the more inducement to come and collect where they can collect and to fill their depleted treasury.

"Oh," somebody says, "that would be the act of a buccaneer." What is going on in Europe to-day? What is going to go on, when terms of peace are made, in the way of demand for indemnities, and things of that kind? We have seen Japan and Russia make war upon each other almost to the point of extermination, and within a few years we see Russia more powerful than she ever was, with armies in the field now which she did not dream she could raise when she fought Japan, and with Japan more powerful on the sea and on the land than she ever was. Both of them are in debt, yes; but are they powerless because they are debtors?

The pacificists and that school which is trying to leave this Nation unprotected, or not sufficiently protected, seem to think that we are never going to assert anything that will get us into trouble.

Mr. President, the Senator from Wisconsin [Mr. LA FOLLETTE], who spoke yesterday, alluded to the way in which Germany had been confined and thwarted in her efforts to successfully expand and acquire the necessities for her industrial development, and he intimated, if I understood him correctly, that restriction by the enemies of Germany was largely the cause of the great war that is going on now.

Mr. TAGGART. May I ask the Senator a question?

Mr. BRANDEGEE. Certainly.

Mr. TAGGART. In the amendment, just before the point where the amendment of the Senator from Colorado applies, it reads:

For the purpose of further increasing the Naval Establishment of the United States the President of the United States is hereby authorized to undertake prior to July 1, 1919, the construction of the vessels enumerated below.

Does the Senator understand by that language that they are to be completed within five years after authorization?

Mr. BRANDEGEE. By or before that period. It undertakes their construction. It takes three years to build them.

Mr. TAGGART. But the point I am trying to find is if we authorize the President to undertake the construction prior to July 1 or after the passage of the bill. The money is appropriated to begin the construction of those ships and they are to be completed within a period of three years.

Mr. BRANDEGEE. What is the Senator's question?

Mr. TAGGART. The question is at what period of time after the passage of this bill and the appropriation could they commence the construction of these battleships?

Mr. BRANDEGEE. I think under the language of the bill they could begin at any time. If the Senator will look down at line 10, it provides that four of these are to be begun as soon as practicable. I suppose it is not possible for Congress to fix the exact date upon which work may be begun. They have first to advertise and get bids, and then there has to be an acceptance of the bids if they come within the authorized price.

Mr. TAGGART. I was wondering if the suggestion made by the Senator from Colorado, if his amendment was adopted, it would still give them an opportunity to build them just as fast as they could, to be completed in that time, namely, five years, and in the meantime, if it was found necessary, as they progress they could be built faster.

The reason why I asked the question is that I am figuring that there are not enough shipyards in the country to build them all at once or in three years, and within a period of five years it would make it a little easier on the taxpayer.

Mr. BRANDEGEE. I get the Senator's idea, but if the Senator is at all correct in his assumption, and I have heard other Senators say it also—to wit, that these ships could not be begun, owing to the limitations of the shipyards—the danger which the Senator apprehends would not occur.

But, Mr. President, if I can help to influence it, even to the small extent of my own vote, I want to see the Government committed to a building program which will amount to something. There is no means of knowing exactly down to the fineness of one ship whether your fleet is going to equal or exceed that of the enemy's fleet. I want to make assurance doubly sure. The expert naval critic from whom I read a few moments ago states that there ought to be 40 per cent margin of superiority to have anything like assurance. We all know the dangers to these great vessels by internal explosion, and when it takes three years to construct a vessel of this kind what would happen if you chance to get the worst of the first fight and lose half a dozen of the large units of your fleet. It might decide the fate of the whole war unless you have some surplus strength.

I want to see these first-class ships constructed as rapidly as possible and put in commission. I have no fear that the program is too large, Mr. President; and I hope that the Senate conferees, if it is passed, will stand by the action of the Senate and will not yield to the House in the attempt to reduce this program. There is too much at stake, Mr. President.

As I was about to say when the Senator from Indiana [Mr. TAGGART] asked me the question and temporarily diverted me from what I had in mind to say, when this war is over and these nations are hungry, bankrupt, those former enemies, or certain sections of them, are sure to become friends again.

The alliances of the European and Asiatic powers are shifting sand. Japan is to-day helping to finance Russia and sell her war material, when a few years ago she was like a tiger at her throat. Great Britain and Russia, which were hereditary enemies, are now allies, fighting their former friend, Germany. At the close of this war, with all the restraints torn down, with international law made a "scrap of paper," with the wreck of Europe lying at their feet, there is nothing at all to prevent Germany and Japan, if you please, or any other European nation, making an alliance with an Asiatic nation, and we may be driven to fight on both coasts of this country.

Do you want to take the chance? Suppose they decide not to touch us, but to go and take Mexico or South America, to get their mineral fields there and to develop their industries, and instead of preying upon each other over there, to take South America and exploit it and develop it. Where do we come in with our Monroe doctrine? Mr. President, we must either defend it or drop it. What should we do without a navy? How could we hold the Philippine Islands without a navy. We must either defend them or abandon them.

There is nothing more probable than that if the Teutonic allies win this war they will pay no more attention to the Monroe doctrine than they would to a Massachusetts blue law. If the Teutonic allies are powerful enough to vanquish the entente allies, they are powerful enough to take South America under the present preparedness condition of the United States. With the United States having its historic policies and having its views about foreign relations, and being pretty free to assert them, having its commerce upon the seas and its export and import trade to maintain and protect, and its "open-door" policy in the Orient to maintain, who is to say that when we make demands upon foreign nations they are always to be complied with, because they want our respect or our brotherly love?

I want to see this Government powerful enough to maintain its own life and its own honor, and, Mr. President, I am willing to disarm whenever the other nations disarm. But we have proposed over and over again to other nations to disarm or to restrict their armament. None of them would think of doing it. It is an idle dream, therefore, for us to think about doing it until they will do it also.

So, Mr. President, once for all I want to say that I shall vote against every amendment which proposes either to lengthen the number of years through which this construction shall be extended or to reduce the ships authorized. I am sorry that this bill does not contain proper provision for a general staff of the Navy, for I think that is greatly needed, and I do not think the restricted authority given to what is known as the "Chief of Naval Operations," with 15 assistants, at all meets the necessity for an expert comprehensive "general staff" for the Navy.

Mr. SHAFROTH. I ask that the amendment may be read.

The PRESIDING OFFICER (Mr. OWEN in the chair). The amendment will be read.

The SECRETARY. On page 170, line 4, strike out the date "1919," and insert "1921."

Mr. GALLINGER. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. MYERS (when his name was called). I transfer my pair with the Senator from Connecticut [Mr. MCLEAN] to the Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. THOMAS (when his name was called). Making the same announcement of the transfer of my pair that I did before, I vote "yea."

Mr. TILLMAN (when his name was called). Repeating the announcement made a little while ago, I vote "nay."

The roll call was concluded.

Mr. REED. I transfer my pair with the Senator from Michigan [Mr. SMITH] to the Senator from Delaware [Mr. SAULSBURY] and vote "nay."

Mr. CHILTON. Making the same announcement of my pair and its transfer that I did on the former vote, I vote "nay."

Mr. WALSH. I transfer my pair as before stated and vote "nay."

The result was announced—yeas 21, nays 56, as follows:

YEAS—21.

Bankhead	Kenyon	Norris	Underwood
Clapp	Kern	Robinson	Vardaman
Cummins	La Follette	Shafroth	Works
Gronna	Lane	Sterling	
Hardwick	Martine, N. J.	Taggart	
Johnson, S. Dak.	Myers	Thomas	

NAYS—57.

Ashurst	Fletcher	Owen	Smith, S. C.
Beckham	Gallinger	Page	Smoot
Borah	Harding	Penrose	Stone
Brady	Hollis	Phelan	Swanson
Brandegee	Husting	Pittman	Thompson
Broussard	James	Poindexter	Tillman
Bryan	Johnson, Me.	Pomerene	Townsend
Chamberlain	Jones	Ransdell	Wadsworth
Chilton	Lee, Md.	Reed	Walsh
Clark, Wyo.	Lewis	Sheppard	Warren
Colt	Lodge	Sherman	Weeks
Culberson	Martin, Va.	Simmons	Williams
Curtis	Nelson	Smith, Ariz.	
Dillingham	Oliver	Smith, Ga.	
du Pont	Overman	Smith, Md.	

NOT VOTING—17.

Catron	Hitchcock	McLean	Smith, Mich.
Clarke, Ark.	Hughes	Newlands	Sutherland
Fall	Lea, Tenn.	O'Gorman	
Goff	Lippitt	Saulsbury	
Gore	McCumber	Shields	

So Mr. SHAFROTH's amendment to the amendment was rejected.

The VICE PRESIDENT. The question recurs on concurring in the amendment made as in Committee of the Whole.

Mr. SWANSON. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. COLT (when his name was called). Making the same announcement that I did before in regard to my pair and its transfer, I vote "yea."

Mr. MYERS (when his name was called). I transfer my pair with the Senator from Connecticut [Mr. McLEAN] to the Senator from Nebraska [Mr. HITCHCOCK] and vote "nay."

Mr. THOMAS (when his name was called). Making the same announcement as heretofore, I vote "nay."

Mr. WALSH (when his name was called). Repeating the announcement made on a prior roll call, I vote "yea."

The roll call was concluded.

Mr. CHILTON. Making the same announcement as on a former vote, I vote "yea."

Mr. REED. Making the same transfer as on the previous vote, I vote "yea."

Mr. CURTIS. I am requested to announce that the Senator from Utah [Mr. SUTHERLAND] is paired with the Senator from Arkansas [Mr. CLARKE].

The result was announced—yeas 61, nays 15, as follows:

YEAS—61.

Ashurst	Hardwick	Page	Smoot
Beckham	Hollis	Penrose	Sterling
Borah	Husting	Phelan	Stone
Brady	James	Pittman	Swanson
Brandegee	Johnson, Me.	Poindexter	Taggart
Broussard	Johnson, S. Dak.	Pomerene	Thompson
Bryan	Jones	Ransdell	Tillman
Chamberlain	Kern	Reed	Townsend
Chilton	Lee, Md.	Shafroth	Wadsworth
Clark, Wyo.	Lewis	Sheppard	Walsh
Colt	Lodge	Sherman	Warren
Dillingham	Martin, Va.	Simmons	Weeks
du Pont	Martine, N. J.	Smith, Ariz.	Williams
Fletcher	Nelson	Smith, Ga.	
Gallinger	Oliver	Smith, Md.	
Harding	Owen	Smith, S. C.	

NAYS—15.

Bankhead	Gronna	Myers	Underwood
Clapp	Kenyon	Norris	Vardaman
Cummins	La Follette	Robinson	Works
Curtis	Lane	Thomas	

NOT VOTING—19.

Catron	Gore	McCumber	Saulsbury
Clarke, Ark.	Hitchcock	McLean	Shields
Culberson	Hughes	Newlands	Smith, Mich.
Fall	Lea, Tenn.	O'Gorman	Sutherland
Goff	Lippitt	Overman	

So the amendment was concurred in.

The VICE PRESIDENT. The question now is on concurring in the amendment of the Senate made on page 175.

Mr. CUMMINS. Mr. President, I reserved this amendment for a separate vote, hoping that the previous amendment might be modified in some way. We have not been able to modify it or to change it in any respect, and therefore I shall not offer the amendments to the committee amendment on page 175 which I had in mind at the time the reservation was made.

The VICE PRESIDENT. The question is on concurring in the amendment made as in Committee of the Whole.

Mr. LA FOLLETTE. Mr. President, I do not propose to prolong this debate. Nothing will change the result here in the Senate at this time. I rise now, however, to ask leave to incorporate in connection with the observations which I submitted on this bill yesterday certain printed matter, extracts from books, and certain tables, which I did not then take the time of the Senate to read and which I do not care to take the time of the Senate to now read if I may have permission to print them in connection with my remarks.

The VICE PRESIDENT. Is there objection?

Mr. PENROSE. Mr. President, I think the Senator from Utah gave notice to-day in relation to printing——

Mr. SMOOT. Not when the request is to print certain matter as a part of a Senator's speech. There is no objection to that.

Mr. PENROSE. I have no objection.

Mr. LA FOLLETTE. It would not take very much to induce me, you know, to proceed now to read the matter into the RECORD.

Mr. PENROSE. If the Senator from Wisconsin desires to do so, I shall insist on my objection; otherwise I shall withdraw it.

The VICE PRESIDENT. Without objection, the request of the Senator from Wisconsin is agreed to.

Mr. SWANSON. The Senator from Iowa [Mr. CUMMINS] has withdrawn his request for a separate vote on the amendment made as in Committee of the Whole on page 175.

The VICE PRESIDENT. The question is on concurring in the amendment.

The amendment was concurred in.

The VICE PRESIDENT. The bill is still in the Senate and open to further amendment.

Mr. LEWIS. Mr. President, I merely tender an amendment to remedy an omission. I move, on page 20, line 7, to strike out the sum "$80,000" and in lieu thereof to insert "$140,000" in the appropriation for the naval training station on the Great Lakes.

The VICE PRESIDENT. The amendment proposed by the Senator from Illinois will be stated.

The SECRETARY. On page 20, line 7, it is proposed to strike out the sum "$80,000" and in lieu thereof to insert "$140,000," so as to read:

In all, naval training station, Great Lakes, $140,000.

Mr. LEWIS. The failure to recommend that sum was purely an error. It is merely with the object to remedy that that the amendment is offered, so that the station there may be continued.

Mr. SWANSON. I understand there was some mistake in regard to that matter, and I will accept the amendment for the consideration of the committee of conference.

The VICE PRESIDENT. The amendment is agreed to, without objection.

Mr. SWANSON. Mr. President, the amendments on page 4, as I understand, were adopted?

The VICE PRESIDENT. Those amendments have been agreed to.

Mr. SWANSON. That disposes of all the amendments.

The VICE PRESIDENT. The bill is in the Senate and open to further amendment. If there be no further amendment, the question is, Shall the amendments be engrossed and the bill be read the third time?

The bill was read the third time.

The VICE PRESIDENT. The question is, Shall the bill pass?

Mr. LA FOLLETTE, Mr. TILLMAN, Mr. VARDAMAN, and others called for the yeas and nays.

The yeas and nays were ordered.

Mr. TILLMAN. Mr. President, I wish to make a few observations before the bill is passed. First, I wish to say that on yesterday, in some way or another, I mislaid a document which I received from the Navy Department to be inserted in the RECORD with the other matter which I desired inserted in reference to armor plate from the Manufacturers' Record. I now ask that the paper which I send to the desk be inserted in the RECORD.

The VICE PRESIDENT. Is there objection? The Chair hears none.

The document referred to is as follows:

SECRETARY OF THE NAVY,
Washington, July 20, 1916.

Hon. B. R. TILLMAN,
Chairman Committee on Naval Affairs,
United States Senate.

MY DEAR SENATOR TILLMAN: In compliance with your request for certain information in regard to the armor-plate question, I am inclosing herewith a letter from the Bureau of Ordnance with appendices A, B, C, D, and E.

Sincerely, yours,

JOSEPHUS DANIELS.

[Inclosures.]

NAVY DEPARTMENT,
BUREAU OF ORDNANCE,
Washington, D. C.

From: Bureau of Ordnance.
To: Navy Department.
Subject: History of Midvale Steel Co.'s entry into armor manufacture and of the Midvale Steel Co.'s manufacture to date.

1. On August 10, 1901, the Midvale Steel Co. made its initial bid on armor. This was the lowest bid submitted, but was not accepted. The Midvale Steel Co. had no plant at that time, but proposed to commence deliveries 26 months from date of contract. The Midvale Steel Co. protested on nonacceptance of its bid (copy of protest attached, marked "A"; copy of department's action attached, marked "B").

2. In October, 1903, the Midvale Steel Co. bid on armor, was the lowest bidder, and was awarded its first contract. The contract called for a little more than one-third of the total armor called for by the Government. On this contract it was found that the Midvale Steel Co. could not deliver certain armor by the time that the shipbuilder desired it. The Midvale Steel Co. relinquished 614 tons of the armor, which was subsequently manufactured by the Bethlehem Steel Co. There was nothing to show that this armor would not have been delivered on contract time, but the bureau gave it to the Bethlehem Steel Co. in order to avoid claim for damages for delay from the shipbuilder. (See H. Doc. No. 351, 58th Cong.; copy attached, marked "C." Midvale average price bid, $397; Carnegie and Bethlehem, $450.60.)

3. In January, 1905, the Midvale Steel Co. was the lowest, the prices being the same as in 1903. The Navy Department appointed a board of naval officers to examine into the facilities

of the Midvale Steel Co. for making armor, and as a result of the report of this board the department awarded but 1,000 tons to the Midvale Co. (Correspondence shown in H. Doc. No. 351, 58th Cong., copy attached, marked "C.")

4. In July, 1906, the Midvale Steel Co. was the lowest bidder and received a contract for one-half the armor; the remainder of the armor was divided between the other two manufacturers at the Midvale price. Midvale average price, $344.50; Carnegie and Bethlehem, $365.50.

5. In 1907 the Midvale Steel Co. was the lowest bidder on a specified tonnage. The department considered the other bids more advantageous, but awarded one-third of the armor to each manufacturer at the price of the lowest bidder. (See Appendix D.)

6. In November, 1908, the Midvale Steel Co. was the lowest bidder by a slight margin and received a contract for one-third of the armor. Midvale average price, $449.75; Carnegie, $472.50; Bethlehem, $451.

7. In August, 1909, the Midvale Steel Co. was the lowest bidder by a slight margin and received contract for one-third of the armor. Average price, same to all, $478.

8. In December, 1910, bids were identical from all companies, except that Carnegie bid $10 lower per ton on class C armor. There was a slight difference in the bids on class E armor. Each manufacturer received contract for one-third of the armor. Average price, same to all, $504.60.

9. In January, 1912, bids were identical, except for class B armor; each manufacturer received the contract for one-third of the armor.

10. In February, 1913, bids differed by a few cents per ton; armor was divided equally among the three manufacturers, at the price of the lowest bidder, the Midvale Steel Co.

11. In August, 1913, bids were opened for battleship *No. 39*. All companies submitted identical bids, which were the same as the price paid for armor under the contracts of the previous year. Revised bids were requested by the Navy Department and were submitted. The Midvale Steel Co. was the low bidder and was awarded contract for all the armor. They subsequently sublet one-third of this armor to each of the other manufacturers.

12. In October, 1914, bids were opened for armor for battleships *Nos. 40, 41*, and *42*. At the request of the Navy Department, the manufacturers submitted new bids on October 26. On that date the Midvale Steel Co. bid $427 per ton for class A armor for one ship. The department (Appendix E) offered the Midvale Steel Co. $425 per ton, which was accepted.

13. In September, 1915, armor bids were opened, and the Carnegie Steel Co. was the lowest bidder by $10 a ton. Contract was awarded the Carnegie Steel Co. at $425 a ton, the same price as paid under the preceding contract. The Carnegie Steel Co. sublet one-third of the armor to each of the other manufacturers.

CHAS. B. MCVAY, Jr.,
Acting Secretary.

—

EXTRACT FROM REPORT OF SECRETARY OF THE NAVY FOR YEAR 1900.

On June 18 last the department gave notice throughout the country, by public advertisement, for bids for armor, naming August 10, 1900, for opening them. On that date they were publicly opened at the department. There were three bidders for armor and two for armor bolts and nuts.

The bids for armor were the Carnegie Steel Co. (Ltd.), of Pittsburgh, Pa.; the Bethlehem Steel Co., of South Bethlehem, Pa.; and the Midvale Steel Co., of Philadelphia, Pa.

The first two companies each bid the same, with the stipulation that their bids were for one-half the total quantity called for, and were not to be considered for any less quantity, deliveries to commence in six months.

The Midvale Steel Co. made a sliding scale of bids for varying quantities, qualifying their bids with a statement that none were to be considered unless the company received an order for 20,000 tons, deliveries to commence in 26 months.

The armor first required—namely, 7,250 tons for the *Maine* class of battleships now under construction—manifestly could not be procured from the Midvale Steel Co., as it has no armor plant, and the department could not wait 26 months for first deliveries, which was probably sooner than they could have been made. While, therefore, the Midvale Steel Co. was the lowest bidder, its bid could not be availed of with respect to the armor required for the *Maine* class. Its bid was, however, practicable for armor other than that thus required; but if an award to that company were made the bids of the Carnegie and Bethlehem Cos. would necessarily, under the conditions accompanying them, be lost to the department.

Hence, the only way to obtain armor for the *Maine* class, under the bids as submitted, was to make an award of all the armor to the Carnegie and Bethlehem Cos., which were the highest bidders, or to give it all to the Midvale Co. and wait until the latter company could produce it. Neither of these alternatives was expedient, and consequently all the bids were rejected.

Notwithstanding these facts, the department, in view of the good standing of the Midvale Steel Co. and the fact that it was the lowest bidder, was disposed to award to it some of the armor not required for a considerable time, if satisfactory arrangements could be made with it as to quantity and price, and with the other bidders as to supplying the remainder. To this end a call was issued for a conference of the three companies with the department, to take place October 2. They all announced their intention to be present. On the day appointed, however, no representatives of the Midvale Steel Co. appeared, but a communication was received from its attorneys stating that the company, which had, after the rejection of its bid, filed an appeal insisting on an award, withdrew its appeal and did not desire to be further considered in connection with the matter. Representatives of the Carnegie and Bethlehem Cos. appeared, and, they being the only bidders remaining in the field, negotiations were opened with them.

—

NAVY DEPARTMENT,
BUREAU OF ORDNANCE,
Washington, D. C., October 9, 1914.

The MIDVALE STEEL CO.,
Philadelphia, Pa.
(Via Naval Inspector of Ordnance.)

Reference: (a) Proposals for armor for battleships *California, Mississippi*, and *Idaho*, opened on the 7th instant.

Inclosure (herewith): (a) Copy of this letter for naval inspector of ordnance.

SIRS: 1. The department and the bureau had expected a material reduction in the price of armor, in consideration of the fact that the department's requirements at this time were so large as to keep all of the armor plants at full capacity for over a year. This has not been the case heretofore, and if the prices paid were fair ones under the scant orders formerly given, those bid on the 7th must be in excess of a fair price, since the circumstances under which the new armor must be made are more favorable as to cost than has been the case heretofore.

2. The Secretary would be pleased to consult a representative or representatives of your firm on Monday next, October 12, at 1.30 p. m. in regard to the armor bids.

Respectfully,

J. STRAUSS,
Chief of Bureau.

—

NAVY DEPARTMENT,
Washington, October 19, 1914.

The MIDVALE STEEL CO.,
Philadelphia, Pa.

SIRS: The department has determined to hold the award of contract for classes "B" and "C" armor in abeyance for the present.

It is requested that your company consider carefully the question of Classes "A1" and "A2" armor and submit, by letter, your lowest supplementary bid for these two classes by the 26th instant, in order that the matter may be finally determined.

Respectfully,

JOSEPHUS DANIELS,
Secretary of the Navy.

—

THE CARNEGIE STEEL CO. (LTD.),
GENERAL OFFICES, CARNEGIE BUILDING,
Pittsburgh, Pa., November 11, 1896.

JOHN G. A. LEISHMAN, *President.*

DEAR SIR: In our respects of June 23, 1896, we stated that as soon as a meeting of our principal partners could be held that we should advise you further in reply to your favor of June 13. This meeting has just been held, and as the result thereof we beg to state that we regret to be compelled to decline any request you make, but believe that upon due reflection you will see that it is impossible for us to open the details of our private business to the eyes of our competitors and to the world.

The cost of making armor is not to be found in the details at the shops, upon which your officers have estimated. Permit us to show you three, among the many elements of cost, which they did not take into account:

First. The capital we have invested in our armor plant is, as stated by our Mr. Carnegie in his evidence before the Senate

Naval Committee, fully $3,000,000. We charged to this account in our books only $2,500,000, the amount paid out; but we ourselves contributed fully $500,000. No charge was made for the ground, railway connections, etc. The water supply is taken from our other works; so also are the electric light and power currents; no charge was made for the proportion of these plants necessary for the armor-plate plant. We charged nothing for superintendence, nor for interest during construction. All of these are legitimate charges and bring the total cost up to something over $3,000,000.

We began making armor plate in October, 1891, and have made to August 1, 1896, 11,039 tons of armor. The interest upon our investment, $180,000 per year, in five years amounts to $900,000, or $81.53 per ton of armor.

Second. The estimate made by your officers took no account of maintenance of plant. This can not be estimated at less than 5 per cent per annum, which makes $150,000 per year, or for five years $750,000, amounting to $67.94 per ton of armor.

Third. The armor plant is practically useless except for the making of armor, therefore when the Navy is finished, say, 10 years hence, we have to face a probable loss of the cost of the plant, $3,000,000. Even if the salvage amounts to $500,000 we have a loss of $2,500,000, equaling in 15 years $166,666 per annum, or $75.49 per ton of armor.

This will make items of cost which were not taken into account in the estimate of your officers as follows:

Interest on plant per ton of armor	$81.53	
Maintenance of plant per ton of armor	67.94	
Loss by abandonment of plant when Navy shall have been completed per ton of armor	75.49	
		$224.96
To the above should be added the cost of working capital, which varies greatly, as works may be run fully, partially, or not at all; but estimated at $1,000,000 average the cost is per ton, say		25.00
Making a total of		249.96

It is because of these and other facts that we do not hesitate to say that the manufacture of armor is not, and can not be made, a permanently satisfactory investment of capital even at the prices charged per ton.

We did not seek the Government order for armor; the Government sought us; and after declining when invited we finally agreed reluctantly to undertake the task, simply because the Government could not get armor for the ships which were upon the stocks waiting for it.

If the Government now desires to undertake the manufacture of armor for itself, we shall only be too happy to sell our plant to it at cost. It is in splendid order, and we refer you to your experts as to whether it is not far more efficient now than when new, as we have continually made improvements upon it.

The plant can remain where it is, and we will undertake to furnish the steel in the ingot at a price to be fixed by three arbitrators, or we will remove the plant and erect it at any point designated by the Government; also erect the additional plant for the making of the steel. We will superintend this and start the works, and continue to operate them until they produce armor successfully, and for all this we will only ask the Government to pay the actual cost.

We undertake also to teach the Government officials how to make such armor as we are now supplying you, which, as you know, holds the world's record.

Having gone into this business primarily to help the Government when it could not obtain armor, we submit to you and to Congress that we have some claim upon the Government to take our plant at cost, and we hope this proposition will meet with favor.

We make about 150,000 tons of finished steel per month and the two or three hundred tons of armor we make per month demand greater attention and give more trouble than all the 150,000 tons. We shall be delighted if the Government will let us out of the armor business. We can use the capital in several lines of our business to better and permanent advantage.

Yours, truly,

THE CARNEGIE STEEL CO. (LTD.),
JOHN G. A. LEISHMAN, *President*,
By L. S. PHIPPS.

To Hon. HILARY A. HERBERT,
Secretary of the Navy, Washington, D. C.

Mr. TILLMAN. Mr President, as chairman of the Naval Committee and as a Senator from South Carolina, I have naturally felt deep interest in whatever concerns the Charleston Navy Yard, and have done all I reasonably could for its development since its establishment. Naturally, too, all items relating to the Charleston yard in this appropriation bill are looked on with suspicion and keen interest by all Senators, both those who are interested in the Navy and others. I hope the Senate will listen to me patiently while I explain and justify what is being done for the Charleston Navy Yard in the appropriation bill we have under consideration. The impression has been tried to be created—and the statement has often enough been circulated to gain credence in some quarters—that the Charleston Navy Yard is on shallow water, unapproachable, and badly located originally, and has only been kept alive by Senator TILLMAN'S influence in the Senate. Its enemies outside of Congress—and some inside—have been numerous and very vicious and unscrupulous in their attacks on it. The ignorance about this yard is lamentable, although the facts are in public documents and easily accessible to anybody not too lazy to look for them. Some people prefer to repeat the lies they have read rather than seek the truth and learn for themselves what are the facts and real conditions.

The Charleston Navy Yard is located on the Cooper River, 5 miles above the city of Charleston, which is itself 7 miles from the entrance to the harbor, making the yard 12 miles from the sea. It is entirely landlocked and the entrance to the harbor is defended by forts which would make it impossible for any battleship to approach near enough to shell either the city or the yard. It was located by a board of naval officers, and the history of its location and the causes for its being transferred from Port Royal can be found in Senate Document No. 86, Fifty-sixth Congress, second session. So much for that.

The Coast Survey charts will show that there is deep water all the way from the bar, 12 miles away, to and above the navy yard, but there are two mud banks opposite Drum Island and a sharp bend in the channel above it which render dredging necessary in order for battleships to reach the yard without running the risk of getting aground. This was contemplated when the yard was established. The House of Representatives incorporated $175,000 in this bill, before sending it to the Senate, for dredging Cooper River, and the Army Engineer's Report (H. Doc. 947, 61st Cong., 2d sess.) shows that for this money the two mud banks can be removed and a channel provided through which the largest battleships we now have or are ever likely to build can steam to the navy yard from the open sea without a tug at any stage of the tide. The facts in regard to this item were presented by Mr. WHALEY, the Representative from the Charleston district, and the arguments were so strong in their character and the proof so indisputable that the item was included in spite of the solid opposition of the Rivers and Harbors Committee, under Mr. SPARKMAN.

That committee refused to listen to any pleas as to the necessity from a naval point of view and refused positively to insert the item in their bill. This dredging will have twofold benefit: It will be for the benefit of commerce and for the benefit of the Navy, too. There are mercantile establishments above the Navy Yard on the Cooper River, mostly engaged in the lumber and timber industry, and vessels drawing 26 feet of water can go to them now.

There can be no reasonable objection to having this dredging provided for in the naval appropriation bill, although it benefits commerce, too. I remember in 1902 and 1903 the naval appropriation bill carried appropriations amounting to about $750,000 for the blowing off of Hendersons Point at the entrance to the Portsmouth Navy Yard. The harbor at Portsmouth has a deep and narrow entrance and the tide rushes in and rushes out with a very swift current. The bay is like a bottle, the entrance being the neck. Before this rock was removed it was decidedly dangerous for large ships to enter. It was thought by the Navy Department that in the interest of the Navy Hendersons Point should be removed; therefore we appropriated money for it. We removed rock at Portsmouth and we now propose to remove mud at Charleston.

It has been charged by unscrupulous slanderers in newspapers that Senator Hale and Senator TILLMAN had a mutual understanding to take care of the Portsmouth and Charleston Navy Yards. A bigger falsehood was never uttered. Senator Hale was not that sort of a statesman, and I can swear that I never said a word to him about the Portsmouth Navy Yard, or the Charleston Navy Yard either, along the lines of mutual understanding. There never have been the least symptom of "you tickle me and I'll tickle you." Both navy yards can stand on their merits, and need no such support. While Portsmouth is in New Hampshire, the site of the navy yard is in Maine, and to that extent the navy yard has been cared for, as far as senatorial influence ever cares for any navy yard, by four Senators rather than two.

Mr. GALLINGER. Mr. President, will the Senator permit just a word?

Mr. TILLMAN. Yes.

Mr. GALLINGER. The appropriation for the removal of Hendersons Point was offered by me first, and without consultation with former Senator Hale. It was offered by me as an amendment to the river and harbor bill. It was not received favorably by the committee having that bill in charge, but they suggested that it more properly belonged to the naval appropriation bill. I then offered it to the naval appropriation bill, and it was accepted and became a part of that law; so that the Senator is absolutely right when he says that there was no collusion or suggestion of a trade between Portsmouth and Charleston in regard to this matter.

Mr. TILLMAN. Now, why the appropriation of a million and eighty-five thousand dollars for the lengthening of the dry dock? The reasons are cogent and easy to give. There is nowhere in the United States a dock where a battle cruiser of such type as we propose to build can be taken care of. We have provided for four battle cruisers—the House wanted five—and it is vitally important that we should prepare docks to take care of them after they are constructed. It will take three years to build the cruisers and three or four years to construct the docks. The Charleston dock is deep enough, and wide enough, too, to accommodate battle cruisers or any other ships we have, and that dock can be lengthened sufficiently in 18 months to accommodate any battle cruiser we now contemplate building. Therefore, it seems to me a very wise and necessary step to take to have this dock so lengthened that it can accommodate battle cruisers, those we now have and those we expect to build. That is what this item is for.

It will take $3,500,000 to build a new dry dock long enough to take a battle cruiser, while the lengthening of this old dock only requires $1,085,000, and the $175,000 to dredge the channel, making a total of $1,260,000, giving us a dry dock as long as any we need have in only 18 months, accessible at all stages of the tide and capable of docking the largest ship we now have or are likely to build any time soon.

The accompanying memorandum prepared by Admiral Harris, Chief of the Bureau of Yards and Docks, and one of the most accomplished engineers in the United States or anywhere else, tells all about the battle cruisers, and the docking facilities on both the Atlantic and Pacific coasts. I ask to have it inserted in the RECORD at the end of my remarks without reading, unless Senators want to have it read, so that access to it can be had. I ask to have it inserted in large type, so that it will be easier to read. The fine print in which such papers usually appear is very trying to my eyes, and I presume the eyes of many others are not much better than mine.

I trust that when my critics have read what I have said to-day they will have the decency and sense of fairness to acknowledge the error of their ways and the lack of information about the Charleston Navy Yard. And I hope those newspapers that have industriously circulated the stories about the mud at Charleston and the inability of our ships to reach the yard will print the actual facts, as I have stated them, and cease their slanderous stories about Charleston and me.

In conclusion, Mr. President, I can not allow this bill to go to passage without expressing my thanks and appreciation to the members of the Senate Naval Committee for the hearty cooperation and assistance they have given me in its preparation and passage, especially to Senators SWANSON and LODGE. We have all worked together harmoniously; and if the bill is a good one, as I believe it is, credit is due to them more, perhaps, than to myself.

The VICE PRESIDENT. Without objection the matter referred to by the Senator from South Carolina will be printed in the RECORD in large type.

The matter referred to is as follows:

MEMORANDUM FOR SENATOR TILLMAN BY ADMIRAL HARRIS, CHIEF OF THE BUREAU OF YARDS AND DOCKS.

"MAY 15, 1916.

"It is evidently the intention to provide for the construction of several battle cruisers in the present naval act. The consensus of naval expert opinion is that the provision of such a type of vessel in our Navy is essential for naval preparedness. Battle cruisers have played an important part in such naval actions as have taken place in the present European war, notably off the South American coast in the sinking of the *Scharnhorst* and *Gneisenau* of the German squadron by the squadron under Admiral Sturdee; the action in the North Sea between the two squadrons of German and British battle cruisers, and various raids on the coast of England by German battle cruisers.

"The essential elements of this type of ship are great speed and large gun power. To secure these requirements large displacement, and especially length, are involved. The battle cruisers that will be provided for in the present naval act will be at least 850 feet in length, more than 200 feet longer than the largest dreadnaught battleships that we have ever planned. It is apparently mandatory that we should embark at once on this type of naval construction, involving an unprecedented jump in the length of naval vessels.

"The naval dry docks that we have at the present have been designed and built for docking battleships, and when they were authorized and laid down no one even thought of the possibility of having to provide for docking vessels as long as these battle cruisers will be. As a consequence of this new development in naval architecture, there is not now a dry dock in the United States that is long enough to dock these ships when they are completed and in commission.

"We are building a dry dock at Pearl Harbor in the Hawaiian Islands which is to be 1,000 feet long, but they have had a great deal of trouble with this dock in the past, and the chances are that its construction will be a difficult and slow process, and it may not be completed and ready for use in time to receive these battle cruisers upon their completion.

"The State of Massachusetts, for its own commercial ends and also as a patriotic act, for which the State is entitled to great credit, is building a dry dock over 1,000 feet long in Boston. They expect to have it completed in 1919, but there is no assurance that it will be completed then; in fact, there is no assurance that they may not change their mind and discontinue its construction. In other words, it is a matter under the control of the Commonwealth of Massachusetts and not under the Federal Government or the Navy's control.

"The Union Iron Works, of San Francisco, Cal., has, under authority of an act of Congress, entered into a contract with the Navy Department for the use of a dry dock 1,000 feet long that they are to build in San Francisco. Under the terms of this contract the dry dock is to be completed within two years from now. However, while having the usual assurances of a contract of this character, we have no direct control of many other things which I foresee and still many more things which I do not foresee, that may happen and prevent the completion of this dry dock in that time, or even at all.

"A dry dock 1,000 feet long is being constructed and is well advanced at Balboa, Panama, Canal Zone, and will probably be ready for use in a few months from now.

"We are going to authorize the construction of at least four battle cruisers involving a cost between seventy-five and eighty million dollars, and they will probably be completed and in commission in about three years from now. In the ordinary course of events—that is, in peaceable times just for practice and cruising, a ship like that must be docked regularly—that is, once or twice a year—for scraping and painting; otherwise her bottom becomes foul and is covered with barnacles and marine growth and she becomes heavy and difficult to propel through the water and loses her speed, the most essential requirement of a battle cruiser. Or even worse, if the ship runs aground or gets into a collision she must be taken into a dry dock to be repaired. But principally we are going to build these battle cruisers to have them ready for use in case we should get into difficulties with some other nation, and to use them in that way means to use them in battle, and we must expect to have some of them injured under water by gunfire or by torpedoes, just as has happened with the British battle cruiser *Tiger* in the North Sea action, and when so injured they are, of course, useless until they can be taken into some dry dock and be repaired, so that if you do not make provision for the dry docks for these ships it is useless to build them. In fact, if you build them without providing dry docks for them you might lose one or more of them through collision or battle damage, where otherwise you could have saved them and made them ready again for service if you had had foresight enough to provide dry docks convenient and close to where the accident or damage occurred.

"Now, a new dry dock of the large size required would cost about $4,000,000, and this is a great deal of money; but, even so, it is only a fractional part of the cost of a single battle cruiser. It takes as long, or longer, under the most favorable conditions to build a dry dock than it will take to build one of these battle cruisers.

"We are going to build these battle cruisers; we have not a naval dry dock completed that will dock them. By the time they are completed we will undoubtedly have the Panama dry dock ready for them. We may have the dry dock at Pearl Harbor ready for them, but that is not certain. If things go well and the State of Massachusetts and the Union Iron Works do not change their minds about it, we may have the Boston State dry dock and the Union Iron Works dock at San Francisco ready for them. If the present naval act provides for a new dry dock at Norfolk and at Philadelphia, we will surely have those docks ready some day; but, considering our past expe-

rience on dry-dock construction, I am not far off in predicting that they will not be ready in time to dock these battle cruisers.

"Just picture the situation that we may be in with four of these magnificent, costly vessels, and the only place that we can take them for docking and repair will be the dry dock at Panama, or, even if things go well at Pearl Harbor, they will only then have the choice of being docked in Panama or in the middle of the Pacific—the Hawaiian Islands. That means that whether we like it or not and even if it does not fit in with our plans of strategy our squadron of battle cruisers will have to be kept in the Pacific Ocean or on the Caribbean Sea, or at least will have to go there twice a year to be looked after for repairs. In case we should need them for the ultimate purpose for which they are built—to use against an enemy—with the possibility of being damaged and requiring immediate repairs to save them from sinking, we would have to select an obliging enemy, who would be willing to fix the scene of naval combat in the vicinity of either the Panama Canal or the Pearl Harbor dry dock; and, of course, our friendly enemy would be as familiar with our predicament as we are, and would undoubtedly be disobliging enough to insist on fighting at some place other than would suit our convenience.

"If the dry dock that is to be built by the Union Iron Works, of San Francisco, Cal., were completed we would be somewhat better off in the Pacific zone, and if the dry dock being built by the State of Massachusetts in Boston is completed, this would help us a lot in the North Atlantic, so that we would probably have the choice of taking these battle cruisers for docking either to Boston or to Panama, and these two places are over 2,500 miles apart, so that if you had a badly damaged battle cruiser between these points it would be quite a trip for her, in her injured condition, to reach either dock, with a good chance that she would sink before you could get her into one of these ports.

"The Secretary of the Navy recognized this condition, as shown by his statement before the House Naval Committee, on pages 3592, 3593, and 3594 of the published statement of his hearings, in which he urges the construction of a 1,000-foot dry dock at Norfolk, and also suggests that it is desirable to lengthen the Puget Sound dock, and construct 1,000-foot docks at New York and Philadelphia. He shows in his statement that we are hardly warranted in embarking on the construction of battle cruisers unless the dry docks for their docking and repair are also immediately provided for. But he also states, as I have just told you, that it takes longer to build a dry dock than it does to build a battle cruiser, so that any belated action that we might take in making appropriations for the construction of the dry docks that he recommends, namely, at Norfolk and Philadelphia, will not insure that these docks will be completed when the battle cruisers are completed. They probably will not be ready for these battle cruisers until they have been in commission and sailing at sea for a year or so.

"But even with the completion of the Norfolk dock, I want to invite your attention to the fact that the distance from Norfolk to Panama is nearly 2,100 miles, so that if we should have a fleet action take place between Norfolk and Panama the injured ships would have to take quite a long trip to get to either dock, and everyone familiar with the sea knows of the risks of taking an injured ship around Cape Hatteras, and that if we had a dry dock on the Atlantic coast south of Cape Hatteras they would not take the chance of trying to take her around the cape, and such a dry dock under these conditions would very likely mean the saving of one or two of such ships from sinking.

"Of course one dry dock will afford all the necessary docking facilities for a great many ships for ordinary painting and repairing, although in the case of an injury, such, for instance, as happened to the *Arkansas* when she ran aground, that ship may be in the dry dock and prevent its use for other ships for several months. But even so, two, or at the most three, of the big dry docks at one place would supply all of the docking facilities that we would need if we could keep our ships in the general vicinity of this place; but we can not do that. We have a long coast line. The theater of our future naval actions may be in the Pacific, any place in the Atlantic, in the Caribbean Sea, or in the Gulf, and we must provide docks and dockyards with that end in view.

"We have a dry dock in the Charleston Harbor at the navy yard, and it is wide and deep enough to receive battle cruisers or battleships of the larger size; but it is not long enough; its length is such that it can not take ships over 545 feet long. It is possible to extend this dry dock to such a length that it will take ships 900 feet long, and the natural conditions down there are such that this could be done very economically and expeditiously. The Bureau of Yards and Docks estimates the cost of this lengthening at $1,085,000, and states that the construction involves no momentous problems, as the entire site is underlain by a stratum of marl of great thickness. This dock could be lengthened so that it could dock battle cruisers and the whole project carried out and completed within a year and one-half; at least that is what the chief of that bureau tells me, and the work could be so performed that the dock would not be out of use for docking during the entire lengthening period except for about three months, when connection would be made between the extension and the old dock. This process of lengthening was followed out at Norfolk a few years ago, and that dock was in use during the entire period of lengthening except for three months.

"It is desirable now to build dry docks of the same length and width as the locks of the Panama Canal; that is, 110 feet wide by 1,000 feet long. It is not practical to extend the dry dock at Charleston to a length of 1,000 feet, because there is a large and handsome power house in the way, and it would be necessary to destroy this building in order to make the dock 1,000 feet long, and that, of course, is not advisable. However, it could be built 925 feet long, so that it would take a 900-foot ship, which is a greater length than, I am informed, will be required for these battle cruisers. The cost of a new dry dock 1,000 feet long at Charleston, or any other place, would be nearly $4,000,000, and it would undoubtedly require at least four years to build it. But we have an opportunity at Charleston now to lengthen the present dock so that it will answer the purpose of docking battle cruisers at a cost of about a quarter of the cost of a new dock and be ready in a year and one-half, or long before the battle cruisers will be launched and in commission. This is the only yard that we can do this at, as the naval dry docks on the Atlantic coast at Boston and Philadelphia are too narrow and shallow. The large dry dock at New York can not be lengthened; they have not the space; and the dry dock at Norfolk has already been lengthened as much as it is practicable to lengthen it.

"If we are going to build these battle cruisers—and I take it we are, and I, for one, am in favor of building them—we should have a dry dock on the Atlantic coast south of Hatteras capable of docking them; and above all things, we should have a dry dock on the Atlantic coast ready to receive them when they are launched, and the only way of surely securing such a dry dock for them is to lengthen the dry dock at Charleston, because the conditions down there are such that this can be done before these ships are afloat; and besides, it will only involve an expenditure considerably less than one-third of the cost of a new dry dock."

The VICE PRESIDENT. The question is on the final passage of the bill, on which the yeas and nays have been ordered. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). Making the same announcement of my pair and its transfer, I vote "yea."

Mr. COLT (when his name was called). Making the same announcement as heretofore, I vote "yea."

Mr. MYERS (when his name was called). I make the same announcement about the transfer of my pair that I made on the last vote, and vote "yea."

Mr. THOMAS (when his name was called). Making the same announcement as heretofore, I vote "nay."

Mr. TILLMAN (when his name was called). I make the same announcement as heretofore in regard to my pair and its transfer, and vote "yea." I take this occasion to announce that the senior Senator from New York [Mr. O'GORMAN] has requested me to say that if he had been present he would have voted in accordance with the recommendations of the committee, and that he is in favor of the passage of this bill.

Mr. UNDERWOOD (when his name was called). I voted for the House program as against the Senate program, and think that should have prevailed. But recognizing the fact that this is one of the great supply bills, and that the majority must control, and that the bill must be passed——

Mr. GALLINGER. Debate is not in order.

Mr. PENROSE. Mr. President, I raise the point of order that debate is out of order. Nothing is in order but the calling of the roll.

The VICE PRESIDENT. That is one of the unfortunate rules of the Senate.

Mr. UNDERWOOD (continuing). I vote "yea." If the Senator had waited a moment he would have heard my vote.

Mr. PENROSE. It would not have made any difference.

Mr. WALSH (when his name was called). Repeating the announcement heretofore made, I vote "yea."

The roll call was concluded.

Mr. REED. Making the same announcement that I made on the last roll call as to my pair and its transfer, I vote "yea."

Mr. CURTIS. I have been requested to announce that the junior Senator from Utah [Mr. SUTHERLAND] is paired with the senior Senator from Arkansas [Mr. CLARKE].

Mr. POMERENE. I desire to announce the unavoidable absence of the junior Senator from Delaware [Mr. SAULSBURY]. He is paired with the junior Senator from Rhode Island [Mr. COLT].

The result was announced—yeas 71, nays 8, as follows:

YEAS—71.

Ashurst	Harding	Newlands	Smith, Ga.
Bankhead	Hardwick	Oliver	Smith, Md.
Beckham	Hollis	Overman	Smith, S. C.
Borah	Husting	Owen	Smoot
Brady	James	Page	Sterling
Brandegee	Johnson, Me.	Penrose	Stone
Broussard	Johnson, S. Dak.	Phelan	Swanson
Bryan	Jones	Pittman	Taggart
Chamberlain	Kenyon	Poindexter	Thompson
Chilton	Kern	Pomerene	Tillman
Clark, Wyo.	Lane	Ransdell	Townsend
Colt	Lee, Md.	Reed	Underwood
Culberson	Lewis	Robinson	Wadsworth
Cummins	Lodge	Shafroth	Walsh
Dillingham	Martin, Va.	Sheppard	Warren
du Pont	Martine, N. J.	Shields	Weeks
Fletcher	Myers	Simmons	Williams
Gallinger	Nelson	Smith, Ariz.	

NAYS—8.

Clapp	Gronna	Norris	Vardaman
Curtis	La Follette	Thomas	Works

NOT VOTING—16.

Catron	Gore	Lippitt	Saulsbury
Clarke, Ark.	Hitchcock	McCumber	Sherman
Fall	Hughes	McLean	Smith, Mich.
Goff	Lea, Tenn.	O'Gorman	Sutherland

So the bill was passed.

Mr. SWANSON. I move that the Senate request a conference with the House of Representatives on the bill and amendments, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to, and the Vice President appointed Mr. TILLMAN, Mr. SWANSON, and Mr. LODGE conferees on the part of the Senate.

THE PUBLIC HEALTH SERVICE.

Mr. MARTIN of Virginia. I ask leave to report back favorably from the Committee on Appropriations the bill (H. R. 17053) making additional appropriations for the Public Health Service for the fiscal year 1917, and I ask unanimous consent for the present consideration of the bill. I will explain to the Senate that it is an emergency appropriation for the relief of the infantile paralysis epidemic and some epidemics of typhoid fever. The bill has passed the House and it is estimated for as an emergency appropriation, and I ask that it be considered by unanimous consent.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the following additional sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Public Health Service for the fiscal year 1917, namely:

For additional assistant surgeons, $50,000.

Interstate Quarantine Service: For cooperation with State and municipal health authorities in the prevention of the spread of contagious and infectious diseases in interstate traffic, $85,000.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ARMY APPROPRIATIONS.

Mr. CHAMBERLAIN. I move that the Senate proceed to the consideration of House bill 16460, the Army appropriation bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 16460) making appropriations for the support of the Army for the fiscal year ending June 30, 1917, which had been reported from the Committee on Military Affairs with amendments.

Mr. PENROSE. Mr. President——

The VICE PRESIDENT. Does the Senator from Oregon yield to the Senator from Pennsylvania?

Mr. CHAMBERLAIN. I yield.

Mr. PENROSE. I should like to address myself to the junior Senator from South Carolina [Mr. SMITH] and call his attention to a notice given by him on July 14, 1916, and appearing on the calendar of business, that following the passage of the naval appropriation bill he would move the consideration of the immigration bill. Perhaps the Senator has forgotten that notice, and I wanted to call his attention to it.

Mr. SMITH of South Carolina. No, Mr. President. The fact had been brought to my attention that the Army appropriation bill was to be taken up; but the real facts in the case are that there seemed to be some understanding—certainly on this side—to the effect that these bills should first be passed.

Mr. PENROSE. Which bills?

Mr. SMITH of South Carolina. The appropriation bills.

Mr. CHAMBERLAIN. Mr. President, I did not yield for the purpose——

Mr. SMITH of South Carolina. For that reason I have not called it up. I do not want the Senator to understand that I am derelict in my duty about the immigration bill. This Senate will have a chance to vote on it.

Mr. CHAMBERLAIN. Mr. President, I did not yield to the Senator to raise a discussion with reference to the immigration bill. The Army bill is before the Senate, and I shall insist upon its consideration.

Mr. MYERS. Mr. President, I ask leave to make three reports from the Committee on Military Affairs.

The VICE PRESIDENT. Is there any objection?

Mr. SMOOT. Mr. President, I desire to ask the Senator having the bill in charge whether there is going to be an adjournment this evening and we are to have a morning hour to-morrow, or whether the Senate is to take a recess?

Mr. CHAMBERLAIN. At the request of quite a number of Senators—and I think there is a sort of an understanding to that effect—I am going to ask, at the proper time, that the Senate adjourn until to-morrow morning.

Mr. SMOOT. Then it seems to me that the Senators having morning business ought to leave it until the morning hour, and let us proceed now with the Army bill.

The VICE PRESIDENT. Is there objection to the request of the Senator from Montana?

Mr. SMOOT. I object.

Mr. CHAMBERLAIN. I ask that the formal reading of the bill be dispensed with, and that it be taken up for the purpose of considering the Senate committee amendments.

The VICE PRESIDENT. The Senator from Oregon asks unanimous consent that the formal reading of the bill be dispensed with, and that the bill be read for committee amendments, the amendments of the committee to be first considered. Without objection, it will be so ordered.

Mr. CLAPP. Mr. President, just a moment. If that is to be taken as unanimous consent, I want to object to it. If it is simply a motion, I am willing that it should pass pro forma, as the motions pass.

The VICE PRESIDENT. That is the only way it can be done.

Mr. CHAMBERLAIN. I was putting it in the usual form.

The VICE PRESIDENT. It can not be done by a motion. It requires unanimous consent to dispense with the formal reading of the bill.

Mr. CHAMBERLAIN. I have no purpose in it except to save time. I assumed that Senators had read the House bill.

Mr. CLAPP. I will be very frank with the Senator. It is desired to make a motion and give a notice before this bill is adopted. If the reading of the amendments is likely to take 10 or 15 minutes, I will make no objection to the Senator's request for unanimous consent.

Mr. CHAMBERLAIN. It will take that long.

Mr. CLAPP. Very well. I withdraw the objection.

The VICE PRESIDENT. In the absence of objection, the request of the Senator from Oregon is granted. The Secretary will read the bill for committee amendments.

Mr. CHAMBERLAIN. Mr. President, before the reading of the bill is proceeded with, I desire to make a very brief statement in reference to the subject matter thereof.

The bill as it was reported to the House of Representatives appropriated $157,223,246.10. There was added during its consideration by the House of Representatives $30,365,800, and there was deducted $5,285,690, leaving a net increase of $25,080,110. As it finally passed the House it carried an appropriation of $182,303,356.10. The increases recommended by the Senate—and I call the attention of Senators to the report that came from the committee with the bill—amounted to $154,053,794, and the decreases recommended by the committee amounted to $5,758,140, leaving a net increase recommended by the Senate committee of $148,295,654. So that the total of the bill as reported to the Senate is $330,599,010.10.

Mr. President, that seems like a very large increase, and, as a matter of fact, it is; but the conditions under which the bill was reported to the House not only changed materially from time to time in the course of the consideration of it by the House committee and in the course of its consideration by the House and its passage, but they had changed very materially at the time it was taken up for consideration by the Senate committee. When the House began consideration of the bill on the 20th day of March there had been no law enacted for the reorganization of the Army. There had been no consideration given to the federalization of the National Guard.

When the bill finally passed the House of Representatives on June 26, 1916, the Army reorganization bill had just passed Congress, but the House of Representatives did not have reliable

and full estimates based upon that reorganization, nor upon the expenses of the National Guard, nor practically any of the matters that had been included and required by the terms of the reorganization act of June 3, 1916. So while the Senate increases to this bill seem exorbitant, and without explanation serious, Senators can very readily see that the increases are due to the fact that the Army had been reorganized just before the House bill passed, the National Guard had been federalized, and immediately thereafter the Regulars and the National Guard were mobilized for use on the border. So the necessities of the situation compelled the Senate committee to meet the conditions as they actually existed and without any regard to the mere possibilities of the future.

Mr. President, I desire to say here that there seems to be a very serious misapprehension upon the part of some of our friends, in and out of Congress, in claiming that the committees of Congress and Members of Congress have been chasing a sort of a shadow, that they have been frightened into taking steps looking to preparedness without any foundation for it, and really apprehending a danger which did not exist. Let me say to you, Mr. President, that that has not been the fact with reference to the Military Affairs Committee of the Senate. I do not think I have the reputation of being easily frightened, unless it be that I am timid about making a speech to the Senate.

I can assure the Senate in all that I have done, both with respect to the reorganization of the Army and with respect to this appropriation, has been done cooly and deliberately and with a view single to the best interests of the country, and I am satisfied that the Military Affairs Committee who are men of sound and discriminating judgment have acted in the same way and upon the same theory. As an evidence of that, we have three gentlemen on that committee who went through the Civil War on the side of the Union forces and one who served as a soldier of the Confederacy. I have never at any time seen either or any of these gentlemen, or in fact, any of the members of the committee frightened into hasty action with reference to a proper reorganization of the Army or of making appropriations necessary to support that Army when reorganized.

I deny the charge, Mr. President, which has been suggested here from time to time, and sometimes in other places that Members of Congress who favor preparation for national defense have acted in ignorance of the situation in this country, or that Members thereof have been acting as the subservient tools of munition factories in order to impose taxation upon the people.

Mr. President, it would seem that the only wise and honest people in America are the men who have opposed any program of preparation for national defense. I do not question the motives of the gentlemen who pretend to this claim. I credit them with having acted in perfect good faith in opposing anything that looked either to the reorganization of the Army or the increase of the Navy or in providing increased appropriations for the Army itself.

I have never at any time made any charges against these gentlemen, and I deny the suggestion that we have been befogged or "jobbed," as one Senator has expressed it, by those interested in the sale of munitions of war and other implements of destruction.

Mr. President, there have been eminent gentlemen in all the history of our country who have been opposed to the maintenance of an Army or Navy or anything looking toward better preparation for national defense. In Revolutionary days there were distinguished gentlemen who opposed anything like preparation for defense against the British. There have been men during the whole life of this Republic who before every war have opposed anything looking to placing our country in a position where it could defend itself. These gentlemen in Revolutionary days were called Tories, and if their wishes had been acceded to, America would to-day be a colony of the British Crown.

These same gentlemen in the Continental Congress opposed the appropriation of money to properly raise, equip, and outfit an army for the purposes of defence. Washington realized it, but it took the Continental Congress three or four years to understand that unless something were done to assist the Colonial troops and the militia of the country in the fight they were making against Great Britain, defeat must inevitably be the result of our war with the mother country. Finally, with all this opposition by distinguished pacificists of that day, Mr. President, Congress finally concluded that unless the control of the forces and the handling of the armies in this country were placed in the hands of one man there was no question as to what would be the result of that controversy. As has been said here to-day by the distinguished Senator from Connecticut [Mr. BRANDEGEE] and in substance the other day by another distinguished Senator, but for the fact that Great Britain had other things to look after about the time she had that war and the war of 1812 with us, we would have been defeated anyhow.

Every one knows, Mr. President, that but for the sudden and auspicious appearance of the French off Chesapeake Bay in the last days of the Revolution Washington's army, exhausted as it was, would have been overcome by the enemy.

Mr. President, the same condition of things existed in 1812. There were distinguished gentlemen then as now who opposed anything like a preparation for the national defense. The same arguments were made then as now. The ghost of militarism frightened them then as now. I am not criticising the attitude of the gentlemen who are opposed to placing our country in a proper position of defending itself against any foe, whether within or without. They have a right to their opinion. I am simply calling attention to the facts of history.

Similar conditions existed in 1845. If Senators will take the trouble to look over the records preceding the Congresses when these wars came upon us they will find the same arguments against preparedness were made then as now. The speeches of John Randolph and others in 1800 and 1811 were along the same line, opposing anything like the maintenance of an army in this country because it endangered the country and its institutions and was likely to cultivate a spirit of militarism.

So in 1861. The same conditions existed then and the same kind of speeches were made in opposition to taking steps to maintain an army that would enable the United States to preserve the Union and to protect itself. The distinguished gentlemen at that time who opposed the maintenance of an army were called copperheads, and their opposition to the prosecution of the war was pretty effective. There are copperheads to-day, Mr. President, who are placing every obstacle in the way of our distinguished President, whether his policies be for peace or for preparation for emergencies of war.

If the men who advocated preparedness prior to 1861 had been listened to, there would have been no defeat like that at the first Battle of Bull Run, when the Union Army fled in disgrace and in utter rout. The Civil War, which was prolonged for four or five long years, with the sacrifice of millions of treasure and thousands of lives, would have been ended in six months. I think that is the consensus of opinion amongst men who understood the situation in those days.

Now, I have no criticism to make of my friends who differ from me about this matter, Mr. President. There is not a man in the Senate for whom I have a higher regard than the distinguished Senator from Wisconsin [Mr. LA FOLLETTE], but I want to resent just as strongly as I can his suggestion that those who favor preparedness are either knaves or fools. And yet I had rather be placed in the category of a knave and be prepared when an emergency comes and our country is assailed than to be placed in the category of a fool and have our country overpowered by the first strong military power that sees fit to attack us because we are not prepared to defend ourselves.

I had rather, Mr. President, have imposed upon the people of this country a tax that they can not pay in a generation and preserve our institutions and our liberty than to remain in a condition where we must be the prey of any first-class military power that sees fit to attack us.

Mr. BRANDEGEE. Mr. President——

The VICE PRESIDENT. Does the Senator from Oregon yield to the Senator from Connecticut?

Mr. CHAMBERLAIN. I yield.

Mr. BRANDEGEE. Does not the Senator from Oregon think that the expense entailed by adequate naval and army preparation would be a mere drop in the bucket as compared with the thousands of millions that would be lost in the panic that would ensue in this country in case we should get into a difficulty and be attacked when we were unprepared for it?

Mr. CHAMBERLAIN. I do not think there is any question about that. If we can believe the newspapers, it is now costing Great Britain $30,000,000 a day and thousands of lives of the flower of its youth.

I do not believe in a large standing army any more than do my friends who are against any preparation. I have always opposed a large standing army. I do believe, however, in a strong Navy, and I have to-day voted for increasing our Navy, because it is the first line of defense. But we have no large standing army. We have about 130,000 National Guardsmen mustered into the service now, and a little over 100,000 Regulars. That is about all we have, and that is a small army for a population of 100,000,000 people, with, as the President says,

the countries of Europe in a state of conflagration and our southern border threatened with invasion by a hostile people.

Now, I do not think there is going to be any war, but, Mr. President, we do not know whether there will be or not, and preparation for an event that might come is simply taking out an insurance policy, that is all, for protection against the future.

It costs something, but this Government is worth spending a good deal of money for, and its institutions are worth more to the democracies of the world than it is possible to spend. I do not know whether we are going to have any war or not, but I do hope we may be prepared for one if one does come.

I disagree from some of the Senators who claim that because Europe will be exhausted when the war is over, and that therefore we are safe from attack in that quarter.

Mr. President, there is an active, virile nation across the Pacific from us that at some time or another—it may not be in my day and generation, I hope it may never be—we may have to meet; and we will have to meet it some time unless America does what Count Okuma said she must do, and that is to get off her pedestal of superiority as a race and place herself on an equality with the oriental races. He is not the only great Japanese statesman who has said that must be done. It is a proud race, it is a strong race, it is a virile race, and if I may be permitted to say so, it is a predatory race, and predatory nations in this day and generation, Mr. President, do not travel singly; they travel in flocks, and there are other predatory nations on the Continent of Europe that seem to be joining hands with her. Japan has a treaty now with Russia. I do not know what the terms of it are, nor do I care. I do not care what sort of a treaty they or any nations enter into, but it behooves the United States to be ready to meet any single nation or any combination of nations.

It was very truly said by a distinguished German statesman a short while ago that a treaty is simply a piece of parchment or paper to be destroyed whenever the interests of nations require that such treaty should be not observed.

Mr. President, treaties between the United States and Great Britain are being violated to-day by Great Britain, and the British, it is claimed, are the best friends that America has. The treaties between other nations have been and are now being violated and disregarded whenever it suits the interests of the powers to disregard them.

Japan and England have had a treaty, offensive and defensive. I believe the United States was exempted from its provisions in part; but that exemption will not protect the United States whenever it suits the interests of Great Britain and Japan to join hands against our country. I am not insinuating that any such conjunction will ever take place or any joint attack ever be made by these nations or any nations against the United States, but I am calling attention to conditions that actually exist; and I insist, and have insisted for two years or more, living on the western coast as I do, that the United States ought to be prepared to defend herself, if need be, against those or any powers, acting in concert or otherwise.

Japan is not satisfied with that treaty. Why? Because, amongst other things, Great Britain treats the Japanese worse than it is alleged the people of the United States do, not only on the Pacific coast but in Australia as well. The Japanese people in Victoria and Vancouver and in other places are discriminated against, notwithstanding the treaty of alliance between them. Japan is just as angry at the treatment of her subjects there as she is at the treatment of her subjects in the United States, and justly so.

The distinguished Senator from California [Mr. WORKS] touched the keynote of the situation the other day when he rather insisted that the United States has the undoubted right to do as she pleases with reference to these great racial questions and her internal policies. The United States is never going to be satisfied to treat any oriental nation so as to bring them within the usual favored-nation clause of treaties. They will not do it; they will never consent to do it.

I have no prejudice against the Japanese. I am just stating the conditions as they actually exist. Japan says that the United States must treat her subjects exactly as they treat the subjects of any other country. Right here on the floor of the Senate I protested against the treaty between the United States and Japan because we pretended to put them in the category of other nations, and then had a gentleman's agreement on the side that they were not to be so treated. In other words, we transferred to them the right to visé the passports of her emigrants who came within the prohibited class instead of exercising our undoubted right to exercise that high prerogative ourselves. Only two or three of us voted against that treaty. I was taking the position then that my distinguished friend from California took the other day, that we have a right to do as we please with our country and assert our rights against the world.

Let me refer a moment again to Japan. Japan it is reported is going to abrogate her treaty with England. It is said she made a treaty with Russia. I do not know what that means, but they are two of the most powerful military nations on the face of the earth. The Japanese are the powder bearers, the dynamite carriers, and the railroad builders of the Pacific coast; and, according to the distinguished Senator from California [Mr. WORKS], who made a speech here some months ago, they have more trained veterans on the Pacific coast than we have in the Regular Army of continental United States. We look complacently on these things, Mr. President, and say that the same Providence that has looked over our country in the past is likely to continue to do so in the future.

I hope he may; I believe he will; but while this terrible condition of war exists on the face of the earth we at least ought to be ready to defend ourselves against any power that may threaten us.

Mr. President, we have only a few trained aviators in this country; Japan has, I am informed, 400. Her volunteer soldiers go out and march 15 or 20 miles every day, practically without pay; they dig trenches and cut barbed-wire entanglements merely for the sake of learning how such things are done. Yet I still hope that we shall not have any trouble with Japan. I am simply suggesting that these appropriations ought to be made for the purpose of preparing in part in case we have trouble with any other power of the earth.

We have now something like 135,000 National Guardsmen mustered into the Federal service and we have something over 100,000 Regulars. This appropriation bill is increased largely because provision was not made for the National Guard in the other House either for their pay, for their transportation, or their subsistence. We have increased the bill to meet those emergencies and conditions on the frontier. As these items come up I shall be very glad to explain them to the Senate.

I am frank to say that when the bill was made up we inserted some items, in view of the then existing situation in Mexico, which might now justly be cut out, and I shall at the proper time ask the Senate to reduce them. I think they will amount to twenty-five or thirty million dollars. I have not estimated exactly the amount, but the bill will be reduced quite largely to meet conditions as they are, and not contemplated conditions which were likely to have occurred if we had intervened in Mexico. The bill, as reported by the Senate committee, undertook to make provision for those things. That is one reason why the bill seems so large.

Mr. President, with this brief statement of the conditions and of some of the ideas which animated our committee in the preparation of the bill, I desire to say that I hope we may speed the bill along as fast as we can and get it through at as early a day as possible.

The VICE PRESIDENT. The Secretary will proceed with the reading of the bill.

The Secretary proceeded to read the bill.

The first amendment of the Committee on Military Affairs was, on page 1, after line 6, to strike out:

Contingencies of the Army: For all contingent expenses of the Army not otherwise provided for and embracing all branches of the military service, including the office of the Chief of Staff; for all emergencies and extraordinary expenses, exclusive of personal services in the War Department or any of its subordinate bureaus or offices at Washington, D. C., arising at home or abroad, but impossible to be anticipated or classified; to be expended on the approval and authority of the Secretary of War, and for such purposes as he may deem proper, including the payment of a per diem allowance not to exceed $4 in lieu of subsistence to employees of the War Department traveling on official business outside of the District of Columbia and away from their designated posts, $25,000.

And insert:

Contingencies of the Army: For all contingent expenses of the Army not otherwise provided for and embracing all branches of the military service, including the office of the Chief of Staff; for all emergencies and extraordinary expenses, including personal services in the War Department or any of its subordinate bureaus or offices at Washington, D. C., or in the Army at large, but impossible to be anticipated or classified; to be expended on the approval and authority of the Secretary of War, and for such purposes as he may deem proper, including the payment of a per diem allowance not to exceed $4 in lieu of subsistence to employees of the War Department traveling on official business outside of the District of Columbia and away from their designated posts, $100,000.

The amendment was agreed to.

The next amendment was, under the subhead "Office of the Chief of Staff," on page 5, line 2, after "$35,350," to insert:

Provided, That officers in the grade of second lieutenant in the Field Artillery may be assigned, for the period of one year, to batteries stationed at the School of Fire for Field Artillery at Fort Sill, Okla., for the purpose of pursuing courses of practical instruction in field artillery.

The amendment was agreed to.

The next amendment was, under the subhead "Office of the Chief Signal Officer," on page 7, line 16, after the word "ranges" to insert "motorcycles and motor-driven vehicles used for technical and official purposes; professional and scientific books of reference, pamphlets, periodicals, newspapers, and maps, for use in the office of the Chief Signal Officer," so as to read:

Signal Service of the Army: For expenses of the Signal Service of the Army, as follows: Purchase, equipment, and repair of field electric telegraphs, radio installations, signal equipments and stores, binocular glasses, telescopes, heliostats, and other necessary instruments, including necessary meteorological instruments for use on target ranges; motorcycles and motor-driven vehicles used for technical and official purposes; professional and scientific books of reference, pamphlets, periodicals, newspapers, and maps, for use in the office of the Chief Signal Officer.

The amendment was agreed to.

The next amendment was, on page 8, line 4, after the word "otherwise," to strike out "$3,755,000" and insert "$14,827,156," so as to make the clause read:

Signal Service of the Army: For expenses of the Signal Service of the Army, as follows: Purchase, equipment, and repair of field electric telegraphs, radio installations, signal equipment and stores, binocular glasses, telescopes, heliostats, and other necessary instruments, including necessary mereorological instruments for use on target ranges; motorcycles and motor-driven vehicles used for technical and official purposes; professional and scientific books of reference, pamphlets, periodicals, newspapers, and maps, for use in the office of the Chief Signal Officer; war balloons and airships and accessories, including their maintenance and repair; telephone apparatus (exclusive of exchange service) and maintenance of the same; electrical installations and maintenance at military posts; fire-control and direction apparatus and material for field artillery; maintenance and repair of military lines and cables, including salaries of civilian employees, supplies, general repairs, reserved supplies, and other expenses connected with the duty of collecting and transmitting information for the Army by telegraph or otherwise, $14,827,156.

Mr. OVERMAN. That is a great increase, amounting to $10,000,000, and I think the amendment had better be passed over in order that we may have some explanation of it. I also ask that the next amendment be passed over. I am not opposed to them, but I think an increase of from $3,000,000 to $14,000,000 ought to have some discussion.

Mr. CHAMBERLAIN. If the Senator——

Mr. LA FOLLETTE. I also ask that it be passed over.

Mr. CHAMBERLAIN. Very well.

The VICE PRESIDENT. The amendment will be passed over.

The reading of the bill was resumed. The next amendment of the Committee on Military Affairs was, on page 8, line 6, after the word "than," to strike out "$3,222,100" and insert "$13,281,666," so as to read:

Provided, however, That not more than $13,281,666 of the foregoing appropriation shall be used for the purchase, manufacture, maintenance, operation, and repair of airships and other aerial machines and accessories necessary in the aviation section: and for the purchase, maintenance, repair, and operation of motor-propelled, passenger-carrying vehicles which may be necessary for the aviation section: *Provided further,* That not to exceed $50,000 of the above sum will be available for the payment of all expenses in connection with the development of a suitable type of aviation motor, under such regulations as the Secretary of War may prescribe.

Mr. OVERMAN. Let that go over.

The VICE PRESIDENT. That depends on the other amendment, and will go over.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, on page 9, after line 10, to strike out:

Purchase of land in the State of California for aviation school purposes: For the acquisition, by purchase or by condemnation, of a site or sites in the State of California for an aviation school and training grounds of the Signal Corps of the United States Army, not to exceed $300,000.

And insert:

The Secretary of War is hereby authorized to accept for the United States from any citizen of the United States a donation of a tract or tracts of land suitable and desirable in his judgment for the purposes of an aviation field and remount station, the terms of the donation also to authorize the use of the property donated for any other service of the United States which may hereafter appear desirable.

The amendment was agreed to.

The next amendment was, under the subhead "Pay of officers of the line," on page 10, line 14, after the word "line," to strike out "$10,000,000" and insert:

$11,400,000: *Provided,* That in applying section 25 of the national defense act approved June 3, 1916, the President shall assign to officers of the Army such constructive dates of original commission, from which lengths of commissioned service shall be computed, as will preserve their rights to promotion in accordance with their relative order on the lineal lists of their arms and continue in effect losses of files occasioned by sentences of courts-martial or failures to pass required examinations for promotion, said constructive dates of original commission to be subject to change whenever a change thereof may be necessary in order to carry into effect losses of files hereafter incurred by any officer through a sentence of court-martial or a failure to pass a required examination for promotion: *Provided further,* That in determining the arm from which a detail is to be made to a vacancy in the detached officers' list, as provided in the third proviso of section 25 of the national defense act approved June 3, 1916, the officer of any grade who is the senior in that grade according to the constructive dates of original commission provided for in the preceding proviso shall be considered the senior in length of commissioned service of all officers of that grade: *And provided further,* That when by reason of increase in the arm, corps, or branch of the service in which an officer is commissioned his loss of files in lineal rank due to suspension from promotion on account of failure to pass the required examination therefor exceeds the loss he would have sustained if no such increase had occurred, he shall, if promoted upon reexamination, be advanced to the position he would have occupied in the grade to which promoted had no increase occurred.

Mr. LA FOLLETTE. I will ask the Senator from Oregon, the chairman of the committee, what is the purpose of that amendment and the necessity for the increase in the expenditure?

Mr. WARREN. It is to correct an error in section 25 of the military reorganization law.

Mr. CHAMBERLAIN. I presume the Senator refers to the affirmative legislation. The affirmative legislation is designed to equalize promotions so as to preserve the relative rank of the officers under their commissions. That is all it does. It is introduced in this bill at the request of the War Department to preserve intact the relative rank of the officers under their commissions. As to the appropriation, if the Senator would like to have the estimate for the increase I will give it to him. It is for the first increment provided for under the military reorganization or national defense act. The House provision was made without regard to that.

Mr. LA FOLLETTE. Very well.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, on page 11, line 21, after the word "service," to strike out "$2,000,000" and insert "$2,500,000," so as to make the clause read:

Additional pay to officers for length of service, $2,500,000.

The amendment was agreed to.

The next amendment was, on page 11, after line 22, to insert:

For pay of members of the Officers' Reserve Corps when ordered to temporary duty, $10,000.

The amendment was agreed to.

The next amendment was, at the top of page 12, to insert:

For pay of members of the Officers' Reserve Corps when ordered to duty with troops or at field exercises, or for instruction, $25,000.

The amendment was agreed to.

The next amendment was, on page 12, after line 3, to insert:

For pay of members of the Officers' Reserve Corps appointed temporary second lieutenants at $100 per month, $5,000.

The amendment was agreed to.

The next amendment was, on page 12, line 7, after the words "National Guard," to strike out "$2,225,000" and insert "$11,400,000," so as to make the clause read:

Pay of officers, National Guard, $11,400,000.

Mr. OVERMAN. Mr. President, is that amount necessary because of the increase in the National Guard, or is it because of an anticipated increase?

Mr. CHAMBERLAIN. I will insert in the RECORD the estimate furnished by the department.

Mr. OVERMAN. All I want to know is whether the amount is made necessary to pay the National Guard who have been called into the service?

Mr. CHAMBERLAIN. It is for the National Guard already under arms. It is to pay them. The House bill did not provide for them except on a peace basis.

Mr. OVERMAN. They were called out after the House bill was passed?

Mr. CHAMBERLAIN. They were called out after the House bill was practically completed. The Senator will observe that many of these increases are due to the fact that the National Guard was not provided for in the House bill. They had not been called out, as a matter of fact, and now there are one hundred and thirty odd thousand of them under arms.

Mr. WARREN. And they receive the same pay as the Regular soldiers?

Mr. CHAMBERLAIN. They receive the same pay as the Regulars, and if they had gone over the line they would have had 20 per cent more.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, under the subhead "Pay of enlisted men," on page 12, line 10, after "$23,000,000," to insert:

Provided, That hereafter one of the enlisted men detached from the Army at large for duty at each of the recruit depots under the provisions of the act of June 12, 1906, shall, while so detached, have the rank, pay, and allowances of a regimental sergeant major.

Mr. LEE of Maryland. Mr. President, I should like to reserve the right to offer an amendment to that item a little later on.

The VICE PRESIDENT. Does the Senator refer to the one just read?

Mr. LEE of Maryland. To the amendment just read.

The VICE PRESIDENT. If the Senator desires to offer an amendment to the amendment it had better go over.

Mr. LEE of Maryland. Very well. I make that request.

The VICE PRESIDENT. The amendment will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, on page 12, after line 16, to insert:

For pay of enlisted men of the Regular Army Reserves, at $24 per year, $10,000.

The amendment was agreed to.

The next amendment was, on page 12, after line 18, to insert:

For pay of enlisted men of the Regular Army Reserves while engaged in field training for a period not exceeding 15 days each year, $7,500.

The amendment was agreed to.

The next amendment was, on page 12, after line 21, to insert:

For bounty at the rate of $3 per month to enlisted men of the Regular Army Reserves mobilized by order of the President, $1,000.

The amendment was agreed to.

The next amendment was, on page 12, after line 24, to insert:

For bounty for reenlistments in time of war, $10,000.

The amendment was agreed to.

The next amendment was, at the top of page 13, to insert:

For pay of members of the Enlisted Reserve Corps when called into actual service, $25,000.

The amendment was agreed to.

The next amendment was, on page 13, after line 2, to insert:

For pay of members of the Enlisted Reserve Corps when called out for instruction or training for periods not exceeding 15 days in any one calendar year, $5,000.

The amendment was agreed to.

The next amendment was, on page 13, line 6, after the words "National Guard," to strike out "$7,750,000" and insert "$23,000,000," so as to make the clause read:

Pay of enlisted men of all grades, National Guard, $23,000,000: *Provided*, That all officers and enlisted men of the National Guard who are Government employees and who respond to the call of the President for service shall, at the expiration of the military service to which they are called, be restored to the positions occupied by them at the time of the call.

Mr. LEE of Maryland. I ask that that amendment go over. That is an amendment affecting the pay of the National Guard.

The VICE PRESIDENT. The amendment will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, under the subhead "Corps of Engineers," on page 13, line 14, after the word "men," to strike out "$600,000" and insert "$787,500," so as to make the clause read:

Pay of enlisted men, $787,500.

The amendment was agreed to.

The next amendment was, under the subhead "Ordnance Department," on page 13, line 17, after the word "men," to strike out "$275,000" and insert "$351,000," so as to make the clause read:

Pay of enlisted men, $351,000.

The amendment was agreed to.

The next amendment was, on page 13, line 18, after the word "service," to strike out "$125,000" and insert "$150,000," so as to make the clause read:

Additional pay for length of service, $150,000.

The amendment was agreed to.

The next amendment was, under the subhead "Quartermaster Corps," on page 13, line 20, after the word "men," to strike out "$1,800,000" and insert "$2,150,000," so as to make the clause read:

Pay of enlisted men, $2,150,000.

The amendment was agreed to.

The next amendment was, under the subhead "Signal Corps," on page 13, line 23, after the word "men," to strike out "$551,664" and insert "$890,000," so as to make the clause read:

Pay of enlisted men, $890,000.

The amendment was agreed to.

The next amendment was, under the subhead "Medical Department," on page 14, line 2, after the word "men," to strike out "$1,300,000" and insert "$1,743,300," so as to make the clause read:

Pay of enlisted men, $1,743,300.

The amendment was agreed to.

The next amendment was, on page 14, after line 3, to insert:

For pay of privates, first class, when rated as dispensary assistants, nurses, or surgical assistants, $5,000.

The amendment was agreed to.

The next amendment was, on page 14, after line 5, to strike out:

Pay to clerks, messengers, and laborers at headquarters of the several Territorial departments, Territorial districts, tactical divisions and brigades, service schools, and office of the Chief of Staff.
One chief clerk, at the office of the Chief of Staff, $2,250 per annum.
Three clerks, at $2,000 each per annum.
Twelve clerks, at $1,800 each per annum.
Fifteen clerks, at $1,600 each per annum.
Thirty-eight clerks, at $1,400 each per annum.
Seventy clerks, at $1,200 each per annum.
Sixty-five clerks, at $1,000 each per annum.
Six clerks (Filipinos), at $500 each per annum.
One captain of the watch, at $900 per annum.
Three watchmen, at $720 each per annum.
One gardener, at $720 per annum.
One packer, at $840 per annum.
Two messengers, at $840 each per annum.
Fifty-nine messengers, at $720 each per annum.
Six messengers (Filipinos), at $300 each per annum.
One laborer, at $660 per annum.
Two laborers, at $600 each per annum.
Five charwomen, at $240 each per annum.
In all, $312,690.
Additional pay while on foreign service, $9,000.

And insert:

CLERKS, MESSENGERS, AND LABORERS, OFFICE OF THE CHIEF OF STAFF.

One chief clerk, at $2,250 per annum, $2,250;
Four clerks, at $2,000 each per annum, $8,000;
Six clerks, at $1,800 each per annum, $10,800;
Eleven clerks, at $1,600 each per annum, $17,600;
Fifteen clerks, at $1,400 each per annum, $21,000;
Twenty-one clerks, at $1,200 each per annum, $25,200;
Thirteen clerks, at $1,000 each per annum, $13,000;
One captain of the watch, at $900 per annum, $900;
Three watchmen, at $720 each per annum, $2,160;
One gardener, at $720 per annum, $720;
One packer, at $840 per annum, $840;
One chief messenger, at $1,000 per annum, $1,000;
One messenger, at $840 per annum, $840;
Twenty messengers, at $720 each per annum, $14,400;
One laborer, at $660 per annum, $660;
Two laborers, at $600 each per annum, $1,200;
Five charwomen, at $240 each per annum, $1,200;
In all, $121,770.

CLERKS AND MESSENGERS FOR HEADQUARTERS OF THE SEVERAL TERRITORIAL DEPARTMENTS, DISTRICTS, DIVISIONS AND BRIGADES, AND SERVICE SCHOOLS.

Seven clerks, at $2,000 each per annum, $14,000;
Eleven clerks, at $1,800 each per annum, $19,800;
Fourteen clerks, at $1,600 each per annum, $22,400;
Thirty-two clerks, at $1,400 each per annum, $44,800;
Fifty-seven clerks, at $1,200 each per annum, $68,400;
Forty-nine clerks, at $1,000 each per annum, $49,000;
Thirty-nine messengers, at $720 each per annum, $28,080;
In all, $246,480.
Additional pay while on foreign service, $9,000.
For commutation of quarters and of heat and light, $19,650.
Hereafter headquarters clerks shall be known as Army field clerks and shall receive pay at the rates herein provided, and after 12 years of service, at least 3 years of which shall have been on detached duty away from permanent station, or on duty beyond the continental limits of the United States, or both, shall receive the same allowances, except retirement, as heretofore allowed by law to pay clerks, Quartermaster Corps, and shall be subject to the rules and articles of war.
Hereafter not to exceed 200 clerks, Quartermaster Corps, who shall have had 12 years of service, at least 3 years of which shall have been on detached duty away from permanent station, or on duty beyond the continental limits of the United States, or both, shall be known as field clerks, Quartermaster Corps, and shall receive the same allowances, except retirement, as heretofore allowed by law to pay clerks, Quartermaster Corps, and shall be subject to the rules and articles of war.
For commutation of quarters and of heat and light, $151,000.

Mr. OVERMAN. Mr. President, I should like to inquire why it is necessary to provide for so many messengers? Thirty-nine messengers are provided for in one item. It is stated that they are "for headquarters of the several territorial departments." How many territorial departments are there?

Mr. WARREN. Wherever there are troops, clerical assistance and messengers are required and have to be sent. This item represents the help that is required all over the country at various points where there are troops, whether it is a continental division, including a third of the United States, or whether it is a point where there is but a regiment of troops.

Mr. OVERMAN. How many messengers do they have in a camp?

Mr. WARREN. I do not know that I can tell the Senator how many they put in a camp. I think there would be only one in an ordinary camp, but in a large headquarters there will,

of course, be more. I will say to the Senator that we put in less than was estimated for.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, under the subhead "The Adjutant General's Department," on page 17, line 20, after the words "The Adjutant General's Department," to strike out "$80,500" and insert "$100,000," so as to make the clause read:

For pay of officers of The Adjutant General's Department, $100,000.

Mr. LEE of Maryland. Mr. President, I should like to ask the Senator from Oregon if the Senate committee made proper and sufficient allowance, in connection with The Adjutant General's office, for an expansion of the work there?

Mr. WARREN. I will say to the Senator that as to clerks, this bill does not touch The Adjutant General's office at all as far as Washington is concerned, but provides for the clerks in the territory outside of Washington. The legislative, executive, and judicial appropriation bill carries the clerks for The Adjutant General's office here, and I may say to the Senator that there are estimates already made for the deficiency bill for an increase of clerical force here in Washington on account of the increase in troops.

Mr. LEE of Maryland. It is perfectly obvious that some increase should be granted there.

Mr. CHAMBERLAIN. If the Senator will look on page 29 of the bill he will find a provision for additional clerks in the field on account of the muster into the service of the United States of the National Guard.

Mr. OVERMAN. I should like to ask whether all the clerks provided for here on page 15 are for field service? Are they all clerks outside of Washington?

Mr. WARREN. The clerks for the General Staff are in Washington. That is, when I say they are in Washington, the large proportion of them are here, but some are sent out whenever officers of the General Staff are sent away on duty.

Mr. OVERMAN. The Senator is on the Committee on Appropriations, and he knows that we provided for all the clerks here in Washington in the legislative bill.

Mr. WARREN. Yes; you provided for all of them, except that we have heretofore provided for the clerks for the General Staff and the field clerks together. It has been necessary to separate them; so now we provide for clerks for the staff as we did before, with an increase in numbers, and then we provide for general field clerks that cover those from the staff for the field, and those from the Quartermaster's Department for the field, and so forth.

Mr. OVERMAN. If these are outside of Washington, I have nothing more to say.

Mr. WARREN. They are to go outside of Washington.

Mr. OVERMAN. I know that in the legislative bill we provided for the clerks here in Washington.

Mr. WARREN. These are entirely in addition to those. The Senator has very properly raised the question about the legislative bill, but they are very distinct. These are the only clerks we have provided for in the Army appropriation bill.

Mr. WADSWORTH. Mr. President, may I ask the chairman of the committee, or any member of the committee, for a little light on one question in connection with the legislation affecting the headquarters clerks, at the bottom of page 16? I notice that these clerks under this legislation, which is new, "shall be subject to the Rules and Articles of War." Do I infer from that that they are enlisted men?

Mr. WARREN. I will say to the Senator that a good many of these are men who were formerly employees, but have enlisted under the reorganization of the Quartermaster's Department under a law which was passed some three or four or more years ago. I understand they will all be under arrangements which allow the enforcement of the Articles of War if they obtain the benefits bestowed by this section, which gives them allowance for quarters, and so forth.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, on page 17, line 22, after the word "service," to strike out "$22,000" and insert "$26,000," so as to make the clause read:

Additional pay for length of service, $26,000.

The amendment was agreed to.

The next amendment was, under the subhead "Inspector General's Department," on page 17, line 24, after the words "Inspector General's Department," to strike out "$59,000" and insert "$69,500," so as to make the clause read:

For pay of officers of the Inspector General's Department, $69,500.

The amendment was agreed to.

The next amendment was, on page 17, line 26, after the word "service," to strike out "$16,000" and insert "$17,500," so as to make the clause read:

Additional pay for length of service, $17,500.

The amendment was agreed to.

The next amendment was, under the subhead "Corps of Engineers," on page 18, line 2, after the words "Corps of Engineers," to strike out "$592,700" and insert "$725,000," so as to make the clause read:

Pay of officers of the Corps of Engineers, $725,000.

The amendment was agreed to.

The next amendment was, on page 18, line 4, after the word "service," to strike out "$120,000" and insert "$150,000," so as to make the clause read:

Additional pay for length of service, $150,000.

The amendment was agreed to.

The next amendment was, under the subhead "Ordnance Department," on page 18, line 6, after the words "Ordnance Department," to strike out "$253,600" and insert "$280,000," so as to make the clause read:

For pay of officers of the Ordnance Department, $280,000.

The amendment was agreed to.

The next amendment was, on page 18, line 8, after the word "service," to strike out "$55,000" and insert "$60,000," so as to make the clause read:

Additional pay for length of service, $60,000.

The amendment was agreed to.

The next amendment was, under the subhead "Quartermaster Corps," on page 18, line 10, after the words "Quartermaster Corps," to strike out "$655,400" and insert "$746,900: *Provided*, That details to the Quartermaster Corps of the Army under the provisions of the act approved February 2, 1901, may be made from the Army at large from the grades in which vacancies to be filled by detail exist in said corps, or from the next lower grades, and officers detailed to fill such vacancies in grades above that of captain in said corps may be detailed or redetailed therein without a compulsory period of service outside thereof. Officers so detailed to fill vacancies below the grade of major in said corps shall again be eligible for detail therein after having served for at least one year in the branches of the service in which such officers shall, respectively, hold commissions: *Provided further*, That officers serving by detail in said corps shall take rank in their respective grades from the dates of their rank under their original detail in said grades: *Provided further*, That the two preceding provisos shall expire by limitation on June 30, 1917: *Provided further*, That the President of the United States, in his discretion, be, and he is hereby, authorized to appoint Charles P. Daly, chief clerk, office of the Quartermaster Corps, United States Army, a military storekeeper in the Quartermaster Corps, United States Army, with the rank, pay, and allowances of a captain, mounted; and the grade of military storekeeper is hereby revived in the Army of the United States for this purpose only: *Provided further*, That hereafter the provisions of section 1191 of the Revised Statutes of the United States may, in the discretion of the Secretary of War, be waived in the cases of officers of the Quartermaster Corps who are not accountable for public funds or public property," so as to make the clause read:

For pay of officers of the Quartermaster Corps, $746,900: *Provided*, That details to the Quartermaster Corps of the Army under the provisions of the act approved February 2, 1901, may be made from the Army at large from the grades in which vacancies to be filled by detail exist in said corps, or from the next lower grades, and officers detailed to fill such vacancies in grades above that of captain in said corps may be detailed or redetailed therein without a compulsory period of service outside thereof. Officers so detailed to fill vacancies below the grade of major in said corps shall again be eligible for detail therein after having served for at least one year in the branches of the service in which such officers shall, respectively, hold commissions: *Provided, further*, That officers serving by detail in said corps shall take rank in their respective grades from the dates of their rank under their original detail in said grades: *Provided further*, That the two preceding provisos shall expire by limitation on June 30, 1917: *Provided further*, That the President of the United States, in his discretion, be, and he is hereby, authorized to appoint Charles P. Daly, chief clerk, office of the Quartermaster Corps, United States Army, a military storekeeper in the Quartermaster Corps, United States Army, with the rank, pay, and allowances of a captain, mounted; and the grade of military storekeeper is hereby revived in the Army of the United States for this purpose only: *Provided further*, That hereafter the provisions of section 1191 of the Revised Statutes of the United States may, in the discretion of the Secretary of War, be waived in the cases of officers of the Quartermaster Corps who are not accountable for public funds or public property.

Mr. OVERMAN. Mr. President, why is this one man provided for in general legislation?

Mr. WARREN. Mr. President, this one man, Mr. Daly, was for many years chief clerk of the Quartermaster's Department. He, in a way, has filled two positions. He is a very valuable man. This legislation gives him a less pay than he had before, but gives him the position, and, of course, in the long run will

give him the retirement privilege. He has served something like 25 or 30 years already. I will say that very numerous recommendations came to the committee, and in fact came to the House, and the matter was offered on the floor of the House by Mr. HAY, but it went out on a point of order. The communications on the subject are very voluminous, and show that the appreciation of the man and his acquirements is general, I might say universal, not only with the employees that work under him, but with all of the officers over him with whom he has served.

Mr. OVERMAN. In other words, this legislation is for the purpose of putting a clerk in the Army, and allowing him to retire at a certain age.

Mr. WARREN. It follows what has been done in some other very exceptional cases—the case of Tweedale, as the Senator will remember, and some others.

Mr. OVERMAN. I know it has been done.

Mr. WARREN. It is entirely a personal matter, but it is one that appeals very strongly to everyone who knows the circumstances, because of the excellence of this man, who has given his life to this work.

Mr. OVERMAN. Are there not many other excellent people up there who ought to be put into the Army and given the right to retire? I do not know the man. I know nothing about him, except that I know this provision is for the purpose of putting him in the Army by law.

Mr. WARREN. I will say to the Senator that this man is nothing to me, and was nothing to anyone on the committee. We only considered the case strictly on its merits.

Mr. OVERMAN. Oh, I know the Senator is not personally interested in the matter.

Mr. WARREN. But he has been of very great service to the Army at large. There is no doubt that he has saved millions of dollars, in his time, by his efficiency and faithfulness.

Mr. OVERMAN. I have no doubt he is a faithful man.

Mr. CHAMBERLAIN. It is personal legislation; there is not any question about that. Gen. Aleshire came down personally and expressed a desire to have it done on account of this man's efficiency.

Mr. OVERMAN. I am not going to object to it; but I think, being personal legislation, that it is bad legislation. It is taking one man out of the clerks in the office and putting him in the Army, and by legislation allowing him to retire at a certain age and get full pay, or three-quarters pay.

I do not know why we should not do that as to every good man up there. I do not know why we should select one man and put him in this position.

Mr. WARREN. I will say to the Senator that the parallel would hardly be accurate with anyone who has served heretofore, because of this man's peculiarly valuable service. Not only the Quartermaster General, but all others who have knowledge of his work, are in favor of this.

Mr. OVERMAN. It is bad legislation, as the Senator knows.

Mr. WARREN. I admit, as the Senator says, that it is personal legislation, and in that respect it leads in the wrong direction; but it is one of those cases that are exceptional, and the committee thought it best to put it in.

Mr. OVERMAN. And it is bad legislation in addition because it is a precedent for some other man to say: "You did this for Mr. Daly; now do it for me." These poor clerks in the other departments, who are just as good and just as faithful and just as honest as he is, are not given this privilege. I am not going to make a point of order against it, but I do protest against such legislation.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 19, line 16, after the word "service," to strike out "$160,000" and insert "$222,375," so as to make the clause read:

Additional pay for length of service, $222,375.

The amendment was agreed to.

The next amendment was, under the subhead "Medical Department," on page 19, line 18, after the words "Medical Department," to strike out "$1,800,000" and insert "$1,930,000," so as to make the clause read:

For pay of officers of the Medical Department, $1,930,000.

The amendment was agreed to.

The next amendment was, under the subhead "Judge Advocate General's Department," on page 20, line 6, after the word "Department," to strike out "$47,500" and insert "$60,000," so as to make the clause read:

For pay of officers in the Judge Advocate General's Department, $60,000.

The amendment was agreed to.

The next amendment was, on page 20, after line 22, to strike out:

For paying the expenses of clerical hire and printing and other expenses incident to the making of the revision and codification herein directed, such sum as may be necessary, not to exceed $5,000, is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to be expended upon certificates of the Secretary of War that the expenditures were necessary therefor.

And insert:

For paying the expenses of clerical hire and printing and other expenses incident to the making of the revision and codification herein directed, not to exceed $5,000, to be expended upon certificates of the Secretary of War that the expenditures were necessary therefor.

The amendment was agreed to.

The next amendment was under the subhead "Signal Corps," on page 21, line 10, after the words "Signal Corps," to strike out "$319,650" and insert "$415,200," so as to make the clause read:

For pay of officers of the Signal Corps, $415,200.

The amendment was agreed to.

The next amendment was, on page 21, after line 12, to insert:

For pay of 30 aviators, Signal Corps, at $1,800 each per annum, $54,000.

Mr. STONE. Mr. President, if I may have the attention of the chairman of the committee, in the case of the item just passed, pay of officers of the Signal Corps, $319,650, is the provision as it passed the House. The Senate raised it nearly $100,000.

Mr. CHAMBERLAIN. I will say to the Senator that I explained a while ago, when the Senator was not in the Chamber, that many of the increases are accounted for in this way: When the House passed this bill the Army reorganization act had not passed, making changes in all these corps.

Mr. WARREN. The Senator will understand, of course, that this covers increase in the Aviation Corps. That is included.

Mr. CHAMBERLAIN. That corps has been increased. Many of them have been increased. The House did not have the increase, and had no estimates on them.

Mr. STONE. There is an amendment just below——

Mr. WARREN. The Senator alludes to the 30 citizen assistant aviators that are provided, in addition to the officers of the Army, to give some encouragement to the young men who apply for places. This authorizes the employment of not to exceed the number of 30, at the rate of $1,800 a year, and their discharge when they are no longer needed.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, under the subhead "Retired officers," on page 21, line 21, after "$2,700,000," to insert: "*Provided*, That when by reason of the movement of troops a post is temporarily left without its regular garrison and with no commissioned officers except of the Medical Reserve Corps on duty thereat, the Secretary of War may assign a retired officer of the Army, with his consent, to active duty in charge of such post. The officer so assigned shall perform the duties of commanding officer and also any necessary staff duties at such post, and shall, while in the performance of such duties, receive the full pay and allowances of his grade, subject to the limitations imposed by the act of March 2, 1905, and the act of June 12, 1906," so as to make the clause read:

For pay of officers on the retired list and for officers who may be placed thereon during the current year, $2,700,000: *Provided*, That when by reason of the movement of troops a post is temporarily left without its regular garrison and with no commissioned officer except of the Medical Reserve Corps on duty thereat, the Secretary of War may assign a retired officer of the Army, with his consent, to active duty in charge of such post. The officer so assigned shall perform the duties of commanding officer and also any necessary staff duties at such post, and shall, while in the performance of such duties, receive the full pay and allowances of his grade, subject to the limitations imposed by the act of March 2, 1905, and the act of June 12, 1906.

The amendment was agreed to.

The next amendment was, on page 22, after line 12, to insert:

That the President be, and he is hereby, authorized to appoint Col. James Jackson, United States Army (retired), to the position and rank of brigadier general on the retired list.

Mr. OVERMAN. Mr. President, I expect that that amendment ought to go over. There is a Senator who wishes to be here when it is considered. It will be remembered that this was in a bill which was on the calendar, and it was called on the calendar three times, and failed to pass.

Mr. CHAMBERLAIN. I will say to the Senator that that bill did pass the Senate.

Mr. OVERMAN. Did it finally pass?

Mr. CHAMBERLAIN. Oh, yes. It passed the Senate, and is in the House. This one passed the Senate. A Senator objected to it, but withdrew his objection.

Mr. OVERMAN. I know it was called three times; but if it passed the Senate, I have no objection.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, on page 22, after line 16, to insert:

That the President be, and he is hereby, authorized to appoint, by and with the advice and consent of the Senate, any colonel of the Army on the retired list who before retirement served more than 45 years and 6 months, including 16 years in the line of the Army, who held command in the line or staff over 9½ years, who received campaign badges for service in four Indian campaigns and in the War with Spain and the Philippine insurrection, and who was recommended by a commanding general in time of war or insurrection for appointment to the grade of general officer in the Volunteer Army, to the grade of brigadier general on the retired list: *Provided*, That such officer did not receive advanced grade upon retirement nor has since received any advance over the grade held at the date of retirement.

Mr. STONE. Whom is that for?

Mr. THOMAS. I will say to the Senator from Missouri that the amendment just read is one which refers to the case of a single retired officer—Col. James W. Pope—now on the retired list. He is a man of advanced years and in very poor health. He has served more than 45 years and 6 months, including 16 years in the line of the Army. He held command in the line or staff over nine and a half years. He received campaign badges for service in four Indian campaigns and in the War with Spain and the Philippine insurrection. He was recommended by a commanding general in time of war or insurrection for appointment to the grade of general officer in the Volunteer Army—to the grade of brigadier general on the retired list. He is at present a resident of the city of Denver. If he had not been retired on account of age at the time he was retired—that is to say, if he had been a younger man, so that he could have served three months longer—he would have been appointed brigadier general and retired.

Since his retirement Col. Pope has been afflicted with a very serious disease of the eyes, having submitted to, I think, two separate operations, the result being that his private means are practically exhausted. It is a matter of justice to one of the most competent and meritorious officers I ever knew, one who has given his life to the service of the Army, and who, if he should die to-morrow, would leave his widow comparatively dependent upon her people for support. This amendment is merely designed, and I think it is properly designed, to cover him, as a retired officer, into the list of brigadier generals, in consequence of which he can enjoy the advantages which come from that position. Because of the facts I have just narrated it has been necessary to bring the matter to the attention of Congress in this way.

Mr. CLAPP. Mr. President, I know something of this case. I think it is a very meritorious case. While it is a practice that perhaps is likely to lead to other similar requests, would the Senator object to amending the provision by naming the officer, so that it would read:

That the President be, and he is hereby, authorized to appoint Col. James W. Pope—

And then reciting the service?

Mr. THOMAS. I have no objection to complying with the suggestion of the Senator from Minnesota.

Mr. STONE. Can that be done?

Mr. THOMAS. I introduced a bill for that purpose, but it has not yet been reported upon the calendar. In the committee it was thought best to do it in this way.

Mr. CLAPP. I know; but there is criticism, and it seems to me it is warranted, as to taking action of this kind. There has been one such case recently which has been the subject of a good deal of criticism. There are cases where, I think, we are perfectly justified in dealing with them in the way of legislative action.

I believe this is one of them; but I do think it would be better if the man were named, and then if the language were so changed that the balance of it would be a recital of his services.

Mr. THOMAS. Of course, the Senator is aware that criticisms are made when the name of the individual is given. We have just had an example of that.

Mr. CLAPP. I know; but it can not be said then that something was put through and people did not know what it was. I will not press the matter, but it does seem to me it would be better in all these cases, as in the case just a few moments ago, if the man were named. Then there could be no criticism to the effect that anything was left out.

Mr. THOMAS. I am conscious of the soundness of the criticism that is urged by the Senator to this species of legislation. It does not commend itself to me. Of course, I am aware of the fact that one precedent begets imitation until it ripens perhaps into a rule. I think, however, in view of the considerations which prompted the preparation of this amendment in the form it now stands, unless the Senator insists upon it——

Mr. CLAPP. I will not insist upon it.

Mr. THOMAS. It should be allowed to remain as it is.

Mr. CLAPP. It might possibly lead to depriving a very meritorious man of what is sought to be conferred by the bill.

Mr. WARREN. May I say to the Senator from Minnesota where we put exact conditions into the act every officer who seeks similar legislation first looks to the language employed and conditions improved. If it applies to a class and he does not come under it, of course he does not approach the committee or Congress for relief; while, on the other hand, nearly every one of the same rank is liable to ask for the same relief, although not of right entitled to it when all the prescribed circumstances are considered.

Mr. CLAPP. I know in one or two instances we have authorized the promotion and recited the circumstances, and no one else could come and ask for the same promotion unless he could bring his case within those circumstances. However, I will not press the matter. I do not care to interfere with the bill in this particular.

The amendment was agreed to.

The next amendment was, on page 23, after line 5, to insert:

That the President be, and he is hereby, authorized to appoint, by and with the advice and consent of the Senate, to the grade of major general on the retired list of the Army, with the pay of brigadier general on the retired list any brigadier general now borne on said list who served with credit in the Army throughout both the Civil War and the War with Spain, as well as during the interval between said wars, and who, being a general officer, exercised with efficiency and gallantry the command of a brigade or of a higher unit in action or in actual operations against an enemy, and who in consideration of services so rendered was recommended to be a major general, United States Volunteers, by the commanding general of the Army, as shown by the records of the War Department: *Provided*, That any brigadier general on the retired list who commanded with credit a brigade or higher unit in the Civil War, though not so recommended, may be advanced in grade as authorized by this act if he fulfills the other requirements thereof.

Mr. OVERMAN. I ask that the amendment be passed over. Those are old familiar faces. I used to be on the Military Committee myself, and we had a pretty good chairman then, the Senator from Wyoming [Mr. WARREN]. We had these cases before us time after time, and the committee would never agree to report them favorably.

Mr. WARREN. The Senator has not had these particular cases before him. I do not recall that the case of these men was ever before the committee. They receive by this legislation nothing except the title of major general. It does not bring them any compensation whatever. They are men who were general officers in command of troops, brigades, divisions, and so forth, and who did not receive one grade in retirement as did so many of the officers.

Mr. OVERMAN. I understand it is just a promotion.

Mr. WARREN. It is the name and nothing more. Every officer below the rank of colonel who served in the Civil War received a promotion of one extra grade upon retirement, and every colonel who was in the Civil War was by the same act many years ago, when retired, made a brigadier general. These men were brigadiers at the time and in command of troops, and hence got no promotion whatever by that law. These brigadiers having had command, perhaps as major general, acting in command of a division, and having been recommended for appointment as major generals of Volunteers, would like this rank; and we state here, if I am not mistaken, in the act itself that there shall be no additional compensation.

Mr. OVERMAN. How old are these men?

Mr. WARREN. They are from 70 to 80-odd years.

Mr. OVERMAN. They are Civil War veterans?

Mr. WARREN. Oh, yes; they were retired at 64 years old some years ago. They were all exceptionally good officers with brilliant records.

Mr. OVERMAN. I do not know how many men it covers.

Mr. WARREN. It covers four.

Mr. OVERMAN. What is the objection to putting the names in the bill?

Mr. WARREN. The same objection that was made a moment ago. Of course the Senator from Minnesota proposes both the names and the reasons.

Mr. OVERMAN. We can not state the reasons.

Mr. WARREN. The Senator from North Carolina, who served upon the Committee on Military Affairs, and with great credit to it for a long time and we were most sorry to lose him, knows that to pick up an officer by name and promote him in that way, unless the reason is given in the act, brings us a great many applications from others and brings about a great deal of hard feeling from those who may believe that they are entitled to the same promotion that he receives.

Mr. OVERMAN. I have opposed such legislation for about 10 years; but if the Senator will assure us that it covers only three cases——

Mr. CHAMBERLAIN. Four.

Mr. DU PONT. I can assure the Senator that it covers no more.

Mr. OVERMAN. And there will be no extra allowance or bounty and that these are Civil War veterans I will withdraw my objection.

The VICE PRESIDENT. The amendment will be agreed to without objection.

EXECUTIVE SESSION.

Mr. CHAMBERLAIN. As many Senators desire an executive session, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After seven minutes spent in executive session the doors were reopened.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House agrees to the amendments of the Senate to the concurrent resolution (H. Con. Res. 49) authorizing and directing the Clerk, in the enrollment of the bill H. R. 10484, entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1917, and for other purposes," to make certain corrections.

The message also announced that the House further insists upon its amendments to the bill S. 5425, to standardize lime barrels, disagreed to by the Senate, agrees to the further conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. ASHBROOK, Mr. ABERCROMBIE, and Mr. REAVIS managers at the further conference on the part of the House.

The message further announced that the House insists upon its amendments to the bill (S. 3331) to amend an act entitled "An act to regulate the construction of dams across navigable waters," approved June 21, 1906, as amended by the act approved June 23, 1910, and to provide for the improvement and development of waterways for the uses of interstate and foreign commerce, disagreed to by the Senate, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. ADAMSON, Mr. SIMS, and Mr. ESCH managers at the conference on the part of the House.

The message also announced that the House disagrees to the amendments of the Senate to the bill (H. R. 11240) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. KEATING, Mr. VINSON, and Mr. SELLS managers at the conference on the part of the House.

The message further announced that the House disagrees to the amendments of the Senate to the bill (H. R. 12194) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. KEATING, Mr. VINSON, and Mr. SELLS managers at the conference on the part of the House.

The message further announced that the House disagrees to the amendments of the Senate to the bill (H. R. 13620) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. KEATING, Mr. VINSON, and Mr. SELLS managers at the conference on the part of the House.

The message also announced that the House disagrees to the amendments of the Senate to the bill (H. R. 14576) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. KEATING, Mr. VINSON, and Mr. SELLS managers at the conference on the part of the House.

PETITIONS AND MEMORIALS.

Mr. GALLINGER presented petitions of Cascade Local No. 138, International Brotherhood Paper Makers, of Berlin, N. H.; of Local Branch, International Brotherhood of Bookbinders, of Indianapolis, Ind.; and of Local Branch, International Brotherhood of Painters, Decorators, and Paperhangers of America, of La Fayette, Ind., praying for the enactment of legislation to further restrict immigration, which were ordered to lie on the table.

He also presented a petition of Josephine Walter, of New York City, N. Y., praying for the enactment of legislation to prohibit interstate commerce in the products of child labor, which was ordered to lie on the table.

He also presented petitions of Local Branch, United Mine Workers of America, of Indianapolis, Ind.; of Local Branch, Granite Cutters' International Association of America, of Quincy, Mass.; of the Public Ownership League of Cook County, Ill.; of Local Union, Cigar Makers' International Union of America, of Chicago, Ill.; of Local Union, International Brotherhood of Stationary Firemen, of Omaha, Nebr.; and of the Alabama State Federation of Labor, praying for the enactment of legislation to further restrict immigration, which were ordered to lie on the table.

He also presented telegrams, in the nature of petitions, from sundry citizens of New York City, Niagara Falls, New Brighton, and Port Washington, Long Island, in the State of New York; of Wilmington, Del.; Madison, Wis.; Newport, R. I.; White Sulphur Springs, W. Va.; Baltimore, Md.; Grand Rapids, Mich.; Wilkes-Barre, Pa.; of Roselle, Long Branch, Elizabeth, Summit, Glenridge Depot, and Plainfield, N. J.; and Chicago, Ill., praying for the enactment of legislation to prohibit interstate commerce in the products of child labor, which were ordered to lie on the table.

Mr. JONES presented a telegram, in the nature of a memorial, from the Clearing House Association of North Yakima, Wash., remonstrating against a tax on banks, which was referred to the Committee on Finance.

He also presented a telegram, in the nature of a memorial, from the Commercial Club and Chamber of Commerce of Tacoma, Wash., remonstrating against a tax on copper, which was referred to the Committee on Finance.

He also presented a telegram, in the nature of a memorial, from D. D. Calkins, of Tacoma, Wash., remonstrating against a tax on copper, which was referred to the Committee on Finance.

Mr. PHELAN presented a petition of Local Union No. 220, International Brotherhood of Stationary Firemen, of Los Angeles, Cal., praying for the enactment of legislation to provide an increase in the wages of stationary firemen in Federal buildings, which was referred to the Committee on Appropriations.

He also presented a memorial of sundry citizens of Los Angeles, Cal., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

Mr. WADSWORTH presented a petition of sundry citizens of Onondaga County, N. Y., praying for the enactment of legislation to found the Government on Christianity, which was referred to the Committee on the Judiciary.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JAMES:

A bill (S. 6688) granting a pension to Henry Ford (with accompanying papers); to the Committee on Pensions.

By Mr. CHAMBERLAIN:

A bill (S. 6689) granting an increase of pension to Jerome Dornsife (with accompanying papers); to the Committee on Pensions.

By Mr. KERN:

A bill (S. 6690) for the relief of Americus A. Gordon; to the Committee on Military Affairs.

By Mr. CHILTON:

A bill (S. 6691) granting an increase of pension to John C. Gore (with accompanying papers); to the Committee on Pensions.

REPORTS OF COMMITTEES.

Mr. MARTINE of New Jersey, from the Committee on Post Offices and Post Roads, to which was referred the bill (H. R. 1528) for the relief of Martin Huhn, reported it with an amendment and submitted a report (No. 693) thereon.

Mr. TOWNSEND, from the Committee on Post Offices and Post Roads, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

H. R. 2180. An act for the relief of Albert Greenlaw (Rept. No. 695);

H. R. 4559. An act for the relief of C. Horatio Scott (Rept. No. 696); and

H. R. 7883. An act for the relief of Charlotte M. Johnston (Rept. No. 694).

Mr. WARREN, from the Committee on Military Affairs, to which was referred the bill (S. 10) to correct the military record of Clayton H. Adams, reported it with amendments and submitted a report (No. 697) thereon.

Mr. DU PONT, from the Committee on Military Affairs, to which was referred the bill (S. 736) to correct the military record of John P. Webber, alias John J. Webber, reported it with amendments and submitted a report (No. 700) thereon.

He also, from the same committee, to which was referred the bill (S. 6154) for the relief of Dr. Charles Lee Baker, reported it without amendment and submitted a report (No. 698) thereon.

He also, from the same committee, to which was referred the bill (S. 6287) for the relief of Joseph Eubor, reported it with an amendment and submitted a report (No. 699) thereon.

Mr. VARDAMAN, from the Committee on Post Offices and Post Roads, to which was referred the bill (H. R. 11150) for the relief of mail contractors, reported it without amendment and submitted a report (No. 701) thereon.

Mr. PHELAN, from the Committee on Public Lands, to which was referred the bill (S. 6204) to amend the act entitled "An act to amend sections 2275 and 2276 of the Revised Statutes of the United States providing for the selection of lands for educational purposes in lieu of those appropriated," and to authorize an exchange of lands between the United States and the several States, reported it without amendment and submitted a report (No. 702) thereon.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. POMERENE submitted an amendment providing that in computing the length of service of dental surgeons in the Army for promotion, and for other purposes, all such dental surgeons as are eligible who have had service as contract or acting dental surgeons prior to June 3, 1916, shall be given credit under this act for the length of their services as such contract or acting dental surgeons, intended to be proposed by him to the Army appropriation bill (H. R. 16460), which was ordered to lie on the table and be printed.

Mr. FLETCHER submitted an amendment proposing to appropriate $50,000 for repairs to boats, wharves, roads, and replacement at Forts Barrancas, McRee, and Pickens, Fla., and Fort Morgan, Ala., damaged by the hurricane of July 5, 1916, intended to be proposed by him to the Army appropriation bill (H. R. 16460), which was ordered to lie on the table and be printed.

THE REVENUE.

Mr. WORKS submitted an amendment intended to be proposed by him to the bill (H. R. 16763) to increase the revenue, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

Mr. CHAMBERLAIN submitted an amendment intended to be proposed by him to the bill (H. R. 16763) to increase the revenue, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

GOVERNMENT FOR PORTO RICO.

Mr. BROUSSARD submitted four amendments intended to be proposed by him to the bill (H. R. 9533) to provide a civil government for Porto Rico, and for other purposes, which were ordered to lie on the table and to be printed.

INSPECTION OF VESSELS.

Mr. FLETCHER submitted two amendments intended to be proposed by him to the bill (H. R. 13831) to amend section 4464 of the Revised Statutes of the United States, relating to number of passengers to be stated in certificates of inspection of passenger vessels, and section 4465 of the Revised Statutes of the United States, prescribing penalty for carrying excessive number of passengers on passenger vessels, and section 4466 of the Revised Statutes of the United States, relating to special permits for excursions on passenger steamers, which were referred to the Committee on Commerce and ordered to be printed.

PAY FOR COMPOSITORS.

Mr. REED submitted an amendment intended to be proposed by him to the bill (S. 6626) to fix the rate of pay for compositors and bookbinders in the Government Printing Office, which was ordered to lie on the table and to be printed.

WITHDRAWAL OF PAPERS—LAURA L. NOYES.

On motion of Mr. BRANDEGEE, it was

Ordered, That the papers in the case of the bill (S. 6183) granting a pension to Laura L. Noyes (62d Cong., 2d sess.) be withdrawn from the files of the Senate, no adverse report having been made thereon.

PENSIONS AND INCREASE OF PENSIONS.

The VICE PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 11240) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. JOHNSON of Maine. I move that the Senate insist upon its amendments and agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Vice President appointed Mr. BRYAN, Mr. HUGHES, and Mr. POINDEXTER conferees on the part of the Senate.

The VICE PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 12194) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War and to widows of such soldiers and sailors, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. JOHNSON of Maine. I move that the Senate insist upon its amendments and agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Vice President appointed Mr. BRYAN, Mr. HUGHES, and Mr. POINDEXTER conferees on the part of the Senate.

The VICE PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 14576) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War and to widows of such soldiers and sailors, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. JOHNSON of Maine. I move that the Senate insist upon its amendments and agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Vice President appointed Mr. BRYAN, Mr. HUGHES, and Mr. POINDEXTER conferees on the part of the Senate.

The VICE PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 13620) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War and to widows of such soldiers and sailors, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. JOHNSON of Maine. I move that the Senate insist upon its amendments and agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Vice President appointed Mr. BRYAN, Mr. HUGHES, and Mr. POINDEXTER conferees on the part of the Senate.

PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that the President had, on July 20, 1916, approved and signed the following joint resolution:

S. J. Res. 60. Joint resolution creating a joint subcommittee from the membership of the Senate Committee on Interstate Commerce and the House Committee on Interstate and Foreign Commerce to investigate the conditions relating to interstate and foreign commerce, and the necessity of further legislation relating thereto, and defining the powers and duties of such subcommittee.

AMENDMENT OF FEDERAL RESERVE ACT.

Mr. OWEN. Mr. President, I wish to give notice that immediately after the conclusion of the morning business to-morrow I shall ask the Senate to dispose of the amendments to the Federal reserve act.

AMENDMENT OF THE RULES.

Mr. LA FOLLETTE. Mr. President, I ask unanimous consent to give a notice, which I send to the desk.

The VICE PRESIDENT. Does the Senator from Wisconsin desire the notice read?

Mr. LA FOLLETTE. I do not ask to have it read; I desire to have it printed, and I can state in just a moment, if it is important that the Senate shall be advised of it, the purpose of the proposed amendment.

Mr. CHAMBERLAIN. Let it be printed.

The VICE PRESIDENT. That is as it pleases the Senator from Wisconsin.

Mr. OVERMAN. Let us have it read, Mr. President.

Mr. LA FOLLETTE. I can state it in one minute, I think.

Mr. OVERMAN. That is all right.

Mr. LA FOLLETTE. When the Army reorganization bill passed the Senate it changed the law with respect to enlistments not only in the Regular Army but in the National Guard. The law theretofore, as affecting the age limit, had provided that no person under 21 years of age should be enlisted in the Regular Army or in the National Guard without the consent of the parent or guardian of such person. The law was changed by the military reorganization bill so that now boys a little over 18 years of age may be enlisted without and against the consent of their parents in the Regular Army or in the National Guard. I propose to reenact two sections in the Army reorganization bill to make them conform to the law as it was previously. That is the only respect, however, in which they are changed. It would require too much time to read the whole notice, and I thought I could merely make this brief statement and the Senate would understand the purpose of the amendment.

Mr. DU PONT. Mr. President, I should like to ask the Senator from Wisconsin if he does not know that the changes to which he refers are in strict conformity with the existing law in respect to enlistments in the Navy? That was all that was done in the Army reorganization bill. It made enlistments in the service, so far as age is concerned, in the Army exactly the same as the conditions which obtain in the Navy.

Mr. LA FOLLETTE. Yes. I am aware of that, Mr. President, and it was a matter of oversight with me that I did not offer such a notice and secure the opportunity at least on the naval appropriation bill to change the age limit with respect to the Navy as I think it ought to be changed with regard to the Army.

The notice given by Mr. LA FOLLETTE is as follows:

On Saturday, July 22, or as soon thereafter as possible, I shall move to suspend that provision of paragraph 3 of Senate Rule XVI prohibiting any amendment proposing general legislation to any general appropriation bill for the purpose of offering the following amendment to the bill (H. R. 16460) making appropriations for the Army for the fiscal year ending June 30, 1917, and for other purposes, by adding at the end of the bill after line 3, page 154, the following:

"SEC. —. That section 27 of the act entitled 'An act for making further and more effectual provision for the national defense, and for other purposes,' approved June 2, 1916, be amended so as to read:

"'SEC. 27. Enlistments in the Regular Army: On and after the 1st day of November, 1916, all enlistments in the Regular Army shall be for a term of seven years, the first three years to be in the active service with the organizations of which those enlisted form a part and, except as otherwise provided herein, the last four years in the Regular Army Reserve hereinafter provided for: *Provided*, That at the expiration of three years' continuous service with such organizations, either under a first or any subsequent enlistment, any soldier may be reenlisted for another period of seven years, as above provided for, in which event he shall receive his final discharge from his prior enlistment: *Provided further*, That after the expiration of one year's honorable service any enlisted man serving within the continental limits of the United States whose company, troop, battery, or detachment commander shall report him as proficient and sufficiently trained may, in the discretion of the Secretary of War, be furloughed to the Regular Army Reserve under such regulations as the Secretary of War may prescribe, but no man furloughed to the reserve shall be eligible to reenlist in the service until the expiration of his term of seven years: *Provided further*, That in all enlistments hereafter accomplished under the provisions of this act three years shall be counted as an enlistment period in computing continuous-service pay: *Provided further*, That any noncommissioned officer discharged with an excellent character shall be permitted, at the expiration of three years in the active service, to reenlist in the organization from which discharged with the rank and grade held by him at the time of his discharge if he reenlists within 20 days after the date of such discharge: *Provided further*, That no person under the age of 21 years shall be enlisted or mustered into the military service of the United States without the written consent of his parents or guardians: *Provided, however*, That such minor has such parents or guardians entitled to his custody and control, and this proviso shall be applicable to all minors enlisted or mustered into the military service of the United States on and after June 3, 1916: *And provided further*, That the President is authorized in his discretion to utilize the services of postmasters of the second, third, and fourth classes in procuring the enlistment of recruits for the Army, and for each recruit accepted for enlistment in the Army the postmaster procuring his enlistment shall receive the sum of $5.

"'In addition to military training, soldiers while in the active service shall hereafter be given the opportunity to study and receive instruction upon educational lines of such character as to increase their military efficiency and enable them to return to civil life better equipped for industrial, commercial, and general business occupations. Civilian teachers may be employed to aid the Army officers in giving such instruction, and part of this instruction may consist of vocational education, either in agriculture or the mechanic arts. The Secretary of War, with the approval of the President, shall prescribe rules and regulations for conducting the instruction herein provided for, and the Secretary of War shall have the power at all times to suspend, increase, or decrease the amount of such instruction offered as may in his judgment be consistent with the requirements of military instruction and service of the soldiers.'

"SEC. 2. That section 58 of an act entitled 'An act for making further and more effectual provision for the national defense, and for other purposes,' approved June 3, 1916, be, and the same is, amended to read as follows:

"'SEC. 58. Composition of the National Guard: The National Guard shall consist of the regularly enlisted militia between the ages of 18 and 45 years, organized, armed, and equipped as hereinafter provided, and of commissioned officers between the ages of 21 and 64 years: *Provided*, That no person under the age of 21 years shall be enlisted or mustered into the military service of the United States without the written consent of his parents or guardians: *Provided*, That such minor has such parents or guardians entitled to his custody and control; and this provision shall be applicable to all minors mustered into the military service of the United States on and after June 3, 1916.'"

ROBERT M. LA FOLLETTE.

Mr. STONE. I move that the Senate adjourn.

The motion was agreed to; and (at 6 o'clock and 12 minutes p. m.) the Senate adjourned until to-morrow, Saturday, July 22, 1916, at 10 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate July 21 (legislative day of July 19), 1916.

AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY.

Abram I. Elkus, of New York, to be ambassador extraordinary and plenipotentiary of the United States of America to Turkey, vice Henry Morgenthau, resigned.

WISCONSIN.

Henry Fleishbein, Glidden.

HOUSE OF REPRESENTATIVES.

FRIDAY, *July 21, 1916.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou Eternal Spirit, God our heavenly Father, who hast made us a little less than divine, look down, we beseech Thee, upon us from the heights of purity, truth, justice, mercy, love, and good will and awaken those attributes in our souls that we may indeed become God like in thought and deed, and thus fulfill the longings, hopes, and aspirations of our better nature. And Thine be the glory forever. Amen.

The Journal of the proceedings of Tuesday, July 18, 1916, was read and approved.

Mr. WEBB, Mr. STEPHENS of Mississippi, Mr. ADAMSON, Mr. MADDEN, Mr. GARDNER, Mr. CLARK of Florida, and Mr. VINSON rose.

The SPEAKER. The Chair recognizes the gentleman from North Carolina [Mr. WEBB].

H. SNOWDEN MARSHALL.

Mr. WEBB. Mr. Speaker, I ask unanimous consent to insert in the RECORD the able and exhaustive opinion of Judge Leonard H. Hand, of the United States district court for the southern district of New York, in the habeas corpus case of H. Snowden Marshall, in which Judge Hand remands Mr. Marshall to the custody of the Sergeant at Arms and directs him to be brought before the House.

The SPEAKER. The gentleman from North Carolina [Mr. WEBB] asks unanimous consent to print in the CONGRESSIONAL RECORD the opinion of Judge Hand, of the district court for the southern district of New York, remanding H. Snowden Marshall to the Sergeant at Arms. Is there objection? [After a pause.] The Chair hears none.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10484) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1917, and for other purposes.

The message also announced that the Senate had disagreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 5425) to standarize lime barrels asked a further conference with the House on the disagreeing votes of the two Houses on the said amendments, and had appointed Mr. CLAPP, Mr. SHIELDS, and Mr. BANKHEAD as the conferees on the part of the Senate.

The message also announced that the Senate had passed bills and joint resolution of the following titles, in which the concurrence of the House of Representatives was requested:

S. J. Res. 152. Joint resolution providing that the Congress of the United States shall participate in the celebration of the "golden wedding" of the first transcontinental lines of railway in the United States;

S. 4654. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War and to certain widows and dependent relatives of such soldiers and sailors;

S. 2530. An act for the relief of the Buffalo River Zinc Mining Co.;

S. 4287. An act to grant unsurveyed islands to the State of Minnesota for forestry purposes;

S. 793. An act modifying and amending the act providing for the disposal of the surplus unallotted lands within the Blackfeet Indian Reservation;

S. 1807. An act to reinstate Elwin Carlton Taylor as a passed assistant surgeon in the United States Navy;

S. 4761. An act providing for the classification, appraised, and disposal of certain lands within the former Fort Peck Indian Reservation, Mont.;

S. 5914. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors;

S. 3776. An act providing for the establishment of a radio station at Unga Island, Alaska;

S. 790. An act to repeal an act entitled "An act to amend section 3 of the act of Congress of May 1, 1888, and extend the provisions of section 2301 of the Revised Statutes of the United States to certain lands in the State of Montana embraced within the provisions of said act, and for other purposes";

S. 782. An act granting additional rights to settlers on reclamation projects;

S. 5976. An act to amend an act approved May 29, 1908, entitled "An act to amend an act to authorize the Baltimore & Washington Transit Co., of Maryland, to enter the District of Columbia," approved June 8, 1896;

S. 5525. An act to provide for the abandonment of Piney Branch Road between Allison Street and Buchanan Street NW., in the District of Columbia;

S. 5539. An act to consolidate national forest lands;

S. 2701. An act for the relief of William Walters;

S. 2222. An act for the relief of the heirs of Antoine Bayard;

S. 778. An act to amend an act entitled "An act to establish the Glacier National Park in the Rocky Mountains south of the international boundary line in the State of Montana, and for other purposes," approved May 11, 1910;

S. 453. An act to place Lieut. Col. Junius L. Powell on the retired list of the Army with the rank of brigadier general;

S. 2880. An act for the relief of Martin V. Parmer;

S. 4473. An act for the relief of Charles G. Griffa;

S. 3973. An act for the relief of Clyde R. Altman;
S. 1553. An act for the relief of Peter Kenney;
S. 3268. An act for the relief of John Duggan;
S. 6625. An act authorizing the Secretary of War to make certain donations of condemned cannon and cannon balls;
S. 4250. An act for the relief of the Ottawa Indian Tribe of Blanchard Fork and Roche de Bouef;

The message also announced that the Senate had passed with amendment the following concurrent resolution (No. 49), in which the concurrence of the House of Representatives was requested:

Resolved by the House of Representatives (the Senate concurring). That in the enrollment of the bill (H. R. 10484) entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1917, and for other purposes," the Clerk be, and he is hereby, authorized and directed to strike out the word "chairs," on page 26, line 19, of said bill, and to insert in lieu thereof the word "chains"; and, further, to strike out in amendment No. 54 the word "circuit" wherever it precedes "court of appeals" in said amendment.

The message also announced that the Senate had passed with amendments bills of the following titles, in which the concurrence of the House of Representatives was requested:

H. R. 11240. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War and to widows of such soldiers and sailors;
H. R. 12194. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War and to widows of such soldiers and sailors;
H. R. 13620. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War and to widows of such soldiers and sailors;
H. R. 15048. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; and
H. R. 14576. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War and to widows of such soldiers and sailors.

The message also announced that the Senate had disagreed to the amendments of the House of Representatives to the bill (S. 381) to declare the purpose of the people of the United States as to the future political status of the people of the Philippine Islands, and to provide a more autonomous government for those islands, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. HITCHCOCK, Mr. SHAFROTH, and Mr. LIPPITT as the conferees on the part of the Senate.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 8787. An act for the relief of the heirs of Hundley V. Fowler, deceased; and
H. R. 4866. An act for the relief of Julia R. Goodloe.

The message also announced that the President had, on July 17, 1916, approved and signed bill of the following title:

S. 2086. An act to provide capital for agricultural development, to create standard forms of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to create Government depositaries and financial agents for the United States, and for other purposes.

SENATE BILLS AND JOINT RESOLUTION REFERRED.

Under clause 2 of Rule XXIV, Senate bills and joint resolution of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. J. Res. 152. Joint resolution providing that the Congress of the United States shall participate in the celebration of the "golden wedding" of the first transcontinental lines of railway in the United States; to the Committee on Industrial Arts and Expositions.

S. 4654. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors; to the Committee on Pensions.

S. 2530. An act for the relief of the Buffalo River Zinc Mining Co.; to the Committee on Claims.

S. 4287. An act to grant unsurveyed islands to the State of Minnesota for forestry purposes; to the Committee on the Public Lands.

S. 793. An act modifying and amending the act providing for the disposal of the surplus unallotted lands within the Blackfeet Indian Reservation; to the Committee on Indian Affairs.

S. 778. To authorize an exchange of lands with owners of private holdings within the Glacier National Park; to the Committee on the Public Lands.

S. 1807. An act to reinstate Elwin Carlton Taylor as a passed assistant surgeon in the United States Navy; to the Committee on Naval Affairs.

S. 4761. An act providing for the classification, appraisal, and disposal of certain lands within the former Fort Peck Indian Reservation, Mont.; to the Committee on the Public Lands.

S. 5914. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War and to widows of such soldiers and sailors; to the Committee on Pensions.

S. 790. An act to repeal an act entitled "An act to amend section 3 of the act of Congress of May 1, 1888, and extend the provisions of section 2301 of the Revised Statutes of the United States to certain lands in the State of Montana embraced within the provisions of said act, and for other purposes"; and

S. 782. An act granting additional rights to settlers on reclamation projects; to the Committee on the Public Lands.

S. 5976. An act to amend an act approved May 29, 1908, entitled "An act to amend an act to authorize the Baltimore & Washington Transit Co. of Maryland to enter the District of Columbia, approved June 8, 1896"; to the Committee on the District of Columbia.

S. 5539. An act to consolidate national forest lands; to the Committee on the Public Lands.

S. 2701. An act for the relief of William Walters; to the Committee on Military Affairs.

S. 2222. An act for the relief of the heirs of Antoine Bayard; to the Committee on the Public Lands.

S. 453. An act to place Lieut. Col. Junius L. Powell on the retired list of the Army with the rank of brigadier general;
S. 2880. An act for the relief of Martin V. Parmer;
S. 4473. An act for the relief of Charles G. Griffa;
S. 3973. An act for the relief of Clyde R. Altman;
S. 1553. An act for the relief of Peter Kenney;
S. 3268. An act for the relief of John Duggan; and
S. 6625. An act authorizing the Secretary of War to make certain donations of condemned cannon and cannon balls; to the Committee on Military Affairs.

S. 4250. An act for the relief of the Ottawa Indian Tribe of Blanchard Fork and Roche de Boeuf; to the Committee on Claims.

ENROLLED BILL AND JOINT RESOLUTIONS SIGNED.

The SPEAKER announced his signature to an enrolled bill and joint resolutions of the following titles:

S. 35. An act to authorize the Secretary of the Interior to issue patents for certain lands to the town of Myton, Utah;
S. J. Res. 60. Joint resolution creating a joint subcommittee from the membership of the Senate Committee on Interstate Commerce and the House Committee on Interstate and Foreign Commerce to investigate the conditions relating to interstate and foreign commerce, and the necessity of further legislation relating thereto, and defining the powers and duties of such subcommittee; and
S. J. Res. 150. Joint resolution to authorize the Secretary of the Treasury to accept from the city of Pittsburg certain lands in exchange for other lands of equal area.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

A message, in writing, from the President of the United States was communicated to the House of Representatives by Mr. Latta, one of his secretaries.

CONTESTED-ELECTION CASE—AARON P. PRIOLEAU AGAINST RICHARD S. WHALEY.

Mr. STEPHENS of Mississippi. Mr. Speaker, I desire to submit a privileged report from the Committee on Elections No. 1.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 313 (H. Rept. 1034).

Resolved, That Aaron P. Prioleau was not elected a Member of the Sixty-fourth Congress from the first congressional district of South Carolina and is not entitled to a seat therein.

Resolved, That Richard S. Whaley was elected a Member of the Sixty-fourth Congress from the first congressional district of South Carolina and is entitled to a seat therein.

Mr. STEPHENS of Mississippi. Mr. Speaker, as this is the unanimous report of the committee, I would like to have the matter disposed of this morning.

The SPEAKER. The question is on agreeing to the resolution.
The resolution was agreed to.

CONTESTED-ELECTION CASE—J. M'CAN DAVIS AGAINST WM. ELZA WILLIAMS.

Mr. STEPHENS of Mississippi. Mr. Speaker, I would like to present another privileged resolution from the Committee on Elections No. 1.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 314.

Resolved, That WM. ELZA WILLIAMS was elected a Member of the Sixty-fourth Congress from the State of Illinois at large, and is entitled to a seat therein.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

Mr. STEPHENS of Mississippi. Mr. Speaker, I would like to have that report printed in the RECORD in the last case.

The SPEAKER. Without objection, the report will be printed.

There was no objection.

The following is the report referred to:

[H. Rept. No. 1003, 64th Cong., 1st sess.]

CONTESTED-ELECTION CASE OF DAVIS AGAINST WILLIAMS.

Mr. STEPHENS of Mississippi, from the Committee on Elections No. 1, submitted the following report, to accompany House resolution 314:

The Committee on Elections No. 1, to whom was referred the contested-election case of J. McCan Davis, contestant, *v.* Wm. Elza Williams, contestee, from the State of Illinois at large, beg to report as follows:

At the general election held the 3d day of November, 1914, in the State of Illinois, J. McCan Davis, contestant, received 373,682 votes and Wm. Elza Williams, contestee, received 375,465 votes. On the face of the returns, the contestee received 1,783 more votes than did contestant, and a certificate of election was issued to him. Mr. Williams took the oath of office at the bar of the House and is now serving as a Member of the House.

Contestant's notice of contest was received by contestee on January 4, 1915, and his answer was received by the contestant on January 27, 1915.

On February 4, 1915, the contestant applied to Thomas F. Scully, judge of the county court of Cook County, for subpœnas for witnesses to appear before him on February 9. Notice was given contestee that depositions would be taken on that day. The parties appeared before Judge Scully, who refused to act as commissioner to take depositions.

On February 11 the contestant had the attorney of contestee served with notice to take depositions on February 16 before one Donahue, a notary public. By agreement the taking of depositions was deferred until February 18.

At that time the election commissioners, who had been subpœnaed as witnesses, refused to produce the ballots for inspection, stating that they doubted their authority to produce them without an order of court.

On February 25 the contestant filed a petition in the district court of the United States, of which K. M. Landis was judge, against the election commissioners of Cook County, asking that an order be entered directing them to produce the ballots, etc., before the Notary Public Donahue. This petition was not resisted, and an order directing the commissioners to produce the ballots was entered on the day the petition was filed.

By agreement of the parties the taking of the depositions began February 27, which was continued until March 8, when the 40 days allowed the contestant for taking testimony expired.

The record in the case was filed with the Clerk of the House on December 6. A copy of the printed record was mailed both parties to this contest on January 10, 1916.

On March 10, 1916, the contestant filed with the committee a petition, the prayer of which is as follows:

"Wherefore contestant prays that the House of Representatives authorize and direct a complete recount of ballots and a complete recanvass of precinct returns in the city of Chicago of the election of November 3, 1914, for the office of Representative in Congress at large, said recount and recanvass to be conducted as expeditiously as possible under the direction of Elections Committee No. 1."

The contestant appeared before this committee and argued very vigorously for an extension of time for the purpose of recounting the ballots in the city of Chicago. He stated that it was impossible for him to recount the ballots in Chicago in the 40 days allowed by law. It developed that he took a recount of but 61 out of 1,566 precincts of that city.

In some instances the House has granted extension of time for taking testimony, but only in those cases where there is good reasons to show necessity of further proof.

"A case should not be reopened unless it appears to the House that on a new hearing the contestant would be able to produce evidence which would entitle him to his seat." (Thobe *v.* Carlyle, 50th Cong.)

Contestant does not accompany his petition with affidavits showing what he expects to prove if this extension was granted, or the name of any person that he expects to call as a witness. His petition is not sworn to. Neither is there anything in the original record to show that he has proven anything on which to base his contest.

In fact, the record brings nothing before the committee except notice of contest and answer thereto. The record contains many pages of what purports to be testimony in the case. It is stated that certain witnesses testified, and what purports to be their testimony is set out, but no witness attested his statement, although attestation by the witnesses is required by statute. The witnesses were examined, as the record shows, before two notaries public, but the record is only certified by one notary.

Therefore, there is nothing legally before the committee to show anything in regard to the matter in controversy.

The notice of contest and what was attempted to be proven show that the contestant had no actual knowledge of any evidence that will prove his right to the seat in the House, nor had he knowledge of any witness or witnesses by whom he could make such proof. No effort was made to prove fraud in the election, the basis of the contest being the hope tnat a recount of 400,000 ballots cast in the city of Chicago would show that errors were made in the original count and tabulation of the votes, and that a correction of these errors would seat him.

Under a provision of the Illinois statute all ballots cast in an election shall be preserved for six months. After that time they are to be destroyed unless an order is obtained to have them preserved for use in a contest. The parties to this contest were candidates at an election held November 3, 1914, and on May 3, 1915, the contestant applied to the court for an order requiring the preservation of the ballots in the city of Chicago. This was a proceeding against the election commissioners. On May 11, 1915, the following order was entered by the court:

"On motion of attorney for plaintiff it is ordered that the ballots now in the custody of the election commissioners of the city of Chicago, cast at the election on November 3, A. D. 1914, be impounded, to be used as evidence in a contest now pending between J. McCann Davis and Wm. Elza Williams for the office of Representative at large for the State of Illinois.

"It is further ordered that the election commissioners for the city of Chicago be the custodians of the same, and they are ordered to keep the same in a safe place and guard the same in order to preserve the inviolability of the same until the further order of this court."

It will be observed that the order of the court shows that only the ballots of the city of Chicago were to be preserved. It was stated to the committee at a hearing that there were about 1,100,000 votes cast in Illinois, of which number about 400,000 votes were cast in Chicago, and that all ballots except those in Chicago were destroyed. Therefore there are about 700,000 ballots that can not be recounted. The committee does not think that it would be justified in recommending a recount of part of the ballots at the instance of one party when it would be absolutely impossible for a recount of the remainder of the ballots to be had by the other party. Especially is this true in this case, where there is no charge or proof of fraud, and the committee is asked simply to set out on a "fishing expedition," the only reason for which being the mere hope that errors in the count may be found.

As has been stated, the statements that purport to be the testimony of certain witnesses are unattested, and the record is not certified properly; but brief reference will be made to the recount of ballots. The ballots in 61 precincts were recounted. Contestant gained in 25 precincts and contestee gained in 21. In several precincts the count was found to be correct. In several precincts each would gain and in others each would lose. Generally the gain or loss was very small. It does not appear that any fraud was committed, but that any mistakes were the result of error in the count. In this state of case it would be unfair to have one-third of the ballots recounted and let that count determine the result of this contest.

Contestant used only 8 of the 40 days allowed by law in taking testimony and recounting ballots. He did not file the record with the Clerk of the House until eight months after time for taking testimony had closed; and his petition for a recount of ballots was not filed for more than three months after Congress had convened.

Such a lack of diligence was shown on the part of contestant that the committee did not feel that an extension of time for the purpose of taking proof should be granted.

Contestant stated to the committee that he did not ask to be seated on the record that he had presented.

Since the committee had considered the case and had reached the conclusions set out above the contestant, J. McCan Davis, has died.

Your committee, therefore, respectfully recommends the adoption of the following resolution:

"*Resolved*, That Wm. Elza Williams was elected a Member of the Sixty-fourth Congress from the State of Illinois at large, and is entitled to a seat therein."

Respectfully submitted.

H. D. STEPHENS, *Chairman*.
RILEY WILSON.

M. E. BURKE.
CYRUS CLINE.
JOSEPH B. THOMPSON.
MERRILL MOORES.
FREDERICK W. DALLINGER.
OSCAR WM. SWIFT.

CONFEREES ON PHILIPPINE BILL.

The SPEAKER. The Chair will state to the House that it turns out that there is a vacancy on the conferees on the Philippine bill (S. 381), the gentleman from Tennessee [Mr. GARRETT] being down in Tennessee, and the next two gentlemen on the committee are not here. The Chair therefore appoints Mr. RUSSELL of Missouri in lieu of Mr. GARRETT.

GENERAL DAM BILL.

Mr. ADAMSON. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. ADAMSON. Mr. Speaker, I would like the Speaker to lay before the House the bill S. 3331, with the disagreements of the Senate to the House amendments.

The SPEAKER. The Clerk will report the title of the bill.

The Clerk read as follows:

A bill S. 3331, an act to amend an act entitled "An act to regulate the control of dams acress navigable waters," approved June 21 1906, as amended by the act approved June 23, 1910, and to provide for the improvement and development of waterways for the use of interstate commerce and foreign commerce.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent that the House insist on its amendments and agree to the conference asked.

The SPEAKER. The gentleman from Georgia asks unanimous consent that the House insist on its amendments and agree to the conference asked. Is there objection? [After a pause.] The Chair hears none.

The SPEAKER announced the following conferees: Mr. ADAMSON, Mr. SIMS, and Mr. ESCH.

INTERSTATE AND FOREIGN COMMERCE.

The SPEAKER, in pursuance of Senate joint resolution No. 60, to investigate interstate and foreign commerce, appointed as a committee on the part of the House Mr. ADAMSON, Mr. SIMS, Mr. CULLOP, Mr. ESCH, and Mr. HAMILTON of Michigan.

EXTENSION OF REMARKS.

Mr. MADDEN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the Mexican situation.

The SPEAKER. The gentleman from Illinois [Mr. MADDEN] asks unanimous consent to extend his remarks in the RECORD on the Mexican situation. Is there objection? [After a pause.] The Chair hears none.

Mr. VINSON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing an official report of the case of the United States against Thomas E. Watson, who was indicted for violation of section 211 of the penal code, in the district court of the United States for the northern district of Georgia.

The SPEAKER. The gentleman from Georgia asks unanimous consent to incorporate in the RECORD as a part of his remarks the proceedings in the case of the United States against Thomas E. Watson. Is there objection?

Mr. IGOE. I object, Mr. Speaker.

Mr. HARRISON. Mr. Speaker, I desire to ask unanimous consent to extend my remarks in the RECORD in order to insert an interview given by Franklin K. Lane, the Secretary of the Interior, on the President's policy in the Mexican matter.

The SPEAKER. The gentleman from Mississippi asks unanimous consent to extend his remarks in the RECORD by printing an interview by the Secretary of the Interior, the Hon. Franklin K. Lane, on the Mexican situation. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I do not know just how far we ought to go. Nearly every time we meet the President or some Cabinet officer has made a political speech, which we insert in the RECORD without objection. I wonder whether it is going to become the custom to have them engaged in interviews all the time and insert all the interviews in the RECORD. None of them seem to be very busy except doing politics. It makes the RECORD quite extensive.

Mr. HARRISON. Mr. Speaker, this is a historical report on the whole Mexican controversy, and I am sure it will be very edifying to the gentleman as well as my friend from Illinois [Mr. MADDEN], who desires to speak on the subject.

Mr. MANN. I doubt very much whether it would be edifying, if the gentleman means, by that, instructive.

Mr. HARRISON. It might be both instructive and edifying.

Mr. MANN. Who got it up?

Mr. HARRISON. Franklin K. Lane, Secretary of the Interior.

Mr. MANN Oh, he only gave it out. [Laughter.]

Mr. HARRISON. He got it up, and he gave it out.

Mr. MANN. Would the gentleman object if I should ask unanimous consent to print in the RECORD Mrs. O'Shaughnessy's book, Mrs. O'Shaughnessy being the wife of the American representative in Mexico most of the time during the Wilson administration?

Mr. HARRISON. Well, Mrs. O'Shaughnessy is not a member of the Cabinet.

Mr. MANN. Oh, no. I suppose the gentleman thinks we ought not to insert anything in the RECORD unless it comes from Democratic sources.

Mr. HARRISON. This is from a good Democratic source.

Mr. MANN. Yes; he is a good Democrat; a good man.

The SPEAKER. Is there objection?

There was no objection.

QUESTION OF PERSONAL PRIVILEGE.

Mr. GARDNER. Mr. Speaker, I rise to a question of personal privilege, which I rose to on the 21st of June and postponed at the request of the minority leader and the gentleman from Texas [Mr. GARNER].

It refers to an insertion by the gentleman from Texas [Mr. CALLAWAY] in the CONGRESSIONAL RECORD of June 1. The gentleman from Texas [Mr. CALLAWAY] inserted in the RECORD certain reflections on my integrity as a Congressman.

I am asking to have his words investigated by a committee of this House. The gentleman from Wisconsin [Mr. LENROOT] drew a resolution, but he is away, and my colleague the gentleman from Massachusetts [Mr. ROGERS] will offer it in his place.

If what the gentleman from Texas [Mr. CALLAWAY] printed is true, in spite of the fact that it was inserted in the RECORD and not spoken on the floor of the House, it can stay in the RECORD if any committee of this House thinks it is true.

Mr. GARNER. Mr. Speaker, will the gentleman yield?

Mr. GARDNER. Yes.

Mr. GARNER. I think, in the interest of the correctness of the RECORD, it ought to be stated that I investigated it, so far as I could, and I think the gentleman from Massachusetts is probably in error about the language referred to not having been spoken on the floor of the House. I think if the gentleman would make a personal investigation he will find that the words complained of were spoken on the floor of the House.

That does not make any difference, however. If they were not true, and they were spoken to the detriment of the gentleman from Massachusetts, I see no reason why he should not have the matter investigated. I just wanted that to go into the RECORD.

Mr. GARDNER. The official reporters of debates tell me that those words were not spoken on the floor of the House. I have asked several Members of the House who heard the statement made, and they also tell me that they did not hear them. I heard the gentleman make a part of those remarks, and I did not hear him mention my name.

But be that as it may, whether or not the House thinks it true, whether it is in order or not in order, I do not care whether they stay in the RECORD or not; but if those words are untrue, they should be stricken from the RECORD, and I am ready to have a Democratic committee to decide whether they are true or untrue in any form of investigation they are willing to make. I am ready to submit my whole case, and all I want is that those things shall be looked into and put in with this talk that is going about—we had a lot of it in the Senate yesterday—implying dishonesty on the part of those of us who believe that this country should arm itself.

ADJOURNMENT UNTIL TUESDAY NEXT.

Mr. KITCHIN. Mr. Speaker, before the gentleman proceeds further, I want to submit a unanimous-consent request. I ask unanimous consent that when the House adjourns to-day it be to meet on Tuesday next.

The SPEAKER. The gentleman from North Carolina [Mr. KITCHIN] asks unanimous consent that when the House adjourns to-day it adjourn to meet on Tuesday next. Is there objection?

There was no objection.

QUESTION OF PERSONAL PRIVILEGE.

Mr. ROGERS. Mr. Speaker, I offer a privileged resolution, which I send to the Clerk's desk and ask to have read.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

House resolution 315.

Whereas in the CONGRESSIONAL RECORD of June 1, 1916, page 10410, the following language appears in a speech made by Hon. OSCAR CALLAWAY, of Texas, to wit:

"The Maxims, Gardners, and Thompsons have attempted to frighten the people into the belief that we were in danger of invasion. This is not the fear that disturbs the peace of mind of the gentlemen on the Naval Affairs Committee who heard the evidence. The fear that disturbs the peace of mind of the gentlemen from Pennsylvania, New York, and Massachusetts is not that our homes will be invaded, our cities bombarded, or our coasts laid waste; it is that the stocks of the Bethlehem, Midvale, Carnegie, Pennsylvania, Maryland, and New Jersey steel, ordnance, and ship manufacturing concerns will shrink when the foreign war closes unless a new market is developed. Bethlehem Steel stock increased, due to the war, from $30 a share to $530 a share. Certain powder stocks increased from $8 a share to $1,100 a share": Be it

Resolved, That a special committee of five be appointed by the Chair to investigate and report to the House whether or not said language ought to be expunged from the RECORD.

Mr. ROGERS. Mr. Speaker, I ask for a vote on the resolution.

Mr. GARNER. Mr. Speaker, if the gentleman will yield——

Mr. ROGERS. Certainly.

Mr. GARNER. I want to make a statement with reference to Mr. CALLAWAY. Mr. CALLAWAY is not present. The gentleman from Massachusetts [Mr. GARDNER] has been good enough to postpone this matter until the 25th of this month, but on account of adjourning over until Tuesday next we would probably have to get another postponement, and I thought the object of the postponement had been attained, inasmuch as Mr. CALLAWAY'S nomination as a candidate for election to the House comes off to-morrow, and whatever proceedings are had here would not be likely to do him any injury, whereas I thought that in the progress of the campaign in Texas an investigation going on here as to words spoken or printed in the RECORD might injure him. For Mr. CALLAWAY, I want to say that I am under obligations to the gentleman from Massachusetts for his courtesy in the premises, and Mr. CALLAWAY has no objection to the passage of this resolution.

The SPEAKER. The question is on the passage of this resolution.

The resolution was agreed to.

The SPEAKER. The Chair announces the following committee under the resolution.

The Clerk read as follows:

Mr. PAGE of North Carolina, Mr. RAKER, Mr. TAYLOR of Colorado, Mr. MONDELL, and Mr. TOWNER.

PUBLIC BUILDINGS.

Mr. CLARK of Florida. Mr. Speaker, I rise to a question of high privilege, and upon that statement I ask that the article printed in the Washington Post of yesterday, which I send to the Clerk's desk, may be read.

The SPEAKER. The Clerk will read the article, to enable the Chair to see if there is any question of privilege in it.

The Clerk read as follows:

ROW OVER BUILDING BILL—TROUBLE LOOMS ON ATTEMPT TO DROP TREASURY ARCHITECT'S OFFICE—DEPARTMENT OFFICIALS CHARACTERIZE HOUSE COMMITTEE'S ACTION AS A GIGANTIC "PORK GRAB."

The provisions in the public-buildings bill reported to the House Monday, abolishing the office of Supervising Architect of the Treasury, gives promise of a big row between the legislative branch and the Treasury Department.

Department officials yesterday characterized the action of the committee as a gigantic "pork grab." It was claimed on behalf of the Supervising Architect's Office that it is sought to be abolished because Members of Congress can not play politics with it.

Opposition to the office began about a year ago, it was said, when the Treasury Department adopted regulations that required the construction of public buildings authorized at a cost commensurate with the postal receipts and population of the town, instead of basing the expenditure upon the amount appropriated by Congress.

"Under this new and businesslike policy," said Assistant Secretary of the Treasury Byron R. Newton yesterday, "in the last year and a half the Supervising Architect's Office has doubled the output of new buildings. In addition to this desirable result, it was possible at the beginning of the fiscal year to turn back into the Treasury $750,000 which had been saved out of extravagant appropriations."

Treasury Department officials said yesterday that appropriations have been made in the pending bill for buildings to cost $100,000 in towns where the entire postal receipts will not pay for their maintenance.

Mr. CLARK of Florida. Mr. Speaker, I shall detain the House only a few moments, but I could not be content to allow a statement like that to go unchallenged.

In the first place, I desire to state that the Treasury Department has not cut down the appropriations for public buildings, for the simple reason that the Treasury Department has no power to cut down appropriations made by Congress. The Committee on Public Buildings and Grounds does not appropriate money. It simply authorizes that buildings may be constructed within a certain limit of cost. It has always been the law, it has always been the rule and the practice in reporting public-building bills to fix a maximum amount in each case. Congress says to the Treasury officials, "Beyond this you shall not go." But the fact is that for years past the Treasury Department has not only exhausted the original authorization, but in a great majority of the cases has appealed to subsequent Congresses for an increase of the limit of cost. As I say, it has always been the law in these public-building bills simply to fix the maximum amount, and it has been the duty of the officials of the Treasury Department to inspect the particular place where the building was proposed to be constructed, and if it was in their power to construct a building at such place for less money, which would answer the purposes intended, it was their sworn duty to do that, and if to-day they are doing it, then they are simply performing their duty in complying with the law as it has always been.

Mr. Speaker, so prone has been the department to expend the limit of cost and ask for more that the committee saw fit in the pending bill to place a statutory enactment declaring it to be the intention of Congress to fix only a maximum, and that it rested in the discretion of the department to build a structure suitable for the purposes, and nothing more.

I want to state, Mr. Speaker, that in the present bill we have fixed in almost every case an amount below the estimate of the Treasury Department. I want to call the attention of the House and the country to a few of those items, which are illustrative of the whole bill.

At Forest City, Ark., the estimate of the Treasury Department for a building only was $55,000, and the committee placed in the bill as a limit of cost $25,000, which was $30,000 less than the Treasury estimate.

At Salem, Mass., the estimate was $180,000, and the committee placed in the bill a limit of cost of $130,000.

At Flint, Mich., the estimate was $138,500, and the committee placed in the bill a limit of cost of $100,000.

At Duluth, Minn., they already have a magnificent building. The only trouble is that it is crowded. They have not space enough for all the Federal activities centered at that city to enable them to perform their work efficiently. So in the last bill a limit of cost was provided for the purchase of a site at Duluth upon which to put a post-office building near the Union Station, for post-office purposes only, leaving the old building to be occupied by the courts and other Federal activities.

The Treasury Department estimated that it would require $1,000,000 to put up a post-office building at Duluth, but the committee decided that $300,000 was ample for that purpose if they would build a workshop building sufficient for the purposes of the Postal Service. The present building is a magnificent one, well suited to take care of the courts, internal revenue, and other Federal activities at Duluth, and $300,000 will construct a building for postal purposes only on a lot already owned by the Government, which will answer for many years to come. It will thus be seen that in this one instance alone we have cut the departmental estimate $700,000.

At Butte, Mont., the estimate of the Treasury Department was $225,000, and the committee put the limit of cost at $150,000.

At Passaic, N. J., the estimate of the Treasury Department was $175,000, and we allowed $125,000.

At Lumberton, N. C., where the receipts were only $12,433.98, the Treasury estimate for a building upon a lot already owned by the Government was $45,000, and the committee allowed $30,000, or $15,000 less than the Treasury estimate.

At Fargo, N. Dak., the estimate of the Treasury Department was $350,000, and the committee fixed the limit of cost at $250,000, or $100,000 less, which we believed to be the proper amount, and which we are satisfied will abundantly answer the purpose.

At Norwalk, Ohio, the estimate of the Treasury Department was $90,000, and the committee allowed $65,000, or $25,000 less.

At Vinita, Okla., the estimate of the Treasury Department was $155,000, and the committee allowed $100,000, or $55,000 less.

At Norfolk, Va., the estimate of the Treasury Department for the purchase of additional land and an addition to the present building was $800,000, and the committee allowed $650,000 as being ample for all purposes, thus reducing their estimate $150,000.

I want to call the attention of this House to the manner in which business is done by these gentlemen in the Supervising Architect's office. They simply guess at these estimates. There is no system about it. It is guesswork, pure and simple, and the record shows it. Take Oelwein, Iowa, for instance, where the receipts were over $16,000 and the population over 6,000 people, the estimate for a building alone was $40,000, while at Harlan, Iowa, where the receipts are about $5,000 less and the population is nearly 4,000 of people less than at Oelwein, the estimate for a building alone is $45,000, or $5,000 more than at Oelwein.

At Elkton, Md., we get an estimate from the department of $55,000 for a building, whereas at Mansfield, La., where the receipts are about $1,000 more per annum than at Elkton, we get an estimate of $35,000 for a building, or a difference of $20,000 in favor of Elkton, the smaller place.

At Great Barrington, Mass., having about twice the postal receipts of Lexington, Nebr., we get an estimate of $45,000, the same as the amount estimated for Lexington, the same estimate for both places, although the postal receipts of one are about twice as large as those of the other.

At Monticello, N. Y., with postal receipts of something over $15,000, and at Dansville, N. Y., with postal receipts of over $46,000, the Treasury Department sends in exactly the same estimate, although the postal receipts in one place are more than three times as large as in the other.

At Louisburg, N. C., the Treasury Department estimates for a building $50,000, although Eaton, Ohio, with receipts more than $3,000 larger per annum than those of Louisburg, gets an estimate of $30,000, or $20,000 less than Louisburg.

Lebanon, Ohio, and Marysville, Ohio, are in the same congressional district. Lebanon has postal receipts about $1,000 per annum more than Marysville, yet Lebanon gets an estimate of $40,000 and Marysville gets an estimate of $55,000, or $15,000 more.

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. CLARK of Florida. Yes.

Mr. MANN. Did the Assistant Secretary of the Treasury, Mr. Newton, call attention to these matters in his wonderful and fanciful interview?

Mr. CLARK of Florida. He did not. I want to say right here, Mr. Speaker, that this is one bill that has come from a committee in this House since I have been a Member of it absolutely free from any departmental dictation. [Applause.] We have asked them for the facts and for estimates, but we have not asked one of them for an opinion, because we believed that we were here to legislate and that their business is simply to carry out the legislative command. [Applause.]

Why, Mr. Speaker, in conversation with a Supervising Architect of the Treasury, not the present acting one, but with one who filled the place in the past, relative to an authorization which had been made for a $20,000 building at Smyrna, Del., and which had hung fire for years, I asked him why he did

not prepare the plans and specifications, and he said to me that he could not draw plans for a $20,000 building. "Why," I said, "you do not mean to say that; you mean you can not draw plans for a monumental structure to cost $20,000." He said, "No; I just mean that I can not draw plans for any $20,000 building." That is the idea that has been inculcated into the thought of that bureau; it has grown up and it has hung there for all these years, and it is there to-day, and yet these little bureaucrats prate about the money they have returned to the Treasury and how they have cut down the appropriations of a wasteful Congress.

Mr. Speaker, there is another thing which demonstrates the beautiful business methods obtaining in the office of the Supervising Architect of the Treasury. A building was recently finished in the State of Washington. I forget the name of the town, but in the specifications of that building it was prescribed that it should be constructed of Indiana limestone and southern pine. That specification in a State that has more timber in it than any other State in the Union! The fact is that they hauled the stone from Indiana, nearly across the continent, and the pine timber they hauled from Florida, the southeast corner of the continent to the northwest corner of the continent, thus giving the railroads a delightful haul. And yet these people talk of extravagance and waste!

Mr. MADDEN. And the transportation charges doubled nearly the cost of the building when it was finished.

Mr. CLARK of Florida. Undoubtedly, and yet these gentlemen continue to talk of the extravagance of Congress. I am getting tired of it. I am getting tired of hearing these little bureaucratic officials, not elected by the people (and could not be), but holding office by the will of some one person, criticizing the representatives of the sovereign people of this country who represent them upon this floor. [Applause.]

I want to say, Mr. Speaker, in conclusion, that it is not the purpose of the committee to attempt to bring the bill to passage during the present session of Congress. We do intend to call it up at the short session and endeavor to pass it, and then we stand ready to defend every item in it. We have put legislation into this bill in the effort to correct these troubles that have grown up in that department. We have put legislation in there which we believe, although it will not remedy everything, is a step in the right direction and will put the public-building operations of the Government upon a sound common-sense basis.

Mr. Speaker, I trust that when these gentlemen undertake to give out information to the public again they will go to the RECORD and get it, and not simply draw upon their wild imaginations. [Applause.]

EXTENSION OF REMARKS.

Mr. PARK. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the present relationship of this country with Mexico, and to print certain extracts from an article by Henry N. Hall, of the New York World, on the same subject.

The SPEAKER. The gentleman from Georgia asks unanimous consent to extend his remarks in the RECORD on the Mexican situation, and to incorporate in his remarks an article by Henry N. Hall, of the New York World. Is there objection?

Mr. MANN. Reserving the right to object, I do not see the majority leader here. He has been objecting to these requests on the ground that it was a very improper use of the RECORD. I think during his absence I will object.

AID FOR LITHUANIANS.

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to take up House resolution 258, reported by the Committee on Foreign Affairs, to designate a day on which the people of this country may express their sympathy by contributing toward the relief of the Lithuanians in the war zone.

The SPEAKER. The gentleman from Virginia asks unanimous consent to take up House resolution 258 to designate a day for taking up collections for the Lithuanians in the war zone. Is there objection?

Mr. MANN. Let us have the resolution reported.

The Clerk read as follows:

House resolution 258 (H. Rept. 1030).

Whereas in the various countries now engaged in war there are four millions of Lithuanians, the great majority of whom are destitute of food, shelter, and clothing; and

Whereas millions of them have been driven from their homes without warning, deprived of an opportunity to make provision for their most elementary wants, causing starvation, disease, and untold suffering; and

Whereas the people of the United States of America have learned with sorrow of this plight of millions of human beings and have most generously responded to the cry for help whenever such an opportunity has reached them: Therefore be it

Resolved, That in view of the misery, wretchedness, and hardships which these four millions of Lithuanians are suffering the President of the United States be respectfully asked to designate a day on which the citizens of this country may give expression to their sympathy by contributing to the funds now being raised for the relief of the Lithuanians in the war zone.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, I would like to inquire whether the Committee on Foreign Affairs proposes also to report a resolution into the House in reference to the American citizens whose property has been destroyed and many of whose families have lost a member, all having been driven out of Mexico—whether we are going to do anything for our own citizens driven out of Mexico while we are doing something for foreign citizens.

Mr. FLOOD. When the time arrives the Committee on Foreign Affairs will report a resolution to take care of American citizens who have been in Mexico and whose rights of property and person have been invaded.

Mr. MANN. American citizens who have been driven out of Mexico and starving to death.

Mr. FLOOD. None of them are starving.

Mr. MANN. Oh, yes; many of them have nothing to live on except charity.

Mr. FLOOD. The Government has provided money to bring them out, all who are in there, and my information is that those who are staying there are getting along comfortably.

Mr. MANN. We have appropriated money to bring them out, brought them up to the border and dumped them down, and there they are. Their property has been lost and they have nothing to live on; while we very properly are donating money for the Lithuanians abroad, we are doing nothing for our own people.

Mr. FLOOD. Our people are being taken care of. If the gentleman desires to introduce a resolution and have it referred to the Committee on Foreign Affairs, I assure him that the committee will promptly consider it.

Mr. CANNON. What does the gentleman mean by saying that they are being taken care of?

Mr. FLOOD. I do not think any of them are suffering.

Mr. CANNON. Oh, in the hearing before the Committee on Appropriations to consider a bill to pay the expenses of bringing American citizens out, it appeared that nothing is added by way of subsistence. They are released, substantially, when they get into American territory, and dumped upon the charity of the communities where they are brought.

Mr. FLOOD. Does the gentleman know of any American citizens brought out of Mexico who are now suffering for something to eat?

Mr. CANNON. Oh, the evidence showed that they came out without property and that all the Government is doing is to get them out. I do not know their names.

Mr. FLOOD No; and they are not suffering. They are taken care of just as indigent people in this country are taken care of, and this resolution does not propose that the Government shall take care of the Lithuanians. It simply proposes to allow charitable Americans who feel so disposed to make contributions to a fund and to relieve their suffering.

Mr. CANNON. I am in no sense opposing the gentleman's resolution. I have no doubt that the gentleman has Lithuanians in his district.

Mr. FLOOD. Not a single one.

Mr. CANNON. Well, there are a great many in my district, and a great many throughout the North. But there are many French people, there are many Irish, there are many Belgians, there are many English, though not so many, and there are many Austrians and Hungarians, and why does not the gentleman bring in a resolution suggesting to the good people of America that wherever there is suffering in the war zone on the other side of the water they have the liberty to, and it is suggested that they do, contribute to relieve that suffering, because evidently from the standpoint of humanity and Christianity and charity there is as much need for the relief of suffering among those people where they are fighting in concord, or where they are fighting each other. I shall not object to the gentleman's resolution, but I suggest there are a hundred million people in this country, and it might be well to appeal to their charity, that all of the suffering in the war zone may be relieved.

Mr. FLOOD. The committee that reported this resolution will be glad to consider any such resolution that the gentleman suggests.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. Yes.

Mr. BRITTEN. Did I understand the gentleman to say in reply to my colleague from Illinois [Mr. MANN] that the Americans still living in Mexico are living there comfortably?

Mr. FLOOD. Yes.

Mr. BRITTEN. What information has the gentleman or his committeee that Americans living in Mexico are living there comfortably to-day?

Mr. FLOOD. I have information that comes from the State Department that there are no Americans who are suffering.

Mr. BRITTEN. Then, why did we appropriate $300,000 to bring them out, if they are living there comfortably?

Mr. FLOOD. Mr. Speaker, we appropriated the money so that in case there was any trouble there which would endanger their lives, they might escape it.

Mr. BRITTEN. The gentleman says that they are living in a comfortable condition in Mexico, and yet we appropriate $300,000 to improve those conditions by taking them away from there.

Mr. FLOOD. And some of them are living in comfortable conditions here in this country.

Mr. BRITTEN. Are we making their condition more comfortable in this country than in Mexico?

Mr. FLOOD. I do not know about that. At the present time those in Mexico may be more comfortable than those here, but at the time the appropriation was made it was necessary to bring them out of Mexico.

Mr. BRITTEN. Why?

Mr. FLOOD. I stated why to the gentleman, and if he desires to object to the resolution, let him object to it; but I am not going to reply to any more silly questions.

Mr. BRITTEN. The silliness all comes from that side of the House.

Mr. FERRIS. Mr. Speaker, I demand the regular order.

The SPEAKER. The regular order is demanded.

Mr. STAFFORD. Mr. Chairman, I would like to inquire of the gentleman about the character of the resolution. The resolution we passed the other day providing for a national tag day for the benefit of the Armenians was a concurrent resolution?

Mr. FLOOD. It was.

Mr. STAFFORD. Why did not the gentleman in this instance adopt the policy that these resolutions calling upon the President to name a tag day should be concurrent rather than a mere House resolution, as this is?

Mr. FLOOD. Mr. Speaker, the gentleman will recall that there was a Senate resolution—not a concurrent resolution—in reference to the Syrians and the Jews and the Poles and a concurrent resolution in reference to the Armenians. The gentleman from Pennsylvania [Mr. CASEY], who introduced this resolution, simply introduced the House resolution; and the President having issued proclamations on Senate resolutions, therefore the committee thought he could just as readily issue his proclamation on a House resolution, and reported the House resolution instead of a concurrent resolution.

Mr. STAFFORD. Does not the gentleman think that in these matters both bodies should approve the calling upon the President to name a day for a tag for such a purpose?

Mr. FLOOD. I think not. A concurrent resolution may give more dignity, though I do not think it makes any difference.

The SPEAKER. Is there objection?

Mr. BUCHANAN of Illinois. Mr. Speaker, reserving the right to object——

Mr. FERRIS. Mr. Speaker, I demand the regular order.

The SPEAKER. The regular order is demanded.

Mr. BUCHANAN of Illinois. I do not desire to object, but I am seeking information, the same as others.

The SPEAKER. But the Chair is bound to pursue the rules of the House.

Mr. BUCHANAN of Illinois. I would like to ask who controls the territory in which these people are?

The SPEAKER. Is there objection. [After a pause.] The Chair hears none. The question is on agreeing to the resolution.

The resolution was agreed to.

EMPLOYMENT OF FEDERAL PRISONERS.

Mr. HOWARD. Mr. Speaker, I ask unanimous consent for the present consideration of H. J. Res. 267, authorizing the appointment of a special joint commission of the Senate and House of Representatives to investigate the employment of Federal prisoners in industrial occupations for the benefit of the Government of the United States; and in connection with that I ask unanimous consent to make a statement of about one minute.

Mr. MANN. Mr. Speaker, I shall object to taking up anything more until the order of business for this morning is disposed of. I think we will soon arrange some day when matters can be called up by unanimous consent or otherwise.

The SPEAKER. The gentleman from Illinois objects.

Mr. HOWARD. Mr. Speaker, I want to ask the gentleman if he will not reserve his objection for a minute. I leave for Georgia to-night——

Mr. MANN. Oh, the gentleman ought not to expect, because he wants to go away and neglect his business, that we should therefore take up and consider his resolution.

Mr. HOWARD. It is a question that does not concern me one way or the other. As far as I am personally concerned, I do not care whether the resolution passes or not, because we will have twenty-five hundred prisoners in the Atlanta prison doing nothing, eating Atlanta food, if you do not pass this resolution.

The SPEAKER. Is there objection?

Mr. MANN. I object.

STANDARDIZING LIME BARRELS.

Mr. ASHBROOK. Mr. Speaker, the Senate has rejected the report of the conferees on the bill (S. 5425) to standardize lime barrels, and asks for a further conference, and I therefore move that the House insist upon its amendments and agree to a conference.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. ASHBROOK. Yes.

Mr. STAFFORD. I notice that an amendment agreed to by the last conference was rejected in the House and rather abandoned by the House upon the statement that if that amendment was at that time pressed a point of order would be made that there was no quorum present.

The bill was passed through this House by unanimous consent, with the understanding that it should be acceptable to the Members of the House. Upon the statement of the chairman of the committee he abandoned the amendment that he now approves of in conference. I wish now to give notice to the gentleman that if that amendment, seeking to prohibit shipments of lime in interstate commerce in less quantities than the standard and small standard barrels by requiring the name of the manufacturer on the barrels, is pressed, I will object to the conference report and try every means to prevent its adoption.

Mr. ASHBROOK. I will say to the gentleman——

The SPEAKER. The gentleman from Ohio [Mr. ASHBROOK] asks unanimous consent that the House further insist on its amendment to the Senate bill and agree to the conference asked for. Is there objection?

Mr. MANN. Mr. Speaker, I do not wish to object, but I would like to ask a question in reference to it. This conference report was agreed to in the Senate at one time, and came over to the House. The Senate recalled it, and then entered a motion to reconsider and disagree to the conference report. I could not understand from the RECORD the reason for disagreeing to the conference report. What is the truth about it?

Mr. ASHBROOK. I will say to the gentleman that I do not know why the Senate rejected the conference report, but the reason the conference report was recalled was because the Senator from Washington [Mr. JONES], and possibly some others, was of the opinion that the bill did not prohibit the shipment of lime from some foreign country into this country without having the barrels stamped as is required by manufacturers of the United States.

Mr. MANN. I want to say this: This matter was brought to my attention a long time ago by one of the gentleman from Washington, who stated that they were in a very serious situation out there, or would be after the 1st of July, on account of the barrel law going into effect and on account of the fact that their lime was packed differently. And they were exceedingly anxious to get a bill which would authorize them to pack lime in a barrel, not complying with the general law in reference to barrels, which went into effect the 1st of July. Having succeeded in doing that, they are now wanting to do something else, without any consideration by any committee of Congress. I think the gentlemen from Washington do not know just where they are getting off on this proposition. Having gotten what they wanted without any difficulty, they are trying to get something into the law which I do not think ought to go in at all, and certainly not without full consideration. I think if I had the power I would have stopped the thing entirely, as long as one of the distinguished gentlemen from Washington had himself recalled it.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The SPEAKER announced the following conferees: Mr. ASHBROOK, Mr. ABERCROMBIE, and Mr. REAVIS.

POST OFFICE APPROPRIATION BILL.

Mr. MOON. Mr. Speaker, I ask that House concurrent resolution No. 49 be taken from the Speaker's table and reported and the Senate amendments agreed to.

The SPEAKER. The Chair will lay before the House House concurrent resolution No. 49. The Clerk will report the Senate amendment.

The Clerk read as follows:

IN THE SENATE OF THE UNITED STATES, *July 19, 1916.*

Resolved, That the Senate agrees to the foregoing concurrent resolution of the House of Representatives, with amendments as follows:

At the end of Senate amendment No. 29 restore the following:

"Provided further, That the Clerk be directed and authorized to renumber the sections of the bill in numerical order; also to insert at the beginning of the last paragraph of said bill the following:

"'SEC. 6.'"

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

LEAVE TO ADDRESS THE HOUSE.

Mr. HUMPHREY of Washington. Mr. Speaker, I ask unanimous consent that when the House meets on Tuesday, after the business on the Speaker's table is disposed of, I may be permitted to address the House for 10 minutes.

The SPEAKER. The gentleman from Washington asks unanimous consent that next Tuesday, after the Journal is read and the business on the Speaker's table is disposed of, he be permitted to address the House for not exceeding 10 minutes. Is there objection? [After a pause.] The Chair hears none.

PENSIONS.

Mr. KEATING. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the omnibus pension bills H. R. 11240, 12194, 13620, and 14576, disagree to the Senate amendments, and ask for a conference.

The SPEAKER. The Clerk will report the first bill.

The Clerk read as follows:

A bill (H. R. 11240) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

The SPEAKER. The gentleman from Colorado asks unanimous consent to take the bill from the Speaker's table, disagree to the Senate amendments, and ask for a conference. Is there objection?

There was no objection.

The SPEAKER appointed the following conferees: Mr. KEATING, Mr. VINSON, and Mr. SELLS.

The SPEAKER. The Clerk will report the next bill.

The Clerk read as follows:

A bill (H. R. 12194) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

The SPEAKER. The gentleman asks unanimous consent to disagree to the Senate amendments and ask for a conference. Is there objection? [After a pause.] The Chair hears none. The Chair will name the same conferees as on the previous bill.

The Clerk will report the next bill.

The Clerk read as follows:

A bill (H. R. 13620) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and the widows of such soldiers and sailors.

The SPEAKER. Without objection, the same action will be taken as in the previous case, and the same conferees will be appointed.

There was no objection.

The Clerk read as follows:

A bill (H. R. 14576) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

The SPEAKER. Is there objection to the gentleman's request?

There was no objection; and the Speaker announced as the conferees on the part of the House Mr. KEATING, Mr. VINSON, and Mr. SELLS.

LEAVE TO ADDRESS THE HOUSE.

Mr. MANN. Mr. Speaker, I ask unanimous consent that when the House meets on Tuesday the gentleman from Nevada [Mr. ROBERTS] may have permission to address the House for one hour at the conclusion of the speech of the gentleman from Washington [Mr. HUMPHREY].

The SPEAKER. The gentleman from Illinois [Mr. MANN] asks unanimous consent that on next Tuesday, immediately following the conclusion of the speech of the gentleman from Washington [Mr. HUMPHREY], the gentleman from Nevada [Mr. ROBERTS] be permitted to address the House for not exceeding one hour. Is there objection?

There was no objection.

Mr. FOSTER. Mr. Speaker, I ask unanimous consent that, following the address of the gentleman from Nevada [Mr. ROBERTS], I be permitted to address the House for 30 minutes.

The SPEAKER. The gentleman from Illinois [Mr. FOSTER] asks unanimous consent that, at the conclusion of the speech of the gentleman from Nevada [Mr. ROBERTS] next Tuesday, he be permitted to address the House for not exceeding 30 minutes. Is there objection?

There was no objection.

LEAVE OF ABSENCE.

Mr. HOWARD rose.

The SPEAKER. For what purpose does the gentleman from Georgia rise?

Mr. HOWARD. To make a request for unanimous consent. Mr. Speaker, in view of the unanimous consents just granted, I ask the unanimous consent of the House that I be granted a leave of absence for 10 days in my district to look after my campaign. [Laughter.]

The SPEAKER. The gentleman from Georgia, in view of the situation next Tuesday, asks unanimous consent that he may have leave of the House for 10 days to look after his campaign. [Laughter.] Is there objection?

Mr. MANN. Reserving the right to object, Mr. Speaker, I would like to say that if the House were actively in business it would be rather difficult to miss the attendance of our distinguished friend from Georgia; and if his district knows what is what and the people there have the interest of the country at heart, they will return him to Congress. [Applause.]

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Oklahoma [Mr. FERRIS] is recognized for one hour.

EXTENSION OF REMARKS.

Mr. MONDELL rose.

The SPEAKER. Does the gentleman from Wyoming desire to make a request?

Mr. MONDELL. Yes. I desire to ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection to the gentleman's request?

There was no objection.

Mr. HELGESEN. Mr. Speaker, I make the same request.

The SPEAKER. The gentleman from North Dakota [Mr. HELGESEN] makes the same request. Is there objection?

There was no objection.

Mr. SMITH of Idaho. Mr. Speaker, I make the same request.

The SPEAKER. Is there objection?

There was no objection.

Mr. SMITH of New York. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection to the gentleman's request?

There was no objection.

Mr. SHOUSE. I make the same request, Mr. Speaker.

The SPEAKER. Is there objection?

There was no objection.

Mr. TAYLOR of Colorado. Mr. Speaker, I make the same request.

The SPEAKER. Is there objection to the gentleman's request?

There was no objection.

The SPEAKER. The gentleman from Oklahoma [Mr. FERRIS] is recognized for one hour.

ACHIEVEMENTS OF THE DEMOCRATIC ADMINISTRATION.

Mr. FERRIS. Mr. Speaker, at this time of the year, just preceding the national election, it is customary for members of the Republican Party to make their usual assaults upon the bills introduced by the majority, upon the votes cast by the majority, upon the legislation enacted by the majority, and upon the good faith and sincerity of the President of the Republic.

These assaults are not without purpose, but are intended, if they can, to arouse doubt and fear in the minds of the 15,000,000 voters who will at the November election settle and decide the question of who shall manage the affairs of this Republic for the ensuing four years.

I shall not indulge in high-sounding platitudes; I shall not indulge in euphonious phrases; neither shall I do any silhouetting of the sky in behalf of the Democratic Party; but I will in a plain, unvarnished way present to this House a record of the bills introduced, the votes cast, the legislation enacted, and the result it has had upon the country, and I shall in the few moments accorded to me, if I can, demonstrate that, first, our bills are good bills; second, our votes are proper votes; third, our legisla-

tion enacted is wholesome; that it has had a beneficial effect on the country, and that the country now enjoys a greater era of prosperity than it has ever enjoyed in its history. [Applause on the Democratic side.]

INCOME-TAX LAW.

H. R. 21214, Sixty-second Congress, second session, first passed House March, 1912, by a majority of 213 (see p. 3637, temporary RECORD); 178 Democrats voted yes; no Democrat voted no; 75 Republicans voted yes; 40 Republicans voted no. H. R. 3231, Sixty-third Congress, first session, conference report adopted in House as part of Underwood tariff law September 30, 1913. (See p. 5274, permanent RECORD.) Passed Senate September 9, 1913; ayes 44, nays 37. (See p. 4617, permanent RECORD.) On January 5, 1910, Gov. Charles E. Hughes issued proclamation admonishing New York Legislature to refuse to ratify the income-tax amendment. This induced legislature to reject it. In 32 months preceding July 1, 1916, yielded $137,257,185.44.

One of the first bills introduced after our return to power in the Sixty-second Congress, while the House was Democratic, was the income-tax bill. It was introduced as a separate measure. It was voted on as a separate measure, and I shall quote you the record of how the two respective parties stand upon it:

One hundred and seventy-eight Democrats voted for that bill, and no Democrat voted no. Seventy-five Republicans voted for that bill and forty failed to vote for it. That bill went to the Senate, where, by the aid of Progressive votes, added to the Democratic strength, it was passed, but died in conference. In the last Congress we again inserted it as an amendment to the Underwood tariff law. It is now the law, and from it during the 32 months it has been in operation it has yielded $137,257,185.44, or about $4,000,000 a month.

Does any Democrat here feel ashamed of his party for enacting that bill? Will any Republican rise in his place and say he will sweep it from the statute books if returned to power? Does any Democrat need to be ashamed of legislation like that? Is there anything partisan about legislation like that? Seventy-five Republicans voted for the bill. Only forty of the strongest standpatters voted against it. Our party has a clear record. No member of it failed to keep the faith. [Applause on the Democratic side.]

STATEHOOD FOR NEW MEXICO AND ARIZONA.

H. J. Res. 14, Sixty-second Congress, first session. Passed House May 23, 1911, without roll call or division. (See p. 1528 permanent RECORD.) Passed Senate August 8, 1911. Yeas, 53; nays, 18. (See p. 3742 permanent RECORD.) Signed by President and became law August 21, 1911.

We admitted the States of Arizona and New Mexico into the Union. The Republicans failed to admit Arizona and New Mexico, although both parties had promised to admit them. You on that side failed to keep your promise. We kept our promise. Who served the country best? [Applause on the Democratic side.]

Mr. HELGESEN. Mr. Speaker, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. HELGESEN. I voted for that bill. I am not ashamed of it. I suggest to the gentleman that, sometime before that, the Supreme Court had decided that an income tax was unconstitutional, and the Constitution had to be changed in order to make it possible. Who was responsible for submitting that question to the States?

Mr. FERRIS. It was not the Republicans. For 16 long years your party had been in full control of the country in both branches of Congress and in the presidential chair and you utterly failed to enact any income-tax law. We, of course, welcome you in to vote for our good bills. The gentleman from North Dakota is a good Member of this House, and I am proud to mention him as one of those who voted for it. I am only pained to observe 40 of them failed to keep the faith and recognize a good thing when they saw it.

Mr. HELGESEN. But that is hardly fair. The Republicans passed an income tax and it was declared unconstitutional.

Mr. GOODWIN of Arkansas. Mr. Speaker, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. GOODWIN of Arkansas. That was in the Wilson bill in 1894, and that bill was passed by a Democratic Congress.

Mr. DIXON. Mr. Speaker, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. DIXON. The Wilson bill contained the income tax, did it not?

Mr. FERRIS. Yes. It was not the Republicans at all. All but 39 of them even voted against an income tax on war munitions within the last few days.

Mr. CULLOP. Will the gentleman yield again?

Mr. FERRIS. Yes.

Mr. CULLOP. And both branches of Congress passed the income tax?

Mr. FERRIS. Yes.

ELECTION OF SENATORS BY DIRECT VOTE.

H. J. Res. 39, Sixty-second Congress, first session, bill passed House April 13, 1912. Yeas, 296; nays, 16; 185 Democrats voted yes, 1 Democrat voted no; 110 Republicans voted yes, 15 Republicans voted no. (See p. 242 permanent RECORD.) Passed Senate June 12, 1911. Yeas, 64; nays, 24. (See p. 1924 permanent RECORD.) Ratified by three-fourths of the States and proclaimed as seventeenth amendment to Constitution by Secretary Bryan May 31, 1913.

From my earliest childhood on, it was the earnest promise of both political parties that if given power they would give us the election of Senators by popular vote. You promised it, and upon assuming office, refused it. We promised it, and gave it. [Applause on the Democratic side.] Which party kept the faith?

Mr. SMITH of Idaho. Mr. Speaker, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. SMITH of Idaho. Is it not true that the resolution to change the Constitution was introduced by Republican Senators?

Mr. FERRIS. It may have been introduced by Republican Senators, but it was a House resolution that finally passed, and it was made a part of the Constitution of the United States in December, 1913, and at that time the Government was Democratic from page boy up to President. It was ratified by three-fourths of the States and proclaimed the seventeenth amendment to the Constitution by a Democratic Secretary of State, William J. Bryan.

Mr. McARTHUR. Mr. Speaker, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. McARTHUR. Was it not ratified by a majority of Republican States?

Mr. CARTER of Oklahoma. Was it not a fact that the present candidate for President on the Republican ticket went over his State opposing the adoption of the income tax in the State of New York?

Mr. FERRIS. That is true. On January 5, 1910, by special message to the legislature, he admonished the State of New York not to ratify it, and they did not ratify it. It is true the influence of the present Republican nominee for President was exerted against the ratifying of the income-tax amendment.

Mr. McARTHUR and Mr. SLOAN rose.

The SPEAKER. Does the gentleman yield, and to whom does the gentleman yield?

Mr. FERRIS. I will yield to either of the gentlemen.

Mr. SLOAN. I desire to say that, according to my recollection of the resolution for the election of United States Senators by direct vote of the people, it was introduced in the Senate of the United States by a Republican Senator from the State of Nebraska, Senator Brown.

Mr. FERRIS. Oh, not at all; my good friend is totally in error. He usually gets it straight. But it was House resolution 39, and the gentleman from Missouri [Mr. RUCKER] not only introduced it but finally had it passed in the House. There can be no confusion or controversy about that.

Mr. McARTHUR. Mr. Speaker, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. McARTHUR. I think the gentleman misunderstood my question.

Mr. FERRIS. I hope I did not.

Mr. McARTHUR. I asked him if it was not true that the amendment to the Constitution providing for the election of Senators by direct vote of the people was ratified by a majority of the States having Republican legislatures.

Mr. FERRIS. The gentleman may be correct. I do not have the list of States before me. I am not advised about that. If the gentleman says it is so and has looked it up, I will take his word for it.

A MEMBER. No.

Mr. CLINE. Will the gentleman yield?

Mr. FERRIS. I yield to the gentleman from Indiana.

Mr. CLINE. I want to suggest to the gentleman from Oklahoma that in the Republican national convention at Chicago in 1908 Mr. Cooper, who brought in a minority report, tried to get a resolution passed favoring the election of United States Senators by popular vote, and it was beaten in that convention by 900 to 100.

Mr. FERRIS. I thank the gentleman. The Republican Party has been held back by false leaders and it is no longer the party of accomplishment.

ABROGATION OF BOSSISM IN HOUSE.

Rule adopted in House April 5, 1911—yeas 200, nays 135; 196 Democrats voted yes; no Democrat voted no; 4 Republicans voted yes; 135 Republicans voted no. (See p. 57, permanent RECORD.)

One-man power in this House grew up. It became a condition and not a theory. The American people became enraged from one end of the country to the other, and the feeling

against it was not confined to our side of the House. The Republican Party was on the rocks, from the fact that Members had to crawl on hands and knees into the Speaker's office, and almost ask permission to draw their breath. I say this with no disrespect to anyone. It was a condition and a practice that had gradually grown up in the procedure. It was all wrong. The American people asked that it be changed. On the first day of our convening after our return to power we swept one-man rule from this House, I believe for all time, and provided that the committees of the House should be elected by the House. [Applause on the Democratic side.] The Republicans told us that if we abolished the so-called Cannon rules we would be on the rocks, that we would fall out, that we would have insurgency, that we would have animosities which we could neither bridle nor control. With pleasure and with pride I call attention to the fact that after six years of power in this House there is no insurgency, there is no factionalism, and if there is a single Democrat on this side of the aisle who would not willingly get up in the dead hours of night to help any other Democrat in the House, I would like to know who he is. [Applause on the Democratic side.] Under the present procedure, I am happy to say, that everybody, from the page boys on the benches to the majority and minority leaders, love, revere, admire, and respect the Speaker, and there are no charges of favoritism in this House or elsewhere to be found. [Prolonged applause.]

PUBLICITY OF CAMPAIGN EXPENSES.

H. R. 2952, Sixty-second Congress, first session, passed House April 14, 1911—307 yeas, no nays. (See p. 268, permanent RECORD.) Passed Senate July 17, 1911, without roll call. (See p. 3020, permanent RECORD.) Conference report adopted in House by vote of 282 to 27; 114 Democrats voted yes; 25 Democrats voted no; 138 Republicans voted yes; 2 Republicans voted no. (See p. 4102, permanent RECORD.) Signed by President, August 19, 1911.

It had gone abroad in the land that unless a man had a fat purse, no matter how much brains he had in his head, no matter how much honesty and integrity he had in his heart, it was difficult, if not impossible, for him to sit in a high place in this Republic. I am proud that in the Sixty-second Congress we passed H. R. 2952, which said that the humblest constituent in all the Republic may know, first, how much his Member spends to get here; second, how much anybody else gave him to help him get here; and, third, who it was that gave it to him.

Mr. RAKER. And the defects and imperfections in that bill have been remedied by the bill which has passed the House within the last 10 days.

Mr. FERRIS. I was just coming to that, the Rucker Corrupt Practices Act.

RUCKER CORRUPT PRACTICES BILL.

H. R. 15842, Sixty-fourth Congress, first session. Passed House July 15, 1916, without roll call or division. (See p. 12881, temporary RECORD.) Now pending in the Senate.

Mr. MORGAN of Oklahoma. Will the gentleman yield?

Mr. FERRIS. I yield with pleasure to my colleague.

Mr. MORGAN of Oklahoma. I am very much interested in the gentleman's address——

Mr. FERRIS. I know the gentleman is. He always is interested in good addresses. [Laughter.]

Mr. MORGAN of Oklahoma. And I am proud that the gentleman comes from my State. But I should like to have the gentleman in all sincerity explain, as he says he is coming to this publicity matter, why it was that the other day the Democratic Party in this House did not redeem their platform pledge of 1908 and 1912, that they would limit to a reasonable maximum the amount of money that any one man should contribute to the nomination or election of the President. You know the House passed a bill the other day, but they did not include that part of it, and they did not carry out that platform pledge.

Mr. FERRIS. We have a presidential publicity bill, and I have it here. That is not contained in the Rucker bill, which is meant to deal solely with the election of Senators and Representatives. It is impossible to bundle together bills unlike in character. I think the other bill is sufficient. If not, I will vote with the gentleman to amend it. I think we have been far from derelict in this respect. We have blazed the way on this legislation. Your party never made a move. That is all I care to say about that.

FEDERAL TRADE COMMISSION LAW.

H. R. 15613, Sixty-third Congress, first session. Conference report adopted in House without roll call or division. (See p. 14943, permanent RECORD.) Passed Senate August 5, 1914. Yeas, 53; nays, 16. (See p. 13318, permanent RECORD.) Signed by President Wilson September 26, 1914.

During Roosevelt's seven years and during Taft's four years we had one continual powwow in the Attorney General's office, arresting business men and playing politics with American business. It was a good football to kick hither and thither. It was a good thing on which to run for office, to be arresting somebody, and dragging business men here and there. The Federal Trade Commission in a fair, square, open way, with full visitorial and regulatory powers, capable of weeding out corrupt business and encouraging and helping and strengthening good business was provided for in a bill which passed through the Democratic Senate and House without even enough opposition to get a roll call in either body. This is legislation that gets results without any brass-band accompaniment. Is that one of the bills that my friends on the Republican side of the House say are bad bills? There was not even enough opposition in either body to get a roll call. Is this one of the bills they say are bad bills? Is this in any way partisan? What excuse have you to offer for your dereliction of duty?

WAR-RISK INSURANCE LAW.

S. 6357, Sixty-third Congress, second session. Passed House August 29, 1914, by a vote of 230 to 58. One hundred and ninety-one Democrats voted yes; no Democrat voted no; 39 Republicans voted yes; 56 Republicans voted no. (See p. 14449, permanent RECORD.) Passed Senate August 21, 1914, without roll call. (See p. 14086, permanent RECORD.) Signed by President Wilson September 2, 1914.

This bill was passed to meet an emergency occasioned by the world's greatest war. I will not deal with it further than to say that it shows that the Democratic Party is alert to the situation, is alert to the emergency, is alert to do the thing that needs to be done when it should be done. [Applause on the Democratic side.] Our commerce was disrupted and almost broken down because of the world's greatest war breaking out without precedent or notice to anyone. The great Federal Government, administered by the Democratic Party, stepped in and arose to the call of duty the day that duty called, and enacted this law so that commerce might be resumed, so that 25,000,000 laborers might have jobs, so that 6,500,000 farmers might have a place to sell their products, so that 20,000,000 school children might be kept in school and in shoes. That is what the Democratic Party administering the affairs of the Federal Government stepped in and did.

SHIP-PURCHASE BILL.

H. R. 15455, Sixty-fourth Congress, first session. Passed House May 20, 1916, by a vote of 211 to 161; 194 Democrats voted yes; no Democrat voted no; 16 Republicans voted yes; 161 Republicans voted no. (See p. 9488, temporary RECORD.) Now pending in Senate.

The ship-purchase bill. It passed the House and has not passed the Senate. Some good men are opposed to it on our side. All on the other side are opposed to it. Let us see what about it. I live way out on the broad prairies of the West. But I am going to say that this Republic is entitled to a merchant marine, and we have got to have one from somewhere. [Applause on the Democratic side.]

There are three ways to get a merchant marine. The first one is for private capital to come in and build it, construct it, establish it, and run it. We have waited 50 years for that and it has not arrived. The second way is by a ship subsidy, and neither party is in favor of a ship subsidy and neither party could pass it or would vote for it to-day.

What is the other remedy? The other remedy is a bill something like ours—have the Federal Government go in and establish a merchant marine and break down the outrageous rates that prevail in this country. [Applause on the Democratic side.]

CLAYTON ANTITRUST LAW.

H. R. 15657, Sixty-third Congress, second session. Conference report adopted in House October 8, 1914, by a vote of 245 to 52; 210 Democrats voted yes; no Democrat voted no; 35 Republicans voted yes; 52 Republicans voted no. (See p. 16344, permanent RECORD.) Passed Senate September 2, 1914; yeas, 46; nays, 16. (See p. 14610, permanent RECORD.) Signed by President Wilson October 15, 1914.

That is one of the most wholesome and useful pieces of legislation that has passed, and it carries enough balm and good in it for labor to recommend it if it did not carry anything else, and it carries lots more. It carries a provision for beating down, checking, bridling, and controlling monopoly so that the door of opportunity may be left ajar for the little business men and the little business concerns to have a chance in the race for a successful business life.

PHILIPPINE BILL.

S. 381, Sixty-fourth Congress, first session. Passed House May 11, 1916, without roll call or division. (See p. 8184, temporary RECORD.) Passed Senate February 4, 1916; yeas, 52; nays, 24. (See p. 2295, temporary RECORD.) Now in conference.

It has passed both Houses and is now in conference. It tells the Filipino people that sometime, somewhere, and somehow they will have independence.

Mr. MCARTHUR. But not in two years.

Mr. FERRIS. No, not in two years, but I wish to the Lord it did. Several good men from my own party did not agree with me, and none of you on the Republican side agreed with us, and so we got licked on providing immediate independence. But we did the best we could. We did establish a good principle. We said we are not going to hold the Filipinos as peons or slaves;

we are going to let them loose after a while. [Applause on the Democratic side.]

UNDERWOOD TARIFF LAW.

H. R. 3321. Sixty-third Congress, first session. Conference report adopted in House September 30, 1913; 250 Democrats voted yes; 1 Democrat voted no; 5 Republicans voted yes; 103 Republicans voted no. (See p. 5818, temporary RECORD.) Passed Senate September 9, 1913, and signed by President Wilson October 3, 1913.

Both parties promised to reduce the tariff. Your party promised it; my party promised it. You were given power with Taft's election. You broke your promise. You revised it up instead of down, and your candidate for the Presidency carried two little States, one in the Rocky Mountains, Utah, and the other, Vermont, neither one of them bigger than a postage stamp, and with not enough people in them to raise a fuss. [Laughter and applause on the Democratic side.] You carried those States and no more. Why? Because he refused and his party refused to do what they agreed to do, and that was to revise the tariff downward. [Applause on the Democratic side.]

What happened after you failed to keep faith? Theodore Roosevelt, a man without a party, almost without a country, went out in the campaign and in two or three months organized the so-called party of Armageddon and beat you fellows all over the United States. He received four million plus, and you got three million plus because you failed to keep the faith.

The selfsame crowd that then rode to a fall is now in control of the Republican party. How well the Progressive party will cherish this remains to be seen. What happened? The American people elected Wilson. We kept our promise; we did what we agreed to do; we revised downward; we kept the faith, the country is prospering as it never prospered before.

REVENUE BILL.

H. R. 16763, Sixty-fourth Congress, first session. Passed House July 10, 1916; 200 Democrats voted yes; no Democrat voted no; 39 Republicans voted yes; 139 Republicans voted no. (See p. 12362, temporary RECORD.) Now pending in the Senate.

Then we passed the addenda to the Underwood bill the other day, so good, so wholesome, so square, and so fair that 39 of the brainiest and truest fellows on your side came over and voted with us, and the rest grabbed their hats and ran. [Laughter and applause on the Democratic side.]

Mr. HELVERING. Will the gentleman yield?

Mr. FERRIS. Yes.

Mr. HELVERING. That was after three days of coaxing and bullying by the gentleman from Michigan for votes.

Mr. FERRIS. I was going to add that if there ever was a beggar for votes on a tariff committee the gentleman from Michigan [Mr. FORDNEY] on this occasion was one. I never heard him before with bated breath, soft voice, bowing meek and lowly, begging for votes, as he was the other day. He is generally vociferous, boisterous, strong, and daring, but on this occasion honey would scarcely melt in his mouth.

Mr. SMITH of Idaho. Will the gentleman yield?

Mr. FERRIS. Yes.

Mr. SMITH of Idaho. The gentleman from Oklahoma is very accurate in stating the result of the election two years ago and four years ago. I am wondering whether he will prophesy what will happen in November next.

Mr. FERRIS. I will; and unless the 15,000,000 voters of this Republic are following a shadow instead of substance Woodrow Wilson will be elected triumphantly next November. [Applause on the Democratic side.]

FEDERAL RESERVE LAW.

H. R. 7837, Sixty-third Congress, first session. Conference report adopted in House December 22, 1913, by vote of 298 to 60; 245 Democrats voted yes, 2 Democrats voted no; 53 Republicans voted yes, 58 Republicans voted no. (See p. 1477, permanent RECORD.) Passed Senate December 19, 1913. Yeas 54, nays 34. (See p. 1230, permanent RECORD.) Signed by President Wilson December 23, 1913.

For 50 years students of banking and students of political economy everywhere have well understood and admitted that our currency system was weak, wavering, worthless, and a miserable makeshift. What did you do about it? You did not have the courage; you did not dare to tackle the job. You ducked it. You grabbed your hats and ran. You were afraid you would stir up conditions and did not dare to give us a new currency system. What happened? With the courage of our convictions, with the energy and alertness and ability to control a great Government like this, we gave you a new currency system so good, so wholesome, that you dared not condemn it in your national platform. [Applause on the Democratic side.]

Mr. BARKLEY. Will the gentleman yield?

Mr. FERRIS. Yes.

Mr. BARKLEY. I would like to call the gentleman's attention to the fact that the Republicans appointed a monetary commission that traveled all over the world, spent $250,000, wrote a report of 36 volumes which it would take a lifetime to read and more to understand.

Mr. FERRIS. That is true, they like to ride better than to legislate, but I will not detain you about that. Their omissions are so numerous that it will be impossible to deal with them.

CONSERVATION OF NATURAL RESOURCES.

This country is rich in natural resources—700,000,000 acres of public land, 35,000,000 potential horsepower of hydroelectric energy, 165,000,000 acres of forest reserve, 53,000,000 acres of coal land, 5,000,000 acres of oil land, 3,000,000 acres of phosphate land, 41,000 acres of potash land, 14 national parks aggregating 4,600,000 acres, 31 national monuments aggregating 86,000 acres. The great bulk of the 100,000,000 people believe that the party ought to administer this estate who will administer it justly and in the public interest. I assert that the 700,000,000 acres of unappropriated public lands are being wisely and carefully administered by this administration. I assert land frauds and land grabbing are reduced to the minimum and that the public interest is being recognized. I assert that the 35,000,000 horsepower of hydroelectric energy are being conserved and the legislation is well on its way to bring about a careful conservation in the public interest of this great resource. [Applause on the Democratic side.] One hundred and sixty-five million acres of forest reserves are being carefully administered so that the country may not be denuded of its timber, and this is in the public interest. I undertake to say that the 53,000,000 acres of coal lands still the property of the Government are being conserved and taken care of by Secretary Franklin K. Lane and this administration as they have never been taken care of before. [Applause on the Democratic side.]

Five million acres of oil land, which are to supply oil for the Navy, are being conserved, protected, and cared for by this administration as never before. [Applause on the Democratic side.] Three million acres of phosphate lands, still in Government ownership, are being cared for, protected, and conserved for the benefit of the depleted soils of the East, that must have fertilizer in order that they may survive. The 41,000 acres of potash yet belonging to the Government are being conserved. The 14 national parks comprising 4,600,000 acres, the Nation's playgrounds, are being conserved and cared for by the Wilson administration. [Applause on the Democratic side.] The 31 national monuments comprising 86,000 acres of land, like the Grand Canyon and others of nature's wonders, are being cared for, conserved, and protected by the Wilson administration.

Mr. MORGAN of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. MORGAN of Oklahoma. I would like to make this remark, that I think a good deal of the credit for the conservation of these great natural resources is unquestionably due to the gentleman from Oklahoma, [Mr. FERRIS], who is chairman of the Committee on Public Lands, and who has this legislation in charge. [Applause on the Democratic side.]

Mr. FERRIS. Mr. Speaker, I am very much indebted to my good friend from Oklahoma. He generally puts such knotty problems to me that I can not answer them, but on this occasion I can agree with him with such amazing grace. [Laughter.]

Mr. RAKER. Mr. Speaker, I simply want to say that I agree with the gentleman from Oklahoma [Mr. MORGAN] in what he said about the conservation work which has been the work of the present speaker, our beloved chairman of the Committee on Public Lands, Mr. FERRIS.

Mr. FERRIS. Again I thank my friend; again I admit the wisdom and the accuracy of the statement. There are more men of mature judgment here than I had expected to find in one body. [Laughter.]

Mr. BARKELEY. Mr. Speaker, I suggest that the books be opened, and that the gentleman from Oklahoma, Mr. MORGAN, be allowed to join the Democratic Party at this time.

Mr. FERRIS. Oh, Mr. MORGAN is a good fellow. I wish that all Republicans behaved as well as he does.

LABOR LEGISLATION FOR AMERICA'S TOILERS.

Mr. Speaker, during my short service, covering a period of 10 years, I used to look at the Speaker's desk almost every morning, and I would see it loaded down with petitions asking the party then in power, the great Republican Party, once the party of Lincoln, once the party of the sainted McKinley, to enact legislation in the interest of the 25,000,000 toilers of this country. But I saw those petitions one after another ignored, refused, given little or no attention, even swept into the waste-basket. The Republican Party first heard them, and then turned them away, and what happened? The Democratic Party came into power. Labor appeared before our committees. They asked us, oh so earnestly, for laws that would help them. We responded; and we have passed for them the bills they wanted passed; we passed them in the form they asked. Let us see what they are. The eight-hour law [applause on the Demo-

cratic side]; the bill establishing a children's bureau; the child-labor bill, which has passed the House and is now pending in the Senate [applause on the Democratic side]; the bill providing for safety of railway employees, a law signed by President Wilson on May 4, 1916; and the bill providing for the establishment of a bureau of labor safety. I will quote the RECORD on these bills. It is as follows:

EIGHT-HOUR DAY.

H. R. 9061, Sixty-second Congress, first session. Passed House December 14, 1911, without roll call or division. (See p. 396, permanent RECORD.) Passed Senate May 31, 1912. Yeas, 45; nays, 11. (See p. 7455, permanent RECORD.) Signed by President June 19, 1912.

CHILDREN'S BUREAU.

S. 52, Sixty-second Congress, second session. Passed House April 2, 1912, by a vote of 177 to 17 on a division. (See p. 4226, CONGRESSIONAL RECORD.) Passed Senate January 31, 1912. Yeas, 54; nays, 20. (See p. 1579, temporary RECORD.) Signed by President April 9, 1912.

CHILD-LABOR BILL.

H. R. 8234, Sixty-fourth Congress, first session. Passed House by a vote of 337 to 46, February 2, 1916; 169 Democrats voted yes; 44 Democrats voted no; 168 Republicans voted yes; 2 Republicans voted no. (See p. 2174, temporary RECORD.) Reported to Senate April 19, 1916.

SAFETY OF RAILWAY EMPLOYEES.

S. 3769, Sixty-fourth Congress, first session. Passed House April 28, 1916, without roll call or division. (See p. 7947, temporary RECORD.) Passed Senate April 20, 1916, without roll call. (See p. 7427, temporary RECORD.) Signed by President Wilson May 4, 1916.

BUREAU OF LABOR SAFETY.

H. R. 155, Sixty-fourth Congress, first session. Passed House January 19, 1916, without roll call or division. (See p. 1424, temporary RECORD.)

Mr. McCRACKEN. Mr. Speaker, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. McCRACKEN. Was not the bill for the establishment of a bureau of welfare to care for the children of the United States introduced by a Republican Senator, the distinguished Senator from Idaho, Mr. BORAH?

Mr. FERRIS. It was Senate bill No. 52, in the Sixty-second Congress, second session, and that bill passed the Senate and passed the House by the aid of Democratic votes and a few Progressives over there and a few Progressives over here.

Mr. McCRACKEN. But the gentleman will admit that that came from Senator BORAH of Idaho, who is a Republican?

Mr. FERRIS. It was Senate bill 52. Senator BORAH may have introduced it, but Democratic votes passed it. We have the majority, so we could pass it or let it alone as we chose. We chose to pass it. We did pass it. It is the law.

Mr. RUSSELL of Missouri. Mr. Speaker, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. RUSSELL of Missouri. Is he the same Senator who severely criticized Judge Hughes while he was governor of New York for asking the legislature of that State to defeat the income-tax resolution? [Applause on the Democratic side.]

Mr. FERRIS. I am willing to accept the statement of the witness without modification, comment, or amendment. [Laughter.]

Mr. CLINE. Of course it is a matter of common knowledge that Senator BORAH is not exerting himself to any great extent now to get legislation of that kind through the Senate.

Mr. FERRIS. If he is, the water is fine. The bill is over there waiting for him.

Mr. McCRACKEN. Have the Democrats, in majority in that body, given Senator BORAH or anyone else an opportunity to pass that bill?

Mr. FERRIS. Oh, some of them belonging to my party are against it. A large number of my good friends on this side of the House are against the bill, and they think they are right about it. Personally I do not agree with them, and personally I hope that we can borrow some Progressive votes in the other body to take their place, so that we may again in this instance give labor what it deserves to have, as the Republican Party always refused to give them anything. [Applause on the Democratic side.]

WORKMEN'S COMPENSATION LAW.

H. R. 15316, Sixty-fourth Congress, first session. Passed House, July 12, 1916, by a vote of 285 to 2—145 Democrats voted yes; 1 Democrat voted no; 140 Republicans voted yes; 1 Republican voted no. (See p. 12577, temporary RECORD.) Now pending in Senate.

There was the workmen's compensation law. [Applause on the Democratic side.] It passed the House with just 2 votes against it, 1 on our side and 1 on your side—both lovable fellows; but, although nice fellows, they were unwilling to give labor what she is entitled to and what she asks for and what we promised to give her. That is all.

SEAMEN'S LAW.

S. 136, Sixty-third Congress, first session. Passed House August 27, 1914, without roll call or division. (See p. 14362, permanent RECORD). Passed Senate October 23, 1913, without roll call or division. (See p. 5792, permanent RECORD.) Signed by President Wilson March 4, 1915.

The seamen's law was asked for by labor; petitioned for everywhere by labor. We gave it and you refused it. [Applause on Democratic side.]

The Tavenner stop-watch amendment was added to four appropriation bills this year, the Army bill, the Navy bill, the sundry civil bill, and the fortifications bills, asked for by labor, but they asked in vain. You heard them and turned them away.

ANTI-INJUNCTION LAW.

S. 8439, Sixty-second Congress, second session. Passed House May 14, 1912, by a vote of 243 to 31—163 Democrats voted yes; no Democrat voted no; 80 Republicans voted yes; 31 Republicans voted no. (See p. 6470, permanent RECORD.) Passed Senate February 25, 1913, without roll call. (See p. 3870, permanent RECORD.) Signed by President March 4, 1913.

Since my earliest boyhood the appeals of union labor have asked that that law be enacted. They asked you to accomplish it for them. They piled petitions on your tables when you were in control, pleading, begging, asking you to enact it and thereby do your duty to labor. You put those petitions in the wastebasket and you turned them away. We delivered the goods. [Applause on the Democratic side.] Let us see what the vote was on this bill when the roll was called. Let us observe which party served labor best. The vote was, yeas 243, noes 31. One hundred and sixty-three Democrats kept the faith and no Democrat failed. Eighty Republicans voted yea when they were forced to a record vote, and 80 of them came across and did their duty. There were 31 skulking around the back rows of seats who voted against the anti-injunction bill. Some of this selfsame 31 tell us they will beat us in November. Maybe they will and maybe they will not. Will 25,000,000 wage earners of this country turn and strike the hand that caressed them? Will 25,000,000 patriotic men ask and receive, and then turn their backs on the party that enacted the laws desired? I can not believe that 25,000,000 patriotic toilers of this country will turn and strike down the party that accomplished for them what they desired. If they do, it will belie their every tradition. My hope and my belief in humanity will be shattered, blasted, and gone. I do not believe it is true. Labor has never in the past exacted any such toll as that, and I do not believe they will do it in November.

Let us see what else. I have been a Democrat always, of course. Everybody ought to be. [Applause on the Democratic side.]

The three idols of my early youth were the beloved Speaker, CHAMP CLARK, Senators Vest and Cockrell. The two Senators have gone to their reward, but the Speaker, in the zenith of his powers, is still at the head of this House of Representatives, one of the most honored places in all the world.

I used to sit as a barefoot boy and see the Republican orators wave the bloody shirt and say, "You Democrats are flag shooters, and a rebellious sort of fellows. If you were intrusted with power you would abuse the defenders of the country and cut off their pensions." And they used to wave the flag, recall prejudices, and say, "If you let the Democrats get into office they will cut your pensions off. They will maltreat you." Doubtless some of the soldiers thought it might be true. How changed to-day.

PENSION LEGISLATION.

SHERWOOD PENSION BILL.

H. R. 1, Sixty-second Congress, second session. Conference report adopted in House by a vote of 167 to 57. (See p. 6432, permanent RECORD.) Passed Senate May 29, 1912. Yeas, 51; nays, 16. (See p. 4015, permanent RECORD.) Signed by President May 11, 1912.

INDIAN WAR PENSION BILL.

H. R. 655, Sixty-fourth Congress, first session. Passed House February 16, 1916, by a vote of 221 to 108. (See p. 3079, temporary RECORD.) Passed Senate May 9, 1916, without roll call. (See p. 8677, temporary RECORD.) Now in conference.

SPANISH WAR WIDOWS' PENSION BILL.

H. R. 54, Sixty-fourth Congress, first session. Passed House February 16, 1916, without roll call or division. (See p. 3061, temporary RECORD.) Pending on Senate calendar.

Let us see. Under seven years of Theodore Roosevelt the average pension paid to the Union soldier was $183.73. The average pension under the four years of Taft was $177.78. And under Wilson the average pension is $223.53. [Applause on the Democratic side.] That is not all. What happened at St. Louis? What happened at Chicago? The Republican platform on pensions is as silent as the grave. Is it true that the 748,147 pensioners have grown so old and so decrepit and so nearly standing on the brink of an open grave that you

Republicans have lost interest in them? I am proud that my party—I am proud that in defeat and in disaster they are more generous to these old soldiers, bent and gray, than you have ever been in the history of the Republic. [Applause on the Democratic side.] Most Democrats in Indiana and Ohio will no longer have to bear the whips and scourges of the Republican Party that we have no faith, affection, or regard for the old soldiers. I assume not. You were quiet in the platform. I assume you will be quiet this year. I believe you will be quiet everywhere and you ought to be. Let us see what we have got here.

Mr. RAKER. Will the gentleman yield?

Mr. FERRIS. Certainly.

Mr. RAKER. I would like to call the gentleman's attention to the fact that he overlooked the phossy-jaw bill. The American people for years, at least for five years, have been demanding legislation, and there have been scandals of all kinds in regard to the Alaska coal fields, but Congress did relieve this situation and passed a bill satisfactory to the American people.

Mr. FERRIS. In reply to the gentleman from California, I am glad he called my attention to the phossy-jaw bill. That is entitled to a place in the curriculum of important legislation enacted for labor. I had omitted it. I thank him for the suggestion. Regarding the suggestion about Alaska, I gladly say that I believe my party is beginning to open up and develop that great Territory as it was never done before and is entitled to some credit for it. It was long a seething pot of land frauds and Guggenheim scandal. We are straightening it out and developing it. It should have been done years ago.

Mr. LONGWORTH. Will the gentleman yield?

Mr. FERRIS. Yes.

Mr. LONGWORTH. Mr. Speaker, I merely want to remind the gentleman, in line with the inquiry of the gentleman from California, that the phossy-jaw bill was introduced by the gentleman from Wisconsin [Mr. ESCH] and was violently attacked and fought on the floor of this House by the Democratic leader of the House [Mr. UNDERWOOD].

Mr. FERRIS. Every day that that bill was in progress, every day during its consideration, it was in the power of the Democratic majority to sweep it away or pass it, as we elected to do, and we passed it. It is the law. We were generous in passing it for Mr. ESCH. He is entitled to credit for introducing it. It is refreshing to find an occasional Republican willing to come in and help us secure good legislation.

LEGISLATION IN BEHALF OF THE AMERICAN FARMER.

Most of us sprung from the farm. If we did not, we ought to have done so. Six and one-half million farmers in the Republic have since my earliest childhood asked for laws to help better their condition. You Republicans, 16 years in power, heard them and turned them away. We promised, we heard them, we delivered the goods. [Applause on the Democratic side.]

RURAL CREDITS BILL.

S. 2986, Sixty-fourth Congress, first session, passed House May 15, 1916, by a vote of 295 to 10; 186 Democrats voted yes, no Democrat voted no; 108 Republicans voted yes, 10 Republicans voted no. (See p. 9037, temporary RECORD.) Passed Senate May 4, 1916—yeas 57, nays 5. (See p. 8387, temporary RECORD.) Signed by President Wilson July 17, 1916.

The rural credits bill. What does it mean? It means cheaper interest, a longer time for the farmer to pay it back. That is what it means. My people need it; the American farmers everywhere need it. They have asked for it from you and you failed. They asked for it from us and we delivered it. It is the law. [Applause on the Democratic side.]

Mr. COX. Mr. Speaker, will the gentleman yield in that connection?

Mr. FERRIS. Certainly.

Mr. COX. I take it that the gentleman has read the Republican platform this year, has he not?

Mr. FERRIS. Yes, I have; but I do not pretend to understand it. [Laughter on the Democratic side.]

Mr. COX. And no one else.

Mr. FERRIS. The gentleman does not want me to say that, does he?

Mr. COX. No. Does the Republican platform denounce the rural credits bill, which Congress passed, although the solid Republican Party voted for it, except 12?

Mr. FERRIS. Except 10. Yes; that is so. But they have been promising in platform and on the stump so long and voting against the propositions in Congress, that in this instance they merely reversed the procedure and voted first and denounced last. [Applause on the Democratic side.] The vote on roll call was as follows: 186 Democrats voted for the rural credits bill; no Democrat voted no; 108 Republicans walked up to the halter, put their heads into the manger and voted for it, and only 10 voted against it.

Mr. COX. Now in reference to the platform promises, the gentleman has read the Republican platform in 1912 and in 1916, I am sure. I want to ask him if it is not a fact that the Republican Party in both of those platforms solemnly and sincerely declared for a tariff commission.

A MEMBER. Not sincerely. [Laughter.]

Mr. COX. Did they not declare for a tariff commission?

Mr. FERRIS. They did, but they failed you and did not deliver the goods. They promised to pass it while securing votes, but voted against it in Congress. We passed it without any promises or any noise.

Mr. COX. Now on the 10th day of July, is it not a fact that we put up to the Republican Party a tariff commission bill, and did not 139 Republicans vote against it?

Mr. FERRIS. Yes; but 39 voted with us, and I want to thank them and pause and admire those 39 gentlemen for doing what every good Member of Congress ought to do, and that is to vote for a good bill, wherever he may find it. The American people are not interested in authorship or in kind words; they want kind deeds fully delivered, and we delivered.

Mr. COX. Does the gentleman think of any reason why a Republican should vote against it after declaring for it in two platforms?

Mr. FERRIS. Well, the gentleman from Michigan [Mr. FORDNEY] gave the reason with more frankness than I have ever heard exhibited in this House before, when he declared that he would not vote for a Democratic bill even if it were coated with sugar a foot deep. If that is the case with respect to the rest of them, the Republican Party is about as near on the rocks this year as it was four years ago. They have been on the toboggan for some time, anyway.

Mr. LONGWORTH. Mr. Speaker, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. LONGWORTH. I would like to ask the gentleman a question with general relation to platform promises. The gentleman has stated that the Republican Party four years ago met its defeat and only carried two States because it promised to reduce the tariff——

Mr. FERRIS. Yes—promise and did not deliver! [Applause on the Democratic side.]

Mr. LONGWORTH. Now let me ask the gentleman this question: In the line of prophecy what two States does the gentleman predict the Democratic Party will carry on its promise to reduce the cost of living? [Laughter on the Republican side.]

Mr. FERRIS. I have an answer for the gentleman.

Mr. GOODWIN of Arkansas. Mr. Speaker, will the gentleman yield right there?

Mr. FERRIS. In a moment. The gentleman from Ohio is noted for his cleverness and ability, and I will pause long enough to say that the gentleman made a speech here during the progress of the tariff board debate that will do credit to him after he has gone, on account of its fairness and squareness, and the gentleman is entitled to an answer to his present question.

Mr. GOODWIN of Arkansas. Mr. Speaker, will the gentleman yield?

Mr. FERRIS. Yes, in a moment, if the gentleman will pardon me. The gentleman from Ohio [Mr. LONGWORTH] as he is always capable of doing, selects our weakest spot; but let me call the gentleman's attention to the fact that the cost of living has not increased as much in this country as it has in every other country in the world. [Applause on the Democratic side.] If that is not a satisfactory answer to the gentleman, I will say the cost of living has not been materially reduced, and no other party could have reduced it with a world war raging on the other side. My father and mother used to ride in a one-horse shay that cost $35. Now, if we of the younger generation, do not have an automobile that costs $2,500 every third year, something is going wrong. The whole scene has changed. The whole style and methods of life have changed. The butcher and the banker all ride in automobiles nowadays. It is a different scale of living that we are having, and the party does not live now that is able to say that it will be able to reduce us to the plane of a one-horse shay. I predict neither the gentleman from Ohio or myself will be here when this country returns to the one-horse shay days of old.

Mr. LONGWORTH. Then the gentleman practically guarantees that the Democratic Party never again will promise to reduce the cost of living by a reduction of the tariff or otherwise?

Mr. FERRIS. I do not promise that, but say that the party is not now organized under present conditions that can return this Nation from extravagance to simplicity.

Mr. GOODWIN of Arkansas. Is not the high cost of living, 90 per cent of which the Republicans are responsible for, offset by

the low mental depression of the Republican Party when it thinks of its slim chance of carrying the country in the Presidential campaign next November? [Applause on the Democratic side.]

Mr. FERRIS. Again I agree with my friend from Arkansas. There was added to the agricultural appropriation bill, reported from the committee presided over by the able and genial gentleman from South Carolina [Mr. LEVER] and my able friend from Alabama [Mr. HEFLIN], three important amendments, namely, the bill to drive out gambling in farm products, the warehouse bill, and the grain-grading bill, all bills that the farmer asked for and which you refused to give; bills that they asked for and which we delivered. [Applause on the Democratic side.]

It is with much pride that I quote the record on these measures. It is as follows:

BILL TO PREVENT GAMBLING IN FARM PRODUCTS.

Amendment to H. R. 12717, Sixty-fourth Congress, first session. Passed House May 2, 1916, as amendment to agricultural appropriation bill. Vote on amendment was 107 to 21 on division. (See p. 8246, temporary RECORD.) Passed Senate July 12, 1916. Now in conference.

WAREHOUSE BILL.

Amendment to H. R. 12717, Sixty-fourth Congress, first session. Passed House May 2, 1916, as amendment to agricultural appropriation bill. The vote was 286 to 42; 163 Democrats voted yes; 11 Democrats voted no; 125 Republicans voted yes; 31 Republicans voted no. (See p. 8247, temporary RECORD.) Passed Senate July 12, 1916. Now in conference.

GRAIN-GRADES BILL.

H. R. 12717, Sixty-fourth Congress, first session. Passed House May 2, 1916, as an amendment to Agricultural appropriation bill without roll call or division. (See p 8246, temporary RECORD.) Passed Senate July 12, 1916. Now in conference.

LEVER AGRICULTURAL EXTENSION BILL.

H. R. 7951, Sixty-third Congress, second session. Conference report adopted in House May 2, 1914, without roll call or division. (See p. 7646, permanent RECORD.) Passed Senate February 7, 1914, without roll call. (See p. 3130, permanent RECORD.) Signed by President Wilson May 8, 1914.

The Lever agricultural extension bill appropriates about $5,000,000 a year to teach agriculture. What for? To encourage the boy to go back on the farm, instead of running away to the city as soon as he is 20 years old. And that of late has been going on to a marked degree. The gentleman from South Carolina [Mr. LEVER] and the party behind him, and the President who signed that bill, are entitled to great credit for its enactment.

GOOD ROADS BILL.

H. R. 7617, Sixty-fourth Congress, first session. Bill passed House January 25, 1916, by a vote of 282 to 81; 163 Democrats voted yes, 13 Democrats voted no, 128 Republicans voted yes, 68 Republicans voted no. (See p. 1688, temporary RECORD.) Passed Senate May 8, 1916, without roll call. (See p. 8562, temporary RECORD.) Signed by President Wilson July 11, 1916.

Good roads. Every nation in the world except our own has done something toward aiding in the building of good roads. On one pretext and another this great Republic, the richest in all the world, has failed, until this Congress, to do a solitary thing. Seven years of Roosevelt gave nothing. Four years of Taft gave nothing. You promised and failed. We promised on the stump and in platform. We also performed in office. We delivered the goods. [Applause on the Democratic side.]

Mr. KINCHELOE. Will the gentleman yield right there?

Mr. FERRIS. I yield to the gentleman from Kentucky.

Mr. KINCHELOE. Is it not a fact that the Republican platforms of 1912 and 1916 did not, either one of them, promise anything in the way of Government aid to good roads?

Mr. FERRIS. I think my friend from Kentucky is right about that, although I have neither of those late lamented documents before me. I thank him for calling my attention to it. I want to talk a little bit about present prosperity.

Mr. BRITTEN. Has the gentleman finished calling attention to the various good bills that the House has passed during the present administration?

Mr. FERRIS. No, I have some more if the gentleman will just content himself in peace.

Mr. BRITTEN. Has the gentleman in mind House joint resolution 251?

Mr. FERRIS. I do not know what it is. What is it?

Mr. BRITTEN. That is the resolution that was passed by the House justifying the President in the use of the armed forces of the United States against Mexico, to send them down to Vera Cruz, where more sailors were lost than during the entire Spanish War, and where millions of dollars were spent and unaccounted for.

Mr. FERRIS. The gentleman made a speech on Mexico a while ago. I will ask him not to make a speech in my time.

The SPEAKER. The gentleman declines to yield.

Mr. BRITTEN. Will the gentleman yield for a question?

Mr. FERRIS. I have yielded already for a speech. I do not yield for two speeches. Let the gentleman content himself——

Mr. BRITTEN. I merely want——

The SPEAKER. The gentleman from Oklahoma declines to yield.

Mr. FERRIS. The gentleman from Chicago [Mr. BRITTEN] becomes cantankerous, becomes vociferous, becomes exultant about Mexico. He and the lone Socialist of this House are the only two that failed to vote for the very first one of the preparedness bills. [Applause on the Democratic side.]

Mr. BRITTEN. Yes; and I am proud of it.

Mr. FERRIS. I assume that the Socialist Member does not believe in any preparedness at all. I assume that the gentleman from Chicago wanted to carry around with him a bloody head and crossbones, and just eat up things as he came to them.

Mr. BRITTEN. Will the gentleman yield for a question?

Mr. FERRIS. The gentleman wants to make a speech. I will not yield for a speech.

Mr. BRITTEN. No; I do not.

Mr. FERRIS. All right, go ahead and ask your question.

Mr. BRITTEN. Did the bill which I did not vote for finally pass and become a law?

Mr. FERRIS. It did; the Hay bill became the law. Why, the only two men in this House from the whole country, East, North, South, and West, who refused to vote for the first preparedness bill that came along were the gentleman from Chicago [Mr. BRITTEN] and the lone Socialist Member [Mr. LONDON].

Mr. BRITTEN. Was that bill finally passed?

Mr. FERRIS. The only gentleman of all the membership to vote as the gentleman voted was the gentleman from New York, Mr. LONDON. Does the gentleman deny that? I will give the number.

Mr. BRITTEN. I voted against that bill, and that bill was never enacted——

Mr. FERRIS. I can not yield to the gentleman for a speech. He does not understand the procedure and how bills are actually passed.

Mr. BRITTEN. I am not making a speech; I am making a correction. I assume that the gentleman desires to be correct.

Mr. FERRIS. I will give it to the gentleman correctly.

Mr. BRITTEN. Tell us when that bill was passed.

Mr. FERRIS. I will, with great delight. The first preparedness bill was passed on March 23, 1916. There were 402 Members who voted yea and 2 who voted nay, and the gentleman from Chicago [Mr. BRITTEN] was one of the two to vote nay.

Mr. BRITTEN. When did it become a law?

Mr. FERRIS. I will give you that. It was signed by President Wilson June 15.

Mr. BRITTEN. Not that bill. The gentleman is entirely mistaken.

Mr. FERRIS. I am not mistaken at all.

Mr. BRITTEN. There is no question about it.

Mr. FERRIS. Oh, well, now I have the number. It is H. R. 12776, the preparedness bill. The gentleman is out on a limb, and if he wants to keep on sawing himself off and advertising his own frailties, he may go ahead.

Mr. BRITTEN. It was the Chamberlain bill which became a law, not the bill that passed the House.

Mr. FERRIS. How long has it been since a bill introduced by a Senator has carried a House number—H. R. 12776?

Mr. CARTER of Oklahoma. The gentleman from Illinois is not familiar with the procedure of the House or he would not make that statement.

Mr. DAVIS of Texas. Mr. Speaker——

The SPEAKER. The gentleman from Oklahoma (Mr. FERRIS) has the floor.

Mr. DAVIS of Texas. I just want to suggest to the gentleman a scriptural reply to the gentleman from Illinois. "Answer not a fool according to his folly, lest thou also be like unto him." [Laughter.]

Mr. BRITTEN. Amen!

Mr. FERRIS. I really hope the gentleman will not say that about my friend from Chicago. I am very fond of him. The only trouble about my friend is that he wants to inject a speech on a foreign matter into the speech that I am making.

Mr. BRITTEN. We have no laughingstock on our side of the House.

A MEMBER ON THE DEMOCRATIC SIDE. Oh, yes, you have.

PROSPERITY.

Mr. FERRIS. Prosperity! Mr. Speaker, since my earliest childhood, as a Democrat, usually in the minority, usually laying bare my back to Republican whips and scorns, the oldest din that I can think of that continually sounded in my ears was the assertion by Republicans that "Republicans and prosperity walk hand in hand, and Democrats and disaster walk hand in hand." That is the old platform. We hear none of that now. The once proud party of Lincoln and McKinley has

shriveled up to a party of apology, a party of standpatism and reaction. They are rent with standpatism on one hand, insurgency on the other. Let us see what the facts are:

Wages of railroad employees (all classes).

Average for the seven years under Roosevelt	per day	$2.98
Average for the four years under Taft	do	3.27
Latest available figures (1914) under Wilson	do	3.68

Wages of farm laborers.

Average for four years under Taft:		
With board	per month	$20.05
Without board	do	$28.32
Average for three years under Wilson:		
With board	do	$21.23
Without board	do	$30.11
Total wage earners in manufacturing industries in 1912		6,900,000
Total wages paid in manufacturing industries in 1912		$3,427,000,000
Total wage earners in manufacturing industries in 1916		8,500,000
Total wages paid in manufacturing industries in 1916		$5,280,000,000
Total increase in wage earners in manufacturing industries during Wilson administration		1,600,000
Total increase in wages paid in manufacturing industries during Wilson administration		$1,853,000,000

Under the Roosevelt administration the average wage per day, Mr. Speaker, for railroad employees—from the section hand to the president—was $2.98 per day. For the four years under Taft it was $3.27, and under Wilson it is $3.68 a day. [Applause on the Democratic side.] There never was a time in the history of the Republic when the 25,000,000 laborers and wage earners received more per day and in the aggregate than they do under the Wilson administration and four years of Democratic rule.

Under the four years of Taft the farm laborers got $20.05 a month with board and $28.32 without board. Under Wilson they get $21.23 with board and $30.11 without board. [Applause on the Democratic side.] What has become of this Republican taunt that we always bring calamity under a Democratic administration? What has become of your doughty prophecies? Who of your party longer has courage to make them?

In round numbers the American laborers are receiving $2,000,000,000 more annually than they received under Taft. [Applause on the Democratic side.] Each and every one of them are receiving more per day and in the aggregate than they received under Taft or Roosevelt. This shows they are all employed and receive more wages than ever before.

Mr. FESS. Will the gentleman yield?

Mr. FERRIS. I do not want to yield for a speech, but I will yield for a question.

Mr. FESS. Has the gentleman the figures in relation to laborers in the year 1913 from March 4 to March 4, 1914?

Mr. FERRIS. I have not compiled them for that exact period. I do, however, have them for the seven years under Roosevelt, the four years under Taft, and the three years under Wilson, and it shows up very badly for the gentleman from Ohio and his party. [Applause on the Democratic side.]

Farm products.

	Average price under—		Present price.
	Roosevelt.	Taft.	
Wheat	$0.78	$0.87½	$0.99¾
Corn	.45	.54	.71¼
Oats	.35	.37	.39½

Live stock (Chicago market, high).

	Price under—		Present price.
	Roosevelt.	Taft.	
Cattle	$8.82	$9.73	$11.30
Horses	184.00	202.00	205.00
Hogs	7.23	9.38	9.85

I have here, Mr. Speaker, the average price paid for wheat during the seven years under Roosevelt, the four years under Taft, and almost the four years under Wilson. As above shown, wheat was 78 cents a bushel under Roosevelt, under Taft it was 87½ cents, and the present price in Chicago under Wilson is 99¾ cents, higher than ever before. [Applause on the Democratic side.] The same is true of corn, the same is true of oats, the same is true of wool, the same is true of cattle, the same is true of horses, the same is true of hogs, sheep, and every hoof that trods the farm. [Laughter and applause on the Democratic side.]

Mr. DOWELL. Will the gentleman yield?

Mr. FERRIS. Yes.

Mr. DOWELL. Will the gentleman give the price just prior to the European war?

Mr. FERRIS. I have no figures for that particular period.

GENERAL PROSPERITY.

Railway earnings in 1912	$2,933,000,000
Railway earnings in 1916	3,700,000,000
Total increase in railway earnings in 4 years (26.1%)	767,000,000
Total wealth in 1912	187,000,000,000
Total wealth in 1916	228,000,000,000
Total increase in wealth in 4 years (21.8%)	41,000,000,000
Total manufactured products in 1912	20,672,000,000
Total manufactured products in 1916	30,900,000,000
Total increase in 4 years (49.4%)	10,228,000,000

The railway earnings for 1912, which was the last year of the Republican rule, was $2,933,000,000. The total earnings during the Wilson administration is $3,700,000,000, or an increase of $767,000,000, or 26.1 per cent. The railroads are a pretty good barometer, and they show what is going on, and whether or not the country is in truth and in fact prosperous.

Mr. FESS. Will the gentleman yield?

Mr. FERRIS. I hope the gentleman will let me proceed for a moment. I have not much time and the House has been very generous to give me this.

The total wealth of the country in 1912, the last year of the Republican administration, was one hundred and eighty-seven billions. Under the Wilson administration and Democratic rule it is two hundred and twenty-eight billions. [Applause on the Democratic side.] And that is an increase of $41,000,000,000, or 21.8 per cent. Democrats on my side of the aisle, I pause and ask you is there anyone here that has to go with bowed-down head to apologize for the four years of Wilson and Democratic rule? [Cries of "No!" "No!"] Can the Republican Party, the party of McKinley and Lincoln, longer say that success of Democracy means disaster, disruption, and panic? No! In truth and in fact, the country is prosperous as it has never been before. A healthy condition of affairs is everywhere present. No one can doubt it or deny it. It is a fact.

Now take the total manufactured products. They say that we tear up business; they say Democrats are hostile to business. Let us see if we are. I want to be no part of a party that tears up business; I want to be no part of a party that tears up labor. I desire for myself and my party to stand shoulder to shoulder with honest business, with honest commerce, honest labor, that all combined go to make up a party that moves forward, not backward, and that is precisely what we are doing. [Applause on the Democratic side.]

The total manufactured products of 1912 was twenty billion six hundred and seventy-two million. The total manufactured products during the last year under Wilson is thirty billion nine hundred millions, an increase of 49.4 per cent.

Mr. COOPER of Wisconsin. How much of it is munitions?

Mr. FERRIS. I have got that too.

The SPEAKER. The Chair will state that it is against the rule for any Member to speak without rising in his seat.

Mr. COOPER of Wisconsin. Will the gentleman from Oklahoma please give what portion of that aggregate is munitions of war?

Mr. FERRIS. Not much of it. Only a very small per cent of it.

Mr. DIXON. I can give it to the gentleman. A little less than 3 per cent.

Mr. COOPER of Wisconsin. The gentleman from Indiana could with equal solemnity have said that it was one-half of 1 per cent, but it would not establish anything. I want it from the record.

Mr. FERRIS. Mr. Speaker, I hope the gentleman will let me proceed.

Mr. DIXON. Mr. Speaker, the Department of Commerce gave the totals, and the total was less than 3 per cent of the total manufactures in the United States, as shown by Mr. McGILLICUDDY, in his speech, in RECORD of July 14, 1916, for the 10 months ending April, 1916.

The SPEAKER. The time of the gentleman from Oklahoma has expired.

Mr. MANN. How much more time does the gentleman want?

Mr. FERRIS. The gentleman might make his request for 30 minutes. I do not think that I shall use all of it.

Mr. MANN. I ask unanimous consent that the gentleman may proceed for 30 minutes more.

The SPEAKER. The gentleman from Illinois [Mr. MANN] asks unanimous consent that the gentleman from Oklahoma

[Mr. FERRIS] may continue not to exceed 30 minutes. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, if I may be permitted, I wish now to ask unanimous consent that at the conclusion of the remarks of the gentleman from Oklahoma the gentleman from Ohio, Mr. Fess, may proceed for 25 minutes.

The SPEAKER. The gentleman from Illinois [Mr. MANN] asks unanimous consent that at the conclusion of the remarks of the gentleman from Oklahoma, the gentleman from Ohio, Mr. FESS, may be permitted to proceed for 30 minutes.

Mr. RAKER. Twenty-five?

The SPEAKER. Well, we will give him 30. [Laughter.] Is there objection?

There was no objection.

Mr. FERRIS. Mr. Speaker, let us look at the financial condition of the country, under Wilson, the Underwood law, and the new Federal reserve act. Let us see if we Democrats tear up everything. The Comptroller of the Currency, in his report of March 1, 1916, reports the total resources of the national banks of the country $13,830,000,000. This exceeds by $370,000,000 the greatest resources ever recorded in the history of the Republic. [Applause on the Democratic side.]

BANKING CONDITIONS.

Our resources increased in a single year, from March 1, 1915, to March 1, 1916, $2,271,000,000, and the single year's increase is greater than the combined assets of the Reichsbank of Germany as reported in 1916. The aggregate resources as shown by the Comptroller of the Currency of banks of the United States exceed by $3,000,000,000 the combined resources of the central banks of England, France, Russia, Germany, the Netherlands, Switzerland, and Japan. [Applause on the Democratic side.] What has become of the old slogan, Democratic success and panic? Who is bold enough to make it in the face of these conditions?

PROSPERITY NOT LOCAL BUT GENERAL.

The bank deposits of the New England States have increased during the four years of the Wilson administration 31 per cent.

The bank deposits of the Dakotas, Nebraska, Kansas, Montana, Wyoming, Colorado, New Mexico, and Oklahoma have increased during the same period 42 per cent.

Our opponents on the other side of the aisle are persistently asserting that the prosperity we now enjoy is due to the war. If the prosperity were local among the New England States and the States engaged in munitions manufacturing this might be true, but the facts are that the New England bank deposits only increased 39 per cent during the Wilson administration, while the bank deposits in the Middle Western States, of the Dakotas, Nebraska, Kansas, Montana, Wyoming, Colorado, New Mexico, and Oklahoma have increased 42 per cent during that period. The new State of Oklahoma, standing alone, has increased her bank deposits 100 per cent during that time. I pause and ask the American House of Representatives to-day, What effect has the war on the group of Middle Western States just mentioned? In all probability, a greater era of prosperity will follow the war for this country than has existed during the war. The present prosperity in the country is not local, is not due to the manufacture of munitions, but is a healthy, normal growth under a prudent, energetic, faithful, capable administration of governmental affairs, and in common justice and in common decency every thoughtful man will accord to the Wilson administration credit for bringing about such results.

PREPAREDNESS FOR NATIONAL DEFENSE—ARMY APPROPRIATIONS.

The bill for the national defense (H. R. 12776, Sixty-fourth Congress, first session) passed the House March 23, 1916, 402 to 2. One hundred and ninety-four Democrats voted yes, no Democrat voted no; 198 Republicans voted yes, 1 Republican and 1 Socialist voted no. (See p. 5432, temporary RECORD.) Passed Senate April 18, 1916, without roll call. (See p. 7291, temporary RECORD.) Signed by President Wilson June 5, 1916.

The Army appropriation bill (H. R. 16460, Sixty-fourth Congress, first session) passed House June 26, 1916, without roll call or division. (See p. 11537, temporary RECORD.) Reported by Senate committee.

Army bill as passed the House	$182,303,356.10
Army bill as reported by Senate committee	330,599,010.10
Estimated final amount	256,451,183.10
Fortifications bill	25,747,550.00
Military Academy bill	2,238,328.57
Nitrate plant	20,000,000.00
Militia encampments	200,000.00
Sundry civil bill	12,876,495.00
Deficiency bills	37,456,818.56
	354,970,375.23
Contracts	13,800,000.00
	368,770,375.23

Let us now take up the question of preparedness and see about that. Over in Chicago the Republicans had just two prominent planks in their platform. One was, "Resolved, That we must get Theodore Roosevelt back into the tent," and the other was that the Democrats had not done enough toward preparedness for national defense. They may accomplish the first plank, although I am not sure about that. The gentleman who has been hidden away in the cyclone cellar of the Supreme Court for the last six years has not told us much as yet about Theodore. We do not know whether he is going to satisfy Theodore or not; but surely they can not when the facts are known make much headway in assailing us upon the question of preparedness. Let us see what the Wilson administration has actually accomplished on preparedness for the national defense. The first bill that we passed on preparedness was the bill H. R. 12776, and 402 members voted for it and 2 against it.

That bill authorized the President to recruit 210,000 Regulars and 450,000 militiamen, or a total of 660,000 for an Army. You can not get them to enlist. In peace times it is impossible to recruit that many men. Republicans, you can not get them. No living man or party can recruit them. We provided for a larger Army than any party or set of men can recruit. What more do you want? Let us see what else we did. We appropriated for the Army and in contracts for which the Government is bound, carried in the different appropriation bills, counting the amount that we appropriated in the Army appropriation bill, which has not yet passed the Senate, and taking the difference between that and the amount reported to the Senate, $368,770,375.23. The largest appropriation made in peace times by a Republican Congress was for the fiscal year of 1910, which was $111,802,515.67. This is $256,967,859.56 more than you ever appropriated. Still, in your platform and on this floor you assail us and charge that we are weak on our preparedness program. As a result of the 16 years of your incumbency in power you had an Army of about 80,000 men. We now have an Army of 216,600 men in the paid service of the United States. We have appropriated nearly three times as much, twice as much as the largest amount we ever appropriated in time of peace. Still you say that we have not appropriated enough for preparedness. [Applause on the Democratic side.]

NAVY APPROPRIATIONS.

The naval appropriation bill (H. R. 15947, 64th Cong., 1st sess.) passed House June 2, 1916. One hundred and ninety-one Democrats voted yes; no Democrat voted no; 169 Republicans voted yes; 2 Republicans, 1 Socialist, and 1 Prohibitionist voted no. (See p. 10447, temporary RECORD.) On Senate Calendar.

Navy bill as passed House	$269,996,254.00
Navy bill as reported by Senate committee	315,720,516.54
Estimated final amount	292,857,485.27
Deficiency bills	4,525,117.00
Total	297,382,602.27
Contracts	225,243,000.00
	522,625,602.27

Comparative appropriations for defense.

Great Britain makes largest navy appropriation in peace times (1913)	$237,530,495.00
Ditto for war times (1915)	260,714,275.00
Largest naval appropriation by United States in peace times (1916)	149,818,563.00
Ditto for war times (1899)	119,921,780.00

Let us see about the Navy. The naval bill passed the House, but has not yet passed the Senate, but it has been reported. It passed the House providing for $269,000,000 plus. It is reported to the Senate with $315,000,000 plus. Estimating that it will become a law halfway between the two, it will carry $292,000,000 plus $4,000,000 in the deficiency bill, and plus $225,000,000 in contracts, and that will make us appropriate this year $522,000,000 for naval preparedness. The largest appropriation ever made by a Republican Congress for the Navy was for the fiscal year 1910, which carried $136,935,199.05. Still you say that we have not done anything for preparedness. Still you assail us. Still you publish in your partisan press that the country is lacking in proper defense. Still you allege we are unpatriotic in not doing more. Adding to the Army appropriations the naval appropriations, we have appropriated almost a billion dollars in a single session of Congress for preparedness alone, and still the Republicans assail and abuse us, asserting we should do more. Still they move to recommit our bills and seek to add to it.

My answer to all these unfounded charges is, that we have appropriated more money than we can obtain men to enlist and spend. My answer is, we are not in favor of enforced service in times of peace. My answer is, we have appropriated enough if not too much to suit the taxpayers, and that your charges are unfounded and political in their scope. Our program will not please the ultrapreparedness advocate who believes in compulsory service and a continental army, nor will it please the bland-faced pacifist who does not believe in any Army or Navy

tration, appropriating almost a billion dollars for the Army and the Navy in a single session for preparedness, will please the great bulk of the thinking people of this Republic, and that they will approve our course at the next election. [Applause on the Democratic side.]

Total naval expenditures by principal naval powers.

Fiscal year—	Great Britain (Apr. 1 to Mar. 31).	United States (July 1 to June 30).	Germany (April to March).	France (January to December).
1900-1901	$145,792,850	$61,721,695	$37,173,074	$72,683,180
1901-2	150,599,190	68,438,301	46,315,800	67,079,011
1902-3	150,679,328	82,977,641	48,818,700	59,217,558
1903-4	173,548,058	104,126,192	50,544,000	59,740,222
1904-5	179,138,049	116,655,826	49,110,300	60,178,623
1905-6	161,117,947	109,725,059	54,918,000	61,565,779
1906-7	152,954,342	98,392,144	58,344,300	59,514,296
1907-8	151,880,617	117,353,474	69,133,500	60,685,813
1908-9	156,401,161	120,421,579	80,737,626	62,194,916
1909-10	181,936,341	122,247,355	95,047,820	64,899,589
1910-11	202,056,258	111,791,980	103,302,773	74,102,439
1911-12	211,596,296	133,559,071	107,178,480	80,371,109
1912-13	224,443,296	129,787,233	109,989,096	81,692,832
1913-14	237,530,459	136,858,301	112,091,125	90,164,625
1914-15	260,714,275	141,872,786	113,993,329	123,828,872

Fiscal year—	Russia (January to December).	Italy (July 1 to June 30).	Japan (April to March).	Total.
1900-1901	$42,101,212	$23,829,206		
1901-2	45,488,462	23,875,532	$21,373,954	$423,140,250
1902-3	50,769,465	23,522,400	17,654,528	433,639,620
1903-4	60,018,895	23,522,400	17,553,279	489,053,046
1904-5	58,076,543	24,300,000	10,018,024	497,477,365
1905-6	60,228,444	24,494,400	11,378,202	483,427,831
1906-7	60,703,557	25,865,668	30,072,061	485,846,368
1907-8	43,012,166	27,516,454	35,124,346	504,706,370
1908-9	49,682,482	30,453,697	39,347,332	539,238,793
1909-10	58,059,040	31,812,885	35,005,719	589,008,759
1910-11	46,520,465	40,505,204	36,889,158	615,258,277
1911-12	56,680,915	40,780,987	42,944,329	673,111,187
1912-13	82,019,633	41,893,420	46,510,216	716,335,726
1913-14	117,508,657	49,550,147	48,105,152	791,808,466
1914-15	128,954,733	56,920,440	69,111,653	895,396,083

Let us by way of comparison for just a moment see what Great Britain has done along the line of preparedness. The largest amount Great Britain ever appropriated for the navy in time of peace in one year was for the years 1913–14 $237,000,000. We will appropriate fully $300,000,000 this year. The greatest amount that Great Britain ever appropriated in time of war was in 1914–15, $260,000,000, and still we have passed a bill in the House carrying $269,000,000, and it has been raised in the Senate to $315,000,000.

Mr. Speaker, is it possible that the party of Jefferson and the party of Wilson want compulsory service in order to use up this money? I do not believe it. Are you on the Republican side going to advocate compulsory service? I do not believe there is anyone over there brave enough to do it, unless it is the gentleman from Massachusetts [Mr. GARDNER]. Fortunately Mr. GARDNER is not to have his way on preparedness at this time. If the militarists, the war-mad rabble, could have their way, the Nation would be bankrupt, the Treasury would be bare; we would have universal compulsory service; we would have militarism stalking abroad amongst us, a thing that God forbid may ever come to pass at any time in a Republic like our own. [Applause on the Democratic side.]

Estimated casualties of the European war, including killed, wounded, and missing up to July 1, 1916.

France	2,000,000
Germany	2,500,000
Austria	2,000,000
Russia	5,000,000
Great Britain	620,000
Italy	175,000
Servia	228,000
Belgium	160,000
Turkey	350,000
Total	13,033,000

I want now to speak a moment about the foreign policy. I have here some figures on the casualties of the European war.

Did you know, my friends, that France has lost over 2,000,000 men, the flower of the country? Did you know that Germany has lost over 2,500,000 men, the flower of the country? Did you know that Austria has lost over 2,000,000 men, the flower of their country? That Russia has lost 5,000,000 men, Great Britain 620,000, the flower of their country? Italy 175,000 men, the flower of their country? Servia 228,000 men, the flower of their country? Belgium 160,000 men, the flower of their country? And Turkey 350,000 men? A total of 13,033,000 men, more than six times the population of my entire State.

Warships sunk or lost in European war.

Country.	Number.	Tonnage.
Japan	5	7,581
France	20	38,407
Italy	10	32,405
Russia	7	22,641
Turkey	12	17,903
Austria	11	9,392
Germany	102	263,011
England	90	498,638
Total	257	889,978

Do you know that this war has not been alone on land and sea, but under the sea and in the air? Did you know that Japan had lost 5 ships, with a tonnage of 7,581? Did you know that France had lost 20 ships, with a tonnage of 38,407? Italy 10, with a tonnage of 32,405? Russia 7, with a tonnage of 22,641? Turkey 12, with a tonnage of 17,903? Austria 11, with a tonnage of 9,392? Germany 102, with a tonnage of 263,011? England 90, with a tonnage of 498,638; or a total tonnage of 889,978?

FOREIGN POLICY.

Friends, I pause and digress long enough to say that I want no war either for myself, my party, or my country, with any country in the world. [Applause on the Democratic side.] It is easy for the minority on the eve of an election to go out and scold and charge the President with infidelity, or lack of faith, or lack of judgment, or lack of courage, or whatever they may charge him with. But I want to tell you that the American people are not listening to what you say, or your nominee for the Presidency may say, but they are listening to-day to Woodrow Wilson, and you know it. [Applause on the Democratic side.] The Republicans say Wilson has been weak and vacillating in Mexico. I deny it; he has been strong at every turn of the road. It requires little strength to join the rabble and do wrong, but it takes strength and character to do right when it is more popular to do wrong. There have been, I confess, times when I wondered myself if the President ought not to go in there, but there have been ten thousand times against those few times in my own mind when I thanked God he did not go in there. [Applause on the Democratic side.]

What credit would it be for us to whip Mexico? With what credit can a giant Republic, with 100,000,000 population, jump at the throat of a weakling Republic of 15,000,000—half starved, half naked, 90 per cent of them ignoramuses, illiterate, who can neither read nor write; treasury bare; people homeless; hopes wrecked and blasted? What glory could we attain by taking Mexico? Who feels proud when a giant whips a cripple? Who applauds when a man strikes a child? Here stands the American Republic as a giant oak of all the world in health, wealth, peace, prosperity, and good sense. What glory may we attain, what history can we make that is worth while, by sending our boys down into the sagebrush and alkali flats of Mexico to chase about a little handful of starved, inferior, ignorant, illiterate people? We would not get any credit from any person or nation on earth if we went down there and whipped them, and personally I only favor going in when it is sure that Mexico will really be benefited by our going.

And, friends, there are some other people that enter into this war equation. There are in the United States 20,000,000 school children that kiss their father and mother good-by each morning during the scholastic year. War of any sort is bad for those 20,000,000 children, and it could not be good for them. War is bad for every mother and father of those 20,000,000 children, and you know it. I tell you that as we go back down the pages of history and find the names of men who are worthy to have a place there, they have not been men who have been trying to push the Republic into war, but they have been men who tried to keep the Republic out of war, and there can be no question about that.

They say Wilson has been patient. He has. But Washington was patient; Lincoln was patient; Jefferson was patient; McKinley was patient; and I thank God, Mr. Speaker, we have a President who is patient, who is careful, who is thoughtful. The very hope of those who love peace, prosperity, progress, and the welfare of this great Nation clings to him and stands behind him. [Loud applause on the Democratic side.]

The SPEAKER pro tempore. The gentleman from Ohio [Mr. FESS] is recognized for 30 minutes.

Mr. LONDON. Mr. Speaker, I ask unanimous consent that I may address the House for 30 minutes after the gentleman from Ohio is through with his address.

The SPEAKER pro tempore. The gentleman from New York asks unanimous consent that at the conclusion of the remarks of the gentleman from Ohio he be permitted to address the House for 30 minutes. Is there objection? [After a pause.] The Chair hears none.

THE TARIFF AND THE INCOME TAX.

Mr. FESS. Mr. Speaker and Members of the House, I think we have all been more or less edified by the address of the gentleman from Oklahoma [Mr. FERRIS]. It has been a detailed statement of what he regards as the achievements of the present administration. I will not say that it was an attempt, just preceding the opening of a campaign, to set forth the views of the Democratic side on the issues that are before the people. I rather think that that is the purpose of it, but I do not so assert now. I should not have asked the minority leader to request time to speak now if it had not been for the latter part of the speech of my friend, in which he did not decline to answer my question, but the answer was not satisfactory. And when I asked the second question, or was about to ask it, he did not care to be interrupted and did not yield, which was his right, and, of course, meant no disrespect to me.

But when a Member of this House will arise in his place and state, upon his own responsibility, that the present industrial condition is due to Democratic legislation, it is time for somebody to indicate some of the facts pertaining to the situation. [Applause on the Republican side.] I want to say to my friend from Oklahoma that he can not get anywhere on that kind of statement. The American people are not going to be deluded or deceived. When the Underwood bill was under discussion there was a clear, concise debate between the proponents of two theories of taxation, the one the theory of "revenue only," and the other the theory of protection of American industries, which under Republican rule always gets the revenue necessary with which to run the Government. The most recent concrete example is the Payne law, that not only raised the necessary revenue, but enabled us to construct the Panama Canal in addition. [Applause on the Republican side.] And we predicted from this place here when the Underwood bill was under discussion that if the bill as written would go upon the statute books this country would see a season of depression like unto what we saw 20 years ago under the Wilson bill of 1894. That prediction was made, and it was not made by politicians. It was made by students of the economic movements of the country. What happened? The Underwood bill went into effect October 4, 1913. The author of it said it would do four things, specifying them, and I am here to state it failed to do any one of the four things. It failed in every one of them. It did not reduce the cost of living; it did not produce the necessary revenue; it did disturb business; and it decreased our export trade. And now my friend arises and says that to-day the country, under the Underwood bill and Democratic administration, is seeing prosperity the like of which we have never known before. He has cited figures to prove that the present prosperity is due to legislation and is therefore permanent.

That statement must have an explanation, because it is not a prosperity the like of which the country has never seen before. It is a prosperity that is enjoyed only in spots, and other places are not prosperous, and that means that the prosperity is spasmodic, dependent upon a temporary condition that will not continue when the temporary causes are removed. [Applause on the Republican side.]

Mr. GARNER. Mr. Speaker, will the gentleman yield?

Mr. FESS. I will.

Mr. GARNER. Does the gentleman from Ohio contend seriously that this country is not in a prosperous condition?

Mr. FESS. I contend that this prosperity is not universal. It depends upon a condition that will end sooner or later, and the prosperity must end with it.

Mr. GARNER. But that does not answer me.

Mr. FESS. There is no place in the country where to-day everybody is prosperous, and there are other places where nobody is prosperous to-day.

Mr. GARNER. Will the gentleman from Ohio mind stating some period in the history of our country when we had more universal prosperity than we have to-day?

Mr. FESS. There is no prosperity in the lumbering districts of the coasts. There is more suffering in certain sections of the lumbering regions, and there is not altogether prosperity in the cotton districts that you yourself represent. There is a falling off of $216,000,000 of exports in cotton in seven months during this year. That is because the product of cotton does not respond to the demands of war as to peace in Europe and necessarily is not so universally sold, not only in one section but in other sections, simply because the consumptive demand is spasmodic. Much of the cotton is used for guncotton, making explosives, and so on, but not enough to take the place of the demand in times of peace. The bulk of it is here to stimulate home manufactures. If it were not so, you would suffer the more.

Now, fellow Members of this House, there is prosperity of a certain type; but I want my friend from Texas [Mr. GARNER], who interrupted me, to remember that that prosperity was distress up to August 1, 1914. There never was a time in our history when in our country there were so many idle cars as there were in the summer of 1914. The railroad business was in distress, and, unable to deny it, you blamed the Interstate Commerce Commission. [Applause on the Republican side.] There was never a time in the country when there were such long trains of soup houses as there were in the days of the Underwood bill, preceding the war in Europe. The bread lines were appalling, and the President suggested a Federal employment bureau as a relief.

Mr. GARNER. I do not think that is so.

Mr. FESS. I say it is so.

Mr. GARNER. If the gentleman will permit me, I was called at the telephone, and I am going to answer that call, and must leave the Chamber now. I am not prepared to dispute the statements that the gentleman has made. They probably are true, but they were not made at the time. I think the explanation of the gentleman's statement can be made just as one was made of the remarks of the gentleman from Oklahoma [Mr. FERRIS].

Mr. FESS. The trend of the Industrial Commission report was that 325,000 idle men were walking the streets of New York alone in search of employment. That was but one city. Democratic Congressmen stated from this floor that many businesses were running at a loss to keep their organizations together.

Mr. SLOAN. The fact is that the year 1915 registered more business failures in this country than any other year in the history of the Republic.

Mr. FESS. Yes; and the number of business failures in the year 1916 will register a higher number than last year, if the present proportion keeps up.

Mr. HARRISON. Mr. Speaker, will the gentleman yield?

Mr. FESS. Yes.

Mr. HARRISON. Has the gentleman compared that depression with the depression that existed during the Roosevelt administration?

Mr. FESS. We had no depression like that under the Roosevelt administration. The only other similar season was that which followed the Wilson law 20 years ago.

Mr. SLOAN. I would like to say that I have made such an inquiry, and the number of failures in business last year vastly exceeds those in the year the gentleman refers to.

Mr. FESS. I call on gentlemen who hear me to note these facts: The gentleman from Indiana [Mr. DIXON] interjected a statement a moment ago to the effect that the war orders amounted to only 3 per cent——

Mr. DIXON. Mr. Speaker, will the gentleman allow me to interrupt him?

Mr. FESS. Yes.

Mr. DIXON. My statement was that the exportation of munitions of war amounted to less than 3 per cent of the total manufactured products in the United States. I did not add—but I have investigated the statement made by the gentleman from Maine [Mr. MCGILLICUDDY]—that it was in the last 10 months.

Mr. FESS. Now, here is the deception and the wicked misinformation of such statements as that—statements that are true to the letter and viciously untrue to the spirit. Munitions of war; what are they? Firearms, gunpowder, explosives (outside of dynamite), cartridges; those are articles properly denominated munitions of war, and, of course, there is not a great proportion of munitions of war compared with all the other manufactures of the country. I have no doubt that it will be below 3 per cent. But we are talking about the prosperity of the country due to the war orders, due to the circumstances of war, as expressed in the channels of trade specifically in exports, and you answer us by saying that the export of munitions is less than 3 per cent, and pretend to deny that the present spasm of prosperity is due to war. You do not take into consideration the materials out of which the munitions are made. Of course, these are not munitions—are not so classified. You do not take into consideration the supplies that go to the 30,000,000 soldiers yonder in the field and trench. They are not munitions, but they are war orders. You do not take into consideration the textile manufactures, blankets, uniforms, cotton and woolen fabrics that must go to the soldiers. You do not take into consideration the foodstuffs to feed, and feed well, the greatest armies ever arrayed in battle line. You do not take into consideration the forage—hay, oats, cotton meal and cake.

Mr. LONGWORTH. And horses——

Mr. BRITTEN. And cattle and automobiles.

Mr. FESS. Listen to these details excluded from munitions but included in war orders: The materials for making munitions of war are lead, zinc, brass, brass manufactures, wire rods, steel billets, metal-working machinery—none of them in themselves munitions of war, and yet, at the opening of the war in Europe, we sold in nine months ending May 31, 1914, about $16,300,000 worth. In the second year of the war we sold in the same period $62,000,000 worth, or 387 per cent of an increase, and between August, 1915, and February of this year we have sold $128,000,000 worth, or 790 per cent of an increase in seven months of this year over nine months of the year when the war began; and that is only material out of which munitions are made. I have not been able to secure the figures since February; it would simply be fabulous.

Then you take war supplies. These are horses, mules, harness, saddles, aeroplanes, commercial automobiles, tires, wagons gas oil, fuel oil, barbed wire, horseshoes, surgical instruments, and drugs. Those are not munitions, and will not be classed in the 3 per cent; but those are war supplies that, were it not for the war, we would not be selling to them. It would take a bold man to deny that these items of export are due to legislation. Before the war, in the before-mentioned period, we sold only $25,800,000. The first year of the war, during the nine-month period, we sold $147,000,000, an increase of 587 per cent, and the seven months from August, 1915, to February, 1916, we sold $272,000,000, an increase of 900 per cent. [Applause on the Republican side.]

And then when you come to textile manufactures, which you do not call munitions—of course they are not munitions—there are blankets, woolens, knit goods, cotton goods, uniforms, rags, and so forth. The sale in the nine-month period before the war was $5,300,000. The nine months of the first year of the war the sales were $35,000,000, a gain of 700 per cent, and $49,000,000 for the seven-month period of this year, a gain of 990 per cent over what we sold before the war. If it were not for the war these increases could not be demanded and would not be realized. [Applause on the Republican side.]

Hides, leathers, footwear, the nine-month period the year before the war we sold but $20,600,000. The same period the first year of the war we sold $60,000,000, an increase of about 300 per cent, and the seven months of this year $130,000,000, an increase of 650 per cent. [Applause on the Republican side.]

Mr. LONGWORTH. Will my colleague yield there?

Mr. FESS. I will yield to my colleague, with pleasure.

Mr. LONGWORTH. In illustration of what the gentleman is saying, he refers to machine tools. The fact is that on the 1st of August, 1914, the machine-tool industry of this country was working at less than 20 per cent capacity. From then on until now it has been working 100 per cent capacity on foreign orders alone.

Mr. FESS. And I will say to my friend from Cincinnati that what is true there is true in every line of activity where the demand has come from the blood-soaked fields of Europe. It would not be true if it were not for that. It employs labor at good wages, for war makes abnormal profits. But it is a sort of prosperity that no Republican would boast about. [Applause on the Republican side.]

Foodstuffs: The nine-month period of the year before the war, $218,000,000; the similar period of the first year of the war, $627,000,000, foodstuffs sold by the farmers. Here is an increase of 290 per cent. How long will it continue after the war closes? I have not the figures for this year. Why, my friend would say, in fact the Democrats boldly declare, that the increase of sales yonder in Europe is due to Democratic legislation, is because of the Democratic administration; that the increase of sales to Asiatic Russia is due to Democratic administration. Gentlemen of the House, I appeal to Members on both sides of the aisle. The sales this year to Asiatic Russia are more than 10,000 per cent greater than they were the year before the war. Is it possible that any man here would ascribe this to Democracy as now led? [Applause on the Republican side.]

When my friend from Indiana [Mr. DIXON] rises to reply, with the suggestion that this great exportation is not due to the war, but is due to activity in business, and will say in his argument that the exports of war munitions are but 3 per cent of our total export he misleads this House. [Applause on the Republican side.] I do not say he would do it intentionally, because I think more of him than that, but it is a statement that is true to the letter. In other words, he means to say to the country that prosperity is not due to the war. Munitions of war are under the terminology of firearms, gunpowder, cartridges, explosives, and these are but a very small proportion of the great demand caused by the war in Europe, and neither he nor any other man must confine his munitions of war, when we talk of war prosperity, to such items as those. That is cheap and beneath the position of any man on this floor, and much more is it below the head of any Cabinet department, although he may be the mere publicity agent of the administration. [Applause on the Republican side.]

Gentlemen of the House, I should not have entered this debate had it not been for this studied attempt upon the part of our Democratic friends to cloud the mind of the public upon the issue of prosperity. It was done by the distinguished Member from Oklahoma; it even was done by the keynoters of Democracy, when such men as the distinguished Senator from Kentucky, Senator JAMES, declared on the political platform that Woodrow Wilson had brought prosperity to all of the 100,000,000 people of our country. The President himself has given utterance to such conclusions, and his Secretary of Commerce is elaborating upon the issue.

These utterances are in sharp contrast with those preceding the war, when the situation was more psychological.

Mr. GREEN of Iowa. Will the gentleman yield there?

Mr. FESS. I will gladly yield to my friend from Iowa.

Mr. GREEN of Iowa. I presume my friend from Ohio has also noticed that wherever the articles exported could not be used in connection with the war, the amount of the exports has fallen off greatly.

Mr. FESS. Always. I am just entering upon that phase of the question.

Mr. GREEN of Iowa. For instance, the exports of agricultural implements for the fiscal year ending June 30, 1916, are only half what they were before the war.

Mr. FESS. That is exactly what I am coming to next. Exports not included under the head of war supplies or the classification I gave a moment ago amounted in the nine-month period of 1914 to $1,529,255,000. These are the exports not used by the soldiers and were before the war. In 1915, during same period, they amounted to but $1,146,742,000, a decrease of $382,000,000; these are outside of war supplies. And if you ask me what are the items of the decrease I will enumerate them for you. In the seven months that I have given exportations of cotton decreased $216,000,000; iron and steel, $17,000,000; agricultural implements, $20,000,000; lumber and manufactures of wood, $41,000,000; copper, $36,000,000. These are some of the items of the $382,000,000 loss.

And yet the increase in the price of copper has made up for the loss, because the manufacturers of munitions in our own country took the raw copper to make into the war orders that they sold in Europe. Consequently there is not as much loss there. But it is a loss of exportation of copper. War orders increased as much as 1,000 per cent, while goods not used for war decreased 30 per cent. Why is this? When the debate on the Underwood bill opened it was clearly stated what would follow. Depreciation followed its passage, capital was sensitive, business distressed, labor on the street, soup houses installed, exports decreasing, imports increasing, balance of trade against us, gold going out of the country to pay the balance against us; your party suggested a pool of gold to take care of the gold to prevent its going out of the country. I said then from this floor:

> You can not keep the gold from going out of the country until you turn the balance of trade in our favor, and that can not come by the Underwood bill.

Mr. HARRISON. Will the gentleman yield?

Mr. FESS. I will yield to my friend from Mississippi.

Mr. HARRISON. Is it not a fact that during the first four months after the passage of the Underwood bill our balance of trade showed an increase over the corresponding period under the Payne-Aldrich bill of $38,000,000.

Mr. FESS. I will give the gentleman the figures exactly.

Mr. HARRISON. Was it not $38,000,000?

Mr. FESS. I will give the gentleman the figures precisely. I have them here, and will find them in a moment. Had I known I would enter the debate, I would have had my data here in order.

Mr. BRITTEN. Will the gentleman yield just at that point?

Mr. FESS. I will to my friend from Illinois.

Mr. BRITTEN. Does not the gentleman recall very distinctly that during the first seven months after the passage of the Underwood bill a deficit was shown between our exports and imports ranging each month from $500,000 up to $9,000,000 in June or July—a deficit between our exports and imports? There is no question about that.

Mr. FESS. I will give my friend the figures. I have them here. In October, 1913, when the law went into effect, the excess of exports over imports was $138,976,000; in November

the excess of exports—that is, the balance of trade in our favor—was $97,333,000, a falling off of $40,000,000. In December the excess was $48,900,000, a falling off of $50,000,000. In January, 1914, the excess was $49,715,000, a slight increase; in February, $25,948,000, a falling off of $23,000,000; in March, $4,736,000, a falling off of $20,000,000; in April we had an excess of imports over exports, the first time in 21 years that the balance of trade was against us, to the amount of $11,345,000, and in May $2,500,000, in June $457,000, in July $5,553,000, and in August $19,398,000. And then the war was on. Immediately a new explanation was supplied for Democratic conditions. It was all due to the war, notwithstanding the perfect duplication of the days of 1894, when the Wilson law, the predecessor of the Underwood bill, was on the statute books.

Now, what happened? After the war my friend's party said that the imports were cut off and we were therefore embarrassed in the lack of receipts of the Treasury, and that we ought to pay a direct stamp tax in the form of a war tax, and you came in and levied that rather than to issue bonds to meet the deficit, as you met the inevitable Democratic results in 1895.

Then what happened? Imports fell off for a time, but not long. The losses of trade were soon all open on the sea, and imports this year increased until to-day the imports are way beyond what the average monthly imports had been before the war. This is the purpose of Democratic legislation—buy in Europe instead of America. Whenever you increase under Democratic administration the imports you fail to increase the revenue accordingly, because of the manner in which you pay the duties. We are at this very day increasing imports, but we are not increasing revenue, and you propose to make it up by a direct tax. [Applause on the Republican side.] That is the reason I would not vote for your direct-tax law.

Mr. HARRISON. Will the gentleman yield?

Mr. FESS. Certainly.

Mr. HARRISON. Why did not the gentleman read the corresponding period under the Taft administration of the Payne law?

Mr. FESS. We had no balance of trade against us during any time under the Payne-Aldrich bill. [Applause on the Republican side.]

Mr. HARRISON. Does the gentleman deny that the facts show that during the first four months after the passage of the Underwood tariff law we had a balance of trade of $38,000,000 more than under the Payne-Aldrich law?

Mr. FESS. I read the gentleman the figures, which show a balance against us under the Underwood bill—not so under Republican legislation.

Mr. HARRISON. The gentleman read something that did not show that at all.

Mr. FESS. Oh, my friend, you can not get away from the fact that the Underwood bill is a failure as a revenue producer, and we will rewrite it. You are increasing imports now, and, my soul, what will happen when the war is over and 30,000,000 of soldiers to-day that are consumers, and as such are the world's greatest market for export trade, and not producers, as we are in this country, these 30,000,000 representing 150,000,000 other people in the families, when these cease to buy our products and our exports are cut off, and they become producers instead of consumers and flood this country under your Underwood bill, what will happen then? [Applause on the Republican side.]

I know that you are trying to get out from under a load. You are offering a tariff commission. For what purpose? To delay the inevitable that comes when you have got to revise your revenue law. You are offering an antidumping clause that you ridiculed, you are offering a protective item of the dyestuffs which is not sufficient, I fear, to be real protection, and you are undertaking to excuse before the public the weakness of that law. That law will condemn you, and it will have to be rewritten just as sure as you sit in those seats. [Applause on the Republican side.]

In the last account there was in warring Europe a bonded indebtedness of $28,000,000,000, an increase since August 1, 1914, and in that bonded indebtedness Great Britain had about ten and one-half billions. Yesterday's paper announced another floating of a loan, and when that loan is floated Great Britain's bonded indebtedness since the 1st of August will be thirteen billions four hundred and ten millions. Where does that money come from? The Government floated it, it is a bonded indebtedness; that is, it is Government or public debt. That money expended by the Government of Great Britain was to pay for American goods—for what purpose? To supply the soldiers. When those soldiers cease to be consumers, and then come to produce. Great Britain will be careful not to buy from us, but to produce herself and sell to us to recoup herself. [Applause on the Republican side.]

But that is only one country, Great Britain. That does not take in France, with over ten billion dollars of bonded indebtedness since the war began, nor does it take in Italy or Russia. England is spending thirty millions of dollars a day, and much of it is used to buy American goods. What will be the current of trade when this war ends? How much will she buy? She will then make and sell.

The SPEAKER. The time of the gentleman from Ohio has expired.

Mr. GREENE of Massachusetts. Mr. Speaker, I ask unanimous consent that the gentleman from Ohio may proceed for 10 minutes.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent that the gentleman from Ohio may proceed for 10 minutes. Is there objection?

There was no objection.

Mr. LONGWORTH. Will the gentleman yield?

Mr. FESS. Certainly.

Mr. LONGWORTH. The gentleman from Mississippi asked the gentleman from Ohio a question with regard to the four months under the Underwood tariff law. Of course, the fair comparison to make is the period of the Underwood law until the war started and compare that with a like period under the Payne-Aldrich bill. The fact is that under the Underwood law, from its beginning until the 1st of August, 1914, the imports had increased 10 per cent and the exports had fallen off more than 30 per cent.

Mr. FESS. I thank my colleague for the statement. To be specific, the first seven months preceding the breaking out of the war the imports increased $122,000,000 and the exports decreased $126,000,000, making a difference of a loss to American labor of $248,000,000, a sum sufficient to employ three-quarters of a million men for seven months at $2.50 a day. Then they ask why the depression at that time. It was Democratic legislation. [Applause on the Republican side.]

Mr. HELGESEN. Will the gentleman yield?

Mr. FESS. Yes. I yield to my friend from North Dakota.

Mr. HELGESEN. The gentleman from Mississippi said that the first four months under the Underwood law there was a larger balance of trade in our favor than under the corresponding period of the Payne-Aldrich law. Is it not equally true that whenever the importers anticipate a reduction of the tariff they always hold up imports, and then there is a flood come in which will create these conditions temporarily, but they never last?

Mr. FESS. That is true. Mr. Speaker, Edmund Burke was the greatest English statesman of his time, and he once made a striking comment; he said, "No man can ever be a great lawyer that confines himself to technicalities." The insistence of my friend from Mississippi [Mr. HARRISON] that one item can be employed to announce a principle is technical.

And I want to declare to my friend—and there is no better legislator on this floor than the gentleman from Mississippi [Mr. HARRISON]—you can not establish a general principle by picking out one particular incident. What I am driving home is that your law is wrong, and the history of the administration already has proved it to be wrong—you admitted it when you suspended its operations on sugar—and that law never can be the instrument through which the readjustment can come after the war. [Applause on the Republican side.]

Mr. HARRISON. Mr. Speaker, will the gentleman yield?

Mr. FESS. Yes; gladly.

Mr. HARRISON. The gentleman would not repeal the Underwood law and put in its place the old Payne law, would he?

Mr. FESS. Just as quickly as I could do it, yes, if that were necessary in order to repeal the present law. [Applause on the Republican side.]

Mr. HARRISON. I notice that there is loud applause on the Republican side of the House.

Mr. FESS. My friends over on the Democratic side have constantly indicated that our side of the House is afraid of a protective tariff. I do not care whether you call it a McKinley bill or a Dingley bill or a Payne bill. I do not want you to call it a Wilson bill or an Underwood bill. [Applause on the Republican side.] The Wilson and the Underwood bills are written from the English free-trade system viewpoint. These other bills are written from the American protective system viewpoint. [Applause on the Republican side.] You can not find incidental fault with this or that schedule, as you say in your platform, and I am wondering that my friends will talk about the Democratic platform in this Congress. I said to one of the best Democrats in this House, "Do not you think it is out of order to talk about a Democratic platform in this Congress?" and he said, "Of course it is"; but he would not say that out loud, though he said it to me. But I have no intention to discuss the general Democratic situation, save as it touches upon the issue now in dispute.

Mr. ADAIR. Mr. Speaker, will the gentleman yield?

Mr. FESS. Yes; I will gladly yield to my friend from Indiana.

Mr. ADAIR. Does not the gentleman believe that the basis of the division and the defeat of the Republican Party was the passage of the Payne bill?

Mr. FESS. The defeat of the Republican Party in 1912 was because of a division in our ranks and went even beyond tariff legislation. Tariff legislation had something to do with it, but if we made a mistake then, by fighting among ourselves instead of the common enemy, we will not be so unwise as to make another mistake like that. Present indications are sufficient evidence.

Mr. ADAIR. The election in 1910, when this House was changed from a Republican House with 100 majority to a Democratic House with 140 majority, was due to the passage of the Payne bill, was it not?

Mr. FESS. When you say it changed from a Republican majority of 100 to a Democratic majority of 142 I desire to remind you that in 1914 we changed from a Democratic majority of 145 to a Democratic majority of a mere 24, and that in an off year, with all the prestige of the administration. [Applause on the Republican side.]

Mr. BRITTEN. Was that change due to the Underwood bill?

Mr. FESS. It certainly was, and that is only an earnest of what will be done to our Democratic friends on the 7th of November next.

Mr. BARKLEY. Give it to us straight, Doctor.

The SPEAKER. It is improper for a gentleman to interrupt another without getting his permission.

Mr. FESS. Oh, that was a sotto voce remark, Mr. Speaker; a mere pleasantry.

The SPEAKER. That is true, but it is bad practice.

Mr. FESS. Here is another feature to which I desire to call attention. It is fundamental in this discussion. For the 10 months ending April, 1913, under a Republican law, our total imports amounted to $1,548,000,000, or $174,361,000 less than for the period just passed, which showed imports of $1,722,400,000, but the revenues put in the Treasury were $274,000,000 during the period under the Payne law, or nearly $100,000,000 more under the Republican tariff than under the Democratic law of to-day. If the old law were still in force you would have collected $294,000,000 in the present 10 months, and you would not have need to saddle upon the country a special tax—an English system toward which the Democratic Party is rapidly taking itself. Whenever anyone talks about the heinousness and iniquity of placing taxation at one place rather than at all places, making it equitable instead of sectional, you gentlemen on the Democratic side jump to your feet and shout, "Are you not in favor of an income tax?" Why, certainly I am. I was vice president of the Ohio constitutional convention, and as a member of it I forced the reconsideration and saved the income tax and inheritance tax clause in the Ohio constitution; but I do not want the Federal Government to invade the rights of the States, not because of the principle of State rights so much as the necessity of State taxation, to take from the States their source of revenue, until we see whether the States can get along without it. These forms of taxation are properly State—it is direct—but national taxation should be general. Then, if I were in favor of the Federal Government doing it, I would not play the demagogue by refusing to put the tax on an equitable basis. If taxation is justifiable, and we all hold it is, it should be general, not sectional. Why should you put the exception at $3,000 or at $4,000? Why are you not brave enough to put it so that it will be a tax on most of the people? You could take the rate of one-quarter of 1 per cent from $1,500 to $2,000, one-half of 1 per cent from $2,000 to $3,000, and a rate of 1 per cent from $3,000 to $4,000, and then go on up in the scale, making the rate higher as the incomes become higher; but why do you start at a high figure? I am afraid it looks as though you have the election in mind—that you want votes—and I do not think it is dignified on the part of men in this body. [Applause on the Republican side.] I am in favor of an income tax. I voted for it in Ohio, but I do not want the American Congress, dominated by States that pay little incomes, to saddle the income tax upon the few States for the benefit of the many States without income under the guise of the needs of the Federal Government.

The SPEAKER. The time of the gentleman from Ohio has expired.

Mr. FESS. I would like to have five minutes more.

Mr. GREENE of Massachusetts. Mr. Speaker, I ask unanimous consent that the gentleman may proceed for 10 minutes.

Mr. FESS. Five minutes would be enough.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent that the gentleman from Ohio may proceed for 10 minutes. Is there objection?

There was no objection.

Mr. ADAIR. Is the gentleman in favor of repealing the income-tax law, and, if his party succeeds next November, will he vote to repeal it?

Mr. FESS. We will repeal your phase of it and write an income tax which is equitable. It will not be an income tax that will exclude the State of Mississippi, the State of Louisiana, or any other State and saddle the burden upon the State of Michigan or the State of Ohio or the State of New York. [Applause on the Republican side.] I know that this does not seem very courteous to some of my friends, but I have been impressed with the fact that there is a tendency upon the Democratic side of the House in control of the Government, that is voting money out of the Treasury like water, to put very little of it back into the Treasury. That I do not like.

Mr. BARKLEY. Mr. Speaker, will the gentleman yield?

Mr. FESS. In a moment. You say that is sectional. I did not make it sectional. You say that is not fair because there are Democratic Members from the North. Oh, I know there are Democratic Members from the North, but they are mere vermiform appendices to the Democratic Party that is ruling the country. [Applause and laughter on the Republican side.]

Mr. BARKLEY. I gather from the gentleman's remark that his objection to the present income tax is not only that it is a Federal tax but also that it does not tax the poor man on his income.

Mr. FESS. Who does the gentleman call the poor man?

Mr. BARKLEY. I would call a poor man, comparatively speaking, a man who makes anywhere from two to three or four thousand dollars a year, who has a family to support and children to educate. [Laughter.]

Mr. FESS. Well, that is more than I ever made before I got to be a Member of Congress. I have managed to educate my family.

Mr. BARKLEY. I am not speaking about the man who works for a dollar or a dollar and a half a day, but I am speaking of the man as compared to the average income of the people of the United States.

Mr. FESS. Mr. Speaker, I am going to say now what I had intended not to say. I have heard statements from the Democratic side of the House that we must make those who possess pay for those who do not possess. That statement, if properly interpreted, might be all right. But the meaning our present legislation suggests is most significant to me.

This Government extends its protection to all alike, and all are to be regarded equal under the law, but the Democratic side of the House has been legislating to discriminate, making a law to apply to one and to exempt another. So long as I am in this House I will not vote for a law that will treat one man as a criminal if he does one thing and will exempt another man if he does the same thing. That is un-American, and has in it the seeds of national danger. [Applause on the Republican side.]

Mr. BARKLEY. Will the gentleman very frankly answer me the question, How low would you reduce the exemption if you desire a reduction below what it is now?

Mr. FESS. If I were writing the income tax, I would make one-fourth of 1 per cent from $1,500 to $2,000 exemption; then one-half per cent from $2,000 to $3,000; then 1 per cent from $3,000 up to $4,000; and then on up. In other words, I would not try to exclude a great mass of voters in order to get their votes. [Applause on the Republican side.]

Mr. BARKLEY. Now, if your theory is correct, then all men who are protected by the Government ought to pay an income tax in proportion to the protection they receive and income which they are able to pay.

Mr. FESS. They ought to pay taxes. I do not say an income tax. They should realize that they owe the Government something for the protection it affords.

Mr. BARKLEY. According to your theory, why put an arbitrary limit of $2,000? Why not make all men pay income tax?

Mr. FESS. I believe that $1,000 exemption or $1,500 exemption would be about what a person might live on if he exercised reasonable frugality, and he could pay the small amount of one-fourth of 1 per cent without any harm or much burden to him. I do not want to enter into this more than simply to make the statement that I have made. The truth about the matter is that we are legislating without regard to equity. We are legislating too much for popularity and getting votes, and that I do not like.

Mr. BARKLEY. Does not the gentleman know, if he has investigated the matter, that the man who owns $1,000 or $2,000 or $5,000 worth of property makes an income of one or two or even three thousand dollars a year, pays very much more in proportion to his wealth than the rich man for the local expenses of State, county, and city government, and averaging these things up makes this an equitable tax?

Mr. FESS. We increase the rates as they go up. I said that was all right. But I am opposed to regarding a tax as a penalty; it ought to be looked upon as a duty.

Mr. BARKLEY. In proportion to their wealth, do they not escape taxation for local purposes?

Mr. FESS. I would like to say to the membership of this House, without being personal, that I can not have any sympathy with this sort of twaddle, that a man ought to be exempt from burdens of support of the Government in return for the protection of the Government. We must come to the place where the Government is worth something beyond being milked. We must not look to the Government to get something out of the Treasury.

It is a patriotic duty for us to pay something to the Treasury. That is a thing we ought to teach, and I do not like this idea of saying the Government owes me a living, that it does not make any difference what I do, how I spend my time, the Government owes me a living anyway. The Government owes nobody a living. The Government is not different from the individual and it is not something separate from the individuals that compose it. The only thing the Government owes you and me is an opportunity to make the most out of our lives, and, with that opportunity made good, we have served our Government and the Government has protected us while we did it. [Applause on the Republican side].

Mr. McKELLER. The gentleman says he does not believe in the milking process. Does the gentleman know of any better milking process in the world than a protective tariff?

Mr. FESS. Well, the protective tariff is a process by which you as the consumer pay less for the opportunity to produce under a protective tariff than you pay for the article under your Underwood bill. [Applause on the Republican side.] There is not any statement that is more patent. It is demonstrated by scores of examples that I can here repeat. You may laugh, but you laugh at your own misunderstanding. Did you not pay less for sugar under the Payne bill than you pay under the Underwood bill? Now, why do you not laugh?

A MEMBER. The Underwood bill did not raise the price.

Mr. FESS. What did raise it? Is it the war? If it is the war, why is it not the war that produces your prosperity, instead of your Democratic administration? You can talk one way and look another, but you can take either horn of the dilemma you want to. If the Democratic administration is raising the price of the goods you are selling, it raises the price of the goods you are buying, does it not?

Mr. ADAIR. May I ask the gentleman another question?

Mr. FESS. You may.

Mr. ADAIR. I believe we also bought wool cheaper under the Payne law than under the Underwood bill?

Mr FESS. Whenever you discourage the production of any article and reduce the amount of it, without the demand for it being reduced, your price increases. You discourage the production of wool by placing it on the free list and the demand is no less, but may increase; the inevitable law will make the price go up. [Applause on the Republican side.]

Mr. BARKLEY. How does the gentleman explain it?

The SPEAKER. The time of the gentleman from Ohio has again expired.

FRANCHISES OF PORTO RICO (S. DOC. NO. 502).

The SPEAKER laid before the House the following message from the President of the United States, which, with the accompanying papers, was referred to the Committee on Insular Affairs and ordered printed:

To the Senate and House of Representatives:

As required by section 32 of the act of Congress approved April 12, 1900, entitled "An act temporarily to provide revenues and a civil government for Porto Rico, and for other purposes," I have the honor to transmit herewith certified copies of the franchises granted by the Executive Council of Porto Rico, which are described in the accompanying letter from the Secretary of War transmitting them to me.

WOODROW WILSON.

THE WHITE HOUSE, *July 19, 1916.*

EXPORTATION OF MUNITIONS OF WAR.

Mr. DIXON. Mr. Speaker, I ask unanimous consent to address the House for three minutes.

The SPEAKER. The Chair wishes to admonish the House that in these hot political debates, where every gentleman wants to dip in, the rule is that gentlemen must not sit in their seats and interject remarks into the speech of the gentleman who has the floor. Some of the oldest Members of the House are the worst sinners in that respect. There is a reason for all these rules. The reason for that rule is that it creates disorder, in the first place, and, in the second place, the man who has the floor, in the full tide of his remarks, half the time does not hear the question clearly, and it puts him at a disadvantage. The Chair hopes gentlemen will refrain from that practice. The gentleman from Indiana [Mr. DIXON] asks unanimous consent to address the House for three minutes. Is there objection?

There was no objection.

Mr. DIXON. Mr. Speaker, I made the statement that the exportation of munitions of war during the 10 months of 1916 represented less than 3 per cent, in fact 2⅞ per cent, of the total manufactures of the United States. This was shown in a statement of exports of specified articles from the Department of Commerce and inserted in the speech of Mr. MCGILLICUDDY in the RECORD of July 14, 1916. The gentleman from Ohio [Mr. FESS], who has just taken his seat, said the statement was probably true in fact, but deceptive, in that my statement as to munitions of war would necessarily be limited to explosives and firearms.

For the purpose of informing the House as to the character of those exportations, I desire to read the list: Aluminum and manufactures of aluminum, brass and manufactures of brass, aeroplanes and parts thereof, automobiles and parts thereof, cars, carriages, and other vehicles, and parts thereof, copper and manufactures of copper, electrical machinery, explosives, automobiles and tires, firearms, locomotives, metal-working machinery, including metal-working machine tools, rails for railways, wire, manufactures of iron and steel not specially provided for, boots and shoes, harness and saddles, wool, wearing apparel, uniforms, blankets, zinc spelter and manufactures thereof. The exportation of these enumerated articles for 10 months ending April, 1914, prior to the European war, amounted to $291,375,227. For the same 10 months ending April, 1916, the exportations were $1,169,673,842; the difference, $878,298,615. That amount represents less than 3 per cent of the total manufactures in the United States. [Applause.] The total value of our manufactures for the 10 months ending April, 1916, is estimated to be $33,000,000,000.

Mr. CANNON. Mr. Speaker, will the gentleman allow me a question?

The SPEAKER. Does the gentleman from Indiana yield to the gentleman from Illinois?

Mr. DIXON. Yes.

Mr. CANNON. What became of the other 97½ per cent of the manufactures if those amounted to only 2½ per cent?

Mr. DIXON. The people of the United States were so prosperous that they bought all of our manufactures not exported.

Mr. CANNON. Oh, it was a home market, then, that took it in?

Mr. DIXON. Yes. I insert the table of articles and value of exportations from which I read:

United States exports of specified articles during the 10 months ending April, 1914 and 1916.

Article.	10 months ending—	
	1914	1916
Aluminum, and manufacture of	$968,763	$4,297,666
Brass, and manufactures of	6,295,169	103,431,985
Aeroplanes, and parts of	194,001	6,270,110
Automobiles, and parts of	27,148,281	101,390,939
Cars, carriages, other vehicles, and parts of	43,215,657	141,018,915
Copper, and manufactures of copper	122,928,698	128,473,558
Electric machinery, etc	21,569,687	23,666,267
Explosives	5,471,247	336,113,157
Automobiles, tires	2,683,344	14,618,062
Firearms	3,012,237	13,315,971
Locomotives, steam	3,272,822	11,559,108
Metal-working machinery, including metal-working machine tools	11,695,959	42,913,241
Rails for railways	9,441,220	14,394,044
Wire	6,620,014	30,589,626
Manufactures of iron or steel, n. s. p. f	15,224,228	106,268,753
Boots and shoes, men's	8,763,371	31,628,027
Harness and saddles	612,793	4,118,126
Wool wearing apparel, uniforms and blankets	1,930,031	18,841,722
Zinc spelter, and manufactures of	327,705	36,764,565
Total	291,375,227	1,169,673,842
Deduct 1914 exports		291,375,227
Estimated total war exports		878,298,615

The SPEAKER. The gentleman from New York [Mr. LONDON] is recognized for 20 minutes by special order of the House.

[Mr. LONDON addressed the House. See Appendix.]

EXTENSION OF ACT RELATING TO HOMESTEADS.

Mr. GANDY. Mr. Speaker, I ask unanimous consent for the present consideration of House joint resolution 247, and before that question is put I ask unanimous consent to address the House for one minute.

The SPEAKER. The gentleman from South Dakota asks unanimous consent to address the House for one minute. Is there objection?

There was no objection.

Mr. GANDY. Mr. Speaker, I want to say to the gentlemen of the House by way of explanation of this resolution that we have a peculiar situation existing at this time in the public-land States of the West. There are a large number of homesteaders who have been called into the Army. We have adequate law on the statute books to protect them in their homestead rights, in their claims to land, if a state of war exists; but a state of war does not exist, and I say to you gentlemen of the House that if these young men are to be kept from home more than six months not one has a valid defense in a contest on the charge of abandonment. This resolution which I seek to bring up extends the act granting leave of absence with credit, which was passed during the Spanish-American War in 1898. I ask for its consideration so that the homesteaders that have been taken away from home in the West will not suffer by their absence.

The SPEAKER. Is there objection?

Mr. FOSTER. Mr. Speaker, reserving the right to object, I do not know what arrangements have been made in reference to passing these bills, but gentlemen who have been in charge of the House here have requested that we do not bring up these matters at this time. Unless the gentleman has made some arrangement to-day I do not feel that we ought to take this up at this time when it was understood that there would be no business transacted except the speeches that have been made.

Mr. GANDY. Let me say, Mr. Speaker, that this matter has been taken up with the majority leader and the minority leader, and they both understood that this resolution was to be called up at the conclusion of these speeches.

Mr. FOSTER. If that is the case I will not object.

The SPEAKER. The gentleman from South Dakota asks unanimous consent for the present consideration of the joint resolution. Is there objection?

Mr. STEENERSON. Reserving the right to object, I would like to ask the gentleman if this resolution has been reported by the committee?

Mr. GANDY. It has.

Mr. STEENERSON. Does the gentleman think that the urgency is very great? The six months have not begun to run yet, and these homesteads may not be in danger for six months.

Mr. GANDY. I will say to the gentleman from Minnesota that he is familiar with the length of time that it takes to get matters of this sort through both Houses.

Mr. STEENERSON. Does the gentleman anticipate that these young men will be absent more than six months in the service?

Mr. GANDY. I can not say; they have been mustered into the service of the United States.

Mr. STEENERSON. Well, I have a number of young men constituents, who have homesteads, and I will not object if the matter has been reported by the committee and is here regularly.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will read the resolution.

The Clerk read as follows:

Joint resolution (H. J. Res. 247) extending the provisions of the act approved June 16, 1898.

Resolved, etc., That the provisions of the act approved June 16, 1898 (30 Stat. L., 473), shall be applicable in all cases of military service rendered in connection with operations in Mexico, or along the borders thereof, whether such service be in the regular military or naval organization of the United States or the militia of the several States.

With the following committee amendment:

Page 1, line 8, after the word "thereof," insert "or in mobilization camps elsewhere."

Mr. GANDY. Mr. Speaker, I ask unanimous consent that the resolution may be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from South Dakota asks unanimous consent that the resolution be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The committee amendment was agreed to.

Mr. GANDY. Mr. Speaker, I offer the following amendments.

The Clerk read as follows:

Page 1, line 9, after the word "the," strike out the word "regular"; page 1, line 10, after the word "the," strike out the word "militia" and insert "National Guard"; and in line 10, after the word "States," insert the following: "now or hereafter in the service of the United States.

The amendments were severally agreed to.

The joint resolution as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. GANDY, a motion to reconsider the vote whereby the joint resolution was passed was laid on the table.

EXTENSION OF REMARKS.

Mr. McCRACKEN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Idaho asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. FOSTER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 37 minutes p. m.) the House, under its previous order, adjourned until Tuesday, July 25, 1916, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting a letter from the Chief of Engineers, United States Army, dated 18th instant, together with copy of report from Maj. G. B. Pillsbury, Corps of Engineers, dated July 26, 1915, and copy of report from Lieut. Col. C. H. McKinstry, Corps of Engineers, dated April 18, 1916, with maps, on preliminary examination and survey, respectively, of Branford Harbor, Conn., made in compliance with the provisions of the river and harbor act approved March 4, 1915 (H. Doc. No. 1292); to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

2. A letter from the Secretary of War, transmitting a letter from the Chief of Engineers of the United States Army, together with copies of reports from Lieut. Col. (now Col.) J. E. Kuhn, Corps of Engineers, and Col. G. A. Zinn, Corps of Engineers, with maps, on preliminary examination and survey, respectively, of Delaware breakwater and harbor of refuge, Delaware Bay, Del. (H. Doc. No. 1293); to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

3. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the secretary and executive officer of the Commission of Fine Arts, of this date, submitting an additional estimate of appropriation in the sum of $5,000 for expense of the commission for the fiscal year ending June 30, 1917 (H. Doc. No. 1289, pt. 2); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. STEDMAN, from the Committee on Foreign Affairs, to which was referred the bill (S. 649) making appropriation for expenses incurred under the treaty of Washington, reported the same without amendment, accompanied by a report (No. 1004), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (S. 2543) for the relief of the State of Kentucky, reported the same without amendment, accompanied by a report (No. 1005), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. CANTRILL, from the Committee on Industrial Arts and Expositions, to which was referred the joint resolution (H. J. Res. 252) authorizing the transfer of the Government exhibit, or such portion thereof as the President may determine is advisable, now at the Panama-California International Exposition at San Diego, Cal., to the Mississippi Centennial Exposition at Gulfport, Miss., reported the same with amendment, accompanied by a report (No. 1006), which said joint resolution and report were referred to the Committee of the Whole House on the state of the Union.

Mr. FLOOD, from the Committee on Foreign Affairs, to which was referred the joint resolution (H. J. Res. 253) authorizing the President of the United States to invite the Latin American countries to participate in the Mississippi Centennial Exposition to be held at Gulfport, Miss., reported the same without amendment, accompanied by a report (No. 1007), which said joint resolution and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill (S. 3264) to authorize the payment of an indemnity to the Norwegian Government for the detention of three subjects of Norway in Hudson County, N. J., reported the same without amendment, accompanied by a report (No. 1028), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the joint resolution (H. J. Res. 235) to authorize the President of the United States to convey to the foreign governments participating in the Panama-Pacific International Exposition the grateful appreciation of the Government and the people of the United States, reported the same with amendment, accompanied by a report (No. 1029), which said joint resolution and report were referred to the House Calendar.

Mr. RAGSDALE, from the Committee on the District of Columbia, to which was referred the bill (H. R. 12035) to provide for the abandonment of Piney Branch Road between Allison Street and Buchanan Street NW., in the District of Columbia, reported the same without amendment, accompanied by a report (No. 1031), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. NICHOLLS of South Carolina, from the Committee on Military Affairs, to which was referred the bill (H. R. 8229) to establish a national military park at the battle field of Guilford Courthouse, reported the same with amendment, accompanied by a report (No. 1032), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (H. R. 15076) granting to the widow of Col. David Du B. Gaillard authority to place, in his memory, a tablet in the Memorial Amphitheater at Arlington, Va., reported the same without amendment, accompanied by a report (No. 1033), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and a resolution were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. TIMBERLAKE, from the Committee on the Public Lands, to which was referred the bill (H. R. 16744) to validate the homestead entry of William H. Engle for certain land in Colorado, reported the same with amendment, accompanied by a report (No. 1008), which said bill and report were referred to the Private Calendar.

Mr. FOSTER, from the Committee on Claims, to which was referred the bill (H. R. 16116) for the relief of the widow of Robert M. Gibbs, reported the same with amendment, accompanied by a report (No. 1009), which said bill and report were referred to the Private Calendar.

Mr. FIELDS, from the Committee on Military Affairs, to which was referred the bill (H. R. 8970) for the relief of James H. C. Mann, reported the same without amendment, accompanied by a report (No. 1010), which said bill and report were referred to the Private Calendar.

Mr. SWIFT, from the Committee on Claims, to which was referred the bill (H. R. 4517) for the relief of Fred E. Jackson, reported the same with amendment, accompanied by a report (No. 1011), which said bill and report were referred to the Private Calendar.

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (H. R. 2204) for the relief of Andrew M. Dunlop, reported the same with amendment, accompanied by a report (No. 1012), which said bill and report were referred to the Private Calendar.

Mr. STEAGALL, from the Committee on Claims, to which was referred the bill (H. R. 14345) to reimburse J. B. Patterson, postmaster of Lacon, Morgan County, Ala., for certain postage stamps stolen, reported the same without amendment, accompanied by a report (No. 1013), which said bill and report were referred to the Private Calendar.

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (S. 5441) for the relief of the heirs of Albert Sidney Johnston, reported the same without amendment, accompanied by a report (No. 1014), which said bill and report were referred to the Private Calendar.

Mr. RUSSELL of Ohio, from the Committee on Claims, to which was referred the bill (H. R. 13820) for the relief of Mrs. Jennie Buttner, reported the same without amendment, accompanied by a report (No. 1015), which said bill and report were referred to the Private Calendar.

Mr. MILLER of Delaware, from the Committee on Claims, to which was referred the bill (H. R. 14571) for the relief of the Milwaukee Bridge Co., reported the same with amendment, accompanied by a report (No. 1016), which said bill and report were referred to the Private Calendar.

Mr. McKENZIE, from the Committee on Military Affairs, to which was referred the bill (H. R. 1093) to correct the military record of James Anderson, reported the same with amendment, accompanied by a report (No. 1017), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 8411) for the relief of James R. McGuire, reported the same with amendment, accompanied by a report (No. 1018), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 5221) for the relief of Thomas E. Philips, reported the same without amendment, accompanied by a report (No. 1019), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 1867) granting an honorable discharge to John Berrin, reported the same with amendment, accompanied by a report (No. 1020), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 7045) for the relief of Caleb T. Holland, reported the same with amendment, accompanied by a report (No. 1021), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 7763) for the relief of Stephen J. Simpson, reported the same with amendment, accompanied by a report (No. 1022), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 3223) for the relief of John W. Baggott, reported the same without amendment, accompanied by a report (No. 1023), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 5689) to correct the military record of Thomas J. Temple, reported the same with amendment, accompanied by a report (No. 1024), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 4360) to amend the military record of George W. Laland, reported the same with amendment, accompanied by a report (No. 1025), which said bill and report were referred to the Private Calendar.

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the resolution (H. Res. 318) referring the bill H. R. 16951, for the relief of George Welty, to the Court of Claims, reported the same without amendment, accompanied by a report (No. 1026), which said bill and report were referred to the Private Calendar.

Mr. MILLER of Delaware, from the Committee on Claims, to which was referred the resolution (H. Res. 319) referring the bill H. R. 11807, for the relief of Cary B. Moore, to the Court of Claims, reported the same without amendment, accompanied by a report (No. 1027), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Military Affairs was discharged from the consideration of the bill (H. R. 16980) for the relief of Edward N. Carr, and the same was referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. MUDD: A bill (H. R. 17078) for the acquisition of a site for a public building at Laurel, Md.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 17079) for the acquisition of a site for a public building at Ellicott City, Md.; to the Committee on Public Buildings and Grounds.

By Mr. RAINEY: A bill (H. R. 17080) to provide for the erection of a public building in the city of Havana, Ill.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 17081) to provide for the erection of a public building in the city of Carrollton, Ill.; to the Committee on Pubic Buildings and Grounds.

By Mr. BELL: A bill (H. R. 17082) giving the consent of the United States for the bringing of certain suits in the Supreme Court of the United States; to the Committee on the Judiciary.

By Mr. TAYLOR of Colorado: A bill (H. R. 17083) granting 50,000 acres of land to the State of Colorado for the use of the State normal school at Gunnison, Colo.; to the Committee on the Public Lands.

By Mr. ADAMSON: A bill (H. R. 17084) to amend an act entitled "An act to prevent cruelty to animals while in transit by railroad or other means of transportation from one State or Territory or the District of Columbia into or through another State or Territory or the District of Columbia, and repealing sections 4386, 4387, 4388, 4389, and 4390 of the United States Revised Statutes," approved June 29, 1906; to the Committee on Interstate and Foreign Commerce.

By Mr. SINNOTT: A bill (H. R. 17085) to permit homestead and desert-land entry on lands withdrawn for reclamation purposes; to the Committee on the Public Lands.

By Mr. HULBERT: A bill (H. R. 17086) to prevent and punish the desecration of the United States flag; to the Committee on the Judiciary.

By Mr. LOUD: A bill (H. R. 17087) to amend sections 2 and 13 of an act entitled "An act to promote the welfare of American seamen," etc., approved March 4, 1915; to the Committee on the Merchant Marine and Fisheries.

By Mr. CANTRILL: A bill (H. R. 17088) to authorize the city of Winchester, Ky., to divert water from the pool in the Kentucky River formed by Lock and Dam No. 10; to the Committee on Interstate and Foreign Commerce.

By Mr. SLOAN: A bill (H. R. 17089) to fix the term for which members of the National Guard in certain States, Territories, and the District of Columbia shall serve under their enlistment in the United States service; to the Committee on Military Affairs.

By Mr. RAKER: A bill (H. R. 17090) to provide for the sinking of artesian wells, and for other purposes; to the Committee on the Public Lands.

By Mr. OLNEY: A bill (H. R. 17091) authorizing the Secretary of War to donate to A. St. John Chambre Post 72, Department of Massachusetts, Grand Army of the Republic, of Stoughton, in the county of Norfolk and Commonwealth of Massachusetts, two bronze or brass cannon or fieldpieces; to the Committee on Military Affairs.

By Mr. MADDEN: Resolution (H. Res. 316) calling on the President for information as to the efficiency of the National Guard and the sufficiency of its equipment; to the Committee on Military Affairs.

By Mr. BENNET: Resolution (H. Res. 317) directing the Secretary of Labor to furnish certain information in relation to Ellis Island; to the Committee on Immigration and Naturalization.

Also, resolution (H. Res. 320) requesting information of the Secretary of War as to the statutes under which the major general commanding the Department of the East issued orders relative to Col. Conley and Lieut. Col. Phelan, of the New York National Guard; to the Committee on Military Affairs.

By Mr. JAMES: Resolution (H. Res. 321) directing the Secretary of State to negotiate a treaty with the Government of Russia defining the status of former subjects of Russia who have become American citizens; to the Committee on Foreign Affairs.

By Mr. BURNETT: Joint resolution (H. J. Res. 271) authorizing the Secretary of War to loan, issue, or use, and to purchase quartermaster's and medical supplies for the relief of destitute persons in the districts overflowed by the Alabama and other rivers of Alabama and their tributaries; to the Committee on Military Affairs.

By Mr. LEE: Joint resolution (H. J. Res. 272) authorizing the Secretary of War to loan, issue, or use and to purchase quartermaster's and medical supplies for the relief of destitute persons in the district overflowed by the Coosa River and its tributaries; to the Committee on Military Affairs.

By Mr. TIMBERLAKE: Joint resolution (H. J. Res. 273) to grant the free mailing privilege to all the members of the National Guard of the several States now serving on the southern border; to the Committee on the Post Office and Post Roads.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BELL: A bill (H. R. 17092) granting a pension to Arthur Culbertson; to the Committee on Pensions.

By Mr. BLACKMON: A bill (H. R. 17093) granting a pension to Herbert S Coheley; to the Committee on Invalid Pensions.

By Mr. BOWERS: A bill (H. R. 17094) granting a pension to William C. Shaffer; to the Committee on Pensions.

Also, a bill (H. R. 17095) for the relief of Charles Price; to the Committee on War Claims.

By Mr. CLINE: A bill (H. R. 17096) granting an increase of pension to Bethnel J. Goff; to the Committee on Invalid Pensions.

Also, a bill (H. R. 17097) for the relief of Bony Bengert; to the Committee on Military Affairs.

By Mr. DAVIS of Minnesota: A bill (H. R. 17098) granting an increase of pension to Highland S. Eldred; to the Committee on Invalid Pensions.

By Mr. DOWELL: A bill (H. R. 17099) granting an increase of pension to Robert E. Ewing; to the Committee on Invalid Pensions.

By Mr. EAGAN: A bill (H. R. 17100) granting an increase of pension to Hermann Schroeder; to the Committee on Invalid Pensions.

By Mr. FIELDS: A bill (H. R. 17101) granting an increase of pension to E. C. Roll; to the Committee on Invalid Pensions.

By Mr. GOULD: A bill (H. R. 17102) granting a widow's pension to Ida May Harrison; to the Committee on Invalid Pensions.

By Mr. HERNANDEZ: A bill (H. R. 17103) to correct the military record of Edubigen Atencio; to the Committee on Military Affairs.

By Mr. HOWARD: A bill (H. R. 17104) for the relief of W. H. Baldwin; to the Committee on Claims.

By Mr. JAMES: A bill (H. R. 17105) granting a pension to Mrs. Anna Knechtges; to the Committee on Invalid Pensions.

By Mr. KEY of Ohio: A bill (H. R. 17106) granting an increase of pension to Sanford U. Early; to the Committee on Invalid Pensions.

By Mr. KING: A bill (H. R. 17107) granting an increase of pension to Arthur C. Shrewsbury; to the Committee on Invalid Pensions.

Also, a bill (H. R. 17108) granting an increase of pension to Lewis L. Cummings; to the Committee on Pensions.

By Mr. LAFEAN: A bill (H. R. 17109) granting an increase of pension to Joseph Taylor; to the Committee on Invalid Pensions.

By Mr. MILLER of Delaware: A bill (H. R. 17110) granting an increase of pension to Thomas R. Henthorn; to the Committee on Invalid Pensions.

By Mr. OAKEY: A bill (H. R. 17111) granting an increase of pension to Margaret McManus; to the Committee on Invalid Pensions.

By Mr. PARK: A bill (H. R. 17112) for the relief of J. B. Jemison & Co., of Thomasville, Ga.; to the Committee on Claims.

By Mr. ROWE: A bill (H. R. 17113) for the relief of Andrew Gaffney; to the Committee on Military Affairs.

By Mr. RUSSELL of Missouri: A bill (H. R. 17114) granting an increase of pension to George W. Mayden; to the Committee on Invalid Pensions.

Also, a bill (H. R. 17115) granting an increase of pension to Tilson M. Sutherland; to the Committee on Invalid Pensions.

By Mr. SPARKMAN: A bill (H. R. 17116) granting a pension to Charles R. Nichols; to the Committee on Pensions.

Also, a bill (H. R. 17117) granting an increase of pension to Deliah J. Johnson; to the Committee on Pensions.

By Mr. SUTHERLAND: A bill (H. R. 17118) granting an increase of pension to Edward M. Costolo; to the Committee on Invalid Pensions.

Also, a bill (H. R. 17119) granting an increase of pension to George A. Liston; to the Committee on Invalid Pensions.

By Mr. SWIFT: A bill (H. R. 17120) granting a pension to Albert V. Lawson; to the Committee on Pensions.

By Mr. TIMBERLAKE: A bill (H. R. 17121) granting a pension to Olive M. Bagley; to the Committee on Pensions.

By Mr. YOUNG of North Dakota: A bill (H. R. 17122) granting an increase of pension to Barbara Johnson; to the Committee on Pensions.

By Mr. STEPHENS [from the Committee on Claims]: Resolution (H. Res. 318) referring the bill H. R. 16951, for the relief of George Welty, with the accompanying papers, to the Court of Claims; to the Committee of the Whole House.

By Mr. MILLER of Delaware: Resolution (H. Res. 319) referring the bill H. R. 11807, for the relief of Cary B. Moore,

with the accompanying papers, to the Court of Claims; to the Committee of the Whole House.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of the Merchants' Association, of New York, relative to day-light saving throughout the United States; to the Committee on Labor.

By Mr. CAREW: Petition of Chicago Liquor Dealers' Protective Association relative to tax on land values; to the Committee on Ways and Means.

By Mr. COLEMAN: Petition of Tabernacle Presbyterian Church, of Pittsburgh, Pa., against interstate transmission of race-gambling odds and bets; to the Committee on the Judiciary.

By Mr. CONNELLY: Petition of Sundry citizens of Colby, Kans., relative to wage controversy between employees and railroads of the country; to the Committee on Interstate and Foreign Commerce.

By Mr. DALE of New York: Petition of National Association Union Volunteer Officers, Indianapolis, Ind., favoring passage of House bill 386, Civil War volunteer officers' retired list; to the Committee on Military Affairs.

Also, petition of Henry Torrance, of New York City, favoring universal military service; to the Committee on Military Affairs.

Also, petitions of sundry women of the State of Massachusetts relative to woman-suffrage amendment; to the Committee on the Judiciary.

Also, petition of Local Union No. 4, International Brotherhood of Bookbinders, relative to pay of compositors and bookbinders in Government Printing Office; to the Committee on Printing.

Also, petition of national legislative and information bureau, Order of Railway Conductors, etc., favoring passage of House bill 16681; to the Committee on Interstate and Foreign Commerce.

Also, petition of East Buffalo Live Stock Association, against the Borland bill; to the Committee on Agriculture.

By Mr. DOOLING: Petition of Philadelphia Chamber of Commerce, relative to continuing Bureau of War Risk Insurance; to the Committee on the Merchant Marine and Fisheries.

By Mr. EAGAN: Petition of executive committee National Association Union Volunteer Officers, Indianapolis, Ind., favoring House bill 386, relative to the Civil War volunteer officers' retired list; to the Committee on Military Affairs.

By Mr. FLYNN: Petition of Local Union No. 4, International Brotherhood of Bookbinders, and Columbia Typographical Union, relative to pay of compositors and bookbinders in the Government Printing Office; to the Committee on Printing.

Also, petition of National Association of Union Volunteer Officers, Indianapolis, Ind., relative to House bill 386, to create a roll, known as the Civil War volunteer officers' retired list; to the Committee on Military Affairs.

Also, petition of national legislative and information bureau, Order of Railway Conductors, etc., favoring passage of the Thompson and Decker bill, Senate bill 6550 and House bill 16681; to the Committee on Interstate and Foreign Commerce.

By Mr. KONOP: Petition of Nathalie C. Greene, of Green Bay, Wis., against the Kent bill, relative to aid for tubercular indigents of our country; to the Committee on Interstate and Foreign Commerce.

By Mr. LINTHICUM: Petition of Monumental Division No. 52, International Brotherhood of Locomotive Engineers, favoring passage of Thompson-Decker bill, House bill 16681; to the Committee on Interstate and Foreign Commerce.

Also, memorial of Southern Forestry Congress, favoring amendment to Agricultural appropriation bill relative to purchase of forest areas; to the Committee on Agriculture.

Also, petition of Charles F. Habighunt, favoring Federal censorship of motion pictures; to the Committee on Education.

Also, petition of C. P. Tatem & Co., Baltimore, Md., favoring bill to repeal tax on commission merchants, etc.; to the Committee on Ways and Means.

By Mr. O'SHAUNESSY: Memorial of Ladies' Auxiliary Ancient Order of Hibernians in America, favoring Federal consorship of motion pictures; to the Committee on Education.

By Mr. PHELAN: Memorial of Linwood, No. 32, International Order Good Templars, of Lynn, Mass., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of citizens of the District of Columbia, favoring prohibition in the District of Columbia; to the Committee on the District of Columbia.

By Mr. PRATT: Petition favoring Hughes bill for censorship of moving pictures from the Regent Theater, Elmira, N. Y., and the Amusu Theater, Elmira, N. Y.; to the Committee on Education.

By Mr. RAKER: Petitions of Mammoth Copper Mining Co. and Mountain Copper Co. and Selby Smelting & Lead Co., San Francisco, Cal., against further tax on copper and copper industry; to the Committee on Ways and Means.

By Mr. ROBERTS of Nevada: Petition of F. E. Martens and other citizens of the State of Nevada, against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. SINNOTT: Petition of 49 citizens of Sherman County, Oreg., favoring Christian amendment to the Constitution; to the Committee on the Judiciary.

Also, petition of 50 citizens of State of Oregon, against compulsory Sunday-observance bill; to the Committee on the District of Columbia.

Also, petition of 48 citizens of Oregon, against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

Also, memorial of Vale (Oreg.) Chamber of Commerce favoring Shields water-power bill; to the Committee on Interstate and Foreign Commerce.

By Mr. WARD: Petition of 71 citizens of Sullivan County, N. Y., favoring a Christian amendment to the Constitution; to the Committee on the Judiciary.

By Mr. YOUNG of North Dakota: Petition of S. E. Jackson, president of Seventh Day Adventists of North Dakota conference, and 415 others, against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

Also, petition of Women's Christian Temperance Union and 24 citizens of Lamoure and Ransom Counties, N. Dak., favoring passage of House bill 10924; to the Committee on Alcoholic Liquor Traffic.

Also, petition of William Seibel and 19 others, of Lincoln Valley, N. Dak., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

SENATE.

SATURDAY, *July 22, 1916.*

The Senate met at 10 o'clock a. m.

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we take Thy name reverently upon our lips and come into Thy presence with Godly fear. Thy name is above every name. It is the measure of our power. It is the promise of future welfare. It is the source of our inspiration and health. Grant that we may ever keep Thy name holy. May we not utter it upon our lips except in prayer and in praise. May we hold it above all of the possessions of this life that we may be a people whose Lord is God. Out of Thy power and grace may we be enabled to build up a nation which will hold within it the blessings of the life that now is and the promise of that which is to come. For Christ's sake. Amen.

CALLING OF THE ROLL.

Mr. SMOOT. Mr. President, there are very few Senators in the Chamber. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	Martine, N. J.	Smoot
Beckham	Gallinger	Myers	Sterling
Brady	Harding	Nelson	Stone
Brandegee	Hardwick	Owen	Taggart
Bryan	Husting	Page	Thomas
Chamberlain	James	Pomerene	Townsend
Chilton	Johnson, S. Dak.	Reed	Underwood
Clapp	Jones	Robinson	Vardaman
Colt	Kern	Shafroth	Walsh
Culberson	La Follette	Sheppard	Williams
Cummins	Lane	Sherman	Works
Curtis	McCumber	Simmons	
Dillingham	Martin, Va.	Smith, Ga.	

Mr. MARTINE of New Jersey. I was requested to state that the Senator from Louisiana [Mr. BROUSSARD] is detained at the department on official business.

The VICE PRESIDENT. Fifty Senators have answered to the roll call. There is a quorum present.

THE JOURNAL.

The Secretary proceeded to read the Journal of the proceedings of the legislative day of Wednesday, July 19, 1916, when, on request of Mr. SMOOT and by unanimous consent, the further reading was dispensed with and the Journal was approved.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed a joint

resolution (H. J. Res. 247) extending the provisions of the act approved June 16, 1898, in which it requested the concurrence of the Senate.

PETITIONS AND MEMORIALS.

Mr. KERN. I present and ask to have printed in the RECORD a number of telegrams on the question of the child-labor legislation now pending.

Mr. SMOOT. The telegrams are in the form of petitions?

Mr. KERN. Yes; they are petitions.

The VICE PRESIDENT. Without objection, it is so ordered.

The telegrams are as follows:

GREENSBORO, N. C., *July 21, 1916.*

Senator JOHN W. KERN,
Washington, D. C.:

Support Wilson by voting for Federal child-labor bill.

A. W. MCALLISTER.
C. H. IRELAND.
J. NORMAN WILLS.
Dr. J. I. FOUST.
R. G. VAUGHN.
A. M. SCALES.
Dr. CHAS. W. BYRD.

—

PITTSBURGH, PA., *July 20, 1916.*

Senator JOHN W. KERN,
Washington, D. C.:

Urge passage of child-labor bill now. Majority of both parties favor bill, why delay? Party will be held responsible in November election. Give the children justice immediately. The true Americans want to save every child in the interest of all.

CARL J. FECHHEIMER.

—

NEWPORT, R. I., *July 20, 1916.*

Senator JOHN W. KERN,
United States Senate, Washington, D. C.:

Please help the preparedness cause by pushing Federal child-labor bill through this session.

HARRIET E. THOMAS.

—

WEST END, LONG BRANCH, N. J., *July 20, 1916.*

Hon. JOHN W. KERN,
Senate, Washington, D. C.:

Because of the vital importance of the Federal child-labor bill, I trust you will use all your influence to have it passed during this present session.

G. M. LICHTEN.

—

ROSELLE, N. J., *July 21, 1916.*

JOHN W. KERN,
United States Senate, Washington, D. C.:

Let me urge you to use all your influence to pass the Federal child-labor bill at this session of Senate. It is a crime to postpone for five or six months longer a measure that is recognized as human and right, even by those who are working against it.

L. M. MULFORD.
M. MULFORD.

—

NIAGARA FALL, N. Y., *July 20, 1916.*

JOHN W. KERN,
Senate Chamber, Washington, D C.:

Will you please use your influence to have child-labor bill passed during present session of Congress. Majority of both parties favors passage of bill. No satisfactory explanation for defeat. Party responsible for postponement will suffer in November. Senate Chamber is hot, but how about children in mills. Vote yes.

Mrs. MAX AMBERG.

—

WILMINGTON, DEL., *July 20, 1916.*

Hon. JOHN W. KERN,
Senate Chamber, Washington, D. C.:

To postpone action for passing the Federal child-labor bill at the present session of Congress will, to my mind, be a strong reason for defeating the party that is responsible for delay in the November elections. Take a good step forward along constructive line and pass this bill now. Our Nation can best be helped by conserving our children's health.

RICHARD TANBURY, Jr.

—

ELIZABETH, N. J., *July 20, 1916.*

Senator JOHN W. KERN,
United States Senate, Washington, D. C.:

With Republican and Democrat alike favoring it, why should the Keating-Owen bill lie over until December? Does the Democratic Party wish to assume responsibility for the delay? There were enough votes to pass it a year ago. For the sake of preparedness, save the children.

A. H. BLAUVELT,
537 Magie Street.

—

SPRINGFIELD, VT., *July 20, 1916.*

Senator JOHN W. KERN,
Washington, D. C.:

I wish to urge immediate passage of Federal child-labor bill. The longer continuation of cruelty, which might be lifted, reflects bitterly upon the majority of both parties, who are in favor of justice and protection for little children.

Sincerely, yours,

LENA A. BRITTON.

—

WEST END, LONG BRANCH, N. J., *July 20, 1916.*

Hon. JOHN W. KERN,
Senate, Washington, D. C.:

Beg you to use your influence to have Federal child-labor bill passed at this session.

D. L. FALK.

NEW YORK, N. Y., *July 21, 1916.*

Senator JOHN W. KERN,
Senate Chamber, Washington, D. C.:

I wish to urge upon you the necessity of passing the Federal child-labor bill at this session of Congress. With a majority of both parties supporting the bill the Democratic leaders can not afford to delay its passage.

W. J. DARROW,
153 West Fifty-seventh Street, New York.

—

MADISON, WIS., *July 20, 1916.*

Senator JOHN W. KERN,
Washington, D. C.:

I urge the passage of the child-labor bill at this session. With the majority of both Houses in favor of it the voters demand that the bill be allowed to come up now.

A. M. PITMAN.

—

GRAND RAPIDS, MICH., *July 20, 1916.*

Senator JOHN W. KERN,
Washington, D. C.:

It seems exceedingly important that child-labor bill be passed this session. As majority both parties are for the bill it will be difficult to explain why measure not passed. Postponement would be a cruelty to thousands of children. Voters much prefer this task completed this session.

CARRIE E. BELRAD.

—

PORT WASHINGTON, N. Y., *July 20, 1916.*

Senator JOHN W. KERN,
United States Senate, Washington, D. C.:

I urgently request you to further passage during the present congressional session of the child-labor bill. As a majority of both parties favor this bill, voters have every reason to expect its passage before Congress adjourns.

CHARLES G. NORRIS.

—

NEW YORK, *July 20, 1916.*

Senator JOHN W. KERN,
United States Senate, Washington, D. C.:

I strongly recommend the passage of the child-labor bill at this session. It would, in my judgment, be a great mistake to have the matter further postponed. Kindest regards.

ADOLPH LEWISOHN.

—

CHICAGO, ILL., *July 20, 1916.*

Senator JOHN W. KERN,
Washington, D. C.:

The whole thinking public is looking forward to the passage of a national child-labor bill. As an employer of labor, I earnestly urge upon you and your associates the importance of putting through this legislation at this session.

A. W. MEYER.

—

NEW BRIGHTON, STATEN ISLAND, N. Y., *July 21, 1916.*

Senator JOHN W. KERN,
Senate Chamber, Washington, D. C.

DEAR SIR: I beg to add my voice to those already appealing for the passage of the child-labor bill, as a member of the committee and as a champion of children's rights. Best citizens and a majority of voters demand the removal of this national disgrace. Will you fail us after our long fight?

GRACE H. HICKS.

—

PLAINFIELD, N. J., *July 20, 1916.*

Hon. J. W. KERN,
United States Senate, Washington, D. C.

DEAR SIR: I hope that the Federal child-labor bill meets with your approval and that you will do all in your power to see that the bill passes. The party held responsible for its defeat will suffer in the November elections.

MABELLE C. PHILLIPS,
Executive Secretary.

—

BALTIMORE, MD., *July 21, 1916.*

Senator JOHN W. KERN,
The Senate, Washington, D. C.:

Please do all in your power to bring child-labor bill vote this session.

ISABEL MOSHLER.

—

GRAND RAPIDS, MICH., *July 20, 1916.*

Hon. JOHN W. KERN,
Senate Chamber, Washington, D. C.:

Allow me to urge importance of passing the Federal child-labor bill at this session. A majority of both parties is for the bill. Postponement now will be heard of next November. President Wilson insists on its passage. Pray to mind the people.

HERMAN N. DOSKER,
423 Fourth National Bank Building.

—

ATLANTA, GA., *July 21, 1916.*

Hon. JOHN W. KERN,
Washington, D. C.:

Vote Federal child-labor bill now. President Wilson's right.

CHARLES D. MCKINNEY.

—

ATLANTA, GA., *July 21, 1916.*

JOHN W. KERN,
Washington, D. C.:

Vote Federal child-labor bill. Now we support President Wilson.

LOUIE MARIQUARDT,
President Georgia Federation of Labor.

ATLANTA, GA., *July 21, 1916.*

Senator JOHN W. KERN,
Washington, D. C.:

Labor in South will appreciate your support of President Wilson in securing immediate passage child-labor bill.

R. E. GANN,
President Atlanta Federation.
JEROME JONES,
Editor Journal Labor.

—

ATLANTA, GA., *July 21, 1916.*

JOHN W. KERN,
Washington, D. C.:

Vote now on Federal child-labor bill. President Wilson is right.

J. C. WHITE.

—

LEXINGTON, VA., *July 21, 1916.*

Hon. JOHN W. KERN,
Washington, D. C.:

Earnestly hope you can postpone child-labor bill. Democrats in letters to me from Massachusetts to Missouri condemn bill.

H. ST. GEORGE TUCKER.

—

CHICAGO, ILL., *July 21, 1916.*

Hon. JOHN W. KERN,
Washington, D. C.:

It will be a cruel disappointment to all progressively minded citizens and a great blow to tens of thousands of little children if the Federal child-labor bill is not passed at this session. Make public names of Senators who are preventing a vote. Both parties favor the bill, why should individual interests be allowed to interfere?

EUGENE T. LIES.

—

ST. LOUIS, MO., *July 21, 1916.*

Senator J. W. KERN,
Washington, D. C.:

We respectfully urge immediate passage of child-labor bill.

OSCAR LEONARD,
Superintendent Jewish Educational and Charitable Association.

—

WILKES-BARRE, PA., *July 21, 1916.*

JOHN W. KERN,
Washington, D. C.:

Please urge immediate passage Keating-Owen child-labor bill.

JOSEPHINE LOVELAND.
MABEL B. LOVELAND.

—

GLEN RIDGE DEPOT, N. J., *July 21, 1916.*

Hon. JOHN W. KERN, *Washington, D. C.:*

Earnestly solicit passage of Federal child-labor bill this session.

Rev. C. R. WEBB.

—

NEW YORK, N. Y., *July 19, 1916.*

Hon. JOHN W. KERN,
Senate Chamber, Washington, D. C.:

I respectfully urge upon you the importance of passing the Federal child-labor bill at this session, and beg to solicit your support for that measure.

MAURICE BARNETT.

—

GLEN RIDGE DEPOT, N. J., *July 21, 1916.*

Hon. JOHN W. KERN, *Washington, D. C.:*

Respectfully urge that Federal child-labor bill be passed this session.

Mrs. B. WEBB,
Department Chairman New Jersey State Federation of Women's Clubs.

Mr. MYERS. I have a resolution adopted by members of St. Joseph, Amos, Mountain View, and Grain Belt Granges, and the Cottonwood Equity Society, in the State of Montana. I ask that it be printed in the RECORD with the signatures and properly referred.

There being no objection, the resolution was referred to the Committee on Public Lands and ordered to be printed in the RECORD, as follows:

HAVRE, MONT., *June 24, 1916.*

Senator H. L. MYERS,
Washington, D. C.

DEAR SIR: At a farmers' picnic and joint meeting of the St. Joseph, Amos, Mountain View, and Grain Belt Granges and the Cottonwood Equity Society, at the Grain Belt schoolhouse, township 34 north, range 14 east, Montana meridian, the following resolutions were passed, to wit:

Whereas a certain bill, designated as S. 5772, has been introduced in the United States Senate, authorizing the expenditure of $50,000 for the drilling of artesian wells in the northern portion of Montana; and

Whereas we, the citizens of a portion of the territory so designated, are sorely in need of Government aid along this line; and

Whereas as individuals we are unable to accomplish this end: Therefore

Resolved, That we are strongly in favor of the passage of this bill as drawn by Senator H. L. MYERS: And be it further

Resolved, That the chairman of this meeting be instructed to send to each of the members of the Montana congressional delegation a copy of these resolutions.

C. F. WARREN, *Chairman.*

Passed June 23, 1916.

Mr. MYERS. I also present a memorial of homesteaders on the Fort Peck Indian Reservation concerning legislation for their relief. I ask that the memorial be printed in the RECORD with the signatures and official positions of the first two signers, and underneath the words "and many others."

Mr. BRANDEGEE. I did not catch the subject referred to in the memorial, but that is immaterial. What I want to say is that we are about to enter upon the last few weeks of the session, and there are quite a number of important measures pending before the Senate, and they have a large number of advocates all over the country. I did not object to the Senator from Indiana [Mr. KERN] printing in the RECORD the telegrams which he had received about the child-labor bill; but, Mr. President, we all get, and all will get, hundreds of telegrams about these matters, and I hardly think it wise from now on to fill the RECORD with petitions and individual telegrams upon these subjects. There will be no end to them. I hope Senators will refrain from putting in bunches of telegrams to be printed in the RECORD. They should be referred to committees without being printed in the RECORD.

There being no objection, the memorial submitted by Mr. MYERS was referred to the Committee on Public Lands and ordered to be printed in the RECORD, as follows:

Memorial to Congress.

To the Senate and House of Representatives, greetings:

Whereas it is impossible for the settlers on the Fort Peck Reservation to comply with the conditions now in force, under which the opening was conducted, we the undersigned settlers, after two years residence upon the Fort Peck lands, present for your consideration conditions and facts as we find them after several years of experimenting:

1. The soil is of a hard and compact nature, requiring at least three years cultivation before it can be brought to a state of productivity sufficient to insure a crop.

2. The homesteader's necessities of life here, as well as the necessities required to comply with the homestead laws, are from 20 to 40 per cent higher in this section than in the Eastern markets, including implements, lumber, stock, and farm labor.

3. The present appraisement is at least 50 per cent in excess of the value of the land after complying with the homestead rules.

4. After paying the present appraisement of from $3 to $7 an acre in five annual payments, it is practically impossible for the settler to supply himself with the necessities of life and at the same time comply with the present homestead requirements, with the hardship and inclement weather that the Fort Peck settler must endure, we feel that we should be encouraged in developing a raw and new country instead of being compelled to accept an incumbrance of from $480 to $1,120 on every quarter section of land on the reservation.

These being the facts, we appeal to your honorable body for relief: Wherefore be it

Resolved, That the Fort Peck Settlers' Association requests that you use all your best efforts in the passage of Senate bills Nos. 5610, 5611, and 5612, introduced by the Hon. Senator MYERS for the above-named relief.

C. F. BLAICH,
President Fort Peck Settlers' Association.
H. A. SCHOENING,
Secretary Wolf Point Commercial Club.
(And many others.)

Mr. FLETCHER. I have a communication in the nature of a petition signed by the chairman of the joint committee of the Citizens' Associations of Northwest Washington, having reference to some provision in the District bill. I think it is a very important matter, and as it will not take much space, I ask that it be printed in the RECORD.

Mr. SMOOT. I will ask the Senator whether the communication refers to the District of Columbia appropriation bill?

Mr. FLETCHER. Yes; I understand it has reference to the effort to change the hospital site and it presents some arguments that I think——

Mr. SMOOT. Of course, every Senator has received a similar communication. I do not know whether it has been put in the RECORD before or not.

Mr. FLETCHER. I am not sure about that.

Mr. SMOOT. I will ask the Senator that it be not printed again.

Mr. FLETCHER. Of course if it has been printed once I shall not ask that it be printed again.

Mr. SMOOT. Every Senator has received a similar communication.

Mr. FLETCHER. I have not seen any presentation of it before, and I think it is really an important matter.

Mr. GALLINGER. Does it relate to the municipal hospital site?

Mr. FLETCHER. It does.

Mr. GALLINGER. I have an impression that a little time ago a protest numerously signed was placed in the RECORD, but it is not consequential whether it was or not; the air is full of letters and protests and petitions concerning that matter. It will be discussed in the Senate in due time. Perhaps it is well enough to print it, but it will not have much influence, I apprehend, on the action of the Senate one way or another.

Mr. SMOOT. I want to say to the Senator that I received this morning a statement upon the other side of the question. I was going to ask that it be put in the RECORD, but as this discussion has come up I think perhaps both ought to be kept out of the RECORD, and I shall object.

Mr. POMERENE. Mr. President, I have received communications on this subject likewise, but I think it would be very well for citizens of Washington who are interested in the hospital to remember that it is of vastly more importance that we have a hospital than that we have any particular location for it.

Mr. SMOOT. I object to the printing, Mr. President.

Mr. FLETCHER. I was impressed with the statements in this communication. It is not a lengthy communication. It seemed to me that it presented the matter in a way that ought to be considered by the Senate, and I thought it ought to be printed in the RECORD.

The VICE PRESIDENT. There is objection to the printing.

Mr. FLETCHER. I ask that it be referred to the Committee on the District of Columbia.

The VICE PRESIDENT. It will be so referred.

Mr. GALLINGER presented petitions of Local Branch, International Hod Carriers, Building, and Common Laborers' Union of America, of Albany, N. Y.; of the International Longshoremen's Association, of Buffalo, N. Y.; of the Missouri State Federation of Labor; and of the Louisiana State Federation of Labor, praying for the enactment of legislation to further restrict immigration, which were ordered to lie on the table.

He also presented petitions of N. A. Newton, of Portsmouth, Ohio; George T. Powell, of Ghent, N. Y.; Anna C. Cromwell, of Llynwyllann Summit, N. J.; Mrs. Sara G. Williams, of Winsted, Conn.; Oberlin Smith, of Bridgeton, N. J.; Flora L. Terry, of Ansonia, Conn.; C. Alfred Burhorn, of Hoboken, N. J.; H. R. Corbett, of Chicago, Ill.; Clinton H. Scovell, of Boston, Mass.; Fannie R. Bigelow, of Rochester, N. Y.; Emily Dyer, of New York City, N. Y.; C. H. Berryman, of Lexington, Ky.; Mary S. Malone, of Amherst, Mass.; E. M. Capen, of Bloomington, Ill.; Charles A. Blanchard, of Wheaton, Ill.; Leaton Irwin, of Quincy, Ill.; Mary Ware Allen, of Gloucester, Mass.; Ellen A. Freeman, of Little Boars Head, N. H.; Laura Moore, of St. Clair, Mich.; I. N. Lame, of Chicago, Ill.; M. Jordan, of Englewood, N. J.; and A. G. Cummins, of Wheeling, W. Va., praying for the enactment of legislation of prohibit interstate commerce in the products of child labor, which were ordered to lie on the table.

Mr. GRONNA presented a memorial of Lodge No. 676, Brotherhood of Railroad Trainmen, of Enderlin, N. Dak., remonstating against the passage of the so-called Sutherland compensation bill, which was referred to the Committee on the Judiciary.

He also presented a petition of Lodge No. 676, Brotherhood of Railroad Trainmen, of Enderlin, N. Dak., praying for the enactment of legislation to provide safe clearance from structures on railroads, which was referred to the Committee on Interstate Commerce.

He also presented a petition of Lodge No. 676, Brotherhood of Railroad Trainmen, of Enderlin, N. Dak., praying for the enactment of legislation to provide that railroads shall use safe boilers and appurtenances thereto, which was referred to the Committee on Interstate Commerce.

Mr. SHIELDS presented a petition of sundry citizens of Belvidere, Tenn., praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. CHAMBERLAIN presented a petition of sundry citizens of Multnomah County, Oreg., praying for the enactment of legislation to found the Government on Christianity, which was referred to the Committee on the Judiciary.

REPORTS OF COMMITTEES.

Mr. ASHURST, from the Committee on Indian Affairs, to which was referred the bill (S. 6308) to authorize the Secretary of the Interior to lease, for production of oil and gas, ceded lands of the Shoshone or Wind River Indian Reservation, in the State of Wyoming, reported it with an amendment and submitted a report (No. 712) thereon.

He also, from the same committee, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

S. 1265. A bill for the relief of J. G. Seupelt (Rept. No. 704);

S. 1266. A bill permitting Charles M. Hickerson to include a portion of allotment No. 36 to Se-cum-ka-nullax, of Chief Moses's Band, in his homestead entry, and providing for allotment to Se-cum-ka-nullax in lieu thereof on the Colville Indian Reservation (Rept. No. 705);

S. 3130. A bill granting certain lands to school district No. 56, Klickitat County, Wash., and authorizing the issuance of patent therefor (Rept. No. 706);

S. 3647. A bill for the relief of Mosses C. Tingley (Rept. No. 707);

S. 3773. A bill to cancel the allotment of Davie Skootah on the Lummi Reservation, Wash., and reallot the lands included therein (Rept. No. 708);

S. 3774. A bill to authorize the sale of lands allotted to Indians under the Moses agreement of July 7, 1883 (Rept. No. 709);

S. 3972. A bill to provide for selection by the Omaha Indians and the setting apart of reservation lands for tribal cemetery purposes (Rept. No. 710); and

H. R. 12123. An act to appropriate money to build and maintain roads on the Spokane Indian Reservation (Rept. No. 711).

Mr. JOHNSON of South Dakota, from the Committee on Indian Affairs, to which was referred the bill (S. 5335) conferring upon tribes of Indians the right to recall their agents or superintendents, reported it with amendments and submitted a report (No. 714) thereon.

He also, from the same committee, to which was referred the bill (S. 5635) authorizing the conveyance of certain land in the State of South Dakota to the town of Flandreau in said State, reported it with an amendment and submitted a report (No. 713) thereon.

Mr. BECKHAM, from the Committee on Post Offices and Post Roads, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

H. R. 10052. An act to reimburse J. T. Nance (Rept. No. 715); and

H. R. 14952. An act for the relief of Mrs. John A. Fox (Rept. No. 716).

Mr. OWEN, from the Committee on Indian Affairs, to which was referred the bill (H. R. 11939) for the relief of William Guy, reported it without amendment and submitted a report (No. 717) thereon.

Mr. FLETCHER. I am directed by the Committee on Military Affairs, to which was referred the bill (S. 6352) for the relief of David Steers, alias William Johnson, alias John Hartman, to report it adversely.

The VICE PRESIDENT. The bill will be placed on the calendar.

Mr. PITTMAN. I am directed by the Committee on Foreign Relations, to which was referred Senate joint resolution 147 extending the provisions of the act approved June 16, 1898, to ask that that committee be discharged from the further consideration of the joint resolution and that it be referred to the Committee on Public Lands, which seems to be the appropriate committee.

The VICE PRESIDENT. The joint resolution will be referred to the Committee on Public Lands.

Mr. MYERS, from the Committee on Military Affairs, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

S. 2388. A bill for the relief of Orion Mathews (Rept. No. 718); and

S. 4915. A bill for the relief of Oliver C. Rice (Rept. No. 720).

He also, from the same committee, to which was referred the bill (S. 4620) to remove the charge of desertion against James B. Smock, reported it with amendment and submitted a report (No. 719) thereon.

Mr. WEEKS. I am directed by the Committee on Military Affairs, to which was referred the bill (S. 4836) for the relief of Daniel O'Connell, to report it adversely, and I submit a report (No. 721).

The VICE PRESIDENT. The bill will be placed on the calendar.

Mr. GRONNA, from the Committee on Claims, to which was referred the bill (H. R. 2555) for the relief of the Minnesota & Ontario Power Co., reported it without amendment and submitted a report (No. 722) thereon.

Mr. NEWLANDS, from the Committee on the Library, to which was referred the joint resolution (S. J. Res. 92) relative to the construction on the site selected of the central heating, lighting, and power plant authorized by the provisions of the sundry civil appropriation act approved June 23, 1913, reported it with amendments and submitted a report (No. 723) thereon.

Mr. SMOOT, from the Committee on Public Lands, to which was referred the bill (S. 5632) for the relief of Aquila Nebeker, reported it with an amendment and submitted a report (No. 726) thereon.

Mr. BRYAN, from the Committee on Claims, to which was referred the bill (H. R. 9375) for the relief of J. M. Potter, reported it without amendment and submitted a report (No. 724) thereon.

Mr. WARREN, from the Committee on Military Affairs, to which was referred the bill (S. 5203) for the relief of Gardner L. Eastman, reported it with amendments and submitted a report (No. 727) thereon.

Mr. JOHNSON of Maine, from the Committee on Pensions, to which was referred the amendment submitted by him on the 19th instant proposing to pay Dennis M. Kerr $1,200 for extra and expert services rendered the Committee on Pensions during the first session of the Sixty-fourth Congress, etc., intended to be proposed to the general deficiency appropriation bill, reported favorably thereon and moved that it be referred to the Committee on Appropriations and printed, which was agreed to.

EXTENSION OF PATENT APPLICATIONS.

Mr. JAMES. From the Committee on Patents I report back favorably without amendment the bill (H. R. 13982) to extend temporarily the time for filing applications and fees and taking action in the United States Patent Office in favor of nations granting reciprocal rights to United States citizens, and I ask unanimous consent for its present consideration.

Mr. SMOOT. I will object.

Mr. JAMES. I should like to say to the Senator from Utah that this bill has already passed the House of Representatives. It is recommended by the Commissioner of Patents, who says it is very urgent and that it should be passed.

On account of the war there are many countries that are extending the right to file or make payment where they are prevented from doing so to those countries that grant reciprocal rights and the time has expired by reason of the war. American citizens are having these rights denied to them by reason of the fact that we are not extending those reciprocal rights to those countries, which are extending it only to those countries who give a like extension.

I think it is an important measure, and I hope the Senator from Utah will withdraw his objection.

Mr. SMOOT. I will state to the Senator that if the bill takes the regular course and goes to the calendar, I hope we will reach it to-day, and if the Senator will help——

Mr. JAMES. I am perfectly willing to help. It is nothing to me any more than it is to other Senators. The bill was referred to the Committee on Patents, and the Commissioner of Patents asked to have it passed, and has sent to me three times and requested its passage. It is recommended unanimously by the Committee on Patents.

Mr. SMOOT. I should like to have it go to the calendar.

The VICE PRESIDENT. The bill will be placed on the calendar.

BARKENTINE "MABEL I. MEYERS."

Mr. BRYAN. A few days ago the Senator from Massachusetts [Mr. WEEKS] requested that a House bill be substituted for a Senate bill on the calendar. It could not be done because the House bill was not before the Senate; it had been referred to the Committee on Claims. I now report back favorably with an amendment the bill (H. R. 11129) for the relief of the owners of the barkentine *Mabel I. Meyers* and her master and crew, and for the relief of the owners of cargo of molasses late on board said barkentine, and I submit a report (No. 725) thereon. I call the attention of the Senator from Massachusetts to the report.

Mr. WEEKS. I ask unanimous consent that the bill be given immediate consideration on account of its being a House bill reported with an amendment, which will make it necessary to send it to conference. It is a case of submitting to the Court of Claims a claim which the owners of this vessel have against the United States Government on account of it having been sunk in a collision with a battleship. I think the bill should be passed at this session. As it will have to go to conference, I should like to have immediate consideration.

Mr. SMOOT. Mr. President, I will say to the Senator from Massachusetts that the bill will not have to go to conference, though it is a House bill, if we pass it without amendment.

Mr. WEEKS. But if we pass the House bill we shall pass it as reported with an amendment.

Mr. JAMES. What is the request, Mr. President?

Mr. WEEKS. I have made a request for the immediate consideration of the bill which has just been reported.

Mr. JAMES. And the Senator from Utah makes no objection to that request?

Mr. SMOOT. I simply stated that, if we passed the House bill without amendment, it would not have to go to conference.

Mr. JAMES. I simply wanted to know whether the objection of the Senator from Utah was to go to one side as well as the other.

Mr. SMOOT. Mr. President, the Senator from Kentucky knows that I have no intention to discriminate.

Mr. JAMES. I do not know that. I know that I reported a bill this morning which is of universal importance to all the people of the country, and the Senator from Utah objected to its immediate consideration without giving any reason for it. Now he agrees to give his consent that the Senator from Massachusetts may have a bill considered by unanimous consent which has just been reported.

Mr. SMOOT. Mr. President, the bill to which the Senator from Kentucky refers, which came up on the floor the other day, was a Senate bill, and the Senator from Massachusetts asked that the House bill on the same subject be substituted therefor at the time the calendar was under consideration. It developed, however, that the House bill had not been referred to the Committee on Claims, but to the Committee on Commerce. Therefore, the Senator from Massachusetts asked that the Committee on Commerce be discharged from the further consideration of the bill, and that it be referred to the Committee on Claims, which was done. The Committee on Claims now report the House bill, and the Senator from Massachusetts has asked for its immediate consideration, the intention being to substitute that bill for the Senate bill on the calendar.

Mr. JAMES. I understand.

Mr. SMOOT. If the bill had been reported from the committee at that time, it would have been considered.

Mr. JAMES. I admit that it is just a bill; it is merely called up for consideration, and is just now before the Senate; but it could take its regular course as well as the bill which I reported. However, I am not going to object. I merely wanted to draw the deadly parallel between the objections of the Senator from Utah in this Chamber.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. WILLIAMS. I believe, under the circumstances, I will object.

Mr. OWEN. I object.

The VICE PRESIDENT. There is objection, and the bill will be placed on the calendar.

OLEANNE MARIE ZAHL BRANUM.

Mr. MYERS. From the Committee on Public Lands I report back favorably without amendment the bill (S. 6497) for the relief of Oleanne Marie Zahl Branum, and I submit a report (No. 703) thereon. I call the attention of the Senator from Minnesota [Mr. NELSON] to the report.

Mr. NELSON. I ask unanimous consent for the immediate consideration of the bill. I will state the case briefly. It is to allow a poor woman to prove up her homestead. It is a bill recommended, in fact, sent to me, by the Interior Department. As her time for proving up her homestead is limited and will expire in November, if anything is done it ought to be done immediately. I ask unanimous consent for the immediate consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That homestead entry No. 07718, Duluth, Minn., series, made November 29, 1909, by Oleanne Marie Zahl Branum, for the north half of the southwest quarter, southwest quarter of the southwest quarter, section 4, and northwest quarter of the northwest quarter, section 9, township 62 north, range 21 west, fourth principal meridian, be, and the same hereby is, validated; and the Secretary of the Interior is authorized and directed to accept commutation proof in support of said entry and issue patent thereon, provided said proof shows compliance with the requirements of the homestead law with respect to residence, cultivation, and improvements.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MYERS:

A bill (S. 6692) to amend section 6 of an act to expedite the settlement of title to lands in the State of California; to the Committee on Public Lands.

By Mr. SHAFROTH:

A bill (S. 6693) to amend an act entitled "An act granting a franchise for the construction, maintenance, and operation of a street-railway system in the district of South Hilo, county of Hawaii, Territory of Hawaii," approved August 1, 1912, as amended by an act approved July 25, 1914; to the Committee on Pacific Islands and Porto Rico.

By Mr. BRADY:

A bill (S. 6694) granting an increase of pension to John Hudson (with accompanying papers; to the Committee on Pensions.

By Mr. DILLINGHAM:

A bill (S. 6695) granting an increase of pension to Henry Dalton Selby (with accompanying papers); to the Committee on Pensions.

By Mr. JONES:

A bill (S. 6696) granting a pension to Edward Madden; to the Committee on Pensions.

By Mr. SHIELDS:

A bill (S. 6697) granting a pension to Vian Bennett; to the Committee on Pensions.

By Mr. WILLIAMS:

A bill (S. 6698) for the relief of Edward L. Keyes; to the Committee on Military Affairs.

AMENDMENT TO DEFICIENCY APPROPRIATION BILL.

Mr. WALSH submitted an amendment proposing to appropriate $115 to pay M. I. Howell as compensation for services rendered the special committee appointed under Senate resolution to secure certain information concerning interned ships in ports of the United States, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

VOCATIONAL EDUCATION.

Mr. PAGE. Mr. President, I desire to give notice that on Monday next, at the close of the morning business, I shall offer some remarks on Senate bill 703, the vocational-education bill.

PRINTING OF NAVAL BILL.

Mr. TILLMAN. In view of the fact that the other House, where orders of this kind are generally passed, will not reassemble until Tuesday, and inasmuch as there is a great demand for the naval bill as passed by the Senate, showing the bill with the amendments numbered, I ask for the adoption of the following order, which I send to the desk.

The VICE PRESIDENT. The order will be read.

The SECRETARY:

Ordered, That the bill H. R. 15947, the naval bill, be printed showing the amendments of the Senate numbered.

The order was agreed to.

HOUSE JOINT RESOLUTION REFERRED.

H. J. Res. 247. Joint resolution extending the provisions of the act approved June 16, 1898, was read twice by its title and referred to the Committee on Military Affairs.

SIR ROGER CASEMENT.

The VICE PRESIDENT. Are there concurrent or other resolutions?

Mr. MARTINE of New Jersey. Mr. President, I move that the Foreign Relations Committee be relieved from the further consideration of Senate resolution No. 223, relative to the case of Sir Roger Casement.

Mr. STONE. Mr. President, I have no objection to disposing of that motion at this time. I wish, however, to speak briefly with respect to it before it is acted upon. I hope the consideration of the resolution will not lead to a debate of any considerable length. The Senator from New Jersey [Mr. MARTINE] has already addressed the Senate in very eloquent and forceful terms, I think, on three occasions.

Mr. MARTINE of New Jersey. I have addressed the Senate on at least two occasions, I will not say eloquently, but earnestly.

Mr. GALLINGER. Forcefully.

Mr. STONE. The Senator from New Jersey has addressed the Senate on three occasions, as I recall, but it is immaterial whether twice or three times. He has certainly exhausted the subject from his standpoint.

Mr. President, when the resolution was submitted in the first instance I asked that it might be referred to the Committee on Foreign Relations; and I objected to the motion of the Senator from New Jersey subsequently made to discharge the committee from the consideration of his resolution. The Committee on Foreign Relations has not reported the resolution. I will say, however, that I laid the resolution before the committee, as I stated to the Senator I would do, at the first meeting after it was referred. All the members of the committee were not present at that meeting, but there was a quorum present; and the members of the committee present were unanimously of the opinion that the resolution should not be agreed to. Its consideration, however, was not carried to the point of reporting it either way, and I so notified the Senator from New Jersey.

Mr. MARTINE of New Jersey. That is correct, Mr. President.

Mr. STONE. Mr. President, the resolution as introduced and referred reads as follows:

Whereas the Senate of the United States have heard with deep regret that the sentence of death has been pronounced upon Sir Roger Casement after a hasty (so called) trial: Therefore be it

Resolved, That the President of the United States be, and is hereby, requested to ask a stay in the execution of said sentence in order that new facts may be introduced.

The phraseology of the resolution is discourteous and, as the committee thought, would be offensive to the Government of Great Britain, to which Government, indirectly—that is, through the President—it is addressed. The President's representations, if made at all, in pursuance of the resolution, would be made because of the resolution; and whatever action he might take would be connected with and in pursuance of the resolution itself; and to ask the President to convey to the British Government an expression of the Senate that Sir Roger Casement had been sentenced to death "after a hasty (so called) trial" would not be a very respectful way in which to address a foreign Government, and would not tend to promote the end sought to be accomplished.

I objected, as I have said, to the consideration of the resolution when it was presented, and asked to have it referred. Later the Senator from New Jersey moved to discharge the committee, and I asked that the consideration of his motion be postponed until the following day under the rule. I have made no objection to its consideration since, and make none now.

Mr. President, I regret that my big-hearted friend from New Jersey has deemed it his duty to offer and press this resolution upon the Senate. Kindliness of heart, tenderness in one's nature are noble things, but it is not always safe, against our judgment, to allow ourselves to be swayed by sympathy or even affection. I fear that the adoption of a resolution of this kind would be a wrong step, considered from an international standpoint.

Senators personally may proceed with great liberty of action. Acting as individuals or as individual Senators they may speak, may write, may petition—they may say and do many things that government in its organized form can not properly say or do. The Senate is not the Government, but it is a responsible and important body in our Government as organized. The Senate, therefore, speaks as a governmental body.

Mr. President, I wish to hurry through this and will speak hurriedly and as briefly as possible. I understand that the State Department has been approached about this matter, and, after inquiry, deemed it inadvisable to make official representations with respect to it. The department did, at the request of a sister of Sir Roger Casement, who resides in New York, send to our ambassador in London an appeal made by the sister herself to the Government to spare the life of her unfortunate brother. This lady was fearful that if she should send this appeal on her own account it might not reach the responsible officials of that Government, and hence the State Department itself forwarded as a departmental dispatch to the American ambassador this appeal of the sister to the British Government, and it was delivered to the proper officials of that Government.

That was as far as the State Department deemed it advisable to go; for I think I may properly say that the department was advised by our representative in London that official representations to the British Government by this Government touching this case would not be received in a kindly spirit. Of course it would create a rather embarrassing situation for the President if he should be asked by the Senate, notwithstanding the information he has and to which I have alluded, to break into this purely domestic affair with a formal request. When the President communicates diplomatically with a foreign Government he speaks for the whole Government, even though he may speak at the request of a particular or separate branch of the Government.

A citizen of the United States was involved in this uprising in Ireland. There may have been more than one; I do not know; but at least one citizen of the United States, a Mr. De Valero, was prominent in that revolt. He was arrested, tried, and sentenced to be executed.

I hold in my hand a letter, not addressed to me, but addressed to a Member of the House from my State, from Father William N. Carroll, residing at Detroit, Mich., in which he says that he incloses a copy of a letter he had mailed to the Senators from Michigan. He gives some account of Mr. De Valero. I abbreviate what he says in this way:

He says De Valero was born in New York City in the early eighties, graduated from the Dublin University in 1904, and has lived in Ireland ever since; that during his residence there he has been a professor of science and the higher mathematics in several Irish colleges; that a year ago he was professor of science at the Carrisford Normal College, Dublin. He became involved in this rebellion or revolt and was sentenced to be executed. Representations as to his plight were made to our State Department and the President, and they in turn laid the matter before the British Government, and the sentence was commuted from death to imprisonment. That, however, was a different case from this. De Valero had not severed his allegiance to the United States. He had a right to appeal to this Government, because he owed his allegiance to this Government

as a citizen; but not so with Sir Roger Casement. He is a British subject. He has served the British Government and has received honors at its hands. He was knighted by the British sovereign. De Valero is an American citizen; Casement is a British subject.

I shall not discuss the merits or demerits of this case. I could not do so if I wished, for lack of information. But I will say that, in my opinion, a resolution of this character, presented in the circumstances of this time, seeking in a public and official way to influence the British Government, will be resented by that Government and will do Sir Roger Casement more harm than good.

Mr. NELSON. Mr. President, will the Senator from Missouri yield to me for a moment?

Mr. STONE. I will.

Mr. NELSON. I recall an incident that happened a few years ago. Mrs. Maybrick, an American lady, married to an Englishman, was convicted of murdering her husband by poison, and was sentenced to imprisonment for life. Immediately after that an immense propaganda began in this country for her pardon. It kept on for two or three years, if I recall rightly, in all manner of ways. I think even the intervention of the Government was sought; but as long as the propaganda was carried on in her behalf the British Government did not move a bit. It was only after that propaganda had ceased, and quite a while after it, that the Government of Great Britain finally pardoned Mrs. Maybrick, who is now here in the United States.

The way I look at it is this: While the intentions of the Senator from New Jersey are of the most laudable kind, I entirely agree with the Senator from Missouri that it would do more harm than good. My own opinion is that if we say nothing and do not interfere the British Government will commute this sentence to life imprisonment; and when the war is over I have no doubt at all but that Sir Roger and all the other men who have been sentenced to life imprisonment growing out of that rebellion will be ultimately pardoned. But I think this movement, as the Senator from Missouri says, will do more harm than good; and if I were a special friend of Sir Roger Casement it is the last thing in the world that I would try to do in his behalf.

Mr. STONE. Mr. President, it would be entirely proper—by which I mean it might be entirely wise—for citizens of the United States, as in the case referred to by the Senator from Minnesota, to adopt any resolutions they saw proper to adopt, to forward to the British Government any petitions they might prepare and have signed; and I am sure all such petitions, if presented to the Secretary of State, would be forwarded by him, as was the dispatch of Casement's sister, to be delivered to the proper British officials, thus making the delivery certain. But for the Government itself to intervene is another thing.

I agree with the Senator from Minnesota in what he said. I speak, of course, only my own opinion, and utterly without any knowledge that is not possessed by every Senator on the floor; but I think, with the Senator from Minnesota, it would be a grave mistake in its effect on the English Government to have the Government of the United States thrust itself into this case at this time. It would be a mistake even so far as Ireland is concerned. I do not believe Casement will be executed. It would be a blunder for Great Britain to carry out this sentence to the extreme limit. I am so strong in that belief that I can not but think that there will be a commutation of the sentence. The execution of a number of men in Ireland immediately following the uprising there created, I believe, a most unfavorable sentiment in Ireland, in England itself and, in fact, throughout Great Britain and in other countries. I believe that is true and that the British Government must be conscious of it. I do not believe that that Government will take another life. I think it is too wise for that.

If the President, at the request of the Senate or on his own motion, should ask the British Government not to execute Sir Roger Casement, I believe the British Government would be less apt to exercise clemency than if we should attempt to interfere. My opinion is that the British Government is more apt to commute sentence of Sir Roger Casement on its own motion than upon the request of a foreign Government.

Mr. SMITH of Georgia. Mr. President, would not a commutation at such a request take out of the commutation the generous spirit that otherwise would be found in it by the British Government?

Mr. STONE. The Senator has expressed, in better terms, what I was trying to say.

Mr. MARTINE of New Jersey. Mr. President, if the Senator will permit me, I think I can answer that. It might take the generous spirit out of an Englishman, but it could not out of the American Congress nor the American Senate.

Mr. STONE. Mr. President, I was going to say this: If the British Government exercises clemency in this case, it will be done in order to promote the interests of that Kingdom, of that Government, of that people, and especially to promote better relations between England and Ireland. If the British Government should do an act of clemency of that nature on its own motion, it certainly would have a better effect, and the British Government knows it would have a better effect, in Ireland as well as elsewhere at home and abroad, than if done on foreign recommendation. It knows that if it should act on the request of foreign Governments, whatever local or home virtue there might be in the act would be practically lost.

Mr. OWEN. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Oklahoma?

Mr. STONE. I do.

Mr. OWEN. I wanted to ask the Senator if he would not permit the Senate to pass upon the matter without much longer delay?

Mr. STONE. I am just about through. I know what the Senator has in mind, and I sympathize with him.

I will ask my friend from New Jersey to remember that to-day there are many thousands of Irish volunteers in the trenches in northern France—not conscripts, but volunteers. Who can tell what these Irish soldiers who every day are rushing into the face of death, singing "It's a long, long way to Tipperary"—for they do sing such songs, they say, in the storm of battle—who can tell what those men think, or what their mothers, fathers, and kindred at home in Ireland think, of this revolt organized by Sir Roger Casement, or of which he is said at least to have been a conspicuous part? I do not know what they think; but is it not well for us to think of that?

Mr. President, I have always sympathized with Ireland in her struggles. Nearly all of us in America have had in our hearts a sympathy for Ireland. No people in history have trod a longer path of suffering, sacrifice, and sorrow than the Irish. When they were struggling for absolute independence my sympathies were with them, and I hoped they would succeed. Later, in the days of Parnell and Gladstone and down to this day, I have deeply sympathized with their efforts to win even the prize of local self-government or home rule. My sympathies have been with them and are to-day with them, and with Redmond and the other leaders of that great Irish element for whom Redmond speaks. I am for whatever will promote the welfare of Ireland. There has never been a time since Ireland's subjection to England when the Irish people, under the wise leadership of men like Redmond, have stood a better chance of a broad governmental autonomy than now.

We should consider these things when we talk of breaking into these domestic affairs. "A single swallow does not make a summer." It would be a mistake for Casement himself for us to pass a resolution like this, and it would be an international blunder.

Mr. President, I have taken more time than I should. The other side has been very fully presented in the several speeches delivered by the Senator from New Jersey, and I will now ask the Senator from New Jersey if he will not consent, without further debate, to let the Senate vote upon his motion to discharge the committee.

Mr. MARTINE of New Jersey. Mr. President, I have no desire to prolong the debate, and in answer to the distinguished Senator from Missouri——

Mr. STONE. Wait a moment; I have not yielded the floor. I asked the Senator a question.

Mr. MARTINE of New Jersey. I say no; I decline to do that. I shall ask for a vote.

Mr. STONE. I dislike very much to move to lay the motion on the table.

Mr. MARTINE of New Jersey. I trust the Senator will not perform a parliamentary act that I feel would be so ungenerous and, I believe, unjust and——

Mr. STONE. I do not wish to do that.

Mr. MARTINE of New Jersey. I beg pardon.

Mr. STONE. I do not wish to do that. I am asking the Senator to let us vote upon this motion.

Mr. MARTINE of New Jersey. Mr. President, I should like to say just a word. It has not been fully debated, nor have I desired to enter into any prolix talk on this subject; but it is a mighty subject. I will take but one-quarter of the time the Senator from Missouri has, if he will allow me.

Mr. STONE. Very well.

Mr. MARTINE of New Jersey. Mr. President, I want to say in answer to my good friend from Missouri—and he is my good friend—I have no greater heart nor am prompted by no more generous impulses than the Senator from Missouri or any

other Senator in this body. I realize and plead guilty to the charge that I am impulsive, but that my heart is any bigger or my conscience any cleaner or my promptings any better, I decline to accept.

The charge is made that I have incorporated in my resolution the words "so-called trial." While the legal minds of England as well as of America have teemed with statements, he was tried as Robert Emmet was tried, and convicted before he was tried. He was tried under a musty old moss-covered and grown-over law over 600 years old, that had not been in all that time invoked by the English courts.

I say in this case of Roger Casement the question of humanity is at stake. I know we have no legal right to interfere and I know we will not interfere in a legal way, but I plead for humanity's sake. I plead for justice, for the cause of right, and because of an advanced civilization and our so-called religion.

Some Senator asked me, Will it not hurt Casement more than it would do him good? It is not a question of hurting Casement. It is up to the Senate, and if the Senate shall refuse to express itself in this kindly way in behalf of this man it will be a demonstration of moral cowardice.

If all these things are true, and I suppose they are, as the Senator says, that the department has done something, how in the name of Heaven is it in enterprising America that not a newspaper has had a whimper of it? But no; they have been as dull to humanity's plea at the other end of the Avenue as we have been here.

When you say it would be interfering, did not England, with its public men and with it editorials in pamphlet, paper, and magazine, fairly teem with articles when we were in our so-called rebellion? I shall not go over what I have said. I have no retraction to make, no qualifications to make for my resolution. I ask if Senators are willing to go to their homes this night and seek their couch, upon which they hope to lie down to peaceful slumbers and pleasant dreams, without having done what little you can by the passage of this resolution to stop and stay this execution? The mighty United States, with its splendid Congress, its splendid Senate, will have a mighty effect upon the Government of Great Britain by the passage of this resolution.

When you say that we have bills before us and that we should stop all discussion it is a case of money on one side and human life on the other.

Mr. President, I took this little clipping from a newspaper:

> America herself owes it to the memory of Washington and the signers of the Declaration to utter a protest that will reverberate around the world, giving courage to peoples struggling for freedom and making clear how the civilization of the future would regard the hanging of Roger Casement.

I plead not on the law ground. I know, I thank God, nothing of your law. Law makes men dogmatic and hard-hearted. I have none of it. I plead simply as a citizen in proud, glorious, peaceful America that the Senate of the United States may pass this simple resolution that I have offered, asking the kindly intercession of the President of the United States to stay and stop the execution of Sir Roger Casement.

Mr. BORAH. Mr. President, the question is a perplexing one to a good many Members of this body. I rather suppose that the great majority, if not all, Senators here sympathize with the ultimate purpose of the Senator from New Jersey; that is to say, if this body as a body could do anything to ameliorate the hard lot of Sir Roger Casement I think in all probability the body would do so. But the question which presented itself to the committee and the question which disturbs the minds of some of us individually is, May not our procedure here work contrary to the desires of the mover of the resolution?

Mr. MARTINE of New Jersey. I can not believe it.

Mr. BORAH. I know the Senator does not believe it, because everybody recognizes that he wants to accomplish something in behalf of Sir Roger Casement; but it is a delicate matter to undertake to suggest to a foreign power what it shall do with those whom it has undertaken to punish in accordance with the established procedure under their law. I favor the utmost clemency in accordance with sound principles of government toward political prisoners, but I feel most sincerely that this resolution would be deemed offensive and certainly would not serve to ameliorate the situation for the unfortunate prisoner.

Whatever our sympathies may be the perplexing question is whether or not we may not do more harm than good by undertaking to interfere. That is the question which is most disturbing.

I am of the opinion that the Senator from Missouri has put the matter in its strongest way when he said that the Government of Great Britain may feel that it desires to dispose of this matter on its own motion and in its own way and might feel somewhat embarrassed if it was assumed that it was acting by reason of the suggestion of some other power. That is the question, I will state to the Senator from New Jersey, which is disturbing some of us.

Mr. MARTINE of New Jersey. Mr. President, if I may answer the Senator, I feel that all the world is kin. The world has moved. The electric telegraph and the cable and the wireless put us as one man in a way that there is no country whatever, and the law of humanity is the one great law that governs all God's creatures. But I say when the question of humanity is involved if it can be brought to the sense and attention of any great country in the world that the world and humanity and civilization stand aghast it will have its effect, not for evil but for good to Sir Roger Casement.

Mr. BORAH. Mr. President, I do not care to continue the discussion further than to indicate that many who may not vote to discharge the committee may not do so because of our lack of sympathy for accomplishing whatever might be accomplished in favor of humanity, but because of a difference of view as to how that can be done and how it can best be done. I understand, as was said by the Senator from Missouri, that something has already been done through the State Department, perhaps all that it is possible for this Government to do and suggest. I feel sure that this is not a wise or expedient procedure.

Mr. MARTINE of New Jersey. Then what harm could it do? What dangerous complication could it bring about? If they have done just as they should have done, why should it not at this end have the indorsement of the great body of the people? We are as close to the people as the other end of the Avenue.

Mr. POMERENE. Mr. President, may I ask the Senator a question?

Mr. MARTINE of New Jersey. Certainly.

Mr. POMERENE. I realize that all Senators want to do what the proprieties of the occasion may suggest; but let me ask my distinguished friend from New Jersey this question: Assume, for the sake of argument, that a very prominent citizen of New Jersey had been arrested, indicted, convicted, and sentenced for the commission of some high crime, and the only questions were two—first, as to the regularity of the proceeding, and, secondly, as to the extent of the sentence—would the Senator think that the British Parliament or the German Reichstag would be justified in passing a resolution to interfere with what the great Commonwealth of New Jersey had seen fit to do?

Mr. MARTINE of New Jersey. In answer to that I will say I do not propose to interfere. I only propose to express the kindliest sentiments for humanity. The dogmatic argument of the lawyer is very apparent. Of course we have no right. I realize that. I realize that we can not nolens volens interfere, but we can express the sentiment of the great liberty-loving people of America and protest against it. I can see no great evil. I am not learned in the law, and I thank God for it. I am not learned in diplomatic matters of circumlocution and evasion and deceit. I do not know any of them, thank God. But if you believe as was expressed by the Senator from Idaho [Mr. BORAH], vote the proposition down, and let the responsibility rest upon those who vote it down.

I should like to have a vote on this question. I do not want to prolong the debate. I know the question of money is pressing here—the amendment of the Federal banking act—because money is more than human life. So let us get through with it.

Mr. WILLIAMS. Mr. President, when little children argue they generally begin by saying, Suppose this or that. I am going to imitate their example, and I am not going to take over about three minutes.

Suppose that when Mrs. Surratt had been sentenced and after the trial which took place immediately after the war the British House of Commons had passed a resolution saying, "Whereas Mrs. Surratt has been hastily convicted after a so-called trial, therefore the British House of Commons begs the President of the United States to pardon her," how do you suppose it would have been received in the United States?

The only difference between the two cases is that Mrs. Surratt was hastily convicted after a so-called trial. She was a woman and had never served in the Army or in the Navy and she was tried by martial law. In that case somebody might have had good reason to say that she had been hastily convicted after a so-called trial.

Sir Roger Casement has received not a so-called trial, as you all know, but a trial according to the course of British law. For one nation to interfere with the course of justice in another nation and to put up its opinion as to whether that course of justice has been adequate and according to the rule of procedure in that other nation is an unheard-of thing.

Let me suppose another case. Suppose that a man who had been in constant communication with Jefferson Davis during

the war had gone to the city of Chicago, or had attempted to get there, and meanwhile had organized a force in the city of Chicago and that force had seized the post office and shot down the first man with a blue uniform on, and that after he had been convicted and tried by the courts of the United States, hastily, hurriedly, properly, or improperly, the British House of Commons had passed a similar resolution.

Mr. President, for one organized Government to arraign the administration of justice under another organized Government is one of the most insulting things that a Government can perpetrate toward another, and it seems to me that everybody must see it. Put yourself in their places, forget that you are Americans with Irish sympathies, as most of us are, and imagine what the effect would be upon you in either of the cases I have supposed, if you had the pardoning or the commuting power. Would not the thought in your mind be this: "It may be that I ought to do this thing, but it is none of your business; it is not your affair; it is my affair. I am the head of an independent sovereign power. We are responsible to nobody but God for the course of justice which we mete out to our own citizens; and whether Mrs. Surratt was properly tried or improperly tried is not the business of the British House of Commons; it is the business of the Government of the United States. I might have pardoned her; but since you have been insolent and insulting enough to undertake to criticize the course of justice under my Government, I will at least hold back the question of the consideration of commutation or of pardon until all the world shall know that your interference has had nothing to do with it."

Mr. MARTINE of New Jersey. Mr. President, I am sorry the Senator from Mississippi has brought up the matter of the trial of Mrs. Surratt. I was old enough at the time to remember those horrors.

The VICE PRESIDENT. The Chair must feel constrained to try once again to enforce the rules of the Senate. Two speeches a day upon a given subject have been the rule up to this time.

Mr. MARTINE of New Jersey. This can not be considered, I think, with deference to the Vice President, as two speeches a day. I think it is one; but if the Senator from Mississippi will pardon me, I simply want to say that I think it unfortunate that he has referred to the trial of Mrs. Surratt. I repeat, I was old enough to remember the horrors of that time; and that trial is a blot on our history. I believe that, whatever might be the law, the British Parliament, however they might be influenced by our interference, generally speaking, will recognize the fact that this is the great representative body of the people of this country, of humanity, and of advanced civilization.

Mr. President, I ask for a vote on the resolution.

Mr. PHELAN. Mr. President——

Mr. VARDAMAN. I desire to ask the Senator from New Jersey a question.

The VICE PRESIDENT. The Senator from California [Mr. PHELAN] is recognized.

Mr. VARDAMAN. I should like to ask the Senator from New Jersey a question, if he will permit me.

Mr. MARTINE of New Jersey. Certainly.

Mr. PHELAN. I have the floor; but I yield in order that the Senator from Mississippi may ask a question of the Senator from New Jersey.

Mr. VARDAMAN. To meet objections which are being made to this resolution, and which I think myself ought to be urged, and which would probably prevent me from voting for it if it should come up for consideration—that is, the criticism of the courts of England contained in the preamble—I suggest to the Senator from New Jersey that he could remove those objections by amending the preamble and letting the Senate express its sympathy with the condemned man. I should be glad to vote for the resolution if amended in that way.

Mr. PHELAN. Mr. President, I am in favor of the motion of the Senator from New Jersey [Mr. MARTINE] to relieve the Committee on Foreign Relations from the further consideration of this matter, in order that the question may be voted on by the Senate.

In case the committee is relieved of further action in connection with it, I, in common with the Senator from Mississippi [Mr. VARDAMAN], should prefer a different phraseology from that expressed in the resolution as submitted by the Senator from New Jersey. I would suggest, in that event, that the preamble be eliminated, and this is the form of resolution which I propose to offer to the Senate in the event the present motion prevails:

Resolved, That the President of the United States be, and is hereby, requested to ask the British Government to exercise clemency in the treatment of Irish political prisoners.

Mr. President, there seems to be a misunderstanding here as to the proprieties of the occasion. There is no question whatever about that, because there are illustrious precedents for petitions, if you please, or requests such as this, addressed to foreign Governments in behalf of political prisoners. There is, as the Senator from Ohio will admit, a very great distinction between political prisoners and men accused of ordinary crime. Time and time again political prisoners have been, by the grace of their Governments, on festal occasions, on kings' birthdays, given their freedom, because there is not ascribed to offenders guilty of acts committed in the pursuit of political and patriotic purposes the same degree of turpitude as to those who meanly commit crime for personal advantage or for personal revenge.

James Anthony Froude, the great English historian, I recall, has said something like this: Democrat and aristocrat, patrician and plebeian, have alike dyed their hands in blood in working out the problems of politics; but impartial history declares that the crimes of the popular party have been lighter in degree, whilst they have in themselves more to excuse them; and if the violent acts of revolutionists have been held up the more conspicuously for condemnation, it is only because the fate of the gentleman and nobleman is more impressive to the imagination than the fate of the peasant and the artisan.

These Irish revolutionists have been actuated by the highest motives. What they have done has been a matter of racial pride to the men of their blood throughout the world. George Bernard Shaw has said that there was no turpitude in their offense, because their motives were singularly pure. The men who have already been condemned and basely shot—political offenders—by drumhead court-martial were the poets and the dreamers of Ireland, men of high literary attainments, pure spirits seeking something, perhaps unattainable, because we know the power of England; but we can have but respect even if they led a forlorn hope in the pursuit of that object of their dreams, the independence of their native land. It would ill become the American Senate to refuse to offer sympathy and to ask for clemency.

John Ruskin, himself one of the greatest of Englishmen, has observed that—

> The Irish are a witty and affectionate people, and can not be ruled by the witless and the heartless.

That tells the whole story. They can not be ruled by the witless and the heartless.

The uncompromising spirit of Irish liberty is something which was infused into early America, because we are told one-half of our Revolutionary Army was composed of Irishmen, and that is what helped to win independence for us.

It was the greatest Irishman, perhaps in eloquence, Edmund Burke, who made the plea in the British House of Commons, as we are doing here, for moderation in the treatment of America. "You can not indict a whole people," he said. Therefore I think it would be well in harmony with the proprieties for this body to express sympathy and to request at the same time through the proper channel, the President of the United States, an exercise of clemency.

Mr. MARTINE of New Jersey. Mr. President, I should like to ask how that would differ from the resolution that I have offered? It is a mere difference in words and form.

Mr. PHELAN. I do not yield the floor, Mr. President.

Mr. MARTINE of New Jersey. Very well.

Mr. PHELAN. I have here the precedents to which I have referred.

Secretary of State John Sherman, in the protest of the United States to Spain against reconcentration in Cuba in 1897, spoke "in the name of common humanity."

As precedents which justify friendly interposition in the present emergency, I would cite the letter of Thomas Jefferson, Secretary of State, to Gouverneur Morris, minister to France, in 1793, requesting the release of Gen. Lafayette from imprisonment; the action of President Fillmore in 1851 in conveying Kossuth in an American war vessel from Turkey to the United States; the communication of Secretary of State Seward, in 1867, to Mexico, in behalf of clemency for Maximilian; the communication of Secretary of State Fish, in 1872, to Spain, protesting against the death penalty being inflicted upon Cuban insurgents; the action of President Grant, in 1867, in obtaining a mitigation of the capital punishment of those convicted in the Canadian courts in connection with the Fenian uprising.

A parallel case absolutely, because, on the one hand, the Fenians are here involved, now called the Sinn Feiners, and, on the other, the British Government, then represented by Canada.

And again:

The representations made by President Grant to England in 1867, in behalf of the Irish prisoners in the Manchester case,

and the numberless requests made by various Presidents of the United States to Russia for clemency in behalf of her Jewish subjects.

These are cases well in point, Mr. President, because they involved the interposition for clemency by the United States in the name of humanity, in the name of liberty, for men, not necessarily citizens of the United States who may have carried our propaganda of liberty into foreign lands, but in behalf of citizens and subjects of foreign powers.

No; you can not suppress this spirit, nor should any attempt be made to thwart it, of all places in the highest legislative body in the United States.

I might speak of this subject indefinitely, but I think I have made the point on which I rose to speak. I remember, however, and I always think of it in connection with the Irish revolutionary movement, of what former United States Senator Gen. E. D. Baker, a most eloquent man, said, and I quote him because he made the supreme sacrifice himself. Not only did he not refuse to express sympathy in his official capacity but he took up arms, in behalf of what? In behalf of the cause of liberty, although it only affected the humble and despised black man. He had no apology to make; he had no lawyers to plead irregularity; he was carried away by that same sentiment which, I am sure, actuates us all. He said this—I quote from memory: "I for one am not ashamed of freedom; I rejoice in her power; I march beneath her banner, and I glory in her strength. I have seen her stricken down on a hundred chosen fields of battle; I have seen her friends flee from her; I have seen her foes gather around her, binding her to the stake and scattering her ashes farther yet; but when they turned to exult, I have seen her meet them again face to face, full clad in complete steel and brandishing in her strong right arm a sword red with insufferable light."

You can not, Mr. President, suppress that spirit of freedom. I should dislike to see it suppressed in the Senate of the United States. I hope that the motion will prevail, in order that there may be offered in proper terms a respectful appeal to England to exercise, in the name of humanity and of liberty, clemency to Irish prisoners.

Mr. VARDAMAN. Mr. President, the traitor in this instance is the unsuccessful patriot. If George Washington had failed in his efforts to achieve the independence of the American colonies, he would in all probability have been treated as Sir Roger Casement is now being dealt with. Had Sir Roger Casement succeeded in the liberation of Ireland and in securing her independence, he would have been acclaimed throughout the world as a great leader and patriot.

I join with the Senator from California [Mr. PHELAN] in the desire to so amend this resolution as to rob it of its offensive language, so that it would not be in any way a reflection upon the courts or the proceedings which resulted in the conviction of this man. It is but an expression of sympathy; an expression of desire on the part of the Senate that the English Government, strong and great as it is, under the peculiar circumstances in which this conviction was secured will now exercise that clemency which we all believe ought to be shown in this instance. I hope the committee may be discharged from the further consideration of the resolution and that the Senate will correct it and then agree to it.

Mr. PHELAN. Mr. President, I offer my resolution and ask unanimous consent for its consideration at this time, because delay by reference to the committee might involve in the meantime the infliction of the supreme penalty.

Mr. THOMAS. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator from Colorado will state it.

Mr. THOMAS. I understand this to be a motion to take a resolution from a committee.

The VICE PRESIDENT. It is.

Mr. THOMAS. During the consideration of such a motion, is a motion to amend the resolution in order?

The VICE PRESIDENT. It is not.

Mr. MARTINE of New Jersey. Mr. President, I ask most respectfully that we may have a vote on my motion to take from the Committee on Foreign Relations the resolution presented by me so that the resolution may be laid before the Senate.

Mr. GALLINGER. Let us have a vote.

SEVERAL SENATORS. Vote!

The VICE PRESIDENT. The question is on the motion of the Senator from New Jersey to discharge the Committee on Foreign Relations from the further consideration of Senate resolution 223. Those in favor of the motion will say "aye." [A pause.] Those opposed, "no." [A pause.]

Mr. LA FOLLETTE. I ask for the yeas and nays.

Mr. MARTINE of New Jersey. I call for the yeas and nays.

The yeas and nays were ordered.

Mr. REED. Mr. President, before the vote is taken, I want to say this: If this resolution were now amended so that it should embrace the language, or substantially the language, suggested by the Senator from California [Mr. PHELAN], I have no doubt the Committee on Foreign Relations—although I have no authority, of course, to speak for them—would be entirely willing to report such a resolution. For my part, I should be entirely willing to vote for such a resolution. We are now asked to bring the present resolution before the Senate without any assurance whatsoever that it will be amended or that its offensive language will be stricken out. The author of the resolution has not even indicated that he would accept an amendment in the form, or substantially in the form, suggested by the Senator from California.

Mr. MARTINE of New Jersey. Mr. President, will the Senator yield for a moment?

Mr. REED. I shall occupy only a moment. I say this: I would absolutely refuse to vote for the resolution offered by the Senator from New Jersey, because its language is exceedingly offensive. If it were sent in that form to the Government of any independent country, it would arouse a resentment which would be certain, or almost certain, to injure the cause of the man whose life is at stake, and would almost make it impossible for a great and independent Government to grant clemency to him. That has already been said, but I want to express it as my own sentiment. When the preamble of this resolution undertakes to say, in substance and effect, that the trial was a farce, that the forms of law were employed to produce an unjust result—when that is said to a great and independent Government, it is an insult of the grossest kind to that Government. We can not escape it. That sort of a preamble to an appeal for clemency is nothing more nor less than the worst possible act you can accomplish in order to promote everything but clemency. Moreover——

Mr. MARTINE of New Jersey. Mr. President——

Mr. REED. Just a moment. The Senator will please let me finish this thought.

Mr. MARTINE of New Jersey. Why, I have no desire to interfere with the Senator from Missouri.

Mr. REED. I know the Senator has not.

The last statement in this resolution, it strikes me, is likely to lead us into all kinds of absurdities. Notice the language:

Resolved, That the President of the United States be, and is hereby, requested to ask a stay in the execution of said sentence—

Not as an act of mercy, not as an act of clemency, but—

in order that new facts may be introduced.

What new facts? What fact is there that was not introduced? What proper or competent evidence was excluded? What are we to suggest to England? And if the President were to write over there and say: "I ask you to suspend this sentence in order that new facts may be introduced," the British Government would naturally say: "What facts have you to present?" We can not afford to put our Government, or our people, or the Senate, in that kind of a position.

I am heartily in accord with the idea that what can be done to produce clemency may well be done; but the worst enemy of Sir Roger Casement, the man who most desires to see him executed, could hardly devise a plan that would make more for that lamentable result than this resolution.

The author of the resolution has not even said to us that he will submit the resolution, if it comes before the Senate, to such an amendment as has been suggested.

Mr. MARTINE of New Jersey. Mr. President, in answer to the Senator, if I may, I will state that after I had made some remarks on this subject some days ago I asked the chairman of the Committee on Foreign Relations what he would say to a resolution couched in the following words:

Resolved, That the President be requested to advise our ambassador to Great Britain to use his kindly offices, unofficially, to ask for the commutation of the sentence of death passed upon Sir Roger Casement.

And his response to that was that he wanted the whole thing to go over, and it went over.

Mr. KERN. Is the Senator from New Jersey willing to accept that?

Mr. MARTINE of New Jersey. I will accept that as a substitute.

Mr. SMOOT. Mr. President, I shall be compelled to vote against the discharge of the Committee on Foreign Relations from the further consideration of this resolution. The suggestion that the Senator from New Jersey will amend or accept an amendment to the resolution is not necessary at all. The Senate is asked now to express its opinion as to the resolution

that is now before the Foreign Relations Committee. Just as soon as the Senate votes against the discharge of the committee, as far as that question is concerned, it is settled. If the Senator from California then desired to offer a resolution it would be in order, or if the Senator from New Jersey were recognized and desired to offer a resolution it would be in order, and the Senate would not put itself on record in any way as approving in any part the resolution that is now before the Committee on Foreign Relations. So we are losing time, it seems to me, and it is not barring the Senator from New Jersey from offering any other resolution, nor is it barring the Senator from California.

Mr. MARTINE of New Jersey. Mr. President, I fear that the truth of the whole matter, the milk in the coconut, is that we do not want to put ourselves on record. I do. But, Mr. President, I will ask unanimous consent to withdraw my former resolution, and I offer this, then, which I presented before:

Resolved, That the President be requested to advise our ambassador to Great Britain to use his kindly offices, unofficially, to ask for the commutation of the sentence of death passed upon Sir Roger Casement.

I ask unanimous consent to offer that.

Mr. PHELAN. Mr. President, I ask unanimous consent for the immediate consideration of this resolution——

Mr. MARTINE of New Jersey. Well, I asked for mine first.

Mr. PHELAN (continuing). As a substitute.

Mr. STONE. Mr. President——

The VICE PRESIDENT. We are getting in a worse position than ever.

Mr. MARTINE of New Jersey. Mr. President, I rise to a question——

Mr. STONE. I rise to a point of order.

The VICE PRESIDENT. There is but one question before the Senate, and there can be no other until it is disposed of, and that is the discharge of the Committee on Foreign Relations.

SEVERAL SENATORS. Let us vote.

Mr. STONE. If the Senator will withdraw that motion——

Mr. MARTINE of New Jersey. Which; the last one?

Mr. STONE. No; the motion to discharge the committee.

Mr. MARTINE of New Jersey. Well, hesitatingly and reluctantly—I dislike to see the Senate of the great United States write itself down a moral coward—I withdraw it, Mr. President.

Mr. PHELAN. I offer my resolution.

The VICE PRESIDENT. The Senator from California offers a resolution (S. Res. 236), which will be read by the Secretary.

Mr. MARTINE of New Jersey. Now, I——

Mr. THOMAS. Mr. President——

The Secretary read as follows:

Resolved, That the President of the United States be, and is hereby, requested to ask the British Government to exercise clemency in the treatment of Irish political prisoners.

Mr. THOMAS. Mr. President, under the rule that goes over, does it not?

The VICE PRESIDENT. If there is an objection, it does.

Mr. THOMAS. I ask that it may go over.

Mr. MARTINE of New Jersey. I object to its consideration at this time. Now, Mr. President, I have not withdrawn my resolution.

The VICE PRESIDENT. The Senator from New Jersey offers a resolution (S. Res. 237), which will be stated.

Mr. MARTINE of New Jersey. And I beg, Mr. President, to say that notice was given that I should present that particular one.

The Secretary read as follows:

Resolved, That the President be requested to advise our ambassador to Great Britain to use his kindly offices, unofficially, to ask for the commutation of the sentence of death passed upon Sir Roger Casement.

Mr. OVERMAN and Mr. THOMAS addressed the Chair.

The VICE PRESIDENT. The Senator from Colorado.

Mr. THOMAS. I ask that the resolution go over under the rule.

The VICE PRESIDENT. The resolution——

Mr. MARTINE of New Jersey. I should like to ask——

The VICE PRESIDENT. If the Chair could just get an opportunity at some time during the proceedings to state the condition of affairs, the Chair will be thankful to certain Senators.

Mr. THOMAS. Mr. President——

The VICE PRESIDENT. This resolution was presented upon a former day and is now before the Senate for consideration.

Mr. THOMAS. Mr. President——

The VICE PRESIDENT. The Senator from Colorado.

Mr. GALLINGER. Was that same resolution presented?

Mr. MARTINE of New Jersey. It was presented upon a former day.

Mr. LODGE. Not that same resolution.

Mr. MARTINE of New Jersey. Yes, sir; that same resolution.

The VICE PRESIDENT. The same resolution. There is not any doubt about it.

Mr. STONE. Why, Mr. President, I think the Chair is clearly wrong in his understanding of the facts. What happened was this: The Senator called up his motion to discharge the committee, and at the time, as he has done now, read from his place on the floor the resolution he now sends to the desk——

Mr. MARTINE of New Jersey. And then——

Mr. STONE. And asked, addressing himself to me personally, whether I had any objection to that in place of the other. It seems to me that in so doing he was offering an amendment to a resolution before the committee on his motion to discharge.

Mr. PHELAN. Mr. President, was not the second resolution of the Senator from New Jersey submitted to the committee?

Mr. MARTINE of New Jersey. No, sir; it was not.

Mr. THOMAS. Mr. President, it seems to me that in response to my parliamentary inquiry the Chair stated the position to be precisely as it was stated by the Senator from Missouri.

Mr. PHELAN. Mr. President, I desire to ask a question of the Senator from New Jersey. I refer to the resolution that he has just submitted. Was not that referred the other day to the committee?

Mr. MARTINE of New Jersey. It was not referred to the committee. I asked the Senator what he would say to a resolution couched in those terms.

Mr. PHELAN. Does the RECORD disclose that the resolution was offered to this body?

Mr. MARTINE of New Jersey. Yes; I am sure of that.

Mr. STONE. I think not.

Mr. MARTINE of New Jersey. Well, I am sure it does.

Mr. GALLINGER. I call for the regular order.

The VICE PRESIDENT. The Chair was under an error, as is the Senator from New Jersey. An examination of the RECORD discloses that the Senator from New Jersey moved, on the 17th day of July, to discharge the Committee on Foreign Relations from the further consideration of Senate resolution 223, and in the course of the discussion the Senator inquired of the chairman of the Committee on Foreign Relations as to whether he would consider a resolution in the identical language of this resolution. But the Senator from New Jersey did not present the resolution to the Senate on that day; so, if there be objection to the present consideration of this resolution, it must go over under the rule.

Mr. THOMAS. Mr. President——

Mr. WILLIAMS. Do not make an objection. Let us vote on it.

Mr. THOMAS. Mr. President, in making the objection, I do not wish it to be understood that I am opposed to the resolution. This is a new resolution and one which I think should be considered carefully before we take final action upon it. Unless I change my present opinion, I shall vote favorably upon it when the opportunity presents itself.

Mr. President, whatever else may be said of this debate, it has been in some respects illuminating. Some time ago I was favored with a pamphlet or circular issued under the auspices of one of the German-American societies giving the percentage of Germans who served in the American Revolutionary War. I do not remember the percentage nor do I question its accuracy. It was very large, however, and established the writer's contention. Some time prior to that I was given a book which, if I remember, was entitled "History of the Jews in the Revolutionary War," and the percentage of soldiers of that race in the war for American liberty there stated was very large and very commendable. Nor do I question its accuracy. On the contrary, I indorse it. Now, this morning we are told by a brother Senator that Irishmen comprised 50 per cent of the Army of the American Revolution. I have no doubt that the Senator made the statement after a very careful examination of the record. We all know from our historical researches that a great many Poles enlisted in the cause of the Revolution and that their blood was shed upon many a battle field. We also had very prominent and great assistance from subjects of the French King, with whose percentage I am, however, not familiar.

But, Mr. President, the inference which I am compelled to draw from all these sources of information, assuming them to be accurate, is that there were few, if any, Americans in the Revolutionary Army. We had two or three commanders who have achieved immortality through the success of that great conflict, and unquestionably they are entitled to due regard and due consideration. But if all these claims are correct we are forced to the melancholy conclusion that this, the American Revolution, was so called only because it was fought on the arena of the Western Hemisphere.

Mr. McCUMBER. Mr. President, I desire to ask the Senator, in view of the many statements that I have heard in the Congress of the United States, if it would not be well to have a committee appointed to ascertain if there were really any Americans engaged in the great Revolutionary War? I have serious doubts, if I am to believe all the statements that come from the Members of the Senate, whether there were really any Americans engaged in it; and I doubt even if Washington could claim to be an American.

Mr. THOMAS. Mr. President, I think such a resolution should be introduced, and appropriately referred to the Committee on Revolutionary War Claims. [Laughter.]

Mr. PHELAN. Mr. President, I should like to remind the Senator from North Dakota that the authority for my statement is a historical reference in a report of an investigation which was held by a committee of the British House of Commons into the causes of the Revolutionary War, where witnesses were heard, and it was stated that fully one-half of the Revolutionary Army consisted of Irishmen; that there were Irishmen from the North and Irishmen from the South; and that they to that extent, as far as history goes, participated in the Revolutionary War seems to be without question. I have never heard it disputed before. It might be subject to verification. But I desire to say that, whether Irish born or not, if they fought for the cause of liberty, they were good Americans, because American nationality is not determined by the color of a man's skin but by the color of his mind; not by the language in which he expresses his ideas, but by the character of the ideas themselves.

Mr. McCUMBER. Mr. President, I suppose the Senator will at least allow us to claim Benedict Arnold as an American, will he not?

Mr. FLETCHER. Mr. President, I move that we proceed to the consideration of unobjected bills on the calendar.

Mr. PHELAN. Mr. President, I ask unanimous consent for the immediate consideration of my resolution. That is agreeable to the chairman of the Committee on Foreign Relations.

Mr. MARTINE of New Jersey. I ask that it go over. I object, Mr. President.

The VICE PRESIDENT. It was already objected to and has gone over under the rule.

Mr. FLETCHER. Mr. President, in connection with the motion to proceed to the consideration of unobjected bills on the calendar I would include that we begin where we left off the last time the calendar was considered.

Mr. SMITH of Georgia. Mr. President——

The VICE PRESIDENT. The morning hour having expired, the Chair lays before the Senate the unfinished business, which is House bill 16460.

ARMY APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 16460) making appropriations for the support of the Army for the fiscal year ending June 30, 1917.

Mr. WORKS. Yesterday in my absence the amendment of the committee found on page 9 of the bill was adopted. I desired to say something about that amendment before its adoption. I ask unanimous consent that the vote by which the amendment was agreed to may be reconsidered. I understand the chairman of the committee is quite willing that this shall be done.

Mr. CHAMBERLAIN. So far as I may be permitted to do so, I am perfectly willing that it shall be reconsidered.

The VICE PRESIDENT. The Senator from California moves to reconsider the vote whereby the amendment was adopted.

The motion to reconsider was agreed to.

The SECRETARY. On page 9 strike out the matter beginning with line 11 and ending in line 23.

Mr. WORKS. I ask the chairman of the committee to allow the amendment to be passed over for the present.

The VICE PRESIDENT. Is there objection to passing over the amendment for the present?

Mr. CHAMBERLAIN. I have no objection, Mr. President.

The VICE PRESIDENT. The amendment will be passed over.

The reading of the bill was resumed.

The next amendment was, under the subhead "Miscellaneous," on page 24, line 14, after the word "available," to strike out "$1,000,000" and insert "$1,126,412," so as to make the clause read:

For commutation of quarters and of heat and light to commissioned officers, members of the Nurse Corps, and enlisted men on duty at places where no public quarters are available, $1,126,412.

The amendment was agreed to.

Mr. LODGE. I should like to ask the Senator in charge of the bill, as I was absent yesterday afternoon, what was done with the amendment on page 18, the proviso after line 10?

Mr. CHAMBERLAIN. That was agreed to, I will say to the Senator.

Mr. LODGE. I will reserve the point of order in the Senate. I want to ask about breaking up the system of details.

Mr. CHAMBERLAIN. Does the Senator simply reserve the right to make a point of order?

Mr. LODGE. I will reserve the amendment and make the point of order in the Senate.

The next amendment was, on page 24, line 15, after the word "deposits," to strike out "$116,000" and insert "$150,000," so as to make the clause read:

For interest on soldiers' deposits, $150,000.

The amendment was agreed to.

The next amendment was, on page 24, after line 15, to insert:

Section 1305 of the Revised Statutes, as amended by act of June 12, 1906 (34 Stat., p. 246), is further amended, to take effect July 1, 1916, to read as follows:

"Any enlisted man of the Army may deposit his savings, in sums not less than $5, with an Army quartermaster, who shall furnish him a deposit book, in which shall be entered the name of the quartermaster and of the soldier, and the amount, date, and place of such deposit. The amount so deposited shall be accounted for in the same manner as other public funds, and shall be deposited in the Treasury of the United States to the credit of the board of trustees created by this act, and shall be known as the Army deposit fund, repayment of which to the enlisted men on discharge from the service shall be made out of the fund created by said deposits, and shall not be subject to forfeiture by sentence of court-martial, but shall be forfeited by desertion, and shall not be permitted to be paid until final payment on discharge, or to the heirs or representatives of a deceased soldier, and that such deposits be exempt from liability for such soldier's debts: *Provided*, That the Government shall be liable for the amount so deposited to the person so depositing the same. There is hereby created a board of trustees for the control, supervision, and administration of the Army deposit fund. Said board shall consist of the Secretary of War, the Secretary of the Treasury, and the Attorney General, severally, acting ex officio, and shall have power to make all necessary and proper regulations for the receipt, transmittal, custody, deposit, investment, and repayment of the funds deposited by enlisted men of the Army, and to carry this act into full force and effect. All the funds in the pay of the Army deposit fund as shown on the books of the Treasury on the date of the approval of this act and all deposits received thereafter shall be deposited by the board of trustees in such solvent banks, whether organized under national or State laws, being subject to national or State supervision and examination, as shall offer the best rate of interest; but 7 per cent of deposits received from enlisted men shall be retained by the board of trustees and kept with the Treasurer of the United States, who shall be the treasurer of the board of trustees, in lawful money as a working balance, from which deposits maturing under the provisions of this act may be paid. The board of trustees shall take from such banks such security in public bonds or other securities as the board may prescribe, approve, and deem sufficient and necessary to secure the safety and prompt payment of such deposits on demand: *Provided*, That the banks shall not be required to maintnain in respect to such deposits a lawful money reserve as provided in sections 5191 and 5192 of the Revised Statutes of the United States. The board of trustees shall cause to be determined, in such manner as they may deem to be for the best interests of the enlisted men, from the interest earned by the Army deposit fund, the rate to be paid on deposits made by enlisted men, and each depositor shall be paid the interest due on his deposits, at the rate determined by the board, at the time of the repayment of his deposit on his discharge from the service."

Mr. CUMMINS. I ask that the amendment, beginning with line 16 on page 24 and ending with line 22 on page 26 be passed over. I am making some inquiry with regard to a part of that amendment, and I am not ready to discuss it at this moment.

Mr. CHAMBERLAIN. I will say to the Senator that that is an amendment to the present law which was suggested by the War Department, and it was adopted by the committee without change.

Mr. CUMMINS. I understand that, but I think the committee has overlooked some considerations that ought to have great weight with the Senate. From the study I have made of it up to this time I am opposed to the creation of a new board and opposed to the substitution of the present plan for paying interest upon the deposits of enlisted men. I think the existing law is much better in that respect. I hope the Senator in charge of the bill will permit it to go over for the present.

Mr. SMITH of Georgia. Before it goes over, I should like to ask the Senator from Iowa if it is not true that the Government now pays 4 per cent on the savings of the enlisted men?

Mr. CUMMINS. That is the present law.

Mr. SMITH of Georgia. And you feel that that is a much wiser and safer course and encourages them to make savings rather than to create a board and reinvest it.

Mr. CUMMINS. I think so. The amendment proposed by the committee is that the deposit of savings shall be loaned out to the banks of the country, whether State or national, for the best rate of interest possible, and that there shall be an accounting at stated periods, and the soldier gets the benefit only of the net rate of interest received.

Mr. SMITH of Georgia. And what it accomplishes savors of an uncertain result, instead of a certain result that the law now produces. I sympathize very cordially with the view of the Senator from Iowa. Why can we not dispose of it now by mak-

ing a point of order upon the provision, as it changes existing law?

Mr. CHAMBERLAIN. May I say to the Senator that when this proposition was adopted by the Senate Committee on Military Affairs it was done without very much consideration. Subsequent investigation of the matter has led me to believe that perhaps the present law is the better law. It is free from complications, and the amount that the enlisted man is to get is fixed by statute. This leaves it in doubt, and the possibility of the creation of a bureau that might cost some money.

Mr. CUMMINS. Then, inasmuch as that is the feeling of the Senator in charge of the bill, I make a point of order that it is general legislation upon an appropriation bill.

Mr. CHAMBERLAIN. I do not resist the point of order.

The VICE PRESIDENT. The Chair will have to sustain the point of order.

The next amendment was, on page 27, line 18, after the word "law," to strike out "$612,500" and insert "and for the National Guard officers when called or drafted into the service of the United States, $812,500," so as to make the clause read:

For mileage to commissioned officers, contract surgeons, and expert accountant, Inspector General's Department, when authorized by law, and for the National Guard officers when called or drafted into the service of the United States, $812,500.

The amendment was agreed to.

The next amendment was, on page 27, line 22, after the word "service," to strike out "$250,000" and insert "and for the National Guard officers when called or drafted into the service of the United States, $2,000,000," so as to make the clause read:

For additional 10 per cent increase of pay of officers on foreign service, and for the National Guard officers when called or drafted into the service of the United States, $2,000,000.

Mr. CHAMBERLAIN. I said the other day that when the appropriations made by the House were increased quite largely it was with the thought on the part of the committee that the acute situation along the border would necessitate practically an invasion of Mexico by our troops or that we should be sending them across the border for the purposes of our Government. That acute situation seems to be relieved now and there are some of these appropriations which might be reduced. I suggest that the amount in line 24, at the bottom of page 27, be reduced from $2,000,000, as fixed by the Senate committee, to $500,000. I think that that will be ample to carry out the purposes of the Government at this time.

The VICE PRESIDENT. The question is on the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 28, line 2, after the word "service," to strike out "$800,000" and insert "and for the National Guard enlisted men when called or drafted into the service of the United States, $6,000,000," so as to make the clause read:

For additional 20 per cent increase of pay of enlisted men on foreign service, and for the National Guard enlisted men when called or drafted into the service of the United States, $6,000,000.

Mr. LEE of Maryland. Mr. President, I wish to be heard upon that amendment.

Mr. CHAMBERLAIN. May I interrupt the Senator just a moment. Does the Senator mean that he desires to be heard upon the italicized language inserted in the bill or the amount of the appropriation?

Mr. LEE of Maryland. I should like to say I do not think that this sum, available for the pay of the National Guard, on the theory that they are in the service of the United States and possibly going into Mexico, should be reduced. I think you will lose by this congressional action some of the benefit of having those men assembled upon the Mexican frontier. They are there now with a certain potential significance, and for the Senate or Congress to legislate in a way that might indicate to the de facto government of Mexico or any other authority that they are not there completely prepared to go in if necessary is a great mistake of policy.

This money will not be spent unless they go; but it will not only have a bad effect upon the standpoint of our relations with the Mexican situation but it will have a bad effect upon the rapidly improving discipline of these troops. They are now on the borders of Mexico 91,000 of them assembled in the last few weeks and 36,000 more of them in camp in the United States. They are being disciplined with earnestness, having left their families and their homes and their business behind them. They are not trifling in the least degree. They are absolutely in earnest, and their discipline is improving every minute. They have gone there on the theory that they are there for a large possible purpose, and for Congress now to take a contrary position and cut down the suggested appropriation, which represents the extent of the possible purpose, seems most inopportune from every standpoint.

Mr. LODGE. I should like to ask the Senator a question.

Mr. LEE of Maryland. Certainly.

Mr. LODGE. Can the Senator give the Senate the figures by States? He stated that there are 91,000 militia now on the border.

Mr. LEE of Maryland. I can not. I do not think that the source of these figures is arrived at by States. The quickest thing in the world and the most powerful in the United States are the railroad organizations of the United States, and the railroads have reported back to the military officials of the Government that they have transported 91,000 National Guardsmen to the front.

Mr. LODGE. Would not the War Department be likely to know?

Mr. LEE of Maryland. The War Department is where I got the information that there are 91,000 National Guardsmen on the border, and it bases that on the number of tickets bought and returned as used, single-fare tickets to the border. That is what the present information is based on so far as the men on the border are concerned.

Mr. LODGE. It is a curious military source of information.

Mr. LEE of Maryland. Yes, the civil accounting processes of the railroads seem to be ahead of the enumerating processes of the department.

Mr. SMITH of Georgia. Does the Senator mean that the department does not know through its own report the exact number of men who have left their States to go to the border?

Mr. LODGE. It is incredible.

Mr. SMITH of Georgia. And does not the department know promptly the number that arrive there?

Mr. CHAMBERLAIN. If I may interrupt the Senator for just a moment, I will state to the Senator from Georgia that the War Department does know to a man how many are there. They have given me the information, but it is a sort of secret; they have requested me not to make public, for military reasons, the exact number of men they have on the border, but it is a matter that they know.

Mr. LODGE. The figures have been stated here.

Mr. CHAMBERLAIN. The figures have not been stated correctly. I do not think the Senator from Maryland purports to give the figures exactly as the War Department gives them.

Mr. LODGE. Of course, 91,000 railroad tickets means absolutely nothing.

Mr. CHAMBERLAIN. The War Department know, because they advised me.

Mr. LEE of Maryland. I repeat exactly what I had from the department day before yesterday on this subject and precisely as the department has the information, namely, that there were 91,000 National Guardsmen transported to the front as based on the railroad tickets collected. That is the principal source of information on the subject, and there has not been time for the report to come in through the ordinary military channels. There is not any question about that so far as the information was given to me day before yesterday at the War Department.

There are in addition to that 36,000—35,266 men, if the Senator would like to have it a little more particularly—in camp waiting to be transported, according to the future determination of the military authorities. So there are in camp and on the border 126,266 National Guardsmen.

Mr. President, I want to continue the thread of my remarks about cutting down this available money in case the Guard are to be mustered into the service, or rather in case the Guard are to be ordered by the President under their oath to go into foreign service.

I do not think there is the slightest occasion for drafting the Guard into the service of the United States. I think the oath they have taken is sufficient if the oath has any meaning at all. For that reason there is no occasion for using the draft resolution passed by this body, but it may be necessary for the President, under the oath that the Guard has subscribed, to order them into Mexico for the repelling of invasion or under other authority assumed by the President of the United States, which authority the guardsmen have sworn to support. If that happens, and it looks as though the administration thought it might happen, with all these 91,000 men on the Rio Grande, for the Senate to reduce or omit the provision for this contingency is really to belittle the situation so as to have a possible bad effect upon the attitude of the Mexican people and the Mexican de facto government toward this country, and to have a bad effect on the work and discipline of the National Guard which is progressing with great rapidity and very satisfactorily under the present situation, which they believe to be an actual one, which they believe to be sufficiently

important to have left their homes and left their businesses to take part in, and under which these men are conducting themselves with credit to the organizations to which they belong and with honor to their country. For the Senate to come along now and say, this situation does not mean anything, is like saying, "You are all still on the north side of the Rio Grande. We will take away any possible provision of pay that might be distributed on the theory that you might pass over. We proclaim by our legislation that you are not there for the purposes that you are apparently there for."

Mr. SMITH of Georgia. Mr. President, I do not understand how the Senator puts that construction upon this language.

Mr. LEE of Maryland. The proposition is to take away the pay that can be given to the Guard in foreign servict.

Mr. SMITH of Georgia. I do not so understand it.

Mr. LEE of Maryland. On what page is that?

Mr. SMITH of Georgia. On page 28.

Mr. LEE of Maryland. I understand the amendment is to cut down the appropriation from $2,000,000 to $500,000.

The PRESIDING OFFICER (Mr. HITCHCOCK in the chair). That has been agreed to.

Mr. LEE of Maryland. I asked to be heard on that proposition before it was agreed to. That is what we are talking about, at least that is what I supposed we were talking about.

The PRESIDING OFFICER. Without objection, it will be considered as an open question.

Mr. CHAMBERLAIN. I have no disposition to preclude a discussion of the matter. I am perfectly willing to reconsider it.

Mr. LEE of Maryland. So the proposition before the Senate is to take the possible 10 per cent increase for pay of officers on foreign service out of this bill, the provision that has already been put into it by the Senate committee, namely, a provision of 10 per cent increase of pay for officers on foreign service and for National Guard officers when called or drafted into the service of the United States.

Mr. SMITH of Georgia. I do not so understand it.

Mr. WARREN. Will the Senator permit me to correct him. That is not quite what was proposed. The bill originally had for officers $250,000. The committee added the words "and for the National Guard officers when called or drafted into the service of the United States," increasing the amount from $250,000 to $2,000,000. The chairman of our committee has reduced it to $500,000. The language is left exactly as it was and the whole $500,000 is just as much payable to the National Guard officers as to the officers of the Regular Army. It is a mere matter of whether $500,000 is enough, that is all.

Mr. LEE of Maryland. It is perfectly obvious that if the amendment as expressed by the Senate committee figures in line 24 of $2,000,000 is anywhere near correct, and we cut it down to $500,000, it is practically to take away the greater part of the provision so far as this appropriation is concerned.

Mr. WARREN. It would take it away equally from the Regular officers.

Mr. LEE of Maryland. It would take it away equally, perhaps, but the effect would not be equal upon these two forces on the Rio Grande. The Regular officers in the Regular regiments are there in the course of their regular business as soldiers; and here are 91,000 men who are there for the special purpose arising under a call by the President, which special purpose has constrained them to leave their businesses and their homes to answer that call, and they are being disciplined with earnestness and sincerity by their own officers and by the very effective assistance of officers of the Regular Army. The whole procedure, so far as disciplining the National Guard is concerned, is going on with admirable success. The process is a fine one and it should not be struck at from behind, so to speak. It should not be questioned that they are there for an imminent purpose by cutting this sum down in that way. If the Senate committee thought that these men were there for a possible intervention a few days ago, the committee ought to leave the sum just as they fixed it when they had that thought.

Mr. BRANDEGEE. Mr. President, I do not think I clearly comprehend what the Senator means by the expression which he uses. He says these men who are down there on the border think they are there for a real purpose, whereas the Senator does not indicate that they are not there for a real purpose but that if this amount of money is cut down the National Guard may think they are not there for a real purpose.

Mr. LEE of Maryland. In the opinion of the congressional power that cut the amount down.

Mr. BRANDEGEE. For what real purpose do the National Guard think they are now there?

Mr. LEE of Maryland. For the real purpose that was behind the President's call in sending them there, which implied possible intervention in the affairs of Mexico.

Mr. BRANDEGEE. If I understand the Senator, then, although the real purpose of going across the border has been abandoned, still we ought to hold up in this bill——

Mr. LEE of Maryland. The Senator is assuming something.

Mr. BRANDEGEE. For the purpose of fooling the soldiers and make an appropriation so that they will not become demoralized, as the Senator expresses it, when they find it is not the purpose to go across the border.

Mr. LEE of Maryland. I just want to ask the Senator upon what authority does the Senator say the real purpose of the call has been abandoned?

Mr. BRANDEGEE. I do not say it upon any authority, and I do not say it at all. I say the Senator, as it seems to me, intimates that there was a real purpose in sending them there; the Senator says it was to send them across the border. Now, he says if we cut down the appropriation it will prevent the improvement in the discipline of these men who are down there. I do not understand the process of ratiocination which is going on in the Senator's mind on that subject. If the men think they are there for the real purpose of going across, and if they are not going across, or if they do not think they are going across, I do not know why we want to appropriate on the basis that they are going across. It may be the Senator can make it clear to me.

Mr. LEE of Maryland. In the course of the public discussion of this whole matter of military preparations the word "preparedness" has been used. I think the Senator from Connecticut has been one of the Senators to use this word, and he said he was for preparedness, which is to do something in advance, so as to be ready on an occasion.

Now, when you have 91,000 troops on a frontier, called there for a possible special purpose, and all those troops have to do to initiate that purpose is to go across the Rio Grande, and when they go across the Rio Grande they will be paid 10 per cent additional, the Senator can not fail to see that there is an element of preparedness in appropriating pay in advance if they possibly have to cross.

Mr. BRANDEGEE. The Senator, if he will permit me, uses the mysterious and entangling phrase that all they have to do to carry out the real purpose is to go right across the border. That implies, it seems to me, that the real purpose is to go across the border. If that is the purpose, I am willing to appropriate liberally for it, but as long as they are not across the border, and if they are improving every day in discipline and training, being in camp on this side of the border, and if the amount suggested by the chairman of the Military Affairs Committee is enough to pay them, why does the Senator want to appropriate on the basis that they are going to invade Mexico?

Mr. LEE of Maryland. Does the Senator ask me that question?

Mr. BRANDEGEE. Yes; the Senator says that was the real purpose they were ordered down there for, as I understand him.

Mr. LEE of Maryland. The Senator has misconstrued one statement I made. I did not say that to carry out the purpose of the call the troops must go across the border, but, in order to carry out the purpose, they have got to go across the border, if that purpose is intervention in Mexico.

Mr. BRANDEGEE. Of course I agree to that, but I do not get much light on it.

Mr. LEE of Maryland. We can not intervene without intervening, in other words. The Senator will agree to that.

Mr. BRANDEGEE. I will agree that if the purpose is to go across the border then to carry out the purpose we have to go across the border, but that does not give me any illumination.

Mr. LEE of Maryland. That purpose has been sufficiently shown. The President of the United States has ordered 91,000 militia, at a very considerable cost to this country, to go and encamp upon the banks of the Rio Grande.

Mr. CHAMBERLAIN. If the Senator will permit me a moment, I will state that the established law provides that officers on foreign service, and Mexican service would be foreign service just as the Philippines is a foreign service, shall receive 10 per cent extra pay while engaged in foreign service. When the House appropriation of $250,000 was made it was made, as I stated yesterday, before the reorganization act was passed, before the men had been called to the border. When the bill was in the Senate committee the reorganization act was passed and the National Guard had become federalized and had been called into the service of the United States.

The situation on the border appeared to be acute. Whether or not there is going to be trouble there nobody knows; but any way we immediately got estimates from the War Department to cover a situation which might become a very serious one. When the situation changed and the difficulties there ap-

peared to be relieved, we again took the matter up with the department. Congress does not want to appropriate a large sum of money which it is absolutely unnecessary to appropriate. If it were necessary for these officers and men to go into Mexico, then the $2,000,000 estimated for in the first instance would have been freely appropriated by the Senate. We have again taken the matter up with the department, and they say there are no National Guard officers across the border, and, therefore, there will be no pay necessary for them. There are only a few Regular Army officers across the border; and the department advises us that the amount of $2,000,000 is more than is necessary for the purpose, and that $500,000 would practically cover the expense for the officers. I have, therefore, asked to have the appropriation reduced in order to meet the conditions as they actually exist. It will be only a few months until the next session of Congress convenes. If the Army has to go across the border, if an increased appropriation will be necessary because the officers of the National Guard and the Regular Army in increased numbers may be compelled to go across the border, it will be very easy to appropriate for the additional expenditure which will be required; but to appropriate more than $500,000 for this purpose now, would be simply appropriating money which can not be availed of.

Mr. LEE of Maryland. Mr. President, in the mobilization of the National Guard there have been evidences of a lack of promptness and efficiency in doing some very ordinary things. I am not going to specify what things were omitted to be done, but I am simply calling attention to this particular situation. Here is a situation so serious that the President of the United States has called 91,000 men from their homes and their business and has encamped them, apparently indefinitely, on the banks of the Rio Grande River, and the Senator from Connecticut, and, I am sorry to say, the Senator from Oregon, the chairman of the committee, look upon that situation as not implying the necessity for any further preparation for the contingency of those 91,000 men who have been ordered from their homes to the Rio Grande being marched across that river.

Mr. SMITH of Georgia. Will the Senator from Maryland let me make a suggestion?

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Georgia?

Mr. LEE of Maryland. Certainly.

Mr. SMITH of Georgia. The Senator from Oregon, the chairman of the committee, as I understand it, wishes to leave $500,000 as extra compensation for officers in foreign service. That would be 10 per cent on $5,000,000; that would allow the Government to pay $5,000,000, as I read it, for officers alone in the foreign service. It would cover 10 per cent on $5,000,000 of officers' pay in the foreign service. The amount that may grow out of any foreign service of officers will depend upon their number and the length of time they are in the service. As the chairman of the committee leaves it, it applies to the National Guard officers who are put in the foreign service, just as much as to any other officers who are put in the foreign service. I do hope that we shall not have over $5,000,000 to pay in the next 12 months to officers in the foreign service. This will give $500,000, or 10 per cent on $5,000,000, of officers' salaries in the foreign service, without reference to whether they are the National Guard or the Regular soldiers. I do not see anything at all objectionable in that reduction. I think the first appropriation of $2,000,000 sounded excessive.

Mr. BRADY. And on account of the National Guard, the chairman of the committee is perfectly willing to double the amount of the original estimate, which makes it $500,000 instead of $250,000.

Mr. SMITH of Georgia. You double the House estimate; you give $500,000 merely to pay 10 per cent to the officers alone who are in foreign service. It would seem to me that the estimate of $2,000,000 was very excessive; that would be in the belief that we were going to pay $20,000,000 to the officers in foreign service. I do not think this settles whether the National Guard will cross the border or not; it does not settle anything. That is not our business at present. They are there. If they are needed, they will go across the border; and it seems to me that the committee is merely conservatively allowing for $5,000,000; but I hope it will not be half that much.

Mr. BRADY. Even if it were necessary for them to go across the border, the $500,000 would be an ample appropriation to cover any service they might render between now and the time when Congress again meets. I feel that the $500,000, as suggested by the chairman of the committee, is ample for all purposes.

Mr. SMITH of Georgia. Let me suggest further to the Senator that the $2,000,000 would have covered the 10 per cent extra for an army of 250,000 for quite a length of time across the border.

Mr. LEE of Maryland. Mr. President, of course I do not impugn nor do I defend the original figures of the committee. I assumed that the first figures of the committee were correct for the purpose had in mind.

It is not only a question of pay, it is a question of further provision as to these National Guardsmen and the regular forces of the United States. Are you going to go on to supply the deficiency in arms, equipment, artillery, and everything else? Are you going to let them have mules, have the proper number of rapid-fire guns, or are you going to say, "You are on the Rio Grande, but you are not to go across, and we will give you those guns and mules some other time"? This is not only a question of dollars, but it is a question of men; it is a question of rapid-fire guns; it is a question of the whole equipment of the National Guard. If this policy is accepted as presented by the chairman of the committee now, this movement of 91,000 soldiers of the United States may be made less effective than it might otherwise be.

Mr. BRADY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Idaho?

Mr. LEE of Maryland. I do.

Mr. BRADY. I do not understand why the Senator from Maryland insists that this provision applies especially to the National Guard. It applies equally to the Regular Army just the same as it does to the National Guard.

When we come to the question of mules, supplies, and equipment I think the Senator will find that the committee has dealt very liberally along that line.

Mr. LEE of Maryland. I hope so; but if the committee is going to commence to cut out everything that looks significant to these newly raised forces, we might just as well pass a resolution directing the President to call them home. We had better do that at once. I do not think these men on the Rio Grande ought to be called on to sacrifice their time and their business and then be treated in this way. I think they should be treated more seriously by the committee of the Senate.

Mr. BRADY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland further yield?

Mr. LEE of Maryland. Certainly.

Mr. BRADY. The Senator from Maryland does not mean to say that the War Department is not in earnest in its efforts to protect our border?

Mr. LEE of Maryland. Certainly not.

Mr. BRADY. Or that it is not serious?

Mr. LEE of Maryland. I am not talking about the War Department; I am talking about this amendment and what this amendment means.

Mr. BRADY. The War Department says that this amendment as reduced provides for the proper amount, and we are recommending that the War Department wants at this time just as well as what the committee want.

Mr. LEE of Maryland. Well, Mr. President, as this money can not be spent unless the troops go across the border—the provision is for what is called preparedness—and as there was an estimate from the department which the Senator from Oregon, the chairman of the committee, and the committee itself thought sufficiently serious to make them put this $2,000,000 in the bill on the basis that those men were there and were likely to go across the border, we should now leave that appropriation in the bill.

Mr. CHAMBERLAIN. Let me call the Senator's attention to this fact——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Oregon?

Mr. LEE of Maryland. Yes.

Mr. CHAMBERLAIN. I do not know why the Senator from Maryland insists on appropriating $2,000,000 when it is absolutely unnecessary to do so, either for the National Guard or for the Regular Army.

Mr. LEE of Maryland. I merely insist on that available appropriation, because the Senator from Oregon put it in the first amendment himself.

Mr. CHAMBERLAIN. I have explained to the Senator from Maryland why that was done. It was supposed at the time that the $2,000,000 appropriation was put in that all of the National Guard and all of its officers and all of the Regular Army and all of its officers might go into Mexico.

Mr. LEE of Maryland. Mr. President, has the Senator from Oregon any authority for saying that those soldiers are on the Rio Grande for no further present movement, and that they are not likely to go into Mexico?

Mr. CHAMBERLAIN. I think that as common-sense individuals we are pretty well satisfied that they are not going

there—neither the Regular Army nor the National Guard. Here is the fact about it: The amount carried as base pay in this bill, as reported out of the Military Committee and placed on the calendar on July 3, 1916, was approximately for 6,956 commissioned officers and 126,241 enlisted men, which includes 5,733 enlisted men of the Philippine Scouts.

The amount to cover foreign-service pay of officers, which is the amount in discussion here, as submitted by the War Department, namely, $1,000,000, and the amount for enlisted men, namely, $3,000,000—that is on the very next page—were submitted on the assumption that about 55,000 enlisted men would be stationed in Alaska, in the Philippines, in China, and in Mexico for the entire year. So the Senator will see that this amount not only includes Mexico but covers the pay of the officers in the foreign possessions. If no troops are to be stationed in Mexico, $300,000 for officers and $800,000 for enlisted men for the foreign service would probably supply all for one year. We have increased it; we have given an allowance of more than the War Department estimated by $200,000, practically double the amount. They say that $300,000 is enough to pay this extra 10 per cent of officers for foreign service, and we have put it at $500,000.

Mr. LEE of Maryland. But I understand the Senator from Oregon to say that this suggestion of the War Department is based entirely on the idea that there is going to be no intervention in Mexico.

Mr. CHAMBERLAIN. It is based on the assumption that there is going to be no intervention in Mexico.

Mr. LEE of Maryland. Exactly; or, in other words, on the assumption that we may go into Mexico 91,000 and more men have been put on the Rio Grande and are being kept there. Their time, their business, and all of their affairs are subordinated. But that is not the assumption at all, apparently, of the Senator, when it comes to putting in here a contingent appropriation. We have a lot of men who are on the frontier drilling earnestly, who are being disciplined and drilled with vigor by their own officers and by the very active concurrence of the officers and men of the United States Army out there with them; and the Senator rises in his seat and practically tells them they are not there for what they are apparently there for, and that he will not even make this appropriation contingently; that he will carry these men five days from their homes on trains and keep them down there for indefinite months or weeks; and yet this represents no possibility of service south of the Rio Grande, according to the Senator's argument here this morning.

Mr. President, I do not think that is wise. I do not think that that is preparedness. If it was proper to send those men to the Rio Grande, it is proper to provide for all of the contingencies in the event of their crossing the Rio Grande. It is proper preparedness that there should be money ready; that there should be food ready; that there should be ammunition and equipment and all other necessary things ready for that force to cross effectively over that river and intervene in Mexico—that is to say, if we are going to keep them there and there is a real necessity for intervention. That is the question. And I do not believe the Senate this morning—I do not believe that the Senator from Connecticut, casually, or the Senator from Oregon, casually, or the small handful of Senators here in this Chamber now should take such action as practically determines indirectly the policy of the United States on this question.

Mr. President, a great deal of money has been spent in sending 91,000 National Guardsmen to the Rio Grande, and a great deal of money will be spent in keeping them there; and I think we ought to get the benefit of that expenditure in two ways: It will have an effect upon the public mind in Mexico and it will have an effect upon the discipline of the National Guard, who are giving up their time to serve under the call of the President. The full benefit from it should be obtained. I do not think that the Senate, by word or deed or implication, should suggest that those guardsmen are there with no possibility for further international service. I therefore oppose the reduction of this amount.

Mr. BRANDEGEE. Mr. President, the Senator from Maryland [Mr. LEE] has taken occasion to indicate his opinion that he had supposed that I was for preparedness and, being so, he could not understand why I did not favor the appropriation of more money than I think is necessary for preparedness. Mr. President, my idea was, though, of course, I do not speak by the card, that the militia were ordered down there to do border duty. I supposed ultimately, if there should be intervention in Mexico, or war, and if it is possible for us to use them in a foreign country, they would take part in that campaign; but when the Senator says that these men are there apparently for a purpose, but are not there really for that purpose, I do not think he has any authority for making such a statement. If he assumed that all these men were to be sent right into Mexico in an active campaign that is his own responsibility; but I have not really been convinced that that was the purpose in ordering them down to the border.

I see no reason at all why we should now appropriate the sum of $2,000,000 when it was based, as the Senator from Oregon, the chairman of the committee, has stated, upon the assumption that at the time when the appropriation was recommended these troops might be used across the border. If in the judgment of the committee the situation has changed, I do not see why we should, as a matter of preparedness, as the Senator says, appropriate a good deal more money than apparently is necessary at present. If those troops shall have to cross the border, they will do so, and they will be entitled to pay for foreign service, and the Congress can appropriate for them any time, or the department, I presume, could pay them and send to Congress a deficiency estimate in December next, which would be readily appropriated for.

However, what I particularly objected to in the first part of the Senator's statement was that in some way the troops thought they were there for an invasion of Mexico, and, unless we continued to preserve that fiction or to keep them fooled with that idea, after we had abandoned it ourselves, by appropriating sums which would pay them if they did invade Mexico, the discipline of the troops was going to deteriorate, and that they were going to become demoralized. The Senator said that their discipline was now daily improving, but that if we did not appropriate this great sum of money, based, I think, on the theory that they were going to invade Mexico, their discipline would deteriorate. I can hardly believe that there is any militiaman who does not know that, if he goes into service in a foreign country, he is going to be paid by this Government.

I do not think the mere inclusion in this bill of $2,000,000 to provide for 10 per cent additional pay for foreign service is going to put any spirit into those troops which they do not now have when they are not engaged in foreign service.

I am very thoroughly in favor of ample preparedness, and I think there can be no doubt that it will be forthcoming. If the Government calls upon these troops to perform any active foreign duty I think they will be paid for it; but there is no need now of appropriating money out of the Treasury which, in the judgment of the Committee on Military Affairs and of the War Department, is not going to be used, so far as we can see.

Mr. THOMAS. Mr. President, this bill as reported from the Committee on Military Affairs of the Senate has enormously increased the appropriations made by the House. The deliberations of the Senate committee took place during a period of acute crisis, when, so far as could be foreseen, there would be immediate occasion for active service of the military forces of the Government in a foreign country. It was upon that assumption and because of that situation that the War Department furnished the committee with new estimates, which were incorporated in the bill. I think the committee were unanimously of the opinion at the time, irrespective of individual views, that under the circumstances the estimates should be accepted without question and acted upon in accordance with the requirements of the time. Consequently, I am unable to recall a single item the amount of which was reduced or affected by the action of the committee. And the bill was reported as expeditiously as possible, because the emergency seemed to require it; consequently, the time given by some of us to many items of importance was not as great as otherwise would have been the case. For the moment I forget what the total amount of the House appropriations was.

Mr. CHAMBERLAIN. The total was $182,000,000.

Mr. THOMAS. The chairman of the committee informs me that the total was $182,000,000. We have increased that amount to the sum of $330,599,010, the largest bill ever reported for the War Department, and I think the largest appropriation bill which this Congress, which has broken the record in that regard, has been called upon to consider.

Personally I voted for many of these matters with much reluctance in the hope that the skies might clear away, and that before the Senate had occasion to act upon the bill, it would appear unnecessary to make these appropriations to the extent which was then apparently necessary.

The chairman of the committee has informed the Senate that this hoped-for situation has materialized; the immediate crisis has passed away, and the situation upon the border is no longer immediately menacing. The department, with a wisdom, for which it should be commended, has recognized the new conditions and has again reported to the chairman that, under the present situation of affairs, these larger appropriations are for the time unnecessary.

Mr. President, while we do not always act upon the theory, we yet recognize that our first duty is to the people of this country, and I might say our first duty is to the people as tax-

payers, as purveyors of revenue, derived through the ostensible application of the principle of taxation and needed for the discharge of our public obligations. Consequently, our first duty, whenever we can reduce an appropriation with perfect propriety and safety, is to do so. We were to some extent, it may be said, in a state of war, at least upon the very edge of a breach with a bordering nation, when the sum of $2,000,000 now under consideration was incorporated in the bill, together with the succeeding sum of $6,000,000, which forms the subject of the next item, and which is kindred to the one now under discussion.

Mr. President, the purpose for which the National Guard was mobilized is, I think, apparent. The public safety seemed to demand it. It was in no sense a declaration of war against Mexico; it was in no sense an act of hostility toward Mexico, beyond the fact that incursions into this country over the Mexican border and semiofficial notices served upon the commanders of our troops beyond the border, making this move necessary, in the opinion of the Chief Magistrate of the country, could be so construed; but the President's declarations at the time and since then, all demonstrate that his purpose was one of precaution, and he would have been subject to very severe censure if under the circumstances he had done otherwise. Consequently, the call was made and responded to to the extent to which the Senator from Maryland has referred. It had the desired effect in a sense, because I believe that the swift decision of the President followed by the mobilization of the National Guard and their transportation to the border accomplished all that could have been accomplished by a resort to arms and the consequent expenditure of treasure and the shedding of blood. At any rate, the attitude of the Mexican Government toward ours immediately changed and its acting head agreed at once to comply with the requirements of this Government, after granting its demand for the delivery of their prisoners. This was a summary recognition of our rights as well as an acknowledgement of our demands. That has been the situation since.

The troops are upon the border, some of them are across the border, and the status quo will doubtless be continued until some satisfactory understanding may be reached between the heads of the respective Governments regarding our future relations; failing in which, of course, the miliary arm of the Government becomes immediately effective and at the service of the properly constituted authorities; but everything indicates a peaceful solution of the controversy.

In this situation the Secretary of War, through his subalterns, communicated to the chairman of the Committee on Military Affairs regarding the appropriations in this bill and informed him that, owing to the changed conditions I have outlined, the amount of money, the appropriation of which the committee recommended is no longer necessary. The question is, Whether, notwithstanding this information, we are still to insist upon keeping in this bill these enormous amounts of money and providing them notwithstanding we are officially assured that they are no longer necessary for the purpose for which they were originally designed.

Now, I can conceive of no reason whatever in justification of the position which is assumed by my friend, the Senator from Maryland, upon this subject. In saying that, of course, I do not mean to reflect upon his motives or upon his judgment, but I am unable to grasp the process of reasoning which under the circumstances prompts the Senator to persist in enacting a measure which means millions of dollars—and I speak literally—of additional burden to the people, when the department immediately concerned tells us it is wholly unnecessary.

Mr. LEE of Maryland. Mr. President——

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). Does the Senator from Colorado yield to the Senator from Maryland?

Mr. THOMAS. I yield.

Mr. LEE of Maryland. I want to ask the Senator two questions. Does not the presence of 91,000 troops maintained on the Rio Grande convey anything to the Senator's mind in connection with the necessity for preparation and the possible use of these troops for the purpose for which they were sent there? And another question——

Mr. THOMAS. Let me answer that one first.

Mr. LEE of Maryland. How far are we going in cutting down this whole line of appropriations? Is this to be the first and only one, or how many similar appropriations are to be cut?

Mr. THOMAS. Mr. President, in answer to the Senator's first question, the presence of 91,000 troops upon the border conveys to my mind what I think it conveys to the mind of normal individuals everywhere, which is that that number of troops have responded to the call of the President, have been transported there, and are there to remain subject to the orders of the Commander in Chief for any exigency that may arise.

What on earth has that to do with this appropriation of $2,000,000? American soldiers have never yet served the country and failed to receive the compensation provided for by the laws of the United States, and I do not think they ever will. Ours is the most generous of Governments, not only with regard to promptitude of payment but as well to the amount. With all due respect to the Senator's position, it seems to me to be a reflection upon the morale and the patriotism of the members of the National Guard to say that their discipline will be affected because, forsooth, they can not see in the appropriation bills of the country enough money to pay them in the event they should be required to cross the border, which is not the case with the reduction.

With regard to the second question, the chairman of the committee is more competent to answer it than am I. I hope there will be a substantial reduction in every one of the extraordinary appropriations proposed when confronted with a breach with Mexico. It should be done, because, Mr. President, without the emergency, they are unnecessary; and there will be plenty left, according to the opinion of the War Department, which ought to know, in the amounts to be retained in this bill to meet all existing or probable—indeed, I might say possible—conditions.

Mr. President, this is the 22d day of July. We have been in session considerably over seven months. On the 21st day of February, more than five months ago, the Germans began their famous drive against Verdun. It does not seem very long in retrospect. Time always seems longer in prospect. But the incident which I mention serves to convey vividly to mind the fact that were we to adjourn on the 1st of August it will be but three or four brief months before we are again in session, and, of course, we can be summoned in extraordinary session at any time in the event an emergency makes it necessary. I do not think that emergency will occur.

I am unable to comprehend the argument—although it may be my misfortune and not the fault of the Senator who makes it—that an appropriation originally agreed upon must be retained in a bill if we are to secure discipline among our troops upon the border or if we are properly to impress the Government with whose authorities we were in conflict with the idea that we are prepared at all times to maintain our position. If appropriations could have that effect upon the mind of the soldier, it would be deplorable. If they would have that effect upon the minds of the rulers of foreign Governments, we would not need an army at all. All that would be necessary would be to make the appropriations.

This is simply a question of appropriation to finance the needs of the department according to the judgment of those who ought to know and whose business it is to know. I hope, therefore, that the suggestions of the chairman of the committee will be carried out, and that this bill will be pared down to the lowest cent compatible with the public interest and the pubile safety.

Mr. LEE of Maryland. Mr. President, this question of pay for foreign service is, of course, one of the smallest items to be considered in connection with a general reduction; but there is no question that the whole country looks upon some part of this Government—some element here in the Senate, or some powers in the War Department, or some section of the invisible government—as hopelessly unable to prepare for military contingencies.

Mr. President, we have 91,000 men on the bank of a river. Certainly they were ordered there for the purpose of going across under certain contingencies; and yet the committee, apparently still spellbound by some hypnotic influence, can not make complete provision for the possibility of those men going across that river, though the men are being kept there on our side of the stream because of the possibility of its being necessary to send them over.

There never was a better illustration of the inability of a legislative committee to grasp a military situation than this proposal of this committee, now revealed. Nearly 100,000 troops upon a river bank, carried there, five days' journey from their homes on the average, and the committee assuming that it is impossible that they can go across the river, and consequently reducing all the provisions that bear upon the contingency of their crossing! It is simply a perfect illustration of legislative military mentality. The troops are on the river bank for some reason. The President of the United States ordered them to go there. They may be ordered to cross that bank into the foreign country whose affairs are such that we may be compelled

to intervene at any moment; and yet the committee comes here and proposes to cut out much of the provision in this bill that would be necessary if those troops cross that river.

Mr. President, no matter what the Senator from Connecticut may say, or the Senator from Oregon, or the Senator from Colorado, it does not make any difference with the obvious fact. Here we have the men on the boundary line, and the legislative mind refuses to provide for the contingency of those men crossing that line.

Mr. FLETCHER. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Florida?

Mr. LEE of Maryland. Certainly.

Mr. FLETCHER. Does the Senator contend that if the appropriation is increased according to his view that would cause the men to go across?

Mr. LEE of Maryland. Why, certainly not.

Mr. FLETCHER. Or that reducing the appropriation keeps them from going across?

Mr. LEE of Maryland. Certainly not.

Mr. FLETCHER. In other words, the amount of this appropriation has not anything to do with the question of determining whether those men are to go across the border or not.

Mr. LEE of Maryland. Certainly not. I assume, however, that when 91,000 troops are ordered to a boundary line it means something. I assume that it was a sincere order, and that it has a significance, and that it represents the military possibility of their crossing that line. I say further, without fear of contradiction by anybody, that the War Department and the Military Affairs Committee should prepare for the contingency of those men crossing that line. That is what we call preparedness, and we may as well understand it now or to-day as at any other time—that if this committee can not prepare for 91,000 men who are on the Rio Grande, possibly to cross the Rio Grande, then the committee has not the military foresight to fulfill its duties to the country.

You could not have a more perfect illustration of the attitude of some legislators in dealing with military questions. It is no wonder that Gen. Washington was harassed as he was by the Continental Congress. Here we have these gentlemen, perfectly sane, highly respectable, worthy Members of this body, with a large force of troops actually encamped on the bank of the river. I am not arguing with the Senator from Colorado to increase the Navy. He, of course, voted here persistently yesterday with that small group which could not see any occasion for an increase of the Naval Establishment of the United States as all the rest of us saw it.

I am not arguing with the Senator on the theory that there is a possible naval danger presenting itself against this country. But I am presenting to the Senator's mind an absolute fact, the 91,000 men now on this river; and I am asking the Senator from Oregon and the Senator from Colorado why they will not put provisions in this bill that will provide the complete and necessary equipment for those men to cross that river if the Chief Executive and the Congress so direct. Why are we so halting in our preparedness? There never was such a spectacle as this situation presents to the Senate.

Has the War Department ordered those troops to be returned to their homes in the United States? No. There they are on that river bank. Everything else, presumably, including their discipline, is going on as though they were to serve their country by crossing over for intervention in Mexico, if necessary; and yet the committee, with those men on that boundary line, being maintained there, and presumably to be there for three months yet, are coming in here and cutting out of this bill all of the provisions for preparedness for the entirely possible event of those forces being ordered to intervene in Mexico.

I naturally ask the chairman of the committee how many and what other reductions he proposes of a similar nature on the contingency that those men on the Rio Grande are not to go over it.

Mr. THOMAS. Mr. President, the personnel of the committee and its mentality may be of a low order. It may be lacking in patriotism or entirely incapable of grasping the problems presented to it, and it may be that the position which it here assumes subjects it to the reflections of the Senator from Maryland. Those in charge of the War Department may be similarly depraved. If so, it might be well to substitute the distinguished Senator from Maryland for the committee and also for the War Department, for the grasp and comprehension of this question which he assumes, and which may justify his reflections upon them, would eminently fit him for the discharge of the duties of both those positions, if, indeed, he is not the only man equipped to discharge their functions. The Senator has not sat upon the committee, however; and it is always much more easy to criticize than it is to construct.

The statement which the Senator has just made—that the committee, with a large army on the border, is not willing to so legislate as to make it possible for them to perform their functions in the event they should be ordered over the river—is a bold assumption. It is in substance that unless we appropriate two millions for the increased pay of the officers—that is, guarantee their increased pay in advance—they may not cross over.

Mr. LEE of Maryland. Mr. President——

Mr. THOMAS. The War Department ought to know something about that situation—not as much as the Senator from Maryland, of course, but it ought to know something about it. It receives reports which the Senator does not, but which the Senator knows by instinct. It is thoroughly acquainted with the details of affairs. It informs us that this amount is all that is necessary. But the Senator places his word and his assumption in the most oracular way—his statement being characterized by that solemn emphasis of which he seems to be a master—on the basis that all these things are wrong, that they are disastrous, and that he alone, as censor-general of the situation, is competent to analyze and legislate for it.

I want to say to the Senator, Mr. President, regarding my vote on the naval bill, to which he has referred in terms of disparagement, that I alone am responsible for the casting of that vote, and I am responsible not to him but only to my constituency therefor. I have not questioned his vote, and he must not question mine. I believe in an increase of the Navy, but not in the increase which has been voted. I believe in giving all adequate financial support to the situation on the borders of Mexico. When the Senator comes in here and makes the statement first, in substance, that the Committee on Military Affairs is practically imbecile, that the members of the committee do not understand and will not understand the situation, that they do not accept the logic of his position, and turns himself, therefore, into a censor not only of the committee but of the War Department, he is assuming a prerogative which ought to have more behind it than he has thus far manifested in his argument.

Mr. LEE of Maryland. Mr. President, of course, I disclaim what the Senator from Colorado has apparently put in my mouth—the statement or suggestion that the National Guard would not go over the Rio Grande unless this item of pay is provided for in advance. I said that that is one of the smallest items of this general policy of the committee, and I have asked the chairman to let us know, before we vote on this item and adopt this general policy, how much more he is going to cut down the provision for the National Guard on the theory that though they are on the Rio Grande, they are not there.

Mr. CHAMBERLAIN. Mr. President, may I interrupt the Senator?

Mr. LEE of Maryland. Certainly.

Mr. CHAMBERLAIN. The Senator continues to say that the cuts are made on the National Guard. He knows better than that, Mr. President, and he is unwarranted in making any such statement. Every reduction that has been made in this bill applies as well to the Regular Army as it does to the National Guard. There never has been a committee in the Congress of the United States that has been more liberal in undertaking to provide for the defense of this country against any foe than the Military Affairs Committee of the Senate; and to have the Senator come in here and undertake to impugn the motives of the committee, and intimate that they are undertaking to injure the National Guard is wholly unwarranted.

I do not care to state to the Senator in advance the suggestions for diminution in this bill that I am going to make; but if the Senator will remain here as attentively as he has so far, he will hear them stated as we reach them.

Mr. LEE of Maryland. Mr. President, I want to suggest to the Senator that in my humble judgment no committee ought to take the position—of course I do not want to dictate to his committee——

Mr. CHAMBERLAIN. The Senator will not.

Mr. LEE of Maryland. I certainly do not expect to, nor do I want to have the committee dictate to me. I have some opinions upon the National Guard situation which, I imagine, differ entirely from the ideas of the Senator from Oregon and the Senator from Colorado about the National Guard. Of course the Senator can refuse to say, if he sees fit, how far he is going to go in these reductions of money that would come to the National Guard, and I do not know what reductions he has in his mind. May I ask the Senator if he has filed——

Mr. CHAMBERLAIN. Mr. President, I want to state again that there is no cut made in this bill with reference to the National Guard. The Senator persists in making that state-

ment. What his purpose is I am totally unable to comprehend. There is no cut made anywhere in this bill affecting solely the National Guard. It affects the enlisted personnel of the Army and the officers both of the National Guard and of the Army.

Mr. LEE of Maryland. Mr. President, of course it is quite obvious that if the needs of the Regular Army have already been provided for, and they stand at, say, the figure 10, and you come along and provide an increase for the Regular Army of 10 more, and at the same time give the militia or National Guard 10 more, and then you come along again with a reduction, you cut both down 10, you leave the Regular Army with a provision, and you leave the National Guard with none. There are some provisions in this bill which, if they go out, will affect the National Guard and the Regular Army alike; but they would leave the National Guard without any provision whatever for certain lines of military equipment and development. That is what I should like to know; but if the Senator does not care to reveal to the Senate his general plan of reduction, of course there is no way in which I can compel him to reveal it in advance of each item as it comes up.

I want to say, however, that while this question of the pay is one of the smallest items involved, and while I do not think it will have the slightest effect upon the willingness of any guardsmen to go across the Rio Grande if the President so directs and the Congress so orders, yet it is the beginning of a line of reduction that may be very injurious to the present auspicious development of the National Guard of the United States, which I have recognized with joy, but which is an absolutely horrible thing to the gentlemen who favor centralization and who deplore the development of the State troops and the National Guard of this country.

It is a constitutional question, in the main, of the greatest importance. Here we have a group of men who have gone out from their homes and are now, more than 100,000 of them, receiving instruction that the militia of Switzerland get in their first military experience. The militia of Switzerland are given 65 days, every one of them, as a preliminary military experience, and after that they are given as an annual and complete mobilization 10 or 15 days in camp every summer. Now, our National Guard has been called by the President, and they are getting a military experience that this committee was never willing to give them before. It has come about as a kind of accident, and I may say that it has come about in spite of the military policies of the committee, for the committee has never been willing to develop the National Guard of this country as the national militia of Switzerland has been developed.

When we are doing this kind of work, and starting out on a new kind of military policy, I think it is the duty of the Senate to follow the precedents of a republican form of Government. I think it is the duty of the Senate to respect the historical experience and constitutional tendencies of this country, and when we are to adopt any form of military development to copy the form of military development of a republic like Switzerland, rather than to adopt the concentrated military powers of the more imperialistic forms of government. That is why I am so strongly for the development of the citizen soldiery of the United States on the National Guard basis.

It is a great constitutional crisis in this country, and I believe that the enemies of the National Guard and the friends of centralized military power—for they are the same group—have received a blow that they never expected to receive, and will be a long time in recovering from, in this mobilization and patriotic action of the National Guard of the United States. It has been a great epoch in our history, and it has an infinitely more significant meaning than most people understand. The characteristics of a free people that maintain their liberties are in the hearts and nature of those people. The young men of this country answered the call of the President, jumped clear over all the obstacles the new law put in their way—because the new law put more obstacles in their way than it helped their action—took this new oath without hesitation, doubling the years of service they were liable to render to their States and their country, and went down to the frontier, leaving their homes and their business without a question to answer to their country's call. Far from being reflected on by the intimation of the Senator from Colorado that they will not go over the river unless their pay is guaranteed in advance, they should receive his congratulation, admiration, and applause.

Mr. THOMAS. Mr. President, I do not wish the Senator to misrepresent me.

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Colorado?

Mr. LEE of Maryland. Certainly.

Mr. THOMAS. I stated that the only rational conclusion that I could draw from the Senator's position was that he feared that they would not cross the river unless an appropriation bill provided for their pay in advance. That was my statement.

Mr. LEE of Maryland. With all due respect, that is the only irrational conclusion that could be drawn from the argument. The question comes up along the whole line, and I object to this reduction of appropriation because it is against preparedness, and right in the face of the fact that we have got this great force waiting there on the boundary line, and the Senator will not make the preparation that their very presence on the boundary line would suggest as reasonable to any thinking mind.

Mr. BRADY. Mr. President, I am hardly able to understand why the Senator from Maryland [Mr. LEE] insists that the committee apparently attempted to take any advantage of the National Guard. As a member of that committee I think I can say without hesitation that every Member of the committee worked honestly and faithfully for the development of our Army as a whole. The great trouble in discussing this question of preparedness and mobilizing our National Guard and our Army is the fact that there is one party which seems to take the position that the National Guard should be placed in the front rank and receive more attention than the Regular Army. On the other hand, some take the position that the Regular Army should receive the special attention and care of the Government.

What the committee attempted to do—and I believe when this bill is considered and understood and written into law it will be decided that the committee did much to harmonize those two branches of our military force—was to assist the National Guard in every possible way they could legitimately, and at the same time protect the interests of the Regular Army. We did write in this amendment the sum of $2,000,000 for the Regular Army and for the National Guard for the payment of the officers, and as the senior Senator from Georgia well said this morning, if we were to send our whole force across the Mexican line and keep it there until the next Congress meets we could not possibly use up the $500,000 that this committee has provided for that purpose.

Why should we add this large sum to our appropriations at this time, then? I believe that in military affairs as well as civil affairs we should follow sane business lines, and that it would be absolutely useless for us to add to this bill $2,000,000 for a certain purpose when, after a thorough investigation, we decided that we could not use more than $500,000, and in increasing this amount from $250,000 to $500,000 we increased it $250,000, which adds as much for the National Guard as it does for the Regular Army.

Therefore I must say that I think the remarks of the Senator from Maryland are not justified by the facts, and I sincerely hope that the Senate will approve the amendment as suggested by the chairman of our committee.

The PRESIDING OFFICER. The question is on the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment of the Committee on Military Affairs was, on page 28, line 2, after the word "service," to insert:

And for the National Guard enlisted men when called or drafted into the service of the United States.

The amendment was agreed to.

The next amendment was, on page 28, line 4, to strike out "$800,000" and insert "$6,000,000," so as to make the paragraph read:

For additional 20 per cent increase of pay of enlisted men on foreign service, and for the National Guard enlisted men when called or drafted into the service of the United States, $6,000,000.

Mr. CHAMBERLAIN. I desire to amend the committee amendment by making the amount $1,000,000 instead of $6,000,000.

Mr. LEE of Maryland. The amount appropriated by the House for this item should be on the theory that the presence of this force upon the banks of the river is sufficient to indicate to the committee and the War Department, or anybody else, that all steps should be taken and all provisions made to cover the contingency of their crossing the river if necessary to fully perform the duty which called them from their homes and to the border.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 28, line 13, before "$150,500," to strike out "Three months' additional pay to enlisted men reenlisting within three months" and insert "For three months' additional pay to enlisted men reenlisting within the period of three months from date of discharge from first enlistment, $150,500," so as to make the clause read:

For three months' additional pay to enlisted men reenlisting within the period of three months from date of discharge from first enlistment, $150,500.

Mr. JONES. I wish to ask the chairman whether he has given consideration to a suggestion that there should also be a provision inserted something like this:

And having passed an examination with a rating noted on his discharge not less than the lowest rating provided for in the organization from which discharged.

I will say that has been suggested to me by a gentleman who seems to be very much interested in the provision, and he also suggested the amendment which the committee has put in the bill. I wondered whether the committee had considered that proposition or not.

Mr. CHAMBERLAIN. I do not recall having considered it in committee. It is barely possible that we did.

Mr. JONES. I do not know very much about this matter. This correspondent of mine says:

I believe it would be in the interest of efficiency if this clause of the bill were amended so as to permit the payment of bonus of three months' pay of a private soldier to all enlisted men who reenlisted within the period of three months from the date of discharge from the first enlistment.

The committee has incorporated that in the bill.

It might still further be qualified in the interest of efficiency of the service by requiring that every aspirant for this "bonus" pay should, before discharge, have been called upon to pass an examination for at least the lowest rating which is provided for in the organization in which he shall have served, such qualification to be noted on discharge.

I ask the chairman of the committee, who knows much more about this than I do, if a suggestion like that appeals to him to any extent?

Mr. CHAMBERLAIN. I can not see what effect the amendment would have, except to possibly prevent the reenlistment of some men who would like to enlist otherwise.

Mr. JONES. The effect, I take it, would be that soldiers, before their first discharge, would be a little more interested in fitting themselves for reenlistment in preparing to take their examination from the organization, required in order to secure such a rating, at least, not less than the lowest required by that organization. That is the only purpose I can see in it.

Mr. BRADY. Will the Senator again read the suggestion he made?

Mr. JONES. The suggestion would be this: After the word "enlistment," in line 13 of the amendment, to add:

And having passed an examination with a rating noted on his discharge not less than the lowest rating provided for in the organization from which discharged.

In other words, I do not know just exactly what is the character of the examination or what he is required to do in the different organizations; but whatever it is, a soldier contemplating reenlisting would have noted on his discharge that he had at least passed with the lowest rating required by his organization.

Mr. CHAMBERLAIN. Will the Senator state who his correspondent is and what is the purpose? I do not understand what the effect of it might be.

Mr. JONES. W. L. Clark. I think the Senator knows him.

Mr. CHAMBERLAIN. The Senator might suggest it as an amendment, and it might go in and be taken up in conference.

Mr. JONES. I was going to suggest that it might be put on the bill and might be considered in conference. I confess, as I said, that I do not know much about it. I do not know what the effect of it would be. This gentleman is very much interested in promoting the efficiency of our Army.

Mr. FLETCHER. I suggest that perhaps he wants to be certain that those who want to reenlist are in a condition to reenlist in the way of having a certificate when they are discharged that they are fit to be reenlisted.

Mr. JONES. I think that is it.

Mr. FLETCHER. I understand the law now requires a reexamination, and that they can not reenlist without a reexamination. It seems to me the amendment would be unnecessary.

Mr. BRADY. I think that would be covered by the amendment of the committee:

For three months' additional pay to enlisted men reenlisting within the period of three months from date of discharge from first enlistment.

They could not enlist unless they passed a physical examination.

Mr. JONES. Here is another paragraph in the letter, which I will read. Mr. Clark says:

The provision of current law under which this bonus is paid requires no particular efficiency from the enlisted men. It is paid only to privates who may have been discharged with the minimum character that would permit reenlistment and, therefore, not particularly desirable men for reenlistment.

A noncommissioned officer who has made his rating during his first enlistment period, in order to secure the three months bonus must be disrated by his company commander and discharged as a private, after which he may again, on reenlistment, be given his rating. This is frequently done in order to induce the better class of men to remain in the service.

I will offer this amendment, with the idea that if it goes to conference the chairman will look into it very carefully, and if he does not think it is a wise thing to do, of course, it will go out.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. On page 28, line 13, after the word "enlistment," insert:

And having passed an examination with a rating noted on his discharge not less than the lowest rating provided for in the organization from which discharged.

Mr. LODGE. Mr. President, we had some little discussion here about the number of the militia on the border. I asked the Senator from Maryland [Mr. LEE] where he got the information. He said at the War Department, based on the number of railroad tickets sold.

The PRESIDING OFFICER. Will the Senator permit the amendment to the amendment to be passed on?

Mr. LODGE. I am speaking to this amendment; I will be through in a minute. I found in the Chicago Tribune of Wednesday a very careful table made up from the reports of the different States where the militia is. It appears that there are 100,008 in the mobilization camps on the border, 59,204 in mobilization camps at home, and 14,323 not called out. I only put it in as a contribution to the information already furnished in order to have it printed as a part of my remarks. It shows what I wanted to know.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

Where militia is stationed.

State.	In mobilization camps on border.	In mobilization camps at home.	Not called out.
New England States:			
Maine	1,100	.....	950
New Hampshire	1,000	500	.....
Massachusetts	7,151	.....	1,300
Connecticut	3,125	900	940
Vermont	1,164	290	.....
Rhode Island	663	.....	1,020

California	4,600	.....	1,700
Total	100,008	59,204	14,323

[1] No report received. [2] Approximate.

Mr. LEE of Maryland. In this connection I would like to add that the figures I gave were received from the Chief of the Militia Division on the 13th of July.

Mr. CHAMBERLAIN. In this connection I call the attention of the Senator from Massachusetts to the fact that the figures which have been given are not correct. I have here a letter which I will read into the RECORD:

WAR DEPARTMENT,
THE ADJUTANT GENERAL'S OFFICE,
Washington, July 22, 1916.

The CHAIRMAN COMMITTEE ON MILITARY AFFAIRS,
United States Senate.

SIR: In response to your telephonic request for a statement showing the organizations and their strength and stations on the Mexican border and in Mexico, which information is desired by you in connection with the pending Army bill, I beg leave, by direction of the Acting Secretary of War, to inclose herewith the desired information.

It is to be noted that the War Department regards this information as confidential, particularly so much of it as relates to troops in Mexico, but it is sent to you for such use as you may find necessary to make of it.

Very respectfully,
H. P. MCCAIN,
The Adjutant General.

I would not put that into the RECORD, but I am willing to have any Senator see it in a confidential way.

Mr. LODGE. I do not press the Senator to put in anything confidential. We know roughly what the numbers are. The figures of the Senator from Maryland and those given by the Chicago Tribune on Wednesday, taken from the State records, do not differ materially. What I did want to get at was the number of the men by States, and that is given in the Chicago Tribune table, and I fancy it is not far out of the way, because it is derived from the States themselves.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Washington to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 28, line 16, after the word "misconduct," to strike out "$75,000" and insert "$1,000,000," so as to make the clause read:

For six months' pay to beneficiaries of officers and enlisted men who die while on active service from wounds or disease not the result of their own misconduct, $1,000,000.

Mr. CHAMBERLAIN. I desire to propose that instead of $1,000,000 there be inserted $75,000.

Mr. FLETCHER. The committee proposes to withdraw its amendment and let the appropriation stand at $75,000.

The amendment was rejected.

The next amendment was, on page 28, line 18, after the word "accidents," to strike out "$10,000" and insert "$100,000," so as to make the clause read:

For one year's pay to beneficiaries of officers and enlisted men who die as the result of aviation accidents, $100,000.

Mr. CHAMBERLAIN. I ask that the Senate disagree to the Senate committee amendment and leave the House provision as it was, $10,000, instead of $100,000.

The amendment was rejected.

Mr. PENROSE. Mr. President, I should like to address an inquiry to the chairman of the committee. The Senator from Massachusetts had printed as a part of his remarks a very interesting statement from a Chicago newspaper, in which I think the statement was made that some 50,000 troops of the National Guard are still in the training camps at home and some fifteen or twenty thousand more——

Mr. LODGE. Fifty-nine thousand in training camps at home and 14,000 not called out.

Mr. PENROSE. In which he stated that some 59,000 troops are in the training camps at home and 14,000 have never been called out. Are there any data showing what States have not had their National Guard called out and what States are apparently unprepared on account of lack of numbers and are compelled to stay at home in the training camps?

Mr. CHAMBERLAIN. I have not the information on that subject attached to the letter which I just read into the RECORD, but, of course, that information would be available at the War Department.

Mr. LODGE. I only printed the table, but there were two pages of it in the Chicago Tribune giving reports from each State by which it will appear that these troops are on the border:

IN MOBILIZATION CAMPS ON BORDER.

New England States: Maine, 1,100; New Hampshire, 1,000; Massachusetts, 7,151; Connecticut, 3,125; Vermont, 1,164; Rhode Island, 663.

Atlantic States: New York, 16,000; Maryland, 3,200; Pennsylvania, 9,000; New Jersey, 3,871; Delaware none.

Central States: Ohio, none; Indiana, 3,500; Michigan, 3,672.

Central West: Illinois, 11,000; Wisconsin, 3,600; Iowa, none; Minnesota, 3,600; Missouri, 5,030; Kansas, 2,300; Nebraska, 1,800; South Dakota, none; North Dakota, none.

Southwestern States: Oklahoma, none; Texas, 3,500; New Mexico, 1,000; Arizona, 1,100.

Southern States: Virginia, 2,000; West Virginia, none; North Carolina, none; South Carolina, none; Georgia, none; Florida, none; Kentucky, none; Tennessee, none; Alabama, none; Mississippi, none; Arkansas, none; Louisiana, 500.

Mountain States: Montana, 1,170; Idaho, 1,150; Wyoming, none; Colorado, none; Utah, 807; Nevada, none.

Pacific Coast States: Washington, 2,105; Oregon, 1,300; California, 4,600.

Mr. BRADY. I wish to say that Idaho has furnished her full quota.

Mr. LODGE. Yes; so it appears.

Mr. BRADY. One regiment, and our governor has tendered the services of another regiment.

Mr. LODGE. Idaho has no troops in mobilization camps at home; the whole quota is out:

IN MOBILIZATION CAMPS AT HOME.

New England States: Maine, none; New Hampshire, 500; Massachusetts, none; Connecticut, 900; Vermont, 290; Rhode Island, none.

Atlantic States: New York, 6,000; Maryland, 134; Pennsylvania, 2,000; New Jersey, none; Delaware, 1,000

Central States: Ohio, 12,500; Indiana, none; Michigan, 2,500.

Central West: Illinois, 2,000; Wisconsin, 200; Iowa, 3,250; Minnesota, 1,000; Missouri, none; Kansas, none; Nebraska, none; South Dakota, 1,000; North Dakota, 1,100.

Southwestern States: Oklahoma, none; Texas, none; New Mexico, none; Arizona, none.

Southern States: Virginia, 2,000; West Virginia, none; North Carolina, 3,000; South Carolina, 2,300; Georgia, 4,000; Florida, 1,255; Kentucky, 2,550, approximately; Tennessee, 2,500; Alabama, none; Mississippi, 1,300; Arkansas, 2,300; Louisiana, 1,500.

Mountain States: Montana, none; Idaho, none; Wyoming, 625; Colorado, 1,500; Utah, none; Nevada, none.

Pacific Coast States: Washington, none; Oregon, 1,000; California, none.

Mr. WARREN. The Senator does not happen to have the total of those in camp?

Mr. LODGE. Fifty-nine thousand two hundred and four. Then there are 14,323 that have not been called out. I think the figures are quite interesting.

Mr. PENROSE. Mr. President——

Mr. LODGE. I yield to the Senator from Pennsylvania.

Mr. PENROSE. Mr. President, I think the figures are quite interesting. It shows that in one section of the country there is quite a percentage of home guards. Whether that is due to the inefficiency of the organization of the National Guard in those States or the difficulty of recruiting I am not informed, but I think that a good deal of light could be thrown on the situation if this matter, before the bill is finally passed, could be carefully looked in to. With the exception of Virginia, it would appear that none of the so-called Southern Atlantic States have sent any of the National Guard to the border, whereas States like Pennsylvania and the New England States, at very great inconvenience to the members of the guard and great distress to their families, have gone to the front and sent their full quota.

If the National Guard can be made a force which we can rely on in time of emergency, it seems to me we ought to be able to count on it in every State of the Union, and we ought to know where the weak points are and why they are weak.

Mr. LEE of Maryland. I wish to say in this connection that some of those figures strike me as inaccurate from my own knowledge. I received a letter in the last few days showing the situation in regard to the Florida Guard. I know they have one regiment of 1,100 men in camp now who answered very quickly to the call. There were some difficulties there that they overcame with great rapidity.

Mr. PENROSE. Is the regiment the Senator referred to on the border?

Mr. LEE of Maryland. It is in camp in Florida.

Mr. PENROSE. Of course, it is a home guard.

Mr. FLETCHER. They have been mustered into service. They are in training in camp at Black Point, near Jacksonville, and have been ready to go except that some equipment has been lacking in the way of shoes or other supplies, something of that sort. They expected sometime ago that they would be ordered, and they were all mustered into the regular service.

Mr. PENROSE. They are, on the face of it, not prepared in the case of an emergency. Other States sent their guards within 30 days to the Mexican border. I do not doubt the gallantry and bravery of the National Guard of Florida, but apparently the guard is not prepared and other States are called on to make the sacrifice.

Mr. LEE of Maryland. Will the Senator allow me to interrupt him?

Mr. PENROSE. I am through.

The PRESIDING OFFICER. The Senator from Maryland has the floor.

Mr. LEE of Maryland. There was a delay in getting the necessary equipment for these troops. One regiment in Maryland responded in 48 hours, less than that, and they went into camp and were kept there seven days before they received the additional equipment necessary for the new recruits that they were authorized to get and bring with them.

Mr. BRYAN. The Florida troops were in camp within 48 hours after they were called out.

Mr. PENROSE. I do not see how the National Guard——

Mr. LEE of Maryland. I want to complete this statement. Within 24 hours after the equipment was delivered to the First Maryland Regiment they were entrained by their quartermaster and off for the border.

We understand that there was a great deal of difficulty in getting equipment out of the place where it seems to have been packed. It was, so to speak, engorged in the arsenal at Philadelphia. It was a mere accident, I believe; but a gentleman who is possibly related to the Senator from Pennsylvania was the commanding officer there, Maj. Penrose. It seems that the railroads, possibly the great railroad in the Senator's State, were not able to supply the cars quickly enough to get all this equipment out of the one great arsenal where it was kept. It was a great mistake to have kept all this necessary equipment in just one arsenal. It should have been at distributing points where it could have been handled more promptly; but, of course, the National Guard had nothing to do with that. That was the policy of the War Department, or of the Congress, or whoever provided for all this equipment being concentrated in one place in the Senator's State.

Under those circumstances, of course, there ought to be inquiry, and there ought to be a readjustment, and there ought to be a following up of this thing so that these delays will not occur in the future. The Senator is quite right about that, but I do not think any guardsman or any National Guard officer is to be criticized in the least in connection with the greater part of these delays. All the criticism, if such criticism is to be expressed, must be expressed with reference to the War Department and antipreparedness legislation, the national end of the situation.

Mr. BRADY. Mr. President, I listened to the remarks of the Senator from Pennsylvania, and I did not understand that he was criticizing the National Guard in any manner.

Mr. PENROSE. Not at all.

Mr. BRADY. I am frank to say I am somewhat surprised at the statement the Senator makes relative to the forces that have not been called out. It seems to me that every man in the South Atlantic States is more acclimated and really better adapted for the service on the frontier and the border than the man farther north. As an illustration I call attention to my State. They have been in camp on the border for some days, and, while I am not saying it in a boasting manner, I desire to make the statement that one of the commanding officers of the Regular Army stated the fact that they were the only regiment that had appeared there fully equipped and ready for service.

Mr. FLETCHER. I ask the Senator if it is not a very good way to get them acclimated to send them down on the border and let them camp there, to have the experience of that climate and get accustomed to it before there is any occasion to go into the country. Is not that a good way to acclimate those who are not acclimated?

Mr. BRADY. I fully agree with the Senator, and our boys there are getting acclimated. I have no doubt in the world but that whenever the time comes and the Florida force is needed they will be there, willing and ready to render service to the country. But I am glad to see an honest effort by every State to comply with the law. It is a new law, requiring new regulations. If the law had been on the statute book for a year or two at the time the troops were called out, the conditions would have been entirely different. Under the old system, with only the Regular Army to supply, it was perfectly natural that these goods should be stored in some large place like Philadelphia.

Now we have a new law, the equipment is furnished, and, in my judgment, in the States they can mobilize in the future very much easier than they could at this time.

What I want to see is more of a harmonious spirit between those who represent the National Guard in the discussion of these matters and those who represent the Regular Army. We are all trying to do the best we can. I think we have done splendidly, and I am proud not only of our National Guard but of our Regular Army and our Regular Army officers and our National Guard officers. They are each and every one making every honest effort to serve the country and to serve it well.

Mr. PENROSE. Mr. President, the Senator from Idaho [Mr. BRADY] is entirely correct in stating that I do not intend to criticize anybody. I simply want to find out where the weak link in the chain is.

The Senator from Maryland puts the blame on the Philadelphia Arsenal. I intend immediately to have this matter carefully investigated and find out just how far the arsenal is to blame for the National Guard of Florida remaining in Florida in a training camp when it ought to be on the border.

I only mention Florida not in any invidious way, because apparently every other South Atlantic State, with the exception of Virginia, is in the same situation.

The Philadelphia Arsenal situation seems to have had a local effect which is unfortunate. When this question of preparedness came up for discussion the original proposition, as I understand it, was to set aside the National Guard in the national preparedness program, and a great outcry arose from the officers of the National Guard that they should be considered a part of the national preparedness program, and they were so connected with it.

In a very few months after that had been decided we detect remarkable weakness in certain parts of the country. I have been in receipt of a great many letters lately from some people who declare that the National Guard never ought to be called out for duty of this kind. How that may be I will not argue at present. Anyone who has picked up a Washington newspaper in the last two or three weeks can not fail to have observed the fact that the National Guard of the District of Columbia is apparently held here at home in training camp because it can not recruit a hundred men or more to complete the minimum number—not the full complement—which they must furnish before the Government will consider them fit to be sent to the border. It is an extraordinary and lamentable condition, Mr. President, that the National Guard of the District is unable to recruit that very small number of men to make up the minimum required by the Government.

I think it would be quite interesting to know—and I shall take pains to ascertain the fact—whether, in addition to defects in the management of the arsenal at Philadelphia, which is an agency of the National Government and not in any way a local concern, there has been any difficulty in filling the minimum number of the various companies and regiments of the National Guard in those States which are apparently staying at home for indefinite periods; whether it is impossible to recruit them to the number required by the Government. Perhaps the Senator from Florida could inform me whether or not the National Guard in Florida is recruited up to the full number required by the Government.

Mr. BRYAN. I can inform the Senator from Pennsylvania that it is.

Mr. PENROSE. I am glad to hear it.

Mr. FLETCHER. I will say further, Mr. President, since Florida has been mentioned in that connection, that the only dissatisfaction in Florida has been that only one regiment was called forth. The regiment which was tendered by the governor, as I understand the procedure to be, was the Second Regiment. It was assembled within 48 hours. The dissatisfaction has been that the First Regiment was not also called out. They have been clamoring to get into camp and to get mustered into the service. The only trouble we have had is the insistence of the First Regiment that they ought to be called out, whereas there has been only a call for one regiment.

Mr. PENROSE. Can the Senator from Florida inform the Senate why only one regiment was called out in Florida, while in other States the whole guard was called out?

Mr. FLETCHER. My understanding is that the department only called for a certain number of the National Guard in each State. Is not that the case? They have not called for the whole guard, but they have only called for a certain number, and that was based on the number required. As I have stated, but one regiment was apportioned to Florida.

Mr. WADSWORTH. Mr. President, the discussion as to the mobilization and some of its defects and the incidents and difficulties attendant upon it, which have been mentioned in the course of the debate in the Senate this afternoon, tempts me to comment very briefly upon it, particularly when I hear reference made to the Philadelphia Arsenal. Reference has been made to the difficulty in getting supplies from that arsenal. The discussion of that matter brings up the entire question of how the equipment of the reserve forces of the United States shall be stored and distributed in time of need.

Mr. LEE of Maryland. Mr. President, will the Senator from New York yield to me for a moment?

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Maryland?

Mr. WADSWORTH. Yes.

Mr. LEE of Maryland. I have seen it stated in the Army and Navy Journal that the commanding officer of the New York National Guard made requisition in advance, and also that Gen. Sadler, of New Jersey, did so, and that they were refused

those requisitions on the ground that only a certain number could be allowed by the national authorities.

Mr. WADSWORTH. I shall come to that in just a moment, Mr. President.

The custom has been to issue to the National Guard units of the different States sufficient equipment to supply the men who are on the muster rolls, or at least to supply the number of men constituting the maximum peace strength. All surplus equipment of all kinds—clothing and ordnance—has been kept in the arsenals of the Federal Government. For the Department of the East the Philadelphia Arsenal has been the central storehouse, according to my information. In that arsenal the surplus equipment sufficient to supply the units up to war strength has been kept in great bins, in packages or boxes or bundles, labeled, addressed, and ready to be shipped by freight or express, as the case may be, to the units of the National Guard in the Department of the East, should they be called into the field, accompanied by an order to recruit to war strength.

It is true, as the Senator from Maryland [Mr. LEE] has said, that the National Guard authorities for some time past have been requesting and urging the Federal Government to change that system and to permit the storage of the war-strength equipment in the armories of the units rather than to hold it back in the central arsenal at Philadelphia. I am informed that in reply to that request the department gave it as its opinion that the Regular Army officials had no legal authority to place that surplus equipment in the hands of the National Guard officers. I know that the National Guard officers of New York offered to build special storerooms in the existing armories in which the Federal officer could deposit this surplus equipment and himself lock it up and seal up the contents, so that it would still be within the possession of the Federal Government, to be issued when the unit was raised to war strength upon a call. That solution of the problem, however, did not meet with favor at the hands of the Division of Militia Affairs, or whatever authority in the War Department has charge of that matter.

Mr. WORKS. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from California?

Mr. WADSWORTH. I yield to the Senator from California.

Mr. WORKS. A few days ago I saw a statement in the newspapers—which can not always be relied upon—that some regiments of the New York National Guard were so poorly equipped that they were kept out of the sight of the governor of the State when he was making an inspection of the guard. Does the Senator from New York know how much of truth there was in that statement?

Mr. WADSWORTH. Mr. President, in reply to the Senator from California, I will state that I personally have no direct knowledge of the condition of that particular regiment, but from my general knowledge of the National Guard and its condition now, I have not the slightest faith in the accuracy of that statement; and I see in this morning's paper that it is specifically denied.

Mr. WORKS. I had not seen that; but I was wondering, if that condition were true, who should be held responsible for it.

Mr. WADSWORTH. There have been conditions approaching that which have been due entirely to the difficulty imposed upon those units in suddenly recruiting to war strength, and the additional fact that the clothing for those recruits was at Philadelphia instead of in the armories for instant distribution.

Mr. BRADY. Where it should have been.

Mr. WADSWORTH. That is where it should have been.

Mr. PENROSE. Mr. President, will the Senator from New York permit me to make an inquiry?

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Pennsylvania?

Mr. WADSWORTH. I yield.

Mr. PENROSE. The Senator from New York is making a very interesting statement, which I know will throw much light on this subject; but before he proceeds, I should like to ask him why, if this equipment is all stored away in bins and labeled—I suppose with the address of The Adjutant General, or proper authority of the National Guard, in the different States of the Union—why has there been this extraordinary delay in the cases of Florida, South Carolina, and North Carolina? Why have they not yet received their equipment from the Philadelphia Arsenal?

Mr. WADSWORTH. Mr. President, I can not answer a question going into such detail as that. I do not know what the difficulties were in shipping the equipment to Florida. It may have been by reason of some mix-up in the requisition made by the Florida officer, or it may have been by reason of some failure in addressing the packages correctly or some unavoidable delay upon railways. It is almost impossible to state definitely just what that trouble was. There has been trouble of that kind in a greater or less degree in nearly all the States. We had some of it in New York, and the reason for that, I think, I can explain.

No Regular Army officer, in my judgment, is to blame and I know of no National Guard officer who may be justly blamed, but certain contingencies were not calculated in advance.

Mr. CHAMBERLAIN. May I interrupt the Senator from New York for just a moment?

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Oregon?

Mr. WADSWORTH. Certainly.

Mr. CHAMBERLAIN. The Senator from New York realizes that in reference to depositing equipment, uniforms, and so forth, with the National Guard, the difficulties that have confronted the War Department usually have been that the guard have no place in which to keep such equipment. Some of the National Guard of the country have not the armory space or they have not sufficient armories for the purpose——

Mr. WADSWORTH. That is very true, Mr. President.

Mr. CHAMBERLAIN. With the result that, if the Government were to deposit the equipment locally with the National Guard, it would be lost, just as has been the case in many instances in the past.

Mr. WADSWORTH. A sense of proportion must be used in deciding whether or not a National Guard unit has a proper place for storing Government property. It has possession of an enormous amount of Government property, anyway, even if the unit is only at peace strength; if it has a proper place in which to store it, I can see no objection to having the Government store the war strength equipment with it, and it should be left to the discretion of the regular officers having charge of ordnance and supplies of that sort to decide for themselves whether or not the Seventh Regiment of New York, for instance, is able, in its armory, to store Government property for war strength. If it is not, they need not put it there. But scores of units in scores of States have ample facilities in their armories.

Mr. CHAMBERLAIN. I fully agree with the Senator from New York about that, but does he think that under the law, as it is now, the War Department has discretion to put such property where it pleases? It might be done under a proper statute; and I think such a statute ought to be enacted, but I question whether it has the authority now.

Mr. WADSWORTH. Whether they have the authority to put the war strength equipment in the possession of the National Guard units is a very grave question. The New York Guardsmen made the suggestion that they would build inside the armories a store room for war-strength equipment and allow a Federal officer to put it in there and lock it up and seal it himself, so that only he could open it in the event a unit was called out and raised to war strength. But in any event, the law should be amended so that the Regular Army officers, at least, would have the discretion of placing the war-strength equipment close to the units which must have it in the event of a call being issued by the President. The result of the present system in all the States has been a very considerable delay in getting the equipment to the mobilization camps.

In this connection, I may say that the question of mobilization camps has never been worked out, so far as I am advised, either by the War Department or by very many of the National Guard organizations in the States. It is an impossible task to throw 18,000 or 20,000 men, as the State of New York has attempted to do, upon a piece of ground over night and have a water supply ready for them instantly. It takes a long time to drive the wells, if wells are necessary, to lay the pipes, to build the roads, and to bring about the improvements which are absolutely necessary in a semipermanent camp which is to accommodate 18,000 or 20,000 men and 7,000 horses and mules. That number of men and that number of animals consume about as much water as a fair-sized city.

One of the handicaps of this mobilization has been that many of the units have had to stay at their armories three or four days or a week because the mobilization camp was not ready; and, as the order came like a flash of lightning out of a clear sky, so far as preparing mobilization camps is concerned, it is unjust to blame anybody for the delay that occurred; but in the future, in my humble judgment, we must take into consideration the proposal that the Federal Government shall have under its jurisdiction and control a sufficient number of permanent mobilization camps throughout the United States where troops can be sent in winter or in summer. If this mobilization had taken place in winter, we would have heard a very different story. The difficulties which would have been encountered in such an event would have been enormous. No

ordinary camp ground in the Northern or Western States could have been used if freezing weather had prevailed, because the water supply would have been frozen and would have been put out of commission. In the present movement we have had some of these difficulties; and I think there is one great consolation in the situation, and that is the opportunity we have had to discover the shortcomings and defects of the system. As a matter of fact, I think it has surprised a great many people, and surprised very pleasantly many connected with the War Department, that the mobilization has gone forward as smoothly as it has and that troops who were comparatively green, whose numbers were only at peace strength, and who had no equipment in their possession for war strength, have been able to get to the border in such a short time. Should another such occasion arise, I feel quite sure that the War Department and the National Guard, acting, as they have acted in this instance, in perfect harmony, with the best of feeling, will make an even better showing.

We must remember when we try to compare mobilization in the United States with mobilization in France and in Germany that conditions are very different and that the difficulties here are vastly greater. This country is enormous in extent, and to think that we can ever mobilize 2,000,000 men or 3,000,000 men, as Germany and France did, in 36 or 48 hours is ridiculous. In the present instance we are sending men 1,800 and 2,000 miles away from their home stations, distances which are absolutely unknown abroad.

Furthermore, in this mobilization no great effort was made for speed. The trains which carried the troops from the Eastern States to Texas were limited in speed to 30 miles an hour because they were of mixed equipment. The organizations had to carry their horses in stock cars, while the men themselves were in day coaches or tourist sleepers. That makes a mixed train, and the regulations provide that no such train as that shall exceed 30 miles an hour in speed. If you add to those cars the flat cars, the gondolas, and the cooking cars, you get a mixed train, which is difficult to handle, and with which speed can not be attained.

In connection with the question of cars, I desire to say that there has been a great deal of discussion of the character and style of equipment which has been furnished the men for their transportation. We must remember that there are something less than 600 Pullman tourist sleeping cars in the United States, and nearly all of them in ordinary times are west of the Mississippi River. The Government attempted to get all of those Pullman tourist sleeping cars from the far West and send them to the far East, where the bulk of the troops were stationed. The result was that there were not enough Pullman tourist sleeping cars to carry the men.

The only iota of criticism that I would make in this connection is that when it became apparent that they could not get the tourist sleepers for the men, they took day coaches, which, of course, they had to take, and issued an order that the day coaches should be loaded three men to a double seat. That made it impossible for the men to stretch out and lie down. Had the order been for two men to a double seat, each man at least would have been able to have stretched out a little and to have obtained some rest. A 24-hour journey or a 36-hour journey for troops in day coaches, even under crowded conditions, of course, involves a degree of hardship which soldiers must expect to undergo; but when you lengthen the time to 5 days, 24 hours a day, with no chance to lie down comfortably, you are inflicting a hardship on the men which injures their health and efficiency when they get to the end of the line where their work is to be done. I think the only definite mistake, if I may venture an opinion—and I do not say it in a spirit of hostility at all—the only definite mistake that has been made in this entire mobilization to which a finger can be pointed is that regulation that three men should be assigned to a double seat in a day coach.

Mr. CHAMBERLAIN. Mr. President, may I interrupt the Senator?

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Oregon?

Mr. WADSWORTH. Certainly.

Mr. CHAMBERLAIN. I desire to state to the Senator that when I went West as a young man in 1876 we sat just in that way. Two young fellows sat on one side and put their feet across on the opposite seat, and the other sat on the opposite seat and put his feet between the other two, and we slept comfortably in that way on a journey of 3,000 miles.

Mr. WORKS and Mr. BRADY addressed the Chair.

The PRESIDING OFFICER. The Senator from New York has the floor. Does the Senator yield, and, if so, to whom?

Mr. WADSWORTH. I yield to the Senator from California.

Mr. WORKS. Mr. President, I can remember very well the time when soldiers were mighty glad to be permitted to lie down in uncomfortable freight cars. I have had that experience myself, and it is my opinion that the experiences of the National Guard in the present movement do not compare with the hardships the soldiers had to undergo during the Civil War.

Mr. WADSWORTH. Mr. President, there is no question about that. Any person who has studied the history of the Civil War knows that the soldier had to put up with conditions which the modern soldier knows little of. A modern soldier is treated with a degree of care and supplied with conveniences for living and equipment of which the soldier of 50 years ago did not know; but I may say that in the recent movement of troops there was no great national emergency, apparently; and it is economy, when there is time to obtain reasonable conveniences, to obtain them in order to conserve the health of the men. That was my sole object in pointing out the situation arising from assigning three men to a double seat in a day coach for five days.

Mr. WORKS and Mr. WARREN addressed the Chair.

The PRESIDING OFFICER. Two Senators have addressed the Chair. To whom does the Senator from New York yield?

Mr. WADSWORTH. I yield to the Senator from California.

Mr. WORKS. I agree entirely with what the Senator has said; and I think the Government ought to take the best possible care of its soldiers. I was only comparing the experiences of soldiers of the earlier days with those of the present day.

Mr. WADSWORTH. The comparison is perfectly correct and accurate.

Mr. WARREN. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Wyoming?

Mr. WADSWORTH. Yes.

Mr. WARREN. Mr. President, the Senator from New York is doing the Senate and the country a great service in explaining, as he has done, some of the occurrences and conditions in connection with the recent mobilization of our National Guard troops, and, as there seems to be a kind of symposium now on concerning the movement of troops, I should like to say a word.

I agree entirely with the Senator that in this day of civilization we ought to try to have tourist sleeping cars, so that every soldier may sleep every night; but where they can not be furnished—and very often they probably can not be—as the Senator says, the troops should be treated so that they can stretch out and partially lie down in the coaches.

I recall that in my service in the Civil War I never saw the inside of a passenger car during my service. When we returned home from Louisiana, by river part way and by rail from Cairo, Ill., to Pittsfield, Mass., we were in cattle cars; and if we undertook to lie down, we, of course, had to lie on the floor, and some of the company would lie down while the others stood. The train was only stopped once in each 24 hours for our accommodation, in some lone spot along the line, usually at a point to which we had wired ahead to get fresh bread and fresh meat. In spite of the conditions, however, we did not complain. The country was in its extremity and it was poor. The railroads, for that matter, also were poor, and their equipment was miserable. I have an idea that to-day the soldier who is called upon, if it were necessary, would submit to the same treatment as we endured; but, Mr. President, there are always a lot—I will qualify that and say there are always a few in every command, and they are usually those who have not lived so very well at home—who will always find fault with the food and with the accommodations, and nearly always they have access to certain newspapers. Therefore when we hear about a complaint being made, it is well for us to wait until we know the facts. I thank the Senator for allowing the interruption.

Mr. WADSWORTH. Mr. President, there has been very little complaint, and I want it most thoroughly understood that in anything I have said here this afternoon in connection with the use of day coaches I have not occupied the rôle of complainant on behalf of anybody. I imagine it is a pretty safe statement to make that no great body of American troops has ever been moved as comfortably as the men in the present mobilization have been moved.

Mr. WARREN. Never in the world.

Mr. WADSWORTH. I imagine it is a safe statement to make, that no troops in any other country have ever been moved more comfortably than the American troops have recently been moved to the border, considering the distance and the climate to which they have gone. As compared with what we accomplished, or failed, rather, to accomplish, in the Spanish-American War, this movement is a remarkable success. There is no comparison between the Spanish War conditions and the conditions of to-day, as affecting the methods by which we have mobilized and moved these men.

To-day the lot of the enlisted men is infinitely better than during the Spanish-American War. For instance, we must not forget when we make comparisons, particularly when we are thinking of the health of the men, that every man who has gone to the border is a typhoid immune. There was not one immune in the Spanish War, and thousands died of typhoid. There can be no typhoid epidemic in any camp on the border, for every man has had the typhoid prophylactic.

I think the Medical Corps is infinitely superior in all of its operations. The clothing of the men is infinitely better than the clothing given to the men in the Spanish-American War; it is of much better material, and is better made. It will be remembered that in the Spanish-American War every volunteer from the States was armed with a single-loader Springfield rifle using black powder, while his enemy was armed with a magazine Mauser using smokeless powder. To-day every soldier who goes out is armed with what is believed to be the best military rifle in the world. There is no comparison in that respect. Every article of the equipment has been worked out as the result of years of careful study by Regular Army officers. The Army shoe is supposed to be the best military shoe in the world as the result of tests conducted year after year with shoes actually fitted to the men.

The equipment furnished and all the conveniences and safeguards thrown around the men to-day are infinitely superior to those furnished and thrown around the soldier at the time of the Spanish-American war, and the country should be congratulated on what has been accomplished in the 18 years since the Spanish-American War. There will always be room for improvement. We never will reach perfection. Particularly, will we never reach perfection so long as we rely entirely upon the volunteer system of recruiting armies; but that is the American spirit, apparently, and we shall have to rely upon it for the time being. We ought to be proud of the spirit in which the men all over the country have responded to the call and sacrificed their business and their interests to show that they wanted to be, and were in fact, soldiers of the United States; and I think we should all be gratified at seeing how smoothly, compared to the old days, the movement has proceeded and how successfully the mobilization has been attained.

Mr. BRADY. Mr. President, the very interesting and instructive remarks of the Senator from New York [Mr. WADSWORTH] emphasizes the point which I have previously suggested to the Senator to-day, namely, the necessity for cooperation between all the departments of the Army as well as hearty cooperation on the part of the States of the Union.

I am proud of the fact that New York mobilized and sent her quota of men to the border quickly and in such a splendid manner that it is a credit not only to the State of New York but to our Nation as well. There has never been a time in the history of this Government when a State in so short a time mobilized the same number of troops that New York mobilized and sent them 2,000 miles and placed them successfully in camp ready for action.

They have set a good example; they had many difficulties to overcome; and I want to use this as an illustration to show that what we need and all we need to do in this country is to work in harmony—to have team work between the National Guard and the Regular Army. If we do this, we will most surely accomplish the purposes intended by the enactment of this law.

It has not been such a great while since this law was written. It has not been such a great while since the President attached his signature to it; and yet we find, as quoted and placed in the RECORD by the Senator from Massachusetts, that we have to-day in the mobilization camps on the border 100,008 National Guardsmen, and we have at mobilization camps at home 59,204 National Guardsmen—nearly 160,000 men mobilized and ready for action inside of 60 days. That is something that every American citizen should be proud of.

Referring for a moment to the condition at Philadelphia, it seems to me that that can not occur again, and is a condition which is unavoidable at this time, for we have in the past considered the National Guard or the militia as belonging exclusively to the States, with no control by the National Government except to be called out in time of war or invasion. We passed a new law. We attempted to, and I hope we did, bring the National Guard under the direct authority of the National Government. Conditions naturally have changed, and instead of keeping all our supplies at Philadelphia, as we have done in the past, we will do just exactly as the Senator from New York suggests, we will distribute them around with the different units of the National Guard, and then, when the call comes to arms, they will be ready to receive the supplies that they should receive, and we can mobilize in the future in one-fifth of the time that we mobilized on this occasion.

We must also take into consideration the distances that we have to travel. Take New York: Why, sending an army from New York to the Mexican border is like taking an army from France through Belgium and Germany and those other countries clear over into Russia. We must also admit that we became just a little bit hysterical. We imagined that we were going to have a war overnight, or some of our people did, and that they must mobilize on the moment. But that was not really necessary. We realize now that we might have taken these troops and moved them by daylight and never run a car at night and have placed them on the border in plenty of time. It was an unforeseen condition that confronted us and it was handled well.

It seems to me, with the showing that we made, both with our Regular Army and the members of the National Guard, that we should be satisfied with results and realize that we can not in a moment or in a few days or in a month, for that matter, organize a great army such as we have organized without having some mishaps, some delays, and some disappointments. But we have done very well.

We are going on, determined in the end to secure a National Army that will be a real defense to this country. I hope, and I earnestly believe, that by cooperation, instead of villification or misunderstanding, we can get together and have a splendid Army, consisting of our Regular Army as our first line of defense and our National Guard as our second line of defense, each cooperating with the other, governed only by one thought and ambition—the defense of our country.

The PRESIDING OFFICER. The Secretary will state the next amendment.

The next amendment was, on page 29, after line 15, to insert:

For additional clerks in the field on account of the muster into the service of the United States of the National Guard, $50,000.

The amendment was agreed to.

The next amendment was, under the subhead "Philippine Scouts," on page 29, line 23, before the word "lieutenants," to insert "second," so as to make the clause read:

Sixty-five second lieutenants, at $1,700 each per annum, $110,500.

The amendment was agreed to.

Mr. JONES. Mr. President, I did not know that we had disposed of the amendment in line 16, page 28, and the amendment in line 18, page 28; but all I wanted to do was to ask the chairman a question in regard to the word "beneficiaries," in line 14.

The PRESIDING OFFICER. The Chair will state to the Senator from Washington that the Senate rejected those two amendments of the committee, and the items stand as they were in the House bill.

Mr. JONES. Of course, the word "beneficiaries" is in the House text, and I want to know whom it would cover.

Mr. CHAMBERLAIN. They are the persons designated by the officers or enlisted men to receive this money in case anything happens to them.

Mr. JONES. Can the officer designate anybody to receive this money?

Mr. CHAMBERLAIN. Yes, sir.

Mr. JONES. A stranger?

Mr. CHAMBERLAIN. Members of his family, his widow, or his mother.

Mr. JONES. But this does not say so. Could he designate some stranger?

Mr. WARREN. Is that as to the payment in case of death?

Mr. CHAMBERLAIN. Yes.

Mr. WARREN. An officer or a man, when he enlists, states the party to whom he would wish it to go.

Mr. CHAMBERLAIN. Under the law, in case anything happens to him——

Mr. WARREN. The law provides for that.

Mr. JONES. But can he give it to anybody he wants to? Can he give some of this money to a stranger?

Mr. WARREN. It is given to those that the deceased had already provided that it should go to.

Mr. JONES. I know; but does the law require that it shall go to certain members of his family, or certain next of kin, or certain dependents upon him, or can he turn it over to some friend?

Mr. CHAMBERLAIN. I will give the Senator the statute on that subject.

Mr. JONES. That is what I wanted to get.

Mr. CHAMBERLAIN. It is section 1061 of the military law:

Gratuity: Hereafter, immediately upon official notification of the death from wounds or disease contracted in line of duty of any officer or enlisted man on the active list of the Army, the Paymaster General of the Army shall cause to be paid to the widow of such officer or enlisted man, or to any other person previously designated by him, an amount equal to six months' pay at the rate received by such officer or enlisted man at the date of his death, less $75 in the case of an officer and $35 in the case of an enlisted man. From the amount thus

reserved the Quartermaster's Department shall be reimbursed for expenses of interment, and the residue, if any, of the amount reserved shall be paid subsequently to the designated person. The Secretary of War shall establish regulations requiring each officer and enlisted man to designate the proper person to whom this amount shall be paid in case of his death, and said amount shall be paid to that person from funds appropriated for the pay of the Army.

That is under the act of May 11, 1908.

Mr. JONES. I take it, then, that this word "beneficiaries" would cover those parties; but it seems to me rather peculiar that even under that law a man could designate simply a friend to whom this should be paid. Of course I understand that it is not contemplated to try to change that.

The reading of the bill was resumed.

The next amendment was, in the item of appropriation for subsistence of the Army, on page 32, in line 12, after the word "That" to insert "hereafter," and in line 20, after the words "Marine Corps," to strike out "$13,000,000" and insert "and for the National Guard when called or drafted into the service of the United States, $27,377,000," so as to make the proviso read:

Provided further, That hereafter the officers and enlisted men of the Navy and the Marine Corps shall be permitted to purchase subsistence supplies at the same price as is charged the officers and the enlisted men of the Army; and the officers and the enlisted men of the Army shall be permitted to purchase subsistence supplies from the Navy and Marine Corps at the same price as is charged the officers and the enlisted men of the Navy and Marine Corps, and for the National Guard when called or drafted into the service of the United States, $27,377,000.

The amendment was agreed to.

Mr. CHAMBERLAIN. I desire to ask that the committee amendment be modified by reducing the amount from $27,377,000 to $20,000,000.

Mr. LEE of Maryland. Mr. President, I should like to ask the Senator why he makes that recommendation.

Mr. CHAMBERLAIN. That is based on supplemental estimates made by the department. The department says that $27,377,000—

Will provide subsistence for the Regular Army and first increment, and, including Philippine Scouts and civilian employees, a total of 133,960 men and all other purposes of the appropriation for one year, the amount required for this purpose being $13,686,500. The amount remaining, $13,690,500, will subsist the National Guard called into the service of the United States, estimated at maximum strength, viz, 238,938 enlisted men, to December 31, 1916.

We have not that number of men, and we have made a cut in the original estimates to meet the actual number of men in the service; that is all.

Mr. LEE of Maryland. Mr. President, of course I am considering the contingency of the possibility of crossing the Rio Grande. The Senator from New York [Mr. WADSWORTH] used a very admirable expression just now in talking about the delays in distributing the supplies. He said the contingency of distributing these supplies was not prepared for in advance. Now, of course, if you have supplies and if you have troops and your whole military system is gotten together on the theory that you will have the contingency of using them——

Mr. WADSWORTH. Mr. President, will the Senator yield just a moment? I did not mean to be misunderstood in that. When I said that that contingency had not been prepared for in advance, I did not mean to give the impression that anyone was to blame. The law apparently prevented the distribution of the equipment to the Army.

Mr. LEE of Maryland. That is just what I am talking about.

Mr. WADSWORTH. The law should be amended.

Mr. LEE of Maryland. I am talking about the law and the men that make the law. Now, the contingency of crossing the Rio Grande is apparently to be ignored in these appropriations. It is a much more probable contingency than the need for quickly handling these supplies in the Philadelphia Arsenal was at any given time in the past. Here we now have the troops on the Rio Grande. They have to go either north or south. They can only go two ways, and it is a reasonable contingency that should be provided for, the possibility of their going south and engaging in war or in intervention in Mexico.

Are we to keep on pursuing this policy of not providing for reasonable contingencies, or a reasonably probable contingency? That is the question. I want to ask the Senator if the reduction which he proposes is based upon the theory that the troops certainly are not going to be used across the Rio Grande?

Mr. CHAMBERLAIN. Mr. President, we have made these recommendations on the estimates of the War Department, based on the conditions as they are, not as they may be 6 months from now, a year from now, or 10 years from now, but the conditions as they are to-day.

When all of these estimates were made by the committee, the committee went the limit in order to give the department the amount they had estimated for as necessary to provide for the absolute defense of our country and our people. Now, when conditions change—and they have changed—our committee does not feel, and the War Department does not feel, that we ought to appropriate an immense sum of money which there is not any chance in all human probability to use. If we do cross this stream that we have attended on down there in Mexico for a while, it is only about three months until Congress convenes again, and all the moneys that are needed can be appropriated in a deficiency bill.

Mr. LEE of Maryland. Mr. President, I think the Senator makes it perfectly clear that the reduction he proposes is based on the theory that the contingency of crossing the Rio Grande is not to arise. His arguments, his statements, clearly indicate that fact—that he recommends to the Senate, in the name of his committee, that there shall not be food for the Army provided for, or even appropriated for, in advance as preparedness for this contingency. We are going right straight along with the Philadelphia Arsenal plan of making no provision for contingencies, and make that the rule of our military unpreparedness.

I do not want to make myself disagreeable to the Senator and have him feel that I am attempting to coerce him or his committee. I am simply trying to talk about this subject as I see it, and trying to avoid the mistakes that have been perpetrated in the last few days, right in this mobilization, and trying to get an appropriation here, before Congress adjourns, that could be expended to supply this Army with food if it had to cross the Rio Grande. I do not see how any man with any degree of caution in his make-up can say that the contingency of an Army crossing a river upon which the Army is already encamped ought not to be considered and provided for by the lawmakers of the country.

Mr. CHAMBERLAIN. Mr. President, may I interrupt the Senator?

Mr. LEE of Maryland. Certainly.

Mr. CHAMBERLAIN. Let me say to the Senator that the amount of $20,000,000 that we propose to appropriate here will support the Army for six months whether they cross the river or not. That does not make any difference. If the Senator will notice, the original estimate embraced an appropriation for National Guardsmen amounting to 238,938 men. We have not got them. In other words, the estimate was made for 238,000 men. We have cut it down now because we have not got that many men, and are not likely to have them. So that there is plently of money appropriated in the $20,000,000 to keep them for six months, no matter whether they are in Mexico or in Texas.

Mr. LEE of Maryland. Mr. President, the contingency of crossing the river is not limited to the force that is camped on the river. If any of those troops go over that river, you may be perfectly sure that there will be a great many more thousands and tens of thousands go over that river than are camped on it to-day. The contingency is a large one that faces this country. Just as surely as those 91,000 or 100,000 men are camped on the Rio Grande, there is the possibility of their crossing it. The very fact of their being there expresses the possibility.

Now, if they go over that river, it is not a question of 100,000 men; it is a question of many hundred thousands of men. I would deplore it more than probably any man here to see those troops pass over that river, because I believe that if they do pass over there all of our high pretension as to not being a conquering nation and not interfering and taking property or the territory of our neighbors will fall down. I believe that if the emergencies of this situation compel a war between this country and Mexico, all of our high-sounding aspirations about not acquiring territory by arms will vanish away, and that the blood lust of battle will make us do as most nations do under such circumstances—conquer and hold.

So I hope, Mr. President, that our troops will not pass over that river on this occasion; but I do say that it is a reasonable contingency, and I do deplore the lack of reasonable foresight on the part of the committee in not providing for the contingency which actually faces 91,000 or 100,000 troops now camped on the border and possibly many thousands more.

The whole situation suggests a contingency to be provided against. I do not think it lies in the mouth of any man, in view of the experience we have just had in distributing the clothing to these troops—the delay in putting shoes and shirts on these men—to say that we shall go ahead in this kind of policy which, as the Senator from New York just now reasonably said, is a failure to provide for contingencies in advance.

That is what I am talking about here. I do not want to irritate the Senator or the committee, but I do not see how he or any other man, with all these troops on the Rio Grande, can ignore in this bill reasonable preparation for the contingency of those men crossing that river.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Oregon to the amendment of the committee, which will be stated.

The SECRETARY. It is proposed to strike out, in the committee amendment, "$27,377,000" and insert "$20,000,000."

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment was, in the item of appropriation for "Regular supplies, Quartermaster Corps," on page 34, line 23, after the word "thereto," to insert "including, when specifically authorized by the Secretary of War, the cost of irrigation: *Provided*, That the accounting officers of the Treasury are hereby authorized and directed to remove any suspensions or disallowances in the accounts of Capt. Sam Van Leer, Quartermaster Corps, United States Army, for expenditures made in connection with the establishment of an irrigation system at the Fort Keogh Remount Depot, Mont.," and on page 35, line 9, after the word "reports," to strike out "$8,700,000" and insert "and for the National Guard when called or drafted into the service of the United States, $17,071,123," so as to read:

For seeds and implements required for the raising of forage at remount depots and on military reservations in the Hawaiian and Philippine Islands and for labor and expenses incident thereto, including, when specifically authorized by the Secretary of War, the cost of irrigation: *Provided*, That the accounting officers of the Treasury are hereby authorized and directed to remove any suspensions or disallowances in the accounts of Capt. Sam Van Leer, Quartermaster Corps, United States Army, for expenditures made in connection with the establishment of an irrigation system at the Fort Keogh Remount Depot, Mont.; for straw for soldiers' bedding, stationery, typewriters and exchange of same, including blank books and blank forms for the Quartermaster Corps, certificates for discharged soldiers, and for printing department orders and reports, and for the National Guard when called or drafted into the service of the United States, $17,071,123.

Mr. CHAMBERLAIN. I move to modify the appropriation as made by the Senate committee, and instead of "$17,071,123" to insert "$12,000,000."

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. On line 11, page 35, in the committee amendment, it is proposed to strike out "$17,071,123" and to insert in lieu thereof "$12,000,000."

Mr. LEE of Maryland. Mr. President, I merely want to state in the RECORD that this is simply a continuation of the same policy of not providing for the reasonable contingencies in advance; and I object to it, as I object to these other reductions.

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment was, on page 36, line 23, after the word "days," to insert "as additional school-teachers during the school term at post schools," so as to read:

Incidental expenses, Quartermaster Corps: Postage; cost of telegrams on official business received and sent by officers of the Army; extra pay to soldiers employed on extra duty, under the direction of the Quartermaster Corps, in the erection of barracks, quarters, and storehouses, in the construction of roads, and other constant labor for periods of not less than 10 days; as additional school-teachers during the school term at post schools, and as clerks for post quartermasters at military posts, and for overseers of general prisoners at posts designated by the War Department for the confinement of general prisoners, and for the United States disciplinary barracks guard.

The amendment was agreed to.

The next amendment was, in the item of appropriation for "Incidental expenses, Quartermaster Corps," on page 38, line 15, after the word "department," to strike out "$1,900,000" and insert "and for the National Guard when called or drafted into the service of the United States, $2,373,400," so as to read:

For the shoeing of horses and mules; chests and issue outfits; and such additional expenditures as are necessary and authorized by law in the movements and operations of the Army, and at military posts, and not expressly assigned to any other department, and for the National Guard when called or drafted into the service of the United States, $2,373,400.

The amendment was agreed to.

The next amendment was, on page 38, line 25, after the word "discharge," to insert "*Provided*, That hereafter when an enlisted man having 10 or more years' service in the Army is discharged on account of disability incurred in the line of duty, transportation of his authorized change of station allowance of baggage from his last duty station to his home in addition to other travel allowances fixed by law may be authorized by the Secretary of War," so as to read:

Transportation of the Army and its supplies: For transportation of the Army and its supplies, including transportation of the troops when moving either by land or water, and of their baggage, including the cost of packing and crating; for transportation of recruits and recruiting parties; of applicants for enlistment between recruiting stations and recruiting depots; for travel allowance to enlisted men on discharge: *Provided* That hereafter when an enlisted man having 10 or more years' service in the Army is discharged on account of disability incurred in the line of duty transportation of his authorized change of station allowance of baggage from his last duty station to his home in addition to other travel allowances fixed by law may be authorized by the Secretary of War; of persons on their discharge from the United States disciplinary barracks or from any place in which they have been held under a sentence of dishonorable discharge and confinement for more than six months, or from the Government Hospital for the Insane after transfer thereto from such barracks or place, to their homes (or elsewhere as they may elect), provided the cost in each case shall not be greater than to the place of last enlistment.

The amendment was agreed to.

The next amendment was, in the item of appropriation for "Transportation of the Army and its supplies," on page 42, line 1, after the word "Oceans," to strike out "$12,000,000" and insert "and for the National Guard when called or drafted into the service of the United States, $38,441,504," so as to read:

For the purchase and repair of ships, boats, and other vessels required for the transportation of troops and supplies and for official, military, and garrison purposes; for expenses of sailing public transports and other vessels on the various rivers, the Gulf of Mexico, and the Atlantic and Pacific Oceans, and for the National Guard when called or drafted into the service of the United States, $38,441,504.

Mr. CHAMBERLAIN. Mr. President, I desire to have "$25,000,000" inserted in place of "$38,441,504." I understand that it is only necessary to modify the committee amendment by suggesting that that be done.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. In the committee amendment it is proposed to strike out "$38,441,504" and in lieu thereof to insert "$25,000,000."

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment was, on page 42, line 21, after the word "employees," to strike out "$1,750,000" and insert "and for the National Guard when called or drafted into the service of the United States, $2,500,000," so as to make the clause read:

Water and sewers at military posts: For procuring and introducing water to buildings and premises at such military posts and stations as from their situation require it to be brought from a distance; for the installation and extension of plumbing within buildings where the same is not specifically provided for in other appropriations; for the purchase and repair of fire apparatus, including fire-alarm systems; for the disposal of sewage and expenses incident thereto, including the authorized issue of toilet paper; for repairs to water and sewer systems and plumbing within buildings; and for hire of employees, and for the National Guard when called or drafted into the service of the United States, $2,500,000.

The amendment was agreed to.

The next amendment was, on page 43, line 18, after the word "reasons," to strike out "$12,000,000" and insert "and for the National Guard when called or drafted into the service of the United States, $20,280,000," so as to make the clause read:

Clothing and camp and garrison equipage: For cloth, woolens, materials, and for the purchase and manufacture of clothing for the Army, for issue and for sale at cost price according to the Army Regulations; for payment for clothing not drawn due to enlisted men on discharge; for altering and fitting clothing and washing and cleaning when necessary; for equipage, including authorized issues of toilet articles, barbers' and tailors' materials, for use of general prisoners confined at military posts without pay or allowances and applicants for enlistment while held under observation; issue of toilet kits to recruits upon their first enlistment, and issue of housewives to the Army; for expenses of packing and handling and similar necessaries; for a suit of citizen's outer clothing, to cost not exceeding $10, to be issued upon release from confinement to each prisoner who has been confined under a court-martial sentence involving dishonorable discharge; for indemnity to officers and men of the Army for clothing and bedding, etc., destroyed since April 22, 1898, by order of medical officers of te Army for sanitary reasons, and for the National Guard when called or drafted into the service of the United States, $20,280,000.

Mr. CHAMBERLAIN. I desire to change that amendment to "$16,000,000." I move to strike out "$20,280,000" and to insert "$16,000,000."

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. In the committee amendment on page 43, line 20, it is proposed to strike out "$20,280,000" and in lieu thereof to insert "$16,000,000."

Mr. LEE of Maryland. Mr. President, this seems to me to be especially objectionable, because all of the shortages and delays in the equipping of these troops, or, at least a large part of

them, have been in connection with this question of clothing and camp and garrison equipage. If these troops may cross the river, and the other thousands cross with them, you can not go into the market and buy clothing and equipment in a twinkling. It is just the same lack of preparation, the same lack of foresight, with reference to a probable contingency, that has been exhibited as a matter of legislative omission before. I very strongly object to a reduction of this equipment, which must be supplied in an emergency, when we have these troops facing an emergency, as they stand to-day.

I do not want to interfere with the orderly progress of this bill, but I am really very doubtful of the propriety of a reduction in connection with clothing and equipment being put through here without a vote or a call of the Senate.

Mr. WEEKS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Massachusetts?

Mr. LEE of Maryland. Certainly.

Mr. WEEKS. I want to ask the Senator how he accounts for the fact that the troops of some States were thoroughly equipped and ready for service, and the troops of other States were not? Is it not the fault of the States that their National Guardsmen are not ready, rather than the fault of the National Government?

Mr. LEE of Maryland. Mr. President, I have understood that the difficulties in getting the equipment were the same everywhere.

Mr. WEEKS. There was no trouble in Massachusetts.

Mr. LEE of Maryland. If that is the case, the Senator must admit that he did not increase the number of the troops on call. The Senator knows that 65 men to a company was the limit for which equipment could be furnished by the United States.

Mr. WEEKS. Mr. President, they were recruited up to that strength under the old organization. Massachusetts sent 7,000 men to the border, within 10 days of the call, thoroughly equipped; and it seems to me that if the Senator will take the trouble to investigate he will find that to a considerable extent the lack of readiness is to be placed on the States rather than on the National Government.

Mr. LEE of Maryland. The Senator was not in the Chamber when I referred to a statement in the Military Journal of the fact that both the adjutant general of New York and the adjutant general of Pennsylvania asked in advance for this equipment. I think the Senator from New York [Mr. WADSWORTH] just now stated that his State offered to build special places to receive equipment in advance, and they could not get it because it was against the law. As the Senator from New York [Mr. WADSWORTH] very wisely said, there had not been any provision made for the contingency of increasing the guard and calling them into the service of the country.

Now, that is just what I am talking about, Mr. President. The guard existed for the contingency of being called. The whole military system of the United States should recognize the possibility of that contingency; and right now, with these 91,000 or more guardsmen upon the Rio Grande, the Senator from Massachusetts, as a member of the Military Committee, is here backing up these amendments, which cut down the equipment of the guard and ignores the fact that 100,000 men on the line of a great river have been summoned there with the possibility of intervening in the affairs of the next country, and the possible contingency of these forces crossing the river upon which they are encamped is one for which the Senator from Massachusetts is unwilling to provide.

Now, Mr. President, I say—and in saying it I fear I rather irritate the chairman of the committee and the Senator from Colorado and the other gentlemen responsible for this lack of legislation, this lack of providing for contingencies—you can not ignore the fact that those soldiers are on that river. You can not ignore the fact that they may go over that river. That is a military contingency for which this body ought to provide, and this body ought not to agree to the committee recommendation of striking down the provision for clothing and camp and garrison equipage that should be available for these men in case of the contingency of their crossing the river.

The estimate was made on that theory. There can not be any misunderstanding on this subject. It is not a question of pay; it is just a question of the absolute essentials of the existence and efficiency of these troops, and it will be absolutely needed in the contingency that they are ordered to go into Mexico.

Mr. President, this is a rather serious proposition, and I am going to ask the Senator to pass over this item, as I do not want to interfere with the general progress of his bill and let this matter go over until there is a larger attendance of the Senate.

Mr. CHAMBERLAIN. I have no objection to having it go over upon the Senator's request. I want the Senator to be assured that while I may be heated once in a while in our little controversies here I have no ill feeling in the world against the Senator, and I rather enjoy a scrap with him.

In this connection, however, I want the Senator to distinctly understand that our committee has never at any time been unfriendly to the National Guard. As a matter of fact, we have kept all through the National Guard and the Regular Army on exactly the same footing, and there has been no disposition to make any discrimination.

I want the Senator to bear in mind in reference to the reduction of the appropriation for clothing, and so forth, when the trouble first arose in Mexico, after the bill passed the House, while it was pending before the Senate committee we looked into that subject with a view that the National Guard and the Regular Army at peace strength should be equipped with clothing sufficient to meet all the requirements of that strength.

If the Senator will look on page 470 of the House hearings, he will find a note on this whole subject, and on the next page, 471, there is an itemized statement of all the equipment that the Government had for use in equipping both the Regular Army and the National Guard. I am going to read that note into the RECORD, because, with the equipment we had and with the equipment that was on hand that was not being used, we had more than enough to clothe and equip all the men who have since come into the service, whether by way of volunteers in the Regular Army or as the National Guard mustered into the service. Says the note:

> As a general proposition, it can be said that we have on hand at the general supply depots a larger working stock than was on hand a year ago, and, as will be seen from the attached statement, there is on hand at the general supply depots and in field supply depot No. 1 (the latter is set aside as an actual reserve) sufficient of the principal articles to provide the initial equipment for approximately 150,000 men.

That is, in addition to the equipment that was being used by the Regular Army and by the National Guard. Continuing, the note says:

> The articles deficient are, with few exceptions, of more or less a commercial character, readily procurable in the open market.

The Senator has suggested that it takes a good while to fix up these uniforms; but the deficiency did not exist in uniforms, the deficiency exists in commercial articles that could be obtained in the open market—

> In addition to the foregoing, the stock on hand at posts is estimated as sufficient to equip approximately 100,000 men with equipment C.

What that means is described in the note:

> This equipment is based upon General Orders, 39, War Department, 1915. While, under this order, the allowances of quartermaster supplies under equipment C are stated to be sufficient to meet the requirements for a period of at least 30 days, it can be safely stated that the allowances of clothing and equipage under equipment C, under ordinary service conditions, would be sufficient for a period of at least 90 days.

I call attention to that because, if the matter goes over, I want the Senator to see this provision in connection with the subject when it comes up again.

The PRESIDING OFFICER. Without objection, the amendment will go over.

The next amendment was, on page 43, line 21, after the word "*Provided*," to strike out: "That hereafter the proceeds derived from the sale of surplus cuttings of material for clothing manufactured by the Quartermaster Corps of the Army shall be deposited to the credit of that appropriation out of which the material was purchased: *Provided further*," so as to make the clause read:

> *Provided*, That hereafter sewing machines and other labor-saving machinery use in the manufacture of clothing and equipage, motor trucks and passenger-carrying vehicles, and band instruments, may be exchanged in part payment for new machines, vehicles, and instruments used for the same purpose as those proposed to be exchanged.

The amendment was agreed to.

The next amendment was, on page 44, after line 6, to insert:

> *Provided further*, That hereafter the accounting for quartermaster supplies or property and the fixing of responsibility therefor shall be according to such regulations as may be prescribed by the Secretary of War: *Provided further*, That hereafter, under such regulations as may be prescribed by the Secretary of War, officers of the Quartermaster Corps accountable for public moneys may intrust such moneys to other officers for the purpose of having them make disbursements as their agents, and the officers to whom the moneys are intrusted shall be held pecuniarily responsible therefor to the United States.

Mr. LEE of Maryland. Mr. President, I should like to ask the Senator from Oregon if this authority would extend to the officers of the National Guard? Would it be granted to quartermaster officers, and if it does not why should not the language be made broad enough to include such officers?

Mr. CHAMBERLAIN. I think it is the intention to include all. There is no intent to limit it in its application to one branch of the service. If the Senator will look at page 479 of the House hearings he will find just the reasons which suggested the amendment.

Mr. LEE of Maryland. Of course the Senator will recognize that if the authority to take these quartermaster supplies is to be given effectively it will have to be extended to officers of the National Guard when they are still in the service of the State and in times when they are not called by the President, so that the goods can be distributed and handled in National Guard depots. I presume the object of the amendment is to correct the present situation.

Mr. CHAMBERLAIN. Under regulations to be prescribed by the Secretary of War.

Mr. LEE of Maryland. Under regulations to be prescribed by the Secretary of War. It is an admirable amendment if it is broad enough to take in the situation, if it will permit National Guard officers to be made, so to speak, the agents for this service. I would suggest that the words "including officers of the National Guard when not in the service of the United States" be inserted after the word "officers," in line 14.

Mr. CHAMBERLAIN. I do not think it is necessary to do that. We put it in just as the War Department sent it up, and the Secretary of War makes the regulations.

Mr. LEE of Maryland. It has been suggested to me by the Senator from New York [Mr. WADSWORTH] that under the new Army law this matter can be covered by the regulations of the Secretary of War and that will be satisfactory.

Mr. BRANDEGEE. Mr. President, I have just looked at the amendment on page 44 for the first time. While I have no amendment to offer to it, I want to call the attention of the Senator in charge of the bill to it, and if there is anything in the suggestion I make he may consider it in conference.

The amendment provides that—

Officers of the Quartermaster Corps accountable for public moneys may intrust such moneys to other officers for the purpose of having them make disbursements as their agents, and the officers to whom the moneys are intrusted shall be held pecuniarily responsible therefor to the United States.

I am not at all qualified to speak upon the question. I do not know whether it follows in language any previous law; but it occurs to me, as I read it hastily, that there is some question as to whether, if these other officers are the agents of the quartermasters, they can be held responsible pecuniarily to the United States. Of course the quartermaster is in a certain sense the agent of the United States itself. He is the disbursing officer; he gives bond; and now to give him the authority to appoint an agent it is rather queer language, I think, to be used in the military bill anyway, and then provide that the agent of the quartermaster shall be responsible, not to his principal but to the United States. I will not say exactly what I think about it, but I think it is a little vague. I simply want to bring the Senator's attention to it.

Mr. CHAMBERLAIN. That same question, I will say to the Senator, suggested itself to my mind, but in adopting it we really followed the Judge Advocate General. In the memorandum I see that he presented it. I presumed that he had given it a good deal of attention. I know the need of it has been felt at frequent times where the man who had charge of the quartermaster's supplies saved himself a trip to a post, for instance; it saved keeping a quartermaster on the ground to make the disbursement.

Mr. BRANDEGEE. I can thoroughly appreciate the desirability of some such method; in a time of emergency especially it would greatly facilitate the duties of the quartermaster. Quartermasters, I believe, are bonded officers, and to allow a quartermaster merely to create an agent of his and turn over all the property of the Government to him without any bond, and simply as the agent hold him pecuniarily responsible when in fact he may be utterly impecunious is another suggestion. But I will say, in passing, anything that the Judge Advocate General does I have great confidence in. I believe I would not have made the suggestion if I had known that he was the author of the amendment.

The amendment was agreed to.

The next amendment was, on page 46, line 5, after the word "place" to insert "and for the National Guard when called or drafted into the service of the United States," so as to make the clause read:

Horses for Cavalry, Artillery, Engineers, etc.: For the purchase of horses of ages, sex, and size as may be prescribed by the Secretary of War for remounts, for officers entitled to public mounts for the Cavalry, Artillery, Signal Corps, and Engineers, the United States Military Academy, service schools, and staff colleges, and for the Indian scouts, and for such Infantry and members of the Hospital Corps in field campaigns as may be required to be mounted, and the expenses incident thereto, and for the hire of employees: *Provided*, That the number of horses purchased under this appropriation, added to the number now on hand, shall be limited to the actual needs of the mounted service, including reasonable provisions for remounts, and, unless otherwise ordered by the Secretary of War, no part of this appropriation shall be paid out for horses not purchased by contract after competition duly invited by the Quartermaster Corps and an inspection under the direction and authority of the Secretary of War. When practicable, horses shall be purchased in open market at all military posts or stations, when needed, at a maximum price to be fixed by the Secretary of War: *Provided further*, That no part of this appropriation shall be expended for the purchase of any horse below the standard set by Army Regulations for Cavalry and Artillery horses, except when purchased as remounts or for instruction of cadets at the United States Military Academy: *And provided further*, That no part of this appropriation shall be expended for polo ponies except for West Point Military Academy, and such ponies shall not be used at any other place, and for the National Guard when called or drafted into the service of the United States, $3,800,000.

Mr. WADSWORTH. I have not the slightest criticism against this amendment as one of a series in which the same language is used. Just what it means in this particular connection it is difficult to understand, because it is made a part of a proviso which reads:

And provided further, That no part of this appropriation shall be expended for polo ponies except for West Point Military Academy, and such ponies shall not be used at any other place, and for the National Guard when called or drafted into the service of the United States.

Mr. CHAMBERLAIN. I think that probably that language was inadvertently put in.

Mr. WADSWORTH. I am sure the Guard would be very glad to have the ponies.

Mr. CHAMBERLAIN. It was following the habit I had of not overlooking the National Guard of my friend the Senator from Maryland. We want to be sure to have it in whenever there is a chance to put it in.

The PRESIDING OFFICER. What is the pleasure of the Senator from Oregon with reference to the amendment?

Mr. CHAMBERLAIN. I think it ought, properly, to be transferred to page 45, line 12, just before the proviso.

The PRESIDING OFFICER. It will be stated.

The SECRETARY. After the word "employees," line 12, insert the words:

And for the National Guard when called or drafted into the service of the United States.

The PRESIDING OFFICER. Without objection, the amendment is agreed to. The question is on agreeing to the amendment on page 46, inserting the same words in line 5.

The amendment was rejected.

Mr. CHAMBERLAIN. I desire to amend the House provision. I desire to offer to reduce the amount from $3,800,000 to $2,500,000.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 46, line 7, strike out "$3,800,000" and insert "$2,500,000," so as to read:

And provided further, That no part of this appropriation shall be expended for polo ponies except for West Point Military Academy, and such ponies shall not be used at any other place, $2,500,000.

Mr. LEE of Maryland. This, Mr. President, is another most objectionable amendment of the same sort. It takes a long time to make clothing adequate for soldiers, but it takes a longer time to get horses and break them in and get soldiers used to those horses for military purposes.

I am going to read a part of a letter here from Gen. Sadler, adjutant general of New Jersey. I am going to omit parts of it, because the letter was written in a hurry, I think, and some parts of it he might prefer to have omitted; but a part of the letter refers to this very question of horses. We all know how difficult it is to get good horses and inspect them in an emergency. I do not believe that the Senator from Oregon or any other member of the committee will state on the floor that the necessary horses have been yet furnished after a month from the President's call by the officers of the United States to the National Guard called into the service of the United States. We have been over a month, and all the horses have not been furnished yet.

Mr. President, the forces are on the Rio Grande. They may come back or they may go forward. The Senator proposes to cut down the provision for horses. It is a part and parcel of the great system of unpreparedness, of failure to provide for reasonable contingencies.

I am going to call attention to a part of Gen. W. F. Sadler's letter of recent date. The general says:

We have always been given to understand that there was stored in the Schuylkill Arsenal enough material to equip our troops if suddenly raised from peace to war strength. The order for mobilization reached us on Monday morning, June 19, at 10 o'clock. On Tuesday, June 20, no material from the arsenal had arrived, and upon inquiry we were advised that the Government had no more blankets and was out of a number of other articles.

We asked to be allowed to purchase blankets, and Maj. Rolfe, who was then in charge of the arsenal, told us to buy 5,000. As soon as he did so, I called in the equipment from our Second and Third Regiments, who were not included in the call, and had it sent to our camp grounds by motor trucks, so that it would arrive in time to take care of the large number of recruits that accompanied the regiments when they reached Sea Girt.

I then wrote Senator MARTINE, telling him of the fearful fall-down of the Army, which letter, I understand, he read in the Senate. This brought immediate action, and we were wired that blankets would be sent at once by express. When they arrived they proved to be blankets that had been purchased in Philadelphia at a moment's notice, were cotton, and of the $2 variety. We received about 2,500 of them, although we were entitled to about 7,000, and we have not gotten any others up to this time.

When we asked that underwear, shoes, socks, tentage, etc., be sent by express, we were informed that this could not be done without an order from the War Department, for the reason that regulations said that everything must be sent by freight. We offered to pay the difference, but were told that we would have to have an order, which would take two days, so we asked to have the equipment shipped by fast freight.

* * * * * * *

On Sunday night, June 25, Gen. Wood called me on the phone and told me that it was absolutely necessary to have a regiment of Infantry, two batteries of Field Artillery, two troops of Cavalry, a field hospital and an ambulance company sent to the border at once, and asked whether I could get them off the next day. I replied that the notice was very short, but that I would do so if he would have the horses inspected.

I at once got the railroad people busy, got the trains placed, my supplies delivered, my kitchen cars equipped, and everything was ready to move by 2 o'clock Monday afternoon except the horses.

It is proper to say in a previous place this adjutant general of New Jersey had had the forethought to accumulate these horses on some kind of an option, for which he took the responsibility himself:

An examining board arrived Monday morning about 9 o'clock, composed of Capt. Bettison, a coast artilleryman, who headed the board; Capt. Miller, a splendid officer from the remount station; and three veterinarians. Up until noon they only passed 127 horses, and I finally went on the warpath and got an arrangement made to hurry the inspection. The slow examination and branding of the horses made it impossible for us to get our first organization off until 11 o'clock at night, and the balance of the troops called for until morning, all of whom loaded on one of the nastiest nights I have ever seen. The fog was so dense that it was almost impossible to see more than 40 or 50 feet, but in spite of all difficulties we got away in good shape.

Every section that went out of Sea Girt had a kitchen car and we are able to serve from two to three hot meals a day to all of our boys. Many of the troops had to leave here in day coaches, but they were supplied with tourist sleepers and regular sleepers at various points along the road.

Mr. President, there is the experience with reference to this very question of horses and of blankets of an adjutant general of a State who was telephoned to personally by the commanding general of the Eastern Department and appealed to in the exigencies of the National Government, and but for his precaution in having assembled a lot of horses, there would not have been any horses in sight for the Government inspectors to inspect.

Now, the committee comes along with this same idea of not providing in advance that has been prevailing here all along. With these troops on the border, who are not yet equipped fully, and may need many more horses, it is proposed to cut down this possible appropriation for horses.

Mr. President, as I said before, this is an objectionable lack of preparedness and a lack of foresight for possible contingencies, and I certainly trust this appropriation for horses will not be reduced.

Mr. CHAMBERLAIN. Mr. President, merely for the purpose of having it go into the RECORD, in answer to the Senator from Maryland I desire to say that the War Department has made the report to the Military Affairs Committee that $2,500,000 is amply sufficient for the purposes of that section. The estimate is as follows:

For the Regular Army for one year, replacing shortages and wastages, $1,500,000.

To meet the requirements of the National Guard called into the service of the United States to December 31, 1916, $1,000,000.

Making a total of $2,500,000 required.

Permitting a reduction of $1,300,000 in the amount reported.

So I do not know why the Senator from Maryland insists on making these appropriations larger than the War Department estimates.

Then, too, probably the Senator is not aware of the fact that in the urgent deficiency appropriation bill approved March 31, 1916, there was appropriated for horses for cavalry, artillery, engineers, and so forth, $1,529,000. So that, taking that amount and the $2,500,000 as provided for here, there is amply sufficient to meet all the requirements of the Regular Army or of the National Guard.

Mr. WARREN. Mr. President, horses are very necessary; but if we appropriate a sum much larger than can be used, of course that would be useless. On the other hand, the money will not be expended, it is true, unless we can purchase the horses.

I want, however, to indulge in some congratulations for the chairman of this committee, because he is in a position in which I do not recall that a Senator in charge of an appropriation bill has ever before been placed in this body; that is to say, where Senators insist that there shall be more money appropriated than the committee as a whole and the chairman representing it or than the department desire to have appropriated. It may be all right; but, as I say, I am glad to have the chairman of the committee in that position, so that he may go out before the country as having proposed a great economy, which he is not able to carry out, rather than having to explain why he has added so much to the House measure.

Heretofore, for instance, in the matter of extra blankets and clothing there has been a shortage. The War Department has asked for extra supplies of clothing and blankets every year, I think, without exception. The Senate committee has inserted from time to time certain amounts for those extras, but has seldom been able to maintain them and to get them through a conference owing to differences with another House.

As to this particular question of the horses, I feel that the Senator from Maryland may be assured that the amount which we here propose to appropriate, in addition to the amounts which have heretofore been appropriated in two deficiency appropriation bills, will be all that we shall be able to expend until Congress again meets. In purchasing horses, no matter how many we may need, there is much work required to obtain and mobilize a large number, scattered, as they are, all over the country. I believe that the appropriation is sufficient to cover everything we shall need; and when we meet in December I shall, of course, expect almost the first thing will be to provide for the contingencies which may arise in the meantime; that, if our troops are ordered across the border, we shall be met with deficiencies in a large amount, and that we shall proceed to take care of them.

Mr. LEE of Maryland. Mr. President, at the time the War Department made its estimate and the committee made its report the call of the President had been issued. These troops were ordered to go to the southern boundary of this country, and they prepared themselves for all possible contingencies. I presume that the committee and the War Department were calm and deliberate and cool, and that they acted upon the facts as they were then before them.

The troops have got there and are facing physically the contingencies of the border. I do not see that the contingency of going over has disappeared; and I think the committee ought to legislate for the possible contingency and not as though the contingency could not occur. They know how hard it is to get good horses, to have them inspected, to have them properly broken for the use of the military; and there is not a dollar of these appropriations, if the committee provides for these contingencies, which will be spent unless the contingency arises.

Mr. CHAMBERLAIN. May I interrupt the Senator from Maryland?

Mr. LEE of Maryland. Certainly.

Mr. CHAMBERLAIN. Does the Senator from Maryland know that the distinguished chairman of the Committee on Military Affairs in the House of Representatives had that amount increased to $3,800,000, but was candid enough to come back on the floor of the House and say that that was more than was needed? Now, we have put into the bill just what the War Department says it does need—$2,500,000; so that the Senator from Maryland is insisting on more than Mr. HAY claims is necessary and more than the War Department claims is necessary for any contingency.

Mr. LEE of Maryland. But is not this the original amount as the War Department estimated it?

Mr. CHAMBERLAIN. Yes; but Mr. HAY came in and said it was too much, and the War Department itself admits that it is too much, and that they only want $2,500,000. I can not understand why the Senator from Maryland wants to incorporate $3,000,000 when really nobody wants it.

Mr. LEE of Maryland. Well, simply for the purpose of providing for contingencies of the trouble that our troops apparently face. I can not agree with the attitude of mind of the Senator and of the committee, who have apparently refused to contemplate the contingency that is just across the river from 100,000 American troops, and go back to the old system of not making the preparations for contingencies in advance, which has been the cause of all the military mishaps and miseries of the United States.

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, on page 46, line 13, before the word "repairing," to insert "constructing and," and on page 47, line 5, after the word "tent," to strike out "$2,750,000" and insert "and for the National Guard when called or drafted into the service of the United States, $5,176,268: *Provided*, That the Secretary of War be, and he is hereby, authorized and directed to acquire, by

purchase or condemnation, such additional land at Fort Sam Houston, Tex., as may be suitable for adequate supply depots and terminal facilities for Fort Sam Houston and the southern department, considering present and future needs; and he is further authorized and directed to commence at the earliest practicable date the construction at Fort Sam Houston, Tex., of suitable buildings, storehouses, shops, yards, and all necessary appliances and appurtenances for the establishment of supply depots of the Quartermaster Corps, the Medical Department, the Corps of Engineers, and the Signal Corps, together with all facilities and utilities necessary for the operations of said depots, including such switch tracks, sidings, loading, and entraining platforms, and devices as may be necessary, said switch tracks and sidings to be connected, under such regulations as the Secretary of War may prescribe, with such main lines of railroads as are available and with which arrangement for such connections can be satisfactorily effected, equal opportunities to make such arrangements to be extended to all competing railroads; and for the purposes of this proviso the sum of $750,000 is hereby appropriated and authorized to be expended, out of any moneys in the Treasury not otherwise appropriated, under the direction of the Secretary of War," so as to read:

Barracks and quarters: For barracks, quarters, stables, storehouses, magazines, administration and office buildings, sheds, shops, and other buildings necessary for the shelter of troops, public animals, and stores, and for administration purposes, except those pertaining to the Coast Artillery; for constructing and repairing public buildings at military posts; for hire of employees; for rental of the authorized allowance of quarters for officers and acting dental surgeons on duty with the troops at posts and stations where no public quarters are available; of barracks or authorized allowance of quarters for noncommissioned officers and enlisted men on duty where public quarters are not available; of grounds for cantonments, camp sites, and other military purposes, and of buildings or portions of buildings for occupation by troops, for use as stables, storehouses, and offices, and for other military purposes; for the hire of recruiting stations and lodgings for recruits; for such furniture for the public rooms of officers' messes and for officers' quarters at military posts as may be approved by the Secretary of War; for wall lockers in permanent barracks, and refrigerators in barracks and quarters; for screen doors, window screens, storm doors and sash, and window shades for barracks, offices, and quarters, and for flooring and framing for tents, and for the National Guard when called or drafted into the service of the United States, $5,176,268: *Provided*, That the Secretary of War be, and he is hereby, authorized and directed to acquire, by purchase or condemnation, such additional land at Fort Sam Houston, Tex., as may be suitable for adequate supply depots and terminal facilities for Fort Sam Houston and the Southern Department, considering present and future needs; and he is further authorized and directed to commence at the earlist practicable date the construction at Fort Sam Houston, Tex., of suitable buildings, storehouses, shops, yards, and all necessary appliances and appurtenances for the establishment of supply depots of the Quartermaster Corps, the Medical Department, the Corps of Engineers, and the Signal Corps, together with all facilities and utilities necessary for the operations of said depots, including such switch tracks, sidings, loading, and entraining platforms, and devices as may be necessary, said switch tracks and sidings to be connected, under such regulations as the Secretary of War may prescribe, with such main lines of railroads as are available and with which arrangement for such connections can be satisfactorily effected, equal opportunities to make such arrangements to be extended to all competing railroads; and for the purposes of this proviso the sum of $750,000 is hereby appropriated and authorized to be expended, out of any moneys in the Treasury not otherwise appropriated, under the direction of the Secretary of War.

Mr. CHAMBERLAIN. I desire to change the amendment of the committee to $3,896,000, instead of $5,176,268, in conformity with the supplemental estimates made by the War Department.

The PRESIDING OFFICER. The amendment to the amendment proposed by the Senator from Oregon will be stated.

The SECRETARY. On page 47, line 7, it is proposed to strike out "$5,176,296" and to insert "$3,896,000."

Mr. LEE of Maryland. Mr. President, I make the same general line of objection to the reduction of this available fund as I have made heretofore as to other amendments. Particularly do I make this objection here on the ground of sanitary reasons. When our troops in the old Mexican War went into Mexico they were up against a fighting people, but they lost six men from disease for one man who was lost by death on the battle field or from the effect of wounds received in action. Whatever you may say of the present condition of the Mexican people for military purposes—and I am inclined to think they are better equipped from a military standpoint, relatively speaking, than they then were—the climate is about the same; the danger of disease, so far as the climate is concerned, is just about the same as it was in the days of Gen. Scott, and though medical science has progressed enormously and preventive measures can be taken to reduce the military death rate, such as were alluded to by the Senator from New York [Mr. WADSWORTH], who referred to the typhoid-serum treatment which has been administered to most of our troops, yet the precautionary measures for which provision is made in the amount here appropriated apply to the sanitary and physical safety of the men, and I object to its reduction in view of the possible contingency of our troops passing over the Rio Grande.

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. CHAMBERLAIN. Mr. President, in this connection, and before we get too far from it, I desire to call the attention of the Senator from Maryland to another appropriation to which I intended to call his attention but forgot to do so. In the urgent deficiency appropriation bill of July 1, 1916, $8,025,965 were appropriated for horses, in addition to the other two large items which I have already mentioned. So there is absolutely no use, in any view of the matter, to increase the appropriation that was reduced a while ago.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, on page 48, line 7, before the word "That," to strike out "*Provided*" and insert "*Provided further*," so as to make the clause read:

Provided further, That no part of the moneys so appropriated shall be paid for commutation of fuel or quarters to officers or enlisted men: *And provided further*, That the number of and total sum paid for civilian employees in the Quartermaster Corps shall be limited to the actual requirements of the service, and that no employee therein shall receive a salary of more than $150 per month, except upon the approval of the Secretary of War.

The amendment was agreed to.

The next amendment was, on page 48, after line 14, to insert:

Provided further, That the Dowsett Co. (Ltd.), a corporation of the Territory of Hawaii, assignee of the 30-year leasehold interest granted to Harvey E. Whitney, by lease dated January 14, 1882, in lands now comprised within the military reservation of Schofield Barracks, in the Territory of Hawaii, and its sublessees, be, and they are hereby, given permission to remove, within such time after the passage of this act as the Secretary of War may designate, all buildings erected by them, respectively, on said lands during the form of the said original lease to Harvey E. Whitney, but not including fences or other improvements: *Provided further*, That in the event of their failure to remove the same within such time as the Secretary of War may designate, said buildings shall become the property of the United States as provided in said original lease.

The amendment was agreed to.

The next amendment was, on page 49, line 19, after the word "stations," to strike out "$660,534" and insert "and for the National Guard when called or drafted into the service of the United States, $860,534," so as to make the clause read:

Roads, walks, wharves, and drainage: For the construction and repair by the Quartermaster Corps of roads, walks, and wharves; for the pay of employees; for the disposal of drainage; for dredging channels; and for care and improvement of grounds at military posts and stations, and for the National Guard when called or drafted into the service of the United States, $860,534.

The amendment was agreed to.

The next amendment was, on page 50, line 15, after the word "purposes," to strike out "$400,000" and insert "$440,000," so as to make the clause read:

Barracks and quarters, Philippine Islands: Continuing the work of providing for the proper shelter and protection of officers and enlisted men of the Army of the United States lawfully on duty in the Philippine Islands, including repairs and payment of rents, the acquisition of title to building sites, and such additions to existing military reservations as may be necessary, and including also shelter for the animals and supplies, and all other buildings necessary for post administration purposes, $440,000.

Mr. CHAMBERLAIN. Mr. President, in reference to that item in a supplemental estimate made by the department they have asked, and have given good reasons for the request, that that appropriation be increased by $350,000. I will submit the matter to the Senate as it comes to me from the War Department.

The PRESIDING OFFICER. Does the Senator offer an amendment to increase the amount?

Mr. CHAMBERLAIN. Yes; I move to increase the amount from $440,000 to $790,000.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 50, line 15, after the word "purposes," it is proposed to amend the committee amendment by striking out "$440,000" and inserting "$790,000."

Mr. CHAMBERLAIN. The Secretary of War, under date of July 7, writes me as follows:

WAR DEPARTMENT,
Washington, July 7, 1916.

Hon. GEORGE E. CHAMBERLAIN,
Chairman Committee on Military Affairs, United States Senate.

MY DEAR SIR: The estimates submitted to Congress by the War Department for the fiscal year 1917 under the appropriation "Barracks and quarters" contemplated providing accommodations in the United States for the new organizations recently authorized in the act for making further and more effectual provision for the national defense, and for other purposes (Public, No. 85, 64th Cong., H. R. 12766).

In a plan of organization recently approved by the War Department, however, it is contemplated to organize one of the new regiments of Infantry in the Philippine Islands.

As the cost of providing accommodations for this regiment will be a proper charge against the appropriation "Barracks and quarters, Philippine Islands," it is recommended that the sum of $350,000 required for this purpose be added to that appropriation, and the appropriation "Barracks and quarters" reduced accordingly.

Very respectfully,

NEWTON D. BAKER,
Secretary of War.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Oregon to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, on page 50, after line 22, to insert:

The Secretary of War is hereby authorized and directed to cause to be made such surveys as may be necessary for locating, constructing, improving, and maintaining a system of roads or highways for the better defense of the island of Oahu, Territory of Hawaii, and the sum of $10,000 is hereby appropriated for this purpose.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. LEE of Maryland. I desire to offer an amendment to that amendment.

The PRESIDING OFFICER. The Chair will withdraw the statement that the amendment was agreed to, without objection, and the amendment is now before the Senate.

Mr. CHAMBERLAIN. I should like to have the committee amendments disposed of first, I will say to the Senator.

Mr. LEE of Maryland. Will they be open to amendment later?

Mr. CHAMBERLAIN. Yes.

Mr. LEE of Maryland. I will be delighted, then, to accommodate the Senator.

Mr. CHAMBERLAIN. I move, after the word "purpose," to insert a comma instead of a period and the words "to remain available until expended."

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. After the word "purpose," in line 3, it is proposed to strike out the period and insert a comma and the words "to remain available until expended."

The amendment to the amendment was agreed to.

Mr. LEE of Maryland. Mr. President, I was under the impression that amendments to committee amendments would be in order at this time.

The PRESIDING OFFICER. Amendments are now in order to the amendments of the committee.

Mr. LEE of Maryland. I do not wish to obstruct the course of the Senate, but I was under the impression that amendments to committee amendments must be made when the committee amendment is being considered or else the amendment must be passed, or, if agreed to, a vote to reconsider must be entered. I simply wish to insert, after the words "for the better defense of the island of Oahu, Territory of Hawaii," the words "and of the United States."

Mr. President, for some time past I have thought it very essential that there should be some consideration by military authority of the question of military roads in the United States. I am inclined to believe that perhaps a great deal of the friction along the Mexican border could have been avoided if in your State, Mr. President [Mr. SHEPPARD in the chair], and in the other States facing the country of Mexico there had been provided some military roads, so that patrols by armored automobile or by other means of rapid transportation could have been established for the protection of that frontier.

I do not believe there is any part of our country that would be more benefited by such a system of roads than your State, Mr. President, and the other States facing Mexico. So I think it would be appropriate to include the United States in the beneficent and wise provision that it is proposed to confine to the island of Oahu, in the Territory of Hawaii.

Mr. BRYAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Florida?

Mr. LEE of Maryland. Yes.

Mr. BRYAN. Does the Senator propose to increase the amount of the appropriation?

Mr. LEE of Maryland. I am inclined to think, Mr. President, that the investigation can go on without any increase of the appropriation. All I want is to give a little broader scope to the action of the military authorities on this subject.

The PRESIDING OFFICER. The amendment offered by the Senator from Maryland to the amendment reported by the committee will be stated.

The SECRETARY. In the amendment of the committee, on page 51, line 2, after the words "Territory of Hawaii," it is proposed to insert the words "and of the United States."

Mr. WARREN. Mr. President, I will say to the Senator that this amendment relates to one of the Territories of the United States and does not take in the United States proper. So I think, if the Senator wishes to have it apply to the United States, he should offer his amendment as a different section. Of course, his motion is entirely out of order here.

Mr. LEE of Maryland. The motion is out of order?

Mr. WARREN. Yes; because it increases an appropriation without an estimate being made, and it has not been reported by any committee.

Mr. LEE of Maryland. I imagine this is altogether new legislation.

Mr. WARREN. Not in this case.

Mr. LEE of Maryland. It would all be subject to a point of order.

Mr. WARREN. This provision is not subject to a point of order, while the Senator's is.

Mr. LEE of Maryland. Is not this new legislation?

Mr. WARREN. It is not legislation. It is an appropriation.

Mr. LEE of Maryland. But it is accompanied with legislation providing for the expenditure of the appropriation.

Mr. WARREN. It is an appropriation to expend money on the property of the United States in a Territory.

Mr. LEE of Maryland. But there is no general provision of law for this expenditure. The Senator relies on new law to create this expenditure and to direct this expenditure.

Mr. WARREN. So far as that is concerned, the Senator knows as well as I——

Mr. LEE of Maryland. I do not want to make a point of order against this provision, but I do not want the Senator to make it on mine, either.

Mr. WARREN. I say the Senator is out of order on that proposition. I am not going to make a point of order, but I suggested to him to put the requisite amount he wants for the United States separate from this in the Territory. I think it would be a much better way to reach it. Of course the Senator knows that $10,000 amounts to nothing to undertake to survey the United States for roads.

Mr. LEE of Maryland. It would not be necessary to make surveys for the United States. There are maps already existing which would be presented to the United States by the road departments of the various States of this country, and they must have military maps of the border of the Senator's State. There is no difficulty about this question.

Mr. WARREN. But this appropriation applies solely and only to surveys; that is all.

Mr. LEE of Maryland. I think it goes a little wider than that. It says:

Such surveys as may be necessary for locating, constructing, improving, and maintaining a system of roads—

The Senator is right about that.

Mr. CHAMBERLAIN. Mr. President, may I interrupt the Senator?

Mr. LEE of Maryland. Certainly.

Mr. CHAMBERLAIN. The purpose of this was to survey a line of road around this particular portion of the island of Oahu as a governmental necessity, as a matter of defense over there, for the mobilization of troops when they become necessary; and that is all that it was intended to do. There was an effort made on the part of the department to have a large appropriation made for the purpose, and the committee did not see fit to report it until they had more definite data and information on the whole subject.

Mr. BRADY. This appropriation was made for the specific purpose of surveying certain roads in the Hawaiian Territory.

Mr. CHAMBERLAIN. And having maps made.

Mr. BRADY. It seems to me it would be entirely improper to try to cover the United States also.

Mr. LEE of Maryland. I hope none of the Senators will consider for a moment that I do not think this is a very wise provision. I think it is preeminently a wise provision, and in view of the situation of these islands it is especally called for there; but I really think it is so wise that it ought to be extended to continental United States.

Mr. BRADY. But we could not do anything worth while with $10,000, and we can not increase the amount of the appropriation. I am just as much in favor of improving the roads in the United States as the Senator from Maryland can possibly be, and would be glad to do anything to encourage their improvement; but at the same time this particular amendment was put

in for the specific purpose of making certain surveys that the committee felt were needed in the Hawaiian Islands.

Mr. LEE of Maryland. In order not to jeopardize this amendment, which I think is a very excellent one, I withdraw my amendment.

The PRESIDING OFFICER. The Senator from Maryland having withdrawn his amendment, the question is on the amendment as amended.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment was, on page 51, after line 3, to insert:

The following-described tract of land on the island of Oahu, Hawaii, known as the Puuloa Military Reservation, is hereby transferred to and placed under the control and jurisdiction of the Navy Department for use for naval purposes: Beginning at a concrete monument on the beach on the west side of the entrance to Pearl Harbor situated about 90 feet south of the small pier and 122.5 feet from the southeast corner of storehouse (from which said concrete monument Salt Lake triangulation station bears by true azimuth 238° 22′ and the spire of Puuloa Church 247° 2′) the boundary runs by true bearings as follows: Southwesterly along the shore at high-water mark to a similar concrete monument on the ocean beach; thence north 14° 20′ west 1,150 feet to a concrete monument; north 62° 10′ east 7,945 feet to the point of beginning; containing 322.33 acres, more or less.

The amendment was agreed to.

The next amendment was, on page 52, line 10, after the word "cantonments," to strike out "$409,963" and insert "and for the National Guard when called or drafted into the service of the United States, $509,963," so as to make the clause read:

Construction and repair of hospitals: For construction and repair of hospitals at military posts already established and occupied, including the extra-duty pay of enlisted men employed on the same, and including also all expenditures for construction and repairs required at the Army and Navy Hospital at Hot Springs, Ark., and for the construction and repair of general hospitals and expenses incident thereto, and for additions needed to meet the requirements of increased garrisons, and for temporary hospitals in standing camps and cantonments, and for the National Guard when called or drafted into the service of the United States, $509,963.

The amendment was agreed to.

Mr. CHAMBERLAIN. Mr. President, I desire to ask to have the amendment on page 50, between lines 23 and 25, and on page 51, lines 1, 2, and 3, transferred to page 65 and inserted immediately after line 13.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 65, after line 13, it is proposed to transpose the words in italics beginning on page 50, line 3, and extending down to and including line 3, on page 51, as amended.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The reading of the bill was resumed.

The next amendment was, at the top of page 53, to insert:

Target range, Vancouver Barracks, Wash.: For the acquisition of approximately 504 acres of land situated near the city of Vancouver, Wash., to provide suitable target ranges for each arm of the military service stationed at Vancouver Barracks, Wash., and for the construction thereon of suitable target butts, range buildings, water supply, etc., $100,000.

The amendment was agreed to.

The next amendment was, on page 53, after line 7, to insert:

For the acquisition of private holdings now embraced in the Fort Bliss target range, situated in Dona Ana County, N. Mex., by condemnation or by purchase, $7,120.

The amendment was agreed to.

The next amendment was, on page 53, after line 10, to insert:

For sinking additional wells to augment the present insufficient water supply and for the construction of new ranges, $28,000.

The amendment was agreed to.

Mr. CHAMBERLAIN. The department has asked that the item on page 53, line 24, "Field medical supply depot, $5,567.10," should be increased to $7,967.10. The increase is small, and if the Senate desires to have the reasons for it I will read the estimate of the department on the subject.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 53, line 24, in the item "Field medical supply depot," it is proposed to strike out "$5,567.10" and insert in lieu thereof "$7,967.10."

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. CHAMBERLAIN. Now, on page 54, in line 4, I desire to strike out the words "Five floors," and have it read, with a capital "F," "For Army Medical School."

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On line 4, page 54, it is proposed to strike out "Five floors" and begin the word "for" with a capital "F."

The amendment was agreed to.

Mr. CHAMBERLAIN. In the next line I ask to strike out the words "Six rooms" and start the next word with a capital "F."

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On line 5, page 54, it is proposed to strike out the words "Six rooms," and to begin the word "for" with a capital "F."

The amendment was agreed to.

Mr. FLETCHER. Mr. President, I ask to go back to page 49 and offer an amendment from the committee, based on a report from the Secretary of War. I send the amendment to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. After line 4, on page 49, it is proposed to insert the following words:

For repairs to buildings, wharves, roads, and replacement of boats at Forts Barrancas, McRee, and Pickens, Fla., and Fort Morgan, Ala., damaged by the hurricane of July 5, 1916, $50,000.

Mr. WADSWORTH. Mr. President, does the Senator desire to address the Senate on that amendment?

Mr. FLETCHER. No; I simply submit a letter from the Secretary of War on the subject. It is an amendment that grows out of the recent damage, done by reason of storms, that should be repaired.

Mr. WADSWORTH. Will the letter be read?

The VICE PRESIDENT. Not if the Senator from New York desires to speak on the amendment.

Mr. WADSWORTH. I was going to ask a question; but the Senator from Florida has sent to the desk a letter from the Secretary of War, and I was waiting to hear it. If it is read, perhaps that will answer the question.

Mr. FLETCHER. I think so.

The VICE PRESIDENT. The Secretary will read the letter.

The Secretary read as follows:

WAR DEPARTMENT,
Washington, July 21, 1916.

Hon. D. U. FLETCHER,
United States Senate.

MY DEAR SENATOR: In reply to your letter of the 19th instant regarding an amendment to the Army appropriation bill to cover damage done at Forts Barrancas, McRee, and Pickens, Fla., by the recent storm, I would suggest the following general amendment to cover urgent repairs to structures and boats occasioned by the recent hurricane at both Pensacola and Mobile:

AMENDMENT.

For repairs to buildings, wharves, roads, and replacement of boats at Forts Barrancas, McRee, and Pickens, Fla., and Fort Morgan, Ala., damaged by the hurricane of July 5, 1916, $50,000.

Very respectfully,

NEWTON D. BAKER,
Secretary of War.

Mr. CHAMBERLAIN. Mr. President, let me add to that that I have received a letter from the Secretary of War, under date of the 21st instant, in which he incloses a copy of his letter to the Senator from Florida, and says:

I recommend favorable consideration of the proposed amendment as the repairs are of an urgent character.

I ask to have this letter put in the RECORD.

The VICE PRESIDENT. Without objection, that may be done.

The letter is as follows:

WAR DEPARTMENT,
Washington, July 21, 1916.

Hon. GEORGE E. CHAMBERLAIN,
United States Senate.

MY DEAR SENATOR: I am inclosing herewith a letter to Senator FLETCHER regarding an amendment to the Army appropriation bill for money to repair damage caused by recent storm of July 5 at Mobile, Ala., and Pensacola, Fla. This is an unforeseen contingency and for which, of course, no provision could be made in the regular estimates.

I recommend favorable consideration of the proposed amendment as the repairs are of an urgent character.

Very respectfully,

NEWTON D. BAKER,
Secretary of War.

Mr. WADSWORTH. I was merely going to ask if these forts are now occupied, or ordinarily occupied, by troops?

Mr. FLETCHER. Yes. There is a garrison there all the while.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. CHAMBERLAIN. I move that not later than 5 o'clock the Senate take a recess until Monday morning at 10 o'clock.

The motion was agreed to.

The reading of the bill was resumed.

The next amendment was, on page 54, line 10, after the side heading "Claims for damages to and loss of private property," to strike out "For payment of claims for damages to and loss of private property" and insert "For payment of claims for damages to and loss of private property incident to the training, practice, and operations of the Army that have accrued, or may hereafter accrue, from time to time, to be immediately available and to remain available until expended: *Provided*, That settlement of such claims shall be made by the Auditor for

the War Department, upon the approval and recommendation of the Secretary of War, where the amount of damages has been ascertained by the War Department, and payment thereof will be accepted by the owners of the property in full satisfaction of such damages, $5,000."

The amendment was agreed to.

The next amendment was, on page 54, after line 22, to insert:

Credit in the accounts of Maj. James Canby, United States Army: The accounting officers of the Treasury are hereby authorized and directed to allow and credit in the accounts of Maj. James Canby the sum of $80, disallowed on voucher 920 B of his money accounts for the month of November, 1913, and now standing against him on the books of the Treasury.

Mr. BRYAN. Mr. President, I should like to ask the chairman something as to the nature of these claims. I notice there are a dozen or more amendments which appear to be merely private claims. I should like to know why the claims were disallowed in the first place, and why it is necessary to have legislation in order to have them paid.

Mr. CHAMBERLAIN. Mr. President, these matters have come up before the Military Affairs Committee nearly every year since I have been a member of the committee. They passed the Senate at the last session, but the House disagreed, and they went out in the conference. If the Senator will look at page 692 of the House hearings, he will find the whole situation discussed; and rather than to take up the time of the Senate to explain them now, if the Senator will look into the matter, I request that it go over until Monday.

Mr. BRYAN. The only thing I want to know is why it was necessary to come here to have the claims allowed, and why they disallowed the claims in the first place. Were they expenditures that these officers had no right to make?

Mr. CHAMBERLAIN. They were disallowed by the accounting officers usually for some irregularity in the form of the voucher.

Mr. BRYAN. Was the expenditure for unauthorized purposes?

Mr. CHAMBERLAIN. Not usually for unauthorized purposes, but they are cases where the vouchers——

Mr. BRYAN. Were any of them unauthorized expenditures?

Mr. CHAMBERLAIN. I do not recall now. I have been over them carefully a number of times, but I do not differentiate between these different claims at this time. Let me say to the Senator that there are a great many others that we were appealed to to insert in this bill, and we disallowed all of them except those which appeared to be measurably in the nature of allowances to correct the books.

Mr. BRYAN. I do not care to be technical about it at all. They aggregate between eight and ten thousand dollars. One of the amounts is as large as $4,500, one is $1,100, and one is $1,500. It does seem to me that in those three instances at least the officers, if they were entitled to payment of these claims, and payment was refused, would have gone into the Court of Claims, as they had a right to do, and asserted their rights. Why should they wait from year to year and come in here on the military appropriation bill and have these items inserted, and disagreed to in conference, and eliminated from the bill in conference? I am seeking information about it.

Mr. CHAMBERLAIN. And I want to give it to the Senator. Let me call his attention to a characteristic one of them, for instance. Take the Stone claim, near the top of page 55.

Mr. BRYAN. I see it.

Mr. CHAMBERLAIN. The sum provided for him, $1,191—

represents the expenditure by Capt. Stone on voucher 6-B, December, 1911, on four officers' quarters buildings, for furnishing and installing wattmeters and electric-light fixtures. The total cost of constructing each of four buildings at Fort Sill, Okla., including lighting and plumbing, wiring and fixtures, and electric meters and fixtures being in excess of the amount allowed by law.

It is not regarded that Capt. Stone was at fault in the case. At the time in question a large number of buildings for use as officers' quarters were erected at Fort Sill, and when the Quartermaster General recommended to the Secretary of War that authority be granted for their construction it was his opinion that the limitation fixed by Congress did not apply to construction other than those payable from the appropriations "Military posts" and "Barracks and quarters, seacoast defenses."

Then they are described.

Mr. BRYAN. If that is a fair sample of the others, they ought not to be in this bill. There is an officer who went and spent money that he had no authority of Congress to spend.

Mr. CHAMBERLAIN. It was done, however, practically under the direction of the Secretary of War.

Mr. BRYAN. Yes; but the Secretary of War has not any right to order him to spend money that has not been appropriated for the purpose.

Mr. LODGE. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Massachusetts?

Mr. BRYAN. Certainly.

Mr. LODGE. These adjustments of the accounts of officers never have been treated as claims. They have always been dealt with in the Army and Navy bills. We deal with several in this bill. We do in every bill, as far as my recollection goes. For instance, we had a case of a paymaster in the Navy whose safe was robbed, through no fault of his.

Mr. BRYAN. Yes; but that is a very different case.

Mr. LODGE. And that is not treated as an ordinary claim.

Mr. BRYAN. No; certainly not.

Mr. LODGE. It is an adjustment of accounts. I do not know the merits of these provisions in this bill, for I have not examined them.

Mr. BRYAN. That is a very different case from this. That is the reason why I am inquiring about these amendments.

Mr. LODGE. It has been customary to put those matters, affecting the accounts of officers in both services, in these bills. I think the Senator from Wyoming [Mr. WARREN] will corroborate me in that statement.

Mr. BRYAN. If the officers have exceeded their authority, they ought to be remitted with their claims to Congress or to the Court of Claims. I do not see on what theory some of them are included and some are left out. They have been in the bill before, as the chairman of the committee says, and they have gone out. There are a great many of them. If they are all equitable claims, it is not possible for the committee to investigate their merits. I will ask the Senator from Wyoming if these were recommended by the department?

Mr. WARREN. If the Senator will allow me, he is absolutely right, of course, in inquiring into these claims in his position as chairman of the Committee on Claims. I was chairman of that committee for many years and I have served on this committee, where these similar bills have come up, for many years, and also upon the Committee on Appropriations, where we have the deficiency bills, upon which such claims are often offered. These are items that are approved by the War Department and are estimated for through the Treasury Department. For some reason they are often sent up recommended for the deficiency bills, but, of course, the managers of the deficiency bills always claim that they do not belong there; that they should come before the Committee on Military Affairs. They are claims where there is a difference between the comptroller over some legal point, not that he objects to the payment, but he believes that strictly under the law he should not authorize the payment.

Mr. BRYAN. Here is an item of between $1,100 and $1,200. The officer had no right to incur that expenditure without authority of law.

Mr. WARREN. If the Senator does not wish me to answer him, I will not proceed.

Mr. BRYAN. I beg the Senator's pardon.

Mr. WARREN. The Senator has referred to one of these claims. When he says they have been on the bill and have been taken off, that is hardly accurate. Some of these had been put on and taken off because sometimes Members on the House side have not felt that they were sufficiently posted upon them and we have been compelled in conference to take them out. At other times they have gone in, but it is generally recognized by the House and by the Senate, and by those who have examined, and examined them as a lot, that this is the way to handle them. They are justly due.

For instance, a colonel may direct an officer under him. Of course he is going to obey the orders of his superior. Of course there is no way for the subordinate officer to collect from his colonel. Then the money is expended for the good of the service and would really be an expenditure which would have been made otherwise, only perhaps through a different channel. There is a board of survey appointed to examine all these matters, and all the facts, and those such as we have included here are certified by these officers to the department. Then the War Department, as I said, reports them to the Secretary of the Treasury and they make an estimate for them, and forward them to Congress.

They are different from the claims sent to the Committee on Claims in that they are practically audited claims. They are audited as far as they can be by the department and by every one except the comptroller.

Furthermore, it is not a payment of money as a general thing. It is a credit on the books to balance off an account charged against the officer until it can be properly adjusted.

Mr. BRYAN. Let me ask the Senator if any of these claims contemplate the appropriation of money instead of a credit on the books.

Mr. FLETCHER. I will tell my colleague that there is no appropriation made at all for any of these items except in the adjustment of the accounts. There is no money to be paid out.

Mr. SMOOT. But the officer would be compelled to pay the money into the Treasury unless he was relieved.

Mr. WARREN. It arose along three or four years ago simply by an injustice to an officer. I do not doubt but finally they must be paid, because they are all good claims.

Mr. FLETCHER. If my colleague will allow me, these matters have been presented to various committees, particularly to the House Committee on Claims. They would say, "We have no jurisdiction." The Committee on Appropriations would say, "This is an Army matter, and it ought to be presented in the Army bill." So these items have been shuffled back and forth for a long period of time.

In this very case, for instance, as the report will show—

In the deficiency act of March 4, 1913, Congress authorized credit in the accounts of Capt. Stone amounting to $13,046.33, disallowed against him for the same reason on account for June, 1911. The disallowance of $1,191 for which authority for credit is now asked had not been brought before this office at the time relief was asked for in the case of the $13,046.13, referred to.

Mr. BRYAN. What is the deficiency at this time?

Mr. FLETCHER. At one time an allowance of $13,000 was made, and if they had known about the disallowance of $1,191 it would have been included. I only mention that to show that there is no pretense even that the money was wrongfully or improperly spent, but it was disallowed in the voucher.

Mr. BRYAN. Let me ask my colleague or some member of the committee about the item on page 58 for Lieut. J. H. Barnard. Did he spend $4,555 without any authority of law, and is he now asking Congress to credit that much money to his account? What was that claim?

Mr. FLETCHER. That is a similar case for the adjustment of the account.

Mr. BRYAN. What did he do with the $4,555?

Mr. FLETCHER (reading)—

The Auditor for the War Department disallowed expenditures amounting to $4,555.06 made by Lieut. Barnard in connection with the "Student's Military Instruction Camp, at Ludington, Mich.," which action was affirmed by the Comptroller of the Treasury.

The camp at Ludington, Mich., was established in accordance with instructions from the War Department, and in conformity with Bulletin No. 1, War Department, Office of the Chief of Staff, Washington, D. C., March 25, 1914. Paragraphs 1 and 2 of this bulletin read as follows:

"1. In view of the great success of the two experimental military camps of instruction for students and educational institutions held during the summer of 1913 and the great benefit derived to all concerned therefrom, four such camps will be established during the coming summer, viz: One at Asheville, N. C., from July 6 to August 7, inclusive; one at Burlington, Vt., same dates; one at Ludington, Mich., same dates; and one at Monterey, Cal., from July 26 to July 31, inclusive.

"A fifth camp at Spokane, Wash., is under consideration, but has not yet been definitely decided upon.

"2. The object of the camps is to give the young men of the country opportunity for a short course in military training, the better to fit them to discharge their military duty should their country ever stand in need of their services. The summer vacation period is selected to enable students to attend with the least inconvenience and greatest instructional advantage."

Mr. BRYAN. He spent $4,555 at Ludington, Mich. What did he do with it?

Mr. FLETCHER. I will get to that in a minute:

Further information contained in the bulletin discloses that the camps referred to were to be maintained for a period of five weeks and were designed for the military instruction of students and graduates between the ages of 18 and 30, who were required to furnish their own transportation expenses to and from the camp, to furnish their own uniforms, and to pay a stipulated sum per week for subsistence, the Government to furnish camp equipment, rifles, ammunition, etc. The bulletin further provides, in this connection, as follows:

"(b) Proper cooking and baking facilities, wagon transportation needed, the necessary personnel for instruction, organization and maintenance of the camp, hospital and medical care and sanitation, and, in short, everything necessary to the health and tending to the comfort and advancement of the students which lawfully can be furnished by the War Department will be provided.

"(c) Such troops of the Regular Army as may be necessary, and which may be available for the purpose at the time of the camp, will attend and cooperate in the military instruction and in the different field maneuvers, exercises, and demonstrations."

The comptroller affirming the action of the Auditor for the War Department in disallowing these accounts stated:

"I find nothing in the several appropriations for the support of the Army from which the above expenditures were made which directly or indirectly authorizes the establishment of students' military instruction camps, and I know of no other law authorizing such establishment. The expenditures were made incident to the instruction camp, they were made necessary because of it, and it is fair to say, I think, that they would not have been made had it not been for the students' instruction camp

"Under the circumstances shown it seems to me the whole procedure lacks the authority or sanction of law, and such being the case I am not warranted in passing the vouchers to the credit of the disbursing officers."

The total amount disallowed against the accounts of Lieut. Barnard is $4,555.06, but as $4.50 of this amount is reported by the auditor as representing an overpayment due to an error in calculation, it is required that the amount of the relief estimate be reduced to $4,550.56.

Those were the expenditures in connection with these instructions and the auditor held that there was not any authority for them.

Mr. BRYAN. Exactly.

Mr. LODGE. The officer was ordered to do it by the department.

Mr. FLETCHER. He was ordered to do it by the department.

Mr. BRYAN. Let us see how this money was spent. Let us see what this Maj. Pettus spent. The amount is $1,545 under the bill. It appears that he had no authority, directly or indirectly, to do it. This bill proposes to credit his account.

Mr. WARREN. No; he did not say that there was no authority at all, but he had the authority of the department.

Mr. BRYAN. Surely, no one had a right to spend the Government money in such a manner as that. Neither the Secretary of War nor anybody under him has the right to make an appropriation from the Public Treasury for a military camp.

Mr. BRADY. Would the Senator expect a lieutenant colonel to disobey the order of his superior if he was instructed to pay out this money?

Mr. BRYAN. Perhaps not; but somebody must be responsible for an unauthorized expenditure of $4,500. I am not military man enough to know; but I know this much, that they were violating the law when they did it. Whether he or the department violated it is a different proposition. It may be that his account ought to be credited with the amount.

Mr. WARREN. Will the Senator yield for a moment?

Mr. BRYAN. Certainly.

Mr. WARREN. The student camps established in the last year or two were new features, and doubtless arranged for with some irregularities. But they have been recognized as being very useful, and in the present appropriation bill, under the law approved on the third of last month, we provide for all these camps, and we provide not only for such items as were paid for in such camps as this last year but we allow them clothing per diem and subsistence. So these expenditures were entirely in the line of what we all acknowledge is a great necessity or benefit and tends toward the kind of preparedness that we are striving for. The fact is, if the War Department exceeds the law and puts a lieutenant where he is charged up with more than his pay, which he, with perhaps a family to support, is unable to meet, early and complete relief should be afforded.

Mr. BRYAN. I do not suppose that a superior military officer would command an inferior officer to violate the law. It may be that he can, I do not know.

Now, let me ask the Senator from Wyoming, who is so well up on these expenditures, about the item on page 56—$1,545 disallowed to Maj. Pettus. What was that?

Mr. WARREN. The examination extended over so many accounts that I should have to take the record and hunt it up to refresh my memory. All that I can say to the Senator is that when they were examined by the committee they were examined very carefully, and they were sifted, and those that were absolutely all right were approved and included. Of course, if the Senator wishes to take up each one by itself and try them out, I call his attention to the report.

Mr. BRYAN. No, Mr. President; I have taken only the three largest ones. I have a purpose in what I am doing. I wish to have anyone on the committee tell me what the $1,545 item is for.

Mr. FLETCHER. I will say to my colleague, in this connection, page 695 of the report shows what those items were:

Of the amount named $645 was paid from the appropriation "Barracks and quarters, 1911," for services rendered and materials furnished in cutting and setting one granite tablet at the Army War College, Washington, D. C., under contract with Ernest C. Bairstow, dated June 29, 1911, and $900 was paid from the said appropriation to Jno. Williams (Inc.) for services rendered and materials furnished in supplying and setting 343 bronze letters and 54 commas, periods, and dashes in granite slab at the Army War College under contract dated June 29, 1911.

It seems that these items covered the amount spent and the amount mentioned in the bill, $1,645, was under a contract made by the department to have the work done.

Mr. BRYAN. Without authority of law.

Mr. FLETCHER. I take it the reason why they were disallowed was because technically he had not authority to do it, but the money was spent under a contract made by the department with people who furnished the slabs and the lettering.

Mr. CLAPP. Will the Senator from Florida pardon an interruption?

Mr. BRYAN. Certainly.

Mr. CLAPP. This brings the matter up in a form that I have long thought it should be presented to the Senate. It occurs, perhaps, even more in the Navy, in an informal as well as a formal way. A case has often come to me where officers have made payments under orders. I quite agree with the committee that this ought not to go to the Committee on Claims. It is a matter that should be handled by the Committee on Military

Affairs where they are officers in the Army, and it should be handled by the Committee on Naval Affairs where they are officers in the Navy; but I do believe that a law should be passed so that in dealing with these vouchers, instead of taking them out of the account of a subordinate officer, who was obliged either to violate an order or make the expenditure—that is often the case in the Navy especially—the law should direct the officer upon whom the duty of passing on the account is imposed to charge it up to the officer who is primarily responsible for having exceeded authority, and then let Congress deal with that.

When it gets in this shape it passes beyond a fair judgment of Congress. Take the Michigan case here. The officer made that expenditure under the direction of the Secretary of War. Where he had made an expenditure under an order, when failing to make it perhaps would have put him in the attitude of disobedience, to compel that subordinate, who might have been court-martialed, to go into the Court of Claims to get justice would be manifestly unfair.

I have felt for a good while that there ought to be a law under which, in cases of this kind, the officer dealing with the accounts and finally passing upon them should have it charged to the account of the officer who primarily is responsible. Then you present a case before Congress where the Senate or the House would be free to deal with the merits of the case, not involved or embarrassed by the fact that in dealing with the merits we are dealing with a man who either had to violate an order, perhaps, or go to the Court of Claims to make a recovery.

Mr. CHAMBERLAIN. May I call the Senator's attention to one thing in connection with this class of claims? The Government has already gotten the benefit, the money has been expended, and these men will be sued unless Congress does something for their relief.

Mr. CLAPP. Yes; but there constantly come up cases where expenditures have been made in excess of authority. The very fact that the Government has got something which it did not want cuts no figure.

Mr. BRYAN. It cuts this figure, that you are allowing these men to take the place of Congress to appropriate public money; that is what it amounts to.

Mr. CLAPP. It amounts to an appropriation, and you can not get away from it in the last analysis. I do not think we ought to visit the sins of the superiors upon the subordinates.

Mr. BRYAN. I do not either. I want to get some information about it. I have succeeded in getting that information. It amounts to this, that somebody, either these officers or officers above them, issued orders to build buildings and make improvements without authority from Congress. Then they go ahead, and to all intents and purposes appropriate the money, and we are appealed to here to make good this $10,000, to charge it off the books against the officers who have done this thing. There ought to be some way to stop it. I shall not make any point of order about it. The Senator very well says that no appropriation is asked for. There is no claim against the Government; the claim is by the Government against whoever is responsible for this illegal expenditure of money.

Mr. BRADY. Mr. President, I will say to the Senator from Florida that there were 25 or 30 of these claims presented to the committee. The committee very carefully sifted them out and gave consideration and favorable action only to those which we felt were very worthy indeed.

I fully agree with the Senator from Florida that we ought to have some way of preventing these expenditures being made without authority.

Mr. BRYAN. A very good way to prevent it would be to appropriate no money for the payment of such expenditures when the officers violate the law in making the expenditures. That would stop it.

Mr. BRADY. I think when expenditures have been made by a subordinate obeying the instructions of his superior that they should be paid.

Mr. SMOOT. Mr. President, I want to say to the Senator from Idaho [Mr. BRADY] that if the 30 claims had been paid under an order from the superior officer, I do not think the committee ought to have gone into the consideration as to whether one claim ought to be paid or another. If they paid any of them, they should have paid them all.

Mr. BRADY. I think that some of these claims which were filed with the committee were not authorized to be paid by the superior officer.

Mr. FLETCHER. I think the Senator from Idaho will agree that the committee decided to limit these claims to this particular class, where the items were merely for the adjustment of accounts. Where there were claims for horses, and claims for this, that, and the other thing, they were not considered by the committee.

Mr. BRADY. Such claims were thrown out by the committee and not given consideration.

Mr. FLETCHER. We favorably considered only that class of claims, such as these, which involve a mere adjustment of accounts, as we looked upon it.

Of course, I quite agree that an officer ought not to exceed his authority; that he ought not to go beyond the law in making expenditures; but it must be borne in mind that it is sometimes a very close question whether or not he has gone beyond the law. There is a difference of opinion between the Secretary of War, for instance, or the superior officer handling these matters, and the auditor. The auditor may not be right. It may be that the general appropriation under the head of "Barracks and quarters" was broad enough to cover the placing of this marble slab; at least, there is ground for difference of opinion as to whether it was or was not. But we are simply accepting the judgment of the auditor in disallowing these vouchers, and we are clearing the accounts by saying here that the Government has got what it has paid for, and it is not fair that this disallowance should be charged against the officer who made the disbursements in pursuance of the contract made by the department or by orders from the department. That is all we mean to say.

Mr. BRADY. Mr. President, the Senator from Florida [Mr. FLETCHER] is quite correct in his statement. Wherever we found that the claim was one for horses, or where the party was in any way himself responsible, the claim was rejected; but if we would go to the extreme, we might say in rejecting all these claims that we would require a subordinate officer to be thoroughly advised as to each appropriation made by Congress and what it should be used for, and to himself determine whether or not the law applied to his particular case. I do not believe we could expect any subordinate officer to do that.

Mr. BRYAN. Mr. President, my position is that somebody in authority over these men—not these individuals whose accounts have to be credited here in order to give them relief from a claim by the Government—but whoever is responsible for that expenditure ought to be compelled to pay it. Otherwise, as stated by the Senator from Minnesota [Mr. CLAPP], you can not escape the conclusion that they are now appropriating money; that they are taking the place of Congress. Here are between eight and ten thousand dollars which have been practically appropriated under that system, and the Committee on Military Affairs comes in and ratifies it. This was money that ought never to have been spent, and money that was spent without any authority of law, unless you delegate to these gentlemen the power that Congress is given under the Constitution to appropriate money. That is the whole of the situation.

Inasmuch as I understand there are a large number of other claims of a similar nature, of the expenditure of money without any authority, I should like to see the committee bring in a bill, if that is customary among the Army and Navy officers, to authorize and to make it the duty of the accounting officers, wherever a situation like this exists, to bring a suit, either at law or in equity, to settle with the men who are responsible for the violation of the law. This is a dangerous thing to do, in my judgment—to let men go along and build a bathroom costing $1,191 in one place, to set up a summer camp costing $4,500 in another place, and to expend $1,500 for decorating a building, all of it amounting in the aggregate to some eight or ten thousand dollars; and then, in order to make the account of the man who keeps the books read straight, we authorize the accounting officers of the Treasury to credit his accounts with this money which has been wrongfully and illegally expended. You can not make anything else out of it. It would be a good lesson to the officers responsible—for somebody is responsible—for this violation of law, if they knew that every time they permitted such a violation, every time they undertook to appropriate public money, they would be held to a strict accountability by Congress, and that they can not come in here, just as a mere matter of form, and have their acts ratified by Congress.

Mr. CLAPP. Mr. President, the trouble about that is that in many of these cases—I am not discussing the merits of the cases in this bill, but of cases of which I have known—a man acts under orders. In such a case he should be relieved by having the auditing officer deal with the man who issued the order, and then let him settle with the Government as to whether, under all the circumstances, the use of the money should be recognized or not. Under existing law, however, and so long as the law stands as it is to-day there will be cases, as there have been cases, where a subordinate officer either had to face disobedience and possibly a court-martial or pay

out money which ought not to have been paid out. To teach him a lesson would do no good. The lesson to be taught should be taught to the man, whoever he may be, who primarily is responsible.

Mr. BRYAN. Mr. President, I have already agreed with the Senator from Minnesota on that proposition; but I want to ask him this question: What penalty would come to such subordinate officer making such an expenditure from a court-martial for refusing to spend money that was never appropriated by Congress?

Mr. CLAPP. He might be dismissed; and, more than that——

Mr. BRYAN. Such a man would not be apt to be dismissed.

Mr. CLAPP. Just a moment, if the Senator will pardon me. More than that, we ought not to stand for a system that puts the subordinate where the discipline of the Army or Navy may be more or less effective by a subordinate determining for himself his personal pecuniary liability or disobeying the order of a superior. If the law visited the penalty on the superior——

Mr. BRYAN. Let us fix the law so that it will do that. There ought to be such a law.

Mr. CLAPP. Undoubtedly; but until that is done we are likely to commit a great injustice if we say to the subordinate, "We will teach you a lesson."

Mr. BRYAN. I think that is true; but I do not imagine that any court-martial would dare to be very hard upon a disbursing officer who refused to expend money that was never appropriated by Congress. That would be assuming a good deal, even for officers of the Army and Navy.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, on page 55, after line 4, to insert:

Credit in the accounts of Capt. David L. Stone, United States Army: The accounting officers of the Treasury are hereby authorized and directed to allow and credit in the accounts of Capt. David L. Stone the sum of $1,191, disallowed on voucher 6 B of his money accounts for the month of December, 1911, and now standing against him on the books of the Treasury.

The amendment was agreed to.

The next amendment was, on page 55, after line 11, to insert:

Credit in the accounts of Capt. Henry L. Kinnison, United States Army: The accounting officers of the Treasury are hereby authorized and directed to allow and credit in the accounts of Capt. Henry L. Kinnison, Quartermaster Corps, United States Army, the sum of $82.50, disallowed on vouchers 12 B of his money accounts for May, 1912, and 6 B of his money accounts for June, 1912, and now standing against him on the books of the Treasury.

The amendment was agreed to.

The next amendment was, on page 55, after line 20, to insert:

Credit in the accounts of Maj. John E. Baxter, United States Army: The accounting officers of the Treasury are hereby authorized and directed to allow and credit in the accounts of Maj. John E. Baxter, quartermaster, United States Army (now colonel, Quartermaster Corps), the sum of $18.96, disallowed against him on the books of the Treasury.

The amendment was agreed to.

The next amendment was, on page 56, after line 2, to insert:

Credit in the accounts of Capt. L. C. Brown, United States Army: The accounting officers of the Treasury are hereby authorized and directed to allow and credit in the accounts of Capt. L. C. Brown, United States Army (now major, Coast Artillery Corps, United States Army), the sum of $124, suspended against him on the books of the Treasury.

The amendment was agreed to.

The next amendment was, on page 56, after line 9, to insert:

Credit in the accounts of Maj. H. L. Pettus, United States Army: The accounting officers of the Treasury are hereby authorized and directed to allow and credit in the accounts of Maj. H. L. Pettus, Quartermaster Corps, United States Army, the sum of $1,545, disallowed on voucher 11 B, January, 1912, and now standing against him on the books of the Treasury.

The amendment was agreed to.

The next amendment was, on page 56, after line 16, to insert:

Credit in the accounts of Col. Frederick G. Hodgson (retired), Capt. Briant H. Wells, and Capt. Girard Sturtevant, United States Army: The accounting officers of the Treasury are hereby authorized and directed to allow and credit in the accounts of the following-named officers of the Army the sums set opposite their names, respectively, which have been disallowed and charged against them on the books of the Treasury: Col. Frederick G. Hodgson (retired), February, 1912, $21; Capt. Briant H. Wells, September and October, 1911, $171; Capt. Girard Sturtevant, December, 1911, $2.99.

The amendment was agreed to.

The next amendment was, on page 57, after line 3, to insert:

Credit in the accounts of Maj. James E Normoyle, United States Army: The accounting officers of the Treasury are hereby authorized and directed to allow and credit in the accounts of Maj. James E. Normoyle the sum of $5, disallowed on voucher 238 B of his money accounts for the month of September, 1912, and now standing against him on the books of the Treasury.

The amendment was agreed to.

The next amendment was, on page 57, after line 11, to insert:

Credit in the accounts of Maj. G. G. Bailey, United States Army: The accounting officers of the Treasury are hereby authorized and directed to allow and credit in the accounts of Maj. G. G. Bailey, Quartermaster Corps, United States Army, the sum of $106, disallowed against him on the books of the Treasury.

The amendment was agreed to.

The next amendment was, on page 57, after line 17, to insert:

Credit in the accounts of Lieut. Col. I. W. Littell, United States Army: The accounting officers of the Treasury are hereby authorized and directed to allow and credit in the accounts of Lieut. Col. I. W. Littell (now colonel, Quartermaster Corps, United States Army) the sum of $98.65, disallowed on voucher 24 B of his money accounts for September, 1909, and now standing against him on the books of the Treasury.

The amendment was agreed to.

The next amendment was, on page 58, after line 2, to insert:

Credit in the accounts of Capt. Orrin R. Wolfe, United States Army: The accounting officers of the Treasury are hereby authorized and directed to allow and credit in the accounts of Capt. O. R. Wolfe, United States Army, the sum of $40, disallowed against him on the books of the Treasury.

The amendment was agreed to.

The next amendment was, on page 58, after line 8, to insert:

Credit in the accounts of Maj. G. G. Bailey, United States Army: The accounting officers of the Treasury are hereby authorized and directed to allow and credit in the accounts of Maj. G. G. Bailey, Quartermaster Corps, United States Army, the sum of $31.09, disallowed on voucher 23 A of his money accounts for July, 1909, and now standing against him on the books of the Treasury.

The amendment was agreed to.

The next amendment was, on page 58, after line 16, to insert:

Credit in the accounts of Lieut. J. H. Barnard, United States Army: The accounting officers of the Treasury are hereby authorized and directed to allow and credit in the accounts of Lieut. J. H. Barnard, Fifth United States Cavalry, the sum of $4,555, disallowed in his accounts as disbursing officer for the students' military instruction camp at Ludington, Mich., during the summer of 1914, and now standing against him on the books of the Treasury.

The amendment was agreed to.

The next amendment was, under the subhead "Medical Department," on page 59, line 7, after the word "transports," to strike out "and supplies required for sanitation, including mosquito destruction, of temporary camps beyond the border of the United States, where it may be necessary to protect the Army against the spread of yellow fever or other disease" and insert "and supplies required for mosquito destruction in and about the military posts in the Canal Zone," so as to read:

Medical and Hospital Department: For the purchase of medical and hospital supplies, including motor ambulances and motorcycles for medical service, their maintenance, repair, and operation, and disinfectants, and the exchange of typewriting machines, for military posts, camps, hospitals, hospital ships and transports, and supplies required for mosquito destruction in and about the military posts in the Canal Zone.

The amendment was agreed to.

The next amendment was, in the item of appropriation for Medical and Hospital Department, on page 61, line 3, after the word "advertising," to insert "printing, binding"; and in line 5, after the word "department," to strike out "$2,000,000: *Provided*, That so much of the act of June 3, 1916, as relates to the age limit for eligibility to appointment of first lieutenants in the Medical Department of the Army, be, and the same is hereby, repealed," and insert "$4,500,000, of which sum $500,000 may be used under the direction of the Secretary of War in the erection or rental of temporary hospitals for the care and shelter of the sick and injured," so as to read:

For the payment of express companies and local transfers employed directly by the Medical Department for the transportation of medical and hospital supplies, including bidders' samples and water for analysis; for supplies for use in teaching the art of cooking to the Hospital Corps; for the supply of the Army and Navy hospital at Hot Springs, Ark.; for advertising, printing, binding, laundry, and all other necessary miscellaneous expenses of the Medical Department, $4,500,000, of which sum $500,000 may be used under the direction of the Secretary of War in the erection or rental of temporary hospitals for the care and shelter of the sick and injured.

Mr. JONES. Mr. President, I want to ask the chairman of the committee what the effect of striking out that proviso is?

Mr. CHAMBERLAIN. Mr. President, the House provision left the matter of age wide open; in other words, if that provision became a law, a man might be appointed in the Medical Corps who was 35 or 45 or 64 or any age under the retirement age. The committee was not entirely satisfied in its mind as to just what the age limit ought to be. The age limit is fixed by the reorganization act of June 30, 1916, at 30 years. Gen. Gorgas and his assistants think that that age limit is too low, because under the standard studies nowadays a doctor does not really get out into practice before he is 32 years old. So we eliminated that in the hope that in conference we might take it up and try to agree on what the age limit ought to be.

Mr. JONES. Without the provision which the House inserted, what is the age limit?

Mr. CHAMBERLAIN. Thirty years. We eliminate the House provision, and that leaves it open in conference.

Mr. JONES. I thought it was 27.

Mr. CHAMBERLAIN. It is 30 for the Medical Corps and 27 for the Dental Corps.

Mr. JONES. Is not the Dental Corps a part of the Medical Corps.

Mr. CHAMBERLAIN. Yes; but the age limits are different.

Mr. JONES. Would this provision here affect both corps?

Mr. CHAMBERLAIN. It affects both.

Mr. JONES. The age limit is 30 years and 27 years, respectively.

Mr. CHAMBERLAIN. Yes, sir. We thought we might be able to agree without much difficulty in conference, and that was the reason we struck it out. If the Senator is prepared to suggest a proper age limit, of course I should be glad to have his suggestion.

Mr. JONES. It occurred to me to leave the House provision in and insert at the end of it the words "and such age limit is hereby placed at 35 years," but if the chairman of the committee would prefer to have the paragraph remain as it is and go to conference in the belief that he can satisfactorily adjust it there, I shall not offer the amendment.

Mr. CHAMBERLAIN. The consensus of opinion amongst the members of the committee was that we could probably agree on an age limit satisfactory to both the Senate and the House when we got in conference, and that was the purpose of striking it out.

Mr. JONES. Very well; I will not offer the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, under the subhead "Engineer Department," on page 64, after line 2, to insert:

For the purchase of material to be used in the construction by enlisted labor of a trade school building at the Engineer School, to remain available until expended, $9,000.

The amendment was agreed to.

The next amendment was, on page 64, line 12, after the word "to," to strike out "be immediately available $1,000,000" and insert "remain available until the close of the fiscal year ending June 30, 1918, $1,770,000," so as to make the clause read:

Engineer equipment of troops: For pontoon material, tools, instruments, supplies, and appliances required for use in the engineer equipment of troops, for military surveys, and for engineer operations in the field, including the purchase and preparation of engineer manuals and procurement of special paper for same, and for a reserve supply of above equipment, to remain available until the close of the fiscal year ending June 30, 1918, $1,770,000.

The amendment was agreed to.

The next amendment was, on page 64, after line 14, to strike out:

Provided, That authority is granted for the purchase, maintenance, and repair and operation from this appropriation of not to exceed 24 motorcycles, including those on hand.

And insert:

Provided, That authority is granted for the purchase, maintenance, and repair and operation from this appropriation of motorcycles, not to exceed two for each authorized Engineer regiment, battalion, and company, including those on hand.

The amendment was agreed to.

The next amendment was, at the top of page 65, to insert:

Engineer operations in the field: For expenses incident to military engineer operations in the field, including the purchase of material and a reserve of material for such operations, the purchase, operation, maintenance, and repair of passenger-carrying vehicles, and such expenses as are ordinarily provided for under appropriations for "Engineer depots," "Civilian assistants to Engineer officers," and "Maps, War Department," $100,000.

Mr. LODGE. Mr. President, in connection with this provision for the Engineers, I should like to ask the chairman of the committee a question. The Army bill as reported by the committee grants to quartermasters' clerks quarters, heat, and light, but does not grant the same benefit to civil engineers in the same office and subject to the same conditions. They may be under the Engineer Corps; but, as I understand, the civil engineers to which I have reference are in the Quartermaster's office and subject to the same conditions as quartermasters' clerks. They are a small body of men, and I should like to know why the same provision should not be made for them as for quartermasters' clerks?

Mr. CHAMBERLAIN. Those within the provisions of this act are not subject to transfer to different places as are the other officers.

Mr. LODGE. I understand they are subject to the same conditions, transfers, expenses, and so forth; but they receive no consideration. Can not the comparatively few civil engineers also be included? The additional expense would be insignificant. We have provided for the quartermasters' clerks, but not for the civil engineers.

Mr. WARREN. Are they in the Quartermaster's Department?

Mr. LODGE. Yes; the civil engineers to whom I refer, as I understand, are in the Quartermaster's Department, and I ask why they should not be included as well as quartermaster's clerks in the allowances made?

Mr. WARREN. Mr. President, I understand, while they may be connected with the Quartermaster's Department, that they are not detailed to go outside, while some of the quartermasters' clerks are required to go wherever they are sent. As I understand, the quartermasters' clerks are not all furnished with quarters, but simply about 200, I think, covering the number detailed for service in the country outside of Washington and moved from place to place, having no especial abiding place.

Mr. LODGE. I understand that the civil engineers in the Quartermaster's Department are detailed outside of Washington, and why should they not be treated in the same way as quartermasters' clerks?

Mr. WARREN. I made inquiry at the department the other day about a clerk in one of the prisons on the Pacific coast who felt that he was not covered, but I was informed that he was covered by the act.

Mr. SMOOT. Mr. President, the Senator from Wyoming refers to quarters for clerks in the Quartermaster Corps. I want to ask the Senator having the bill in charge if on Monday I make the request that the amendment covering that matter which was adopted to-day be reconsidered, whether there will be any objection on his part?

Mr. CHAMBERLAIN. The amendment to which the Senator has reference was adopted yesterday, but I have no objection to its being taken up again. Of course I should like to have a limit to the reconsideration of the various items of the bill; but I have no disposition to prevent the correction of anything that is wrong in this bill, and I will make no objection to the request of the Senator.

Mr. SMOOT. I will say to the Senator that it was adopted at a time when I was compelled to leave the Chamber, and I have some very strong protests against the manner in which the amendment is written. I should like to call the Senator's attention to the protests, and therefore I shall ask that the amendment be reconsidered.

Mr. LODGE. What is the amendment?

Mr. SMOOT. It is the amendment authorizing certain quarters for clerks in the Quartermaster Corps.

Mr. WARREN. Let me say it is not, in one sense, an amendment by the Senate, having been put on in the House, but stricken out on a point of order. As the Senator knows if he has looked at it, it refers to the staff and to the field corps, including——

Mr. SMOOT. Mr. President, of course I am fully aware that it was in the House bill and went out on a point of order, and therefore when it is put in here by the Senate it makes it a Senate amendment.

Mr. WARREN. Certainly.

Mr. SMOOT. I am very glad to have the Senator from Oregon say that he will have that reconsidered.

Mr. LODGE. My suggestion is in connection with that.

Mr. SMOOT. In connection with this?

Mr. LODGE. Yes. So that can be taken up later, and perhaps we can add a few civil engineers.

Mr. SMOOT. That is why I thought I would speak of it at this time, the Senator from Massachusetts having brought up the question in another form.

Mr. CHAMBERLAIN. Does the Senator from Massachusetts ask that the provision in reference to civilian engineers go over to be disposed of at the same time?

Mr. LODGE. It is connected with the amendment the Senator has just asked to have go over.

Mr. CHAMBERLAIN. All right.

The VICE PRESIDENT. What is the Senator's request?

Mr. CHAMBERLAIN. Mr. President, the Senator from Utah just wanted to know if, so far as I was concerned, I would be willing to have reconsidered the provision on page 16——

Mr. SMOOT. Beginning on line 14.

Mr. WARREN. I understood he wanted it to go over until Monday.

Mr. SMOOT. I should like to have it go over—that is, to reconsider the amendment, and then to pass it over until Monday.

Mr. CHAMBERLAIN. Will the Senator state to the Chair just what he wants?

Mr. SMOOT. Yes. I ask, Mr. President, that the vote be reconsidered whereby the amendment on page 16, beginning

with line 14, and going down to the end of line 9 on page 17, was agreed to.

The VICE PRESIDENT. Without objection, the vote whereby the amendment was agreed to will be reconsidered.

Mr. SMOOT. Now, I ask the Senator to allow that amendment to go over until Monday.

Mr. CHAMBERLAIN. I have no objection.

The VICE PRESIDENT. The amendment will be passed over. What about the amendment at the top of page 65?

Mr. LODGE. There is no objection to that.

The VICE PRESIDENT. Then the question is on agreeing to that amendment.

The amendment was agreed to.

The next amendment was, under the subhead "Ordnance Department," on page 66, line 11, after the word "vehicles," to strike out "$375,000" and insert "$550,000," so as to make the clause read:

Ordnance Service: For the current expenses of the Ordnance Department in connection with purchasing, receiving, storing, and issuing ordnance and ordnance stores, comprising police and office duties, rents, tolls, fuel, light, water, and advertising, stationery, typewriters and adding machines, including their exchange, and office furniture, tools, and instruments of service; for incidental expenses of the Ordnance Service and those attending practical trials and tests of ordnance, small arms, and other ordnance stores; for publications for libraries of the Ordnance Department, including the Ordnance Office; subscriptions to periodicals, which may be paid for in advance; and payment for mechanical labor in the office of the Chief of Ordnance; and for purchase, maintenance, repair, and operation of motor-propelled or horse-drawn passenger-carrying vehicles, $550,000.

The amendment was agreed to.

The next amendment was, on page 66, line 13, after the word "Manufacture," to insert "and purchase"; and in line 23, after the word "homes," to strike out "$4,500,000" and insert "$12,776,000"; and at the top of page 67, to strike out: "*Provided*, That not more than $2,000,000 of this appropriation may be used in the purchase of ammunition" and insert "*Provided*, That the Government shall manufacture at its arsenals as much of said ammunition as can be produced by the exercise of the greatest economy and efficiency," so as to read:

Ordnance stores, ammunition: Manufacture and purchase of ammunition for small arms and for hand use for reserve supply, ammunition for burials at the National Soldiers' Home in Washington, D. C., ammunition for firing the morning and evening gun at military posts prescribed by General Orders, No. 70, Headquarters of the Army, dated July 23, 1867, and at National Home for Disabled Volunteer Soldiers and its several branches, including National Soldiers' Home in Washington, D. C., and soldiers and sailors' State homes, $12,776,000; *Provided*, That the Government shall manufacture at its arsenals as much of said ammunition as can be produced by the exercise of the greatest economy and efficiency.

Mr. JONES. Mr. President, how much of the ammunition does the committee contemplate will be manufactured in the way specified in that proviso?

Mr. CHAMBERLAIN. Mr. President, the Chief of Ordnance, Gen. Crozier, stated in effect that taking the $4,500,000 that was appropriated by the House, it would be impossible to manufacture in the Government establishments over about $2,000,000 of the amount. That is, they did not have the room and they did not have the force necessary to do that. The Senate committee increased the amount from $4,500,000 to $12,776,000; and that would leave practically $10,000,000 that they could not manufacture even if the appropriation were made on the same basis. Therefore, instead of limiting the amount that might be used to purchase ammunition, we simply struck out the House proviso, which read:

Provided, That not more than $2,000,000 of this appropriation may be used for the purchase of ammunition—

And inserted, in lieu thereof, the following words:

Provided, That the Government shall manufacture at its arsenals as much of said ammunition as can be produced by the exercise of the greatest economy and efficiency.

That would require the Government to manufacture $2,000,000 worth if they could, and, if they could manufacture more, to do that.

Mr. JONES. If they deemed it economical to enlarge their arsenals, could they do it out of the $12,776,000?

Mr. CHAMBERLAIN. I think not. It was not contemplated that they would. I might say to the Senator, in all frankness, that there has been a heated discussion about the insertion of these words "and purchase." The Senator will remember that the discussion in the House was a very bitter discussion, and the words "and purchase" were put in by the Senate. In other words, the House required that the Government should manufacture all of these materials except $2,000,000 worth, which they could purchase on the outside. The Senate did not think that limitation ought to be inserted in a bill, particularly in view of the emergency which confronted the country at the time this bill was prepared.

Mr. JONES. My recollection is that when the fortifications appropriation bill was passed, the Senate put in that bill a provision for a powder factory, with the idea of having the Government manufacture most of its powder. None of this money could be used in connection with that plant, I suppose?

Mr. CHAMBERLAIN. I think this would require the Government to make it in any of its establishments where it could, whether provision was made for the erection of the establishment in another bill or in this. It would be required to make at its arsenals as much as could be produced by the exercise of the greatest economy and efficiency.

Mr. JONES. Is not that an unusual requirement to put in—that it shall be done with the "greatest economy and efficiency"? Have we not a right to assume that our officers will exercise economy and efficiency?

Mr. CHAMBERLAIN. I want to say to the Senator that we worked on the language that was put in there quite assiduously, and we did not know just what was the best language to put in. If the Senator can suggest something which is better we shall be very glad to have him do so. We wanted the Government to manufacture all that it possibly could manufacture, but we did not want to tie the hands of the Government officials, in case of an emergency, and say that they could not buy this material anywhere else. We did say to them, "You must manufacture all you can." I should like to have the Senator suggest better language.

Mr. JONES. No; I have not any idea about that, but it just struck me that it was rather peculiar language, and based on a sort of assumption that our officers would not exercise economy and efficiency in any event.

Mr. CHAMBERLAIN. I am giving the Senator a statement of the difficulties that confronted the committee in trying to formulate this language. I think the Senator from Nebraska [Mr. HITCHCOCK] worked on it a while, and I think my distinguished friend from Colorado [Mr. THOMAS] worked on it for a while. Both of those Senators know how to use the English language very well, and both of them were trying to reach the same conclusion that the committee was trying to reach, and that was to make the Government manufacture all that it could, but not to compel it to manufacture all of it.

Mr. JONES. I think I get the viewpoint of the committee, and I think I am heartily in favor of it.

Mr. CUMMINS. Mr. President, this touches a question in which I am very deeply interested, for I believe that the Government ought to manufacture all its munitions of war, and purchase none, save in the contingency of a great war; and I am afraid that the language which the committee has used will preclude, or may preclude, any manufacture on the part of the Government in its own arsenals. I hesitate to criticize the effort of the committee in selecting language to carry out the object which has been stated by the chairman of the committee, but it does not seem to me that these are the proper words to bring about that result.

Mr. THOMAS. Mr. President, speaking as one member of the committee, I certainly hope the Senator will not hesitate to criticize the language employed in the phrase under discussion. The chairman has correctly stated the history of the provision. The Senator will recall the statement which I made some time ago—he may not have been in the Chamber, however—that this bill was prepared under pressure, so to speak. At the time the committee was considering it, the Mexican situation was such that it was the desire of the committee to formulate a bill and report it out as soon as possible in order to meet the extraordinary exigencies with which the country was then confronted. If the Senator can improve that phrase, or if he thinks it can be stricken out, he need have no hesitancy in stating it, because, I think, the members of the committee, in common with the Senator, want to secure the best possible bill under the circumstances.

Mr. CUMMINS. Mr. President, when I first read it, the impression produced on my mind was that it was an effort on the part of the committee to limit with severe restrictions the manufacture of ammunition in Government arsenals.

Mr. THOMAS. No, Mr. President. The Senator will notice that the increase in the appropriation is very large. It is over 200 per cent. We put the amount at $12,776,000, that being the amount recommended by the department, and of course it wanted the ammunition at once. To permit the House provision to remain in the bill, which limited purchases outside of manufacture to a maximum of $2,000,000, might have resulted in great embarrassment to the Government. Hence our purpose, however badly we expressed it, was to provide for as much manufacture as possible, and at the same time to leave the Government free to purchase all of the ammunition which the existing situation might require, and might require that it get as soon as possible.

Mr. CUMMINS. Mr. President, I agree that the Government must be permitted to purchase ammunition under existing cir-

cumstances, because we probably are not provided with the facilities to manufacture all that we may need; but when I read this amendment in connection with an amendment which will be found a little later, and which seeks to reduce by one-half the appropriation made by the House for the manufacture of small arms in Government arsenals, I could reach no other conclusion than that the committee had decided that governmental activity in these respects ought to be limited as much as possible.

Mr. THOMAS. Mr. President——

Mr. CHAMBERLAIN. May I interrupt the Senator just a moment?

Mr. CUMMINS. Certainly.

Mr. CHAMBERLAIN. Our position was just diametrically opposed to the view stated by the Senator. Gen. Crozier simply came before us and said:

If you gentlemen are going to confine us to the manufacture alone, there is no use in appropriating more than about $2,500,000. We can not do it.

Mr. CUMMINS. I am not proposing that the Government shall manufacture all the ammunition; but it seems to me the limitation ought to be rather in the way provided by the House than in the way suggested by the Senate. If you want to limit the purchase or give full scope to the manufacture by the Government, why not ascertain the capacity of the Government at the present time and then deduct that from the entire appropriation? I should be very much better satisfied if we should say that not more than $10,776,000 of the appropriation shall be used for the purchase of ammunition. Then we would have an understandable proposition, anyhow.

Mr. THOMAS. Mr. President, the second amendment to which the Senator has referred was inserted with the same end in view, and the same purpose to be effected that caused us to act upon the amendment that is now being considered.

Mr. CUMMINS. There is no other appropriation, as I understand it, for small arms. There is no appropriation for the purchase of small arms—that is, rifles and pistols.

Mr. LODGE. That amendment is on page 68.

Mr. CUMMINS. And whatever we add to our supply must be added from the Government manufactory. But I call the attention of the Senator from Oregon and the Senator from Colorado now to my construction of this amendment. I read:

Provided, That the Government shall manufacture at its arsenals as much of said ammunition as can be produced by the exercise of the greatest economy—

I pause at that point. What does that mean? We shall make so much of the ammunition at our arsenals as can be produced by the exercise of the greatest economy. Now, that means, if it means anything whatsoever, that we will not produce any ammunition at our arsenals unless we can produce it at less cost than it can be purchased for from private manufacturers. If that be not the construction, then it has no application whatever to the case in hand.

I now continue with the final words:

As can be produced by the exercise of the greatest economy and efficiency.

That emphasizes what I have just said. We have Government manufactories capable of producing so much ammunition, but we are told here that we will produce only so much as can be produced with the greatest economy. Economy about what? If the words "economy" and "efficiency" are synonymous terms as employed in this amendment, then, of course, the only comparison we can institute is the comparison between the Government manufacture and the private manufacture. I suggest now to the Senator from Oregon and to the Senator from Colorado that at least this ought to be changed so as to say "as can be produced using the Government arsenals to their full capacity," and then follow that, if you please, by a command that in the use of the arsenals the greatest economy and efficiency shall be observed.

Mr. SMOOT. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Utah?

Mr. CUMMINS. Yes.

Mr. CHAMBERLAIN. Just let me make a suggestion there, in reference to what the Senator has said. The greatest efficiency would require three shifts, and Gen. Crozier did not think that would be the most economical way.

Mr. CUMMINS. But the trouble is that the words "economy and efficiency" must apply to the product. You do not attempt to say that the Government arsenals shall turn out all that they can turn out when operated in the most economical and efficient manner. That is not what the amendment says, and that is not the way it will be construed.

Mr. SMOOT. It seems to me that the wording is all right, if I understand the object of the amendment. If the amendment read that the Government should manufacture at its arsenal as much of said ammunition as can be produced, and stopped there, then they would be compelled, perhaps, to work four-hour shifts. With four-hour shifts they could produce more than they would if they ran the eight-hour shifts, but it would not be economy to do so. It seems to me that that being the case, the amendment means that the arsenal shall produce all the ammunition that they can produce by the exercise first of economy and efficiency. Now, efficiency, it seems to me, would be to run it under three shifts; that is, three eight-hour shifts. That would be the greatest efficiency that could be produced; but if they should undertake to run it on four-hour shifts, perhaps they could produce a little more, yet the expense of it would be so great that it would not pay the Government to do it.

The VICE PRESIDENT (at 5 o'clock p. m.). In accordance with the order of the Senate heretofore adopted, the Senate of the United States stands in recess until 10 a. m. Monday morning.

The Senate thereupon (at 5 o'clock p. m.) took a recess until Monday, July 24, 1916, at 10 o'clock a. m.

SENATE.

MONDAY, *July 24, 1916.*

(Legislative day of Saturday, July 22, 1916.)

The Senate reassembled at 10 o'clock a. m., on the expiration of the recess.

ARMY APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 16460) making appropriations for the support of the Army for the fiscal year ending June 30, 1917.

The VICE PRESIDENT. The pending amendment of the Committee on Military Affairs will be stated.

The SECRETARY. On page 66, line 13, after the word "manufacture," insert the words "and purchase."

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. SMOOT. Before it is agreed to, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gronna	Oliver	Smith, Ga.
Beckham	Husting	Overman	Smoot
Brady	James	Page	Sterling
Brandegee	Johnson, S. Dak.	Penrose	Stone
Bryan	Jones	Phelan	Swanson
Chamberlain	Kenyon	Pittman	Thomas
Clark, Wyo.	Kern	Pomerene	Tillman
Culberson	La Follette	Ransdell	Townsend
Cummins	Lane	Reed	Vardaman
Curtis	Martine, N. J.	Robinson	Wadsworth
Dillingham	Myers	Shafroth	Walsh
Fall	Nelson	Sheppard	Warren
Fletcher	Norris	Sherman	Williams
Gallinger	O'Gorman	Smith, Ariz.	Works

The VICE PRESIDENT. Fifty-six Senators have answered to the roll call. There is a quorum present.

Mr. SMITH of Georgia. Mr. President, the Senator from Vermont [Mr. PAGE] has given notice that he will address the Senate this morning upon Senate bill 703, providing for national aid to vocational education. I ask unanimous consent that the Army appropriation bill be temporarily laid aside and that the vocational bill be temporarily laid before the Senate while the Senator from Vermont addresses the Senate, the Senate to resume the consideration of the unfinished business immediately upon the conclusion of the address of the Senator from Vermont.

Mr. CHAMBERLAIN. I have no objection to that course.

The VICE PRESIDENT. Is there objection? The Chair hears none.

Mr. WORKS. If the Senator will allow me, I submit an amendment to the pending bill, in order that it may be printed.

The VICE PRESIDENT. The amendment will lie on the table and be printed.

VOCATIONAL EDUCATION.

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 703) to provide for the promotion of vocational education, to provide for cooperation with the States in the promotion of such education in agriculture and the trades and industries, to provide for cooperation with the States in the preparation of teachers of vocational subjects, and to appropriate money and regulate its expenditure.

Mr. PAGE. Mr. President, I need not say to the Senate that I believe this vocational-education bill ought to pass at this session. If in all our great plans for preparedness there is any one measure more essential than the preparedness of the American boy for efficiency in the economic battle to be fought at the close of the European war, I do not know what that measure is.

I realize, however, that it can not pass at this session, if it is to consume very much time, and it seems to me wise that I offer a part of what I have to say on the measure at this time, in order that later, when time may be even more valuable than to-day, I shall not then feel compelled to delay final action on the bill by any extended general remarks.

GENESIS.

Mr. President, vocational education is a theme which has occupied the attention of some of the best minds of this country since the passage of the Morrill land-grant college bill in 1862.

By some it has been claimed that the two acts of the greatest import in the presidential life of the lamented Lincoln were his proclamation freeing the slaves and his signing of the land-grant college bill.

The name of Morrill is so intimately interwoven with all that pertains to land-grant colleges that I am going to crave the indulgence of the Senate for just a moment while I speak of this distinguished son of the Green Mountain State.

Justin S. Morrill served his country in the Halls of the American Congress for a longer period than any other man; and, in view of the conditions that are likely to confront Senators and Representatives in the future, I think it is altogether improbable that any other man will ever serve as many consecutive years as Senator Morrill.

Entering Congress on the 4th day of March, 1855, he served until the 28th day of December, 1898. Had he lived 65 days longer, he would have served continuously for 44 years. Senator Allison is sometimes referred to as the man who had served in Congress longer than any other, but he did not serve as long and, unlike Senator Morrill's service, it was not continuous.

Probably no piece of legislation has been so closely associated with the prosperity of the American people during the latter half of the last century as the great tariff act which bears Senator Morrill's name—the act which enabled the people of this country to pay a goodly proportion of the debt incurred in the Civil War without distressing them or without seeming to burden them by severe taxation.

But when future historians shall write the history of this distinguished son of Vermont, the act which will overshadow all others, in my judgment, will be that by which the agricultural-college system of this country was established, the Morrill Land Grant College Act of 1862—an act which has given an impetus to agricultural life, the measure and importance of which it would be impossible to estimate.

It is not my purpose to take the time of the Senate by going into the many interesting details that have surrounded the Morrill Agricultural College Act; but since the objections urged against this bill have been largely constitutional, I think it is only proper to show that legislation of this character has been repeatedly enacted, and that precedents are not wanting to sustain the claim that appropriations from the Federal Treasury for educational purposes have been so often made that the objection on the grounds of unconstitutionality should no longer have force in debating this question.

I doubt if any appropriations were ever more favorably received by the American people than those which have from time to time been made for the strengthening of the original Morrill Act of 1862.

It may and probably will be urged that President Buchanan vetoed the original Morrill bill upon grounds of constitutionality; but the revered Lincoln, having Buchanan's veto in mind, as he undoubtedly did, felt no scruples about signing the Morrill Act of 1862. So far as I am able to learn, no administration from Buchanan's to Wilson's has ever successfully questioned—perhaps has never questioned at all—the propriety of the great appropriations made to promote the agricultural welfare of this country through the land-grant colleges.

Let me briefly give to the Senate a list of the five great appropriations supplementing the act of 1862:

First, in 1887, came what is known as the Hatch Act, giving to each State $15,000 per year for the maintenance of agricultural experiment stations.

I need not enlarge upon the value of these experiment stations. Everyone now confesses that they have conducted research and experimental work bearing directly upon agriculture in a way so valuable, so beneficial, that no patriotic, intelligent man would think of withholding support from these institutions.

Next comes what is known as the Morrill Act of 1890. This act bears so directly upon the point I wish to make that I am going to read its most important section:

> That there shall be, and hereby is, annually appropriated, etc., to each State and Territory for the more complete endowment and maintenance of colleges for the benefit of agriculture and the mechanic arts now established, or which may be hereafter established, in accordance with an act of Congress approved July 2, 1862, the sum of $15,000 for the year ending June 30, 1890, and an annual increase of the amount of such appropriation thereafter for 10 years by an additional sum of $1,000 over the preceding year, and the annual amount to be paid thereafter to each State and Territory shall be $25,000 * * *.

In talking about the propriety of these educational measures I have often been met with the statement: "Yes; it is true that we established the Morrill land-grant colleges, but we did not bestow any actual money upon them; we simply gave them some of our lands which we did not need, and which were then of very little value."

However forcible that argument might be under other circumstances, the fact that in 1887 we made a direct *cash* appropriation of $15,000 under the Hatch Act, and in 1890 still another *cash* appropriation of $25,000 under the Morrill Act of that year, fully establishes the further fact that, in the judgment of Congress, appropriations for the benefit of schools had then come to be regarded as constitutional.

Note, Mr. President, that in the short period of three years—1887 to 1890—the Congress made appropriations aggregating $40,000 annually to each State to supplement the original Morrill Act of 1862.

In 1906 a further appropriation was made under what is known as the Adams Act, which provided that the $15,000 annually appropriated under the Hatch Act of 1887 should be increased for the year 1906 by the sum of $5,000, with an annual increase of the amount of such appropriation thereafter for five years by an additional sum of $2,000 over the preceding year, and that at the end of the five-year period, the annual amount to be paid to each State and Territory should be $30,000 for the benefit of State experiment stations.

But this is not all. In 1907 the senior Senator from Minnesota, who is still with us, offered an amendment to the general agricultural appropriation bill, which is now known as the Nelson amendment, providing that the annual appropriation under the Morrill Act of 1890 should be increased in the sum of $5,000 each year for five years, and that thereafter the sum of $50,000 annually should be given to each State for the support of the land-grant colleges.

Just what sum has been realized from the land given for educational purposes under the original Morrill Act of 1862 it is impossible to state; or, if stated, would not materially illuminate the question which I am discussing. Some of the States kept their lands; others sold them and invested the money. Up to and including the amount covered by the Nelson amendment of 1907, each land-grant college is now receiving $80,000 annually from the Federal Treasury over and above the original appropriation of lands, and the additions under the Smith-Lever Act of 1913.

Coming down to the last session of Congress, we find that these same general appropriations for the benefit of land-grant colleges were supplemented by that most generous of all acts of this or, I presume, of any other country for the purpose of education—the Smith-Lever bill, which commences with an appropriation of $10,000 annually to each State and increases from year to year until it reaches the average sum of more than $95,000 to each State.

Mr. President, to those Senators who would oppose this measure on grounds of expense, I wish to call attention to the fact that under the last census it was shown that less than 2 boys out of every 100 in this country enjoy the benefits of an education of college grade. The appropriations which I have just been discussing—aggregating more than $175,000 per year, or nearly $8,000,000 annually to all the States—are for the sole benefit of those boys who attend institutions of the college grade.

This bill, drawn for the purpose of giving Federal aid for vocational education, is designed to aid the other 98 boys out of each 100. It provides for an initial appropriation of $1,700,000 for the first year, increasing from year to year until, when its maximum sum is reached, the total amount will be only $7,200,000.

This is a Nation of more than 100,000,000 people, and this bill is designed to benefit every community in every State in this broad land; and yet the total per capita expense asked for by this measure for the fiscal year ending June 30, 1917, is only 1 cent and 7 mills, and when the maximum amount shall have been reached in 1927 the entire per capita expense will be less than 7 cents annually.

For more than 50 years we have been making appropriations for educational work, and no one up to this time has successfully opposed the well-nigh unanimous voice of the American people in favor of Federal aid for education. Mr. President, let me express the opinion here and now, in view of the numerous precedents to which I have referred, that no one ever will attempt to test the constitutionality of these appropriations by appealing to the Supreme Court of the United States.

Mr. President, it is not obligatory upon any State to devote a single dollar to vocational education if, in the judgment of the educational board of that State, it is not found wise to do so. The bill simply says to the several States that if they will enter upon this work, the Federal Government will aid to the extent of one dollar for every dollar provided by State or local taxation, up to a certain limit.

This bill does not seek to take from the States the great burden of the maintenance of schools. It does not seek to deprive the States of the privilege of proceeding in matters of education in their own way. Nothing has been more carefully safeguarded in this bill than the autonomy of the States in the matter of schools.

Practically the only thing it does require is that if the State formulates a plan for vocational education, and desires to take advantage of this act, it must submit to the Federal board for vocational education the plan worked out by that State, and if that plan is in harmony with the spirit and purpose of this measure, the Federal board for vocational education must approve and authorize a reimbursement to the State for the expenditure incurred for vocational education and training.

I now wish to show how naturally this bill supplements the Morrill Act.

The Smith-Lever bill of 1914 was a very proper connecting link between the Morrill Act and the bill now under consideration. The Smith-Lever bill provides for the carrying of the accumulated results of experimentation, study, and research at the agricultural colleges and experiment stations to the adult farmer on his farm.

Already in very many sections of this country the experiment stations are sending out their experts, under the provisions of the Smith-Lever college-extension bill. In my own State, out of 14 counties 8 or 9 have thus far availed themselves of the advantages of that bill; and while I have no knowledge on the subject, I imagine that all the States in the Union are proceeding substantially as we are in Vermont.

Should the bill now before us be enacted into law, it will mean that in every important farming community there will be a teacher of agriculture. Each schoolroom devoted to agriculture will be presided over by a man who fully understands advanced and progressive methods of farming.

In winter he will instruct the boys from the textbooks. He will teach farm bookkeeping, soil analysis, seed selection, crop rotation, stock breeding, fertilization, and so forth, and, above all, he will try to awaken in the minds of the boys such an interest in agriculture as will lay the foundation for a love of agricultural life.

When the spring opens it is expected that he will go out to the farm homes of his scholars and there put into practice what he has taught theoretically from the textbooks in the schoolroom. He will endeavor to see that every boy has allotted to him, as his own or for his own exclusive use, a piece of land upon the father's home farm; and all through the summer and fall months he will, through close contact with the boy, lead him into that knowledge of intensive and progressive farming without which in nine cases out of ten farm life is rarely either pleasant or profitable.

But I said I wished to show how the original land-grant college bill and subsequent educational bills are supplemented by this bill, which provides Federal aid for the industrial education of the boy and girl below the college grade. The bill before us contemplates the employment of an agricultural teacher in each town, who must be a good, progressive farmer. He need not necessarily possess that technical knowledge which results from a college training at an agricultural college. It is through him, however, that the coordination and cooperation of the college extension work and the work under this bill begins.

Under this bill, the town will be the unit, with the agricultural teacher in charge. Under the college extension bill, the county is the unit, with the man sent out under the college extension bill in charge. These two, acting with each other in harmonious cooperation, will give to agriculture and to agricultural life such an impetus as will accelerate the forward movement in progressive farming to an extent that, I believe, will be little less than marvelous.

I should come short of my duty if I failed to make mention of the excellent work of the noncongressional members of the Federal commission appointed by President Wilson in 1914. They consisted of Charles A. Prosser, the executive head of the National Society for the Promotion of Industrial Education; Mr. John A. Lapp, director of the Indiana Bureau of Legislative Information and secretary of the Indiana Commission of Industrial-Agricultural Education; Mr. Charles H. Winslow, special agent of the Bureau of Labor Statistics and member of the Massachusetts Commission on Industrial Education; Miss Agnes Nestor, president of the International Union of Glove Workers and a member of the committee on industrial education of the American Federation of Labor; and Miss Florence M. Marshall, director of the Manhattan Trade School of New York City and a member of the Massachusetts Factory Inspection Commission.

For more than eight solid weeks they gave their entire time to this measure. They brought to its consideration a knowledge based upon a long and valuable experience in educational work along industrial lines, and it is only right to say that in their selection the President displayed exceptionally fine judgment.

It is said that there is no new thing under the sun, and it follows as a matter of course that they were compelled to follow very largely in the footsteps of those who had gone before in this vocational education work, but their practical experience in connection with working out problems for educational uplift in the large cities proved a very valuable aid in perfecting the details of this bill.

That commission met on the 2d day of April, 1914, and on the 1st day of the following June reported this bill.

AGRICULTURE.

In speaking of the fundamentals of this bill, it may be said that Federal aid for vocational education is demanded, first, because it is needed for agriculture; second, for home economics; and third, for the industries and commerce.

Each one of these needs is predicated upon the general theory that we owe to the boys engaged in agriculture, to the girls engaged in homemaking, and to the boys engaged in the industries and commerce a more practical education than they are now receiving—an education that fits them for life, for efficiency, and for that preparedness which is so absolutely essential if, in the contest for industrial supremacy which is certain to confront us at the close of the present war, we are to prevail.

Taking these in order, I wish to speak first of the necessities of this measure from the agricultural standpoint.

No careful student of the economic conditions surrounding the agricultural sections of our country can have failed to observe that for the past 50 years the constant tendency has been for the young men of the agricultural districts to migrate to the cities as soon as they were old enough to leave the parental roof. Not only the boys, but the girls have thought they could see in city life a greater opportunity for success than they could in life upon the old home farm.

At the time of our last census there were 252 counties in the United States which possessed a less population in 1910 than in 1880, and nearly all these counties were in the agricultural sections of our country. One of the most prosperous farming States of the West showed an absolute decrease of population of some 4 per cent in the last decade. This condition can not much longer exist without destroying the equilibrium between the rural and urban sections, and that would inevitably result in the destruction of that equilibrium between production and consumption which must be maintained if this country is to prosper.

I have not examined the statistics covering the whole country, but, speaking for New England alone, I will say that the figures show that in 60 years the acreage under cultivation in New England shrank from 12,215,277 acres to 7,112,698 acres. Stated in percentages, New England had 72 per cent more land under cultivation in 1850 than she had in 1910. In the same time New England's population increased from 3,110,572 to 6,552,681.

To state it otherwise, New England has two and one-ninth times as many people to-day as she had 60 years ago, but she had 72 per cent more land under cultivation 60 years ago than she has to-day.

The demands upon our country for food products are such as to make absolutely imperative more intensive farming—more intelligent and more progressive methods. In my judgment, there is no way to do this but to supplement the work done along agricultural lines by the land-grant colleges—work which is designed to benefit chiefly young men of college grade—by the education of the boy who, having reached the age when he must become a breadwinner, must be made to see that in agriculture there may be found the same measure of pleasure and the same measure of profit that is found in the trades and industries.

There is a glamour attaching to positions in the store, the office, and the factory—indeed, in commercial life generally—which is not found in farm life as it exists to-day, with its long hours of rugged service.

Combined with the education of the boy must come the education of the girl. Our farm homes must be made attractive, cheerful, and healthful, and this can be done only by that systematic method which is attainable by organized effort along educational lines.

Unless we are able to remove these handicaps which surround agricultural life to-day, we may safely look to see an aggravation of that congestion in our large cities which every student of our economic conditions so thoroughly deplores.

In many sections of our country progressive farming is getting a good foothold. Year by year the spirit of enterprise is growing, but this country can not—it must not—await the slow progress of haphazard effort.

If we do, it will be 10, 20, and perhaps 30 years before we shall have generally reached in this country that scientific method of farming which is so absolutely essential to our national prosperity, and which we can reach in 10 years if we will combine the education of the farmer's boy and the farmer's girl, as provided in this bill, with the education of the adult farmer on the farm, as provided in the college-extension bill of the last Congress.

Those of us who are acquainted with farm life and live in agricultural communities have come to know that the most enterprising and progressive of our boys will leave the farm unless they may be brought to know that farming, all things considered, is as profitable as industrial life in the cities.

I believe—and I speak from some knowledge—that the farmer who comes to have an expert knowledge as to soils, who understands the rotation of crops, the breeding of stock, the testing of seeds, the chemical properties and value of fertilizers, who has some knowledge of drainage, who knows enough about farm bookkeeping to keep a debit and credit of his different lines of agriculture so that he may increase those lines which are profitable and eliminate those which are unprofitable, will not only find agriculture a paying business, but will also find that much of that farm work which under the old régime seemed drudgery becomes a keen pleasure. That is the verdict to-day of our best and most progressive farmers.

That a large majority of our farmers in the past have not sufficiently comprehended the immense advantages of progressive farming is now conceded by everyone who has made a careful study of the subject.

I was told not long ago by an intelligent farmer that less than 60 per cent of the cows in the average New England dairy netted the farmer a profit; and the farmer to-day who does not know farm bookkeeping so that he may ascertain the profit and loss from the different branches of his farm work has very little reason to expect that his farming operations will be profitable.

The American farmer has been compared to a miner who exhausts the fertility of the soil and receives therefor but little more than the bare cost of mining. However that may be, there is no doubt that we have been exporting millions upon millions of bushels of wheat and corn with very little knowledge and almost no care as to its results upon our land.

This kind of farming has been going on for a hundred years or more, and we have been able to stand this terrific drain upon our soil fertility only because of the immense quantity of virgin soil which has been found in the trans-Mississippi States. We now know that there is but little more of this class of lands to exploit and that the old methods practiced by our fathers for generations must give place to modern methods or within a very brief period we shall be a food-importing nation.

How may we accomplish this greatly-to-be-desired change?

In my judgment, it will not either come at all or will come very slowly unless the Federal Government takes the initiative, as provided in this bill.

There must be implanted in the breast of every farmer's boy and farmer's girl that love of agriculture which will come only with that better knowledge of farming which we seek to reach by the passage of this measure.

Mr. President, in my judgment, there is no alternative. The congestion of our cities is unhealthy, unprofitable, criminal producing, and, let me repeat, we must relieve that congestion by keeping our boys and girls upon the farm, and we can not keep them there unless we so educate them that farm life is both profitable and pleasant—pleasant largely because it is profitable.

We are not statesmen if we do not look beyond the hour and note the necessities of our country when, 60 years hence, this country shall have a population, as estimated by our Census Bureau, of 200,000,000 souls. That this number—yes, twice this number—may be easily fed from the products of our American farms can be doubted by no one who has given the question of intensive farming a careful study. But to do this the fundamentals of farming must be better understood. We can not continue to deplete our soils as we have been doing for the last 50 years without producing conditions in relation to food products and food consumption which are even now becoming alarmingly acute.

We do not lack for an example as to what intelligent intensive farming will accomplish. Germany commenced 30 years ago to put the German farms in a condition that will support the German population when it shall have been doubled.

We have the statistics showing a comparison between the increased crops of Germany and those of our own country. I know how uninteresting statistics are generally, so I shall burden you but a moment with reference to this thought. It is, however, so pertinent as showing how weak we are in comparison with that energetic, virile nation that I think the figures are well worth the study of every Senator.

Within the last 30 years Germany has increased her production of rye from 15 to 29 bushels, the United States from 14 to 16 bushels; Germany increased her production of wheat from 19 to 30 bushels, the United States from 13 to 15 bushels; Germany increased her production of barley from 24 to 39 bushels, the United States from 24 to 24.3 bushels; Germany increased her production of oats from 31 to 59 bushels, the United States from 28 to 30 bushels; Germany increased her production of potatoes from 115 to 208 bushels, the United States 98 to 100 bushels.

This statement is so full of meat that I wish to give to the Senate these figures in percentages:

The German increase in rye in 30 years was 87 per cent, the United States 10 per cent; in wheat 58 per cent, the United States 14 per cent; in barley 60 per cent, the United States 1 per cent; in oats 85 per cent, the United States 6 per cent; in potatoes 80 per cent, the United States 7 per cent.

Mr. President, Germany has an area equal only to the three States of Minnesota, Iowa, and Missouri, but she produced three-fifths as much oats, four-fifths as much barley, three times as much sugar, six times as many potatoes, and nine times as much rye as we produced in the whole United States.

Let me state it in another way. In 1907 Germany had 43,000,000 acres sowed with wheat, barley, oats, and potatoes. She harvested therefrom 3,000,000,000 bushels. We had under cultivation 88,500,000 acres—more than twice as many acres as Germany—and sowed the same crop. The American farmer harvested only 1,875,000,000 bushels. In other words, from less than one-half the acreage Germany harvested nearly double the number of bushels that we did.

If from the land we devoted to oats, barley, and potatoes the American farmer had produced the same per acre as was produced in Germany, we should have been richer by $1,400,000,000 annually.

Mr. President, these are most unpleasant statements to be made, in view of the fact—for fact it probably is—that within five years—perhaps within one year—we shall be confronting the world in that great race for commercial and industrial supremacy which will decide the all-important question as to whether we can or can not maintain that high standard of education, of living, and of wages which the American people are now enjoying.

HOME ECONOMICS.

It is probably true that those who have not studied this measure carefully have failed to note that it takes cognizance of the home, and that, while bearing more directly on the farm proper and the industries, it does not neglect the mother and daughter.

I believe that all will agree with the statement that a good, cheerful, well-kept home, presided over by an intelligent woman, educated along both general and practical lines, is a desideratum much to be coveted.

All must live in some kind of a home. It is there that the chief happiness of mankind is found. It is there that character is developed. No great advance, spiritual or mental, is possible which does not begin with the home. It has been said that the hand that rocks the cradle rules the world. Is it not then true that in the final analysis the home makers of America are the makers, the builders, of the Nation?

Every girl is a potential mother. Every mother should see to it that her girl has the best obtainable education for life, including some knowledge of her peculiar functions and some specific preparation for playing well her part in that dominion over which she rules.

Under the terms of this measure provision is made for the education of the girls as well as the boys along the practical lines of life. The girls are to be so educated that they grow up to be good mothers, good home makers, good housekeepers, and it

is for these reasons that this measure recognizes this great problem of home economics by providing that the Federal Government shall aid in the preparation of teachers to go forward with this most important work.

We should all rejoice in the fact that home economics is rapidly assuming the prominent place which it deserves in all the schools which girls attend, from the elementary to the collegiate.

What greater problem confronts us to-day than that uplift of our women which must begin with the uplift of our girls?

The statistics show that 600,000 infants under 2 years of age annually terminate their little span of life and that 5,000,000 people are every year made ill by preventable diseases. It is also unquestionably true that millions more fail to reach their best physical development because their fathers and mothers do not understand how properly to care for them during the period of childhood.

Have we not quite too long been inclined to regard all efforts intended to bring about a higher status in the social ranks of the American woman as of secondary importance, and should we not at once begin, if only from an economic standpoint and for no other consideration, to promote the study of domestic science?

With the knowledge which I believe this bill will give, a large per cent of these 600,000 infants could be saved and the physical standard of those who reach mature years be immeasurably raised. Without this knowledge thousands of homes will be wrecked, thousands of lives ruined, and hundreds of thousands made unhappy for no other reason than that the homekeepers of our country have had no adequate training in that most important of all duties, the making of a well-regulated, intelligently-conducted household.

Home economics, or the science of homemaking, represents a much more comprehensive training than one would believe who has not given the subject considerable thought.

Speaking broadly, it includes all improvements in the conditions of home life. It includes cooking, vegetable gardening, household sanitation, household bookkeeping, and the making of clothing and articles for household use.

It proceeds upon the supposition that the good homemaker should understand ventilation, hygiene, and prevention of preventable diseases, home nursing, the preparation of food for invalids, first aid to the injured, the care of children, house planning, house decoration, a knowledge of the value of those foods which enter into daily consumption, and how to so buy and utilize them as to eliminate waste.

In short, the young woman of to-morrow will not occupy the high position which she is entitled to fill unless she is fitted to prudently and economically manage her household affairs when she becomes a wife and mother, and to have such a full understanding of household administration as will enable her to carefully plan, as one must do who provides for and presides over a household and who has charge of the family living expenses.

So far as I recall, all the important women's organizations and associations of this country have indorsed this measure. Time will not permit a reference to many of these indorsements, but I am going to crave the indulgence of the Senate while I refer to one or two of them.

The National Women's Trade Union League of America, of which Mrs. Raymond Robins is president, at its recent meeting, passed resolutions unqualifiedly indorsing the bill now before us. I quote from those resolutions:

> Whereas the National Women's Trade Union League, realizing the importance of and need for vocational education, to be established in our public schools, urged upon the educational authorities throughout the country to establish trade, technical, and vocational education in connection with our public schools and has worked toward that end, and
>
> Whereas additional funds are needed in the States to carry on this work in our schools, and
>
> Whereas there was introduced in the last Congress a bill recommended by the Commission to Consider National Aid for Vocational Education, appointed by President Wilson February, 1914, to provide for Federal aid: Therefore be it
>
> *Resolved*, That the Women's Trade Union League in convention assembled indorse this bill known as the Smith-Hughes bill, providing for an appropriation by Congress to stimulate and aid the States in establishing and extending vocational education in our public schools, and urge upon the next Congress the enactment of this legislation.

We have in this country a strong organization known as the American Home Economics Association. They have recently held their annual meeting at Seattle, and among the subjects there considered at length was this measure. Let me read the resolutions passed by the association at that meeting:

> *Resolved*, That the members of the association heartily approve of the purpose and scope of the Smith-Hughes bill now before the Congress of the United States, which provides (1) that Federal grants of money, to be supplemented by equal appropriations by the individual States, be given for the training of teachers of home economics, agriculture, and trade and industrial subjects. * * *
>
> *Resolved*, That the committees of the United States House of Representatives and the United States Senate having the Smith-Hughes bill in charge be asked to report this bill promptly and favorably to Congress at the opening of this coming session.

Arthur D. Dean, chief of the division of vocational schools for the State of New York, is responsible for this thought:

> We are only at the beginning of a new conception of woman and her work. She will be educated only as she is the master of herself and master of her job. Master of herself in the sense that she must know her possibilities as a woman, of splendid health, of personal power, and of genuine poise; master of her job only as she is fitted for a God-given motherhood and a community-given vocation.

Charles Wagner gives expression to substantially the same thought in the following language:

> The more woman shall have learned to live by herself the better she will occupy her position in wedded life should she marry. Trained to direct herself, to earn her own living, capable of energy and decision, a woman, if she marries, brings a precious cooperation to her husband. If she never marries, she will know how to be all sufficient to herself.

It is coming to be more and more realized that we must give to our girls a training different from that with which we now provide them if crime, disease, divorce, and race suicide are not to continue to increase, as they have for the past 25 years, to an extent which will speedily make our moral conditions unbearable.

Not until this bill is passed will the essential movement toward better home making and toward a better understanding of all the duties of motherhood be accelerated and women be accorded that higher status in the social ranks of our country to which they will be then entitled.

COMMERCE AND THE INDUSTRIES.

I have already given to the Senate a history of some of the more important appropriations made by Congress providing Federal aid to schools of college grade. I have referred to the claim sometimes made with reference to the constitutionality of appropriations of this kind. I have referred to the bill as it will affect agriculture and the maintenance of equilibrium between urban and rural life. I have referred to the bill as it will affect household arts, or home economics.

I now wish to call the attention of the Senate to that feature of the measure which seeks to promote the welfare of the boy and girl whose parents are engaged in commerce and the industries, and in many respects I regard this as the most important feature of the measure, because it is closely interrelated with the all-important question of good citizenship.

In the trade and industrial schools an education must be given the boy which will fit him for useful employment or for such trade or industrial pursuit as he may decide to enter upon; and under the terms of this bill it is contemplated that after the boy has left home and becomes a wage earner he shall attend a part-time or evening school covering not less than 144 hours of instruction per year.

The bill contemplates that in the cities education along the lines of trade and industries shall include such lines of work as shall fit the girl to enter upon employment that will be vastly more remunerative than that which she is able to secure if she has had no opportunity to educate herself along the lines of work she designs to follow.

Whether the laboring man is or is not receiving his share of the great prosperity of our country at this time it is not now necessary to discuss. He believes he is not, and that belief has ripened into a conviction so strong that the present-day tendency toward socialism is confessedly alarming, and we ought to pass this measure, if for no other reason than that it will appeal to the laboring men of our country as evidencing our purpose to deal justly with them.

Our recent labor troubles in Colorado and West Virginia furnish all the evidence we need that this problem is so great and so acute as to demand the best thought of our greatest statesmen.

We must not invade the rights of property nor trench upon that provision of the Constitution which says that no man shall be deprived of life, liberty, or property without due process of law.

But it is lawful to tax the wealth of this country for purposes of education, and the careful student of political conditions to-day is unable to find any way to distribute a part of the great prosperity of the wealthy for the benefit of those less favored as practicably and as equitably as to expend it for education. I think we are all agreed upon this point.

But when we reach the next step we confront conditions which thus far have proved insurmountable. One man may lead a horse to water, but a thousand can not make him drink. We may offer to the laboring man a better education for his children, but it is most difficult to induce him to avail himself of the offer unless he can see some practical benefit growing out of the great sacrifice he has to make in taking his child from the

ranks of the family breadwinners and continuing him after the age of 14 in the public schools.

Far be it from me to place any obstacles in the way of a college education for every boy whose financial condition is such that he can take a college course.

Speaking for New England and her colleges, I am only too glad to testify to the power of their usefulness and their leadership. The men and women of New England have worn homespun that the colleges for the education of their boys might continue to live. The best blood of her sons has peopled the plains and cities of the West. Long may they live, and may the power of their usefulness and leadership continue.

But, Mr. President, we must not fail to take cognizance of the fact that less than 2 out of every 100 of our American boys and girls ever reach the college or the university. Indeed, more than nine-tenths of them never pass from the elementary school to the high school or academy.

The fathers of those boys who labor in the factories, the workshops, and the quarries—and, indeed, we might add, the sons themselves—fail to see how benefit can come to the boy by the study of Latin, algebra, physics, history, and the long list of cultural studies which he finds in the curriculum of the high school. It is now generally conceded that the only way in which the average boy, after passing through the elementary grades, can be induced to continue his school life is by showing him that what he is to learn, if he will continue his school life, will enable him to command a better wage when he goes out into the world to participate in the great struggle for bread and butter.

He is slow to see that there is any practical value in the abstract study of mathematics, chemistry, physics, and languages; but by beginning with a study of machinery, if he is to be a machinist, he will quickly be brought to see how a knowledge of each of these branches will better equip him for work along the line he has chosen. If he is to be a farmer, it does not take him long to see that a knowledge of the fundamentals of farming will make farm life more pleasurable and more profitable, and that to him is the ne plus ultra of his ambition.

Mr. President, there is probably no subject which should command the earnest thought and consideration of the people of this country more than the great danger surrounding the average boy in our larger cities and towns when he reaches his fourteenth year and goes out into life from the elementary school. This is especially true of the sons of those men who work in the factories, the mills, and the quarries. In a majority of these cases it is probably true that the father is unable to find employment for his 14-year-old son in the shop or quarry where he works, and the boy is too young to be sent away. If, as provided in this bill, he could at that age be given a vocational training so as to keep him in school for another two years—and it is generaly conceded that this could be done if the nature of his studies were along vocational lines—he would be removed in a large degree from the temptations which surround the boys not thus favored.

Our reformatories and jails are filled with mere boys. Statistics show that the maximum age for malicious mischief is 14; for petty larceny and assault, 15; for crimes against property, 16; for fornication, 17.

This means that early and middle adolescence is the great crime period.

Judge Pinckney, of the New York juvenile court, is authority for the statement that apparent neglect and incompetency are responsible for most of the delinquency which brought into his court three-fifths of the 12,000 children who have passed through it during his incumbency of that office.

Judge McAdoo, when chief magistrate of the New York City municipal court, in making his annual report, used this language:

> There is growing up in this city a menacing army of boys and young men who are the most troublesome element the authorities have to deal with. From the ranks of these lawless, reckless rowdies, who are organized in bands or bound up with chums or pals, come most of the crop of burglars, truck thieves, holdup men, and other criminals and dangerous characters.

The Toronto Globe, one of the leading journals in Canada, in commenting upon Judge McAdoo's report from which I have above quoted, insists that the industrial school is the most effective preventive of these criminal conditions. When we consider the extensive and fearfully expensive ravages of crime, and realize that they could be largely prevented by taking charge of the boy in his fourteenth year, and throwing around him the educational safeguards which would unquestionably come from a school life during his fourteenth and fifteenth years, are we not guilty of criminal neglect in this matter? Are we not inexcusable if we fail to do what we can to throw around him that care and guidance of which he is now deprived? I do not believe the measure of our neglect is either known or appreciated by many of us who are responsible for the conditions to which I have referred.

From the Herald, of this city, I clipped the following statement concerning conditions in New York City:

> One person out of every twenty-three in Greater New York was arrested or summoned to court for an offense against the law last year. One out of every thirty-one was convicted of a crime. One out of every twenty thousand was murdered.
>
> These figures are based on police department records. The actual statistics are as follows:
>
> Persons arrested or summoned to court, 212,452; number convicted, 161,121; murders committed, 246; murderers who committed suicide, 27; arrests in white-slave cases, 65.
>
> The population of Greater New York, according to the police census, is, in round numbers, 5,000,000.

The fact is almost unbelievable that one in each thirty-one of the entire population of New York was convicted of crime in the year 1915. I do not know what percentage of crimes are detected and the perpetrator convicted, but I presume not one-half. If that is so, one in every sixteen of the population of New York City last year was guilty of crime, and if Judge Pinckney and Judge McAdoo are correct, the greater part of these crimes would have been preventable had we taken these young men at the age of 14 and given them a training in some school which is a preparation for life.

Mr. President, there is quite a general belief on the part of the great financiers of this country that when the present European war shall have terminated the United States will be confronted with a war for commercial supremacy the like of which has never been seen. In that war our great superiority in the matter of capital will be unquestioned.

Our inventive genius has enjoyed, and will continue to enjoy, a world-wide supremacy. Our supply of raw material—coal, iron, copper, zinc, lumber, and oil—will be, on the whole, equal—probably superior—to that of any other country in the world. Our water power, developed and undeveloped, is probably not surpassed on the face of the globe. Where, then, will be our economic weakness? Unquestionably in the matter of the efficiency of our labor.

For the last 20 years—perhaps, more especially, for the last 10 years—Germany has been producing a higher class of skilled labor, taken as a whole, than any other nation on the face of the globe. Any young man applying for a position at a shop or factory in this country where expert skill is required has only to say, "I received my education in Germany" and he has an open sesame to any manufacturing position. The American boy may be just as bright or even brighter than the Teuton, but, while the German boy has been taken at the proper age and given a vocational training that makes him a finished product, the average American boy at the age of 14 is turned loose upon the country with an education that simply fits him to be a failure.

It is said that in Germany every boy, even to the sons of the Emperor, must learn a trade. Every boy there is assisted in that finest of all endeavors, the effort to find himself, to decide what he is good for, what trade he should pursue, what calling he is best qualified to fill; and when this has been done Germany takes him in hand and, having in view the one great purpose of conserving her most valuable asset, the German boy, gives him an education along vocational lines that fits him, to an extent unequaled by any other nation, to be a skilled, intelligent artisan.

The extent to which we change our conditions by increasing the efficiency of our boys in vocational education will measure the degree of our success in our industrial struggle for commercial supremacy in the next decade.

Is it not probably true that the only way to curb the growth of socialism and anarchy in this country is by following the example of Germany in giving to every one of our boys an education which fits and equips him to stand upon a higher plane in the tremendous struggle which the laboring men of this country are to-day making for better homes, better standards of living, and last—and more important than either—a better education for their children?

If I am wrong I beg to be pointed to some better way to treat this subject, than which, in my judgment, there is none more important to come before us at this session.

We must look for our progress, and particularly our commercial success, to a higher efficiency in our shops—to a higher grade of output. We must export less pig iron and more sewing machines, less steel billets and more watch springs, less copper and more dynamos.

The great spirit of unrest is upon us. Already hundreds of thousands—yes, millions—of men in this land are asking for shorter hours and a higher wage. Something must be done.

And he is, indeed, a greater optimist than I can be, under the circumstances, who does not believe that the time has arrived when we must give to the sons of our laboring men a better education along industrial lines.

Do this, and we shall make them more self-respecting, more law-abiding, more patriotic, and better prepared to take their places in the great struggle for commercial supremacy upon which we are entering.

A leading educator has said that by industrial education we are asked to shape the lives of the children of to-day and therefore make the men and women of to-morrow.

Each year 2,500,000 graduate from our elementary schools, proud and confident of having accomplished the first great task of their lives in successfully finishing their eight years' course with credit. An equal number of children, a vast army of two and a half million, most of them only 14 years of age, leave the same schools discredited, unsuccessful, aimless, most of them having gotten no further than the seventh grade, not educated in any sense, but only possessed of the rudiments whereby real education may be acquired. They have been schooled only in how to fail.

The Iron Trade Review insists that the untrained man, when thrown out of his employment, becomes a menace to society, and adds:

> There are many young men wasting their efforts along more or less improper lines of endeavor, who would be valuable members of society if they could have had the advantage of a special training when at a suitable age. It must be made almost impossible that there be such an anomaly as an untrained man before our country can claim rightfully to afford every man an equal chance.

Mr. President, Harvard University alone has assets of more than $25,000,000. She has an annual income of more than 50 per cent more than this bill will take from the Federal Treasury in the year ending June 30, 1917, and more than half as much as it will take when we reach the maximum provided for by this measure.

I am glad that New England can boast of her Harvard, Yale, and other strong universities, and I wish them all the fullest measure of prosperity. But it must be remembered that these great institutions of learning educate less than 2 of every 100 of our boys.

The American Federation of Labor, representing, it is claimed, 2,009,082 American laborers, speaking through its president, Mr. Gompers, sets forth their attitude toward this great measure. He says:

> Under this proposed law the Federal Government, the States, and the local communities would be united in a cooperative movement to place within the reach of every boy and girl in the country the opportunity of securing both a general and a vocational education.
>
> The prosperity of a nation depends upon its industrial and commercial success, and, in respect to these, success depends upon the training and intelligence of its citizens. It is therefore plainly evident that a national educational system determines its destiny.
>
> The compilation of statistics relating to the period of school attendance by the young of the country, the study of these statistics, and the result of the limited attendance of so large a proportion of the school population which they have disclosed have attracted the attention not only of men engaged in educational effort, but the people generally. The fact that so large a proportion of the boys in the United States are leaving school at or before the completion of an elementary course of instruction; that the major portion of them are subsequently to earn a living by the work of their hands; that at an early age they seek employment, largely in unskilled industries, because they are fitted for nothing better and because they are too young to enter upon the work of apprentices, even were that possible; and that the prospects of emergence from unskilled to skilled industries is so small, is attracting attention to the problem and demanding solution.

He speaks volumes in a single sentence, which I repeat:

> The prosperity of the Nation depends upon its industrial and commercial success, and, in respect to these, success depends upon the training and intelligence of its citizens.

Mr. LA FOLLETTE. Mr. President, will the Senator yield to me for a question?

Mr. PAGE. Certainly.

Mr. LA FOLLETTE. Is it the Senator's purpose, will he kindly state, to discuss the details of the bill before he closes?

Mr. PAGE. No, sir; not at this time.

HOW THE PUBLIC REGARDS THIS MEASURE.

I think I measure my words carefully and speak with a proper regard for truth when I say that within the past six years a large portion of this country has become thoroughly aroused to the importance of a line of education which is more practical and better calculated to produce efficiency in the young men and young women of our land than is to-day resulting from the cultural studies which generally form the curriculum of our schools.

There has been a fast-growing and persistent demand for an education which better equips the American boy and girl for agriculture, home economics, commerce, and the industries. This movement had its beginning some six years or more ago, but, as in all matters of this character, progress was very slow, and no measures tending to bring about a vigorous momentum were in evidence until then, when a movement was inaugurated which has finally been taken up and indorsed by practically every organization in this country devoted to the educational uplift of our boys and girls.

It may not be amiss to mention some of the stronger of the very many associations and organizations that have indorsed and are pushing Federal aid for vocational education. They include labor organizations, boards of trade, the National Grange, the great manufacturing associations, as well as a large number of other associations devoted to social uplift.

Perhaps I might mention as among the stronger and more influential of these organizations the National Society for the Promotion of Industrial Education. Under the leadership of its president, who is none other than the honorable Secretary of Commerce, William C. Redfield, this society has taken a most prominent part in promoting the welfare of the measure before us, and during the past four years it has been a most energetic colaborer in the work of focusing the attention of the educators in this country upon the cause of Federal aid for industrial education.

Secretary Redfield, at the annual meeting of the society at Minneapolis in January last, gave utterance to the views of the organization, and with the indulgence of the Senate I wish to read a few brief extracts from his excellent address delivered on that occasion:

> The white light of war has been thrown on our national effectiveness and it has found us wanting, not merely in preparedness for war but also in preparedness for peace. We of all people have suffered too much from a somewhat feeble altruism, complacently smiling on its own moral perfection and too heedless of the stern realities of life. In America there needs to be learned a lesson of effectiveness, and one of the first steps in the learning of the lesson is to learn that we need to learn, for there proceeds in many a factory and mill and mine the rule of thumb, triumphant in its ignorance and rejoicing in the success which it works at frightful cost of human toil and economic waste. It is to the circumstances that thus hinder us from reaching that efficiency which we ought to have, which the leaders among us seek, but which too many of us decline even to consider, that we address ourselves. It is in the effort to advance the human effectiveness of America that we are met. * * *
>
> Possibly if we had to state our purpose in a phrase we should say that we wish our young people to be taught the laws of work and how to obey them. * * * We deal with life, and we seek the growth and expansion of that life into fruitfulness and security and peace. We give to economics its due place, but we insist that ethics are wedded to it, and between these united truths we recognize no divorce.

Secretary Redfield has given expression to a thought that has been uppermost in the minds of many educators for the past five years, namely—

> That while teaching the cultural and ethical we should develop the practical. There is no hostility between the two, and the time, in my judgment, is soon coming when we shall recognize no divorce between them.

As the Secretary well continues:

> Give us the brother's hand to help boys forward and the sister's smile to lift girls upward, and we are your fellow servants, here and everywhere in broad America. * * *
>
> We look for the added effectiveness of both men and mill, and we look at these two, reckoning the men far greater than the mill. We look for less waste of human effort, material, and time. * * * We look for an increase in quality and quantity of product, and a reduced repair expenses on machine equipment * * *
>
> We seek the opportunity for personal growth, the expansion of individual power, the open door to the life in which men and women might find themselves. * * * We expect to add to labor's self-respect, and give back some of its lost dignity and restore pride in good workmanship and a fine product. * * *
>
> We believe that the education we seek to promote is not class education, that it is not to educate a workman to be only a workman. It is that. It is much more than that. * * *
>
> We do not seek, as some, to educate our children into the mill. * * * It is no part of our creed and no fair inference from it that all are to be worked in the work of industry. * * * We would both train and select and give scope to every aptitude. We would, however, have them do not only with their minds but with their brains what their hands find to do.

Secretary Redfield has been the head of this organization for several years, and at the meeting at Minneapolis over which he presided, there was one of the largest and most enthusiastic gatherings ever brought together for the especial purpose of promoting the welfare of industrial education. They adopted resolutions, one of which I wish to quote because it states concretely the attitude of that great organization:

> The National Society for the Promotion of Industrial Education approves of the principle of Federal aid for vocational education for the purpose of stimulating the States to undertake this new and all-important work which it has so heartily indorsed at the last three preceding conventions.

Among the warmest supporters of Federal aid for vocational education, during the years in which I have been intimately connected with this work, has been the American Federation of Labor, an organization which to-day numbers 2,009,082 members. However divergent views may be as to some of the workings of

that great organization, no one can deny that it has at heart the best interests of the sons and daughters of the men who labor in our workshops and factories, in our mines, our mills, and our quarries.

This Federation has given to the subject of education a vast amount of study and investigation and it is not too much to say that no organization has a better right to speak as to the class of education most beneficial to the sons of the toiling millions than the American Federation of Labor.

The President of that great organization, Samuel Gompers, has for years been one of our most zealous coadjutors in this educational work. How interested he and the great organization of which he is the head are in this measure may be best shown by quoting from one of his statements:

> At the outset I may say that education is necessarily the foundation of any republic. Education is necessary to the perpetuity of any republic. It is, therefore, the essential duty of this Republic to guarantee every child an adequate education. Everybody believes in education. Differences arise not upon its value, but upon questions of what a true education should consist—who should be educated, how far and by what method they should be educated, and what persons should conduct such education.
>
> Education should deal with whatever we do for ourselves and whatever is done for us by others, for the express purpose of bringing us nearer to the perfection of our nature, and to bring an understanding of the meaning of work and its relations to life.
>
> Industrial education in the sense in which this term is ordinarily used, and in which it is now employed, means that sort of education which is specially adapted to the needs of men and women whose business in life it is to pursue some kind of handicraft. Industrial education must have to do with the facts of life and their intelligent, practical interpretation.
>
> The American Federation of Labor has been working for industrial education for more than a decade. A committee appointed in 1903 was to consider what the trade unions themselves could do to make up for the deficiency of the public schools. The members of the trade unions felt the need of industrial education. This sort of education was not provided by the public schools. The trade unions whose members paid taxes to support the public schools were not getting from those schools the sort of education which they needed to enable them to become skilled, efficient, and better paid workingmen. They were getting, in so far as they got anything at all, a sort of education which had for them very little practical value, and they therefore took under consideration the possibility of organizing a scheme of education which would be of value to them.

It is probably true that no organization is better qualified to speak or can speak with greater authority upon the subject of Federal aid for vocational education than the National Education Association.

For years that body at its annual meetings has, by resolution, indorsed this measure. At one of its gatherings it adopted the following resolution:

> *Resolved*, That while the members of this association are of the opinion that the old courses of study, which had as their chief object the giving of culture to the individual and of transmitting to him the best ideas and ideals of the past, should in no manner be weakened we nevertheless very sincerely indorse the movement to make the courses of study offered in our schools more democratic, that they may meet the conditions of our modern commercial and industrial life. However, to meet adequately these new demands imposed upon the schools of the country, additional financial responsibilities, this association appeals to the Nation and to the States for more liberal appropriations for educational purposes in order that this additional work in agriculture, in the trades and industries and home economics may be effectively undertaken.

That President Wilson, whose knowledge and experience in matters of education are probably second to that of no man in this country, heartily approves of this legislation is shown by the fact that on two occasions he has taken especial pains to place his stamp of approval upon the bill granting Federal aid for vocational education. At the time of his annual message delivered in person to a joint assemblage of the Senate and House on the 7th day of December last, he said:

> What is more important is that the industries and resources of the country should be available and ready for mobilization. It is more imperatively necessary, therefore, that we should promptly devise means for doing what we have not yet done; that we should give intelligent Federal aid and stimulation to industrial and vocational education, as we have long done in the large field of our agricultural industry.

In an address delivered by him to the Railroad Business Association in New York City on January 27, 1916, he again took especial pains to emphasize the importance of this legislation. At that time he said:

> There are two sides to the question of preparation. There is not merely a military side—there is an industrial side. And the ideal which I have in mind is this, gentlemen: We ought to have in this country a great system of industrial and vocational education, under Federal guidance and with Federal aid, in which a very large percentage of the youth of this country will be given training in the skillful use and application of the principles of science in maneuver and business. And it will be perfectly feasible and highly desirable to add to that and combine with it such a training in the mechanism and use and care of arms, in the sanitation of camp, in the simpler forms of maneuver and organization, as will make these same men industrially efficient and individually serviceable for national defense.

It must be borne in mind that the Senate of the United States has once indorsed the substantial provisions of this bill when in the third session of the Sixty-second Congress it passed the so-called Page bill, a bill which received the substantial indorsement of the educators of nearly every State in the Union.

Mr. President, I have dwelt, perhaps, more at length than is necessary upon the attitude of the country toward this measure. I regret that Senators, surrounded as they are by the immense pressure of other important official work, are quite inclined to say that they have not been able to find the necessary time to give to this most important subject the consideration it deserves.

Because this is so I have thought it best to bring to the attention of Senators the attitude of our President as well as of some of the more important educational associations and organizations of the country. If there is an educational organization in this country of any prominence which has not given to this great measure its enthusiastic indorsement, I do not know where that organization or association is.

But the indorsement of vocational education has not been confined to educators or educational associations alone. Let me refer to the opinion of an organization which has come to be regarded as one of the most, if not perhaps the most, vigorous and important associations devoted to our commercial, educational, and industrial welfare—the United States Chamber of Commerce.

Senators will recall the very important annual meeting of that organization in this city during the past winter. Those who attended its meetings here realized that probably no organization in this country is working with greater power and effect for the upbuilding of that which is essential to the prosperity of our land and to the uplift of the American people than the United States Chamber of Commerce.

That organization made the question of Federal aid for vocational education one of its leading topics for discussion, and at this meeting, after an animated discussion, placed itself on record as favoring, unqualifiedly, Federal aid for vocational education. Let me quote from the resolution adopted at the meeting to which I have referred:

> The welfare of the Nation, its position among other nations, and the happiness and well-being of a great part of its citizens depend upon a great and immediate extension of vocational education. Unless its citizens who work with their hands are so trained that they can be efficient at their immediate tasks and by reason of their training can make their industrial efficiency a means for their own personal advancement, the industrial and commercial position of the United States as a nation will be progressively impaired. * * *
>
> Your committee earnestly believe that both general welfare and national welfare require that the Federal Government should at once extend its aid to the States for training in trade and industrial subjects just as it has with great success and great national benefit for many years assisted the States in agricultural instruction. It believes, too, that the Federal Government should lend its aid to the State for further vocational education for agricultural pursuits.
>
> Without the assistance of Federal appropriations and the impetus which will come after such appropriations, the States can themselves develop vocational education only very slowly. The industrial welfare of the country, however, demands all the haste that is consistent with care. * * *
>
> The urgency of the necessity that the United States as a nation should be industrially efficient in its shops and factories, as well as on its farms, appear to leave no recourse other than prompt action by Congress.

CONCLUSION.

Mr. President, in bringing these remarks to a close, I wish to emphasize what I regard as the fundamental purpose underlying this whole measure, namely, that it designs, through Federal effort, to blaze a trail which the several States may follow toward greater industrial efficiency and better citizenship for our young men and young women. Its purpose is to stimulate and encourage stronger State action along educational lines, with the central idea of promoting that equality of opportunity which this country owes to all, rich and poor alike.

It is easy to say, "Let the States do it," but it is unlikely that the States will, on their own initiative, take up this work within a reasonable time; and if, perchance, they should eventually do so, the movement will go forward at altogether too sluggardly a pace and with an accomplishment much too dilatory to meet the imperative, crying social and economic needs of this day and hour.

I am not unmindful of the fact that in certain sections of our country—notably in the public institutions of some of the large cities and in a few private institutions—some efficient work has been done along these lines; but it has been of a more or less spasmodic, intermittent, and disconnected character and is entirely inadequate to even partially solve this great problem.

Mr. President, far be it from me to assume that we have by this bill reached an absolute solution of this great problem; but I weigh my words carefully when I say that after six years of study devoted to this subject I have reached the conclusion that no other plan approaches a solution thereof so fully as this bill.

I regret exceedingly that a short, simple bill could not have been drawn to meet the requirements of the situation. I realize that Senators will quite naturally conclude that the measure is unnecessarily long, complex, prolix; but, Mr. President, this is a bill of such vast, far-reaching importance that every feature has had to be worked out with painstaking care and with most faithful attention to the multitude of details which have presented themselves.

I believe I can assure the Senate that the fundamentals of this bill are based upon well-established precedents—precedents which have been successfully worked out in the field of educational experience—and that in the formulation of the bill the best educators of this country have been taken into the confidence of the commission and their advice generally followed.

One of the stumblingblocks around which we have had to steer has been the question of State rights, or State autonomy, but I believe all objections to the bill on these grounds have been met, and I confidently assure the Senate that those educators who have studied the bill most carefully are convinced that we have in this bill one which is admirably designed to simplify and unify one of our most comprehensive and complex public enterprises—our public-school system.

Mr. President, I do not wish to be a pessimist. I love to look upon the bright side of everything with which I come in contact, especially everything pertaining to my own country. We all love her institutions, we admire her enterprise, we are proud of her inventive genius. We know that we have gathered here from all the nations of the earth an assemblage of people in whom is concentrated and from whom have been developed a Nation whose greatness has never been equaled.

But in our wonderful growth and prosperity I fear we are not taking note of the signs of the times.

In view of what Germany has been doing with respect to industrial education, I believe it is incumbent upon us to adopt a system approaching, in some measure at least, the system of that great nation, which both in war and in peace has proved itself to be the most virile and vigorous of any of the great powers of the earth.

Those who have not made a study of educational conditions find it difficult to believe that less than half of all the scholars in the graded schools in this country ever complete the eighth grade in the elementary school.

We find it difficult to believe that less than 8 out of every 100 of the boys and girls of this country are found in our high schools.

Very few of us, without confirmation, will be willing to believe that less than 2 per cent of the youth of this land are in our colleges and universities, but it is nevertheless true.

I submit that we have no right to plead economy and expense in a great national measure, the benefits of which are likely to extend to every son and daughter of the laboring men of our country, when it can be stated unqualifiedly that when the appropriations under this bill shall have reached their maximum the annual expense to the American people will actually be less than 7 cents per capita.

The land-grant colleges established under the Morrill Act alone draw annually from the Federal Treasury $8,000,000 in round numbers. The heads of these great organizations have come to Congress repeatedly and asked for generous aid from the Federal Treasury, and they have never asked in vain. Congress has always responded with a liberality that is noteworthy in providing for the scholar of college grade, but the sons of the millions who toil in the industries have seemed to have few friends at this court. For the past six years we have been turning a deaf ear to his entreaties, while pouring with lavish hand into the treasuries of those institutions which educate his more favored brother. Our action has been little less than criminal. It certainly has been unwise.

I find no fault with the liberality shown to the Morrill land-grant colleges. The moneys granted to them have been well invested and to-day are bringing forth fruits fully justifying our generosity in that direction. We have acted wisely in what we have done, but our action has not been commendable in what we have neglected to do.

The problem with which we must to-day deal is that of providing an education which gives efficiency to the boys who, because of the financial condition of their parents, are unable to reach even a high-school grade, and they constitute 92 per cent of all our boys.

To-day, at the rate of a million a year, they are either entering the industries poorly equipped for anything but failures, or worse still are being turned loose in our great cities to enter upon that life of crime which is too often the accompaniment of idleness.

I firmly believe that if this legislation should be enacted, the conditions would be such that instead of finding only 2 per cent of the boys of this country in college or university, five to ten times that percentage would either be found there or in some of our technical schools which fit the young man to go out into life as a foreman, or leader, in the more important avenues of trade and commerce.

Educators are fully agreed upon this very important point. In some way or other we must so manage our educational affairs that these two added years of educational life shall be given to these boys, because upon these added years depend the efficiency or inefficiency of this Nation in the generation that is to follow us.

I believe that those broad-minded, patriotic educators of our country who have given this measure careful consideration are convinced that the great work of educating along agricultural lines boys of college grade, as provided by the land-grant-college bill of the distinguished Morrill, is now to be admirably supplemented by this act—an act which provides for the stimulation of vocational education among scholars of less than college grade.

Mr. President, I wish to say a few words upon the subject of good citizenship, for I believe that the subject is closely allied to this measure.

In my judgment, any bill the chief purpose of which is the formation of character and citizenship is not unconstitutional, because good citizenship is an absolute sine qua non for the general welfare and the common good.

The very foundations of good citizenship lie in a loyal, contented, intelligent, and prosperous people. Can it be possible that in trying to conserve and build up a better citizenship we are doing an unconstitutional act? I do not believe it.

Mr. President, I believe the American Congress has a most important duty to perform with reference to the young men who will soon constitute our citizenship. I fully agree with Raymond Robins, the social expert, touching this matter when he insists that the old line of social division by income, profession, and family is gone.

That line, he says, is horizontal. "Above it are all those who live by wits; below it are those who live by labor. Already it is more than a line; it is a crack, a cleavage; and unless that cleavage is bridged in the next 10 years, it will never be bridged in our time."

I believe with Raymond Robins that we must reach down and lift those American boys who are below the horizontal line and give them places above that line.

I submit, Mr. President, that this can be done in no way so well as by vocational education—indeed it is probable that there is no other way in which it can be done at all.

A condition and not a theory confronts this Government to-day. If our citizens of the generation upon which we are now entering are unable to earn a decent livelihood and give their children such an education as will equip them to run the race of life with a fair measure of success, it will be impossible to convince them that they are receiving that equality of opportunity to which they are certainly entitled and without which they can not long remain true and loyal citizens.

We have received into this country hundreds upon hundreds of thousands of wholly uneducated people who have grown up under a monarchical form of government—people who have come here that they and their children may enjoy the beneficence of this great, rich, prosperous Nation.

We can assimiliate them into our political system but slowly at best, and their loyalty to our country and its flag will depend very largely upon whether they do or do not come to believe that they are receiving a fair and just division of the prosperity with which our land is blessed.

We can not pension them, and there is no legal way in which we could, if we would, distribute to them the accumulated property of the thrifty and prosperous of our land.

In my judgment, the only possible way to show to these people that this is a country whose institutions they should love and respect, that it is a country which deals fairly by all its citizens—rich and poor, alike—is to reach down and take the hands of their children and lift them, through education, to a higher plane of living.

The education we must give them should be in considerable measure cultural, because it should lay the foundation for a broad, general intelligence. They should be given that all-around education which our graded schools afford. But they should be given more than this; they should be given those elements of industrial education which will enable them to go

out into the world more efficient men and women, with that larger earning power which shall enable them to take their place in the great race of life alongside their more highly favored and better educated brother.

We have heard a great deal recently, and rightly so, concerning the subject of preparedness. Preparedness, as I believe we have all come to clearly see, is of two kinds, military and economic. This measure has for its particular purpose, and lays stress upon, economic preparedness.

In the fierce competition in the commercial and industrial field which must of necessity confront us after the close of the great struggles now going on in Europe, the issue will be decided, in my opinion—and in this I believe I am not alone—in favor of that nation which has best equipped itself to produce the highest quality of output at the lowest cost compatible with the well-being and resulting contentedness of the workers.

We have seen what other countries were doing along the lines of economic preparedness prior to the outbreak of the great war, and how lacking we have been in this respect. Is it not now time for us to make the start, already too long delayed, by at once passing this bill?

Every Senator who has studied the American boy—and most of us have done so—knows that he does not stand still. He is either progressive or retrogressive. Inspire him with faith in himself, and he puts forth his best efforts to succeed.

To learn more is to earn more, but under existing school conditions the opportunity to learn more about the practical side of life does not exist. To correct this defect is one of the main purposes of this bill. We must bring into existence schools which will give the average boy that poise and confidence which his progressive nature demands, and which he, as a prospective citizen of this country, is entitled to receive.

There is something wrong in any school system which drives the average boy away from school life at the very time when he should be beginning to realize the great importance of education; but that is just what our present system of education does.

To say that it is the boy's fault is futile. It is the fault of the curriculum of our schools in that it repels rather than attracts the average boy; and we shall never change this until we introduce into our school system a greater or less measure of vocational education.

Wise statesmanship is the kind that looks forward and foresees results that come from present conditions.

We need only look beyond the dust of an hour to see that if something is not done to improve our citizenship our political fabric will be shaken to its foundations.

In an educated and prosperous citizenship is our only safety.

In my judgment prosperity can only follow education, and the education which we offer must be of the kind our boys and girls will accept or it may as well not be offered.

Experience shows that our American boys and girls will accept vocational training, and we shall be criminally shortsighted if we fail to give it to them.

Vocational education, more than any other agency, will augment and intensify the desire for more knowledge. It will unquestionably arouse into action thousands of boys possessing latent ability and talent, and with their desires whetted for still greater knowledge every institution of learning now in existence will become the direct beneficiary of the joint action of the Nation and the State in providing, as here proposed, a stable foundation upon which can be builded a broader education.

Mr. President, I believe vocational education is as certain to come as the sun is to rise and set, but it will come 10, 20, or 30 years later than it should if the Federal Government does not go ahead and take the initiative in this work.

Mr. President, the occupied man is a good citizen. It is easy for the agitator to call the idle man to deeds of violence and anarchy, but the agitator is not able to lead the honest arm from the anvil and the plow to deeds of destruction.

I believe it is within our power to so legislate that all the people, or practically all, may have an honest occupation—a vocation—an opportunity to earn a livelihood, an opportunity to obtain, through pleasurable labor, the wherewithal to supply the legitimate, reasonable, frugal demands and desires of mind and body.

Dollars and cents should not be placed in the balance over against right and duty in considering this movement for the benefit of the children of those who toil on our farms and in our mills, our mines, our workshops, and our quarries.

In our efforts to be prudent let us not be unjust.

Mr. President, no stone has been left unturned to bring this important measure to the attention of every leading educator in this country. I have personally written to every State superintendent of public instruction, or State superintendent of education, in this country. A copy of this bill has been inclosed, with a request for careful examination and criticism. I have written with the same request to the different boards of education of the country, to the principals of all the normal schools, to all the heads of State agricultural colleges, and to the deans of the different experiment stations connected therewith. I think it may be truthfully stated that more than 90 per cent of all replies received have approved the fundamentals of this bill.

I need not say that so far as I am concerned the work has been a veritable labor of love. I wish my brother Senators could spare the time to study its provisions carefully, and try to see the very great importance of its passage during this Congress. In my judgment it is to the great body of the American people the most important piece of constructive legislation now before Congress.

Mr. President, with the leave of the Senate I will append without reading certain tables showing what each State will receive, together with the summary of the grants to be given under this bill.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

Table showing amounts which each State would receive for the salaries of teachers, supervisors, or directors of agricultural subjects under the proposals of the commission.

[Allotments in proportion to the total rural population according to the last preceding United States census. Each State is guaranteed not less than $5,000 for each year prior to the close of the fiscal year 1921-22, and not less than $10,000 for each year thereafter.] [1]

State.	Rural population.		Allotment, 1915-16.	Maximum allotment, 1923-24.	Special allotment, to guarantee $5,000 to each State in 1915-16.[2]	Special allotment to guarantee $10,000 to each State in 1922-23.[2][3]
	Number, 1910.	Percentage distribution.				
Alabama	1,767,662	3.58	$17,900	$107,409		
Arizona	141,094	.29	1,450	8,700	$3,550	$2,750
Arkansas	1,371,768	2.78	13,900	83,400		
California	907,810	1.84	9,200	55,200		
Colorado	394,184	.80	4,000	24,000	1,000	
Connecticut	114,917	.23	1,150	6,900	3,850	4,250
Delaware	105,237	.21	1,050	6,300	3,950	4,750
Florida	533,529	1.08	5,400	32,400		
Georgia	2,070,471	4.20	21,000	126,000		
Idaho	255,696	.52	2,600	15,600	2,400	
Illinois	2,161,662	4.38	21,900	131,400		
Indiana	1,557,041	3.16	15,800	94,800		
Iowa	1,544,717	3.13	15,650	93,900		
Kansas	1,197,159	2.43	12,150	72,900		
Kentucky	1,734,463	3.51	17,550	105,300		
Louisiana	1,159,872	2.35	11,750	70,500		
Maine	360,928	.73	3,650	21,900	1,350	
Maryland	637,154	1.29	6,450	38,700		
Massachusetts	241,049	.49	2,450	14,700	2,550	
Michigan	1,483,129	3.01	15,050	90,300		
Minnesota	1,225,414	2.48	12,400	74,400		
Mississippi	1,589,803	3.22	16,100	96,600		
Missouri	1,894,518	3.84	19,200	115,200		

[1] The amounts are based on the census of 1910. They would, of course, be changed somewhat by the census of 1920, for all allotments after that year.

[2] Since the total appropriation to the States is increasing each year the amount of the special allotment to the smaller States necessary to guarantee $5,000 annually and $10,000 annually will, of course, decrease each year.

[3] Based on the apportionment of $2,500,000.

Table showing amounts which each State would receive for the salaries of teachers, etc. under the proposals of the commission—Continued.

State.	Rural population.		Allotment, 1915-16.	Maximum allotment, 1923-24.	Special allotment to guarantee $5,000 to each State in 1915-16.	Special allotment to guarantee $10,000 to each State in 1922-23.
	Number, 1910.	Percentage distribution.				
Montana	242,633	.49	$2,450	$14,700	$2,550	
Nebraska	881,362	1.79	8,950	53,700		
Nevada	68,508	.14	700	4,200	4,300	$6,500
New Hampshire	175,473	.36	1,800	10,800	3,200	1,000
New Jersey	629,957	1.28	6,400	38,400		
New Mexico	280,730	.56	2,800	16,800	2,200

Wyoming	145,965	.16	800	1,600	4,200	8,400
Total, United States	91,972,266	100.00	500,000	1,000,000	44,200	88,400

[1] The amounts are based on the census of 1910. They will, of course, be changed somewhat by the census of 1920 for all allotments after that year.
[2] Since the total appropriations to the State is increasing each year, the amount of the special allotment to the smaller States necessary to guarantee $5,000 annually and $10,000 annually will, of course, decrease each year.
[3] Based on the apportionment of $1,000,000.

Summary of proposed grants to be given to the States.

Year.	A. Toward salaries for agricultural teachers.	B. Toward salaries for trade and industrial teachers.	C. For training of teachers for vocational work.	D. Federal board of vocational education for administration, investigation, studies, etc.	Total for each year.
1915-16	$500,000	$500,000	$500,000	$200,000	$1,700,000
1916-17	750,000	750,000	700,000	200,000	2,400,000
1917-18	1,000,000	1,000,000	900,000	200,000	3,100,000
1918-19	1,250,000	1,250,000	1,000,000	300,000	3,700,000
1919-20	1,500,000	1,500,000	1,000,000	200,000	4,200,000
1920-21	1,750,000	1,750,000	1,000,000	200,000	4,700,000
1921-22	2,000,000	2,000,000	1,000,000	200,000	5,200,000
1922-23	2,500,000	2,500,000	1,000,000	200,000	6,200,000
1923-24	3,000,000	3,000,000	1,000,000	200,000	7,200,000

The maximum in each case above is continued annually after 1923-24.

DEATH OF EX-SENATOR THOMAS M. PATTERSON.

Mr. THOMAS. Mr. President, it is my sad duty to announce to the Senate the death of one of its former Members, the Hon. Thomas M. Patterson, of Colorado. Senator Patterson was one of the most striking as he was one of the last of the prioneer statesmen of the Rocky Mountain west. He removed to Colorado from Crawfordsville, Ind., in 1872, and at once attained to a prominent position at the bar; a position which he maintained until his voluntary abandonment of the active practice for the broader and more influential field of journalism, a field which he occupied from 1890 to 1914.

Senator Patterson was the last Delegate to Congress from the Territory and the first representative for the full term from the young State of Colorado. In conjunction with the Hon. J. B. Chaffee, the first of our Senators, he secured the passage, during its closing hours by the House, of the Colorado enabling act in 1875, and at all times took a prominent and active part in public affairs, both State and national. He was chosen by the Colorado General Assembly of 1901 to the office of United States Senator, qualified on the 4th of March following, and served for the ensuing six years. He was at all times one of its useful and active Members. He was the nominee of his party for the office of governor in 1888 and again in 1913, but failed of election on each occasion. He was preeminently a trial lawyer, and without exception the ablest one I ever knew. He was a useful and honored citizen, beloved by many and honored and respected by all. He was a fearless and aggressive advocate of every movement having for its object the well being of the masses and an unflinching opponent of every invasion of personal rights. No good cause ever appealed to him in vain for its champion. No bad one could ever command his advocacy.

ARMY APPROPRIATIONS.

Mr. CHAMBERLAIN. I ask that the consideration of the Army appropriation bill be resumed.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 16460) making appropriations for the support of the Army for the fiscal year ending June 30, 1917.

The VICE PRESIDENT. The pending amendment will be stated.

The SECRETARY. On page 66, line 13, after the word "manufacture," insert "and purchase."

Mr. JONES. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	James	Penrose	Swanson
Brady	Jones	Phelan	Thomas
Brandegee	Kenyon	Poindexter	Tillman
Bryan	Kern	Ransdell	Townsend
Chamberlain	La Follette	Robinson	Underwood
Curtis	Lee, Md.	Shafroth	Vardaman
Dillingham	Lodge	Sheppard	Wadsworth
Fall	McCumber	Sherman	Warren
Fletcher	Martine, N. J.	Smith, Ariz.	Williams
Gallinger	Norris	Smith, Md.	Works
Gronna	Oliver	Smoot	
Hardwick	Owen	Sterling	
Husting	Page	Stone	

Mr. STONE. I am requested to announce that the Senator from Delaware [Mr. SAULSBURY] is unavoidably absent. He is paired with the Senator from Rhode Island [Mr. COLT].

Mr. KERN. I desire to announce the unavoidable absence of my colleague [Mr. TAGGART]. This announcement may stand for the day.

Mr. MARTINE of New Jersey. I rise to announce the absence of the Senator from South Dakota [Mr. JOHNSON] on official business.

Mr. TOWNSEND. I desire to announce the absence of my colleague [Mr. SMITH of Michigan]. He is paired with the junior Senator from Missouri [Mr. REED]. This announcement may stand for the day.

Mr. SMOOT. I desire to announce the absence of my colleague [Mr. SUTHERLAND]. He has a general pair with the senior Senator from Arkansas [Mr. CLARKE]. I will allow this announcement to stand for the day.

The VICE PRESIDENT. Forty-nine Senators have answered to the roll call. There is a quorum present. The pending amendment will be again stated.

The SECRETARY. The pending amendment is on page 66, line 13, after the word "Manufacture," to insert "and purchase," so as to read:

Ordnance stores, ammunition: Manufacture and purchase of ammunition for small arms—

And so forth.

Mr. CHAMBERLAIN. Mr. President, the Senator from Iowa [Mr. CUMMINS] has an amendment which he intends to propose to some portion of that provision, and I ask that it be passed over until the Senator from Iowa comes in.

Mr. FLETCHER. Mr. President, I desire to say that the Senator from Iowa is attending a meeting of the Judiciary Committee.

Mr. SMOOT. I also ask the Senator having charge of the bill to allow to be passed over the amendment beginning on page 67, line 3, down to and including line 5, on the same page, as the Senator from Iowa is also interested in that.

Mr. CHAMBERLAIN. I am willing to have that provision passed over for the present.

The SECRETARY. In addition to the amendment passed over on page 66, it is proposed to pass over the committee amendment at the top of page 67, beginning in line 1, where the committee reported to strike out:

Provided, That not more than $2,000,000 of this appropriation may be used in the purchase of ammunition.

And in lieu thereof to insert:

Provided, That the Government shall manufacture at its arsenals as much of said ammunition as can be produced by the exercise of the greatest economy and efficiency.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, on page 67, line 12, after the word "war," to insert "in the expenditure of which sum the existing laws prescribing competition in the procurement of supplies by purchase shall not govern in orders not to exceed $50,000 in any one case," so as to make the clause read:

Provided further, That $250,000 of this appropriation may be used to procure gauges, dies, jigs, tools, fixtures, and other special aids and appliances, including specifications and detailed drawings necessary for the manufacture by the Government and by private manufacturers of ammunition necessary for the use of the land forces of the United States in time of war, in the expenditure of which sum the existing laws prescribing competition in the procurement of supplies by purchase shall not govern in orders not to exceed $50,000 in any one case.

Mr. CHAMBERLAIN. Mr. President, I send to the Secretary's desk an amendment, which I propose to the amendment of the committee.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. On page 67, lines 12 and 13, modify the committee amendment by striking out the words "in the expenditure of which sum" and inserting in lieu thereof "and in the purchase of lots of ammunition to complete the object of this proviso."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. JONES. Mr. President, I want to ask the chairman of the committee whether the language inserted after the word "war," on page 67, line 12, is simply a limitation on the expenditure of the $250,000 or on the $12,776,000?

Mr. CHAMBERLAIN. The way the committee amendment was framed it is a limitation on the expenditure of the $250,000. It was not intended to be a limitation on the $12,776,000.

Mr. JONES. I refer to the amendment to the amendment which the Senator from Oregon has just now proposed.

Mr. CHAMBERLAIN. The proposed amendment is a limitation on the amount appropriated for the purchase of ammunition. I will state to Senators that in the procurement of the "gauges, dies, jigs, tools, fixtures, and other special aids and appliances" there is no limitation intended to be put at all. The Government is to procure those, and $250,000 is appropriated for that purpose. The Senator from Washington will remember that that is included in the national defense act of June 3, 1916. After these are assembled the evidence before the committee showed that some of them will have to be used in one institution and some in another. Parts of the different projectiles and the different explosives used in modern warfare may be made in a half dozen places and then assembled and fitted together. The purpose of the amendment as suggested by the committee is that after these jigs, and so forth, have been purchased a factory may be fitted up and a purchase order made to see if the articles come up to the requirements. That is the purpose of the amendment.

Mr. JONES. As I understand, this provision modifying the law requiring competition in the procurement of supplies by purchase is intended to apply especially to the $12,776,000?

Mr. CHAMBERLAIN. Yes, sir.

Mr. JONES. I want to ask the Senator does the law now require competitive bids for the purchase of this ammunition, regardless of the amount purchased?

Mr. CHAMBERLAIN. Yes, sir.

Mr. JONES. And the Senator thinks that it is wise to have this provision here permitting the purchase without competition in amounts less than $50,000?

Mr. CHAMBERLAIN. I think so; there is no question about it.

Mr. JONES. The Senator does not expect that to be followed, except in a case of emergency?

Mr. CHAMBERLAIN. This is only intended to be followed in order to fit out these factories with jigs, dies, and other tools necessary to manufacture a particular article, and to give them a trial order to induce them to enter this field of manufacture. There is no inducement for a factory to put in, for instance, the appliances necessary to make part of a shell.

Mr. JONES. I understood the Senator from Oregon to say a moment ago that this limitation was intended to apply to the $12,776,000, and now he says that it is intended to apply to the purchase of these dies, guages, and so forth.

Mr. CHAMBERLAIN. No; it is not intended to apply to that; but I say that it is intended to give the War Department an opportunity, after it has purchased the dies, jigs, and so forth, to have them utilized by some factory—by more factories—and then to give them a trial order to see if they comply with the requirements of the War Department in purchases not to exceed $50,000.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, on page 67, line 17, before the word "targets," to strike out "Ammunition" and insert "For manufacture and purchase of ammunition"; and on page 68, line 2, after "$30,000," to strike out "$1,200,000" and insert "$3,494,000," so as to make the clause read:

Small-arms target practice: For manufacture and purchase of ammunition, targets, and other accessories for small-arms, hand, and machine-gun target practice and instruction; marksmen's medals, prize arms, and insignia for all arms of the service; and ammunition, targets, target materials, and other accessories may be issued for small-arms target practice and instruction of able-bodied males capable of bearing arms and at the educational institutions and State soldiers' and sailors' orphans' homes to which issues of small arms are lawfully made, under such regulations as the Secretary of War may prescribe, provided the total value of the stores so issued to the educational institutions and homes does not exceed $30,000, $3,494,000.

The amendment was agreed to.

The next amendment was, on page 68, after line 2, to strike out:

Provided, That not more than $50,000 of this appropriation may be used for the purchase of articles not manufactured by the Government and necessary for small-arms target practice.

And insert:

Provided, That the Government shall manufacture at its arsenals as much of said ammunition as can be produced by the exercise of the greatest economy and efficiency.

Mr. CHAMBERLAIN. I ask that that go over, as it involves the same question which the Senator from Iowa [Mr. CUMMINS] desires to raise.

The VICE PRESIDENT. The amendment will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, on page 68, line 11, after the word "armories," to strike out "$5,000,000" and insert "$2,500,000," so as to make the clause read:

Manufacture of arms: For manufacturing, repairing, procuring, and issuing arms at the national armories, $2,500,000.

Mr. LODGE. Mr. President, as to that amendment I wish to say that it seems to me to be a great mistake to reduce the House appropriation. That is not an appropriation looking merely to a present exigency; it involves a reserve supply of rifles, which are more necessary for the arming and equipping of a force called into the field than anything else. We are now very short of rifles, small arms. I am not going to weary the Senate with all the testimony that was given, but that testimony confirms my statement that we are very short of small arms. We ought not only to have enough to supply all the men we are likely to call into the field in case of an exigency, but we ought to have an ample reserve. The House, after hearing Gen. Crozier, put in an appropriation for this purpose of $5,000,000. That $5,000,000 can all be spent in the national armories, which are now working, under the present appropriation, far below their capacity. All these small arms could be made in our two armories at Springfield and Rock Island. Gen. Crozier, before the House committee, said:

All these rifles I would expect to manufacture in the Government plants, and the figures I have given to you for rifles would involve a daily output of about 150 rifles.

The figures given by him, I think, were $1,700,000. He continues:

Now, the capacity of the Springfield Armory on one shift is 500 rifles, and of Rock Island on one shift 250; and this would only contemplate 149 per day for both places.

It seems to me, with an absolute shortage of rifles, with the recognized need of more in order to have enough to arm the troops once, and in order to have a sufficient supply for wastage or for additional men, we ought to be accumulating a supply. As I have said, the rifles can all be made in the two Government armories, and made at the low figure of $16.50 apiece, I think. It seems to me the House provision ought to be left undisturbed.

Mr. CHAMBERLAIN. Mr. President, on a supplemental estimate made to us by the Chief of Ordnance he expresses the belief that $2,500,000 is all that will be necessary in this emergency. He advises us in a communication under date of July 5, 1916, as follows:

Two million five hundred thousand dollars will provide:
(a) For the maintenance of the Regular Army, including wastage, for the fiscal year ending June 30, 1917.
(b) For six months' maintenance of the National Guard called into the Federal service—July 1 to December 31, 1916.
(c) For the procurement of one-fourth of the reserve of small arms necessary for raising the Regular Army to maximum strength provided for by the act of June 3, 1916; for raising the National Guard from peace to war strength when at the maximum peace strength provided by the act of June 3, 1916, and for arming the reserves of both the Regular Army and the National Guard, the maintenance being in that class of matériel which is provided for by the language of the appropriation. It will not provide any arms for volunteer troops which may be raised under the act of April 25, 1914.

So that the $2,500,000 will provide all that is necessary; but if, as the Senator suggests, it is the purpose of our Government to provide for future emergencies in case it becomes necessary to call out volunteers, a larger amount might be expended with good effect for manufacturing small arms in the Government arsenals. The committee simply placed the amount at the figures indicated to meet the requirements as stated by the Chief of Ordnance.

Mr. LODGE. Well, the Chief of Ordnance stated the figures at the very lowest limit and made no provision, as the Senator has said, in case of the calling out of additional troops, as may happen, and, in fact, as has just happened on the border, and nothing for acquiring a sufficient reserve supply. I think the House, by no means disposed to be extravagant, certainly——

Mr. CHAMBERLAIN. Mr. President, let me say to the Senator that Gen. Crozier desired to have me say for him to the Senate that he testified two or three times before the House and came before the Senate Military Affairs Committee, and his statements were made under two or three changing and changed conditions, which will explain any apparent inconsistency in the statements he has made in this regard. He first testified, I think, before the House committee prior to the time the Army reorganization bill was passed. Then I think he was before the committee again after that bill was passed and before any practical estimate had been made and before the troops were mobolized or the National Guard attempted to be federalized. Then when he came before our committee the conditions at the border line were quite acute. So his statements were made under varying and varied conditions, but this last statement from him was made under date of July 5, 1916. I personally have no objection to the appropriation. I agree with the Senator that we ought to have these arms in stock and on hand when an emergency arises, but, acting upon the suggestions of the Chief of Ordnance, we thought that the amount provided would be sufficient.

Mr. LODGE. Mr. President, I am glad to know that the Senator does not disagree with my general proposition. It seems to me that we ought to have enough small arms for emergencies and enough for a reserve supply, and I hope the Senate will disagree to the amendment of the committee.

Mr. VARDAMAN. Mr. President, this is an appropriation for the Army in time of peace and not for time of war. It is the one rift in the cloud which I welcome with a great degree of pleasure; it is a sign of returning sanity, a manifestation of genuine interest in the national welfare of the men and women who bear the burden of taxation. It strikes me that the appropriation ought to be reduced, and I hope the committee amendment may be agreed to. It might be well if the policy of cutting down the appropriation should be carried through the entire bill.

Mr. JONES. Mr. President, I want to suggest that when the fortifications bill was under consideration the Senate committee increased the appropriation for ammunition—covering not only the guns for fortifications but other ammunition supplies, too—very greatly, and these increases were very largely accepted in conference and became law. Now, I think it was very wise to provide for an ample supply of ammunition, and it occurs to me that it is a mistake to cut down the provision here for securing small arms. Of course, we do not know what emergency will come up. It is thought, of course, that the conditions that led to our increasing our military force have changed very considerably; but no man who is keeping track of the events in connection with that situation can help but fear that almost at any moment an outbreak may occur that will make necessary not only the men, but the guns and the ammunition.

It seems to me we would do far better to err on the side of preparation in this case than to cut down the appropriation. I believe that the amount provided by the House ought to be retained in the bill.

Mr. CHAMBERLAIN. Mr. President, let me say to the Senator that the original appropriation made by the House was $2,000,000, after having heard Gen. Ainsworth in one of his appearances before the committee. Then, on the floor of the House Mr. HAY increased that to $5,000,000, the amount stated in the House bill. I do not know what estimates he had when he increased it; but it was arbitrarily increased on the floor of the House, just exactly as the bill as it came out of the House committee was increased arbitrarily $25,000,000 on the floor of the House without estimates, because Mr. HAY stated that he did not have estimates at that time. This cut or reduction made by the committee and suggested by me now was made after this revised estimate by Gen. Crozier.

If the Senator will refer to the House hearings, on page 746, he will find that we have something over 700,000 of these small arms now. That is more than the Army we have now in contemplation. That is, it is more than the National Guard at its maximum strength and the Regular Army at its maximum strength.

Mr. LODGE. Why, he says here that all they have in reserve and in use are 500,000.

Mr. CHAMBERLAIN. At page 746?

Mr. LODGE. Yes.

Mr. CHAMBERLAIN. In answer to a question by Mr. MCKELLAR he testified as follows:

Mr. MCKELLAR. How many have you got in reserve now?
Gen. CROZIER. We * * * shall have, next June, something over 700,000.

Mr. LODGE. He says here in reply to that question:

Gen. CROZIER. If you will let me proceed with my statement, I intended to include that figure, but it comes a few pages further on.
Mr. MCKELLAR. All right, proceed.
Gen. CROZIER. Practically 500,000. I will answer your question right now. Now, to arrive at the scheme under which we ought to proceed with the manufacture of rifles; the total force which would result from the bill as it has passed the House, when all of the organizations shall have been brought into existence, the Regular Army and the Organized Militia, and all raised to war strength, would organize into about 11 field armies.

The CHAIRMAN. How many men would that be?

Gen. CROZIER. It would be about 583,000 men carrying rifles. If we would add to that 50 per cent in rifles for wastage in the first part of the war, which we ought to be prepared to provide for at the beginning of war, it would increase the number by 291,500, making altogether 874,500 rifles. If we take from that number of rifles the number which we have now and then propose to make up the difference in about four years, it would require about 42,000 rifles to be manufactured per year.

And even on that he is only making 21,000 a year—not half of what is needed to make it up in four years. Here are these great armories running and producing 149 rifles a day, when they can make 750 rifles a day on one shift. It seems to me, with all the Government arsenals, and with a shortage of rifles, that we ought to leave that appropriation as the House wisely put it.

Mr. LEE of Maryland. Mr. President, it is a little difficult to understand just what the committee recommendations are going to be, because the Senator would not give us in advance anything in the way of a report on these reductions from the original report of the committee. Now, may I ask him what is going to be the policy of the committee in its recommendation with reference to automatic machine rifles? Are the committee going to stand by the $7,725,000 they originally reported or are they going to cut that down? That is found on page 70.

Mr. CHAMBERLAIN. Mr. President, I think it is easier for the Senate to consider these things as we come to them. I have not in contemplation now a reduction of the particular item to which the Senator calls attention.

Mr. LEE of Maryland. Mr. President, it is absolutely essential that these two items be considered together and with some sort of concurrent knowledge. We are talking about small arms. The automatic rapid-fire rifle, generally speaking, is equivalent to 60 ordinary rifles in the hands of individual men. Now, our Army is sadly deficient in respect to rapid-fire guns. Everybody knows that. The general idea is that the Mexicans are, if anything, better equipped with rapid-fire guns than our troops are.

Mr. LODGE. May I ask, are not those machine guns?

Mr. LEE of Maryland. Yes; machine guns.

Mr. LODGE. I have been talking simply about the individual rifles.

Mr. LEE of Maryland. I know that the Senator has been talking about the individual rifles; but I think we want to consider the two together, in a way.

Mr. LODGE. I do not see why we should consider them together, any more than we should consider the heavy artillery in connection with this item.

Mr. LEE of Maryland. The machine gun is the equivalent to 60 rifles, as I understand, on an average. Now, our machine guns are woefully lacking. What is going to be the policy of the committee in respect to machine guns? These two arms go together. They go together to the extent that they fire exactly the same size bullets. Now, my feeling would be that this appropriation by the House for small arms should be left as the House put it, and should not be reduced. I think the highest figure put in by the Senate committee for rapid-fire guns should be left as the Senate committee originally put that. If the Senator from Oregon is going to move to cut down the appropriation for automatic machine rifles in a few minutes, I think we ought to consider that before we agree with him about cutting down the number of rifles in the hands of individual soldiers. The two items are very close together in their nature, and if they are both going to be cut down it is doubly objectionable.

I certainly hope that the appropriation for making and issuing the individual rifles and the automatic machine guns will both be left at the highest figure provided in either bill or at any time recommended by either committee.

Mr. TOWNSEND. Mr. President, I realize something of the difficulty which the Military Affairs Committee has had in trying to arrive at a conclusion in the midst of our changing military policies. I suppose, also, that it has modified this appropriation in view of the recent developments on the Mexican border.

I am well satisfied that nothing could possibly occur which would induce the ordering of the American troops into Mexico; and I am unable to satisfy myself as to the wisdom that is being displayed, or the lack of it, in sending so many of our northern boys down to the Mexican border. Indeed, it occurs to me that it is nothing less than an outrage, in view of the facts as they present themselves at the present time.

I say I assume that the committee has had in mind the fact that the policy of invading Mexico has been abandoned, and with that policy I am not quarreling, and it seems to me that this is an item on which we could well afford to follow the committee. If we have, as has been stated here, something over 700,000 rifles at the present time, which is at least a half more than could be used under any reasonably possible conditions, we should improve this opportunity to make a saving of $2,500,000.

As the Senator from Washington [Mr. JONES] has stated, we made ample provision in the fortifications bill for ammunition, all that was asked by the War Department; and we have made provision for it in every military and naval bill that has been up. Now, to store up these small arms, as they are called, when there is no reasonably probable condition under which they could be used, and as these arms can be produced quickly, it seems to me that doubling the appropriation is entirely unjustifiable at this time, in view of the facts as they exist.

I feel very deeply about this subject of the Mexican situation, and have so felt for weeks. I am receiving letters from people in my State the writers of which have had the patriotism to permit their sons to enlist in the militia, believing that they were going to Mexico for the purpose of defending their country; that there was a demand for them at the frontier. They recognize now that these boys are being sent from northern climates down there to enter sun-struck camps on the border without any prospect of their being utilized at all in the defense of the country. These boys ought to be home under the circumstances. They ought to be returned to their schools and their various vocations at home if their country does not need them, to the things which they have given up with the thought that their country's honor and defense required their services.

While what I have said may not be entirely pertinent to the subject under discussion, it has been suggested to me through its discussion. Hence I believe, so far as I am concerned, that it is my duty to follow the committee and the War Department in this regard.

Mr. LODGE. Mr. President, I entirely agree with what the Senator has said about sending the militia to the border and keeping them there in this perfectly futile way. I wholly agree with all he has said; but my desire to retain the House provision had nothing to do with the Mexican situation. I am urging it on the ground that I think it is the utmost shortsightedness to have no reserves of rifles and ammunition.

There is not a country in the world that does not have reserves of ammunition and rifles. You do not want to be in a condition where you send your troops out and find you have no ammunition for them, and no rifles to put in their hands. It is not as if we were going into a vast expenditure and making great contracts. Our own armories are running short handed at this moment. They are cut down from their ordinary production of 750 rifles a day in the two armories to 149. We ought always to be accumulating a certain number of rifles, and it seems to me that at this time, therefore, it is unwise to make this reduction.

I did not mean to put it in the least on the ground of the Mexican crisis, if we choose to call it so—the wretched condition that now exists there. With all the Senator has said about sending the militia to the border I most cordially agree, but I do not care to debate that matter at this point. I should like to keep the House appropriation—and the House is not overgenerous—in order to secure, in somewhat less than four years, the reserve rifles which Gen. Crozier admits are necessary.

Mr. CUMMINS. Mr. President, without expressing any opinion as to the wisdom of maintaining our Army on the border of Mexico, I very much hope that the House provision will prevail and that the reduction proposed by the Senate committee will be rejected. I think this is the only instance in the bill—at least, the only one I have been able to find—in which the Senate committee has reduced the appropriation proposed by the House. It may be that there are others, but they have not fallen under my eye.

It will be observed that under the second paragraph, on page 66, headed "Ordnance stores, ammunition," the Senate committee proposed originally to increase the House appropriation from $4,500,000 to $12,776,000 for the manufacture and purchase of ammunition for small arms, and so forth, and that in the fourth paragraph, on page 67, which seems to be for about the same purpose, the Senate committee proposed to increase the appropriation from $1,200,000 to $3,494,000. But when it came to manufacturing, repairing, procuring, and issuing arms at the national arsenals the appropriation suggested by the House was $5,000,000, and the Senate committee reduced it to $2,500,000.

Mr. CHAMBERLAIN. Mr. President, will the Senator allow me to interrupt him for just a moment?

Mr. CUMMINS. Certainly.

Mr. CHAMBERLAIN. The Senator will notice this difference, however, between the manufacture of arms and the manufacture of powder: All of the material out of which the arms are manufactured is procurable in this country. In order to

create a reserve of ammunition, however, we must, in the present state of affairs, look entirely to the nitrate beds of Chile. Therefore we have largely increased the amount for ammunition, in order that there might be a storage of nitrates, a supply of which it is necessary in case of war to have on hand, because we could not get them anywhere else.

The Senator will remember that the first conflict between the British and the German Navies occurred right off the nitrate beds of Chile; and it has been assumed by some that both powers were there looking to the only source of supply that was known at that time.

Mr. CUMMINS. Mr. President, I recognize that there is a difference between the manufacture of ammunition and manufacture of small arms; but there is no such radical difference in the situation respecting the two necessities as to warrant the change that is proposed by the Senate committee. Now, let us see. If I am wrong with regard to the figures I give, I hope the Senator from Oregon will correct me, for I have not the record at hand.

It was said, at about the time we began to mobilize the National Guard, that we had from 750,000 to 1,000,000 rifles. I do not know whether that is accurate or not; but I do know—at least, I have been so advised—that when the Government began to supply the National Guard with rifles, it found it necessary to supply certain portions of the guard with rifles which had been used so long, and upon which the repairs had been so extensive, that they were practically useless in the hands of the guard. This has been reported to me by those who were in charge of this branch of the service in my own State. Our facilities for making Springfield rifles are meager at best. There is no private manufactory, I understand, in the country which produces the Springfield rifle, and that rifle is the only one in use in the Army.

It is true that we have a small supply of the antiquated or older form of rifle known as the Krag, but I do not believe the Government of the United States wants to depend upon that kind of arm. I shall therefore assume that in any difficulty we may have in the future we will want an abundant supply of Springfield rifles.

The arsenal at Springfield has a capacity, when working all the time with one shift of eight hours a day, of 500 of such rifles per day. The arsenal at Rock Island—which has not been in use at all for quite a while—has a capacity under the same conditions for the production of 250 rifles per day, making altogether a capacity, with one shift, of 750 rifles a day. Assuming 290 days in a year may be utilized at these arsenals, the number of rifles produced in both of them—and, mark you, there is no other factory in the country making Springfield rifles, and I hope there will never be a factory making Springfield rifles, for I have a view upon that subject which I have often expressed to the Senate—the entire capacity of these two arsenals at work in the manner I have described would be 217,500 rifles in a year. These rifles cost the Government, as I am advised, between $15 and $16. Assuming their cost to be $15——

Mr. NORRIS. Mr. President——

Mr. CUMMINS. I yield to the Senator.

Mr. NORRIS. My attention was diverted. It may be that the Senator has given the Senate the information, but I wanted to ask the Senator what two establishments he had reference to.

Mr. CUMMINS. The Government arsenal at Springfield and the Government arsenal at Rock Island, Ill.

Mr. NORRIS. They do not make what is known as the Springfield rifle at Rock Island?

Mr. CUMMINS. They do. Those are the two arsenals that make the latest form of rifle, and the only two.

Mr. NORRIS. Is the money appropriated in this particular item to be used in those two arsenals?

Mr. LODGE. Entirely.

Mr. CUMMINS. In them alone.

Mr. NORRIS. Those are the only two Government arsenals we have.

Mr. CUMMINS. They are the only two arsenals we have equipped to manufacture the Springfield rifle.

Mr. NORRIS. That means small arms.

Mr. CUMMINS. Of course they are equipped to manufacture other forms of weapons, and I am going to refer to that in a moment, because out of this appropriation we must not only manufacture our Springfield rifles, but we must manufacture our pistols and other small arms of that sort used in the Army.

Mr. NORRIS. May I ask the Senator a question? He said something a moment ago which indicated that, in his judgment, we ought not to manufacture the Sprinfield rifle.

Mr. CUMMINS. No; I said we ought to manufacture the Springfield rifle. It is the only thing we ought to manufacture of that kind.

Mr. NORRIS. I did not catch aright the idea then. I misunderstood the Senator.

Mr. CUMMINS. I said the Government has on hand a number of the older form, or antiquated weapon, known as the Krag rifle, and that I assumed it was not the purpose of the Government to attempt to equip the Army, or any part of the Army, with Krag rifles.

Mr. NORRIS. The rifles manufactured, I understand, at these Government arsenals are in every way up to date and the latest arm in the shape of a rifle.

Mr. CUMMINS. They are. That they are the best rifles in the world is, I think, conceded by everyone familiar with the subject. As I was proceeding to say——

Mr. TOWNSEND. May I ask the Senator, before he goes on to discuss that point, how many Springfield rifles there are in the United States to-day?

Mr. CUMMINS. It is not accurately known. I have been told there were 750,000 or between 750,000 and a million of all kinds before they began to arm the guards.

Mr. LODGE. Gen. Crozier states the number at 500,000.

Mr. TOWNSEND. How many soldiers have we now?

Mr. CUMMINS. The Senator from Oregon [Mr. CHAMBERLAIN] would be better qualified to answer that.

Mr. TOWNSEND. The Senator has some idea as to the number.

Mr. CUMMINS. I suppose we have a Regular Army of about 100,000 men, possibly a little more.

Mr. NORRIS. We are increasing it now at the rate of 42,000.

Mr. CUMMINS. And we have a National Guard which at peace strength numbered about 120,000 men. The peace strength has been very considerably increased by the transformation to a war basis. I do not know just how many members of the National Guard we have now, but I would estimate it at about 150,000 or 160,000 or 170,000 men.

Mr. TOWNSEND. Then we have certainly enough rifles to accommodate the force we have and will have enough for the next two or three years.

Mr. CUMMINS. No; I think not. I agree to the first but not to the last statement. If we consider that a single rifle is all that is necessary to provide for a single soldier, that would be true; but we are accumulating a reserve of rifles for future use. I am told that under the German policy, which is regarded as a very effective system, that Government estimates that there ought to be five rifles for every soldier.

Mr. LODGE. If the Senator will allow me, I have here the testimony of Gen. Crozier and I can read it.

Mr. CUMMINS. I would be very glad to have the Senator do so.

Mr. LODGE (reading)—

Mr. KAHN. Have you obtained any additional figures as to the number of rifles per man that have been used in the present European war?

Gen. CROZIER. None that I consider reliable, Mr. Kahn.

Mr. KAHN. As a matter of fact, however, you have discovered that one rifle is not sufficient per man over there.

Gen. CROZIER. It has been stated on something like authority that it is very far from being sufficient.

Mr. KAHN. I think when you were before the committee on the national defense bill you stated that on the average about three rifles per man would be the required number. That is my recollection of it.

Gen. CROZIER. I think a figure which I may have given went even further than that. It was stated by a German officer, who in some matters was well informed at least, that they provided five per man. I found difficulty in believing that, but that was the statement.

Mr. KAHN. So that, after all, your figures contemplate only one rifle per man?

Gen. CROZIER. I gave a set of figures here—ran over a method of computation which involves one and one-half rifles per man.

Mr. TOWNSEND. Mr. President——

Mr. CUMMINS. Continuing my answer, before the Senator further interrupts me, I am not arguing this amendment on the hypothesis that we ought to have a reserve of five rifles to the man; I am assuming that we should have but three or three and a half, and I was about to show that in any sort of contingency; that is, if we should have war, we would be helpless if we had not an accumulation of rifles that would arm such a force as might be necessary for defense.

Mr. TOWNSEND. Now, there are just one or two more questions in reference to this matter. Does the Senator know how many times the Government has changed its standard rifles in the last 20 years

Mr. CUMMINS. I know of only one change.

Mr. WADSWORTH rose.

Mr. CUMMINS. The Senator from New York can answer, and I yield to him.

Mr. WADSWORTH. I can give that information. The rifle the Army is using now is the model of 1903.

Mr. TOWNSEND. It used the Krag before that?

Mr. WADSWORTH. The Krag-Jörgensen preceded the use of the modern Springfield. There has been no substantial change made in several years.

Mr. TOWNSEND. Now, another question. The Senator from Iowa states that the capacity of our two arsenals is 750 rifles a day, with one shift. I suppose on an emergency there might be at least two and possibly three shifts. If there were three shifts that would be 2,250 a day or 23,000 in every 10 days. Does not the Senator believe that with at present a supply of at least three or four rifles to each soldier, that we have already on hand, with a possible capacity in the Government arsenals of 23,000 every 10 days, we could well afford to adopt the provision as it is here for $2,500,000 to furnish arms?

Mr. CUMMINS. No; I think it is altogether inadequate. Now, I will show the Senator from Michigan why I think so. If we were creating a reserve of rifles for the Regular Army alone, estimating it to be 100,000 strong, probably the appropriation made here would be sufficient, but we are preparing, as I understand it, for a possible war, which seems to some people likely and to other people very improbable. At any rate we are preparing ourselves for that contingency. If that contingency falls upon us we will need not three rifles for each of 100,000 men, but we will need three rifles for each of a million men. I think it would not be wise to assume that we could enter into war with our present supply of rifles.

I was about further to show that the present appropriation is not sufficient. These two arsenals have a capacity which, as I have suggested, would produce in a year 217,500 rifles, and at $15 for each one of them, if that be their cost, the outlay would be $3,262,500.

Mr. FLETCHER. I think the estimate of the cost is $16.50 per rifle.

Mr. CUMMINS. I was so advised, but just in order to deal in round numbers I placed it at $15. So at the end of a year, Mr. President, even if we continued the capacity of the arsenals working eight hours a day we would only have 217,500 rifles. Even that is an exaggeration, because these arsenals must make other small arms, and this appropriation is applicable to other arms aside from rifles. How much of it may be used in the manufacture of other forms of weapons I do not know.

It has seemed to me that the commonest prudence requires that the Government shall accumulate three or four million of these rifles for use in the emergency that we are contemplating.

The rifle is a machine of difficult and precise mechanism. The product can not be increased immediately. There is required in the manufacture of a rifle the most skilled mechanic or artisian in any form of industry I have ever known. You will readily appreciate that when you remember that the boring of a rifle must be so nice and true that the variation of an infinitely small percentage of an inch destroys the usefulness of the weapon entirely. I have stood by and watched the manufacture or boring of rifles, and no one who has not had an opportunity for that observation can have any perception of the nicety of the work and of the training and skill required in the workmen.

For these reasons we ought to have a supply of rifles on hand that will be sufficient to equip and arm a force that may be required if we unhappily fall into war. Here we are spending millions and hundreds of millions upon battleships without apparently very much reflection, but the rifle is the fundamental arm of the private soldier. He is of no consequence whatever unless he can be so armed.

One step further. It is not enough in my opinion to add to our store of rifles 217,000 per year. We ought to accumulate them much more rapidly than that. For one year at least, and this appropriation only extends over one year, we ought to operate these arsenals at least 16 hours a day, with a double shift, so that at the end of the year we might at least add to our supply of rifles something like 500,000. Even then we would have only a million rifles in reserve.

I am utterly unable to understand the economy that is sought to be practiced at this particular point. We have authorized 10 battleships that will cost when finished $200,000,000; we have authorized 6 battle cruisers that will cost when finished $150,000,000; and without even suggesting that we have gone too far in this line of defense, it seems queer to me that when we come to arm the private soldier who may be called into service if the battleship and the battle cruiser should fail, we are failing to give him the only hand weapon which he can use.

I hope, Mr. President, very sincerely that the amendment proposed by the committee will not prevail and that the House provision may be allowed to stand.

Mr. FLETCHER. Mr. President, with reference to some criticisms made by the Senator from Michigan [Mr. TOWNSEND] and concurred in to some extent by the Senator from Massachusetts [Mr. LODGE], with regard to the policy pursued in connection with the situation in Mexico, it occurred to me to suggest that perhaps it would be next to impossible for the present administration to inaugurate a policy that would meet with the cordial approval of the Senator from Michigan. The argument advanced would seem to lead to the suggestion that the boys upon the front would feel themselves much better off if they were actually across the border and engaged in armed conflict with an enemy than they are in comfortable camps on the border. Of course the suggestion would appear to lead to the position that if the gallant soldiers from Michigan were actually shooting Mexicans and being shot by Mexicans they would be much happier and their friends at home much better pleased than they are with the boys comfortably located in safe positions on this side.

However, we are inclined to believe that if the situation has developed so that instead of being obliged to spend a billion dollars for arms and that sort of thing we are able on account of the most recent conditions to save that amount of money and spend only $2,500,000 for arms, it ought to be more satisfactory, it would seem, particularly to the taxpayers of the country, than it would be to spend a billion dollars for this purpose.

The conditions are such that the latest information furnished the committee by those who are acquainted with the requirements of the Army is that $2,500,000 is sufficient to supply the needs for manufacture, repair, procuring, and issuing arms at the national armories. That section would cover, I take it, not merely the manufacture of the new model Springfield rifle—the 1903 model, which has been adopted—but also pistols and small arms of that sort.

With reference to the suggestion made as to the item of ordnance stores and ammunition, on page 66, that section applies, of course, to the manufacture and purchase of ammunition. It has no relation to arms. As has been suggested by the chairman of the committee, the situation with reference to the need of nitrate calls for an expenditure greater than was estimated by the House committee. The price of Chilean nitrate, I understand, in Chile is about $34 per ton. That includes $11 export duty charged by the Chilean Government. The freight on that nitrate from Chilean ports to the United States is about $34 per ton.

I can not help but recur to the fact that if we had passed the shipping bill in the last Congress we would have been able to-day to save to the Government on that item alone $2,000,000.

The actual ship transportation of the nitrate required by the Government if brought in ships owned by the Government would save us on that item $2,000,000 to-day. But we are not in a position to do that, and consequently the excessive cost of that material and the excessive cost of freight make it necessary to increase that item for ammunition.

Mr. JONES. Will the Senator permit me to ask him a question?

The PRESIDING OFFICER (Mr. POINDEXTER in the chair). Does the Senator from Florida yield to the Senator from Washington?

Mr. FLETCHER. I do.

Mr. JONES. If the suggestion the Senator makes is correct, why is it that the War Department desires to sell some Government transports which it has now and which could be very easily fitted up for the carriage of this nitrate?

Mr. FLETCHER. I will say to the Senator that I am not aware of that situation. I do not know whether they desire to sell transports or not.

Mr. JONES. There is a provision in this bill for the sale of two.

Mr. FLETCHER. Those, of course, are wholly unsuited for this kind of business.

Mr. JONES. I do not know whether they are or not. It seems to me they could be very easily changed for carrying this kind of commerce.

Mr. FLETCHER. I think that was taken into consideration by the department. If those transports could be used in saving the Government an outlay of freight, of course it would be proper to use them in that connection, but I presume they are transports of such a construction that they can not be used for that purpose. I understand that the Regular Army, as has been mentioned by the Senator from Iowa, would constitute about 100,000 and that the National Guard mustered in about 166,000, and the war strength of the National Guard is about 248,000. So the requirement of the Army as submitted to the committee by those in a position to know are met by the amendment of the committee to make the appropriation $2,500,000, and I believe it ought to be sustained.

Mr. TOWNSEND. Mr. President, I do not intend to answer what seems to me to be the very lame defense of the Senator

from Florida [Mr. FLETCHER] relative to the failure of the shipping bill to pass. I did not inject what I had to say on this amendment for the purpose of politics, although the Senator has made use of it for that purpose, and I shall briefly reply. I was simply stating the facts.

The Senator refers to the soldiers from Michigan and says that possibly they would be better satisfied if they were down there fighting rather than resting in the comfortable camps on the southern border. The soldiers from Michigan enlisted under what I believe now to have been a false representation to them, and this has been disclosed by the correspondence which has been published and the events which have occurred between this country and Mexico. They enlisted and went to the front because their country called them. At least they believed that the President spoke the immediate necessity of their country. They did not know that the call was political, but soon learned that there were no soldiers from Florida in the camps or on the southern frontier, and none from that State are there now. It seems to me it would have been better to have sent on this fruitless adventure troops better acclimated than to have called for the boys from the Northern States.

When there evidently was no intent in the mind of the President to enter Mexico it would have been better to send soldiers from those parts of the country adjacent to the border. They would have answered all the purposes of politics.

I am not complaining, nor have the Michigan soldiers complained whenever there has been a demand for men, but when it is now known that there never was any intent to use them in Mexico then there arose just cause for complaint. The published correspondence between this Government and the Mexican Government, together with the conduct of the expedition into Mexico, shows that clearly; and so I submit, Mr. President, that it is entirely proper for the men who went down under false representations to be sent home when there is no real need for them on the border.

I mention this in connection with the pending amendment because I believe, as has been shown by the Senator from Florida, there are sufficient small arms now, together with those provided for in this bill, to meet the immediate probable demand for such arms, and with the capacity of our arsenals to turn out arms at the rate of 23,000 every 10 days there will be no need of enlarging this appropriation beyond that provided in the bill. We could, if emergency require, supply in short time the additional arms that would be necessary, and it is possible that the arms ordered now may become obsolete before there shall be a real demand for further increase.

It was for this purpose that I made the suggestion, and I still believe the committee was wise in the provision which it has inserted in the bill.

Mr. NORRIS. Mr. President, after listening to the argument I am amazed at the action of the Military Affairs Committee in cutting down this appropriation. It developed here, Mr. President, that these two arsenals can make 750 guns a day, and you cut the appropriation in two from the bill as it passed the House, so that these two Government plants, manufacturing small arms for the Government, are not able to do more than half as much as they would if the proposed reduction did not take place.

Mr. President, we passed a bill here just a day or two ago appropriating more money for a Navy than was ever appropriated in the history of the world by any nation on earth in time of peace.

This great plan and propaganda of preparedness that has gone over the whole country and taken possession of it from top to bottom and from side to side has been on the theory that we needed to make extraordinary military preparations for the purpose of defending our homes and our firesides against the attacks of the cripples and the widows and the orphans that are coming over here from Europe at the close of the war to annihilate us and drive us off the face of the earth.

We passed a great naval appropriation bill on the theory that we were going to have a first line of defense against those people who will come over here in rafts and rowboats after their navies have been, in the present war, sunk to the bottom of the ocean. Now, we propose to leave the country at the mercy of these hordes of cripples that are going to attack us just as soon as they get through the first line of our defense. The Navy bill was passed as a part of that great system of preparation. Men were denounced as lacking in patriotism if they refused to stand for it. Now we are face to face with a proposition of the Government making a few rifles and pistols and revolvers, and we propose in a burst of economy to cut down the appropriation.

Would it be part of this propaganda of preparedness to cut down this appropriation if it were not a Government manufacture, and therefore there were no profit in it for the private manufacturers of arms? Would we not, in case these rifles were to be made by private individuals and corporations, be doubling the appropriation instead of cutting it in two?

I have just heard a noted Senator say that, if we make so many arms, they may be obsolete before they are likely to be used; and yet history demonstrates that there is nothing in the world which becomes obsolete so quickly as does a battleship. We are going to appropriate money to build battleships regardless of the fact that they may become obsolete before they are used. Let us take the argument made in favor of a big Navy and the argument which was made here last week to the effect that the building of such a Navy is an insurance policy; that we may never need the Navy, but that we had better have it ready. Everybody knows that the battleships which fought the Spanish-American War are not now much better than junk, and yet when the great plan of preparedness demands it we launch out into the building of a greater Navy than we ever dreamed of or thought about in the years that have passed. Now, however, when we come to make a few rifles by the Government, we immediately hear the cry from the same source, from the same people, who are crying aloud in distress for preparedness, that we must economize and that the rifles may be obsolete before they can be used.

Mr. President, if we may believe the argument which has been made, and which has convinced almost everybody in this country but me, that just as soon as this war ends Germany is coming over here to make us slaves, we shall not have the guns made before we shall need them. I do not suppose the European war will last more than one or two years. If it lasts much longer than that, they will have to agree on a cessation of hostilities long enough for the rising generation to become big enough to shoot. They might do that, and then resume the war on the theory that sometimes hostilities are suspended in order to bury the dead.

But, Mr. President, one or two years from now, if these factories are running to their full capacity, we shall have guns enough to supply the men whom we are now providing shall be made into soldiers to defend our homes and our firesides, and, incidentally, to defend our property against the invading hosts that are coming over here under the leadership of the Kaiser just as soon as the war is over in Europe; or perhaps it may not be the Kaiser, for the newspapers have already announced in flaming headlines, as part of this preparedness propaganda, that 35 Japanese have already landed in Mexico! Had we not better set these arsenals to work and let them get the guns ready for a Japanese invasion? I have heard it stated that 50,000 Japanese are now in California; that they are tried soldiers, veterans of the Russian-Japanese War; and that they are scattered from one end of California to the other. If we had all the Japanese in California, and scattered them over pretty well, in my judgment it would not be much cause for us to fear that those few people, even if they had the disposition to do so, would some morning, before daylight, murder the American people and take possession of the entire country from ocean to ocean. But now we have come up against a practical proposition: Shall we shut down the Government arsenals at Rock Island and at Springfield, Mass., and stop making rifles; and that, too, in the face of the fact that perhaps before the adjournment of this session we shall be at war with somebody—it does not make much difference with whom?

We have heard it said during all this propaganda that we were ill prepared for war. Hundreds of times we have read in the morning, while we trembled with fear, that, even though we had an army, we did not have any guns to put into the hands of the soldiers, and that they would have to fight with big sticks. Now, Mr. President, here is a proposition to get guns for our soldier boys in order to meet what we have been led to believe is a certainty—a mathematical certainty—that we are about to have war with somebody; and long before these battleships, for which we appropriated immense sums of money last week, can be built, long before the first line of defense can be put up according to our program, these hosts may be inside of the first line of defense. They will land in twos, in fours, and perhaps in some cases a dozen in a boat, and they will go over this country. We can not make these small arms at once. We can set these factories to going and get some small arms ready for our soldiers in the second or third line of defense. That is where the war will be, if it takes place so soon as we have been led to believe it will.

Mr. President, it seems to me that we may well keep these factories going making small arms for our soldiers. Opposed, as I have always been, to taking any course which it was claimed would get our country into trouble because it would not be prepared, I am now advocating that the Government continue to manufacture small arms—rifles, revolvers, and pistols—so that

in case of an emergency we may be prepared in that respect to meet it. This is not a drop in the bucket in this great program; but, so far as it goes, it takes the profit out of war; it takes the profit out of preparedness; and if we could carry out that policy through the entire program, not only in this country, but all over the world, we would, in my judgment, take the greatest step toward avoiding war that under present conditions perhaps could be taken.

Mr. CUMMINS. Mr. President——

Mr. NORRIS. I yield to the Senator from Iowa.

Mr. CUMMINS. I want to call the attention of the Senator from Nebraska, in line with what he is just saying, to the fact that, if he will turn to page 66 of the bill, in the second paragraph, he will find that the appropriation is increased from $4,500,000 to $12,776,000, and he will find that the House provided for the "manufacture of ammunition for small arms," but that it has been amended so as to include the words "and purchase." The Senator will also find, beginning with line 16, on page 67, the same change.

It has occurred to me that there must be some prejudice against Government manufacture of arms and munitions, for the appropriations where purchase is permitted are greatly increased and where the preparation is limited to Government activity alone it is diminished.

Mr. NORRIS. Yes. I thank the Senator from Iowa for his suggestion, which is in exact line with the point that I was trying to make, that the great preparedness propaganda—with some exceptions, of course, but, as a rule, that is behind it—is never very active in any preparation where there is not some profit in it for somebody.

I am not finding fault with the man who opposes Government activity on this line any more than on any other line; he has a reason for his belief, and I am not charging him with any lack of patriotism, or anything of that kind; but, to my mind, there are instances where governmental activity ought to take charge of certain things.

I believe that in the manufacture of munitions and arms—in fact, in nearly all the preparations for war—the making of something for which there is but one customer, and that is the Government, the Government, unless there is sufficient reason to the contrary, ought to take charge of the business and do the business. It is perfectly proper that a man engaged in the manufacture of munitions or of cannon or in the building of battleships should demand enormous profits. It is perfectly natural in case of war. He gets, of course, as is always the case in every country in every war, enormous profits. The conditions are such that he can exact them, and it is perfectly natural for every man in business to make all that he can out of the business. Without finding fault with that disposition, I think we ought to bring about such a condition of affairs by the Government engaging in the various instrumentalities which it needs for governmental purposes as to make it unnecessary for private individuals, at least to any great extent, to engage in any such business. Whatever it costs, the Government ought to pay.

In the particular part of the bill referred to by the Senator from Iowa [Mr. CUMMINS] there is another illustration of that proposition. There the bill provided originally "for the manufacture of ammunition for small arms and for hand use for reserve supply," and so forth and so on, an appropriation of $4,500,000. No profit would be made out of that, unless through the sale of some of the material out of which the article is made to the Government; but we find the bill changed, and instead of providing for the manufacture of ammunition for small arms it provides for the "manufacture and purchase" of ammunition for small arms; and then, instead of reducing the appropriation, it has been increased, multiplied by three nearly, raising it from $4,500,0000 to $12,776,000.

Mr. STERLING. Mr. President——

Mr. NORRIS. I yield to the Senator.

Mr. STERLING. Mr. President, I had supposed, perhaps innocently, that the words "and purchase" were inserted for the simple reason that the Government, with the facilities it now has in the way of arsenals and places for the manufacture of ammunition, could not manufacture more than about $2,000,000 worth of such ammunition, or, as found in the item on page 68, of arms; and I supposed it was in view of the emergency that the Senate committee made the amendment appearing in the bill.

Mr. NORRIS. To what emergency does the Senator from South Dakota refer?

Mr. STERLING. I supposed the present emergency was contemplated, the need at present for more ammunition and more arms than could be manufactured by the Government arsenals, a need which was not, I presume, foreseen by the House when it passed the bill, but meanwhile it became apparent to the Senate committee that more would be needed, much more than could be produced in Government arsenals, and, hence, they inserted the words "and purchase." That is simply my supposition. I found it partly on what occurred in the discussion on Saturday afternoon. I find, on page 11462 of the RECORD, this statement made by the Senator from Oregon [Mr. CHAMBERLAIN], who has the bill in charge:

> The Chief of Ordnance, Gen. Crozier, stated in effect that taking the $4,500,000 that was appropriated by the House, it would be impossible to manufacture in the Government establishments over about $2,000,000 of the amount.

Hence, I supposed that that was about the limit of the amount the Government could manufacture of this ammunition in its own arsenals.

Mr. CUMMINS. Mr. President, may I suggest to the Senator——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Iowa?

Mr. NORRIS. If the Senator from South Dakota is through with his interruptions, I yield to the Senator from Iowa.

Mr. STERLING. I am through.

Mr. CUMMINS. The Senator from South Dakota is probably right, so far as I know, about that part of the bill which is found on page 66. It is probably true that the Government could not manufacture in its own arsenals or at its own factories all the ammunition which would become necessary without an enlargement of its facilities; but we are now discussing the question of the manufacture of small arms, and the appropriation proposed by the Senate committee will not operate the Government arsenals but a little more than half time.

If the two arsenals, one at Springfield and one at Rock Island, were to operate during the entire year manufacturing rifles, pistols, and revolvers with one shift of men it would require $3,500,000 to defray that expense; and if two shifts were contemplated—which, in my opinion, ought to be the plan of operation—then there would be required $5,000,000 or more to do that work alone in the Government arsenals. It is not because these arsenals are inadequate to supply the rifles that are needed, but it is because either it is not desired that the governmental arsenals shall do the work or because it is thought that the rifles are not needed. One or the other of these things must be true. So the case put by the Senator from South Dakota with regard to the manufacture of powder does not exist with regard to the manufacture of small arms.

Mr. STERLING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from South Dakota?

Mr. NORRIS. I yield.

Mr. STERLING. If the Senator will permit me——

Mr. NORRIS. Yes.

Mr. STERLING. I alluded to the provision in regard to the manufacture of ammunition and the appropriation first made, for the reason that it had been referred to by the Senator from Iowa, and I supposed the Senator from Iowa and the Senator from Nebraska were putting on the same basis the manufacture of ammunition and the amount provided therefor and the manufacture of small arms and the amount appropriated therefor. Further, in corroboration of my belief in that regard, I find that the same committee amendment relative to the manufacture of arms is found on page 68 as is found on page 66, relative to the manufacture of ammunition, which is——

Mr. CUMMINS. No; the Senator is mistaken about that. Both the amendments which the Senator now has in mind refer to ammunition.

Mr. NORRIS. The amendment in page 68 has no reference whatever to small arms, I will say to the Senator from South Dakota.

Mr. STERLING. It provides, beginning in line 7, "that the Government shall manufacture at its arsenals as much of said ammunition"—I see the word "ammunition" is used there.

Mr. NORRIS. That is on what page?

Mr. STERLING. Page 68; but in that respect it is just the same as the amendment found on page 66.

Mr. NORRIS. The amendment I have been talking about, the amendment now pending, is the one which refers entirely to small arms, and in no sense to ammunition.

Mr. STERLING. That amendment follows the paragraph found on page 67, which is headed "Small-arms target practice." The word "ammunition" is stricken out of the original bill, and then there is inserted the words:

> For manufacture and purchase of ammunition, targets, and other accessories for small arms.

I see that the second amendment relates to ammunition alone of that particular kind.

Mr. NORRIS. Mr. President, I myself believe that if we are going to require, as the Senator has stated, for the emergency—whatever that may be—a larger amount of ammunition, one of the wise things that we ought to do is to increase the capacity of our ammunition factories and make more of it, if we are not able to make enough now.

Mr. STERLING. Mr. President, I should like to say to the Senator that I am fully in accord with him, to this extent, at any rate, namely, that the Government should manufacture all the ammunition for which it has the facilities to manufacture; and, in view of the discussion on Saturday afternoon, there being no agreement reached as to the committee amendment on page 67, I have prepared an amendment which I think will cover that proposition.

Mr. NORRIS. Mr. President, of course I am in favor, as the Senator from South Dakota says he is, of the Government manufacturing ammunition to the extent of its facilities; but I will go further and say, if the facilities are not adequate I should like to increase the facilities, and if what has been said here is all 100 per cent par those facilities ought to be increased. As I understand from what the Senator from South Dakota has said, quoting from Gen. Crozier, when the provision of the House, on page 66 was agreed upon, providing for the manufacture of ammunition by the Government and appropriating $4,500,000 therefor, the Government did not have the facilities to make even that much. So the appropriation was increased by the Senate committee from $4,500,000 to $12,776,000; and then, of course, they had to add the provision giving authority to purchase. If that be true, then the facilities for making this ammunition by the Government will be equal to the making of about one-fifth of the ammunition provided for, and the balance will have to be purchased.

The Government venture in the manufacture of powder has been so successful, as I understand—and that is conceded by everybody—and it has had such a beneficial result not only in cheapening the product that it directly manufactures but in affecting the market and cheapening the product that it has to buy that it seems to me we might well extend the activities of the Government in that respect; but in the amendment which is now pending, Mr. President, the appropriation applies entirely to the Government manufacture of small arms, and if the statements are well founded as to the necessity of increasing the powder supply and the ammunition supply by trebling the appropriation and all the other great military expansion which has taken place in the other bills which have passed, then I can see no reason why as to the few little factories which the Government is operating, we should practically provide that they should be shut down half of the time.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

Mr. CUMMINS. Mr. President, I intend to ask for a yea-and-nay vote upon this amendment, but during this discussion there have been so few Senators present that it may not be understood. I therefore suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested, and the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	Norris	Simmons
Bankhead	Husting	O'Gorman	Sterling
Borah	James	Oliver	Swanson
Brady	Johnson, S. Dak.	Overman	Thomas
Brandegee	Jones	Owen	Tillman
Bryan	Kenyon	Page	Underwood
Chamberlain	Kern	Penrose	Wadsworth
Chilton	La Follette	Poindexter	Walsh
Clarke, Ark.	Lee, Md.	Reed	Warren
Culberson	Lodge	Shafroth	Weeks
Cummins	McCumber	Sheppard	Williams
Curtis	Martine, N. J.	Sherman	
Dillingham	Nelson	Shields	

Mr. THOMAS. I have been requested to announce that the junior Senator from Mississippi [Mr. VARDAMAN] is absent on official business.

The PRESIDING OFFICER. Fifty Senators have answered to their names. There is a quorum present.

Mr. CUMMINS. Mr. President, allow me to say that there probably will be a vote upon this amendment very soon; and I hope, therefore, the Senators will have the patience to listen for a moment while I explain what the amendment is, for very few of them were here at the time the subject was under discussion.

The paragraph to which the amendment goes is one which authorizes the Government manufacture of small arms, principally Springfield rifles. There are at the present time but two manufactories in the country which produce Springfield rifles, and they are both Government arsenals. There is at this time no private manufactory of that kind. The capacity of the Springfield Arsenal is 500 guns a day. The capacity of the Rock Island Arsenal is 250 guns a day.

If these two arsenals worked at their full capacity during the year with one shift of men, they would produce 217,000 rifles if they worked upon no other arm. To do that would cost the Government about $3,500,000, for the rifles cost, according to the report, substantially $16.50 each. The House provided an appropriation of $5,000,000. The Senate committee has proposed a reduction of the appropriation to $2,500,000. That means that the Government can not manufacture more than 150,000 rifles during the coming year. It means that if we ever do have need for an army we will be without the means to arm and equip the soldiers.

I have feared that the proposed amendment was reduced in this way because the activity is entirely a governmental activity. I find no other appropriation in the bill relating to preparation for war, no other item which may be expended in the payment of contractors or manufacturers who make a profit out of war, reduced at all. They are all very greatly increased as compared with the House bill. This is the only one I have found which has been reduced.

It is unwise to shut down these arsenals in the manufacture of rifles. As was developed here a few moments ago, in order to be prepared for war a country must have anywhere from three to five rifles for each man, inasmuch as rifles are easily lost and destroyed and injured in time of war. We have not at this time more than one if our National Guard is increased to the point authorized by the law. We have no reserve whatever when we reach our present authorization in enlistment.

I believe that we ought to retain the House provision as it is, and allow these two arsenals to accumulate a fair, reasonable reserve in this fundamental and most important arm of the service.

Mr. President, I ask for the yeas and nays upon the amendment.

Mr. REED. Mr. President, I do not believe the committee could have had in view any such object as the Senator from Iowa seems to fear. There is nothing plainer to my mind than that while we are entering upon a program of preparedness the very first thing we ought to think of is to put ourselves in a position to be able at least to put rifles in the hands of our soldiers, either citizen or professional. I think we ought to have not less than three to four millions of these rifles on hand; and I am therefore opposed to the committee amendment.

Mr. PENROSE. Mr. President, I was unavoidably absent from the Chamber, so I shall have to trespass on the patience of the chairman of the committee. As I understand, the committee has cut down the House appropriation. I should like to vote to retain that appropriation, as advocated by the Senator from Iowa; but, of course, if these rifles are not necessary, I do not want to be in the position of voting that way.

Mr. CHAMBERLAIN. Mr. President, in answer to the Senator's question I desire to say that the House committee reported out, in the bill as it originally came to the House, an appropriation of $2,000,000 for the manufacture of small arms. Conditions changed somewhat while the bill was pending in the House, and the chairman of the committee recommended an increase of it to $5,000,000. When the bill came over here the Senate Committee on Military Affairs reduced that to $2,500,000, and proceeded on the statement of the Chief of Ordnance as to what that amount would do. The committee thought it would be amply sufficient, particularly in view of the fact that the next session of Congress is near at hand, and if any other increases are necessary, they can be made at that time. The committee thought that $2,500,000 was amply sufficient to meet all the requirements now.

Mr. PENROSE. Do I understand that the Chief of Ordnance also thinks this amount is sufficient?

Mr. CHAMBERLAIN. I would not say that the Chief of Ordnance stated that it was sufficient; but he stated what it would do, and the committee thought that statement warranted them in placing it at $2,500,000.

Mr. LODGE. If the Senator will allow me, the Chief of the Bureau of Ordnance stated that it was sufficient for the Army now in the field; but there is no attempt by this appropriation of the Senate committee to make any reserve of rifles. I think we ought to accumulate rifles. That is the point. We ought to do something to accumulate them, so that we shall have rifles ready to put in the hands of volunteers if they are called out.

Mr. CUMMINS. I ask for the yeas and nays on the amendment of the committee.

The yeas and nays were ordered.

Mr. BRANDEGEE. Mr. President, I believe the ordering of the yeas and nays does not limit debate.

The PRESIDING OFFICER. Not at all. The Senator from Connecticut is recognized.

Mr. BRANDEGEE. I wanted to ask the chairman of the committee, not having heard his statement when this item was reached, what would be the objection to putting onto this provision, on page 68, at line 10, under the title of "Manufacture of arms," the same proviso, or a similar one, contained in lines 7 to 9 on the same page as to ammunition, so as to provide that the Government shall manufacture at its arsenals as large a part of the arms as can be produced by the exercise of the greatest economy and efficiency?

Mr. CHAMBERLAIN. The reason for that is that the guns that are in use in the Army are practically all manufactured by the Government itself in its arsenals. They are not purchasing any guns anywhere; and there was no need for the same provision as with reference to the other material which the Government could not manufacture.

Mr. BRANDEGEE. I understand that; but if that is so, what is the significance of the word "procuring" in line 11?

Mr. CHAMBERLAIN. The Government does purchase some pistols, but the main appropriation covers guns. The amount spent for pistols is small in proportion to the number of guns that the Government uses, of course.

Mr. BRANDEGEE. I have no decided views about what amount is necessary, Mr. President; but I think it is wise policy for the Government to manufacture as much of its arms as possible at its own arsenals, and, of course, I think it is wise also to have other concerns in the country kept alive and encouraged, so that if the Government, in time of emergency, can not supply all that it wants, it can have some private industries to call upon.

Mr. LODGE. The Senator, of course, is aware that the Springfield rifle is made only at the Government armories.

Mr. BRANDEGEE. Oh, I am aware of that; yes.

Mr. LODGE. And he is aware that one armory is now closed down, and the other is being run at a production of only 149 rifles a day, when the two together, running on one shift, can make 750 rifles a day.

The PRESIDING OFFICER. The question is on the amendment of the committee, on which the yeas and nays have been ordered. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. JONES (when his name was called). I have a pair for the day with the junior Senator from Virginia [Mr. SWANSON], and I therefore withhold my vote.

Mr. SIMMONS (when his name was called). I transfer my general pair with the junior Senator from Minnesota [Mr. CLAPP] to the junior Senator from South Carolina [Mr. SMITH] and will vote. I vote "yea."

Mr. STONE (when his name was called). I transfer my general pair with the senior Senator from Wyoming [Mr. CLARK] to the senior Senator from Virginia [Mr. MARTIN] and will vote. I vote "yea."

Mr. THOMAS (when his name was called). I transfer my pair with the senior Senator from North Dakota [Mr. MCCUMBER] to the junior Senator from Oklahoma [Mr. GORE] and will vote. I vote "yea."

While I am on my feet, I wish again to announce the unavoidable absence of the junior Senator from Mississippi [Mr. VARDAMAN]. I will let this announcement stand for the day.

Mr. TILLMAN (when his name was called). I transfer my pair with the junior Senator from West Virginia [Mr. GOFF] to the senior Senator from Tennessee [Mr. LEA] and will vote. I vote "yea."

Mr. WADSWORTH (when his name was called). I transfer my pair with the junior Senator from New Hampshire [Mr. HOLLIS] to the junior Senator from New Mexico [Mr. CATRON] and will vote. I vote "nay."

Mr. SMITH of Arizona (when Mr. WILLIAMS's name was called). I desire to announce the absence of the senior Senator from Mississippi [Mr. WILLIAMS], who has been called from the Senate on important business.

The roll call was concluded.

Mr. REED (after having voted in the negative). I neglected to announce when I voted the transfer of my pair with the senior Senator from Michigan [Mr. SMITH] to the junior Senator from Indiana [Mr. TAGGART]. I now make that transfer and allow my vote to stand.

Mr. BRADY. I have a general pair with the junior Senator from Mississippi [Mr. VARDAMAN]. I transfer that pair to the senior Senator from California [Mr. WORKS] and will vote. I vote "yea."

Mr. GRONNA (after having voted in the negative). I inquire if the senior Senator from Maine [Mr. JOHNSON] has voted?

The PRESIDING OFFICER. He has not.

Mr. GRONNA. I have a pair with that Senator, and I therefore withdraw my vote.

Mr. CHILTON. I transfer my pair with the senior Senator from New Mexico [Mr. FALL] to the junior Senator from New Jersey [Mr. HUGHES] and will vote. I vote "yea."

Mr. O'GORMAN. I have a general pair with the senior Senator from New Hampshire [Mr. GALLINGER]. In his absence I withhold my vote.

Mr. BECKHAM. Has the senior Senator from Delaware [Mr. DU PONT voted?

The PRESIDING OFFICER. He has not.

Mr. BECKHAM. I have a general pair with him, and therefore withhold my vote.

Mr. PENROSE (after having voted in the negative). I notice that the senior Senator from Mississippi [Mr. WILLIAMS] has not voted. As I am paired with that Senator, I withdraw my vote.

Mr. WALSH. I have a general pair with the senior Senator from Rhode Island [Mr. LIPPITT], which I transfer to the senior Senator from Nebraska [Mr. HITCHCOCK], and will vote. I vote "yea."

Mr. CURTIS (after having voted in the affirmative). I have a pair with the junior Senator from Georgia [Mr. HARDWICK]; but I understand if he were present he would vote "yea," so I will allow my vote to stand.

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from New Hampshire [Mr. GALLINGER] with the Senator from New York [Mr. O'GORMAN];

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from Ohio [Mr. HARDING] with the Senator from Alabama [Mr. UNDERWOOD];

The Senator from Connecticut [Mr. MCLEAN] with the Senator from Montana [Mr. MYERS]; and

The Senator from Utah [Mr. SUTHERLAND] with the Senator from Arkansas [Mr. CLARKE].

The result was announced—yeas 25, nays 23, as follows:

YEAS—25.

Borah	Kern	Simmons	Tillman
Brady	Nelson	Smith, Ariz.	Townsend
Chamberlain	Overman	Smith, Ga.	Walsh
Chilton	Page	Smith, Md.	Warren
Curtis	Pomerene	Stone	
Fletcher	Shafroth	Thomas	
James	Sheppard	Thompson	

NAYS—23.

Ashurst	La Follette	Norris	Sherman
Brandegee	Lane	Oliver	Smoot
Cummins	Lee, Md.	Owen	Sterling
Dillingham	Lodge	Phelan	Wadsworth
Husting	McCumber	Poindexter	Weeks
Kenyon	Martine, N. J.	Reed	

NOT VOTING—47.

Bankhead	Gallinger	Lea, Tenn.	Saulsbury
Beckham	Goff	Lewis	Shields
Broussard	Gore	Lippitt	Smith, Mich.
Bryan	Gronna	McLean	Smith, S. C.
Catron	Harding	Martin, Va.	Sutherland
Clapp	Hardwick	Myers	Swanson
Clark, Wyo.	Hitchcock	Newlands	Taggart
Clarke, Ark.	Hollis	O'Gorman	Underwood
Colt	Hughes	Penrose	Vardaman
Culberson	Johnson, Me.	Pittman	Williams
du Pont	Johnson, S. Dak.	Ransdell	Works
Fall	Jones	Robinson	

So the amendment of the committee was agreed to.

Mr. REED. Mr. President, I feel absolutely certain that many of the Senators voted under a misapprehension as to the import of this amendment. I therefore give notice that I reserve it for action in the Senate.

The reading of the bill was resumed.

The next amendment was, on page 68, line 18, after the word "war," to insert "in the expenditure of which sum the existing laws prescribing competition in the procurement of supplies by purchase shall not govern in orders not to exceed $50,000 in any one case," so as to make the clause read:

Provided, That $200,000 of this appropriation may be used to procure gauges, dies, jigs, tools, fixtures, and other special aids and appliances, including specifications and detailed drawings, necessary for the manufacture by private manufacturers of arms necessary to arm the land forces likely to be required by the United States in time of war, in the expenditure of which sum the existing laws prescribing competition in the procurement of supplies by purchase shall not govern in orders not to exceed $50,000 in any one case.

Mr. CHAMBERLAIN. Mr. President, I desire to perfect that amendment by having it amended so as to read in accordance with the matter which I send to the desk.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. On page 68, lines 18 and 19, it is proposed to modify the committee amendment by striking out the words "in the expenditure of which sum," and inserting in lieu thereof the following:

And in the purchase of lots of arms to complete the object of this proviso.

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

Mr. REED. Mr. President, I want to ask the chairman of the committee just what change that will work in the present law?

Mr. CHAMBERLAIN. I explained that in reference to one of the amendments which preceded this, Mr. President.

Mr. REED. I will say to the Senator that I was necessarily absent. I was with the Judiciary Committee all the morning.

Mr. CHAMBERLAIN. The Senator will remember that in the national-defense act of June 3, 1916, there was included a provision authorizing the Government to procure these gauges, dies, jigs, tools, fixtures, and other special aids and appliances to enable it to take such steps as might be necessary at any time in the future to manufacture, if it wanted to, or to prepare to manufacture in this country the materials that were necessary to be used in case of war. Two hundred thousand dollars of the $2,500,000 just appropriated is available for service this year.

The Senator will notice that the language as it appears in the bill is a limitation upon the use of the $200,000. That was not the purpose of the committee and it was not in accordance with the wishes of the War Department. They want to assemble these jigs and tools from whatsoever source they can get them, without any limitation upon that power, because they might want to buy a hundred dollars' worth in one place and $500 worth in another place and to assemble all these things and get them ready in their own factory. If the Government was not prepared to manufacture them it could place the order in a factory and give whatever place installed them a trial order, not to exceed $50,000, because no one would want to prepare to make any of the jigs and tools in any place unless there was some compensation in the form of a trial order. That is the purpose of it.

The amendment was agreed to.

The next amendment was, on page 68, after line 21, to insert:

The Secretary of War is hereby authorized to issue, without expense to the United States, for use in target practice, targets, target materials, and other necessary accessories to rifle clubs organized under the rules of the National Board for the Promotion of Rifle Practice and to schools having a uniformed corps of cadets and carrying on military training, in sufficient number for the proper conduct of target practice.

The amendment was agreed to.

The next amendment was, on page 69, line 9, after the word "Artillery," to strike out "$6,000,000" and insert "$11,000,000," so as to make the clause read:

Ordnance stores and supplies: For overhauling, cleaning, repairing, and preserving ordnance and ordnance stores in the hands of troops and at the arsenals, posts, and depots; for purchase and manufacture of ordnance stores to fill requisitions of troops; for Infantry, Cavalry, and Artillery equipments, including horse equipments for Cavalry and Artillery, $11,000,000.

Mr. CHAMBERLAIN. I thought I had an amendment to propose to that amendment, but I have it not before me. I reserve the right to offer it later.

The amendment was agreed to.

The next amendment was, on page 69, line 10, after the words "more than," to strike out "$3,000,000" and insert "$5,600,000," so as to make the clause read:

Provided, That not more than $5,600,000 of this appropriation may be used for the purchase of ordnance stores.

The amendment was agreed to.

The next amendment was, on page 69, after line 12, to insert:

The Secretary of War is hereby authorized to sell, at the prices fixed and published by the Chief of Ordnance, to the Government of Cuba such articles and quantities of ordnance and ordnance stores as may be desired by that Government for the equipment of its troops and as may be approved by the President of the United States.

The amendment was agreed to.

The next amendment was, on page 70, line 11, after the date "1918," to strike out "$3,600,000" and insert "$7,725,000," so as to make the clause read:

Automatic machine rifles: For the purchase, manufacture, and test of automatic machine rifles, including their sights and equipments, to be available until the close of the fiscal year ending June 30, 1918, $7,725,000.

The amendment was agreed to.

The next amendment was, on page 70, line 17, after the date "1918," to strike out "$2,000,000" and insert "$6,586,150," so as to make the clause read:

Automatic machine rifles: For the purchase, manufacture, and test of automatic machine rifles, including their sights and equipments, for the National Guard, to be available until the close of the fiscal year ending June 30, 1918, $6,586,150.

Mr. REED. Mr. President, the amendment just passed I have no doubt is a wise one, but I notice that for automatic rifles it is proposed to increase the House appropriation from $3,600,000 to $7,725,000. Probably that is a very wise amendment, but I should like to know the logic, if logic is to be found, in increasing that appropriation and then cutting down the appropriation that would have given enough rifles to put in the hands of ordinary soldiers. I can not understand why we should go so far forward in the matter of machine guns and do so little to lay in an adequate supply of rifles.

Mr. CHAMBERLAIN. I went over this once, but I am perfectly willing to explain it.

Mr. REED. A number of us have been this morning absolutely obliged to be in session in the Committee on the Judiciary.

Mr. CHAMBERLAIN. I am not complaining of the Senator, because I realize how hard it is to be here all the time. I was just explaining my own attitude in reference to the matter.

There is a difference of opinion here among Senators, and an honest difference of opinion, whether the appropriation for small arms ought to have been reduced. My own view is, and it is the view of the War Department, that the appropriation which has been made for small arms is amply sufficient in this emergency, particularly in view of the fact that Congress will convene again in a few months and the amount appropriated can not possibly be expended before the next session of Congress.

Mr. REED. Is not that true of other items? Is not that true of all these items?

Mr. CHAMBERLAIN. That is true, Mr. President, but in the larger appropriations, and the one now under consideration, contracts may have to be let. As a matter of fact, while the War Department think they have sufficient small arms on hand for use, and I think the House hearings will carry that view out, yet when it comes to these automatic machine rifles we are practically out of business. There is not any country in the world that is so poorly equipped with these automatic machine guns as the United States. If the Senator will read the hearings, he will find that even Mexico excels the United States in this equipment. When our boys did come in contact with the Mexicans down at Parral they were wiped from the face of the earth with these machine rifles.

Mr. REED. I am not objecting to the machine-rifle appropriation; that, I assume, is all right; but I am inquiring why we should deprive the man who can not have a machine rifle, who has to have a common rifle, of the chance to have the common rifle. I understand we have on hand 500,000 of those rifles, and yet the Senator knows if we came in conflict with a great power we would need 3,000,000 rifles, and we would need them in 90 days.

Mr. CHAMBERLAIN. There is not any question about that, Mr. President. I have been charged with being very radical on the subject of preparedness, and I have gotten so that I am almost afraid to suggest a recommendation. Now, even my pacifist friend on the other side, the distinguished Senator from Nebraska, votes for the increased appropriation when our committee recommended that it should be reduced. The War Department thinks that we are sufficiently supplied with these small guns. I may be mistaken about it.

Mr. REED. The War Department thinks that? I should like to have the reason for the War Department's thought.

Mr. CHAMBERLAIN. I gave that this morning, but if the Senator wants me to read it into the RECORD again I will do so.

Mr. REED. The Senator can tell me briefly.

Mr. CHAMBERLAIN. It is a supplemental proposition made by the Chief of Ordnance. He, as a rule, is knocking at the door of the Senate and Congress all the time for increased appropriations. His statement shows that there are enough provided for.

Mr. REED. He says there are enough, yet there are only 500,000. Am I correct in that?

Mr. CHAMBERLAIN. There are over 700,000, I think. We have, in round numbers, over 250,000 men in the field.

Mr. REED. Exactly. I am not afraid of being unable to arm the men we have in the field now. What I am afraid of is that some day we will have occasion to use the power of this country in some great conflict. If we do, we are going to call on the American people for volunteers or we are going to draft them; 500,000 guns or 750,000 guns in that case would be utterly inadequate.

How does the War Department suppose we are going to get them and get them quickly? I say to the chairman of the committee this has seemed to me to be the best kind of preparedness we could engage in, so as to have on hand all of the war matériel necessary to arm our people, and for two reasons: First,

because you can not get it quickly, and in an emergency you will find yourself without it; second, because that kind of preparedness does not cost very much, as compared with other kinds. When you buy a horse you have to feed him and he wears out and dies. When you have a man you must feed him and sustain him and care for him; he eats, he consumes. But if you take a rifle, oil it and put it away properly, it is good for 20 years and you are not out a single penny except the original cost and the interest on the money.

Therefore, if we are to be extravagant in any respect, if we are to go beyond the line of what is apparently a present necessity in any degree, we had better do so along the line of preparing those things that it requires time to get and which it does not require any money to keep on hand.

Mr. CHAMBERLAIN. Does the Senator object to the item for machine rifles?

Mr. REED. I do not. I am trying to get some light on the other item. I am not objecting, because, I take it, we need the machine guns. You will not find me voting against creating the machine, whether it is a simple rifle, a machine gun, or a great cannon. You will not find me voting against getting a machine of some kind to put into the hands of our people when it is necessary to have one.

Mr. CHAMBERLAIN. The Senator does not care for the views of the department on the automatic machine rifle.

Mr. REED. Not especially, because I am willing to follow the lead of the chairman of the committee on that. I take it we need these machine guns. I am, however, continuing my protest against cutting down the work of the Government arsenal in making enough rifles. I insist that if our men are called out they must have something in their hands to fight with. It has been suggested to me by the Senator from Oklahoma [Mr. OWEN] that the trouble with Russia was that she did not have arms to put in the hands of her people; we should not repeat Russia's blunder.

There has been a good deal of talk about the American citizen not being prepared to fight. I appreciate the fact that training is of infinite value in the making of a soldier, but I want to say that I have more doubt of our ability to get war material to-day than I have of our ability to get men who will handle that material, for with all due respect to other peoples and nations I do not believe there is upon the face of the earth a race of men who can be so quickly transformed into soldiers as the American people. I say that because our training from youth has been along lines that have developed and broadened and quickened the mind of the American citizen. I do not believe it is true that you can not make a reasonably effective army in a short space of time in this country, but I do know that no army can fight without rifles.

I can see no sense whatever, when we are engaged in a great program of preparedness, in starting out with what practically amounts to this sort of a resolution. But be it resolved, that there shall not be enough rifles to put into the hands of any army that may be raised.

The War Department sometimes, I think, makes mistakes. I am just exercising my common sense. I know to my own satisfaction, at least, that if we had three or four million first-class rifles laid away in arsenals and ready to put into the hands of our people I would feel a sense of security and safety that I do not now enjoy.

Mr. BRANDEGEE. Will the Senator permit a question?

Mr. REED. I do. Indeed, I have finished. I yield the floor.

Mr. BRANDEGEE. If the Senator has not the information, I will ask the Senator from Wyoming [Mr. WARREN]. I assume there is some standard of weapon now prescribed by law by the department for the use of the Army.

Mr. WARREN. You are speaking of the small arm?

Mr. BRANDEGEE. The rifle.

Mr. WARREN. The Springfield?

Mr. BRANDEGEE. No other arm is used in the Army?

Mr. WARREN. Except in some exigency, but the Springfield is the standard rifle furnished to the Regular Army and the National Guard.

Mr. BRANDEGEE. Does the Government own or have patents so that nobody else is permitted to make that rifle in this country?

Mr. WARREN. Without doubt.

Mr. BRANDEGEE. So the fact is that no private manufacturer can make the type of rifle which either the law or the regulations of the department require to be used exclusively by the Army?

Mr. WARREN. I so understand it.

Mr. BRANDEGEE. If that be the fact, Mr. President, it seems to me that the reason for reconsidering the action of the Senate on the amendment which the Senator from Missouri has been discussing is reenforced and made more necessary.

Mr. WARREN. Of course the Senator understands that they can be manufactured anywhere under orders of the Government or with the permission of the Government.

Mr. BRANDEGEE. Yes, they may be; but the point I was about to make is this: I think it is an essential part of being prepared that there should be in the country at all times a large reserve stock of such kind of rifles as the soldiers would be compelled to use in time of war. I think there should be even a considerable surplus, as the Senator from Iowa [Mr. CUMMINS] has indicated. If the Government is the only person that makes those now and is the only person that could authorize anybody else to make them, of course, unless we appropriate enough money to pay for the manufacture of a reasonable supply the Government could not make them or give a contract to private parties to manufacture them unless the appropriation was made.

Mr. NORRIS. Mr. President, I believe the question propounded by the Senator from Missouri [Mr. REED], with regard to the cutting down of this one appropriation and increasing the other appropriation, has not at least been truly answered. I want to make a suggestion that I think will throw some light on the question. Wherever in any of these appropriations in this part of the bill that I have noticed the word "purchase" is included the appropriation is increased. Whenever there is not any such thing as purchase, but the Government manufactures, and there is only one such place, then the appropriation is cut down.

For instance, take the purchase and manufacture of Army motor cars. The appropriation is raised from $300,000 to $1,000,000. For the purchase and manufacture of automatic machine rifles, including equipment for the National Guard, the appropriation is raised from $2,000,000 to $6,586,150. For the purchase, manufacture, and test of automatic machine rifles to be available, and so forth, for the Regular Army, I suppose, the appropriation is increased from $3,600,000 to $7,720,000. For the manufacture and purchase of ammunition for arms, and so forth, the appropriation is increased from $4,500,000 to $12,760,000.

In most of the cases I have mentioned the purchase will be the all-important part of it. In some of them I understand the Government has no facilities whatever to manufacture; so that all the money will be appropriated for the purchase.

I am not complaining of the committee now, or particularly of the chairman of the committee, as he intimated a while ago I was, because he said he was following the department. I am complaining of those who are responsible for that kind of recommendation. I offer this only as a little indication of what might influence these people. Wherever the things that I have read are to be purchased then the appropriation is increased at a terrible rate, but now we come to another item, the only one, as I said, of its kind—for the manufacture, repair, and procuring and issuing of arms at the national arsenals; that means where the Government is manufacturing the product—and the appropriation is decreased from $5,000,000 to $2,500,000.

Mr. BRADY. From what page and line is the Senator reading?

Mr. NORRIS. It is lines 9 to 12, inclusive, on page 68. I simply offer that as a little light that may give some information to the question propounded as to why the appropriations for rifles that are to be purchased are increased, and in the appropriations for ammunition and automobiles and everything else which has to be purchased an increase is made, and the appropriation made for the Government manufacturing is decreased.

Mr. CHAMBERLAIN. Mr. President, the natural inference to be drawn from the suggestion of the Senator from Nebraska is that the War Department itself and its officials are acting in collusion with the Committee on Military Affairs or the Committee on Military Affairs is acting in collusion with the distinguished Secretary of War and many distinguished Army officers to defraud the Government and the people of this country whenever it is sought to diminish the appropriations for the manufacture of those things which the Government manufactures or to raise the appropriations in those cases where the Government of the United States is compelled to buy in the markets of the country.

I repudiate the implication which arises from the suggestion of the Senator. I might just as well undertake to hold the Senator who is opposed entirely to the doctrine of preparedness for national defense responsible for the acts of certain ardent opponents of preparedness who undertook to blow up, and who did kill a number of innocent men, women, and children of San Francisco a few days ago, because they dared to go out upon the streets and watch a parade in the interest of preparation for national defense.

It would be just as logical as the position which the Senator takes, and yet I make no such claim and take no such position.

I will say to the Senator, in all kindness, that there are just as honest men in the Senate as he. I do not mean to impugn or question the integrity or the honesty of the Senator from Nebraska, but he and others on the floor of the Senate and elsewhere are continually suggesting here that every man who believes in placing his country in a position for defending itself is animated by some secret, some sinister, some dishonest influence that is attempting to rob the Treasury of the United States and impose a heavy burden of taxation upon the people.

There is nothing in that suggestion, and the Senator knows it. There is no one man in the Senate who has a monopoly of honesty. There is not any one man in the Senate who possesses all the wisdom of the Senate. There is no one individual here who possesses all the patriotism of this body.

I have at all times given to the Senator from Nebraska and the other Senators who differ most radically from me credit for acting with the best motives and from none but the purest and most patriotic purposes, however much I may differ from them. There is no warrant and no reason why the motives of the Committee on Military Affairs and other Senators should be constantly called in question and intimation made from time to time that because they stand for placing our country in a position where it can defend itself they are engaged in a conspiracy with the munition factories and others who profit by war.

So far as I am concerned, after 20 years of public service I am sure those who know me will acquit me of ever having undertaken to rob the people of my State or the Federal Government.

Those of us who believe in placing our country in a proper attitude of defense against troubles within or without are just as patriotic and have their country's best interest as much at heart as the distinguished Senator who is constantly insinuating that the members of this committee and the Members of the Senate who disagree with him have some ulterior or sinister purpose other than that of the defense of our country.

Mr. President, I read somewhere not long ago of a distinguished member in the Chamber of Deputies in France who, before the terrible war that is now waging, when the question came up of buying armored motors, machine guns, and ammunition for the proper defense of France, got up and charged that it was all a conspiracy between those who favored placing France in a position of defense and the ammunition factories and motor factories to rob the French Government. But there were some men in the French Deputies who saw the war clouds and foresaw the storm that was bound to follow, and then when France did become engaged in a war which is more terrible than anything that the world's history records or knows of, this same deputy, when he saw his sons and his brothers rushing to the slaughter without preparation, without ammunition, without arms, without armored trucks, stood up on the floor of the Chamber of Deputies and said, "Mea culpa," "It is my fault."

So it is now, Mr. President, because some of us are insisting that our country ought to be placed in a proper attitude of self-defense, not an extravagant but a reasonable one, some distinguished gentlemen here are suggesting that it is a conspiracy between those who believe in preparation for defense and the munition factories of the country.

Some of the same distinguished gentlemen, Mr. President, if the United States does ever happen to become involved in war, will stand in their same places in the Senate of the United States and see their boys going to the front and wiped out by shrapnel, by shot, and by shell, unarmed, unprepared, unequipped, they will say, as the French deputy did, "Mea culpa," "I am to blame."

Mr. President, I am induced to say this much because that intimation is constantly made here. I claim for myself and for my colleagues who agree with me just as much honesty of purpose as inspires those who differ from us.

Here we are sending our boys to the front, sending them down to Mexico. It has been claimed here that they, too, are unprepared, and we are endeavoring simply to do something to prepare them to meet the emergencies of war, if emergencies come, and God grant they may not. If those boys had been sent down to Parral or other places in Mexico where recent difficulties have occurred and they had been met by the Mexican forces with machine guns and mounted rifles, what chances do you suppose they would have had? Yet because we try to place them in a condition where they can have these things, where they can properly defend themselves, there comes the charge in the Senate of the United States that the Military Affairs Committee is standing in with the munition factories.

Mr. President, I get tired of hearing that charge. I am willing to measure my patriotism and my honesty with the patriotism and honesty of any man in this Senate, and I feel that there is not a man on the Military Affairs Committee who is not equally patriotic and honest. The only man on the committee who has ever been interested in the manufacture of munitions declined to vote, and went out of the committee room whenever any of these questions came up for consideration; and yet these suggestions are made against me, and against all the members of the committee. They are not made openly; they are suggestions merely of sinister motives and purposes. We have some gentlemen on that committee who were in the Confederate Army and some who were on the Union side in the Civil War, all doing what in view of their experience they believed was best to be done in the emergency which confronted our country.

Mr. President, that is all I intend to say on this subject at this time. I think it comes with very poor grace from a Senator to make such suggestions on the floor of the Senate. If he knows of dishonesty on the part of any Member here, let him put his hand upon that man's shoulder, and I will be just as ready as he to point the finger of scorn at such a traitor to his country and assist in holding him up to the everlasting obloquy of the American people.

Mr. NORRIS. Mr. President, the Senator from Oregon "protests too much." I think an examination of the RECORD and everything that I have said on the floor of the Senate or elsewhere will not warrant any of the intimations in which the Senator from Oregon has indulged. I have said nothing, and I have heard of nobody else in the Senate who has said anything, that would warrant the Senator from Oregon in saying that there were continual intimations here to the effect that the chairman of the Committee on Military Affairs and other members of that committee were "standing in" with the munition factories. The Senator is denying a charge that has not been made. That is the only suspicious circumstance connected with the proposition.

Mr. President, I wondered the other day when I read of a crank or an anarchist, or somebody, who had left an infernal machine which exploded a bomb and killed and injured innocent and honest people in a preparedness parade, how soon it would be until some military preparedness man would charge that up against men who were opposed to the launching now of the greatest appropriation ever made in the history of man in time of peace for the building of a navy of a size unheard of, undreamed of, and unthought of a few years ago, when, in my judgment, there is less use and less cause for it than has existed at any time during the last 100 years. In the discussion of that question I have always conceded, and I have conceded here, that those who did not agree with me were just as honest and just as patriotic as I; and when the Senator from Oregon now singles me out and classifies me as one who is making intimations that the Committee on Military Affairs and its chairman are working for the interests of munition factories, I repudiate the statement. It is groundless; and there is not any evidence, so far as I know, that the committee are doing that, except the fact that they are denying the charge when it has not been made. I suppose that might be considered in a trial as proper evidence; but, Mr. President, the things that I have pointed out are in the bill. I read from the bill these various items where increases are made in every case where arms and munitions are to be purchased, and where there was no purchase, but where it was entirely Government manufacture, there is a decrease. It is there; I did not make it; the Senator from Oregon reported the bill here as chairman of the committee, and it is up to the committee to explain it.

It will be no explanation to try to intimate that I am not as patriotic as is he or that he will stand with his people in a proper light and they will believe that he is honest. I have never doubted his honesty or his patriotism, and I have never said anything here that would give him warrant or reason for intimating that such a suggestion had been made. But the facts, Mr. President, are as I have pointed them out. What I have said I offer for what it is worth. It may be worth a great deal and it may be explained away.

Mr. President, the item to which I have called the attention of the Senate is one as to which the committee has cut down the appropriation; and it is no answer for the Senator from Oregon to say that the poor boys down south, if we did not have arms to put into their hands, could not do any good. Here is where I am asking that the Government prepare arms for our boys at the front; here is where I am asking that the appropriation made to provide them with guns to defend our country shall not be reduced; and yet the Senator from Oregon comes in with the proposition to cut that appropriation square in the middle, to cut it down. So if there is any argument in our boys suffering for want of guns, it is not from the position that I take, but it is from the position that the Senator from Oregon has assumed.

I am objecting, Mr. President, to the cutting down of this item. When our boys go to the front I want them prepared with the best that human ingenuity can place in their hands. I am protesting here against a lack of such preparation, and yet the Senator from Oregon is defending the proposition that we should cut that appropriation in two. If you can deduce from that that I am trying to send the boys down on the border without guns in their hands, then you will have more wisdom than the Senator from Oregon has shown in using that as an argument for his position and against mine.

Mr. CHAMBERLAIN. Will the Senator allow me to interrupt him a moment?

Mr. NORRIS. I will.

Mr. CHAMBERLAIN. The Senator will recall that we have not over 250,000 men in the field, and the evidence here is that we have over 750,000 guns.

Mr. NORRIS. Yes; that can be offered as an argument against my position; but, as has been before stated to-day in this debate, if we go into war with Mexico or if the people who believe in this great preparedness plan are right in their contention that we are about to get into war with some other nation—some great nation—then if we want to run these Government factories making small arms night and day we shall not be able to meet the demand for arms.

If we have 750,000 arms for the soldiers, even though we had no more than a war with Mexico, they would not come anywhere near supplying the demand; and yet I am charged with being a foolish advocate of a policy that would leave our soldiers without arms, when I am demanding that the Government manufacturing establishments shall go on at all speed and make more arms for them. I am charged with being unpatriotic by Senators who want to cut this appropriation in two, because, forsooth, they say that, if I have my way, the boys down there will not have guns in their hands. The opposite is true.

Sometimes in argument men do try to put their opponents in a position which they themselves are occupying. The Senator from Oregon says that if our soldiers down at Parral had not been armed, they would not have stood any show, and some of them were wiped off the face of the earth because the enemy there, although barbarous, was armed with machine guns. That is true; but that only argues that the Government of the United States ought to go on and make some more of these arms.

I have not objected to the provision of the Senator's bill that there shall be an increased appropriation for machine guns; I have not raised my voice or offered my vote against that proposition; but it is where the Senator proposes to cut down the provision for rifles that will be available for the common, ordinary soldier that I protest.

Then, the Senator comes back with the proposition that I am, without reason, charging the committee with being unpatriotic and as standing in with the munition factories. I have studiously avoided doing any such thing. If the Senator can get that construction from what I have said, he is welcome to it; he may take it home with him. When he was talking in a boastful manner of the way in which the people believed in his honesty; if he can go back home and say to them, "I charged a man, because he favored large appropriations for making small arms to put into the hands of our soldiers, with being unpatriotic, or with trying to put our soldiers in a position where they could not defend themselves"—if he can do that, he is welcome to do it. If his people agree with him in that, he is welcome to all the consolation he can get out of it.

But, Mr. President, I want to say that, so far the argument of the Senator being as patriotic as anybody else is concerned, I will simply admit that that does not need any proof; the Senator has himself proclaimed it, and nobody has denied it. So I suppose that that would be taken as true. If a Senator can not disagree with the committee without being charged with being moved by motives that are not honorable, then I am at fault; then I must swallow whatever the committee brings in, and when an explanation is asked and not given, reading from the Senator's own bill, I suggest that in one case, where ammunition and other munitions of war are to be purchased, the appropriation is increased, and in the other case, where those supplies are not to be purchased, but are to be manufactured by the Government it is decreased—taking it from the committee's own bill—if that lays me liable to be charged with unpatriotic conduct, then I am guilty, and I shall have to take my chances; but if that is any defense; if that is any reason for anybody who favors that kind of a plan to claim that he is patriotic—more so than he would be if he did not favor that kind of a plan—then I have to be shown. I do not believe it adds anything to the fervent patriotism of the Senator from Oregon that he is in favor of that plan; I am not saying that it detracts any from it; but I do not believe it can be offered in substantiation of his pose of patriotism; in other words, as I said when I began, it seems to me that the Senator, like the character in Hamlet, "doth protest too much."

The PRESIDING OFFICER (Mr. PHELAN in the chair). The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment of the Committee on Military Affairs was, on page 70, line 19, after the word "cars," to strike out "$300,000" and insert "$1,000,000," so as to make the clause read:

> Armored motor cars: For the purchase and manufacture of armored motor cars, $1,000,000.

Mr. LEE of Maryland. Before the amendment is disposed of I should like to ask the Senator from Oregon a question. We are on the provision now in regard to machine guns for the militia, are we not?

Mr. CHAMBERLAIN. We are now on the provision in regard to armored motor cars. The amendment in regard to machine guns has been agreed to.

Mr. LEE of Maryland. I was just outside of the door, having been called out by a visitor, and I wanted to ask the Senator a question about the machine-gun item before it was passed. I noticed that this item for the Regular Army, which force has in the neighborhood of 90,000 or 100,000 men, appropriates for machine guns $7,725,000, while for machine guns for the militia, which force at the present time includes in the neighborhood of 150,000 men, the appropriation is $1,200,000 less. I have understood all along that these two forces were to be armed with equal efficiency and were to be supplied equally with modern military equipment.

Mr. CHAMBERLAIN. Mr. President, machine guns can be used indiscriminately by either the Guard or the Regular Army. I will call the Senator's attention to what the Chief of Ordnance says about that. In regard to automatic machine rifles for the Regular Army, the first of the two items, he says:

> With the guns now on hand, this will provide for the troops of the Regular Army, including nine regiments constituting the first increment under the act of June 3, 1916, at the rate of 12 guns per regiment; the aero squadrons for these troops; 1,600 guns for special purposes; and 50 per cent of the total number of guns otherwise provided for, to cover wastage.

Then, in relation to the next item, appropriating $6,586,150 for machine guns for the National Guard, he says:

> This, with the guns already provided, will equip all of the National Guard regiments recently called into the Federal service with 12 guns per regiment—

Just the same as in the case of the Regular Army—

> will supply the aero squadrons pertaining thereto, and will furnish 50 per cent of the total number for wastage.

Mr. LEE of Maryland. But the Senator must recognize the fact that all of the National Guard were not called into national service; that quite a number of regiments—I think 19 regiments of Infantry—were omitted from the call. I should think they ought to be provided with machine guns just the same as any other part of the Military Establishment. I am, however, so grateful to the Senator for increasing the appropriation for machine guns that I do not want to criticize the committee amendment.

Mr. CHAMBERLAIN. I assure the Senator that it is an implement of war that can be used indiscriminately by either the National Guard or the forces of the Regular Army, and it can be transferred from one division or from one regiment to another, as the case may be.

Mr. LEE of Maryland. The Senator feels sure that the machine guns can be so transferred?

Mr. CHAMBERLAIN. I think so.

Mr. LEE of Maryland. My impression was that they could not be transferred, being purchased for a specified purpose by an express provision of law; but if what the Senator says is correct, as I presume, of course, it is correct, the item as it stands is entirely satisfactory.

Mr. CHAMBERLAIN. I think there will be no question about that, I will say to the Senator.

Mr. LA FOLLETTE. Mr. President, I should like to ask the chairman of the committee a question. What is the cost of a machine gun, and how is it estimated in making these appropriations? How many machine guns are provided for by these two appropriations?

Mr. CHAMBERLAIN. They are very expensive.

Mr. LA FOLLETTE. I presume so.

Mr. CHAMBERLAIN. They cost from $3,000 down. The War Department officials are hoping all the time that they may be able to reduce the price.

Mr. LA FOLLETTE. How many machine guns will be provided for under the paragraph which appropriates $7,725,000,

and, if the Senator knows, how many by the other paragraph, the one following, appropriating $6,586,150 for machine guns for the National Guard?

Mr. CHAMBERLAIN. It would depend somewhat on the price. If the cost of each gun were $3,000——

Mr. LA FOLLETTE. Well, at present prices?

Mr. CHAMBERLAIN. I do not know. I have not estimated just how many. The Senator said something in his address to the Senate the other day—and I think very appropriately—about the newest gun which had been adopted by England. Our Government has experimented with that and has experimented with two or three other machine guns, but the results have not been entirely satisfactory as to any one of them. They are trying, however, to evolve a gun that will do just as well as any of them, and at a very much reduced expenditure, but now they cost from $3,000 down.

Mr. LA FOLLETTE. Does the Senator mean $3,000 down or $3,000 up?

Mr. CHAMBERLAIN. From $3,000 down—a few hundred dollars less than $3,000. If the Senator would like to have an estimate made, I can have the War Department do it.

Mr. LA FOLLETTE. No; I merely wanted the approximate cost.

The PRESIDING OFFICER. Without objection, the amendment reported by the committee is agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, on page 71, line 5, after the words "sum of," to strike out "$8,000,000" and insert "$14,200,000," and in line 9, after the words "more than," to strike out "$4,000,000" and insert "$11,200,000," so as to make the clause read:

Field artillery for National Guard: For the purpose of manufacturing field artillery material for the National Guard of the several States, Territories, and the District of Columbia, but to remain the property of the United States and to be accounted for in the manner now prescribed by law, the Secretary of War is hereby authorized, under such regulations as he may prescribe, on the requisitions of the governors of the several States and Territories or the commanding general of the National Guard of the District of Columbia, to issue said artillery material to the National Guard; and the sum of $14,200,000 is hereby appropriated and made immediately available and to remain available until the end of the fiscal year 1918, for the manufacture and issue of the articles constituting the same: *Provided*, That not more than $11,200,000 of this appropriation may be used for the purchase of field artillery material.

The amendment was agreed to.

The next amendment was, on page 71, line 18, after the date "1918," to strike out "$8,000,000" and insert "$14,000,000," so as to make the clause read:

Ammunition for field artillery for the National Guard: For the purpose of manufacturing reserve ammunition for field artillery for the National Guard of the several States, Territories, and the District of Columbia, the funds to be immediately available, and to remain available until the end of the fiscal year ending June 30, 1918, $14,000,000.

Mr. OVERMAN. In the event there should be no war would there be any necessity for the increase from $8,000,000 to $14,000,000?

Mr. CHAMBERLAIN. I will say to the Senator that we are away behind in supplies of this character of ammunition and there is great necessity for it. Of course we can do without it, as we have done without it for a number of years; but if the country wants to be prepared for defense it ought to have it. It is not a waste; it is an investment.

Mr. OVERMAN. What will be done with the powder?

Mr. CHAMBERLAIN. It can be stored.

Mr. OVERMAN. Will it not deteriorate?

Mr. CHAMBERLAIN. The powder is intended for the field artillery.

Mr. OVERMAN. As I understand, powder always deteriorates if kept long.

Mr. WARREN. The powder deteriorates, but can be made over.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, on page 71, line 19, after the words "more than," to strike out "$4,000,000" and insert "$8,400,000," so as to make the clause read:

Provided, That not more than $8,400,000 of this appropriation may be used in the purchase of field artillery reserve ammunition.

The amendment was agreed to.

The next amendment was, on page 72, line 1, after the word "war," to insert "in the expenditure of which sum the existing laws prescribing competition in the procurement of supplies by purchase shall not govern in orders not to exceed $50,000 in any one case," so as to make the clause read:

Provided further, That not more than $200,000 of this appropriation may be used to procure gauges, dies, jigs, tools, fixtures, and other special aids and appliances, including specifications and detailed drawings necessary for the manufacture by private manufacturers of field artillery ammunition necessary for the use of the land forces of the United States in time of war, in the expenditure of which sum the existing laws prescribing competition in the procurement of supplies by purchase shall not govern in orders not to exceed $50,000 in any one case.

Mr. CHAMBERLAIN. I desire to offer the amendment which I send to the desk as an amendment to the amendment reported by the committee. It is in the same language as that heretofore passed on by the Senate.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. In the committee amendment on page 72, line 1, it is proposed to strike out the words "in the expenditure of which sum" and to insert in lieu thereof the words "and in the purchase of lots of ammunition to comply with the object of this proviso."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, on page 72, after line 4, to insert:

Provided further, That the appropriations hereinbefore made under the heading "Ordnance Department" shall be available for the payment of an allowance not to exceed $4 per day in lieu of subsistence to civilian employees of the Ordnance Department traveling on official business outside of the District of Columbia and away from their designated posts of duty.

The amendment was agreed to.

The next amendment was, on page 72, after line 11, to insert:

That the President is authorized to appoint and, by and with the advice and consent of the Senate, to commission to the grade of first lieutenant in the Quartermaster Corps, United States Army, a pay clerk of over 31 years' service, now in active service, and who has been recommended by the then Secretary of War for such appointment.

Mr. NORRIS. Mr. President, I should like to make an inquiry of the chairman of the committee respecting that amendment. I presume the amendment is intended to promote some particular person?

Mr. CHAMBERLAIN. It applies to John Q. A. Brett.

Mr. NORRIS. And he is the only person to whom it applies?

Mr. CHAMBERLAIN. He is the only person to whom it applies.

Mr. NORRIS. Who is the officer?

Mr. CHAMBERLAIN. Some time ago a bill passed the Senate in just the form in which the amendment is found. It applies to John Q. A. Brett, of the Quartermaster Corps of the Army.

Mr. NORRIS. I should like to inquire why it is necessary to provide a special authorization of this kind? Under existing law could he not be properly promoted?

Mr. CHAMBERLAIN. No; he could not be.

Mr. NORRIS. For what reason?

Mr. CHAMBERLAIN. I assume the Senator has not read the report which was made by the Committee on Military Affairs on the bill to which I have referred?

Mr. NORRIS. No; I have not.

Mr. CHAMBERLAIN. In the report of the Committee on Military Affairs appears a letter from former Secretary of War Garrison, who, under date of January 7, 1916, says:

To the COMMITTEE ON MILITARY AFFAIRS,
United States Senate.

SIR: I have the honor to return herewith S. 2544, Sixty-fourth Congress, first session, "A bill to authorize the President of the United States to appoint John Q. A. Brett captain in the Quartermaster Corps of the Army."

I regard the case of Pay Clerk Brett as an exceptional one, and believe that he is entitled to special consideration for the unusually arduous and intelligent work which he has peformed. His unusually exact knowledge not only of the Quartermaster Corps but of the other bureaus of the War Department as well is personally known to me by reason of extremely important official work extending over several months which he has done under my immediate direction.

Before this work was completed, and when his absence would probably have made it impossible of completion, his medical officers ordered him into the hospital. Realizing the serious situation that his absence would create, and entirely from a sense of devotion to duty, he continued at this harassing night-and-day work until it was finished, although to the serious prejudice of his health.

Pay Clerk Brett is a highly educated, well-bred gentleman. I doubt if there are half a dozen officers in the Army as well versed in all the details of the Quartermaster Corps.

I recommend favorable consideration of this bill.

Very respectfully,

LINDLEY M. GARRISON,
Secretary of War.

Mr. NORRIS. Mr. President, if the Senator will permit me, my inquiry was not due to the fact that I intended to make any

objection or raise a point of order. I know nothing about the facts, and I presume that we are justified in doing what has been suggested. The point I wanted light on was why, under the general law, an officer could not be properly promoted without any special legislation in his behalf?

Mr. CHAMBERLAIN. He is not subject to promotion as a pay clerk; it takes a special act to authorize this promotion. I want to say to the Senate that in the letter of Secretary of War Garrison of January 7, 1916, which I have read, he recommended the passage of the bill which proposed to authorize the promotion of Mr. Brett to the grade of captain, while the provision of this bill authorizes his promotion to the grade of first lieutenant.

Mr. OVERMAN. How will that affect other first lieutenants in the Quartermaster Corps?

Mr. CHAMBERLAIN. It will not affect them at all.

Mr. OVERMAN. It is personal legislation, and I think is bad legislation on an appropriation bill. I think the Senator will agree with me that legislation of this kind—taking men out of the departments and promoting them by special act—ought not to be passed. I think a bill for this purpose ought to stand on its own merits, if there is any merit in it, and it ought not to be put on an appropriation bill.

Mr. CHAMBERLAIN. A bill providing for this very purpose has already passed the Senate.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs, was, on page 72, after line 17, to insert:

That for the replacement of a bridge across the Republican River near Fort Riley, Kans., under the direction of the Secretary of War, $30,000, or so much thereof as may be necessary, and the Treasurer of the United States is hereby directed and authorized to retain, out of any moneys due or that may become due from the Government of the United States to the State of Kansas, a sum equal to the amount expended for the replacement of said bridge.

Mr. NORRIS. I should like to ask for some explanation in regard to this bridge. Does it connect two parts of a military reservation?

Mr. CURTIS. It is the main bridge on the Fort Riley Reservation. The reservation extends to the center of the Republican River, and half of the bridge is on the reservation and the other half is in Geary County, Kans. In 1867 Congress granted to the State of Kansas a small tract of land west of the river if they would construct a bridge over the Republican River and maintain it. The land was conveyed to a bridge company and a contract was let to the bridge company for the construction of the bridge and it was built, but was soon destroyed or fell in the river, and then it was found that the State of Kansas, under its constitution, had no right to rebuild the bridge. So, in the sundry civil bill in 1884 Congress authorized the rebuilding of the bridge, with the understanding that the cost should be deducted from any claim the State of Kansas might have against the Government, and it was rebuilt and remained intact until last year, when the great flood on the Republican River carried it out. As I have said, under its constitution the State of Kansas can not rebuild the bridge, but the Congress can do as it did before, rebuild the bridge and have its claim against the State deducted out of any money that may become due the State.

The amendment provides $30,000 for a macadam bridge which will be permanent and which will enable the bridge to be built higher than the last one. With this amount of money a good substantial bridge can be erected, and even though the State should not repay the Government it should be built because it is a military necessity; because it is the main bridge on the reservation. The river can not be crossed without a bridge, and the Government now has to maintain a temporary pontoon bridge to accommodate the soldiers.

Mr. NORRIS. It is a public bridge?

Mr. CURTIS. It is a public bridge.

Mr. NORRIS. Free?

Mr. CURTIS. Certainly.

Mr. NORRIS. Is it used to connect any cities?

Mr. CURTIS. It is on the main road running from east to west across the State of Kansas from Kansas City, Mo.

Mr. NORRIS. Are there any cities near by?

Mr. CURTIS. Junction City is about 6 miles west, and Manhattan about 18 miles east.

Mr. NORRIS. I wanted to ask the Senator about that part of the amendment which provides that the Treasurer of the United States shall retain enough to pay for this bridge out of any money due from the Government of the United States to the State of Kansas. Is there anything in that provision? Is there any money that the Government owes Kansas, or will there be any, out of which this can be retained?

Mr. CURTIS. The Senator knows about matters of that kind. All the States have claims. I know the State of Kansas has two claims against the Government. Whether they will be allowed or not, I do not know. Claims have been allowed heretofore, and the amount was retained. I want to say to the Senator from Nebraska, however, that, whether it can be retained or not, it is a military necessity, and the Government ought to build the bridge. But we are perfectly willing that it shall have a claim against the State of Kansas because of that contract which was made years ago.

Mr. NORRIS. Of course I do not know but that the Government ought to build it, anyway. The thing that struck me as being peculiar was that there should be a statement in the bill that they should retain the cost of the bridge out of money that was going to the State of Kansas, when, I presume, there is not any such money going, and there never will be. I do not know as to that. I was wondering if there was any foundation for that.

Mr. CURTIS. Several years ago, I think about seven, the State of Kansas recovered over $500,000 from the United States.

Mr. NORRIS. Did it get the money?

Mr. CURTIS. It got the money.

Mr. NORRIS. At the same time that the Government had to build a bridge that it had agreed to put in and maintain?

Mr. CURTIS. The Government built the bridge in 1884 and retained the money to pay for the bridge out of a claim the State had established against the Government.

Mr. NORRIS. They kept out the money?

Mr. CURTIS. Oh, certainly. It built the bridge and retained the amount it had expended. If the Senator desires, I will read a statement from the department that it is absolutely a military necessity, and the department even urges that the appropriation become immediately available.

The PRESIDING OFFICER. The question is on the adoption of the committee amendment.

The amendment was agreed to.

The next amendment was, on page 72, after line 25, to insert:

That the use of Government passenger vehicles, whether horse-drawn or motor-propelled, by officers of the Army, soldiers, or employees for private purposes is hereby declared an offense to be punished as courts-martial may determine: *Provided*, That all Government passenger vehicles, whether horse-drawn or motor-propelled, shall have painted thereon in a conspicuous place and in letters not less than 3 inches in height the following: "War Department—For official use only."

Mr. OLIVER. Mr. President, I will ask the chairman of the committee whether the use of Government property in this direction has gone to any great extent, so as to render legislation of this kind necessary?

Mr. CHAMBERLAIN. Mr. President, I will say that the use of these Government vehicles, whether horse-drawn or motor-propelled, has been abused. Almost all of the committees limit the use of such vehicles in this way. The Senator will remember that on the Appropriations Committee, in making appropriations, we limit their use. I think in the District bill they have the same provision, and in other appropriation bills practically the same clause has been inserted.

Mr. OLIVER. I will ask the Senator further whether he does not think this language is so broad as perhaps to reach cases that it is not intended to reach?

Mr. CHAMBERLAIN. I rather think it is pretty broad, Mr. President.

Mr. OLIVER. It seems to me that under this language the Secretary of War would have to label his carriage, which is furnished by the Government, as belonging to the War Department and for official use only.

Mr. CHAMBERLAIN. I had hoped the amendment might be adopted, and in conference we could correct it to reach the cases that actually ought to be reached.

Mr. OLIVER. With that assurance, I will not say anything further.

Mr. JONES. Mr. President, I should like to ask the Senator a question. This is intended as a permanent law; is it not?

Mr. CHAMBERLAIN. Yes, sir.

Mr. JONES. This is general legislation on an appropriation bill, I understand.

Mr. CHAMBERLAIN. I think it would really come within the rule laid down by the Vice President, that it limits the use of the appropriation made for these particular purposes.

Mr. JONES. Yes; but the Presiding Officer of the Senate held that an amendment of that kind was not a general appropriation.

Mr. CHAMBERLAIN. I thought he had held that it was clearly proper to have an amendment in a bill limiting the use of the money appropriated for a specific purpose.

There is money appropriated in this bill to purchase these motor-propelled vehicles, and this is simply a limitation on the use of that money.

Mr. JONES. This makes it a crime. This provides for punishment by a court-martial. The Senator need not be afraid that I am going to make the point of order. I am just bringing out what this is—that it is general legislation upon an appropriation bill.

Mr. CHAMBERLAIN. The Senator is a member of the Appropriations Committee with me, and the Senator knows how much the use of these machines by Government employees is abused.

Mr. JONES. Oh, yes.

Mr. CHAMBERLAIN. I think Senator Bristow, of Kansas, at one time had printed as a public document the number of these vehicles that were in use, and it was rather a surprise to me; and many of them had no lettering on them at all to indicate that they belonged to the Government. The result was that they were used for social and other purposes; and this is to stop it, if it is possible to do that.

Mr. JONES. I am heartily in favor of it, and I am in favor of putting it on an appropriation bill. I merely want to call attention to the fact that sometimes the Senate is in favor of putting general legislation on an appropriation bill, and at other times it is not in favor of doing it. Here just a few days ago we had some very important matters that we were very desirous of getting on an appropriation bill, but the Senate was very much opposed to it.

This is a general appropriation bill. This is the military appropriation bill. There are many pieces of general legislation in it, desirable legislation. If they can not be gotten through as separate measures, I think it is very proper for this committee to put them on an appropriation bill. But it is very peculiar that the Senate sometimes is in favor of certain kinds of legislation and glad of the opportunity to put it on appropriation bills, while in the case of other legislation, very desirable and of general interest throughout the country, it is not even possible to suspend the rules, let alone to get unanimous consent to get them on.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 73, after line 7, to insert:

Nothing contained in section 1325 of the Revised Statutes shall render ineligible any former cadet honorably discharged from the Military Academy for deficiency in studies, if otherwise qualified, as a civilian candidate for appointment to any vacancy in the grade of second lieutenant under class 6 of the national defense act approved June 3, 1916.

Mr. DU PONT. Mr. President, I am opposed to that provision. It simply means that a young man in the Military Academy who has been idle or inattentive to his studies, and fails to pass his examinations, can be promoted in the Army in advance of his classmates who have labored faithfully and efficiently to perform their duties. I think it is very bad legislation and all wrong. In justice and equity, I trust that it may be rejected.

Mr. CHAMBERLAIN. Mr. President, I have a very high regard for the opinion of my distinguished colleague and member of the committee; but it seems to the committee that a young man, say, who had been at West Point three years and six months and failed on some one study—possibly some study of minor importance—was calculated to make a better officer, if otherwise qualified, if he stood the examination necessary for the appointment of a cadet from civil life than the civilians themselves, or a certain class of civilians provided for in the national defense act of June 3, 1916. That was the purpose of it. In other words, the Army needs more officers now, and you could not get a more capable officer than a young man who might have stayed at West Point for nearly the full time. I know a case where a young man stayed there until almost the time of graduation; and I know another young man who stayed at the Naval Academy until within one month of his graduation, and he was let out just for some deficiency. Now, those young men, in the very nature of things, will make good officers if they can pass the civilian examination and then win a commission; and that was the purpose of the committee.

Mr. DU PONT. Mr. President, I should like to say, with reference to those particular cases, that the young man who was within a month of his graduation, to whom the Senator has alluded, had only to wait one month to come in after his classmates. The rule is now that they must wait to be commissioned until after their classmates have graduated and have received their commissions. As everyone knows who has investigated the subject, the great mass of the reductions at West Point are in the first six months, at which time they eliminate a large percentage, and at the close of the first year a large number also. In the second year they are less numerous, while in the third and fourth years it is rare, because the sifting-out process has had its effect, and only a few are discharged for deficiency in study.

If this paragraph is to remain in the bill, it means that a great many young men who have been at West Point from six months to a year, and who have displayed no industry and no capacity in the performance of their studies, will outrank their classmates who have well and faithfully followed their appropriate studies, and they will outrank them by two to three years in the Army.

Now, that is all wrong. There may be an occasional case, but it is very rare, when a man who has been there three years or three years and a half is discharged for deficiency in his studies; but in that case he only has to wait six months to come in behind his classmates.

I think this is strictly bad legislation and all wrong, and I will make a point of order on it if necessary. I make the point of order, Mr. President.

The PRESIDING OFFICER. The Senator from Delaware will state his point of order.

Mr. CHAMBERLAIN. I hope the Senator will not make the point of order against it, Mr. President.

Mr. DU PONT. I have no recollection of this matter being discussed in the committee when I was present. It is all new to me; but I can not conscientiously permit this legislation to become a law if I can help it. I believe it is a great injustice to the cadets in the Military Academy, to the Regular Army, and to discipline generally. I shall certainly make the point of order that it is new legislation.

Mr. WARREN. Mr. President, will the Senator withhold his point of order for a moment?

Mr. DU PONT. I withhold it.

Mr. WARREN. Mr. President, the point made by the Senator from Delaware is exactly the stand that we have all taken heretofore. Here, however, is a quite different case or situation. We are short more than a thousand second lieutenants. Now, the men that are going in to fill those places are to be drawn, first, from the Military Academy; second, they are to be privates from the ranks; third or fourth, I do not remember which, they are to be from the National Guard; and third or fourth—the other alternative—they are to be honor graduates from the schools. These can only come in at the end, and can only come in upon approval after examination as civilian applicants.

The question only comes up because of the conditions of the present. With the present shortage, are you going to force these men who have had two or three years' study, and who have, most of them, since perfected themselves in their studies, intending to enter the Army, and place them in worse position than civilians who have had no experience or military education whatever?

That is the only question. This would only be for the present—to fill the number just this one year—and if not so stipulated I should be glad to have it stipulated. It was thought better to utilize this material—all we have of it that could prove to be good. Now, all that we could do with these men who have been at West Point is that they must take another examination, and they must come in as civilians, and they then come in after the West Point men, after the privates, after the National Guard, and after the schools.

Mr. DU PONT. Mr. President, the Senator from Wyoming has stated that these men have served at the academy for two or three years. That is a pure assumption. Anybody who has examined the cadet registers will see that that is usually not the case. The great mass of them have only served six months or a year. I do not suppose there is 5 per cent of those who are found deficient in their studies who are found deficient after the expiration of the first year, and certainly after the second year there is not 1 per cent of all those dropped. So it is very easy to make the assumption, but the fact is that by adopting this amendment you will allow a lot of young men who are indolent, stupid, or badly behaved to come into the Army at least two years, and probably three years, ahead of their classmates who have been honest, faithful, intelligent, and deserving of recognition, whereas the other men have not. There is such a small number of these men rejected toward the approach of their graduation that I think it will have no effect upon the public service. They could well afford to wait; and there is nothing to show that they have perfected themselves after they have left West Point.

Mr. WARREN. They have to pass the examination.

Mr. DU PONT. They have to pass the examination, but it is largely a question of character, after all. If a young man who has the advantage of an education at the Military Academy is not willing to avail himself of it, or has not the intelligence to avail himself of it, why should he be put in a more advantageous position, when commissioned in the Army, than his

classmates who have performed their whole duty faithfully and intelligently?

Mr. WARREN. Mr. President, may I ask the Senator a question?

Mr. DU PONT. I yield to the Senator from Wyoming.

Mr. WARREN. Has not the Senator at times advocated the replacement of young men when they have been rejected for disqualification, putting them back in the academy or in the Army? The Senator does not consider that that is any stain on their character sufficient to keep them out of the academy?

Mr. DU PONT. I do not quite understand what the Senator means.

Mr. WARREN. The Senator has from time to time advocated, and has been more liberal than I have been willing to be, taking those who have not been accepted as 100 per cent good and that have been dismissed from the academy, and restoring them.

Mr. DU PONT. I have advocated the restoration of three or four cadets that I thought were dismissed from the academy by court-martial in violation of every principle of justice and equity. I have done that and have striven by every means in my power to right those wrongs. I have never advocated—on the contrary I have refused—when young men have come and applied to me who had been negligent in their studies and failed to pass their examinations; I have refused to interest myself in their cases. I have turned down two men here in the last year who came to see me under conditions of that kind.

Mr. WARREN. The Senator puts his judgment against that of the academic board as to some of them, but not as to the others.

Mr. DU PONT. Not at all. These men that I was instrumental in getting restored were convicted for military offenses by the sentence of a court-martial, and most unjustly so. They were not found deficient in their studies at all. The Senator is mistaken in his assumption. I referred to the four cadets—Sasse, Freelano, and two others who were restored.

Mr. WADSWORTH. Mr. President, for one I can see very clearly, I think, the force of the objection raised by the Senator from Delaware, in that under the language of this provision a boy who has spent 6 months or a year or even 18 months at West Point and has been dropped for failure in his studies, although that involves an honorable discharge, may immediately after being dropped apply for permission to take an examination for commission in the Regular Army from civil life, and thereby gain his commission a year or two years in advance of the boys with whom he entered West Point——

Mr. DU PONT. Probably three years.

Mr. WADSWORTH (continuing). And who, upon completing their education, find themselves outranked by the man who failed. On the other hand, there is a great deal of value in this provision; and I think it can be made more valuable, and the Senator's objection possibly may be withdrawn, if we add a proviso the language of which I have not very clearly arranged in my own mind. But I will ask the chairman of the committee if it would not be possible, in order to meet the objections raised by the Senator from Delaware, to add a proviso somewhat after this fashion:

Provided, That no such former cadet shall be admitted to examination for commission in the Army until the cadets in the class of which he was a member have received their commissions.

Mr. CHAMBERLAIN. That is the law, I will say to the Senator.

Mr. DU PONT. That is actual law, and that is what I am fighting to retain.

Mr. WADSWORTH. My ignorance of the law is perfectly apparent, then; and I think the Senator from Delaware is correct.

Mr. CHAMBERLAIN. Mr. President, may I interrupt the Senator? Take a young man, in the illustration that the Senator puts, who has been at the academy for six months and is deficient, we will say, in English literature, or something of the kind. If he goes out of the institution and goes back into civil life, why not put him in exactly the same category that he was in before he went to West Point? In other words, why not place him on an equal footing with other men in civil life and say to him, "Here, if you study up so that you can pass an examination such as is required from a civilian you can get your commission in the Army"? Why should he, because he stayed at West Point only six months, be placed in a different category from a man in civil life who goes out of a high school, for instance, and then stands the examination?

Mr. WADSWORTH. I think the only way I can answer that inquiry is to make one in reply. Why should the boy who has failed be given a potential advantage over the boy who is going to succeed?

Mr. CHAMBERLAIN. He does not have any potential advantage. He simply goes back into the walks of civil life and then takes his chances with the balance of the civilians.

Mr. WADSWORTH. And yet he may outrank the boys who have spent four years at West Point and who have proved themselves, presumably, better fitted for commissions in the Army.

Mr. WARREN. And so will the hundreds of civilians that will go into the Army in this particular case. This item is put in here, let me say, as a stop-gap, just for the present time only. I agree with the Senator who has made the objection, and I agree with the Senator from New York, that the law, as a general law—and I helped to make it so—is good and in ordinary circumstances should prevail. The only question is whether now, when we are adding hundreds of second lieutenants from civil life after they are examined, we ought to bar these men out and put them in a worse position than if they had never been to school at all. It ought to be confined—and I am perfectly willing, if this language here is not right, to make it so—so that it will be only for the present, for the filling of the present vacancies which can not be filled from West Point. The Senator is entirely right. The law, as a standing statute, is right in ordinary times.

Mr. DU PONT. Mr. President, the Senator from New York has just inquired why we should put these men in a worse position than they are now. We do not put them in a worse position by maintaining the existing law. We put them in the same position that they would have had if they had graduated at the Military Academy. Surely that is no injury to them, nor is there any injustice to maintain them in the position which they would have had if they had graduated with their classmates. But why they should be given a premium and accorded promotion over their classmates I fail to see. I think a little reflection will show that it is very injurious to the morale of the Military Academy. If a man who has systematically neglected his studies, has misbehaved, and has been careless in his duties, can be rewarded and have a quicker and better promotion than his classmates whose conduct has been directly the opposite, is not that putting a premium on misconduct and laziness? Is not that discouraging to those who want to do what is right? Of course it is.

I must insist upon my point of order, on the ground that the amendment is general legislation changing existing law in an appropriation bill.

The PRESIDING OFFICER. If the Senator insists on his point of order, the Chair is disposed to rule that the point is well taken, and so rules. The Secretary will state the next amendment of the committee.

The reading of the bill was resumed.

The next amendment was, on page 73, after line 15, to insert:

The President, in time of war or when war is imminent, is empowered, through the Secretary of War, to take possession and assume control of any system or systems of transportation, or any part thereof, and to utilize the same, to the exclusion as far as may be necessary of all other traffic thereon, for the transfer or transportation of troops, war material and equipment, or for such other purposes connected with the emergency as may be needful or desirable. And the Secretary of War is hereby authorized, in time of war or when war is imminent, to secure the services of such person or persons, whether in the military service or not, which may seem to him necessary or desirable, for the efficient organization of the quartermaster's department, the transportation of troops, the gathering, movement, and distribution of supplies, and the orderly operation of all the functions of said department. Such services shall be paid out of any moneys in the Treasury not otherwise appropriated on vouchers approved by the Secretary of War.

Mr. OLIVER. Mr. President, I assume that the committee has not reported a very important and very drastic amendment like this without thorough consideration. I appreciate the importance of the legislation contained in an amendment like this. I simply wish to ask the chairman of the committee whether in his opinion sufficient care has been exercised in drafting this amendment to safeguard the rights of stockholders in these transportation companies? This is a most important authority to confer upon the Secretary of War, and it seems to me that before it is adopted it should receive very earnest and careful consideration.

When the naval bill was before the Senate the other day, a similar amendment was proposed by the Committee on Naval Affairs, but one that was very much broader in its scope, and it was ruled out upon a point of order. The object of this amendment, in my opinion, is very much more legitimate than that; and I should just like to have the chairman answer the inquiry that I addressed to him a short time ago.

Mr. CHAMBERLAIN. Frankly, this provision was not as carefully considered by the committee as these great questions ought to be considered. There were no hearings had on it. No representatives of the railroad companies were heard nor were any representatives of the War Department heard by the

committee. But after some discussion of the matter the committee formulated this provision. The reason for it at the time, the thought that suggested itself to the committee, was the complaint that was generally being made that these young men of the National Guard who were being sent from Chicago and other points in the Middle West to the border were herded on cattle cars, and so with the young men, I think, from other parts of the country. They have no conveniences there for the young men or for troops, as a matter of fact, in cases where they have to be removed.

The committee formulated this provision thinking it might have the effect of letting the railroad companies understand that if they could not handle these things in time of war or if they could do it in time of peace or when war threatened they might expect the Government to take charge. I believe it would be better for the Government to take charge of these facilities of transportation in case of an emergency. I believe, however, that the stockholders would be fully protected under the provisions of the bill. I believe in case of an emergency, without any law the Government could take charge of them.

Mr. OLIVER. I am rather inclined to agree with the Senator in that respect, and while, of course, the amendment is open to a point of order, I think it is so important that I do not propose to raise the question of order. I simply would like to have the chairman of the committee, in whose judgment I place very great confidence, see that the amendment is very carefully scrutinized before it is finally passed upon in the committee of conference, because it is presumable if the railroads fall down in the movement of troops a far greater mixup would in all probability occur by reason of putting new men in charge on the part of the Government.

Still the Government in time of war ought to have almost unlimited powers when it comes to the transportation of troops and supplies. Whether that authority should be conferred upon them when war is imminent in the opinion of perhaps an impulsive Secretary of War I am not quite sure. I am rather inclined to demur to the insertion of the words "when war is imminent" in the amendment.

Mr. CHAMBERLAIN. I do not believe that in our Government there would ever be a time when the Government would have to take possession of the roads. Even if they did the roads would be operated probably by the same official management and employees that the railroad company used when they were operating the lines. But we thought in view of difficulties that have been confronting the country it might be a wise provision to put in the bill.

In order to perfect the amendment I desire to strike out the words "Quartermaster's Department," at the end of the page, and insert the words "War Department."

Mr. BRADY. Mr. President, the chairman of the committee will remember that when we were discussing this section in the committee I raised a question relative to whether we should insert the words "or when war is imminent." I still think it would be well to strike out those words. The section now reads:

> The President, in time of war or when war is imminent, is empowered, through the Secretary of War, to take possession and assume control of any system or systems of transportation, or any part thereof, and to utilize the same, to the exclusion as far as may be necessary of all other traffic thereon, for the transfer or transportation of troops, war material, and equipment, or for such other purposes connected with the emergency as may be needful or desirable. And the Secretary of War is hereby authorized, in time of war or when war is imminent, to secure the services of such person or persons, whether in the military service or not, which may seem to him necessary or desirable, for the efficient organization of the Quartermaster's Department.

It appears to me that this section is too far-reaching in the power that it grants. We all agree that the balance of the section should be inserted so far as it relates to a time of war, but I can not bring myself to believe that it is fair and equitable to permit the Government to take possession of hundreds of millions of dollars worth of private property when it is deemed by some one individual that war is imminent. War can only be declared by Congress, and we have no right under the Constitution, as I understand it, to declare at any time that "war is imminent," and under this provision if the President should decide in his own mind that war was imminent he could, through the Secretary of War, take possession of and assume control of any system or systems of transportation, or any part thereof, and utilize the same for such purposes connected with the emergency as he might deem needful or desirable.

In the present instance of our trouble with Mexico war was certainly imminent. Yet I do not believe there is a Senator in this Chamber who believes that the Government would have been justified in taking possession of the lines of our railroads in order to transport our troops, and if it was not necessary in this present instance there is no instance that could arise which would make it more so. It would be more satisfactory and more equitable if we make this law apply only to a time of war and not to when "war is imminent." I move to strike out the words "when war is imminent."

Mr. CHAMBERLAIN. I have no objection to the amendment to the amendment.

Mr. BRADY. Therefore I move to strike out the words "or when war is imminent" on page 73, line 16, and in line 24, on the same page, I move to strike out the words "or when war is imminent."

Mr. LEE of Maryland. Mr. President, I hope those words will not be stricken out. It seems to me the discretion given to the President is one he ought to have. He would have preparation to make, and it ought not to be when war is actually on, but in advance of apparently certain war. If there is any virtue in this provision, the power given to the Executive is as much needed for one time as it is for the other. As a matter of fact, this whole word "preparedness" means to get ready in advance. It does not mean to do a thing after the event has occurred, but to be ready for it in advance.

I merely make the suggestion that if you trust the President in one case you might as well trust him in the other.

Mr. BRADY. The remarks of the Senator from Maryland are very pertinent, but I can not agree with his line of reasoning. We are giving a tremendous power in this instance to one man. When the Government takes possession of millions of dollars worth of private property for its own use, with the right to say how long it shall use it and what it shall pay for that use, I believe that Congress should be consulted. Furthermore, it would be a detriment to our Government to act under this provision if it were placed on our statute books, because it would be furnishing the enemy with notice that we were preparing for action. We should not let a foreign nation know that we believed war was imminent until we were ready to act. If we call out our troops and take possession of railroad property under an article of war, we have served notice on the enemy that we expect war, and, in fact, it would be equivalent to a declaration of war. It would be much better to leave us in a position for Congress to act when such a condition may arise. I fully agree with what the Senator from Maryland says, that it is necessary to be prepared in case of an emergency, but I do not believe we should do that to the extent of taking possession of private property simply on the authority of one man without the sanction of the Congress, and I sincerely hope that the amendment will be adopted.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Idaho [Mr. BRADY] to the amendment.

Mr. VARDAMAN. I ask that it be again stated.

The SECRETARY. On page 73, line 16, strike out the words "or when war is imminent," and in line 24 strike out the words "or when war is imminent."

The amendment to the amendment was agreed to after a division.

Mr. CHAMBERLAIN. There is another amendment which I suggested striking out the words "quartermaster general," at the bottom of page 74, and inserting "War Department."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 74, after line 5, to strike out:

NATIONAL GUARD.

> Arming, equipping, and training the National Guard: To provide for the purchase, under such regulations as the Secretary of War may prescribe, of horses conforming to the Regular Army standards for the use of Field Artillery, Cavalry, signal companies, engineer companies, ambulance companies, and other mounted units of the National Guard, said horses to remain the property of the United States and to be used solely for military purposes. Horses so purchased may be issued not to exceed 32 to any one battery, troop, or company, or 4 to a battalion or regimental headquarters, under such regulations as the Secretary of War may prescribe, $200,000.
>
> To provide for the procurement of forage, bedding, shoeing, veterinary service and supplies for horses that may be owned by or issued to organizations of the National Guard, $100,000.
>
> To provide for the compensation of competent help for the care of matériel, animals, and equipment thereof, under such regulations as the Secretary of War may prescribe: *Provided*, That the men to be compensated, not to exceed five for each battery, troop, or company, shall be duly enlisted therein and shall be detailed by the battery, troop, or company commander under such regulations as the Secretary of War may prescribe, and shall be paid by the United States disbursing officer in each State, Territory, and the District of Columbia, $100,000.
>
> To provide for the participation of the whole or any part of the National Guard in encampments, maneuvers, or other exercises, including outdoor target practice and field and coast defense instruction, either independently or in conjunction with any part of the Regular Army, and there may be set aside from the funds apportioned for that purpose and allotted to any State, Territory, or the District of Columbia such portion of said funds as may be necessary for the payment, subsistence, transportation, and other proper expenses of such portion of the National Guard of said State, Territory, or the District of Co-

lumbia as shall participate in such encampments, maneuvers, or other exercises, including outdoor target practice and field and coast defense instruction; and the officers and enlisted men of such National Guard while so engaged shall be entitled to the same pay, subsistence, and transportation as officers and enlisted men of corresponding grades of the Regular Army are or hereafter may be entitled to by law: To provide for camps of instruction for the instruction of officers and enlisted men of the National Guard. Such camps shall be conducted by officers of the Regular Army detailed by the Secretary of War for the purpose, and may be located either within or without the State, Territory, or District of Columbia to which the members of the National Guard designated to attend said camps shall belong. Officers and enlisted men attending such camps shall be entitled to pay and transportation, and enlisted men to subsistence in addition at the same rates as for encampments or maneuvers for field and coast-defense instruction. To be immediately available, $500,000: *Provided*, That of this sum $100,000, or as much thereof as may be necessary, is authorized to be expended for the payment of transportation of troops of the Regular Army in connection with joint camps of instruction of the National Guard: *Provided further*, That hereafter nothing in the act of February 4, 1887, known as the act to regulate commerce, or any amendments thereto, shall be construed to prohibit any common carrier from giving reduced rates for members of National Guard organizations traveling to and from joint encampments with the Regular Army.

To provide for the attendance of selected officers or enlisted men of the National Guard who pursue a regular course of study at any military service school of the United States except the United States Military Academy; or to be attached to an organization of the same arm, corps, or department, to which such officers or enlisted men shall belong, for routine practical instruction at or near an Army post during a period of field training or other outdoor exercises; and such officer or enlisted men shall receive, out of any National Guard allotment of funds available for the purpose, the same travel allowances and quarters or commutation of quarters, and the same pay, allowance, and subsistence to which officers or enlisted men of the Regular Army would be entitled for attending such school, college, or practical course of instruction under orders from proper military authority while in actual attendance at such school, college, or practical course of instruction, $50,000: *Provided*, That in no case shall the pay and allowances authorized herein exceed those of a captain.

To provide for pay and allowances of officers of the National Guard assigned to duty in the militia bureau, $12,000.

To provide for pay of property and disbursing officers of the several States, Territory of Hawaii, and District of Columbia, $44,150.

For providing arms, ordnance stores, quartermaster stores, camp equipage, and all other military supplies for issue to the National Guard; for the promotion of rifle practice, including the acquisition, construction, maintenance, and equipment of shooting galleries and suitable target ranges; for the hire of horses and draft animals for the use of mounted troops, batteries, and wagons; for forage for the same; and for such other incidental expenses in connection with lawfully authorized encampments, maneuvers, and field instruction as the Secretary of War may deem necessary; and for such other expenses pertaining to the National Guard as are now or may hereafter be authorized by law, $2,000,000: *Provided*, That the Secretary of War is hereby authorized to relieve any State, Territory, or the District of Columbia from further accountability for all United States property issued thereto for the use of the Organized Militia thereof which the records of the War Department show to have been lost or destroyed prior to December 31, 1911.

To provide for the necessary clerical and office expenses of the Militia Bureau, authorized by section 67 of the act approved June 3, 1916: Chief clerk, $2,000; clerks—2 of class 4, 3 of class 3, 7 of class 2, 15 of class 1, 8 at $1,000 each; messenger; 2 assistant messengers; 2 laborers:

For miscellaneous expenses, including stationery, furniture, telegraph and telephone service, and necessary printing and binding, $4,000:

Travel of Federal officers in carrying out the provisions of section 93 of the act of June 3, 1916, $35,000:

Travel of inspector instructors and sergeant instructors, joining at State stations for duty and returning to duty with regiments, $15,000:

Travel of inspector instructors in making visits of instruction to armories, $60,000: *Provided*, That said inspector instructors traveling shall not receive more than their actual expenses out of these appropriations:

Travel of Federal officers in connection with State camps of instruction and joint camps, $60,000:

Inspection of target ranges and mobilization camps for use of the National Guard, $1,000:

Inspection of material pertaining to Field Artillery and Signal Corps in the hands of the National Guard, $4,000:

Transportation of supplies (including transportation of animals bought for the use of Cavalry, Field Artillery, signal companies, Engineer companies, ambulance companies, and other mounted units) of the National Guard, $175,000:

Expenses of sergeant instructors on duty with the National Guard, including quarters, fuel, light, medicines, and medical attendance, $100,000:

Provided, That whenever practicable inspector instructors shall use the State armories for offices;

Office rent of inspector instructors, $25,000.

All the money hereinbefore appropriated for arming, equipping, and training the National Guard shall be disbursed and accounted for as such and for that purpose shall constitute one fund.

Arms, uniforms, equipment, etc., National Guard: To procure by purchase or manufacture and issue from time to time to the National Guard upon requisition of the governors of the several States and Tertory, or the commanding general National Guard of the District of Columbia, such number of United States service arms with all accessories, Field Artillery and Coast Artillery material, Engineer, signal, and sanitary material, accouterments, field uniforms, clothing, equipage, publications, and military stores of all kinds, including public animals, as are necessary to arm, uniform, and equip for field service the National Guard in the several States, Territory, and the District of Columbia: *Provided*, That of the sum herein appropriated $76,000, or so much thereof as may be required, may, in the discretion of the Secretary of War, be made available for the purchase and maintenance of material and equipment necessary for the proper instruction in military aviation of such officers and enlisted men of the National Guard as may be authorized by the War Department to attend the United States Aviation School, $2,000,000.

Ranges for Field Artillery target practice: For the acquisition by purchase or condemnation of the necessary land for suitable ranges for Field Artillery target practice, the land to be of such general character as to permit of use for instruction of troops of other arms to be located within the eastern and western military departments, and to defray the expenses incident to locating and acquiring title thereto, $300,000.

Supplying and exchanging Infantry equipment, National Guard: For the purpose of manufacturing, exchanging, and issuing model of 1910 equipment to the Infantry and other dismounted organizations of the National Guard of the several States, Territory of Hawaii, and the District of Columbia: *Provided*, That whenever in the opinion of the Secretary of War a sufficient number of Infantry equipment, model of 1910, shall have been procured and shall be available for the purpose the Secretary of War is hereby authorized to issue on the requisition of the governors of the several States and Territory of Hawaii or the commanding general of the District of Columbia National Guard such numbers thereof as are required for equipping the National Guard in said States, Territory of Hawaii, and the District of Columbia, without charging the cost or value thereof or any expenses connected therewith against any allotments to said States, Territory, or the District of Columbia: *Provided*, That the equipment thus issued shall be receipted for and shall remain the property of the United States and be annually accounted for by the governors of the several States, Territory of Hawaii, and the commanding general of the District of Columbia National Guard as now required by law, and that each State, the Territory of Hawaii, and the District of Columbia shall, upon receipt of new equipment, turn in to the Ordnance Department of the United States Army, without receiving any money credit therefor and without expense for transportation of Infantry equipment now in its possession, the property of the United States, and replaced by articles of the model of 1910 equipment, $1,000,000.

And insert:

ARMING, EQUIPPING, AND TRAINING THE NATIONAL GUARD.

To provide for the purchase of horses under the provisions of section 89 of the act of June 3, 1916, $50,000.

To provide for the purchase and issue of forage, bedding, shoeing, veterinary services and supplies for horses, under the provisions of section 90 of the act of June 3, 1916, $25,000.

To provide for the compensation of competent help for the care of matériel, animals, and equipment, under the provisions of section 90 of the act of June 3, 1916, $25,000.

To provide for the participation of the whole or any part of the National Guard in encampments, maneuvers, or other exercises, including outdoor target practice and field or coast defense instruction, and for camps for the instruction of officers and enlisted men of the National Guard, under the provisions of sections 95 and 97 of the act of June 3, 1916, $500,000: *Provided*, That of this sum, $100,000, or so much thereof as may be necessary, is authorized to be expended for the payment of transportation of troops of the Regular Army in connection with joint camps of instruction of the National Guard: *Provided further*, That hereafter nothing in the act of February 4, 1887, known as the act to regulate commerce, or any amendments thereto, shall be construed to prohibit any common carrier from giving reduced rates to the Government for the transportation of troops, quartermaster and hospital supplies, military stores and equipment, nor from giving reduced rates for members of National Guard organizations traveling to and from joint encampments with the Regular Army.

To provide for the attendance of selected officers or enlisted men of the National Guard at service schools, etc., under the provisions of section 99 of the act of June 3, 1916, $50,000.

To provide for the pay and allowances of officers of the National Guard assigned to duty in the Militia Bureau under the provisions of section 81 of the act of June 3, 1916, $12,000.

To provide for the pay of property and disbursing officers of the several States, Territories, and the District of Columbia, under the provisions of section 67 of the act of June 3, 1916, $44,150.

For providing, under the provisions of section 67 of the act of June 3, 1916, arms, ordnance stores, quartermaster stores, camp equipage, and all other military supplies for issue to the National Guard; for the promotion of rifle practice, including the acquisition, construction, maintenance, and equipment of shooting galleries and suitable target ranges; for the hire of horses and draft animals for the use of mounted troops, batteries, and wagons; for forage for the same; and for such other incidental expenses in connection with lawfully authorized encampments, maneuvers, and field instruction as the Secretary of War may deem necessary; and for such other expenses pertaining to the National Guard as are now or may hereafter be authorized by law, $1,000,000.

To provide for the necessary clerical and office expenses of the Militia Bureau authorized by section 67 of the act of June 3, 1916: Chief clerk, $2,250; chief of division, $2,000; clerks—2 of class 4, 3 of class 3, 7 of class 2, 15 of class 1; 8 at $1,000 each; messenger; 2 assistant messengers; 2 laborers; in all, $52,050.

For miscellaneous expenses, including stationery, furniture, telegraph and telephone service, and necessary printing and binding, $4,000.

For travel of Federal officers in carrying out the provisions of section 93 of the act of June 3, 1916, $17,500.

Travel of inspector-instructors and sergeant-instructors, joining at State stations for duty and returning to duty with regiments, $7,500.

Travel of inspector-instructors in making visits of instruction to armories, $30,000: *Provided*, That said inspector-instructors traveling shall not receive more than their actual expense out of these appropriations.

Travel of Federal officers in connection with State and joint camps of instruction, $30,000.

Inspection of target ranges and mobilization camps for use of the National Guard, $1,000.

Inspection of material pertaining to Field Artillery and Signal Corps in the hands of the National Guard, $2,000.

Transportation of supplies (including transportation of animals bought for the use of Cavalry and Field Artillery organizations) of the National Guard, $75 000.

For the expense provided for under the provisions of section 67 of the act of June 3, 1916, of enlisted men of the Regular Army on duty with the National Guard, $50,000: *Provided*, That whenever practicable inspector-instructors shall use the State armories for offices.

For the office expenses provided for under the provisions of section 67 of the act of June 3, 1916, of officers of the Regular Army on duty with the National Guard, $12,500.

All the money hereinbefore appropriated for arming, equipping, and training the National Guard shall be disbursed and accounted for as such and for that purpose shall constitute one fund.

ARMS, UNIFORMS, EQUIPMENT, ETC., NATIONAL GUARD.

To procure, under the provisions of section 83 of the act of June 3, 1916, by purchase or manufacture, and issue from time to time to the National Guard upon requisition of the governors of the several States and Territories or the commanding general National Guard of the District of Columbia, such number of United States service arms with all accessories, field artillery, and coast artillery material, engineer, signal, and sanitary material, accouterments, field uniforms, clothing, equipage, publications, and military stores of all kinds, including public animals, as are necessary to arm, uniform, and equip for field service the National Guard in the several States, Territories, and the District of Columbia: *Provided*, That of the sum herein appropriated $76,000, or so much thereof as may be required, may, in the discretion of the Secretary of War, be made available for the purchase and maintenance of material and equipment necessary for the proper instruction in military aviation of such officers and enlisted men of the National Guard as may be authorized by the War Department to attend the United States aviation school, $2,000,000.

Ranges for Field Artillery target practice: For the acquisition by purchase or condemnation of the necessary land for suitable ranges for Field Artillery target practice, the land to be of such general character as to permit of use for instruction of troops of other arms to be located within the eastern and western military departments, and to defray the expenses incident to locating and acquiring title thereto, $800.

Supplying and exchanging Infantry equipment, National Guard: For the purpose of manufacturing, procuring, exchanging, and issuing model of 1910 equipment to the Infantry and other dismounted organizations of the National Guard of the several States, Territories, and the District of Columbia: *Provided*, That whenever in the opinion of the Secretary of War a sufficient number of Infantry equipment, model of 1910, shall have been procured and shall be available for the purpose the Secretary of War is hereby authorized to issue on the requisition of the governors of the several States and Territories, or the commanding general of the District of Columbia National Guard, such numbers thereof as are required for equipping the National Guard in said States, Territories, and the District of Columbia, without charging the cost or value thereof or any expenses connected therewith against any allotments to said States, Territories, or the District of Columbia: *Provided*, That the equipment thus issued shall be receipted for and shall remain the property of the United States and be annually accounted for by the governors of the several States, Territories, and the commanding general of the District of Columbia National Guard as now required by law, and that each State, Territory, and the District of Columbia shall, upon receipt of new equipment, turn in to the Ordnance Department of the United States Army, without receiving any money credit therefor and without expense for transportation of Infantry equipment now in its possession, the property of the United States, and replaced by articles of the model of 1910 equipment, $400,000.

Mr. LEE of Maryland. I should like to ask how this is going to be taken up. The first proposition is to strike out. The House provides a certain number of appropriations for the National Guard, and in each case the Senate committee comes in and strikes it down, in some of the cases taking out about three-quarters of the amount. I think we ought to take these items up one at a time and see whether the Senate will agree to the action of the Senate committee. The chairman of the committee may have some satisfactory reason that will be a complete explanation, but here is the first amendment to strike out lines 6 to 18, inclusive, on page 74, which is a provision by which the House appropriates $200,000 for the purchase of horses for National Guard units. The Senate committee comes in and cuts it down to an appropriation of $50,000. I should like before saying anything on the subject to hear from the Senator from Oregon as to why he wants to cut down the appropriation for horses for the National Guard to one-quarter of the House provision.

The PRESIDING OFFICER. The Chair understands that the amendment is before the Senate.

Mr. CHAMBERLAIN. Yes; it is one amendment.

The PRESIDING OFFICER. The Senator from Maryland suggested that it be divided.

Mr. CHAMBERLAIN. I may state generally to the Senator that this provision was framed in the Militia Bureau and sent to the Military Affairs Committee as embodying not only the wishes of the bureau with reference to the form of legislation, but the wishes of the bureau as to all the appropriations which are necessary to meet the actual needs of the National Guard.

Take the first item, for instance. Let me call the attention of the Senate to the fact that when the House bill was framed the militia had not been mobilized; they had not been federalized at all. The first item in this amendment provides for horses. The Senator will remember that we had quite a discussion about that the other day, and I thought I showed to the Senator that ample provision had been made under the Quartermaster's Department for the purchase of horses. As a matter of fact, horses for the National Guard have already been purchased. So we regard $50,000 as amply sufficient to buy any that might be needed.

So with all these provisions. The National Guard and the Regular Army have been treated alike, and it has been put under the Quartermaster's Department, in order that they might be treated alike.

Mr. LEE of Maryland. I wish to call attention to the very serious difficulty of providing horses in a hurry for any military body or unit. I read on Saturday to the Senate a letter from Gen. Sadler, of New Jersey, the very efficient and highly capable adjutant general of that State. There was a part of it that I omitted to read, and it should have been included.

In connection with the personal call over the telephone from Gen. Wood to Gen. Sadler, urging the necessity of having regiments of Infantry, two batteries of Field Artillery, two troops of Cavalry, and other units sent immediately to the front, Gen. Sadler went on to give an account of the delays in the inspection and how difficult it was to have this inspection hurried and these horses passed. But before that, what I omitted of his letter is as follows:

As soon as the call came I commenced to option horses, getting them wherever I could, and had more than 800 of them in Seagirt within four days after the mobilization order was received.

Just imagine how much more serious that situation would have been if this capable adjutant general had not foreseen the situation and commenced to option horses as soon as he had knowledge of the call. That illustrates this whole question of the purchases of horses and preparing them for military uses.

I must say that this little sum of $200,000, which is cut down in this item to $50,000, seems to me as really cheeseparing against preparedness. The House allowed this money, and it ought to stand. Under the Swiss system they have all their horses always ready in advance; every horse is provided, just as every man is armed, and the whole scheme is thought out to the last button on the last coat. Not only are the horses prepared, but they are furnished with the kinds of shoe to be put on the horses at different times of the year to keep them from slipping. All things are gotten ready in advance under the Swiss system. The annual mobilization gives perfection of detail.

Mr. CHAMBERLAIN. Let me call the Senator's attention to the fact that in the deficiency appropriation bill over $8,000,000 are appropriated for the purchase of horses for the National Guard, and in a section of this bill $2,500,000 are appropriated.

Mr. LEE of Maryland. Why leave in the appropriation of $50,000 in that case?

Mr. CHAMBERLAIN. We might as well have it cut out, but I knew the Senator would be here.

Mr. LEE of Maryland. I want to enter an objection here. The Senator thinks he has good reason, but I do not believe there is any good reason for not providing according to the scheme provided by the military law of this country that has just been passed for buying these horses in advance and for their preparation for the exigencies and use of the National Guard.

We come now to the items that are exclusively for the National Guard, that have not anything to do with the Regular Army, I believe; they are exclusively for the National Guard, and this is not "cutting down equally," as the Senator said on Saturday. These items are for the National Guard exclusively, and they are being eliminated to the tune of about a 75 per cent cut. I do not want to be here without entering an objection to any such procedure.

Mr. WADSWORTH. Do I understand that the items are to be treated as a separate amendment?

The PRESIDING OFFICER (Mr. BECKHAM in the chair). It is all one amendment to strike out and insert.

Mr. CHAMBERLAIN. I understand it is to be treated as one amendment to strike out and insert.

On page 84 I wish to perfect the committee amendment by inserting, in line 17, after the word "laborers," a comma and the words "at $660 each per annum." I move that amendment to the amendment.

The PRESIDING OFFICER. The question is on the amendment to the amendment.

The amendment to the amendment was agreed to.

Mr. CHAMBERLAIN. I believe, after striking out the House provision, that completes the amendments to insert.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment as amended.

Mr. LEE of Maryland. Mr. President, does not that provision include the provision on page 87 in reference to ranges for Field Artillery target practice?

The PRESIDING OFFICER. Yes.

Mr. CHAMBERLAIN. That is the provision.

Mr. LEE of Maryland. It is a reduction of the appropriation of the House of $300,000 for such ranges to $800?

Mr. CHAMBERLAIN. That is correct.

Mr. LEE of Maryland. That is an extreme illustration of unpreparedness. The amendment reported by the committee reads:

Ranges for Field Artillery target practice: For the acquisition by purchase or condemnation of the necessary land for suitable ranges for Field Artillery target practice, the land to be of such general character as to permit of use for instruction of troops of other arms to be

located within the eastern and western military departments, and to defray the expenses incident to locating and acquiring title thereto, $800.

Mr. President, if there is anything we ought to do for military preparation, it is to acquire these tracts of land where troops can be assembled in a healthy place, with room enough to practice firing these modern weapons. It is fundamental to the whole military proposition. Here, however, the House has proposed $300,000 to buy these ranges, a place of assembly for the regular troops and Organized Militia of the country, and the Senate committee, on the eve of a military development for which the Senator from Oregon has just made an eloquent speech, comes in and proposes to cut it down to $800.

Mr. President, this reduction has nothing to do with less acuteness in the Mexican situation. This item is for the purchase of a place for use that will last through years of the future of this country, whether you call the troops back from the Mexican border without going over into Mexico or whether you do not. This reduction certainly has nothing to do with that.

The Senator from Oregon has explained all of the reductions which he has reported as to the Army and National Guard are on the theory that the need has been otherwise provided for; that they were going to have so much of this or so much of that by reason of being mobilized on the Rio Grande; that some of the annual and ordinary provisions in such a bill were not called for; but here we have a perfectly clear issue between preparedness and nonpreparedness—an appropriation of $300,000 for several places to learn to shoot, and so forth, or $800 for perfecting one place to learn to shoot, and so forth. That is about a fair description of the situation. I do not know what the argument was which was presented to the Senate committee, but it does seem to me that, after the Senator's eloquent speech here this morning on the subject of the machine guns, for him to come now and strike out this provision for a place where soldiers could learn to shoot machine guns is inconsistent with his previous elevated, patriotic flight.

Mr. CHAMBERLAIN. Mr. President, let me say to the Senator from Maryland that the Military Committee has listened to the reasonable suggestions of the War Department for increases as well as for decreases in the appropriations as made. To show the Senator that the committee acted with full advice in reference to the $800 appropriation, on page 87, for ranges for field artillery target practice, let me read this memorandum from Capt. De Witt, of the Militia Division, who is conceded to be not only a very fair man but a perfectly honorable man, who is devoted to the National Guard of the country——

Mr. LEE of Maryland. I agree very heartily in the Senator's statement regarding Capt. De Witt.

Mr. CHAMBERLAIN. I am very glad to know the Senator from Maryland agrees with me. Here is what animated the committee. Capt. De Witt, under date of July 1, 1916, states:

1. In the October term of the district court of the United States for the middle district of Pennsylvania condemnation proceedings were instituted and concluded for the procurement of one tract of land embracing 48.91 acres and one tract of land embracing 61.5 acres. The viewers assessed the value of the first tract at $489.10 and of the second tract at $615, making a total of $1,104.10, or $10 per acre. The proceedings of the court are submitted herewith. This land is required to furnish essential firing points as a part of the target range for field artillery authorized to be purchased near Tobyhanna, Pa.

Now, you see it cost over $1,100; but the department, reporting further, says:

2. There remains an unexpended balance of $494.70 from the appropriation for the purchase of the above-mentioned range. From this sum it is necessary to pay $103.02 for expenses pertaining to the purchase of another tract, leaving $391.68 available to satisfy the value of the two tracts first mentioned assessed upon condemnation. There is, therefore, required the sum of $712.42 to meet the actual payment. Additional expenses will be incurred in connection with abstracts and recording the titles, and it is requested that, if practicable, an appropriation of $800 be secured to meet this need.

Mr. President, that is what the $800 appropriation is. It is based upon an actual condition. It seemed to the committee that that is what we ought to do. As a matter of fact, everything in the substitute which has been proposed for the House provision affecting the National Guard has been acted upon by the committee in accordance with the recommendations of the division having charge of that branch of the Army.

Mr. LEE of Maryland. Mr. President, somebody also appeared before the House committee and made an argument before that committee which induced that committee to include this item that reads like a very sensible provision; that is:

Ranges for Field Artillery target practice: For the acquisition by purchase or condemnation of the necessary land for suitable ranges for Field Artillery target practice, the land to be of such general character as to permit of use for instruction of troops of other arms to be located within the eastern and western military departments, and to defray the expenses incident to locating and acquiring title thereto, $300,000.

Not necessarily what the Senator from Oregon was reading about—Tobyhanna, Pa.—but doubtless some other places—places very much needed, wherever they might be, I imagine. I do not believe that there has been in any degree a proper preparation for the assembly of soldiers in such numbers as would be requisite for anything like a modern war. I do not believe there are proper places ready here in the East where men could gather together anywhere near the eastern seaboard in numbers sufficient to repel an actual invasion by a first-class power; that any such places have been prepared or purchased, or the very beginning of proper sanitary preparations made for the making of such camps.

Mr. President, we ought to have one of these camps every two or three hundred miles along our coast, connected by good roads with the coasts which they have to defend and with other military points of importance. To commence in this bill as the Senate committee now proposes to cut out one of the very first provisions for camps of the kind, for a reasonable preparation, for the being ready to assemble in a proper, healthy, sanitary, well-provided spot of great forces of men, and to get ready to do this in localities where there is room, where they can learn to shoot their weapons—to cut that out of this bill under these circumstances is a reaction against preparedness by the Senator from Oregon. He was against giving enough rifles to the men a little while ago; then he had a powerful patriotic impulse and was all right on the machine-gun matter. Now he has reacted again, and will not give them a place to meet together where they can learn to use the weapons of modern warfare. The bill does not run along smoothly; it does not provide a great system; it has a hump here and a hollow there.

I do not see why we can not provide somewhere in this bill enough money for the purchase of these places. I do not know where military authorities would locate them. They might be located at any place from Maine to Florida, or they might be on the Gulf—probably they could not be located on the Gulf, because the provision says that they must be located "within the eastern and western military departments," but they could be located almost any place in the eastern portion of the United States. Wherever they might be located, they certainly ought to be provided for by Congress.

Mr. President, of all the primary steps in the direction of preparation, first comes providing the rifles for the soldiers, and next the camping and training places where they can get used to handling and firing all modern weapons. How the Senator can be unwilling to provide for an adequate number of rifles and also be unwilling to provide camping places where the men and officers can learn the use of weapons, and all that appertains to discipline and equipment is incomprehensible from the standpoint of genuine preparation for the defense of the country.

Mr. JONES. Mr. President, I desire to ask the Senator from Oregon a question. This provision stipulates that these ranges "are to be located within the eastern and western military departments." What part of the country does that cover?

Mr. CHAMBERLAIN. I will say to the Senator that that language is really broader than there is any necessity for, as the appropriation is made to round out a range the department now controls in Pennsylvania; that is all.

Mr. JONES. Then it is merely intended to cover a place in Pennsylvania where troops can be trained in the use of machine guns, and so forth?

Mr. CHAMBERLAIN. At Tobyhanna, Pa. I read a statement concerning it into the RECORD a while ago.

Mr. JONES. I supposed this was a general proposition; and I wondered how far $800 would go on the Pacific coast, along the Gulf, and in other sections of the country in the purchase of land to be used for training men in the use of machine guns.

Mr. CHAMBERLAIN. There is another thing, let me say to the Senator. There are quite a number of States that have offered to donate lands to the Government for this purpose. I think Tennessee has offered 5,000 acres. There was also a proposition made to the Government for the use of all the land it wanted in Klamath County, Oreg.; and there are a number of places on the public domain in Wyoming and in the other Middle and Western States where the Government has all the land it wants.

Mr. WARREN. The General Government has in Wyoming 64,000 acres of land in one solid tract, esptcially adapted for the training of the militia and other troops, including a range for artillery and small-arms practice.

Mr. CHAMBERLAIN. That is correct. Let me say also that, as the Senator knows, in a number of the Western States the National Guard have rifle ranges. The House provision contemplated places for general mobilization—one for the eastern and one for the western military division—but in view of the fact that there were people who were willing to donate lands

to the Government, and in view of the further fact that there are numerous places where the Government owns lands which it could utilize for these purposes, the committee did not think it wise or proper to make large appropriations for the purchase of the land.

Mr. JONES. Does not the Senator think, then, that this language ought to be changed so as to indicate that this money is to be used in Pennsylvania?

Mr. CHAMBERLAIN. The estimates of the department show exactly what the amount is for, but, if the Senator wants to limit it, I have no objection at all.

Mr. JONES. It does not really make any difference to me; but anybody who would take the provision and read it would think that it was general in character and applied to the whole country. Of course, if the real purpose is to acquire certain lands in a certain locality, then we can understand why probably $800 would be sufficient.

Mr. LEE of Maryland. Mr. President, I should like to ask the Senator from Oregon one additional question. Is he willing to state here on the floor that by the use of this general language in the House provision, "to be located within the eastern and western military departments," the House meant to limit the purchases to Tobyhanna, Pa.?

Mr. CHAMBERLAIN. Oh, I do not claim any such thing, Mr. President. If the Senator listened to me, he will remember that I read exactly what the War Department stated about it. The House evidently had in mind the mobilization of troops for maneuvers in the eastern and western departments, and to secure a range that would be big enough for that purpose. The language in the proposed Senate amendment is broader, perhaps, than there is any necessity for, and it might be limited to Tobyhanna, Pa., for that is all the money will be spent for.

Mr. LEE of Maryland. Now, Mr. President, we understand this thing perfectly. It was not that the House committee, having in mind Tobyhanna, Pa., used language to describe the eastern half of the United States, and that they were $292,000 out of the way in estimating the value of the small acreage there, but it was a very much larger and different idea. The House committee had a large thought in mind; they wanted to get places here in the East or in the West where troops could be assembled; they were making provision for the very beginning of preparedness.

I do not know what State they had in mind, whether the beautiful hilly country of Connecticut or some portion of New York or Pennsylvania or Virginia or Ohio or Kentucky; but whatever places they had in view they certainly had a fundamental thought in mind, namely, to acquire places where the troops could get together, places where water was healthful, places where there were the requisite facilities.

Mr. WARREN. Mr. President, does the Senator allude to the House language on page 88?

Mr. LEE of Maryland. The Senate provision is on page 87. The House provision is at the bottom of page 80; but that has been stricken out by the Senate committee and it has been inserted by the committee at the top of page 87, the only difference in the world being in the amount of money appropriated. All that significant prelude ends with an appropriation of $800 in the amendment of the Senate committee.

Mr. WARREN. I thought the Senator might be alluding to an item of $300,000, which in different language is reinstated by the Senate committee on page 89.

Mr. LEE of Maryland. That appears to be for something entirely different; it appears to be for rifle ranges, and so forth.

Mr. WARREN. It is to provide for the same general purposes.

Mr. LEE of Maryland. It might be very wise to combine those two; but I imagine that the rifle ranges, if they are going to be of any service to the country, will have to be scattered around so that they can be availed of by the people at large for learning the art of rifle shooting; but the reservations which the House proposed to authorize were larger tracts, where troops might be gathered together, disciplined generally, and trained in the use of artillery and rapid-fire guns, as well as in the use of the rifle. These camps and artillery ranges are the very basis of the proper development of the militia, or the Regular Army, either.

Why, Mr. President, we will never do anything in this country until we mobilize the whole business every summer. This experience we are just having is invaluable, if we open our minds and see what it means. All of these omissions and lack of promptness could be avoided by practice in doing well the thing that has been attempted this summer; and to have places at which to gather these men together is essential for anything like annual mobilization.

Annual mobilization is the basis of the whole Swiss system. There are two great features to that system. One is to train every man for 60 or 90 days when he gets to a certain age and passes the physical examination. That gets half the population; and after that, every year for 10 days those men are marched out again, and all are looked over, inspected, and drilled, and every horse and every man and every gun has to be there in good shape and in good condition, and promptly there.

Mr. President, just to do that one thing, to provide for annual mobilization, would be worth more to the country than all of the appropriations that we are making here for the other propositions in this bill—to know where every man and gun is, and where the ammunition for every gun is, and yearly to have all our forces come out smoothly, completely, and promptly. The letter of Gen. Sadler that I read from yesterday said that when Gen. Wood called up Gen. Sadler over the telephone and said they must have these New Jersey regiments of Infantry and some Cavalry and guns on the Mexican frontier in a hurry, and appealed to Gen. Sadler to help out on the situation, the adjutant general of New Jersey had to furnish out of the State's property in their armories the 300 rounds of ammunition which were desired to go with the men.

There has been a fall-down in the recent mobilization, from the standpoint of the central administration, not from the standpoint of the National Guard; and we will never prevent its occurring again unless we make that central administration operate every year in the open light of day, and do the thing over every year. If you keep on doing that annually, after a while there will be developed in this country the business talent and military capacity to mobilize troops in a hurry. If you do not do that annually our whole military system will be a muddle when we most need speed.

Mr. President, the very beginning of that process is to get places at which to bring the men together. This proposition here to appropriate $300,000 for the purchase of tracts of land somewhere is one of the most important provisions in this whole bill, and it will be worth more to the American people than almost any other phase of it. I certainly hope it will not be struck out here or minimized to a few acres at Tobyhanna.

Mr. JONES. Mr. President, the chairman of the committee suggested a while ago that a good many different localities had offered to donate to the Government lands on which to hold maneuvers and to mobilize the National Guard, and so forth. Is there any law under which the Government can accept these donations now?

Mr. CHAMBERLAIN. There is a provision in this bill that authorizes it.

Mr JONES. There is a provision in the present bill?

Mr. CHAMBERLAIN. Yes, sir.

Mr. JONES. I ask the chairman because I know he has given these matters careful attention.

Mr. CHAMBERLAIN. There is a provision in this bill that authorizes the acceptance of a donation; and then I think it usually comes in the form of a special bill for that purpose.

Mr. JONES. I know it usually comes in the form of a special bill, but it may be desirable to secure these sites when Congress is not in session, and I wondered whether there was any provision made in this bill, or whether there is any provision in existing law, under which these donations can be accepted. If there is not, different localities may be prepared to offer donations, and we are making no provision for these mobilization sites and camps.

Mr. CHAMBERLAIN. The Secretary of War is of the opinion that we can not accept donations from individuals without authority of Congress.

Mr. JONES. That is what I understood.

Mr. WARREN. That is a general statute; but they can accept them, of course, for a nominal figure. For instance, when these thoroughbred horses were brought over here, very expensive horses, and presented to the Government, or offered, the Government took them at the lowest price which they were paying for the cheapest horses. But in order to take lands, I should say there would have to be special legislation.

Mr. JONES. Yes. So there is no provision for acquiring or getting these mobilization sites in this law or any other law that we have? Is that correct?

Mr. CHAMBERLAIN. Yes; that is right. If the Senator will look on page 9, there is a provision there, in line 17, authorizing the Secretary of War to accept for the United States, from any citizen, donation of a tract or tracts of land suitable for certain purposes.

Mr. JONES. Yes. That is for a particular purpose.

Mr. CHAMBERLAIN. It may be that that is not broad enough, but it could be broadened so as to authorize the acceptance of any land. But aside from that, as the Senator knows, the Government owns so much land in the West that could be

utilized for those purposes that it did not seem wise to make an extensive appropriation for that purpose.

Mr. JONES. Yes; but while the Government may own considerable land, there may not be much of it that is suitable for mobilization purposes. You have to have certain facilities in connection with it.

For instance, maneuvers have been held in the State of Washington for several years. The militia of some of the different States of the Northwest, I think, have been gathered there. They have not gone out on Government lands. They have not gone out on public lands. They have gone out to what is considered a very desirable location for purposes of that kind, near American Lake, near Tacoma. The Government has to pay a certain amount for rent or for damages done to these lands, and this place has been very highly recommended, I understand, by the Government officers as very suitable for maneuvering and mobilization purposes. They have good water facilities there; they have a good terrain; and they have good transportation facilities, and all that sort of thing.

I do not know of any public lands in our State that might be suitable for purposes of this kind; and it seems to me that there ought to be some authority given similar to that on page 9, I believe it is, to which the Senator has called my attention, under which, if, in the judgment of the War Department, suitable sites are offered by any locality for mobilization purposes or maneuver purposes, they would have authority to accept them.

Of course, we have to depend very greatly on the judgment of the War Department with reference to matters of this kind; and so, as you have provided here for the acceptance of aviation fields and remount stations, it seems to me it would have been wise if the committee had gone a little further.

Mr. CHAMBERLAIN. If the Senator will read a little further, he will see that it provides that the deeds shall stipulate that the property may be used "for any other service of the United States which may hereafter appear desirable."

Mr. JONES. Yes; but the primary purpose of this donation is, as it says:

A donation of a tract or tracts of land suitable and desirable, in his judgment, for the purposes of an aviation field and remount station.

What is meant by a "remount station?" I have to get information from the chairman of the committee about these things, because I do not know what they signify.

Mr. CHAMBERLAIN. They have remount stations for the breeding of cavalry horses and training them. That is what that means.

Mr. JONES. I supposed that had something to do with an aviation field, from the connection in which it is used here.

Mr. CHAMBERLAIN. Possibly. If the horses are anything like those we have out West, it means getting in the air occasionally.

Mr. JONES. That is the specific purpose for which these donations can be accepted—an aviation field or a remount station. Then they can put in the terms of the donation authority to use the property donated "for any other service of the United States which may hereafter appear desirable."

I do not take it that the Secretary of War, under that, could accept a mobilization field or maneuver field, or anything of that sort. I think he ought to be given authority to do it. I do think that if we are going to make the National Guard effective, we ought to provide places, either on public lands or somewhere else, where they may have their annual mobilization, where they can be trained not only in the use of field artillery but also in the use of other arms, and in training and drilling and all that sort of thing.

In connection with this particular provision, I think I shall offer an amendment, in line 6, after the word "departments," to put in the words "in the State of Pennsylvania." That indicates where this money is to be used, in accordance with what the Senator has just stated.

Mr. CHAMBERLAIN. I have no objection to that amendment.

The VICE PRESIDENT. The question is on the amendment of the Senator from Washington to the amendment of the committee, which the Secretary will state.

The SECRETARY. After the word "department," in line 6, page 87, it is proposed to insert the words "in the State of Pennsylvania."

The amendment to the amendment was agreed to.

Mr. LEE of Maryland. Mr. President, I move to strike out of this amendment offered by the committee—which involves a great many items, running over a number of pages, but is being considered as a whole—lines 1 to 8, inclusive, on page 87, which leave lines 16 to 23, inclusive, on page 80 of the bill, to stand unchanged as the bill came from the House. I should like a vote on this proposition. If the Senator does not feel like having a quorum asked for now, we can let this matter go over. I will leave that to the chairman of the committee. Otherwise, I will suggest the absence of a quorum.

Mr. CHAMBERLAIN. Let me say to the Senator that it is immaterial to me what the Senate does with these items, and the Senator can pursue his own course about that. I should like to get the bill finished to-night.

Mr. LEE of Maryland. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hardwick	Overman	Sterling
Bankhead	Husting	Page	Stone
Beckham	James	Penrose	Thomas
Borah	Johnson, S. Dak.	Phelan	Thompson
Brady	Jones	Pittman	Tillman
Brandegee	Kenyon	Poindexter	Townsend
Broussard	Kern	Pomerene	Underwood
Bryan	La Follette	Ransdell	Vardaman
Chamberlain	Lane	Reed	Wadsworth
Culberson	Lee, Md.	Saulsbury	Warren
Cummins	Lodge	Shafroth	Weeks
Curtis	McCumber	Sheppard	Williams
Dillingham	Martine, N. J.	Simmons	Works
du Pont	Newlands	Smith, Ariz.	
Fletcher	Norris	Smith, Md.	
Gallinger	O'Gorman	Smoot	

The VICE PRESIDENT. Sixty-one Senators have answered to their names. There is a quorum present.

Mr. LEE of Maryland. Mr. President, I will withdraw that amendment as offered, and simply move to strike out "$800" in the Senate committee's amendment, on line 8, and insert "$300,000" in place of it.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. On page 87, in the committee amendment, on line 8, it is proposed to strike out "$800" and to insert in lieu thereof "$300,000."

Mr. LEE of Maryland. Mr. President, I want to say to the Senate that that simply restores the language of the House bill as it came over on this question of purchasing places for artillery to practice and for troops to gather together, somewhere in the eastern or western departments of the military division of the United States—I do not know where. But it is a mighty good beginning, and it certainly ought to be left in this bill.

If we mean anything in the nature of preparedness, we must have the troops get together and learn to use artillery and learn to use the other weapons that are being so extensively furnished by this legislation. It is one of the most remarkable propositions in the world that all this money should be spent for ammunition and for weapons and that there should not be suitable places well prepared ready for the men to learn how to use them.

Mr. JONES. I wish to state to the Senator that with the amendment adopted a moment ago this is confined to the State of Pennsylvania, and there would be no need of $300,000 for that purpose.

Mr. LEE of Maryland. I think the Senator is right. The idea I had in mind was to strike out the Senate committee amendment and put back the House provision. I would move, then, to strike out the words alluding to the special portion of Pennsylvania and put in "$300,000" in lieu of "$800," making it a general proposition instead of a local proposition.

Mr. BRANDEGEE. I have been listening to the Senator from Maryland talking about the desirability of having an annual mobilization. Does the Senator refer to the Regular Army or to the National Guard by the use of that term? I did not clearly understand him.

Mr. LEE of Maryland. I would suggest an annual mobilization of the whole force. I think the Regular Army needs mobilizing just as much as the National Guard. It is a question of business efficiency in getting these people out and getting them into positions where they can be used as troops.

Mr. BRANDEGEE. I was somewhat confused about it, because the Senator, as I understood him, had based the desirability of having this mobilization upon the statement that the present mobilization of the National Guard had shown certain defects of central authority in administration, and therefore the National Guard ought to be mobilized every year, so that by practice they could learn to mobilize quickly.

Mr. LEE of Maryland. If the Senator will permit me a suggestion, I will say that this portion of the bill applies to all United States troops. In addition to the defects of the central authority as to mobilization that we have seen lately there were glaring instances of the same defects when a small portion of the Regular Army only was mobilized a year or two ago.

Mr. BRANDEGEE. The Senator thinks, then, the defects in mobilizing the Regular troops are just as glaring as they are in mobilizing the National Guard?

Mr. LEE of Maryland. In slowness, to say the least.

Mr. BRANDEGEE. Does the Senator think there would be any authority under the Constitution as it stands now to order a mobilization of the National Guard for training and practice annually?

Mr. LEE of Maryland. It is my belief that the President has that power. I think there is also special provision in the act of June 3, and I do not think there is the slightest occasion for doubt on that question. Moreover, under the oath these men have taken as officers and as enlisted men the authority is in the President. It is in the President also under the general and extremely broad provisions of the Constitution with reference to that power of Congress over the organizing, arming, and disciplining of the Organized Militia of the United States.

Mr. BRANDEGEE. I entirely disagree with the Senator to the authority of the President to order the various State militias into an annual mobilization. I think his authority is limited under the Constitution to calling the militia into the service of the United States simply for the purpose of repelling invasion or suppressing insurrection or enforcing the laws of the United States.

But, irrespective of that, I should think it would be a good thing if it were possible to have the various State militia which compose the so-called National Guard to have some mobilization, so far as it could possibly be done, even if it was in their own States.

Mr. President, if I may have the attention of the chairman of the Committee on Military Affairs for a minute, I should like to ask him a question. I should like to ask the chairman if there has been any suggestion by the War Department that there should be any attempt made to have an annual mobilization of the National Guard?

Mr. CHAMBERLAIN. Oh, yes; and $1,000,000 is appropriated in this bill for it.

Mr. BRANDEGEE. What was the estimate of the expenditure of that for a year? Is that an annual expense of $1,000,000?

Mr. CHAMBERLAIN. No; some years it has been more. But they thought that $1,000,000 would be enough this year, because some of the National Guard which usually go into camp are on the frontier.

Mr. BRANDEGEE. Does this contemplate mobilizing them in one section of the country, in one large field, so to speak, or in their several States?

Mr. CHAMBERLAIN. No. If the Senator will refer to page 83, it is mobilization in conformity with the law as it is now on the statute books in the places where it has been usual to mobilize them.

Mr. BRANDEGEE. But the Senator from Maryland, I thought, contemplated mobilizing them in one central place, and he wanted a large field prepared for that purpose.

Mr. LEE of Maryland. Not at all. Under no consideration would that be necessary. You might as well say that the whole of Switzerland's 250,000 men should be mobilized in one canton. Switzerland mobilizes her army for military purposes, for the general defense and common welfare, and she does not put them in any particular place, but puts them in all places where they would be open to inspection, where their discipline could be improved, and where they would be ready for the service of the country if occasion called.

Mr. BRANDEGEE. Do I understand the chairman of the committee to say that this is to be offered free to the Government and the $800 is simply an expense covering the title?

Mr. CHAMBERLAIN. No; the Government has already acquired this title, but they have some money unexpended and they want to acquire a little further. So taking what they have unexpended and the slight increase, making $800, to secure this they will be able to finish out the range they have there now.

Mr. BRANDEGEE. Why should $300,000 be appropriated if $800 will be enough for this purpose?

Mr. WADSWORTH. Mr. President, I hope very much that the item contained in the bill as passed by the House may be retained. It is not a question of National Guard or Regulars or Federal Volunteers if such should be called for, but if the troops of the United States under whatever denomination were called upon to mobilize in any portion of the United States except in the Southwest where they are now mobilized there would be no place for them. If mobilization was ordered for military purposes anywhere on the Atlantic coast the Government has in control no property whatsoever which can take care of one division of troops.

I think, Mr. President, when we consider the training of the Army we should learn to speak and think in terms of divisions. It has been the policy of the War Department to subdivide, geographically, the United States into division districts, so to speak. For instance, the troops stationed in the New England States are assumed to constitute a tactical division. There is no point in the New England States where a division of troops can be concentrated and taken care of.

Mr. GALLINGER. Mr. President——

Mr. WADSWORTH. I yield to the Senator.

Mr. GALLINGER. I know so little about military affairs that perhaps I will show my ignorance in the suggestion I am about to make. There is a magnificent property in New Hampshire just across the line from Massachusetts which some years age was purchased for race-track purposes and has been abandoned. I can not state how many acres of land there are, but I judge considerably more than a hundred acres, and possibly five times that amount. The owner of the property is willing to give the use of it if not the actual title to the property to the Government. I have called the attention of the department to the matter twice or three times, but have received rather an evasive answer to the effect that they will look into it and decide the matter later on.

Would it be desirable, in the Senator's opinion, for the Government to accept that donation if it can be done legally, and provided the area is sufficiently large for the purposes of the Government? I presume it could be done by the payment of a dollar, if it could not be done without any money consideration. Would it not be desirable for the Government to accept that land for mobilization purposes? Perhaps the Senator knows about where it is—just across the Massachusetts line in New Hampshire.

Mr. WADSWORTH. In reply to the Senator from New Hampshire, let me say that my opinion is not at all authoritative, but 100 acres of land, of course, is infinitesimal in comparison to the area needed for a division of troops.

Mr. GALLINGER. There doubtless are more than 100 acres, but I am not certain as to the area; but it is a large tract.

Mr. WADSWORTH. It is a matter upon which Congress can scarcely legislate in detail. I do think, however, Mr. President, that the Secretary of War or the appropriate authorities should be authorized very clearly under the statute to accept donations of land. I would not advise the acceptance of donations of land under such circumstances that no additional land in that vicinity could be purchased. By the acceptance of donations and by the exercise of the authority given to acquire by purchase a sufficient amount of land for the use of a division of troops suitable mobilization grounds may be acquired.

Mr. WEEKS. Mr. President——

Mr. WADSWORTH. I yield to the Senator from Massachusetts.

Mr. WEEKS. I would suggest to the Senator from New Hampshire and the Senator from New York that if the owner of property of that kind makes a formal offer of it, and it may under conditions be useful to the Government, undoubtedly legislation will be forthcoming to accept it. Mr. Thomas Fortune Ryan has an estate in Virginia of 3,000 acres, which he has just offered to the Government, and it is accepted in this bill.

Mr. GALLINGER. If the Senator from New York will permit me, I will ask the Senator from Massachusetts if he has any knowledge as to the area comprised in that property in Salem?

Mr. WEEKS. I have never been there, but I should say very much more than 100 acres. Of course 100 acres are not sufficient for a division of troops, but it is in a territory where a great amount of land could be purchased at very little cost if that is not sufficient for the purpose.

Mr. GALLINGER. I ought to know with more definiteness about it, and will ascertain the facts definitely over the telephone and put it in the RECORD before the debate closes.

Mr. BRADY. Mr. President——

Mr. WADSWORTH. I yield to the Senator from Idaho.

Mr. BRADY. Along the line of the remarks of the Senator from New Hampshire, I will say to the Senator from New York that we have provided in this bill for just such a donation as the Senator from New Hampshire suggests, and with the Senator's permission I will read that section. It is on page 9, beginning at line 17, and is as follows:

> The Secretary of War is hereby authorized to accept for the United States from any citizen of the United States a donation of a tract or tracts of land suitable and desirable in his judgment for the purposes of an aviation field and remount station, the terms of the donation also to authorize the use of the property donated for any other service of the United States which may hereafter appear desirable.

I think that covers the ground very thoroughly and completely. I believe the suggestion made by the Senator from New York will be applicable to this provision, and we should provide for such an amount as he suggests.

Mr. WADSWORTH. Mr. President, it is evident from the language of the bill the Senator from Idaho has just read that that paragraph refers to some special offer that has been made to the Government, because, apparently, its primary object is to accept a piece of land suitable for aviation and remount purposes. Of course the Government necessarily would insist upon reserving the right, after taking the land as a gift, to use it for any other military purpose. It is evident that if that particular piece of land is acquired by gift, it will be used primarily for remount purposes and aviation purposes.

I have no objection, Mr. President, to the Government using its own lands for any military purpose. If that particular piece of land could be used for the concentration of large numbers of troops, then it has a value far exceeding its value as an aviation field or a remount station; but the question is, Shall the Government of the United States acquire and have absolute control over a requisite number of mobilization camp grounds permanently equipped with every military facility at various strategic points in the United States? I would never advocate that the Congress should specify where these camps shall be located, because I do not believe that we here in the Senate or in the other House are competent to say where they should be located from a military standpoint.

This bill does go far enough to authorize the acceptance of a gift, but when it attempts to go further, as the House did attempt to go, with a comparatively small appropriation of $300,000 with which to purchase land, the Senate committee cut it out. So we are confined solely to what some citizen gives us.

Mr. BRADY. The Senator is quite correct in his statement that this is intended to enable us to receive a specific piece of land, but it was the intent of the committee to try to make it cover a larger field, and if it does not cover that field properly I should be very willing to change it so that it would cover the entire field suggested by the Senator.

Mr. WADSWORTH. Of course, Mr. President, I think the Secretary of War should be authorized to accept a gift of land for any military purpose of the United States, but we can not sit here and depend upon gifts. The Government should go out, in my humble judgment, and acquire the necessary property. I assume, without any intimate knowledge of the military system of nations abroad, that practically every European Government has under its absolute control the requisite mobilization facilities. I know England has Aldershot, where she can concentrate her troops, where there are permanent storehouses in which are placed the nonperishable portion of the ration and those parts of the military supplies which should be kept on hand.

Mr. BRADY. Mr. President——

Mr. WADSWORTH. Mr. President, I yield to the Senator.

Mr. BRADY. I do not want the Senator to misunderstand me. I am heartily in accord with his views on this subject.

Mr. WADSWORTH. The question of mobilization camps is a pretty complicated one. There are a great many elements in it. There is that of transportation. Presumably they should be located reasonably near great trunk-line railways, and that element should be in combination with the strategic element. It is not contended that the entire Army of the United States shall be concentrated in one camp, but facilities should be created at which the divisions of the Army could be concentrated.

The delay contingent upon the lack of facilities at mobilization camps is something enormous. The mere fact that there is not a mobilization camp in the United States where there are properly and permanently constructed loading platforms on railroad sidings means hours and days of delay in loading and unloading troops and equipment.

Some day, whether as the result of the initiative in this bill or by the action of some future Congress, I am certain that the proposal that permanent mobilization camps shall be established under Federal control at strategic points throughout the United States will be accepted and will be put into effect; for until we have them, we are comparatively helpless in certain seasons of the year. If we were asked to mobilize a division of troops—20,000 to 23,000 men—in New England in the middle of January, we would be up against a very serious situation. It is comparatively easy in summer to go out and rent a thousand acres, but in the middle of the winter the water supply of those troops must be protected from frost, and in such a mobilization camp you should have the water supply organized upon a permanent basis, ready at any time of the year to meet the requirements of the men and horses and mules that may be sent there to meet some emergency.

The item as contained in the House bill, in my humble judgment, is exceedingly small, $300,000, but it will enable the Secretary of War, perhaps, to commence the solution of this problem. I think at a later time it might be well for us to consider passing a resolution, if the Senate should see fit, requesting the Secretary of War or the General Staff to report to Congress as to what is needed in this respect, so that Congress may have some conception of the situation.

We have seen all over the United States the abuse incident to the failure to abandon Army posts where they are not needed, and certainly Congress in the future will need the expert advice of men in the War Department to show it where these should be placed. For one, I hope that this Congress will not be confined solely to quieting title to a few acres at Tobyhanna, Pa.; that something over and above that will be done, as it is evident the House intended should be done when they provided an appropriation of $300,000 for this purpose.

Once more let me repeat that this is not a question of the National Guard as such; it is not a question of the Regular Army as such or of Federal Volunteers, if they should be called for; or of men who might have been enlisted under section 56, had it passed Congress; it is a question for us to consider with reference to the armies of the United States whenever and however they are created or recruited.

Mr. GALLINGER. Mr. President, before the Senator from New York sits down, I desire to say that I have just ascertained from the Secretary of War that the proposition to which I called his attention involved a tract of land of at least 500 acres in extent; so that while that may be inadequate for the purpose which the Senator has in view, yet I think it ought to be considered valuable for the Government.

Mr. WADSWORTH. It is certainly a valuable consideration.

Mr. BRANDEGEE. Mr. President, as to the proposal suggested by the Senator from New Hampshire [Mr. GALLINGER], he stated that he was not sure whether or not it was a proposal to sell the fee or to give the Government the use of the land. I do not know whether or not he knows about that.

Mr. GALLINGER. In the first place, the owner of the land, who is a very wealthy citizen of Massachusetts, I believe, suggested to me, through Mr. Shillaber, of New York, that the land would be donated if the Government would accept it; but subsequently Mr. Shillaber said that after further considering the matter, the owner thought that perhaps it might be better to submit a proposition that the Government should have possession of it for perhaps an unlimited time, without an actual donation. I think, however, the land would be donated if the Government should express a desire to secure it.

Mr. BRANDEGEE. Mr. President, of course I should not think that the Government ought to accept for this kind of a permanent purpose a mere tenure, because any land to be used on which to concentrate troops at all seasons of the year, in order to be a success, I think, would require so much permanent expenditure upon it in the way of buildings, and possibly of artesian wells or piping and water supply arrangements, which would have to be permanent to protect it from frost, that the Government would have to have the absolute fee title to be justified in accepting it. However that may be, the language on page 80, to wit, the House provision, does not seem to me to contemplate a concentration or mobilzation camp. I am merely going to read it as it is—only a few lines—from line 16 to line 23, inclusive. It is as follows:

> Ranges for Field Artillery target practice: For the acquisition by purchase of condemnation of the necessary land for suitable ranges for Field Artillery target practice, the land to be of such general character as to permit of use for instruction of troops of other arms to be located within the eastern and western military departments, and to defray the expenses incident to locating and acquiring title thereto, $300,000.

That clearly does not contemplate anything except the acquisition of land for suitable ranges " for Field Artillery target practice, the land to be of such general character to permit of use for instruction of troops of other arms."

I agree entirely with Senators who have advocated the acquisition by the Government of several large tracts of land for mobilization and instruction purposes of troops. I think it would be well to incorporate in this bill a provision authorizing the department to accept any such land as might be tendered to it in any part of the country for those purposes.

I think, however, the acquisition of several of these large tracts of land located in proper portions of the country with a view of the possibility of rapid mobilization, railroad transportation, proper climate at different seasons of the year, and so forth, would involve a certain amount of preliminary investigation. If a general provision were put into the bill authorizing the department to accept everything that was offered to it, there might be tendered a great deal of land in different parts of the country upon condition that it was to be used for military camps, and I think the department would be somewhat embarrassed, without any congressional instruction at all, to know upon

what conditions it could accept these different tracts of land. There would be many people who would be very glad to give large tracts of land to the Government for the purpose of having large numbers of troops brought to their section of the country each year near their other property, which might make it much more valuable, and who would tender it conditionally that it should be used for military purposes.

I have nothing myself to suggest in the way of a concrete amendment, but I do think that the acquisition of land for several of these large camps, suitably located, is absolutely essential to the proper development of an army. I think probably whatever the Senate may pass, whether it agrees to the committee amendment or not, the conferees, after consultation with the War Department, would be in a better position to frame the exact language of an amendment and to estimate the amount required than we could here on the floor of the Senate.

Mr. LEE of Maryland. Mr. President, the Committee on Military Affairs offered through the chairman a series of amendments just now which propose to strike out a number of House provisions, commencing on page 74 of the bill and running down to the bottom of page 80. We commenced with the last item, namely, on page 80. The Senator from Washington offered an amendment to the proposed amendment by the Senate committee, as it appears at the top of page 87, to insert, after the words "military departments," the words "within the State of Pennsylvania." That created a very confused condition in the amendment. In the first place, it starts out with the language "Ranges for field artillery target practice." Those ranges are thus to be within the eastern and western military departments and within the State of Pennsylvania, which is a physical impossibility. Under such circumstances, I think in order to get this matter straightened out that we had better reconsider the vote by which the portion of the amendment offered by the Senator from Washington was agreed to, and I withdraw my previous amendment and move that we reconsider the vote by which the amendment to the amendment to insert "within the State of Pennsylvania" was agreed to.

The VICE PRESIDENT. The question is on the motion of the Senator from Maryland to reconsider the vote whereby the amendment to the amendment offered by the Senator from Washington was adopted, which will be stated by the Secretary.

The SECRETARY. On page 87, line 6, after the word "departments" in the amendment of the committee, the words "in the State of Pennsylvania" were inserted.

The motion to reconsider was agreed to.

Mr. LEE of Maryland. Mr. President, we now commence de novo with the whole proposition, and I should like to ask for a separate vote on certain of these many items. The first item on which I will ask for a separate vote is the proposition of the Senate committee to strike out, on page 80, lines 16, 17, 18, 19, 20, 21, 22, and 23 of the House bill. The proposition of the Senate committee is to strike out and insert a series of amendments, and I therefore commence with the item striking out the lines I have indicated, on page 80, and ask for a vote on that item.

Mr. CHAMBERLAIN. I make the point of order that the amendment reported by the committee is not divisible, but is one amendment.

The VICE PRESIDENT. The Chair understands that the Senate committee proposes to strike out, beginning with line 6, on page 74, down to line 3, on page 82, and to insert in lieu thereof the language from line 4, on page 82, to line 11, on page 88. That is the understanding of the Chair. That is a question of striking out and inserting, and, under the rule of the Senate, the portion to be stricken out may be amended and the portion to be inserted may be amended, the portion to be stricken out first being subject to amendment; but the Chair does not believe that the portion to be stricken out can be subdivided and separate votes had upon the questions involved.

Mr. LEE of Maryland. Then, Mr. President, we can get at it in another way, although the ruling of the Chair makes it a little bit awkward. There are a great many separate items of appropriations as to which the Senate committee differs with the House, but has simply lumped its differences and made one mighty stab at the House bill. Of course, I can move to amend the Senate committee amendment striking out lines 16 to 23, on page 80, by reinserting the House text, but that is a very awkward way of getting at it. However, I am perfectly willing to get at it in that way if the Chair so rules.

The VICE PRESIDENT. The Chair is not responsible for the manner in which the committee brings in the bill.

Mr. LEE of Maryland. Therefore I move to amend the first amendment of the committee, which is to strike out, on page 80, down to line 23, by omitting from the part to be stricken out lines 16, 17, 18, 19, 20, 21, 22, and 23 on page 80. That motion will bring up the question which has been just discussed and will bring before the Senate the question as to whether or not it should leave in this bill the appropriation of $300,000, which the Government may, in its discretion, use for establishing, say, two artillery ranges—one in the eastern department and one in the western department—suitable for field artillery target practice and suitable for the use and instruction of troops. Of course, that implies places where the troops can live while being instructed, also railroad facilities in order to get to the point of instruction, and leaves it as a matter of military discretion with the War Department to determine where it will get these one or more artillery ranges. I certainly think that this is a very small beginning of a very essential policy, and that it should be left in the bill. I therefore hope that the motion to amend the Senate committee amendment eliminating this provision of the House bill will carry.

Mr. CHAMBERLAIN. Mr. President, I make the same point of order against the motion of the Senator from Maryland that I made a moment ago.

The VICE PRESIDENT. The Senator from Maryland can accomplish the purpose that he wants to in a parliamentary way by the motion which he made some time since, namely, to strike out, on page 87, line 8, "$800" and to insert "$300,000." That will accomplish just what the Senator from Maryland wants to accomplish, and will do it under the rules of the Senate.

Mr. LEE of Maryland. That is entirely satisfactory to me, if the Vice President so rules.

The VICE PRESIDENT. The Chair can not entertain the motion of the Senator from Maryland, but must sustain the point of order that the Senator from Maryland can not pick out a part of the House text which the Senate committee has asked to be stricken out and leave it in the bill, but the Senator from Maryland can get it in the bill by offering it as an amendment to the Senate committee amendment.

Mr. LEE of Maryland. It so happens in this particular phase of the matter that, as the Senate committee only changed the House item by changing the appropriation, the ruling of the Chair would be correct; but if the Senate committee had stricken out other vital matter in the House bill, I, with all due submission, do not think the ruling of the Chair would be correct. However, under the circumstances, we get at it in just the same way, and I am willing, therefore, to withdraw my amendment and make the motion to amend the Senate committee amendment, on page 87, by inserting "$300,000" in lieu of "$800," in line 8.

Mr. CHAMBERLAIN. As to that I make the point of order that it is not estimated for.

The VICE PRESIDENT. The point of order is overruled. The item was in the House bill, and there is not any doubt about the right to increase it.

Mr. JONES. Mr. President, I understand the vote whereby my amendment to the amendment was agreed to was simply reconsidered, but it has not been voted upon since its reconsideration, and in order not to embarrass the Senator from Maryland in presenting his amendment I withdraw my amendment.

The VICE PRESIDENT. The question, then, is on the amendment offered by the Senator from Maryland, on page 87, line 8, to strike out "$800" and insert "$300,000." [Putting the question.] The Chair is in doubt.

Mr. LEE of Maryland. I ask for a division.

The VICE PRESIDENT. A division is called for.

The amendment was rejected after a division.

Mr. JONES. Now, Mr. President, I renew my amendment, after the word "department," in line 6, page 87, to insert the words "in the State of Pennsylvania."

Mr. CHAMBERLAIN. I am willing to accept that amendment, so far as I can do so.

The amendment to the amendment was agreed to.

Mr. LEE of Maryland. Mr. President, will the Senator permit me to suggest that he ought to strike out the words "and western," because Tobyhanna can not be in two departments?

Mr. CHAMBERLAIN. I am willing to accept that amendment. I do not care anything about that.

Mr. LEE of Maryland. The amendment I have suggested will come in on page 87, line 6.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. On page 87, line 6, it is proposed to strike out the words "and western," so that it will read "eastern military department in the State of Pennsylvania."

The amendment to the amendment was agreed to.

Mr. STERLING. Mr. President, I should like to make an inquiry for information here, and that is as to what is included in a department. The language here is, "eastern and western

military departments." What is included in a department? Are there just the two, known as the eastern and western departments, or are there several eastern and western departments?

Mr. WARREN. There are several—eastern, central, and western. The eastern department takes in the Atlantic States and those near it; the western, the Pacific coast; and the central division, with Chicago as its headquarters, takes in half of the United States.

Mr. STERLING. Then this would not permit of the purchase and condemnation of land for rifle ranges in the western department, if the amendment of the Senator from Washington is adopted?

Mr. CHAMBERLAIN. Mr. President, the Senator was not here when it was stated that that is simply to perfect the title to a small tract of land in Pennsylvania; that is all.

Mr. STERLING. That is the purpose of this amendment?

Mr. CHAMBERLAIN. Yes, sir.

Mr. LEE of Maryland. Mr. President, I want to give notice that I reserve the right to offer this amendment when the bill comes into the Senate.

The VICE PRESIDENT. The question is on the amendment as amended.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment was, on page 88, after line 11, to strike out:

To establish and maintain indoor and outdoor rifle ranges for the use of all able-bodied males capable of bearing arms under reasonable regulations to be prescribed by the National Board for Promotion of Rifle Practice and approved by the Secretary of War; to provide standard military arms and ammunition, indoor gallery rifles and ammunition, for the employment of labor in connection with the establishment of outdoor and indoor rifle ranges, including labor in operating targets; for the employment of instructors, for clerical services, for prizes, trophies, badges, and other insignia; for the transportation of employees, instructors, and civilians to engage in rifle practice; for the purchase of materials, supplies, and services, and for expenses incidental to instruction of citizens of the United States in marksmanship, to be expended under the direction of the Secretary of War, to remain available until expended, $300,000.

And to insert:

To establish and maintain indoor and outdoor rifle ranges for the use of all able-bodied males capable of bearing arms, under reasonable regulations to be prescribed by the director of civilian marksmanship and approved by the Secretary of War; to provide standard military arms and ammunition, indoor gallery rifles and ammunition; for the employment of labor in connection with the establishment of outdoor and indoor rifle ranges, including labor in operating targets; for the employment of instructors; for clerical services; for prizes, trophies, badges, and other insignia; for the transportation of employees, instructors, and civilians to engage in practice; for the purchase of materials, supplies, and services, and for expenses incidental to instruction of citizens of the United States in marksmanship, to be expended under the direction of the Secretary of War and to remain available until expended, $300,000: *Provided*, That the President be, and he is hereby, authorized to appoint, as director of civilian marksmanship, under the direction of the Secretary of War, an officer of the Army or of the Marine Corps, who, while serving as such, shall have the temporary rank, pay, and allowances of colonel in the Army.

Mr. JONES. Mr. President, I want to ask the chairman of the committee whether, under that provision, the Secretary of War is authorized to purchase lands for the purpose of laying out the ranges?

Mr. CHAMBERLAIN. It was not intended for that.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, on page 90, line 2, after the date "1916," to strike out $2,000,000" and insert "$4,300,000," so as to make the clause read:

To provide for the expense of maintaining, upon military reservations or elsewhere, camps for the military instruction and training of such citizens as may be selected for such instruction and training, under such regulations as may be prescribed by the Secretary of War, and to furnish to said citizens the subsistence, transportation, and uniforms authorized by the act of Congress approved June 3, 1916, $4,300,000: *Provided*, That so much of this appropriation as may be necessary shall be available for the subsistence and transportation of all persons between the ages of 18 and 45 years who have attended any camp authorized by the Secretary of War during the calendar year 1916.

The amendment was agreed to.

The next amendment was, on page 90, after line 8, to insert:

For the payment of transportation of teams authorized by the Secretary of War to participate in the national matches, $60,000: *Provided*, That this amount shall be proportioned among the several States, Territories, and the District of Columbia, according to the distance from the seat of government to the place where the national matches are to be held: *And provided further*, That the governors of the States or Territories or the Board of Commissioners of the District of Columbia may designate which team or teams shall attend from their respective States, Territories, or District of Columbia.

The amendment was agreed to.

The next amendment was, on page 90, after line 19, to strike out:

Provided, That no part of the appropriations made in this act shall be available for the salary or pay of any officer, manager, superintendent, foreman, or other person having charge of the work of any employee of the United States while making or causing to be made with a stop watch, or other time-measuring device, a time study of any job of any such employee between the starting and completion thereof, or of the movements of any such employee while engaged upon such work; nor shall any part of the appropriations made in this act be available to pay any premium or bonus or cash reward to any employee in addition to his regular wages, except for suggestions resulting in improvements or economy in the operation of any Government plant.

Mr. CHAMBERLAIN. Mr. President, the junior Senator from Massachusetts [Mr. WEEKS] desires to be here when that amendment is taken up. I ask that it be passed over for the present.

The VICE PRESIDENT. The amendment will be passed over.

Mr. JONES. Mr. President, I want to ask the chairman of the committee a question with reference to lines 6, 7, 8, and 9 of the House text on page 91. Can the Senator state what necessity there is for a provision of that kind? It reads as follows:

That no part of the appropriations made in this act shall be available for the salary or pay of any person hereafter, in time of peace, appointed an officer in the Army who is not a citizen of the United States.

Mr. CHAMBERLAIN. The purpose of it is simply so that all the officers of the Army shall be citizens of the United States, so that there will not be any question about their citizenship.

Mr. JONES. Can officers be appointed in the Army now who are not citizens of the United States, under the present law?

Mr. CHAMBERLAIN. I am inclined to think they can be.

Mr. JONES. Does the Senator know whether or not we have officers in the Army who are not citizens of the United States?

Mr. CHAMBERLAIN. I do not recall, but we have had them in nearly every war we ever had. We had Lafayette in the Revolution; we had Von Steuben. We had a great many men from foreign countries who served with distinction.

Mr. JONES. Is it the intention here that in case we should get into war, into actual hostilities, we would not have a foreigner as an officer in the Army?

Mr. CHAMBERLAIN. He might be a foreigner, but he would have to be a naturalized citizen if he was born abroad. I assume that was the purpose of the House provision.

Mr. JONES. What is the necessity of legislation of that kind, especially if it applies to time of war or time of danger? Under it, we could not even avail ourselves of the services of a foreigner who might come and want to help us.

Mr. CHAMBERLAIN. The Senator will notice that it is limited to time of peace.

Mr. JONES. I had not noticed that particularly; and the Senator suggested that in time of war we had had a great many officers who were not citizens who rendered valuable service.

Mr. CHAMBERLAIN. I meant to draw the distinction between time of war and time of peace. This is only to apply in time of peace.

Mr. JONES. Yes. The word "citizen" there, as I understand, applies to naturalized citizens as well as native-born citizens?

Mr. CHAMBERLAIN. Yes.

Mr. JONES. In other words, when a person is invested with citizenship, he is on the same basis as a native-born citizen?

Mr. CHAMBERLAIN. Oh, yes.

Mr. JONES. The Senator thinks that is the way it ought to be?

Mr. CHAMBERLAIN. I rather think so, Mr. President. We sympathized with the House view of it, and adopted the House provision with reference to that matter.

Mr. JONES. We would not have any right, really, to make any distinction between persons who are citizens.

Mr. CHAMBERLAIN. No.

The VICE PRESIDENT. The Secretary will state the next amendment of the committee.

The next amendment was, on page 91, after line 17, to strike out:

SEC. 2. That a council of executive information is hereby established for the coordination of industries and resources for the national security and welfare, to consist of the Secretary of War, the Secretary of the Navy, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Commerce, and the Secretary of Labor.

SEC. 3. That the council of executive information shall nominate to the President, and the President shall appoint, an advisory commission, consisting of not more than seven persons, each of whom shall have special knowledge of some industry, public utility, or the development of some natural resource, or be otherwise specially qualified, in

the opinion of the council, for the performance of the duties hereinafter provided. The members of the advisory commission shall serve without compensation, but shall be allowed actual expenses of travel and subsistence when attending meetings of the commission or engaged in investigations pertaining to its activities. The advisory commission shall hold such meetings as shall be called by the council or be provided by the rules and regulations adopted by the council for the conduct of its work.

SEC. 4. That it shall be the duty of the council of executive information to supervise and direct investigations and make recommendations to the President and the heads of executive departments as to the location of railroads with reference to the frontier of the United States so as to render possible expeditious concentration of troops and supplies to points of defense; the coordination of military, industrial, and commercial purposes in the location of extensive highways and branch lines of railroad; the utilization of waterways; the mobilization of military and naval resources for defense; the increase of domestic production of articles and materials essential to the support of armies and of the people during the interruption of foreign commerce; the development of seagoing transportation; data as to amounts, location, method and means of production, and availability of military supplies; the giving of information to producers and manufacturers as to the class of supplies needed by the military and other services of the Government, the requirements relating thereto, and the creation of relations which will render possible in time of need the immediate concentration and utilization of the resources of the Nation.

SEC. 5. That the council of executive information shall adopt rules and regulations for the conduct of its work, which rules and regulations shall be subject to the approval of the President, and shall provide for the work of the advisory commission to the end that the special knowledge of such commission may be developed by suitable investigation, research, and inquiry and made available in conference and report for the use of the council; and the council may organize subordinate bodies for its assistance in special investigations, either by the employment of experts or by the creation of committees of specially qualified persons to serve without compensation, but to direct the investigations of experts so employed.

SEC. 6. That the sum of $200,000, or so much thereof as may be necessary, is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to be immediately available for experimental work and investigations undertaken by the council, by the advisory commission, or subordinate bodies, for the employment of a director, expert and clerical expenses and supplies, and for the necessary expenses of members of the advisory commission or subordinate bodies going to and attending meetings of the commission or subordinate bodies. Reports shall be submitted by all subordinate bodies and by the advisory commission to the council, and from time to time the council shall report to the President or to the heads of executive departments upon special inquiries or subjects appropriate thereto, and an annual report to the Congress shall be submitted through the President, including as full a statement of the activities of the council and the agencies subordinate to it as is consistent with the public interest, including an itemized account of the expenditures made by the council or authorized by it, in as full detail as the public interest will permit: *Provided, however,* That when deemed proper the President may authorize, in amounts stipulated by him, unvouchered expenditures and report the gross sums so authorized not itemized.

And to insert:

SEC. 2. That a council of national defense is hereby established for the coordination of industries and resources for the national security and welfare, to consist of the Secretary of State, the Secretary of War, the Secretary of the Navy, the Chief of Staff of the Army, an officer of the Navy not below the rank of captain, to be designated by the Secretary of the Navy, and not more than six persons to be appointed by the President of the United States, each of whom shall have special knowledge of some industry, public utility, or the development of some natural resource, or be otherwise specially qualified, in the opinion of the President, for the performance of the duties hereinafter provided. The additional members of the council shall serve without compensation, but shall be allowed actual expenses of travel and subsistence when attending meetings of the council or engaged in investigations pertaining to its activities. The council shall hold such meetings as shall be called by it or be provided by the rules and regulations adopted by the council for the conduct of its work.

That it shall be the duty of the council of national defense to supervise and direct investigations and make recommendations to the President and the heads of executive departments as to the location of railroads with reference to the frontier of the United States so as to render possible expeditious concentration of troops and supplies to points of defense; the coordination of military, industrial, and commercial purposes in the location of extensive highways and branch lines of railroad; the utilization of waterways; the mobilization of military and naval resources for defense; the increase of domestic production of articles and materials essential to the support of armies and of the people during the interruption of foreign commerce; the development of seagoing transportation; data as to amounts, location, method, and means of production, and availability of military supplies; the giving of information to producers and manufacturers as to the class of supplies needed by the military and other services of the Government, the requirements relating thereto, and the creation of relations which will render possible in time of need the immediate concentration and utilization of the resources of the Nation.

That the council of national defense shall adopt rules and regulations for the conduct of its work, which rules and regulations shall be subject to the approval of the President, and shall provide for the work of the council to the end that the special knowledge of such council may be developed by suitable investigation, research, and inquiry and made available in conference and report for the use of the council; and the council may organize subordinate bodies for its assistance in special investigations, either by the employment of experts or by the creation of committees of specially qualified persons to serve without compensation, but to direct the investigations of experts so employed.

That the sum of $10,000, or so much thereof as may be necessary, is hereby appropriated for the necessary expense of members of the council in going to and attending meetings of the council or its subordinate bodies or while engaged in its work. Reports shall be submitted by all subordinate bodies and by the council to the President and to the heads of executive departments upon special inquiries or subjects appropriate thereto, and an annual report to the Congress shall be submitted through the President, including as full a statement of the activities of the council and the agencies subordinate to it as is consistent with the public interest, including an itemized account of the expenditures made by the council or authorized by it, in as full detail as the public interest will permit: *Provided, however,* That when deemed proper the President may authorize, in amounts stipulated by him, unvouchered expenditures and report the gross sums so authorized not itemized.

During the reading of the foregoing amendment,

Mr. SHAFROTH. I desire to offer an amendment on page 95, line 23.

The VICE PRESIDENT. Let the amendment be read, at least, before the Senator's amendment is offered.

Mr. SHAFROTH. The Secretary had finished that paragraph.

The VICE PRESIDENT. Yes; but the whole amendment has not been read.

Mr. CHAMBERLAIN. I hope the Senator will withhold the amendment until the committee amendments are all disposed of. It may be offered a little later, and we have been withholding them until that time.

Mr. SHAFROTH. Very well.

At the conclusion of the reading of the amendment,

The VICE PRESIDENT. The amendment of the Senator from Colorado is now in order.

Mr. SHAFROTH. The Senator from Oregon desires that I should not present the amendment until later.

The VICE PRESIDENT. It is an amendment to the committee amendment, is it not?

Mr. SHAFROTH. Yes, sir; the committee amendment. I explained it to the chairman of the committee. It is possible that it may be accepted by the committee.

Mr. CHAMBERLAIN. If the Senator will state it, I do not think we will disagree about it.

Mr. SHAFROTH. Very well. It is on page 95, line 23, where, after the word "defense," I move to insert the words "the location and construction of factories for the manufacture of munitions of war."

This is one of the investigations that are to be made by the council of national defense. The amendment enumerates, preceding that, that they shall investigate as to the location of railroads with reference to the frontier of the United States, the coordination of military, industrial, and commercial purposes in the location of extensive highways and branch lines of railroad, the utilization of waterways, and the mobilization of military and naval resources for defense. Then I insert also:

The location and construction of factories for the manufacture of munitions of war.

Mr. President, this is simply a designation or indication, just like the preceding ones, to this council of national defense; and it does seem to me that it is important that they should investigate the question of where ammunition factories should be established. It is not wise, it seems to me, for Congress to come in, in an emergency, and locate a factory at some place where some Senator may want it. You have not had the requisite investigation. There ought to be an investigation as to these matters, and whether it is best to locate them at one part or another part of the country, or with relation to the factories already existing, so that we will have full information upon the question.

My amendment does not increase the appropriation in any way. It does not in any manner curtail or limit any investigation, but simply adds that additional factor which, it seems to me, is so necessary if we are going to make a preparedness program. For that reason it seems to me that it would be wise to insert those words.

Mr. CHAMBERLAIN. I have no objection to that amendment.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. On page 95, in the committee amendment, on line 23, after the word "defense," it is proposed to insert:

The location and construction of factories for the manufacture of munitions of war.

The amendment to the amendment was agreed to.

Mr. CUMMINS. Mr. President, I assume that there may be some necessity for a council of national defense, although I had thought, before the subject was proposed, that all the organized bodies of the Government constituted a council of national defense. I can not give my assent to this amendment, nor to the House provision upon the same subject, without more explanation than I have hitherto had with respect to the work of such a body.

This amendment practically puts the civil affairs of the United States in the hands of the council of national defense. It can act as a Federal trade commission, as a Federal reserve board, as a tariff commission, and as the shipping board, which, I understand, Congress is about to establish. I do not believe we ought

to take the step that is here proposed. It unduly promotes the military arm of the Government.

Let us see. The council of national defense is to make recommendations to the President with regard to the location of railroads with reference to the frontier of the United States. It is to consider and report upon the coordination of military, industrial, and commercial purposes in the location of extensive highways and branch lines of railroad. It is to consider and report as to the improvement of our waterways—the building of dams and the leasing of water powers, I suppose, or at least the general utilization of our waterways. It is to consider and report the increase of domestic production of articles and materials essential to the support of armies and of the people during the interruption of foreign commerce.

The sentence I have just read embraces practically all the activities of the people of the United States, because substantially everything that we do contributes, in time of war, to the support of an army—the food we raise, the clothing we produce, the railroads we operate, everything; and at one sweep we have superimposed upon the civil government of the United States a military tribunal which is to direct, so far as it can, the energies of all the people in their civil pursuits.

But that is not all. This council of national defense is to consider and determine upon the development of seagoing transportation.

We are to have a board of national defense that is to consider seagoing transportation. The Senate was solicitous about the bill which proposes to reestablish and remake the merchant marine. I supposed the shipping bill was intended to develop our seagoing transportation—

> data as to amounts, location, method and means of production, and availability of military supplies; the giving of information to producers and manufacturers as to the class of supplies needed by the military and other services of the Government, the requirements relating thereto and the creation of relations which will render possible in time of need the immediate concentration and utilization of the resources of the Nation.

We may be in profound peace for a quarter of a century, and yet we have a board of national defense, a board of eminent gentlemen, both military and civilian, considering how our civil affairs ought to be administered in order to meet the emergency which at some uncertain time may confront us.

Now, I am opposed to it because it intensifies the military spirit, and it clearly declares a certain subordination of the civil government to the military government. It indicates that it is our purpose to develop this country not with reference to the prosperity and happiness of the people in time of peace, but to develop it in order that it may be powerful in time of war. It is repugnant to me, and, I think, wholly unnecessary. We have a General Staff composed, as I remember, of something like 50 or 60 or 100 of the prominent officers of the Army. We have a General Board, I believe, in the Navy. If these men are not able to look over from time to time the conditions in the United States and see how those conditions could be changed in order to prepare us better for war, I think we had better leave the work undone and pursue the path we have hitherto pursued with a good deal of distinction and with a good deal of success.

At any rate, Mr. President, I offer this amendment: In line 19, page 94, after the word "defense," I move to insert "to be appointed by and with the consent of the Senate of the United States."

Mr. CHAMBERLAIN. I have no objection to that.

Mr. CUMMINS. I think that will make it a little better, but of course it does not answer the objections I have made.

Mr. GALLINGER. Would not the Senator say "to be appointed by the President, by and with the advice and consent of the Senate"?

Mr. CUMMINS. Yes; "to be appointed by the President, by and with the advice and consent."

Mr. GALLINGER. The Senator did not include the President in what he first stated.

Mr. CUMMINS. I may not have quoted the words just as they are in the Constitution and as they ought to be here, but at any rate we have them now in an accurate way. I desire to register my protest and vote against the establishment of such a body.

Mr. GALLINGER. Will the Senator from Iowa permit me? If the President is to appoint and the Senate to confirm, would the Senator have in the council the Secretary of State and the Secretary of War? Would not the Senator strike out that language?

Mr. CUMMINS. I think when these men are appointed to this new office they should be confirmed by the Senate. They may be very unfit for that particular place. The Senator from New Hampshire may not have heard what I said. We are creating a commission or a body who apparently will have authority to recommend, at any rate, what our rates of duties shall be upon imports.

Mr. GALLINGER. I listened to the Senator very carefully and was impressed with his argument, but I wish to read the section in the way it will appear as it now stands:

> That the President of the United States, by and with the advice and consent of the Senate, shall appoint a council of national defense for the coordination of industries—

And so forth.

Mr. CUMMINS. I think the Senator from New Hampshire is right. The two things would be inconsistent with each other.

Mr. GALLINGER. It seems so to me. I think the Senator will have to reconstruct the paragraph.

Mr. CUMMINS. I think I shall have to prepare an amendment a little more carefully drawn than the one I have proposed, and therefore I withdraw the amendment to the amendment for the time being.

Mr. GALLINGER. Let it go over.

Mr. STERLING. May I ask the Senator from Iowa, would not the insertion of the words "by and with the advice and consent of the Senate," after the words "United States," in line 1, page 95, meet the Senator's approval?

Mr. CUMMINS. The suggestion of the Senator from South Dakota would cover the civilian appointees, but not the military employees. I withdraw the amendment for the time being and ask that the proposed committee amendment shall be passed over until I have a chance to prepare an amendment to it.

Mr. CHAMBERLAIN. I should like to get as far as we can to-night, but I presume it will not be possible to finish the bill. So I am willing to pass over the amendment for the present.

Mr. STERLING. There is one clause in the second paragraph on page 95 to which I should like to call the attention of the Senator from Oregon. That is the clause beginning in line 19 and which reads as follows:

> The coordination of military, industrial, and commercial purposes in the location of extensive highways and branch lines of railroad.

That clause is not very clear to my mind, and I hardly know what is meant by the use of the word "purposes" in this connection.

Coordination of military, industrial, and commercial purposes. Is it supposed that there are industrial purposes, military purposes, and commercial purposes relative to lines of highway that will coordinate, or which should be coordinated, or is it meant that interests should be coordinated, and that there should be the coordination of military, industrial, and commercial interests in the location of extensive highways and branch lines of railway? Would not the word "interests" or "activities," preferably "interests," be better than the word "purposes?"

Mr. CHAMBERLAIN. I think the language is broad enough to cover almost any question. Assume that they were going to extend a roadway across the continent, for instance; they would confer with this council of national defense as to the best location for it, or if a branch line of railway were to be established they would confer, if need be, with this same council of defense to ascertain where it might be best utilized for all purposes, governmental and otherwise. It would not bind anybody. It would require the railway company to establish its lines anywhere that it might be well to construct it so as to utilize it for all purposes.

Take the mobilization of troops. In some countries of the world railroads are constructed not only with a view to commercial advantage, but to military as well. Of course, this country would not go to any such extent as that; it could not do that in a democratic form of government, but there has been frequent complaint about the transportation of troops in this country—over land-grant railways, for instance, undertaking to get them to the point of destination as cheaply as possible.

The result has been a long way around in order to economize for the Government. If the projectors of a road could agree with a council of this kind to a location of a road where it might be best for all purposes, it could do no harm to act in an advisory capacity, yet it would not be binding.

Mr. CUMMINS. May I suggest to the Senator from Oregon it might do a great deal of harm from my standpoint. Suppose a railroad contemplates building a branch and what might be called the civil development of the community or the industrial development of the community would indicate that it should be built in a certain place; that it would accommodate more people if built in that place than in any other and would be for the general growth of the community; but this great tribunal that is here constituted, composed of the Secretary of State, and Secretary of War, and the Chief of Staff of the Army, and another officer of the Navy, and six eminent civilians meet and they say that for military purposes the road ought to be made at some other place.

Now, the people who determine the location of a railroad are very anxious always to stand well with the Government of the United States, and they disagree with the Government or offend the Government only if it is absolutely necessary. Is it not clear to the Senator from Oregon that in such a case the proper location of the railroad would be disturbed and the railroad would be built more for military purposes than for commercial purposes? Then we have before us the problem always that the rates that are charged by railroads must be compensatory—must pay expenses and must reward capital. Now, if the road is built in the best place commercially, the rates might be very much lower than if built in order to accommodate the military movements of the country.

Mr. CHAMBERLAIN. Mr. President, I presume the Senator's experience with men engaged in the extension of railway lines is the same as mine, and my experience has been that these lines are extended by the railroad company in the direction where it would do the most good for the railroad company, and sometimes without regard to the wishes of the community or those served. I am frank to say to the Senator if I thought this would be a controlling factor and that this board would act otherwise than in an advisory capacity, I would heartily concur with the Senator's view. But the railroad company will, without regard to what the Government or anybody else says, build with a view to its own advancement.

Mr. CUMMINS. I am sure the council would only act in an advisory capacity, and I have no doubt it would advise honestly from a military standpoint. The railroad, in accepting the advice of the council, would assume practically that the Government became the guarantor of the profitable operation of a railroad located according to its advice and its insistence.

It simply illustrates how rapidly we are passing or attempting to pass this Government into military control. The next step, of course, will be that this council shall determine where the railroads must be built or where highways must be improved, and the next step will be the guarantee on the part of the Government of a return on the capital invested.

The invitation of the sovereign has been known for years to be the equivalent of a command, and when this great council of defense says to a particular enterprise that it must be carried on thus and thus, or it must be located here or there, there is not very much room for difference of opinion.

I want to keep the civil part of this Government completely free from the influence of the military part of it, and I do not want to see factories located and built simply because they become aids to military movements. Nor do I want to see railroads built simply to move armies upon. I think there is a happy medium between these things, and I can not believe that our experience in the past warrants any such departure from our policy as is proposed in this bill.

If, of course, war comes and the emergency happens, then everything must be subordinate to the military arm of the Government. Law becomes silent under such circumstances. But I do not want our civil institutions to be subordinate to our military institutions in times of peace. I think we had better risk whatever unpreparedness the failure to impose upon our country a board of this sort may bring than to adopt a policy which practically says that all our business in the future shall be done with respect to its relation to the Army and the Navy.

The VICE PRESIDENT. The next amendment will be stated.

The SECRETARY. The committee proposes to add a new section to be known as section 3, beginning on page 97, in line 12, as follows:

SEC. 3. That section 1342 of the Revised Statutes of the United States be, and the same is hereby, amended to read as follows:

"SEC. 1342. The articles included in this section shall be known as the Articles of War and shall at all times and in all places govern the armies of the United States, including all persons belonging thereto and all persons now or hereafter made subject to military law.

"I. PRELIMINARY PROVISIONS.

"ARTICLE 1. Definitions: The following words when used in these articles shall be construed in the sense indicated in this article, unless the context shows that a different sense is intended, namely:

"(a) The word 'officer' shall be construed to refer to a commissioned officer;

"(b) The word 'soldier' shall be construed as including a noncommissioned officer, a private, or any other enlisted man;

"(c) The word 'company' shall be understood as including a troop or battery; and

"(d) The word 'battalion' shall be understood as including a squadron.

"ART. 2. Persons subject to military law: The following persons are subject to these articles and shall be understood as included in the term 'any person subject to military law,' or 'persons subject to military law,' whenever used in these articles:

"(a) All officers and soldiers belonging to the armies of the United States, including Regulars, Army reserve, militia called into the service of the United States from the date of notice of such call, and volunteers;

"(b) Cadets, veterinarians of Cavalary and Field Artillery, and pay clerks of the Quartermaster Corps;

"(c) Officers and soldiers of the Marine Corps when detached for service with the armies of the United States by order of the President: *Provided*, That an officer or soldier of the Marine Corps when so detached may be tried by military court-martial for an offense committed against the Articles of War for the government of the Navy prior to his detachment, and for an offense committed against these articles he may be tried by a naval court-martial after such detachment ceases;

"(d) All retainers to the camp and all persons accompanying or serving with the armies of the United States without the territorial jurisdiction of the United States, and in time of war all such retainers and persons accompanying or serving with the armies of the United States in the field, both within and without the territorial jurisdiction of the United States, though not otherwise subject to these articles;

"(e) All persons under sentence adjudged by courts-martial;

"(f) All persons admitted into the Soldiers' Home, all inmates of the National Home for Disabled Volunteer Soldiers, and all persons admitted to treatment in the Army and Navy General Hospital at Hot Springs, Ark., and in the hospital at Fort Bayard, N. Mex., while patients in said hospitals; and

"(g) All persons now or hereafter declared by law to constitute a part of or to belong to the armies of the United States or to be subject to the Articles of War or to trial by courts-martial.

"II. COURTS-MARTIAL.

"ART. 3. Courts-martial classified: Courts-martial shall be of three kinds, namely:

"First, general courts-martial;

"Second, special courts-martial; and

"Third, summary courts-martial.

"A. COMPOSITION.

"ART. 4. Who may serve on courts-martial: Officers of the Regular Army, of the militia when called into the service of the United States, of the Volunteer Army, and of the Marine Corps when detached for service with the Army by order of the President, shall be competent to serve on courts-martial for the trial of any person who may lawfully be brought before such courts for trial.

"ART. 5 General courts-martial: General courts-martial may consist of any number of officers from 7 to 13, inclusive.

"ART. 6. Special courts-martial: Special courts-martial may consist of any number of officers from three to five, inclusive.

"ART. 7. Summary courts-martial: A summary court-martial shall consist of one officer.

"B. BY WHOM APPOINTED.

"ART. 8. General courts-martial: The President of the United States, the commanding officer of a territorial division or department, the Superintendent of the Military Academy, the commanding officer of an army, a field army, an army corps, a division, or a separate brigade, and, when empowered by the President, the commanding officer of any district or of any force or body of troops may appoint general courts-martial; but when any such commander is the accuser or the prosecutor of the person or persons to be tried, the court shall be appointed by superior competent authority, and no officer shall be eligible to sit as a member of such court when he is the accuser or a witness for the prosecution.

"ART. 9. Special courts-martial: The commanding officer of a district, garrison, fort, camp, or other place where troops are on duty, and the commanding officer of a brigade, regiment, detached battalion, or other detached command may appoint special courts-martial; but when any such commanding officer is the accuser or the prosecutor of the person or persons to be tried, the court shall be appointed by superior authority, and may in any case be appointed by superior authority when by the latter deemed desirable; and no officer shall be eligible to sit as a member of such court when he is the accuser or a witness for the prosecution.

"ART. 10. Summary courts-martial: The commanding officer of a garrison, fort, camp, or other place where troops are on duty, and the commanding officer of a regiment, detached battalion, detached company, or other detachment may appoint summary courts-martial; but such summary courts-martial may in any case be appointed by superior authority when by the latter deemed desirable: *Provided*, That when but one officer is present with a command he shall be the summary court-martial of that command and shall hear and determine cases brought before him.

"ART. 11. Appointment of judge advocates: For each general or special court-martial the authority appointing the court shall appoint a judge advocate, and for each general court-martial one or more assistant judge advocates when necessary.

"C. JURISDICTION.

"ART. 12. General courts-marial: General courts-martial shall have power to try any person subject to military law for any crime or offense made punishable by these articles and any other person who by statute or by the law of war is subject to trial by military tribunals: *Provided*, That no officer shall be brought to trial before a general court-martial appointed by the Superintendent of the Military Academy.

"ART. 13. Special courts-martial: Special courts-martial shall have power to try any person subject to military law, except an officer, for any crime or offense not capital made punishable by these articles: *Provided*, That the President may, by regulations, which he may modify from time to time, except from the jurisdiction of special courts-martial any class or classes of persons subject to military law.

"Special courts-martial shall not have power to adjudge dishonorable discharge, nor confinement in excess of six months, nor to adjudge forfeiture of more than six months' pay.

"ART. 14. Summary courts-martial: Summary courts-martial shall have power to try any person subject to military law, except an officer, a cadet, or a soldier holding the privileges of a certificate of eligibility to promotion, for any crime or offense not capital made punishable by these articles: *Provided*, That noncommissioned officers shall not, if they object thereto, be brought to trial before a summary court-martial without the authority of the officer competent to bring them to trial before a general court-martial: *Provided further*, That the President may, by regulations, which he may modify from time to time, except from the jurisdiction of summary courts-martial any class or classes of persons subject to military law.

"Summary courts-martial shall not have power to adjudge confinement in excess of three months, nor to adjudge the forfeiture of more than three months' pay: *Provided*, That when the summary court officer is also the commanding officer no sentence of such summary court-martial adjudging confinement at hard labor or foreiture of pay, or both, for a period in excess of one month shall be carried into execution until the same shall have been approved by superior authority.

"ART. 15. Not exclusive: The provisions of these articles conferring jurisdiction upon courts-martial shall not be construed as depriving military commissions, provost courts, or other military tribunals of concurrent jurisdiction in respect of offenders or offenses that by statute or by the law of war may be triable by such military commissions, provost courts, or other military tribunals.

"ART. 16. Officers; how triable: Officers shall be triable only by general courts-martial, and in no case shall an officer, when it can be avoided, be tried by officers inferior to him in rank.

"D. PROCEDURE.

"ART. 17. Judge advocate to prosecute: The judge advocate of a general or special court-martial shall prosecute in the name of the United States, and shall, under the direction of the court, prepare the record of its proceedings. The accused shall enjoy the right to have the assistance of counsel for his defense, but should he, for any reason, be unrepresented by counsel, the judge advocate shall from time to time throughout the proceedings advise the accused of his legal rights.

"ART. 18. Challenges: Members of a general or special court-martial may be challenged by the accused and by the judge advocate, but only for cause stated to the court. The court shall determine the relevancy and validity thereof, and shall not receive a challenge to more than one member at a time.

"ART. 19. Oaths: The judge advocate of a general or special court-martial shall administer to the members of the court, before they proceed upon any trial, the following oath or affirmation: 'You, A. B., do swear (or affirm) that you will well and truly try and determine, according to the evidence, the matter now before you, between the United States of America and the person to be tried, and that you will duly administer justice, without partiality, favor, or affection, according to the provisions of the rules and articles for the government of the Armies of the United States, and if any doubt should arise, not explained by said articles, then according to your conscience, the best of your understanding, and the custom of war in like cases; and you do further swear (or affirm) that you will not divulge the findings or sentence of the court until they shall be published by the proper authority, except to the judge advocate and assistant judge advocate; neither will you disclose or discover the vote or opinion of any particular member of the court-martial, unless required to give evidence thereof as a witness by a court of justice in due course of law. So help you God.'

"When the oath or affirmation has been administered to the members of a general or special court-martial, the president of the court shall administer to the judge advocate and to each assistant judge advocate, if any, an oath or affirmation in the following form: 'You, A. B., do swear (or affirm) that you will not divulge the findings or sentence of the court to any but the proper authority until they shall be duly disclosed by the same. So help you God.'

"All persons who give evidence before a court-martial shall be examined on oath or affirmation in the following form: 'You swear (or affirm) that the evidence you shall give in the case now in hearing shall be the truth, the whole truth, and nothing but the truth. So help you God.'

"Every reporter of the proceedings of a court-martial shall, before entering upon his duties, make oath or affirmation in the following form: 'You swear (or affirm) that you will faithfully perform the duties of reporter to this court. So help you God.'

"Every interpreter in the trial of any case before a court-martial shall, before entering upon his duties, make oath or affirmation in the following form: 'You swear (or affirm) that you will truly interpret in the case now in hearing. So help you God.'

"In case of affirmation the closing sentence of adjuration will be omitted.

"ART. 20. Continuances: A court-martial may, for reasonable cause, grant a continuance to either party for such time and as often as may appear to be just.

"ART. 21. Refusal to plead: When the accused, arraigned before a court-martial, from obstinacy and deliberate design stands mute or answers foreign to the purpose, the court may proceed to trial and judgment as if he had pleaded not guilty.

"ART. 22. Process to obtain witnesses: Every judge advocate of a general or special court-martial and every summary court-martial shall have power to issue the like process to compel witnesses to appear and testify which courts of the United States, having criminal jurisdiction, may lawfully issue; but such process shall run to any part of the United States, its Territories, and possessions.

"ART. 23. Refusal to appear or testify: Every person not subject to military law who, being duly subpœnaed to appear as a witness before any military court, commission, court of inquiry, or board, or before any officer, military or civil, designated to take a deposition to be read in evidence before such court, commission, court of inquiry, or board, willfully neglects or refuses to appear, or refuses to qualify as a witness, or to testify, or produce documentary evidence which such person may have been legally subpœnaed to produce, shall be deemed guilty of a misdemeanor, for which such person shall be punished on information in the district court of the United States or in a court of original criminal jurisdiction in any of the Territorial possessions of the United States, jurisdiction being hereby conferred upon such courts for such purpose; and it shall be the duty of the United States district attorney or the officer prosecuting for the Government in any such court of original criminal jurisdiction, on the certification of the facts to him by the military court, commission, court of inquiry, or board, to file an information against and prosecute the person so offending, and the punishment of such person, on conviction, shall be a fine of not more than $500 or imprisonment not to exceed six months, or both, at the discretion of the court: *Provided*, That the fees of such witness and his mileage, at the rates allowed to witnesses attending the courts of the United States, shall be duly paid or tendered said witness, such amounts to be paid out of the appropriation for the compensation of witnesses.

"ART. 24. Compulsory self-incrimination prohibited: No witness before a military court, commission, court of inquiry, or board, or before any officer, military or civil, designated to take a deposition to be read in evidence before a military court, commission, court of inquiry, or board, shall be compelled to incriminate himself or to answer any questions which may tend to incriminate or degrade him.

"ART. 25. Depositions—When admissible: A duly authenticated deposition taken upon reasonable notice to the opposite party may be read in evidence before any military court or commission in any case not capital, or in any proceeding before a court of inquiry or a military board, if such deposition be taken when the witness resides, is found, or is about to go beyond the State, Territory, or district in which the court, commission, or board is ordered to sit, or beyond the distance of 100 miles from the place of trial or hearing, or when it appears to the satisfaction of the court, commission, board, or appointing authority that the witness, by reason of age, sickness, bodily infirmity, imprisonment, or other reasonable cause, is unable to appear and testify in person at the place of trial or hearing: *Provided*, That testimony by deposition may be adduced for the defense in capital cases.

"ART. 26. Depositions—Before whom taken: Depositions to be read in evidence before military courts, commissions, courts of inquiry, or military boards, or for other use in military administration, may be taken before and authenticated by any officer, military or civil, authorized by the laws of the United States or by the laws of the place where the deposition is taken to administer oaths.

"ART. 27. Courts of inquiry—Records of, when admissible: The record of the proceedings of a court of inquiry may be read in evidence before any court-martial or military commission in any case not capital nor extending to the dismissal of an officer, and may also be read in evidence in any proceeding before a court of inquiry or a military board: *Provided*, That such evidence may be adduced by the defense in capital cases or cases extending to the dismissal of an officer.

"ART. 28. Resignation without acceptance does not release officer: Any officer who, having tendered his resignation and prior to due notice of the acceptance of the same quits his post or proper duties without leave and with intent to absent himself permanently therefrom shall be deemed a deserter.

"ART. 29. Enlistment without discharge: Any soldier who, without having first received a regular discharge, again enlists in the Army, or in the militia when in the service of the United States, or in the Navy or Marine Corps of the United States, or in any foreign army, shall be deemed to have deserted the service of the United States; and where the enlistment is in one of the forces of the United States, mentioned above, to have fraudulently enlisted therein.

"ART 30. Closed sessions: Whenever a general or special court-martial shall sit in closed session, the judge advocate and the assistant judge advocate, if any, shall withdraw; and when their legal advice or their assistance in referring to the recorded evidence is required, it shall be obtained in open court.

"ART. 31. Order of voting: Members of a general or special court-martial, in giving their votes, shall begin with the junior in rank.

"ART. 32. Contempts: A court-martial may punish at discretion, subject to the limitations contained in Article XIV, any person who uses any menacing words, signs, or gestures in its presence, or who disturbs its proceedings by any riot or disorder.

"ART. 33. Records—General courts-martial: Each general court-martial shall keep a separate record of its proceedings in the trial of each case brought before it, and such record shall be authenticated by the signature of the president and the judge advocate; but in case the record can not be authenticated by the judge advocate, by reason of his death, disability, or absence, it shall be signed by the president and an assistant judge advocate, if any; and if there be no assistant judge advocate, or in the case of his death, disability, or absence, then by the president and one other member of the court.

"ART. 34. Records—Special and summary courts-martial: Each special court-martial and each summary court-martial shall keep a record of its proceedings, separate for each case, which record shall contain such matter and be authenticated in such manner as may be required by regulations which the president may from time to time prescribe.

"ART. 35. Disposition of records—General courts-martial: The judge advocate of each general court-martial shall, with such expedition as circumstances may permit, forward to the appointing authority or to his successor in command the original record of the proceedings of such court in the trial of each case. All records of such proceedings shall, after having been finally acted upon, be transmitted to the Judge Advocate General of the Army.

"ART. 36. Disposition of records—Special and summary courts-martial: After having been acted upon by the officer appointing the court, or by the officer commanding for the time being, the record of each trial by special court-martial and a report of each trial by summary court-martial shall be transmitted to such general headquarters as the president may designate in regulations, there to be filed in the office of the judge advocate. When no longer of use, records of special and summary courts-martial may be destroyed.

"ART. 37. Irregularities—Effect of: The proceedings of a court-martial shall not be held invalid, nor the findings or sentence disapproved, in any case on the ground of improper admission or rejection of evidence, or for any error as to any matter of pleading or procedure, unless in the opinion of the reviewing or confirming authority, after an examination of the entire proceedings, it shall appear that the error complained of has injuriously affected the substantial rights of an accused: *Provided*, That the act or omission upon which the accused has been tried constitutes an offense denounced and made punishable by one or more of these articles: *Provided further*, That the omission of the words 'hard labor' in any sentence of a court-martial adjudging imprisonment or confinement shall not be construed as depriving the authorities executing such sentence of imprisonment or confinement of the power to require hard labor as a part of the punishment in any case where it is authorized by the Executive order prescribing maximum punishments.

"ART. 38. President may prescribe rules: The President may by regulations, which he may modify from time to time, prescribe the procedure, including modes of proof, in cases before courts-martial, courts of inquiry, military commissions, and other military tribunals: *Provided*, That nothing contrary to or inconsistent with these articles shall be so prescribed: *Provided further*, That all rules made in pursuance of this article shall be laid before the Congress annually.

"E. LIMITATIONS UPON PROSECUTIONS.

"ART. 39. As to time: Except for desertion committed in time of war, or for murder, no person subject to military law shall be liable to be tried or punished by a court-martial for any crime or offense committed more than two years before the arraignment of such person: *Provided*, That for desertion in time of peace, or for any crime or offense punishable under articles 93 and 94 of this code, the period of limitations upon trial and punishment by court-martial shall be three years: *Provided further*, That the period of any absence of the accused from the jurisdiction of the United States, and also any period during which by reason of some manifest impediment the accused shall not have been amenable to military justice, shall be excluded in computing the aforesaid periods of limitation: *And provided further*, That this article shall not have the effect to authorize the trial or punishment for any crime or offense barred by the provisions of existing law.

"ART. 40. As to number: No person shall be tried a second time for the same offense.

"F. PUNISHMENTS.

"ART. 41. Certain kinds prohibited: Punishment by flogging or by branding, marking, or tattooing on the body is prohibited.

"Art 42. Penitentiary sentences—When lawful: Except for desertion in time of war, repeated desertion in time of peace, and mutiny, no person shall under the sentence of a court-martial be punished by confinement in a penitentiary unless an act or omission of which he is convicted constitutes an offense of a civil nature under some statute of the United States or of the District of Columbia, or at the common law as the same exists in said District, or by way of commutation of a death sentence, nor unless the period of confinement authorized and adjudged by such court-martial is one year or more: *Provided*, That when a sentence of confinement is adjudged by a court-martial upon conviction of two or more acts or omissions any one of which is punishable under these articles by confinement in a penitentiary, the entire sentence of confinement may be executed in a penitentiary: *Provided further*, That penitentiary confinement hereby authorized may be served in any penitentiary directly or indirectly under the jurisdiction of the United States.

"Art. 43. Death sentence—When lawful: No person shall, by general court-martial, be convicted of an offense for which the death penalty is made mandatory by law, nor sentenced to suffer death, except by the concurrence of two-thirds of the members present and for an offense in these articles expressly made punishable by death. All other convictions and sentences, whether by general or special court-martial, may be determined by a majority of the members present.

"Art. 44. Cowardice; fraud—Accessory penalty: When an officer is dismissed from the service for cowardice or fraud, the crime, punishment, name, and place of abode of the delinquent shall be published in the newspapers in and about the camp and in the State from which the offender came or where he usually resides; and after such publication it shall be scandalous for an officer to associate with him.

"Art 45. Maximum limits: Whenever the punishment for a crime or offense made punishable by these articles is left to the discretion of the court-martial, the punishment shall not, in time of peace, exceed such limit or limits as the President may from time to time prescribe.

"G. ACTION BY APPOINTING OR SUPERIOR AUTHORITY.

"ART. 46. Approval and execution of sentence: No sentence of a court-martial shall be carried into execution until the same shall have been approved by the officer appointing the court or by the officer commanding for the time being.

"ART. 47. Powers incident to power to approve: The power to approve the sentence of a court-martial shall be held to include, inter alia:

"(a) The power to approve or disapprove a finding and to approve only so much of a finding of guilty of a particular offense as involves a finding of guilty of a lesser included offense when, in the opinion of the authority having power to approve, the evidence of record requires a finding of only the lesser degree of guilt; and

"(b) The power to approve or disapprove the whole or any part of the sentence.

"ART. 48. Confirmation—When required: In addition to the approval required by article 46, confirmation by the President is required in the following cases before the sentence of a court-martial is carried into execution, namely:

"(a) Any sentence respecting a general officer;

"(b) Any sentence extending to the dismissal of an officer, except that in time of war a sentence extending to the dismissal of an officer below the grade of brigadier general may be carried into execution upon confirmation by the commanding general of the Army in the field or by the commanding general of the territorial department or division;

"(c) Any sentence extending to the suspension or dismissal of a cadet; and

"(d) Any sentence of death, except in the cases of persons convicted in time of war of murder, rape, mutiny, desertion, or as spies; and in such excepted cases a sentence of death may be carried into execution upon confirmation by the commanding general of the Army in the field or by the commanding general of the territorial department or division.

"When the authority competent to confirm the sentence has already acted as the approving authority no additional confirmation by him is necessary.

"ART. 49. Powers incident to power to confirm: The power to confirm the sentence of a court-martial shall be held to include, inter alia:

"(a) The power to confirm or disapprove a finding and to confirm so much only of a finding of guilty of a particular offense as involves a finding of guilty of a lesser included offense when, in the opinion of the authority having power to confirm, the evidence of record requires a finding of only the lesser degree of guilt; and

"(b) The power to confirm or disapprove the whole or any part of the sentence.

"ART. 50. Mitigation or remission of sentences: The power to order the execution of the sentence adjudged by a court-martial shall be held to include, inter alia, the power to mitigate or remit the whole or any part of the sentence, but no sentence of dismissal of an officer and no sentence of death shall be mitigated or remitted by any authority inferior to the President.

"Any unexecuted portion of a sentence adjudged by a court-martial may be mitigated or remitted by the authority competent to appoint, for the command in which the person under sentence is held, a court of the kind that imposed the sentence, and the same power may be exercised by superior authority; but no sentence extending to the dismissal of an officer or loss of files, no sentence of death, and no sentence approved or confirmed by the President shall be remitted or mitigated by any other authority.

"The power of remission and mitigation shall extend to all uncollected forfeitures adjudged by sentence of a court-martial.

"ART. 51. Suspension of sentences of dismissal or death: The authority competent to order the execution of a sentence of dismissal of an officer or a sentence of death may suspend such sentence until the pleasure of the President be known, and in case of such suspension a copy of the order of suspension, together with a copy of the record of trial, shall immediately be transmitted to the President.

"ART. 52. Suspension of sentence of dishonorable discharge: The authority competent to order the execution of a sentence, including dishonorable discharge, may suspend the execution of the dishonorable discharge until the soldier's release from confinement; but the order of suspension may be vacated at any time and the execution of the dishonorable discharge directed by the officer having general court-martial jurisdiction over the command in which the soldier is held or by the Secretary of War.

"ART. 53. Suspension of sentences of forfeiture or confinement: The authority competent to order the execution of a sentence adjudged by a court-martial may, if the sentence involve neither dismissal nor dishonorable discharge, suspend the execution of the sentence in so far as it relates to the forfeiture of pay or to confinement, or to both; and the person under sentence may be restored to duty during the suspension of confinement. At any time within one year after the date of the order of suspension such order may, for sufficient cause, be vacated and the execution of the sentence directed by the authority competent to order the execution of like sentences in the command to which the person under sentence belongs or in which he may be found; but if the order of suspension be not vacated within one year after the date thereof the suspended sentence shall be held to have been remitted.

"III. PUNITIVE ARTICLES.

"A. ENLISTMENTS; MUSTER; RETURNS.

"ART. 54. Fraudulent enlistments: Any person who shall procure himself to be enlisted in the military service of the United States by means of willful misrepresentation or concealment as to his qualifications for enlistment, and shall receive pay or allowances under such enlistment, shall be punished as a court-martial may direct.

"ART. 55. Officer making unlawful enlistment: Any officer who knowingly enlists or musters into the military service any person whose enlistment or muster in is prohibited by law, regulations, or orders shall be dismissed from the service or suffer such other punishment as a court-martial may direct.

"ART. 56. False muster: Any officer who knowingly makes a false muster of man or animal, or who signs or directs or allows the signing of any muster roll knowing the same to contain a false muster or false statement as to the absence or pay of an officer or soldier, or who wrongfully takes money or other consideration on mustering in a regiment, company, or other organization, or on signing muster rolls, or who knowingly musters as an officer or soldier a person who is not such officer or soldier, shall be dismissed from the service and suffer such other punishment as a court-martial may direct.

"ART. 57. False returns—Omission to render returns: Every officer whose duty it is to render to the War Department or other superior authority a return of the state of the troops under his command, or of the arms, ammunition, clothing, funds, or other property thereunto belonging, who knowingly makes a false return thereof shall be dismissed from the service and suffer such other punishment as a court-martial may direct. And any officer who, through neglect or design, omits to render such return shall be punished as a court-martial may direct.

"B. DESERTION—ABSENCE WITHOUT LEAVE.

"ART. 58. Desertion: Any person subject to military law who deserts or attempts to desert the service of the United States shall, if the offense be committed in time of war, suffer death or such other punishment as a court-martial may direct, and, if the offense be committed at any other time, any punishment, excepting death, that a court-martial may direct.

"ART. 59. Advising or aiding another to desert: Any person subject to military law who advises or persuades or knowingly assists another to desert the service of the United States shall, if the offense be committed in time of war, suffer death, or such other punishment as a court-martial may direct, and, if the offense be committed at any other time, any punishment, excepting death, that a court-martial may direct.

"ART. 60. Entertaining a deserter: Any officer who, after having discovered that a soldier in his command is a deserter from the military or naval service or from the Marine Corps, retains such deserter in his command without informing superior authority or the commander of the organization to which the deserter belongs, shall be punished as a court-martial may direct.

"ART. 61. Absence without leave: Any person subject to military law who fails to repair at the fixed time to the properly appointed place of duty, or goes from the same without proper leave, or absents himself from his command, guard, quarters, station, or camp without proper leave, shall be punished as a court-martial may direct.

"C. DISRESPECT—INSUBORDINATION—MUTINY.

"ART. 62. Disrespect toward the President, Vice President, Congress, Secretary of War, governors, legislatures: Any officer who uses contemptuous or disrespectful words against the President, Vice President, the Congress of the United States, the Secretary of War, or the governor or legislature of any State, Territory, or other possession of the United States in which he is quartered shall be dismissed from the service or suffer such other punishment as a court-martial may direct. Any other person subject to military law who so offends shall be punished as a court-martial may direct.

"ART. 63. Disrespect toward superior officer: Any person subject to military law who behaves himself with disrespect toward his superior officer shall be punished as a court-martial may direct.

"ART. 64. Assaulting or willfully disobeying superior officer: Any person subject to military law who, on any pretense whatsoever, strikes his superior officer or draws or lifts up any weapon or offers any violence against him, being in the execution of his office, or willfully disobeys any lawful command of his superior officer, shall suffer death or such other punishment as a court-martial may direct.

"ART. 65. Insubordinate conduct toward noncommissioned officer: Any soldier who strikes or assaults, or who attempts or threatens to strike or assault, or willfully disobeys the lawful order of a noncommissioned officer while in the execution of his office, or uses threatening or insulting language, or behaves in an insubordinate or disrespectful manner toward a noncommissioned officer while in the execution of his office, shall be punished as a court-martial may direct.

"ART. 66. Mutiny or sedition: Any person subject to military law who attempts to create or who begins, excites, causes, or joins in any mutiny or sedition in any company, party, post, camp, detachment, guard, or other command shall suffer death or such other punishment as a court-martial may direct.

"ART. 67. Failure to suppress mutiny or sedition: Any officer or soldier who, being present at any mutiny or sedition, does not use his utmost endeavor to suppress the same, or knowing or having reason to believe that a mutiny or sedition is to take place, does not without delay give information thereof to his commanding officer shall suffer death or such other punishment as a court-martial may direct.

"ART. 68. Quarrels; frays; disorders: All officers and noncommissioned officers have power to part and quell all quarrels, frays, and disorders among persons subject to military law and to order officers who take part in the same into arrest, and other persons subject to military law who take part in the same into arrest or confinement, as

circumstances may require, until their proper superior officer is acquainted therewith. And whosoever, being so ordered, refuses to obey such officer or noncommissioned officer or draws a weapon upon or otherwise threatens or does violence to him shall be punished as a court-martial may direct.

"D. ARREST; CONFINEMENT.

"ART. 69. Arrest or confinement of accused persons: An officer charged with crime or with a serious offense under these articles shall be placed in arrest by the commanding officer, and in exceptional cases an officer so charged may be placed in confinement by the same authority. A soldier charged with crime or with a serious offense under these articles shall be placed in confinement, and when charged with a minor offense he may be placed in arrest. Any other person subject to military law charged with crime or with a serious offense under these articles shall be placed in confinement or in arrest, as circumstances may require; and when charged with a minor offense such person may be placed in arrest. Any person placed in arrest under the provisions of this article shall thereby be restricted to his barracks, quarters, or tent, unless such limits shall be enlarged by proper authority. Any officer who breaks his arrest or who escapes from confinement before he is set at liberty by proper authority shall be dismissed from the service or suffer such other punishment as a court-martial may direct; and any other person subject to military law who escapes from confinement or who breaks his arrest before he is set at liberty by proper authority shall be punished as a court-martial may direct.

"ART. 70. Investigation of and action upon charges: The charge against any person placed in arrest or confinement shall be investigated promptly by the commanding officer or other proper military authority, and immediate steps shall be taken to try and punish the person accused or to dismiss the charges against him and release him from arrest or confinement. In every case where a person remains in military custody for more than eight days without being served with charges upon which he is to be tried a special report of the necessity for the delay shall be made by his commanding officer in the manner prescribed by regulations, and a similar report shall be forwarded every eight days thereafter until charges are served or until such person is released from custody; and if the person remains in military custody for more than 30 days without being brought before a court-martial for trial, the authority responsible for bringing him to trial shall render to superior authority a special report of the necessity for the delay. Any officer whose duty it is to make such investigation or to take such steps or to render such report who willfully or negligently fails to do so promptly, and any officer who is responsible for unreasonable or unnecessary delay in carrying the case to a final conclusion shall be punished as a court-martial may direct: *Provided*, That in time of peace no person shall, against his objection, be brought to trial before a general court-martial within a period of five days subsequent to the service of charges upon him.

"ART. 71. Refusal to receive and keep prisoners: No provost marshal or commander of a guard shall refuse to receive or keep any prisoner committed to his charge by an officer belonging to the forces of the United States, provided the officer committing shall, at the time, deliver an account in writing, signed by himself, of the crime or offense charged against the prisoner. Any officer or soldier so refusing shall be punished as a court-martial may direct.

"ART. 72. Report of prisoners received: Every commander of a guard to whose charge a prisoner is committed shall, within 24 hours after such confinement, or as soon as he is relieved from his guard, report in writing to the commanding officer the name of such prisoner, the offense charged against him, and the name of the officer committing him; and if he fails to make such report he shall be punished as a court-martial may direct.

"ART. 73. Releasing prisoner without proper authority: Any person subject to military law who, without proper authority, releases any prisoner duly committed to his charge, or who through neglect or design suffers any prisoner so committed to escape, shall be punished as a court-martial may direct.

"ART. 74. Delivery of offenders to civil authorities: When any person subject to military law, except one who is held by the military authorities to answer, or who is awaiting trial or result of trial, or who is undergoing sentence for a crime or offense punishable under these articles, is accused of a crime or offense committed within the geographical limits of the States of the Union and the District of Columbia, and punishable by the laws of the land, the commanding officer is required, except in time of war, upon application duly made, to use his utmost endeavor to deliver over such accused person to the civil authorities, or to aid the officers of justice in apprehending and securing him, in order that he may be brought to trial. Any commanding officer who upon such application refuses or willfully neglects, except in time of war, to deliver over such accused person to the civil authorities or to aid the officers of justice in apprehending and securing him shall be dismissed from the service or suffer such other punishment as a court-martial may direct.

"When, under the provisions of this article, delivery is made to the civil authorities of an offender undergoing sentence of a court-martial, such delivery, if followed by conviction, shall be held to interrupt the execution of the sentence of the court-martial, and the offender shall be returned to military custody, after having answered to the civil authorities for his offense, for the completion of the said court-martial sentence.

"E. WAR OFFENSES.

"ART. 75. Misbehavior before the enemy: Any officer or soldier who misbehaves himself before the enemy, runs away, or shamefully abandons or delivers up any fort, post, camp, guard, or other command which it is his duty to defend, or speaks words inducing others to do the like or casts away his arms or ammunition, or quits his post or colors to plunder or pillage, or by any means whatsoever occasions false alarms in camp, garrison, or quarters, shall suffer death or such other punishment as a court-martial may direct.

"ART 76. Subordinates compelling commander to surrender: If any commander of any garrison, fort, post, camp, guard, or other command is compelled, by the officers or soldiers under his command, to give it up to the enemy or to abandon it, the officers or soldiers so offending shall suffer death or such other punishment as a court-martial may direct.

"ART. 77. Improper use of countersign: Any person subject to military law who makes known the parole or countersign to any person not entitled to receive it according to the rules and discipline of war, or gives a parole or countersign different from that which he received, shall, if the offense be committed in time of war, suffer death or such other punishment as a court-martial may direct.

"ART. 78. Forcing a safeguard: Any person subject to military law who, in time of war, forces a safeguard shall suffer death or such other punishment as a court-martial may direct.

"ART. 79. Captured property to be secured for public service: All public property taken from the enemy is the property of the United States and shall be secured for the service of the United States, and any person subject to military law who neglects to secure such property or is guilty of wrongful appropriation thereof shall be punished as a court-martial may direct.

"ART. 80. Dealing in captured or abandoned property: Any person subject to military law who buys, sells, trades, or in any way deals in or disposes of captured or abandoned property, whereby he shall receive or expect any profit, benefit, or advantage to himself or to any other person directly or indirectly connected with himself, or who fails whenever such property comes into his possession or custody or within his control to give notice thereof to the proper authority and to turn over such property to the proper authority without delay, shall, on conviction thereof, be punished by fine or imprisonment, or by such other punishment as a court-martial, military commission, or other military tribunal may adjudge, or by any or all of said penalties.

"ART. 81. Relieving, corresponding with, or aiding the enemy: Whosoever relieves the enemy with arms, ammunition, supplies, money, or other thing, or knowingly harbors or protects or holds correspondence with or gives intelligence to the enemy, either directly or indirectly, shall suffer death, or such other punishment as a court-martial or military commision may direct.

"ART. 82. Spies: Any person who in time of war shall be found lurking or acting as a spy in or about any of the fortifications, posts, quarters, or encampments of any of the armies of the United States, or elsewhere, shall be tried by a general court-martial or by a military commission, and shall, on conviction thereof, suffer death.

"F. MISCELLANEOUS CRIMES AND OFFENSES.

"ART. 83. Military property—Willful or negligent loss, damage, or wrongful disposition of: Any person subject to military law who willfully, or through neglect, suffers to be lost, spoiled, damaged, or wrongfully disposed of, any military property belonging to the United States shall make good the loss or damage and suffer such punishment as a court-martial may direct.

"ART. 84. Waste or unlawful disposition of military property issued to soldiers: Any soldier who sells or wrongfully disposes of or willfully or through neglect injures or loses any horse, arms, ammunition, accouterments, equipment, clothing, or other property issued for use in the military service, shall be punished as a court-martial may direct.

"ART. 85. Drunk on duty: Any officer who is found drunk on duty shall, if the offense be committed in time of war, be dismissed from the service and suffer such other punishment as a court-martial may direct; and if the offense be committed in time of peace, he shall be punished as a court-martial may direct. Any person subject to military law, except an officer, who is found drunk on duty shall be punished as a court-martial may direct.

"ART. 86. Misbehavior of sentinel: Any sentinel who is found drunk or sleeping upon his post, or who leaves it before he is regularly relieved, shall, if the offense be committed in time of war, suffer death or such other punishment as a court-martial may direct; and if the offense be committed in time of peace, he shall suffer any punishment, except death, that a court-martial may direct.

"ART. 87. Personal interest in sale of provisions: Any officer commanding in any garrison, fort, barracks, camp, or other place where troops of the United States may be serving who, for his private advantage, lays any duty or imposition upon or is interested in the sale of any victuals or other necessaries of life brought into such garrison, fort, barracks, camp, or other place for the use of the troops, shall be dismissed from the service and suffer such other punishment as a court-martial may direct.

"ART. 88. Intimidation of persons bringing provisions: Any person subject to military law who abuses, intimidates, does violence to, or wrongfully interferes with any person bringing provisions, supplies, or other necessaries to the camp, garrison, or quarters of the forces of the United States shall suffer such punishment as a court-martial may direct.

"ART. 89. Good order to be maintained and wrongs redressed: All persons subject to military law are to behave themselves orderly in quarters, garrison, camp, and on the march; and any person subject to military law who commits any waste or spoil, or willfully destroys any property whatsoever (unless by order of his commanding officer), or commits any kind of depredation or riot shall be punished as a court-martial may direct. Any commanding officer who, upon complaint made to him, refuses or omits to see reparation made to the party injured, in so far as the offender's pay shall go toward such reparation, as provided for in article 105, shall be dismissed from the service or otherwise punished as a court-martial may direct.

"ART. 90. Provoking speeches or gestures: No person subject to military law shall use any reproachful or provoking speeches or gestures to another; and any person subject to military law who offends against the provisions of this article shall be punished as a court-martial may direct.

"ART. 91. Dueling—Attempts to commit suicide: Any person subject to military law who fights or promotes or is concerned in or connives at fighting a duel, or who having knowledge of a challenge sent or about to be sent fails to report the fact promptly to the proper authority, or who attempts to commit suicide, shall, if an officer, be dismissed from the service or suffer such other punishment as a court-martial may direct; and if any other person subject to military law, shall suffer such punishment as a court-martial may direct.

"ART. 92. Murder—Rape: Any person subject to military law who commits murder or rape shall suffer death or imprisonment for life, as a court-martial may direct; but no person shall be tried by court-martial for murder or rape committed within the geographical limits of the States of the Union and the District of Columbia in time of peace.

"ART. 93. Various crimes: Any person subject to military law who commits manslaughter, mayhem, arson, burglary, robbery, larceny, embezzlement, perjury, assault with intent to commit any felony, or assault with intent to do bodily harm, shall be punished as a court-martial may direct.

"ART. 94. Frauds against the Government: Any person subject to military law who makes or causes to be made any claim against the United States or any officer thereof, knowing such claim to be false or fraudulent; or

"Who presents or causes to be presented to any person in the civil or military service thereof, for approval or payment, any claim against the United States or any officer thereof, knowing such claim to be false or fraudulent; or

"Who enters into any agreement or conspiracy to defraud the United States by obtaining, or aiding others to obtain, the allowance or payment of any false or fraudulent claim; or

"Who, for the purpose of obtaining, or aiding others to obtain, the approval, allowance, or payment of any claim against the United States or against any officer thereof, makes or uses, or procures, or advises the making or use of, any writing or other paper, knowing the same to contain any false or fraudulent statement; or

"Who, for the purpose of obtaining, or aiding others to obtain, the approval, allowance, or payment of any claim against the United States or any officer thereof, makes, or procures, or advises the making of, any oath to any fact or to any writing or other paper, knowing such oath to be false; or

"Who, for the purpose of obtaining, or aiding others to obtain, the approval, allowance, or payment of any claim against the United States or any officer thereof, forges or counterfeits, or procures, or advises the forging or counterfeiting of any signature upon any writing or other paper, or uses, or procures, or advises the use of any such signature, knowing the same to be forged or counterfeited; or

"Who, having charge, possession, custody, or control of any money or other property of the United States, furnished or intended for the military service thereof, knowingly delivers, or causes to be delivered, to any person having authority to receive the same, any amount thereof less than that for which he receives a certificate or receipt; or

"Who, being authorized to make or deliver any paper certifying the receipt of any property of the United States furnished or intended for the military service thereof, makes or delivers to any person such writing, without having full knowledge of the truth of the statements therein contained and with intent to defraud the United States; or

"Who steals, embezzles, knowingly and willfully misappropriates, applies to his own use or benefit, or wrongfully or knowingly sells or disposes of any ordnance, arms, equipments, ammunition, clothing, subsistence stores, money, or other property of the United States furnished or intended for the military service thereof; or

"Who knowingly purchases or receives in pledge for any obligation or indebtedness from any soldier, officer, or other person who is a part of or employed in said forces or service, any ordnance, arms, equipment, ammunition, clothing, subsistence stores, or other property of the United States, such soldier, officer, or other person not having lawful right to sell or pledge the same;

"Shall, on conviction thereof, be punished by fine or imprisonment, or by such other punishment as a court-martial may adjudge, or by any or all of said penalties. And if any person, being guilty of any of the offenses aforesaid while in the military service of the United States, receives his discharge or is dismissed from the service, he shall continue to be liable to be arrested and held for trial and sentence by a court-martial in the same manner and to the same extent as if he had not received such discharge nor been dismissed.

"ART. 95. Conduct unbecoming an officer and gentleman: Any officer or cadet who is convicted of conduct unbecoming an officer and a gentleman shall be dismissed from the service.

"ART. 96. General article: Though not mentioned in these articles, all disorders and neglects to the prejudice of good order and military discipline, all conduct of a nature to bring discredit upon the military service, and all crimes or offenses not capital, of which persons subject to military law may be guilty, shall be taken cognizance of by a general or special or summary court-martial, according to the nature and degree of the offense, and punished at the discretion of such court.

"IV. COURTS OF INQUIRY.

"Art. 97. When and by whom ordered: A court of inquiry to examine into the nature of any transaction of or accusation or imputation against any officer or soldier may be ordered by the President or by any commanding officer; but a court of inquiry shall not be ordered by any commanding officer except upon the request of the officer or soldier whose conduct is to be inquired into.

"Art 98. Composition: A court of inquiry shall consist of three or more officers. For each court of inquiry the authority appointing the court shall appoint a recorder.

"Art 99. Challenges: Members of a court of inquiry may be challenged by the party whose conduct is being inquired into and by the recorder, but only for cause stated to the court. The court shall determine the relevancy and validity of any challenge, and shall not receive a challenge to more than one member at a time.

"Art 100. Oath of members and recorder: The recorder of a court of inquiry shall administer to the members the following oath: 'You, A. B., do swear (or affirm) that you will well and truly examine and inquire, according to the evidence, into the matter now before you, without partiality, favor, affection, prejudice, or hope of reward. So help you, God.' After which the president of the court shall administer to the recorder the following oath: 'You, A. B., do swear (or affirm) that you will, according to your best abilities, accurately and impartially record the proceedings of the court and the evidence to be given in the case in hearing. So help you, God.'

"In case of affirmation the closing sentence of adjuration will be omitted.

"Art 101. Powers; procedure: A court of inquiry and the recorder thereof shall have the same power to summon and examine witnesses as is given to courts-martial and the judge advocate thereof. Such witnesses shall take the same oath or affirmation that is taken by witnesses before courts-martial. A reporter or an interpreter for a court of inquiry shall, before entering upon his duties, take the oath or affirmation required of a reporter or an interpreter for a court-martial. The party whose conduct is being inquired into shall be permitted to examine and cross-examine witnesses so as fully to investigate the circumstances in question.

"Art. 102. Opinion on merits of case: A court of inquiry shall not give an opinion on the merits of the case inquired into unless specially ordered to do so.

"Art. 103. Record of proceedings—How authenticated: Each court of inquiry shall keep a record of its proceedings, which shall be authenticated by the signature of the president and the recorder thereof, and be forwarded to the convening authority. In case the record can not be authenticated by the recorder, by reason of his death, disability, or absence, it shall be signed by the president and by one other member of the court.

"V. MISCELLANEOUS PROVISIONS.

"ART. 104. Disciplinary powers of commanding officers: Under such regulations as the President may prescribe, and which he may from time to time revoke, alter, or add to, the commanding officer of any detachment, company, or higher command may, for minor offenses not denied by the accused, impose disciplinary punishments upon persons of his command without the intervention of a court-martial, unless the accused demands trial by court-martial.

"The disciplinary punishments authorized by this article may include admonition, reprimand, withholding of privileges, extra fatigue, and restriction to certain specified limits, but shall not include forfeiture of pay or confinement under guard. A person punished under authority of this article, who deems his punishment unjust or disproportionate to the offense, may, through the proper channel, appeal to the next superior authority, but may in the meantime be required to undergo the punishment adjudged. The commadning officer who imposes the punishment, his successor in command, and superior authority shall have power to mitigate or remit any unexecuted portion of the punishment. The imposition and enforcement of disciplinary punishment under authority of this article for any act or omission shall not be a bar to trial by court-martial for a crime or offense growing out of the same act or omission; but the fact that a disciplinary punishment has been enforced may be shown by the accused upon trial, and when so shown shall be considered in determining the measure of punishment to be adjudged in the event of a finding of guilty.

"ART. 105. Injuries to person or property—Redress of: Whenever complaint is made to any commanding officer that damage has been done to the property of any person or that his property has been wrongfully taken by persons subject to military law, such complaint shall be investigated by a board consisting of any number of officers from one to three, which board shall be convened by the commanding officer and shall have, for the purpose of such investigation, power to summon witnesses and examine them upon oath or affirmation, to receive depositions or other documentary evidence, and to assess the damages sustained against the responsible parties. The assessment of damages made by such board shall be subject to the approval of the commanding officer, and in the amount approved by him shall be stopped against the pay of the offenders. And the order of such commanding officer directing stoppages herein authorized shall be conclusive on any disbursing officer for the payment by him to the injured parties of the stoppages so ordered.

"Where the offenders can not be ascertained, but the organization or detachment to which they belong is known, stoppages to the amount of damages inflicted may be made and assessed in such proportion as may be deemed just upon the individual members thereof who are shown to have been present with such organization or detachment at the time the damages complained of were inflicted as determined by the approved findings of the board.

"ART. 106. Arrest of deserters by civil officials: It shall be lawful for any civil officer having authority under the laws of the United States, or of any State, Territory, District, or possession of the United States, to arrest offenders, summarily to arrest a deserter from the military service of the United States and deliver him into the custody of the military authorities of the United States.

"ART. 107. Soldiers to make good time lost: Every soldier who in an existing or subsequent enlistment deserts the service of the United States or without proper authority absents himself from his organization, station, or duty for more than one day, or who is confined for more than one day under sentence, or while awaiting trial and disposition of his case, if the trial results in conviction, or through the intemperate use of drugs or alcoholic liquor, or through disease or injury the result of his own misconduct, renders himself unable for more than one day to perform duty, shall be liable to serve, after his return to a full-duty status, for such period as shall, with the time he may have served prior to such desertion, unauthorized absence, confinement, or inability to perform duty, amount to the full term of that part of his enlistment period which he is required to serve with his organization before being furloughed to the Army reserve.

"ART. 108. Soldiers—Separation from the service: No enlisted man, duly sworn, shall be discharged from the service without a discharge in writing, signed by a field officer of the regiment to which he belongs or by the commanding officer when no field officer is present; and no discharge shall be given to an enlisted man before his term of service has expired, except by order of the President, the Secretary of War, the commanding officer of a department, or by sentence of a general court-martial.

"ART. 109. Oath of enlistment: At the time of his enlistment every soldier shall take the following oath or affirmation: 'I, ———, do solemnly swear (or affirm) that I will bear true faith and allegiance to the United States of America; that I will serve them honestly and faithfully against all their enemies whomsoever; and that I will obey the orders of the President of the United States and the orders of the officers appointed over me, according to the Rules and Article of War.' This oath or affirmation may be taken before any officer.

"ART. 110. Certain articles to be read and explained: Articles 1, 2, and 29, 54 to 96, inclusive, and 104 to 109, inclusive, shall be read and explained to every soldier at the time of his enlistment or muster in, or within six days thereafter, and shall be read and explained once every six months to the soldiers of every garrison, regiment, or company in the service of the United States.

"ART. 111. Copy of record of trial: Every person tried by a general court-martial shall, on demand therefor, made by himself or by any person in his behalf, be entitled to a copy of the record of the trial.

"ART. 112. Effects of deceased persons; disposition of: In case of the death of any person subject to military law, the commanding officer of the place or command will permit the legal representative or widow of the deceased, if present, to take possession of all his effects then in camp or quarters, and if no legal representative or widow be present, the commanding officer shall direct a summary court to secure all such effects; and said summary court shall have authority to convert such effects into cash, by public or private sale, not earlier than 30 days after the death of the deceased, and to collect and receive any debts due decedent's estate by local debtors; and as soon as practicable after converting such effects into cash said summary court shall deposit with the proper officer, to be designated in regulations, any cash belonging to decedent's estate, and shall transmit a receipt for such deposit, accompanied by any will or other papers of value belonging to the deceased, an inventory of the effects secured by said summary court, and a full account of his transactions to the War Department for transmission to the Auditor for the War Department for action as authorized by law in the settlement of the accounts of deceased officers or enlisted men of the Army; but if in the meantime the legal representative, or widow, shall present himself to take possession of decedent's estate the said summary court shall turn over to him all effects not sold and cash belonging to said estate, together with an inventory and account, and make to the War Department a full report of his transactions.

"The provisions of this article shall be applicable to inmates of the United States Soldiers' Home who die in any United States military hospital outside of the District of Columbia where sent from the home for treatment.

"ART. 113. Inquests: When at any post, fort, camp, or other place garrisoned by the military forces of the United States and under the exclusive jurisdiction of the United States, any person shall have been

found dead under circumstances which appear to require investigation, the commanding officer will designate and direct a summary court-martial to investigate the circumstances attending the death; and, for this purpose, such summary court-martial shall have power to summon witnesses and examine them upon oath or affirmation. He shall promptly transmit to the post or other commander a report of his investigation and of his findings as to the cause of the death.

"ART. 114. Authority to administer oaths: Any judge advocate or acting judge advocate, the president of a general or special court-martial, any summary court-martial, the judge advocate or any assistant judge advocate of a general or special court-martial, the president or the recorder of a court of inquiry or of a military board, any officer designated to take a deposition, any officer detailed to conduct an investigation, and the adjutant of any command shall have power to administer oaths for the purposes of the administration of military justice and for other purposes of military administration; and in foreign places where the Army may be serving shall have the general powers of a notary public or of a consul of the United States in the administration of oaths, the execution and acknowledgment of legal instruments, the attestation of documents, and all other forms of notarial acts to be executed by persons subject to military law.

"ART. 115. Appointment of reporters and interpreters: Under such regulations as the Secretary of War may from time to time prescribe, the judge advocate of a court-martial or military commission, or the recorder of a court of inquiry shall have power to appoint a reporter, who shall record the proceedings of and testimony taken before such court or commission and may set down the same, in the first instance, in shorthand. Under like regulations the judge advocate of a court-martial or military commission, or summary court, or the recorder of a court of inquiry may appoint an interpreter, who shall interpret for the court or commission.

"ART. 116. Powers of assistant judge advocates: An assistant judge advocate of a general court-martial shall be competent to perform any duty devolved by law, regulation, or the custom of the service upon the judge advocate of the court.

"ART. 117. Removal of civil suits: When any civil suit or criminal prosecution is commenced in any court of a State against any officer, soldier, or other person in the military service of the United States on account of any act done under color of his office or status, or in respect to which he claims any right, title, or authority under any law of the United States respecting the military forces thereof, or under the law of war, such suit or prosecution may at any time before the trial or final hearing thereof be removed for trial into the district court of the United States in the district where the same is pending in the manner prescribed in section 33 of the act entitled 'An act to codify, revise, and amend the laws relating to the judiciary,' approved March 3, 1911, and the cause shall thereupon be entered on the docket of said district court and shall proceed therein as if the cause had been originally commenced in said district court and the same proceedings had been taken in such suit or prosecution in said district court as shall have been had therein in said State court prior to its removal, and said district court shall have full power to hear and determine said cause.

"ART. 118. Officers—Separation from service: No officer shall be discharged or dismissed from the service except by order of the President or by a sentence of a general court-martial; and in time of peace no officer shall be dismissed except in pursuance of the sentence of a court-martial or in mitigation thereof, nor discharged except in pursuance of statutes now in force or which may hereafter be enacted; but the President may at any time drop from the rolls of the Army any officer who has been absent from duty three months without leave or who has been absent in confinement in a prison or penitentiary for three months after final conviction by a court of competent jurisdiction.

"ART. 119. Rank and precedence among Regulars, militia, and Volunteers: That in time of war or public danger, when two or more officers of the same grade are on duty in the same field, department, or command, or of organizations thereof, the President may assign the command of the forces of such field, department, or command, or of any organization thereof, without regard to seniority of rank in the same grade. In the absence of such assignment by the President, officers of the same grade shall rank and have precedence in the following order, without regard to date of rank or commission as between officers of different classes, namely: First, officers of the Regular Army and officers of the Marine Corps detached for service with the Army by order of the President; second, officers of the Organized Militia in the service of the United States; and, third, officers of the volunteer forces: *Provided*, That officers of the Regular Army holding commissions in the Organized Militia in the service of the United States or in the volunteer forces shall rank and have precedence under said commissions as if they were commissions in the Regular Army; but the rank of officers of the Regular Army under their commissions in the Organized Militia shall not, for the purposes of this article, be held to antedate muster into the service of the United States.

"ART. 120. Command when different corps or commands happen to join: When different corps or commands of the military forces of the United States happen to join or do duty together the officer highest in rank of the line of the Regular Army, Marine Corps, Organized Militia, or Volunteers there on duty shall, subject to the provisions of the preceding article, command the whole and give orders for what is needful in the service, unless otherwise directed by the President."

Mr. CHAMBERLAIN. Let me state that this is a revision of the Articles of War. There has been no revision of the old Articles of War since the earliest colonial days with the result that they are scattered through tome after tome without much regard to the changed and changing conditions in this country, many of them not applicable to conditions which existed in Cuba during the Spanish-American War, and very few applicable to conditions as they exist in the colonial possessions of the United States or at the Panama Canal. It was sought to revise these articles two or three years ago. A subcommittee of the Committee on Military Affairs took up the matter in conjunction with the then Secretary of War and the War Department. I was a member of that committee, and I think the Senator from Mississippi [Mr. VARDAMAN] was a member of it and one other Senator; I do not recall now who he was. We worked on it all summer and the articles were then prepared by that subcommittee and we reported the same to the Military Affairs Committee, and they were adopted and reported to the Senate and passed. At this session of Congress the same thing was done with reference to it. The committee had changed somewhat and another subcommittee was appointed. That subcommittee reported the revised Articles of War practically without change to the Military Affairs Committee; the bill was reported to the Senate and passed, and is now pending in the other House. That House has not taken it up; that is it has not been reported out of the Military Affairs Committee there. So the Senate Military Affairs Committee thought it advisable, in view of the attitude of the Judge Advocate General of the Army, to insert this proposed legislation as an amendment to this bill.

It is new legislation; it would be subject to a point of order; but in view of the insistence of the department and the delicate situation with reference to our foreign possessions, I hope that the Senate will see fit to adopt this amendment to the bill. I suggest that in order that the Senate may know how it comes to be attached to the bill by way of amendment.

Mr. GALLINGER. Mr. President, my attention was attracted to this very comprehensive amendment, and I recalled the fact that we have been trying to legislate on this subject. This is a very striking illustration of our habit, when we have failed to get legislation through both Houses, of immediately resorting to an appropriation bill to secure the result which we have failed to accomplish through the regular channels of legislation. We all know the habit is a bad one; we all know it ought not to be indulged in. If I had more knowledge of military matters, and assumed to speak with any authority whatever, I would certainly make a point of order against this amendment. The Senate has passed upon it——

Mr. CHAMBERLAIN. Twice.

Mr. GALLINGER. The Senate has passed upon it twice. It is the duty of the other House to take it up and act upon it, and if they do not agree with the Senate bill, so to declare, have it go to conference, and let it be worked out there; but for us to get into the habit, whenever the other body does not act with reasonable promptitude upon an important measure which has been passed by the Senate, at the first opportunity we have, to attach it to an appropriation bill, to another piece of legislation, is certainly a very bad practice.

However, I shall not make the point of order against it. I will leave that to Senators who are members of the committee and to Senators who have taken a greater interest in military legislation than have I, and who have a greater knowledge than I have on the subject, to either let it remain in the bill or to have it go out on a point of order.

Mr. President, I want to ask the chairman of the committee a question concerning the proviso on page 97. It is in one sense an inconsequential matter as I read it, and yet I think, if adopted, it is going to establish a precedent that might well be avoided. The provision is that $10,000 shall be appropriated for the council of national defense, for the payment of expenses, and it is then provided that there shall be "an itemized account of the expenditures made by the council or authorized by it in as full detail as the public interest will permit."

Mr. President, that is good legislation; that is what we ordinarily do, and what we always ought to do when we appropriate money for a purpose of this kind; but the committee for some reason—and that is what I want to inquire about—has added the following proviso:

Provided, however, That when deemed proper the President may authorize, in amounts stipulated by him, unvouchered expenditures and report the gross sums so authorized not itemized.

I ask the chairman of the committee, when there is only $10,000 to be used for this purpose and the provision is inserted in the bill that there shall be an itemized account, why this exception should be made, allowing the President to say to this council, "You need not make an itemized account; I will authorize the payment of this sum without regard to how it has been used, and I order it paid out in a gross sum." It seems to me that either the provision that there be an itemized account should go out of the bill or else the proviso should go out of the bill.

Mr. CHAMBERLAIN. Mr. President, I will say to the Senator from New Hampshire that in that respect we followed the language of the House bill; but the House bill appropriated $200,000 for this commission, and we reduced that to $10,000; but we did not change the language of the bill in this regard. As the Senator suggests, $10,000 would not be very much to expend without an accounting.

Mr. GALLINGER. No.

Mr. CHAMBERLAIN. But $200,000 was still worse. We reduced it to $10,000; but, I repeat, we did not change that particular portion of the language in the bill. I think there is a good deal of force in the suggestion of the Senator that, as a rule, this is not very good legislation.

Mr. GALLINGER. Again, I shall not urge this. The entire matter is going to conference at best; but I think that it is inconsistent to provide in any bill that money appropriated shall be accounted for in an itemized way, and then to provide that the President of the United States can say, "You need not make an itemized account; I will order it paid in gross." I think that would be bad legislation, and that it would establish a precedent that might be troublesome to us in other matters of legislation even much more important than this, so far as the amount of money is concerned.

Mr. JONES. Mr. President, this, as I understand, is a general appropriation bill, to which the rule of the Senate as to proposing new legislation applies. The Senate has sometimes insisted very strongly upon that rule, and has even refused to have the rule suspended in order that important matters of very general and universal interest might be put upon such bills, and the principal argument that has been presented against such suspension of the rule has been the iniquity of putting general legislation upon appropriation bills.

Here, however, is a provision extending from page 97 of this bill to page 154 that must be conceded to be general legislation. As I understand it, it is a general revision of the Articles of War with reference to punishments, and rules and regulations relating to the War Department, providing for methods of trial, attendance of witnesses, punishment for refusal to testify and for refusal to attend courts-martial; also providing penalties on conviction before courts-martial and providing penalties for penitentiary offenses. I am not sure but that it provides even for the punishment of capital offenses.

Mr. CHAMBERLAIN. May I call the Senator's attention to the fact that very much of this legislation is already on the statute books?

Mr. JONES. I merely wanted to ask the Senator from Oregon if he would kindly point out the important changes that this amendment proposes to make in existing rules, regulations, and law?

Mr. CHAMBERLAIN. I can do that, but I have not the data with me right now. The matter has been all very carefully analyzed and gotten together by the Judge Advocate General. We have it in that form. Let me, however, call the Senator's attention to one of the conditions that exist at present in Mexico. A short time ago, while our troops happened to be down there, one of the troopers in one of the regiments committed murder. There was another case where one of them committed a rape. In Cuba during the Spanish-American War one of the officers of the Quartermaster's Department, I think it was, or of some one of the departments, embezzled large sums of money. There was no way to reach such cases under our military code, under the old Articles of War. Conditions exist in our outside possessions that were not contemplated by the fathers of the Republic and by no Congress up to 1898. It is to meet conditions as to our troops, which are now scattered from Panama to the Orient, that this legislation has been proposed. The War Department has felt the necessity of it and has brought the matter to my attention a number of times. It has been carefully gone over, just as I have suggested, by the former Secretary of War, Mr. Garrison, who is a very able lawyer, by the Judge Advocate General and his corps, and by the Committee on Military Affairs.

I realize as much as anybody that there is much force in the suggestion of the Senator from Washington [Mr. JONES], and that of the distinguished Senator from New Hampshire [Mr. GALLINGER] as well, that it is a vicious practice to put such things on an appropriation bill; but it seems impossible to enact some of these measures without having them go through on a bill of this kind. I do not know why it is so, but it is true.

This legislation was put up to the last House of Representatives by the Senate, but it not only failed to pass the House but did not even have consideration by the committee there. At this session the legislation passed the Senate, has gone to the other House, and is now in the Committee on Military Affairs of that body; but, as I have stated, it has not been reported out.

Mr. JONES. What the Senator has said emphasizes the viciousness, if there is vice, in trying to legislate in this way. The Senator has suggested there is no way to reach the commission of some of the most heinous crimes that can be committed, and yet we are asked to legislate in reference to such matters without knowing anything about what is provided to meet a situation of that character. I suppose that the provisions in the revised Articles of War have been presented largely by the War Department, and we are going to adopt their suggestions and possibly their language without any consideration so far as the Senate is concerned and without anybody outside of the committee knowing what methods are prescribed to meet the cases which must be met under the Articles of War. The very suggestion of the Senator with reference to the character of the crimes and the provisions concerning them, it seems to me, should cause the Senate to pause a little while to give some consideration before enacting legislation to meet such a grave situation as that.

Mr. WARREN. Mr. President, if the Senator will permit me, I desire to suggest to him that separate bills embodying exactly the revised Articles of War have been passed several times by the Senate.

Mr. CUMMINS. Mr. President——

Mr. JONES. I yield to the Senator.

Mr. CUMMINS. So that we may fully understand one or two things concerning this matter, I desire to ask a question. The Senator from Oregon said that a murder had been committed by a member of the Army and in another case a rape had been committed. It is hardly accurate to say that there is no remedy provided in law for the punishment of officers or men who commit such offenses. If any soldier in the Army in New Mexico commits a murder, he is punishable under the laws of New Mexico and may be convicted in the civil courts, and if he commits the other offense in the jurisdiction of one of the States or one of the Territories, he is subject to punishment under the laws of that State or Territory. If I am wrong about that I should like to be advised.

Mr. WARREN. The particular case alluded to by the chairman of the committee occurred in old Mexico in connection with the punitive expedition which was sent down there.

Mr. CUMMINS. If committed in a foreign country during war, then I do not know what the procedure would be. I should suppose that if we were at war with the country in which the offense was committed, we could not resort to the courts of that country; but I am surprised to learn that if committed during war or while in a foreign country there is no remedy under the laws of war or the rules of courts-martial. That can not be so.

Mr. WARREN. Mr. President, if I may interrupt the Senator——

Mr. CUMMINS. Certainly.

Mr. WARREN. The cases referred to by the Senator from Oregon were reported by the commander and instructions asked for. In the meantime the culprits were being held in the guardhouse, but it seems, in view of the legal department of the Army, that the old Articles of War were not sufficient to bring about the desired punishment of these men.

Mr. CUMMINS. Of course, our excursion into Mexico was rather peculiar in its character and the status of a soldier there possibly somewhat uncertain. Suppose, however, that we had declared war against Mexico, that our soldiers had gone into Mexico in the prosecution of the war, and one trooper should kill another or one trooper should kill a civilian, if you please, is it true that there is nothing in our Military Code that would enable such a man to be tried by court-martial?

Mr. WARREN. Mr. President, I think that would be provided for; but perhaps there should have been a little more emphasis placed upon the other crime, the crime of rape. Our situation in Mexico, as the Senator has said, can hardly be described as being a condition of war; but at the same time, in view of the things that have happened down there, we can hardly say that they happened in time of profound peace.

Mr. JONES. Mr. President——

Mr. WARREN. Let me say, if the Senator from Washington will permit me, that I do not remember whether the Senator was in this body at the time, but bills embodying these revised articles of war have passed the Senate on several occasions, and they have been most thoroughly examined.

Mr. JONES. I will say that such a bill has not been discussed to any great extent, if at all, during my term of service. Of course, I know that we pass a great many measures without very much discussion, but I should hardly think that a measure of this character, of this length, and of this importance would be passed without some discussion, and I do not believe that the RECORD will show that we have passed a measure like this within the last five or six years, although I may be wrong about that.

Mr. CHAMBERLAIN. Such a bill has passed three times since I have been here.

Mr. JONES. Then, it was passed probably by unanimous consent, and without discussion.

Mr. CHAMBERLAIN. I do not recall how it was passed, but I know it has been passed three times.

Mr. JONES. There certainly could not have been very much discussion of it.

Mr. WARREN. The Senator knows that these matters have been under investigation by subcommittees, and, for that matter, by the full committee, on various occasions preceding the passage of such bills; and if the bills have not led to discussion on

the floor, it has been because the Senate believed that the subject had been pretty thoroughly examined by the legal officers of the War Department and by the committee which had the subject in charge. As the Senator from Oregon has said, a similar bill has passed the Senate three times.

Mr. JONES. I have no doubt that the committee having charge of this matter has given it very great consideration and is probably thoroughly familiar with it. I do not feel disposed to make the point of order against the amendment, but I do think that a matter of this importance, especially in view of one suggestion of the chairman of the committee, ought to have much more careful consideration than this provision is going to have here.

Mr. CHAMBERLAIN. Mr. President, let me call the Senator's attention to one of the conditions. I assume, of course, that Senators have looked into this provision as it has been printed in the bill and has been on the desks of Senators for some time. The revised Articles of War were also embodied in Senate bill 3191, which, as I have said, has already passed the Senate. An elaborate report (No. 130) was submitted on that bill on February 9 (calendar day, February 11), 1916. As an appendix to that report, the hearings on the bill were printed.

The Senator from Iowa [Mr. CUMMINS] inquired about the lack of jurisdiction to punish crimes. Let me quote from the testimony of Judge Advocate General Crowder as given in the hearings:

Further on in the article, subhead (c), you will find new language. It reads as follows.

"*Provided*, That no officer or soldier of the Marine Corps when so detached [that is, for service in the Army by order of the President] may be tried by a court-martial for an offense committed against the Articles of War for the government of the Navy prior to his detachment, and for an offense committed against these articles he may be tried by a naval court-martial after such detachment ceases."

Now, an illustration is given of a case:

The necessity for this provision was revealed by our experience last year at Vera Cruz. The Marine Corps cooperated with the Army at that place and, under the authority of an act of Congress, was placed on duty with the Army by order of the President. During the period detachments of the Marine Corps are so placed on duty with the Army they become subject to the Articles of War for the government of the Army. On the last day that the Marine Corps was so detached and serving at Vera Cruz a soldier of that corps committed a very serious offense—an assault of the grade of felony—

I am assuming, of course, that our men might be tried by the local courts in Mexico, if our people wanted to subject them to that jurisdiction; but I was speaking more particularly about the lack of power upon the part of the Army to bring them within the regulations of the Army—

Pending action in his case, the order of detachment was revoked and he resumed his place with the naval forces and came under the Articles of War for the government of the Navy. The Navy Department assumed that it could bring him to trial for his offense committed while he was on duty with the Army, as the offense committed by him was likewise an offense denounced and punished by the Naval Code. He was subsequently arraigned before a general court-martial of the Navy, and there plead to the jurisdiction of the court, claiming that his offense was committed while on duty with the Army and was an offense punishable only under the Army Code. The court overruled this plea and proceeded with his trial. He was found guilty and sentenced to imprisonment. He sued out a writ of habeas corpus before the United States district court of Philadelphia. The judge took the view that the naval court was without jurisdiction, and discharged the man. The usual procedure would have been for the Navy to have turned the man over to the Army for trial. Had this been done, we would undoubtedly have had a plea of double jeopardy to deal with. The case was not followed up, and the result was that the man got off without adequate punishment. The proviso inserted here is to clear up that situation, or rather to make it impossible of occurrence in the future.

So while in the main the law is on the statute books now, it does not meet the emergency suggested.

The next illustration is the case of camp followers and men who follow the Army. If they are guilty of different crimes, there is no way to reach them. They might be punished under the local law, but not under the Articles of War. The purpose of these provisions is to harmonize and to make a consistent whole of the articles as they are now, without any very radical changes in the Articles of War that have been in force since before the beginning of the last century.

Mr. CUMMINS. Will the Senator give me some information on this point? Our Army, I presume, will be a very large part of the time within the territory of the United States. It is to be hoped that it will not often be beyond these limits. Suppose that in the post at my own town a soldier commits an assault or murders a citizen of Iowa. Will these Articles of War give a court-martial the power to try him?

Mr. CHAMBERLAIN. In time of peace?

Mr. CUMMINS. In time of peace.

Mr. CHAMBERLAIN. Oh, the civil courts have jurisdiction then. These are Articles of War. They are to apply in time of war.

Mr. CUMMINS. I know; but these soldiers are tried by court-martial in time of peace as well.

Mr. CHAMBERLAIN. They are dealt with for crimes of that kind in the civil courts.

Mr. CUMMINS. No. Suppose a soldier is disrespectful to his officer. That is not tried in the civil courts.

Mr. CHAMBERLAIN. Those, of course, are purely military offenses.

Mr. CUMMINS. And are those offenses classified here?

Mr. CHAMBERLAIN. They are classified in this bill so as to distinguish between the offenses that come within the provisions of the Military Code and those that are subject in time of war to the military authorities and in time of peace to the civil authorities. I wish the Senator would look them over.

Mr. CUMMINS. I have not had an opportunity. I did not even know that it was contemplated. I have no knowledge about the subject at all; but I should be very sorry to see the civil courts supplanted in times of peace by courts-martial where the civil courts are open and prepared to try and acquit or convict, as the case may be.

Mr. CHAMBERLAIN. A number of illustrations are given in the hearings to which I have called the Senator's attention. We can not finish the bill to-night, and I should like to have the Senator look them over. For instance, where our Army is on foreign territory, he illustrates in the following language:

The Canadian Government has permitted us to reinforce Alaska by the overland route. The situation may arise that the Army at some time may be engaged in the peaceful occupation of foreign territory in this hemisphere. To that extent we are compelled to recognize the necessity for the amendment which I have introduced here and to which I think there can be no objection.

That is the testimony of Gen. Crowder. He has given a number of illustrations showing the necessity for this revision.

Mr. JONES. Mr. President, just a word. The Senator said that the report had been submitted and had been printed, and he assumed that Senators had seen it. Of course, the Senator knows that there are many things submitted here, and many reports printed, that Senators can not possibly examine. I try to keep track of these things just as fully as possible; but I think the Senator will agree that it is impossible for any Senator to keep track of all these things and of all these reports. I confess that the first I knew about this was when I saw the provision in the bill. I have not had time to examine the report to which the Senator refers.

I do not make the point of order, because I have confidence in the committee and because I know that the committee has given the matter very great attention. It is very much of a technical matter, and I have not the time to look into it myself, so I have to take the judgment of the committee. The judgment of the committee is just as good to me with reference to this provision in the appropriation bill as it would be with reference to a separate bill.

Mr. CHAMBERLAIN. Let me call the Senator's attention to the fact that the report to which I call his attention does what he asked me a while ago; that is, whether there had been any analysis of this part of the bill to show what changes were made in the Articles of War as they are. The very first section of the report analyzes this part of the bill and shows the changes that have been made, and further on discusses the necessity for each change.

Mr. JONES. What I had hoped, in the question I asked the Senator, was that he could indicate briefly some of the important changes that were made, and that would save my looking through this long report. The Senator did instance one or two matters that indicated the very great importance of something of this sort.

Now, I want to ask the Senator another question. Is the provision that is put in the bill here in identically the same terms as the bill that the Senate has heretofore passed?

Mr. CHAMBERLAIN. It is exactly the same as it passed the last time—exactly the same.

Mr. JONES. Very well.

Mr. CUMMINS. Mr. President, if the Senator will allow me just a moment, purely for information, in what part or section of the bill is the provision made that these general offenses shall not be punished by court-martial save in time of war?

Mr. CHAMBERLAIN. It is quite a lengthy bill. I do not know that I can put my hand on it. [Reading:]

The subject matter of the new code has been classified under five principal headings, thus bringing together related provisions and remedying a notable defect in the existing code.

I think a reading of article 74, on page 128, will answer the Senator's question. The general purpose of this revision is that it reduces some of the severe penalties fixed by the old Articles of War. The punishments are not so severe, and it is brought down to conform more nearly to the conditions of the present time.

Mr. CUMMINS. I am very much obliged to the Senator. I see that that article deals with the matter about which I asked.

Mr. CHAMBERLAIN. We can hardly dispose of it to-night. The Senator will find that it deals with this whole subject in a very careful and a very humane way, in that it alleviates some of the severe penalties that were announced in the earlier days of the Republic and gives the whole subject the order and method of a code, which has been very much lacking. There was a lack of continuity in the old Articles of War. There has been no real attempt at revision of them since 1874; and many of the provisions are those which went into effect during and immediately after the Revolutionary War and are totally inapplicable to conditions now without refinements of judicial construction.

The VICE PRESIDENT. Is this matter to be passed on now?

Mr. CHAMBERLAIN. If Senators desire it to go over, I have no desire to press it to-night; but this revision was simply presented in order to relieve a situation which has been annoying and unjust in many particulars.

Mr. CUMMINS. I do not insist that it shall go over. The committee has had more time than I shall have to look into it.

Mr. CHAMBERLAIN. Then I should very much like to have the amendment agreed to.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee embracing what are known as the Articles of War.

The amendment was agreed to.

Mr. PHELAN. Mr. President, with the consent of the chairman of the committee, I desire to state that I shall be absent to-morrow, when this bill will doubtless be passed, and there are two amendments which I submitted which I ask to be received out of order. They have the approval of the chairman of the committee and of the Secretary of War and involve no appropriation. I shall be glad to explain them in case any question is raised about them.

The VICE PRESIDENT. The Senator from California offers an amendment which will be stated by the Secretary.

The SECRETARY. On page 50, after line 2, it is proposed to insert:

That the United States hereby consents to the closing and abandoning of such public streets or parts of public streets in the city and county of San Francisco, lying north of Tonquin Street therein and east of the eastern boundary of the Presidio of San Francisco and within the site heretofore selected by the trustees of the California State Normal School of San Francisco in accordance with an act of the Legislature of California, and the United States hereby waives claim to said streets within said site and hereby grants to the State of California for the uses and purposes of said State Normal School all title of the United States thereto; and to effect the purposes hereof the Attorney General of the United States is hereby authorized and requested to cause appearance to be made in the name and on behalf of the United States in any suit to condemn the property within said site for the uses and purposes of said State Normal School in the courts of the State of California wherein the State of California is plaintiff, and in said suit, upon request of the attorney general of the State of California, to file on behalf of the United States a disclaimer on its part of any interest in said streets or the land embraced within said portions of said streets and within said site: *Provided*, That in the event said streets shall not be closed and in the event said site so selected is not used for the purposes of said State Normal School all rights of the United States shall be and remain as they are at the time of the passage of this act.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The SECRETARY. It is also proposed to insert, after the amendment just adopted, the following:

That the Secretary of War is hereby authorized to grant to the Panama-Pacific International Exposition Co. and its successors in interest a permit to occupy such portion of the Presidio of San Francisco Military Reservation as may be designated by the Secretary of War for the purpose hereinafter set forth, subject to the said privilege being revoked at any time when, in the opinion of the Secretary of War, the military necessities of the United States shall require the use of said portion of said Presidio of San Francisco Military Reservation for the purpose of maintaining thereon, making repairs upon, or alterations in said Palace of Fine Arts and its appurtenances, approaches, and planting about the same for the use of said Panama-Pacific International Exposition Co. and its successors in interest; and the United States hereby cedes to the State of California such jurisdiction over said portion of said military reservation as the said State now possesses elsewhere within its territory, such cession to be coextensive territorially with the lands, the use whereof may be granted to the Panama-Pacific International Exposition Co. and its successors by the Secretary of War in accordance herewith and to terminate without further action on the part of the State of California upon the revocation or termination of the privilege: *Provided*, That the cession of jurisdiction made by this act shall take effect upon the termination of the cession of jurisdiction made by the joint resolution of Congress approved October 22, 1914, on the condition that the same is accepted by the Legislature of the State of California at its first session after the passage of this act, this cession to be without prejudice to the jurisdiction of the United States to try and punish all crimes committed within said portion of said military reservation prior to the date jurisdiction vested in the State under said joint resolution approved October 22, 1914: *Provided further*, That when the United States shall resume possession of said lands, or any part thereof, the jurisdiction herein ceded over said lands so repossessed shall revest in the United States: *And provided further*, That in the event of the failure of said Exposition Co., or its successors, on the revocation of this privilege, to remove the buildings and improvements thereon, they shall then vest in and become the property of the United States.

Mr. PENROSE. Mr. President, do I understand the Senator from California to say that this amendment has been approved by the War Department?

Mr. PHELAN. Yes, sir. It was approved and prepared by the War Department.

Mr. PENROSE. Prepared by the War Department? It is a rather extraordinary provision, and does not seem to me to safeguard the Government entirely. Is it contemplated to maintain these exposition buildings permanently?

Mr. PHELAN. If the Senator will permit me, I will briefly state the object of the amendment.

Mr. PENROSE. Yes; I think some explanation of the amendment ought to be placed in the RECORD.

Mr. PHELAN. This relates only to the Art Palace. The Art Palace was the most conspicuous and best building at the exposition. A part of it lies over the Presidio line, and the rest of it over the city line and on city property. It is the intention of the people there to maintain it as long as it will stand. It is not a permanent building. It probably has a life of 10 years. The Secretary of War and the department agreed to a revocable permit, but in a letter the Secretary stated, for the information of the Panama-Pacific people, that the revocable permit would terminate on December 31, 1919. Secretary Garrison agreed to extend the term for two more years. Secretary Baker has extended it for three years. So the people well understand that it is a revocable permit, and that is the whole purpose and intent of the amendment.

Mr. PENROSE. Is there a written communication from the War Department on the subject of this amendment?

Mr. CHAMBERLAIN. The Secretary of War addressed to me a letter under date of July 6, which I will ask to have printed in the RECORD.

Mr. PENROSE. I should like to have that done.

Mr. CHAMBERLAIN. The Secretary of War made many changes in the amendment or resolution as it was originally prepared; and as it now reads it is approved by him. I ask to have his letter printed in the RECORD.

The VICE PRESIDENT. In the absence of objection, that may be done.

The letter referred to is as follows:

WAR DEPARTMENT,
Washington, July 6, 1916.

Hon. GEORGE E. CHAMBERLAIN,
Chairman Committee on Military Affairs, United States Senate.

SIR: In reply to your request of June 21, 1916, asking for the views of the department relative to joint resolution No. 144 and H. R. 16460, waiving claim on the part of the United States and consenting to the closing and abandonment of certain public streets and parts of public streets in the city of San Francisco, State of California, I have the honor to inform you that the contemplated legislation will do no injury whatever to the interests of the United States, and does not encroach in any way on the Presidio Reservation.

There is no objection on the part of the War Department to the passage of joint resolution No. 144 and H. R. 16460 as drawn.

Very respectfully,

NEWTON D. BAKER,
Secretary of War.

Mr. PENROSE. Can the Senator from California inform me as to how much of the Presidio ground is taken by this art museum?

Mr. PHELAN. It is the main body of the art museum that lies on the Presidio ground, where the pictures were exhibited. The columns and the lakes are on the city ground. On the Presidio, I believe, there are 6 acres of land occupied.

Mr. PENROSE. What is the total acreage?

Mr. PHELAN. One thousand five hundred acres.

Mr. PENROSE. Mr. President, I should like to make one more inquiry. I do not want to oppose this amendment. Is there anything in the amendment to safeguard the Government in case this museum should be diverted to some other purpose and pass into other hands?

Mr. PHELAN. The protection of the Government is in the revocable character of the permit, and there is a provision that the Government can take possession of the building at any time. The salvage is estimated to be of very much more value than the cost of demolition. That is the protection of the Government.

Mr. PENROSE. Would there be any objection to putting a limitation in the amendment such as was in the original act, say, of 10 years?

Mr. PHELAN. I think it would be objectionable to the Secretary, because he has already intimated that it will terminate December 31, 1919, and in the nature of things it would cost a quarter of a million dollars to make it a permanent building. This is merely holding the plaster on the surface in the interest

of art. There is an exhibition there now and it is expected to have an annual exhibition of art until we get a permanent museum in another part of the city.

Mr. PENROSE. Does the Senator think this amendment would lapse by 1919?

Mr. PHELAN. We have already been informed by the Secretary of War that he can not consent to a further extension. I do not say that he can not consent; he has the power to consent, but he is discouraging the city from spending money upon that building, and the city agrees with him that it is of a temporary character and that it would be wasteful to spend money on the building there. Until a permanent art building in the Golden Gate Park is constructed it is used for annual exhibitions.

I will put into the RECORD a communication from the Secretary of War which will answer the Senator's question:

WAR DEPARTMENT,
Washington, July 21, 1916.

MY DEAR SENATOR: I inclose you a statement by the Judge Advocate General covering the amendments deemed necessary in Senate resolution No. 39, and a copy of the resolution with suggested amendments appearing thereon, and also a copy of the revocable permit which it is proposed to issue in the event that the resolution is enacted as suggested.

Very truly, yours,

NEWTON D. BAKER,
Secretary of War.

Hon. JAMES D. PHELAN,
United States Senate.

WAR DEPARTMENT,
OFFICE OF THE JUDGE ADVOCATE GENERAL,
Washington, July 20, 1916.

Memorandum for the Secretary of War.

Subject: Amendment to Senate joint resolution 39 (64th Cong., 1st sess.), so as to authorize the Secretary of War, to grant a revocable permit for the maintenance of the Palace of Fine Arts upon the Presidio of San Francisco Military Reservation, and draft of form of permit to be granted under said amended resolution.

1. The resolution in its present form grants to the Panama-Pacific International Exposition Co. a revocable license to occupy such portion of the Presidio of San Francisco Military Reservation as may be designated by the Secretary of War, for the purpose of maintaining, etc., thereon the Palace of Fine Arts Building and its appurtenances, the said privilege to be revocable at any time by the Secretary of War, when in his opinion the military necessities of the United States so require. The only authority and duty devolving upon the Secretary of War under the resolution as drawn is to designate the portion of the reservation to be occupied and to revoke the privilege granted thereby whenever in his opinion the military necessity demands it.

2. To authorize the issuance of the permit or license by the Secretary of War, the resolution should be amended as follows:

In the second line of the title, strike out the word "granting" and insert in lieu thereof the words "authorizing the Secretary of War to grant," and in the enacting part of the resolution, on the third page, in the third line, strike out the words "the United States hereby grants" and insert in lieu thereof the words "the Secretary of War is hereby authorized to grant." Also, in the twentieth line, page 3, strike out the words "is hereby," and insert in lieu thereof "may be," in the first line of the fourth page, strike out the words "as the same shall hereafter be designated," and in the fourth and fifth lines of the same page, strike out the words "of the privilege hereby granted" and insert "or termination of the privilege."

3. That part of the resolution ceding jurisdiction to the State appears to be defective in that it reserves to the United States jurisdiction to try and punish all crimes committed within said portion of the military reservation to be occupied thereunder prior to the date this cession becomes effective (see fourth page, lines 5 to 8), while under the joint resolution of Congress approved October 22, 1914 (38 Stat., 783), the State of California was granted jurisdiction over that portion of the reservation occupied for exposition purposes, including this site. Said joint resolution of October 22, 1914, provides:

"That the United States hereby cedes to the State of California such jurisdiction over the said portions of the said military reservations as the said State now possesses elsewhere within its territory, such cession to be coextensive territorially with the said permits of April 22, 1912, and April 10, 1914, and to terminate upon their expiration: *Provided*, That jurisdiction to try and punish all crimes committed within said portions of said military reservations prior to the date that this cession becomes effective is reserved to the United States: *Provided further*, That the cession of jurisdiction made by this resolution shall not take effect until the same is accepted by the legislature of the State of California: *And provided further*, That when the United States shall resume possession of the said lands or any part thereof, the jurisdiction herein ceded over lands so repossessed shall revest in the United States."

4. It is believed that this part of the resolution should be amended as follows:

Beginning with the word "jurisdiction" in the fifth line, page 4, strike out the balance of the page and insert in lieu thereof the following:

"the cession of jurisdiction made by this resolution shall take effect upon the termination of the cession of jurisdiction made by the joint resolution of Congress approved October 22, 1914, on the condition that the same is accepted by the Legislature of the State of California at its first session after the passage of this resolution, this cession to be without prejudice to the jurisdiction of the United States to try and punish all crimes committed within said portion of said military reservation prior to the date jurisdiction vested in the State under said joint resolution approved October 22, 1914: *Provided further*, That when the United States shall resume possession of said lands or any part thereof the jurisdiction herein ceded over said lands so repossessed shall revest in the United States."

5. It appears, furthermore, from the correspondence in this case on file in the office of the Quartermaster General that in accordance with an understanding reached with the Secretary of War Senator Phelan has agreed to have added to this resolution the following proviso:

"*Provided further*, That in the event of the failure of said exposition company or its successors on the revocation of this privilege, to remove the buildings and improvements thereon, they shall then vest in and become the property of the United States."

6. I think the resolution modified as above outlined would authorize the issuance of a permit such as suggested by you. Draft of form of such permit is inclosed herewith.

7. With respect to the granting of a revocable permit for the privilege desired in this case without legislative authority, I have concluded, upon further examination and consideration of the matter, that the Secretary of War has no legal right to do this. The act of Congress authorizing the occupation of the reservation for exposition purposes provided for the termination of the exposition on December 31, 1916, and the said act and license granted by the Secretary of War under its authority provided that all the buildings thereon, except those taken for the purposes of the United States, should be removed from the reservation on or before the said date. Besides, the War Department has already taken the position upon an application for a license by the Secretary of War granting the privilege desired in the present instance, that the Secretary of War is without authority to grant such license.

E. H. CROWDER,
Judge Advocate General.

Mr. GALLINGER. It seems that this building occupies now a portion of the Presidio.

Mr. PHELAN. Yes; it laps over the Presidio on the easterly end.

Mr. GALLINGER. Was that privilege granted by Congress?

Mr. PHELAN. Congress gave that permission to the Panama-Pacific Exposition, but it terminates in 1917.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. PENROSE. Will the Senator permit me? I have known two or three cases where this has been grossly abused. I do not say there is a disposition in this case to do so, but would the Senator object to having a proviso added to his amendment:

Provided, That the privileges herein granted shall only apply so long as the building in question is used as an art museum, and for no other purpose.

Mr. PHELAN. That is quite agreeable. That is the only purpose they have in view.

Mr. PENROSE. I suggest that amendment to the amendment.

The VICE PRESIDENT. Then the Senate will have to reconsider the vote by which the amendment was agreed to.

Mr. CHAMBERLAIN. I ask that the vote by which the amendment was adopted be reconsidered for the purpose of accepting the amendment to the amendment.

The motion to reconsider was agreed to.

Mr. GALLINGER. Let the amendment be read.

The Secretary read as follows:

Provided, That the privileges herein granted shall only apply so long as the building in question is used as an art museum, and for no other purpose.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. CUMMINS. There were two amendments proposed by the committee passed over in the morning. One of them is on page 67, the other on page 68. I would be very glad to have them disposed of now if it is agreeable to the Senator in charge of the bill.

Mr. CHAMBERLAIN. I would be glad to have them taken up.

Mr. CUMMINS. The first amendment is, at the top of page 67, inserting lines 3, 4, and 5, in the following words:

Provided, That the Government shall manufacture at its arsenals as much of said ammunition as can be produced by the exercise of the greatest economy and efficiency.

I move to amend the committee amendment by striking out the last line, namely, line 5, in the following words:

by the exercise of the greatest economy and efficiency;

And inserting in lieu thereof:

operating said arsenals at full capacity if necessary, but having due regard to economy and efficiency in operation.

Mr. CHAMBERLAIN. So far as I am concerned, I will accept that amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. CUMMINS. On page 68, in the amendment beginning in line 7, I move to strike out the words "by the exercise of the greatest economy and efficiency" in lines 8 and 9, and insert:

operating said arsenals at full capacity if necessary, but having due regard to economy and efficiency in operation.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

EXECUTIVE SESSION.

Mr. CHAMBERLAIN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 11 minutes spent in executive session the doors were reopened.

PETITIONS AND MEMORIALS.

Mr. GALLINGER presented petitions of the New York State Federation of Labor, the Amalgamated Association of Street and Electric Railway Employees of America, and the Arizona State Federation of Labor, praying for the enactment of legislation to further restrict immigration, which were ordered to lie on the table.

He also presented petitions of Samuel E. Hilles, of New London; Samuel L. Drury, of Concord; and A. F. Tappan, of Cornish, in the State of New Hampshire; of Mary A. Sherwood, of Lyons; T. W. Wood, of New York City; and Beatrice Van H. Stevenson, of New York City, in the State of New York; of Ellen N. Rourke, of Des Moines, Iowa; Graham Taylor, of Chicago, Ill.; Mrs. J. E. Goodrich, of Burlington, Vt.; of the Joseph W. Houston Co., of Pittsburgh, Pa.; Lucy Fitch, of Berlin, Wis.; Mary Corke Blanch Mudford, of Richmond, Va.; and of Edith Bower, of Wilkes-Barre, Pa., praying for the enactment of legislation to prohibit interstate commerce in the products of child labor, which were ordered to lie on the table.

Mr. WADSWORTH presented a memorial of the Western New York Conference of the Seventh-day Adventists, held at Rochester, N. Y., remonstrating against the enactment of legislation to limit the freedom of the press, which was ordered to lie on the table.

Mr. NELSON presented a petition of the Commercial Club of Rush City, Minn., and a petition of the Commercial Club of Owatonna, Minn., praying for the enactment of legislation to permit the Interstate Commerce Commission to settle the difficulties between the railroads and their employees, which were referred to the Committee on Interstate Commerce.

He also presented a telegram in the nature of a memorial from E. E. Simmons, of Minneapolis, Minn., remonstrating against the proposed tax on munitions of war, which was referred to the Committee on Finance.

PUBLIC BUILDING AT PITTSBURGH, PA.

Mr. SWANSON, from the Committee on Public Buildings and Grounds, to which was referred the bill (S. 6601) for the enlargement of the post-office building in Pittsburgh, Pa., reported it without amendment and submitted a report (No. 728) thereon.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. O'GORMAN:

A bill (S. 6699) to extend the time of the Hudson River Connecting Railroad Corporation for the commencement and completion of its bridge across the Hudson River, in the State of New York (with accompanying papers); to the Committee on Commerce.

By Mr. POINDEXTER:

A bill (S. 6700) granting an increase of pension to John L. Fisher (with accompanying papers); to the Committee on Pensions.

By Mr. COLT:

A bill (S. 6701) granting an increase of pension to Clementine Richards; to the Committee on Pensions.

By Mr. OVERMAN:

A joint resolution (S. J. Res. 156) appropriating $25,000 to remove jetties and other obstructions from French Broad River; to the Committee on Commerce.

AMENDMENTS TO ARMY APPROPRIATION BILL (H. R. 16460).

Mr. WORKS submitted an amendment proposing to appropriate $300,000 for the acquisition, by purchase or condemnation, of a site at Coronado Heights, San Diego County, Cal., for aviation-school purposes, etc., intended to be proposed by him to the Army appropriation bill, which was ordered to lie on the table and to be printed.

Mr. WEEKS submitted an amendment providing that $250,000 be expended in the purchase of material and in the construction of tent floors, framing for screens, and screens, to be added to the equipment of the tents now being used by the National Guard on the Mexican border, etc., intended to be proposed by him to the Army appropriation bill, which was ordered to lie on the table and to be printed.

He also submitted an amendment appropriating $500,000 to provide for the necessities and comfort of those in the military and naval forces in time of war or when war, in the opinion of the President, is imminent, to be transferred in whole or in part as the President may determine to the American Red Cross, etc., intended to be proposed by him to the Army appropriation bill, which was ordered to lie on the table and to be printed.

Mr. LA FOLLETTE submitted an amendment proposing to appropriate $2,000,000 for the support, at a cost of not more than $50 per month, or so much of said amount as the Secretary of War may deem necessary, and not more than such enlisted man has been contributing monthly to the support of his family at the time of his being drafted, of the family of each enlisted man of the National Guard called or drafted into the service of the United States until his discharge from such service, etc., intended to be proposed by him to the Army appropriation bill, which was ordered to lie on the table and to be printed.

He also submitted an amendment proposing to amend section 27 of the act making further and more effectual provision for the national defense, and for other purposes, relative to the enlistments in the Regular Army, intended to be proposed by him to the Army appropriation bill, which was ordered to lie on the table and to be printed.

REGULATION OF IMMIGRATION.

Mr. POINDEXTER submitted an amendment intended to be proposed by him to the bill (H. R. 10384) to regulate the immigration of aliens to and the residence of aliens in the United States, which was referred to the Committee on Immigration and ordered to be printed.

AMENDMENT TO THE RULES.

Mr. LA FOLLETTE. I desire to give notice that on Tuesday, July 25, or as soon thereafter as possible, I shall move to suspend that provision of paragraph 1 of Senate Rule XVI, which provides that no amendment shall be received to a general appropriation bill, the effect of which will be to increase an appropriation or to add a new item of appropriation, unless it be made to carry out the provisions of some existing law or treaty stipulation, or act or resolution, previously passed by the Senate during that session, or unless the same be moved by direction of a standing or select committee of the Senate, or proposed in pursuance of an estimate of the head of some one of the departments, and also that provision of paragraph 3 of Senate Rule XVI, prohibiting any amendment proposing general legislation to any general appropriation bill, for the purpose of offering the following amendment to the bill (H. R. 16460) making appropriations for the Army for the fiscal year ending June 30, 1917, and for other purposes, by adding to the bill after line 5, page 91, a new paragraph to read as follows:

That the sum of $2,000,000 is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to be expended under the direction of the Secretary of War, and under such rules and regulations as he may prescribe, for the support of, at a cost of not more than $50 per month, or so much of said amount as the Secretary of War may deem necessary, and not more than such enlisted man has been contributing monthly to the support of his family at the time of his being drafted, the family of each enlisted man of the National Guard called or drafted into the service of the United States until his discharge from such service, which family during the term of service of such enlisted man has no other income, except the pay of such enlisted man, adequate for the support of said family: *Provided*, That the action of the Secretary of War in all cases provided for in this act shall be final, and no right to prosecute a suit in the Court of Claims or in any other court of the United States against the Government of the United States shall accrue to such enlisted man, or to any member of the family of any such enlisted man, by virtue of the passage of this act: *And provided further*, That this act shall not apply to any such elisted man called or drafted into the service of the United States who shall marry after the 1st day of July, 1916; and the word "family" shall include only wife, children, and dependent mothers.

I ask that the notice lie over and be printed.

The VICE PRESIDENT. It will be so ordered.

Mr. REED. I wish to give notice that on Tuesday, July 25, or as soon thereafter as possible, I shall move to suspend that provision of paragraph 1 of Senate Rule XVI, which provides that no amendment shall be received to a general appropriation bill the effect of which will be to increase an appropriation or to add a new item of appropriation unless it be made to carry out the provisions of some existing law or treaty stipulation, or act or resolution, previously passed by the Senate during that session, or unless the same be moved by direction of a standing or select committee of the Senate, or proposed in pursuance of an estimate of the head of some one of the departments, and also that provision of paragraph 3 of Senate Rule XVI, prohibiting any amendment proposing general legislation to any general appropriation bill for the purpose of offering the following amendment to the bill H. R. 16460, making appropriations for the Army for the fiscal year ending June 30, 1917, and for other purposes, by adding to the bill, after line —, page —, the following:

The pay of the National Guard and the Naval Militia when called into the service of the United States and the pay of any volunteer army or navy while in the service of the United States, shall be as follows:

First sergeant, $45 per month; sergeant, $40 per month; corporal, $35 per month; private, $30 per month; the pay of all officers in rank above first sergeant to be the same as is now received by officers of corresponding rank in the Regular Army or Navy.

SEC. 2. That the provisions of this amendment shall be in full force and effect from and after its passage and approval.

I ask that the notice lie over and be printed.

The VICE PRESIDENT. It will be so ordered.

Mr. STONE. I move that the Senate adjourn.

The motion was agreed to; and (at 6 o'clock and 20 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, July 25, 1916, at 10 o'clock a. m.
